5 Best EMF Radiation Safety Meters and Detectors

written by [Christian](#)

I recommend EMF meters in many of the articles here on EMF Academy, and for what I think is a very good reason. If you're here, reading this article, I'm going to assume you already have a baseline understanding that EMF radiation from devices like your cell-phone, laptop, tablet, etc is dangerous. With that understanding, the absolute best tool you can arm yourself with is a quality EMF meter, that is accurate, simple to use, and measures all types of EMF radiation. In this enormous guide, **I'm going to share with you what I think are the absolutely the 5 best EMF meters and detectors you can purchase in 2019.**

Donâ... t worry though, Iâ... m not going to leave you stranded. Iâ... ll also thoroughly discuss why each meter was chosen, what itâ... s capabilities are, and why it might be a good fit for you.

After we get done reviewing and talking about the EMF meter choices, weâ... ll go into a bit more depth about why an EMF meter can be such a valuable tool in your fight against EMF radiation.

Wanna Skip Ahead? These Links Will Jump You On Down:

- [1. Trifield TF2](#)
- [2. Acoustimeter AM-10](#)
- [3. Cornet ED88T](#)
- [4. Meterk](#)
- [5. Latnex HF-B3G](#)
- [Why Do I Need An EMF Meter?](#)
- [Final Thoughts](#)

Letâ... s jump right into the reviews!

5 Best EMF Meters and Detectors of 2019

Each of the following EMF meters was chosen based off of a variety of factors, including but not limited to:

- **Accuracy**
- **Ability to measure all types of EMF radiation**
- **Cost**
- **User Friendliness**
- **Features**

Youâ... ll notice that the meters are certainly not ranked just based on most expensive to least expensive, and that is for good reason. For example, the Trifield TF2 is my number one recommendation but is much more affordable than, for example, the Acoustimeter AM-10. Although the Acoustimeter is a fantastic device, I believe the Trifield delivers a fantastic product at less than half the price. These rankings are therefore a cumulation of all of the factors bulleted above.

With that in mind, this list, although thoroughly researched and designed, is open to interpretation. Iâ... d encourage you, if you disagree with my review or ranking, to let me know in the comments, or by emailing me personally at Christian@EMFAcademy.com and let me know your thoughts.

I was not gifted any of the devices I review in this article, nor have I communicated with any of the companies. My rankings and reviews are based entirely on my own use of the products, experience, research, and opinion.

With that mouthful out of the way, letâ... s talk about my first pick, the Trifield TF2

1. Trifield TF2

[See the Amazon listing here.](#)

If you've been around EMF Academy long, you know that I love to recommend the Trifield TF2, and I think it's for a good reason. The TF2 is Trifield's follow up to the wildly popular 100XE model that had an analog needle display, but similar functionality. The TF2 brings some much-needed modernization to an already fantastic EMF meter.

I won't go too in-depth about the product in this post, because I already wrote up a [full review of Trifield TF2](#), however, I do want to give you a good understanding of why I love this EMF meter so much, and why it is the one I find myself using for just about everything.

Let's start by talking about some of the features.

Trifield TF2 Features

- Can measure all three major types of EMF radiation, including Magnetic, Electric, and Radio Frequency/Microwave radiation
- *New* weighted mode is specifically designed to measure EMF radiation in the human body.
- The Magnetic setting uses a 3-axis sensor. This allows you to get accurate readings regardless of which way you're pointing the meter.
- Brand new LCD display offers much more information than the 100XE was able to, making testing a breeze.
- Since there is a digital display, there is also a backlight which allows you to get readings even in low-light settings.
- The TF2 now has an audio output to help you hear the EMF radiation around you. This can be extremely helpful for locating sources of radiation in your home.

What Can You Measure With The Trifield TF2 EMF Meter?

- Cell Phones
- Tablets
- Cell/Mobile Tower RF Radiation
- [Smart Meter](#) Radio Frequency Radiation
- [WiFi Radiation](#) from your router or other sources
- [Bluetooth](#) Radiation
- [Powerline](#) Radiation
- Laptop and desktop computer radiation

- TV radiation
- Home Appliance Radiation such as [refrigerators](#) and [washing machines](#)
- EMF radiation [inside of vehicles](#)
- Find the location of EMF radiation coming from your wiring via [dirty electricity](#)
- â...!And anything else that emits EMF radiation

Ok, now letâ... s walk over some of the pros, and cons, of the Trifield

TF2

Pros Of The Trifield TF2

1. **The Display â...** I personally love the display of the Trifield TF2 more than any of the other EMF meters on the market. It provides an enormous amount of information in a way that is simple to find and easy to understand.
2. **The Price â...** The TF2 is [very competitively priced](#), and honestly is an absolute bargain for what you get. Trifield meters are famous for their construction quality, so expect to not have to replace this meter any time soon.
3. **User-Friendly â...** Whether you are an expert on EMF radiation (perhaps youâ... ve read all the content on EMF Academy ð “), or youâ... re just starting out, the Trifield works well for both. Trifield meters have long been popular because they are very simple to operate, making them great for beginners, but also have the accuracy and functionality that professionals are looking for. I personally think with the added LCD display, and â... peakâ... indicator, the TF2 is an even easier unit to operate.
4. **Audio â...** One of my absolute favorite additions of the Trifield TF2 is the audio output. Although if youâ... re trying to determine actual EMF radiation levels of certain things, you will want the field indicator, if you are just trying to move around your home and locate EMF radiation sources, the audio is fantastic. Using the audio, you donâ... t even need to look at the display. Also, since the TF2 is a tri-axis EMF meter, directionality doesnâ... t matter for the display, or for the audio output.
5. **Measures All EMFs â...** This was one of the main reasons I recommended the Trifield 100XE in the past because it measured magnetic, electric, and radio frequency radiation, when some other meters did not. If you care about EMF radiation in your home, you need to be able to measure all types of radiation.

Cons Of The Trifield TF2

1. **Audio And Backlight Buttons** â... I found it a bit frustrating that both of these buttons can only be accessed by removing the battery cover. I think they were trying to maintain a slick and simple look by only having the dial on the front of the unit, however, I wish that they had made these two buttons easier to access.
2. **Weighted Mode** â... For a professional user, having weighted mode is handy. However for the average person using the Trifield TF2 to measure EMF radiation in their home or office, this option might be a bit confusing. (**Pro-tip:** just ignore the weighted mode unless you know a reason you need it.)

Where Can You Buy The Trifield TF2 EMF Meter?

The best place to get the Trifield TF2 is [on Amazon](#). Feel free to take a minute and read through some of the 5 star reviews. However, remember that this new version hasnâ... t been around long, so there arenâ... t all that many reviews yet.

Technical Specifications

I donâ... t want to bore you with all of the specs, if youâ... re curious about them head over to [my full TF2 review](#), Iâ... ll just give you a few important highlights.

AC Magnetic Mode

Frequency range 40Hz â... 100KHz
3 â... axis

AC Electric Mode

Frequency Range: 40 Hz â... 100 KHz
1-axis

Radio Frequency Radiation Mode

Frequency Range: 20 MHz â... 6 GHz
1 â... axis

TF2 Battery Life

9V alkaline battery included
Battery life with backlight off > 20 hrs
Battery life backlight on > 12 hrs

Here is a nice video showing the Trifield TF2 in action to give you an idea of how it works.

Final Thoughts On The Trifield TF2

I honestly wouldn't rate the Trifield TF2 my absolute best EMF meter in 2019 if I didn't truly believe in the product. I've used many EMF meters, and I always find myself going back to the Trifield. The price is extremely reasonable, and you honestly will love how accurate and simple to operate this device is. There are other great EMF meters on the market that we'll talk about next, but this is my #1 choice.

2. Acoustimeter AM-10 RF Meter

[Check out the Amazon listing here.](#)

The Acoustimeter is probably without a doubt the best Radio Frequency (RF) meter on the market. It is extremely accurate, simple to use, and preferred by professionals. However it does have its downsides, for example, it only reads RF radiation, and is not designed to read electric field or magnetic field radiation. We'll talk more about the positives and negatives of the Acoustimeter in a second, I just want to say that if you are looking strictly for an RF meter, this is the one you need.

There is a reason that you will see the Acoustimeter AM-10 in the hands of so many professionals, it is extremely accurate and simple to use.

Let's talk a little bit about why this might be a great meter for you.

Things I Love About The Acoustimeter AM-10

Sensitivity â... To start with, the Acoustimeter is one of the most sensitive RF meters on the market, capable of reading even the smallest amounts, of the lowest radio frequencies and displaying them. Not only that, but it also has fantastic directional sensitivity. This will allow you to easily locate the direction that the largest RF radiation sources are coming from by simply moving your Acoustimeter in a circle and watching the display to see peak readings.

I have a great [guide](#) on how to see a map of every cell tower near your home. Youâ€¦ I find that if you pull that map up, and locate the nearest cell tower, your Acoustimeter should show the highest readings when pointed towards it. This demonstrates the Acoustimeterâ€™s ability to help you locate dangerous sources of radio frequency radiation. You are also likely going to be able to locate things like your neighborâ€™s WiFi router, that is how sensitive the Acoustimeter can be.

Frequency Range â€¦ The next thing I really like about the Acoustimeter is its enormous frequency range that it is able to measure. For example, the Trifield TF2 is capable of reading up to 6Ghz (which for now is probably plenty) whereas the Acoustimeter can read all the way up to 8Ghz, giving you a wider range that you are able to measure.

Ease Of Use â€¦ Next, the Acoustimeter is really simple to use. There is a simple display at the top, as well as two rows of LED lights below. When using the meter, I personally like to plug in a pair of headphones into the audio jack (with or without the headphones) and use the audio to help me locate sources of RF radiation.

Once I hear some noise and know that there is RF radiation near, I primarily look at the lefthand row of LEDâ€™s, which shows the peak V/m readings.

Then once I see a spike in RF radiation from the lights, Iâ€¦ I check the small LCD screen at the top to get accurate readings. If you take a look at the small screen to the right, you can see what will typically be displayed. Here is how you would read this screen:

- The 5.29 in brackets is showing you the â€¦ peak holdâ€¦ reading in V/m, which is the highest reading that has been recorded since you turned the Acoustimeter on.
- The 2.45 is the current peak signal strength measured in V/m, which will correspond to that left row of lights.
- The 140 $\mu\text{W}/\text{m}^2$ is the average reading measured in microwatts per square meter and will correspond to the right row of lights.

Overall I find the Acoustimeter really easy to use, especially once you get a used to it.

Things I Donâ€™t Like About The Acoustimeter

Cost â€¦ First of all, it is a fairly expensive device relative to its features. At more than double the price of the TF2 (at the time of this writing), you certainly want to make sure this is the device for you before purchasing. Iâ€™m not saying that it isnâ€™t worth the price, because honestly for the right person it absolutely is. Just understand that you are paying for the accuracy and quality of the machine, not for bloated features.

Size â€¦ Next, the device is relatively bulky. Iâ€™m hoping that future models are designed a little bit slimmer and sleeker.

Limitation â€¦ It is unfortunate that the Acoustimeter only measures RF radiation, and not magnetic or electric. This is intended, as this meter is entirely focused on being a top of the line radio frequency meter, however it means that to measure all forms of EMF radiation youâ€™ll need more than one meter.

Final Thoughts On The Acoustimeter

Overall I think the Acoustimeter is a fantastic device and the best Radio Frequency meter on the market in my opinion. Itâs simple to use, extremely accurate, and a very sturdy device that should last a very long time.

If youâre interested in purchasing the Acoustimeter, the best place to purchase it is [right here on Amazon](#).

3. Cornet ED88T EMF Meter

[Check out the Amazon listing here.](#)

Other than the Trifield TF2, the Cornet ED88T might be one of the most popular EMF meters on the market. In terms of features and price, itâs actually quite similar to the TF2, but there are a few reasons Iâve ranked it a bit lower. All in all, itâs a quality meter by a great company that I donât think youâll be disappointed with.

Letâs jump right into talking about some of the things I like and donât like about the Cornet ED88T.

Things I Like About The Cornet ED88T

Measure All EMF Radiation â First of all, just like any great EMF meter, the Cornet ED88T measures all three types of EMF radiation, including radio frequency, magnetic field, an electric field. This, in my opinion, is one of the most important features of a good EMF meter, as youâll want to know the measurements of all three when measuring your home or office.

Frequency Readings â One of the reasons that many people purchase the Cornet ED88T is that it not only gives you a reading of the RF radiation in terms of signal strength like the Acoustimeter did, but will also show you the actual frequency that it is picking up in a range of 100 Mhz to 2.7 GHz. This is an extremely helpful

Radio Frequency Sensitivity â Other than the Acoustimeter, the Cornet ED88T is probably the next best meter for detecting Radio Frequency radiation. It has a similar range of 100MHz â 8GHz and appears to be extremely accurate. This is partly due to its extremely fast sampling rate of 10,000 samples/sec.

Sound Feature â I like that the Cornet does feature a sound output for Radio Frequency radiation readings, which I personally find extremely helpful when measuring radiation in a space like a home or an office.

Reading History â... This is one of my absolute favorite features of the Cornet. While youâ... re using the meter, it displays the last 30 readings, so you can look back and find spikes after scanning a room or a home. This can be especially helpful for getting readings from things that have a tendency to pulsate, such as Smart Meters. Smart meters usually have extremely high spikes or radiation when transmitting information, however, this occurs very quickly and it can be hard to get an accurate reading. With the Histogram feature, this is a piece of cake and you can easily look back at the reading.

Ok, now letâ... s talk a little bit about some of the things I donâ... t really love about the Cornet ED88T.

Cons Of The Cornet ED88T

User Friendliness â... I donâ... t personally feel like the Cornet ED88T is all that user-friendly. There are only a few buttons, which you would think would be a good thing, but it is not clear what they do, and I found that when first using the device I was stumbling around a bit. In contrast, I found the Trifield TF2 to be almost impossible to not use correctly, as you simply turn the large dial on the front to what you want to measure, and off you go.

I also felt like the user manual that comes with the Cornet ED88T was not all that helpful in showing you how to properly navigate the device.

Units of Measurement â... I personally prefer to read magnetic fields in milliGauss, however, the primary reading number of the device is in Tesla (it does show the mG, however, itâ... s the smaller number below the larger Tesla number). This also canâ... t be changed, youâ... ll always be looking at the smaller number to find the milliGauss. All of the other units of measurement displays can be changed in the settings luckily.

Final Thoughts On The Cornet ED88T

The Cornet ED88T is a very popular meter and preferred by many professionals over meters and detectors like the Trifield TF2. It does have some unique functionality, like reading the frequency range of Radio Frequency. I personally donâ... t find it as user-friendly as the TF2, but it is an extremely high-quality meter with very similar functionality. I certainly donâ... t think youâ... ll go wrong if you purchase the Cornet ED88T.

If youâ... d like to purchase the Cornet ED88T [you can pick it up on Amazon](#).

4. Meterk EMF Detector

[Check out the Amazon listing here.](#)

Next, I want to take a look at the Meterk, which is on this list primarily because it is, in my opinion, the best budget-friendly EMF meter on the market. I won't go into too much detail about the Meterk here, as I have an [entire review](#) you can check out if you're looking for more information. If you [check the price](#) on Amazon, you'll see that this device falls FAR below the other meters we've talked about in this article. Now there is a reason for this, the Meterk does not have nearly the features or build quality of these other meters, however for the price, I think it is the best on the market.

This is also a fantastic EMF meter if you're someone with little experience, that does not feel like spending a significant amount of money on an EMF meter right away. This allows you to get a feeling for how these devices work, the information they can provide you, how that information can benefit you, etc. Later down the road after you realize how important these devices are, you can opt for a bit higher quality, more feature-rich device like the Trifield or the Cornet.

Let's talk about some of the reasons I think the Meterk is a good value for the money, and then we'll talk about a few of the things you'll find are missing from this EMF detector.

Pros of the Meterk EMF Meter

Price ... Obviously the most obvious benefit of the Meterk EMF meter is its extremely low cost. There are a few reasons for this, with the largest being the fact that it is developed and manufactured in China, so they are able to produce it at a very low cost. This can also be a bit of con, which we'll talk about below. All-in-all though you won't find an EMF meter on the market with reasonable functionality, and good reviews, that is less expensive than the Meterk.

Sleek Design ... I have the Meterk meter, and I can tell you that it is even smaller and lighter than you would expect, in fact, it's almost identical in size to an old Nokia brick phone, if you remember those like I do (playing snake!).

Easy To Use ... The Meterk EMF meter is really easy to use. With a simple to understand LCD display, as well as a full range of buttons, it's pretty simple to operate. It also has a nice bright green screen that turns red when readings get high. An audible alarm will also sound to alert you that you've encountered dangerous amounts of EMF radiation (don't worry, you can turn the audio off if it gets annoying).

Cons of the Meterk Meter

No RF Reading â... The biggest downfall of the Meterk is that it only reads magnetic and electric field radiation, not radio frequency radiation. However, this does mean that the Meterk could be a really good compliment to the Acoustimeter, which reads RF, but not electric or magnetic radiation.

Not Tri-Axis â... Whereas many of the EMF meters on this list have tri-axis capability (meaning they will get an accurate reading regardless of orientation), the Meterk requires that the sensor (located on the right-hand side) is pointed towards the source of the radiation to obtain an accurate reading.

Quality â... I cannot say that the Meterk is made of the highest quality. I have owned it for quite a while without issue, but it is not from a long-standing reputable company like Trifield, Acoustimeter, or Cornet. This also means that the accuracy is likely to be less reliable than these higher quality meters.

Final Thoughts On The Meterk EMF Meter

The Meterk EMF meter is without a doubt the best budget meter you can get in my opinion. Although it lacks the quality and features of the other meters on this list, it is a great choice for your first EMF meter.

You can [pick up the Meterk on Amazon](#).

5. Latnex HF-B3G Radio Frequency Meter

[Check out the Amazon listing here](#).

The Latnex is a great radio frequency meter and is sort of a budget version of the Acoustimeter. Offering only radio frequency radiation detection, the Latnex does not offer a full range of detection but does some great quality for a reasonable price.

Iâ... ll just interject here, that in my honest opinion, I donâ... t think there is much reason to purchase the Latnex over the Trifield TF2, considering the similar price, and extra features you get with the Trifield.

Letâ... s take a look at some of the features I like about the Latnex HF-B3G.

Latnex EMF Meter Pros

Triple-Axis â... The Latnex does have a triple axis radio frequency detector (the ball on the top of the device) which allows you to get accurate readings regardless of the orientation of the device.

Great Manual â... The Latnex comes with a very detailed user manual ([see that here](#)) that really comes in handy. I find the manual to be even more thorough than the manuals that come with some of the higher quality meters.

Easy To Use â... With a simple display and 7 nicely labeled buttons, the Latnex is a breeze to operate.

Latnex EMF Meter Cons

Only RF Readings â... Obviously the largest downside of the Latnex is simply the fact that it only reads RF radiation. Like the Acoustimeter, this is how the device is designed, but it is certainly nice when the meter measure all types of Radiation like the Cornet or the Trifield TF2.

Quality â... Latnex, although they make a variety of EMF meters including ones that measure magnetic field radiation, it has not been around as long as some of the other companies. This makes me doubt the reliability a little bit since it has not stood the test of time.

Final Thoughts

The Latnex is a great radio frequency meter with great reviews. However, Iâ... d encourage you to look at some of the other options. If youâ... re wanting a high-quality RF meter, go with the Acoustimeter. If youâ... re wanting a reasonable price EMF meter that still has great RF functionality, go with the Cornet or the Trifield. That is just my honest opinion and suggestion.

Ok, now that weâ... ve made it through our list of the 5 Best EMF Meters of 2019, letâ... s talk a little bit about the reasons you might want to get an EMF meter in the first place, and why it is such a valuable tool.

Why Do I Need An EMF Meter?

There is a good reason Iâ... m always suggesting people purchase an EMF meter once they understand how dangerous long-term exposure to EMF radiation is. With a quality EMF meter, not only can you gain a thorough understanding of the type of EMF radiation in your home, but also the amount.

Here on EMF Academy, I have all sorts of guides on how to lower EMF radiation risk in your house, such as my [Whole House EMF Protection Guide](#). These guides offer tons of solutions to lower your exposure, but without an EMF meter, it is difficult to get a real understanding of how much radiation exposure you actually reduced. You can use the meter to detect large exposures of magnetic field, electric field, or radio frequency radiation in your home, apply a solution, and test how much the solution reduced the risk.

EMF Meters are also fantastic for testing how well some EMF protection products work. For example, SafeSleeve ([see my review](#)) has a line of cases for cell-phones, tablets, and laptops. These are great examples of products that you can test with your EMF meter. Simply start by making a call on your cellphone and

measuring the radiation levels. Then, put your phone inside the case, and measure the radiation levels again to see how much radiation it will be protecting you from.

There are so many other reasons that you should consider getting a quality EMF meter that I can't cover them all here, but suffice it to say that it will be one of the best decisions you make on your EMF protection journey.

What About Dirty Electricity Meters?

Dirty Electricity is an entirely different, although equally important, subject. Dirty electricity is essentially leftover electricity that was not able to be utilized because modern electronics alter the electricity they receive from the wiring in your home. This electricity then sits in your wiring, emitting large amounts of EMF radiation.

I don't want to go into detail about this subject in this guide, but I'll point you to the following articles:

- [Is Dirty Electricity Dangerous?](#)
- [11 Ways To Reduce Dirty Electricity Exposure](#)
- [Dirty Electricity Filters â A Complete Guide](#) (Check out this one if you want to read about dirty electricity meters and filters.)

Final Thoughts On The Best EMF Meters of 2019

Phewâ! You did it! If you made it here then you just read well over 4000 words about EMF meters, good for you! I hope if you've read this far you have all the information you need to make the best decision for YOU. That is an important point because although I rated the Trifield TF2 the best EMF meter of 2019, that does not necessarily mean it is the best option for you and for your needs. That is why I went into so much detail in this post so that you would be able to make your own decision.

Ultimately there are many good EMF meters on the market, and honestly, it can be a bit intimidating to select the right one, which was my driving force behind creating this guide. I wanted to cut out some of the confusion and fear from buying an EMF meter, and just help you to get one into your hands!

A quality EMF meter is without a doubt one of the most important tools you will ever own for the fight against EMF radiation. With the upcoming rollout of 5g and more and more smart electronics introduced around us, you can be certain that it will be a fight. You need to be armed with the right education, and the right tools.

From the bottom of my heart, I hope this guide was helpful to you. If for any reason it was not, please leave a comment, or email me at Christian@Emfacademy.com and let me know what I can do to improve it.

**A DETAILED EXAMINATION OF THE ROOTS OF DOMESTIC NATIONAL
POLITICAL CORRUPTION AND A PLEA FOR ELECTED OFFICIALS TO
ACTUALLY DO THEIR JOBS FOR THE AMERICAN PUBLIC**

"Dear White House:

For years, we have been asking our government representatives to do something, anything, about this matter. We have gotten no reply, stone-walling, cover-ups and zero effort. That is shameful!

This matter affects every voting citizen because, if we can't get justice in America, then no voter will believe they can either.

A handful of corrupt tech billionaires, and their corrupt Senators, are manipulating the taxpaying voter's emotional triggers in order to steer, and money-launder, a trillion U.S. taxpayer dollars into their private bank accounts. Over 300 million American voters have said that the #1 issue with U.S. public policy is â... CORRUPTIONâ... . This issue is about that corruption.

Their â... climateâ... , â... immigrantsâ... , â... medical coverageâ... issues are fake controversies that they use to scam U.S. Treasury funds that have nothing to do with those â... cover issuesâ... . They use Google, Facebook, Twitter and the "Main Stream Media", that they own, in order to pump up these fake controversies via fake news. They use "Dark Money" fake charities, "Invisible Bridge" money laundering, crony stock market insider trading and pump-and-dump schemes, revolving door payola, prostitution bribes and other illicit corruption tricks.

We are fighting back and we have already taken out part of the â... bad guysâ... , and their schemes, using 100% legal tactics and methodologies.

Any member of the public can now accomplish these anti-corruption efforts using espionage journalism, private investigation methods, citizen sleuth websites, class-action lawsuits and personal mass public media distribution. We encourage the public to continue in their efforts to bankrupt every single corrupt party that abuses our Democracy.

In our matter, the U.S. Government, via the Obama White House and the U.S. Department of Energy intentionally defrauded us out of years of work and our life savings! Now they owe us some offsets! We are here to collect.

We could not understand how â... public servantsâ... could do these kinds of crimes to, and with, our government while stealing our, and millions of other taxpayers, money out of our pockets. We set out to hunt down every single person, group and process that allowed these crimes to happen, document their crimes on permanent public record and then make it nearly impossible for them to ever do this to the public again.

We were tricked by false government promises into spending years of our lives and millions of dollars of our life savings. We, and our peers, were used as the â... facadeâ... of a â... cover storyâ... to operate a criminally illicit â... Dark Moneyâ... operation against the American public. We swear, warrant and certify that we can prove every assertion in a public federal jury trial, Grand Jury hearing and/or televised Congressional hearing, given equitable credible legal resources and security protection.

Senior government officials had full knowledge of, and participated in, this criminal enterprise. They knew, from the start, that the state ad federal funding was covertly hard-wired, in advance, exclusively to their friends. They then attacked us with â... Fusion GPSâ... , â... Lois Lerner Targetingâ... , a tabloid character assassination program and worse things. They attacked us because we properly reported the crime to the FBI and Congress. They attacked us because we did "the right thing".

The cover-ups of this crime continue to this day. The failure of the U.S. Government to provide any 1.)

apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees; in this matter continues to this day. We are not anti-government. We are anti-corruption. In fact, top government officials are helping us in our quest.

For our first project, almost every taxpaying member of the public supported our past efforts and, in fact, provided us with a historically large number of purchasing letters of support which we hand-delivered to Congress. Nobody else was able to do that.

The non-crony major international news outlets, every major industrial publication, most of the non-crony members of the U.S. Congress, and every other non-crony public official confirmed that "Part Two" of our project was a â... goâ... . After winning Congressional awards and fully delivering on our previous government contracts, federal officials asked us to invest our time and money in the federal government and do even more to create domestic jobs and new domestic technology opportunities.

BUTâ...!

...it turned out that all of the government â... decidersâ... worked for and owned stock in our arch competitor. The government officials took the money they had promised to us and gave it to their friends, who are our competitors. They gave it to the least qualified party; who also happened to be their buddy and their campaign financiers. They also gave part of the taxpayer cash to some of their friends who immediately filed bankruptcy in order to make huge profits off of tax loss filings and stock market valuation â... pumpsâ... without ever having to create any jobs or ongoing product deliveries.

We were asked to pay bribes and we refused to pay bribes. We refused to be part of the Silicon Valley â... Dark Moneyâ... crimes. We knew these people. We were invited to their parties and to their most intimate meetings. When we saw that they were running afoul of Democracy using corrupt schemes, illegal insider trading, sextortion, money laundering, tax evasion, bribes, prostitutes, Dark Money conduits, election rigging, internet manipulation and other crimes against the public; we said NO!

Will the U.S. Government provide us with the justice we seek and the Constitution demands?

We have worked with exceptional FBI, GAO, SEC, CFTC, IG and Congressional staff in this matter and we wish to acknowledge their support. Many have seen the recent news head-lines about top-level law enforcement firings of corrupt law enforcement executives. Those were the right moves and we wish to confirm the fact that certain public officials continue to stall our justice. Treasury and GAO say that over 180 million taxpayer dollars have been spent on cover-ups, attacks and DOJ stalls against our request in order to avoid political embarrassment for the Obama Administration. They are no longer around and they SHOULD be embarrassed by their corruption! You can resolve our matter for dramatically less money than you are spending trying to cover it up!

We will not give up and we will fight to the end. Our Task Force of crime victims, journalists, bloggers, mass data scientists, intelligence specialists and voters is now using 100% legal means to terminate every single crook in this case until we get justice. We demand a resolution where our damages are paid for and the whistle-blower and informant fees we are owed are delivered.

The news articles and Congressional reports prove that this Silicon Valley Cartel regularly engages in crimes, sex abuse, illicit acts, a sociopath culture and law-breaking. Fact-based forensic data has now been published representing the work of tens of thousands of renown, award-winning journalists and researchers. They prove that what we are saying really did happen and it really is a criminal abuse of Democracy! The ICIJ, Snowden, Assange and Binney leaks prove the depth of the crimes. Hundreds of thousands of documents have now been placed on public record in the federal courts and P2P archives and those documents prove who engaged in these crimes and how they did it. The 60 Minutes episodes, The

feature films: Dark Money; Too Big To Fail; Inside Job and the tens of thousands of broadcast news segments about this corruption all prove our assertions. The evidence is indisputable!

|
It is time for the public to take a stand against this kind of organized crime that is operated by the very people that are meant to serve the public!

It is time for The U.S. Government and The U.S. Department of Energy to deliver the 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees that are required."

QUESTIONS?

Q. Where is your proof?

A. Here is the proof:

- <http://www.DC-crimes.com>
- <http://www.slush-fund.com>
- Federal court records on file at <http://www.pacer.gov>
- FBI 302 and case evidence files submitted by our peers
- Congressional Ethics Committee reports on public record
- GAO investigation reports we helped produce
- and thousands more web repositories we are happy to share...

As a matter of fact, we have submitted over a million pages of evidence produced by the best, and brightest, FBI agents, criminal investigators, forensic researchers, investigative reporters, insider whistle-blowers and former agency employees. In fact, our complaint evidence sets comprise over 6 TERRABYTES of data. That is quite a bit of hard evidence. Additionally, there has been very little credible push-back from any major entities, aside from those charged with the crimes. In other words, every well-known entity who was not a crook involved in these embezzlements has verified our charges.

Q. Why don't we hear more about this in "the news"?

A. Because print news media has gone out of business and most of the online news, especially Google, YouTube, Facebook, Twitter, Huffpo are owned or invested in by the very people who are charged with the political bribery, insider trading, election manipulation and corruption. They order their news outlets, which now are the majority of news publishers in the world, to NOT cover news about these crimes because it will embarrass them and cause the FBI and Congress to look at them more closely. We are not going to let this be covered-up.

Q. Why don't you just sue all of the people and agencies who did these things to you?

A. The attacks on us were designed to eliminate our finances so we could not afford law firms. If we could sue each one of the bad guys and afford the same lawyers as the bad guys, we would win every case. Each case costs over two million dollars in legal expenses. There are many cases. Our legal rights were blockaded by carefully crafted rights elimination tactics. In America, you can only get a lawyer for free if you kill the

opposition bad guy first. In other words you only get a free lawyer if you commit a murder.

Q. Isn't it the job of the FBI and the DOJ to help citizens like you with injustices like this?

A. As the world saw with the recent firings of the top staff at the FBI and DOJ; top law enforcement bosses are often more focused on cover-ups of crimes than the prosecution of crimes. We have helped get hundreds of famous political people fired for corruption but that does not fully solve our issue.

Q. What are you asking for?

A. Justice, a written apology, to get our damages paid for, the firing of every corrupt official involved and delivery of the whistle-blower fees we were promised.

Q. Who have you contacted to try to get this resolved?

A. Using certified mail, receipt-based FEDEX and time-stamped and tracked electronic communications we have contacted every law enforcement agency, regulatory agency, their heads of office and every elected representative through every known official channel and back-channel for nearly a decade. We have only encountered finger-pointing to some other agency and an official "not my circus, not my monkey's" attitude of "just ignore them, maybe they will go away".

Q. Who else can we contact to confirm that these crimes and stock market corruptions took place and are still taking place.

A. These groups:

- <http://wearethenewmedia.com/>
- <https://www.icij.org/>
- <https://www.transparency.org/>
- <https://www.judicialwatch.org>
- <https://corruption123.com>
- <https://wikileaks.org>
- <https://causeofaction.org>
- <http://globalinitiative.net/>

And over 400 other organizations we can introduce you to...

Q. Are you associated with any political party?

A. No. We are neither Democrats nor Republicans. We are domestic American taxpayers who were raped by

our own elected representatives who were profiteering off of these crimes. We represent the American citizens!

SO WHY ARE WE NOT GETTING ANY RESPONSE, ANY JUSTICE AND ANY OFFSETS FROM THE VERY PEOPLE WE PAY TO PROTECT AND SERVE US?

WE DEMAND THAT THESE CRIMINALS BE ARRESTED OR ELSE WE WILL PERFORM CITIZEN ARRESTS ON EACH AND EVERY ONE OF THEM!

A DIY Emergency Disaster Recovery Radio Data Terminal On The Cheap

Posted by [NC Scout](#) |

What if I told you you could build your own radio data terminal for under \$100? And what if I told you its actually a lot simpler than you might think at first glance? Crazy? Nah. Itâ... s actually pretty simple.

As the students in the [Course](#) learn, breaking information down into one of several report formats is once way transmit information quickly and efficiently- that way you donâ... t forget anything. And during the course we practice sending them via voice as a way to make sure everyone gets over any sort of mic shyness while also getting the proper procedure down pat.

But that said, voice has some issues. First and foremost, [in keeping with the basic principles of DIY radio communications](#), weâ... ve got to keep our time on the mic short and transmitting power low, and if at all possible, using a directional antenna such as [my small UHF Yagi](#) on a [simple camera tripod](#). Transmitting a long message can take some serious time, is susceptible to interference and/or jamming, and also might not be understood on the other end. But most importantly, the largest drawback of using your own voice over the radio is that if a sophisticated opponent is monitoring you, they now have a voice to record and exploit. Students in my [Signals course](#) have learned exactly how dangerous that can be, creating a massive amount of confusion in a short period of time.

So that points us in the direction of digital communications. For most, one of two things will come to mind here. Either a digital handheld radio, normally a DMR, D-Star or Fusion, or one of the many modes found in a free program called [FLDigi](#). FLDigi is normally thought of only for HF radio, but it has a lot of uses on VHF and UHF as well. And because it gets very little use in these bands, most folks wonâ... t know what it is if/when they hear it. Not only that, with some of the wider band modes available, its transmission time is incredibly fast. A long message, such as a detailed report, can be sent in just over four seconds.

The APRS cable makes interfacing with the audio jack fast and simple.

Letâ€¦ s talk about how to set the system up. What youâ€¦ ll need is a [Baofeng, Quansheng](#) or similar type handheld with the standard kenwood two prong microphone plug. The next thing youâ€¦ ll need is an audio interface cable, like the [Baofeng APRS K-1 cable](#). What this does is send the transmitted audio from FLDigi to the radio instead of using the microphone. The most common use for this cable, as the name suggests, is for Automatic Position Reporting System (APRS) which is useful for hams aiding in search and rescue (SAR), but obviously for our purposes we wonâ€¦ t be transmitting position data. The cable plugs into any audio jack found on laptops and mobile devices, and is nearly dummy-proof. Together the total cost is ~\$40. Not too shabby.

Light and tight digital data terminal.

Next youâ€¦ ll need a laptop or mobile device with FLDigi. The install is pretty straightforward, and thereâ€¦ s a [distro of FLDigi for the Android OS](#). I donâ€¦ t advise using a phone for this- even if service has long since been disconnected, the phone itself will still ping the closest towers. Unless you disassemble it and remove the transmitter, which might be more trouble than its worth, using it is a liability. But what you can do is either build your own mobile device using a [Raspberry Pi](#), or pick up an Android Tablet specifically marked for wifi-only. But if youâ€¦ re like me youâ€¦ ve probably got a few extra devices and older laptops laying around, and thereâ€¦ s no reason not to have one set up for field commo duty. Throw in the cost of the mobile device if youâ€¦ re buying on the cheap and youâ€¦ re still under \$100.

One thing to note is that the mobile version of FLDigi is a bit different than the full version- its missing several specific modes, including CW (morse code). So its something to keep in mind during your own planning phase. Thereâ€¦ s a learning curve to this, and donâ€¦ t expect it to work exactly right off the bat. It takes a bit of patience and experimentation, but the reward is certainly worth it.

Having a dirt-cheap data terminal is a must-have for emergency disaster recovery communications. Typing out a message ([and even encoding it further](#) via a [brevity matrix](#) or [One Time Pad](#)) and sending it within a few

seconds greatly increases security. Weâ€¦ ve used less power to get greater range, ensured a solid copy of the message by the robustness of the modes over voice, and the best part, youâ€¦ re doing it with a tiny amount of money and common-off the shelf (COTS) equipment.

WASHINGTON

When wayward contract employees at the CIA began pilfering snacks from vending machines back in 2013, the Office of the Inspector General sprang into action. Surveillance cameras went up, the culprits were nabbed, and all lost their jobs.

<http://www.mcclatchydc.com/news/nation-world/national/article161201618.html>

From start to finish, the case of the \$3,314.40 in stolen snacks lasted two months.

When more serious allegations of wrongdoing arise at the CIA, though, inspectors may be far less speedy, especially when their findings could embarrass the Langley, Va., spy agency.

In one notable case, that of John Reidy, a contractor whose resume shows that he worked with spies deep inside Iranâ... s mullah-run regime, charges of wrongdoing have sat idle in the hands of CIA inspectors. Details of Reidyâ... s charges remain highly classified. The case is now seven years old, and seems only to gather dust.

Reidy, 46, anguishes over his charges, angry at the years-long delay in resolving his complaints but also wary of crossing a line and revealing anything classified beyond his allegations of a â... catastrophic intelligence failureâ... overseas.

â... I cannot talk about the 2007 incident. It is classified. I risk incarceration. I have a family,â... Reidy wrote in an email before meeting with a reporter.

But in addition to his whistleblower case, Reidy presses a larger issue, one that is pertinent to the era of President Donald Trump and his persistent charges that [sensitive leaks cripple his six-month-old administration](#). Leaks may grow worse if intelligence agencies donâ... t learn how to channel dissent and protect those who offer it in a constructive spirit.

I PLAYED BY THE RULES. THEY ARE BROKEN.

John Reidy, a CIA contractor and whistleblower

“... I played by the rules,” Reidy said. “... They are broken. ...” The public has to realize that whistleblowers [like me] can follow all the rules and nothing gets done. ... In frustration, Reidy last month sent a 90-page letter and documentation about his case to the chairman of the Senate’s powerful Judiciary Committee, lambasting its lack of resolution.

“... They have enough time to look into who is stealing candy from a vending machine but they can’t look into billion-dollar contract fraud?” Reidy asked in an interview.

The CIA refused to comment on Reidy’s case.

“... As a general matter, we do not comment on ongoing litigation,” said spokesperson Heather Fritz Horniak.

CIA Director says WikiLeaks is a â... hostile intelligence serviceâ...

In his first public remarks since becoming CIA director, Mike Pompeo called WikiLeaks a â... non-state hostile intelligence service.â...

AP

Even if CIA officials have a far different version of events, perhaps contradicting some of Reidyâ... s allegations, the secrecy with which the agency operates impedes them from speaking out. CIA Director Mike Pompeo said in a speech Tuesday night that his agency finds it difficult to â... push backâ... against misleading or wrong news reports.

â... At CIA weâ... re often limited in what we can say, given the need to protect classified information. In many cases we canâ... t set the record straight because doing so could harm national security,â... Pompeo told a gathering of the Intelligence and National Security Alliance, a nonpartisan group in support of the intelligence community.

It took a lawsuit to release the information about the theft from CIA vending machines. The agency [released a declassified report](#) about the case as part of hundreds of documents obtained through a Freedom of Information Act [lawsuit filed in 2015 by BuzzFeed News](#).

Pilfering from the vending machines began in 2012, and by March 2013, inspectors began looking into the thefts, discovering that the culprits were unplugging a cable linking the machines to a payment system, FreedomPay, letting them obtain snacks at no charge.

"Video footage recovered from the surveillance cameras captured numerous perpetrators engaged in the FreedomPay theft scheme, all of whom were readily identifiable as Agency contract personnel," the inspectorsâ... report says.

The vending machine thievery wrapped up neatly. But Reidy still waits for resolution of the seemingly far more significant issues he has raised.

Reidy is more straight arrow than troublemaker. A native of Worcester, Massachusetts, he was educated in Catholic schools, then attended St. Anselm College in New Hampshire and obtained a law degree from the University of San Francisco. Law degree in hand, he dreamed of joining the FBI.

After a stint in the Army, where he worked in a criminal investigations division, Reidy applied for jobs at both the FBI and the CIA. The CIA called more quickly, and Reidy joined in 2003, leaving six months later for a private contractor that dealt in security policy.

Reidy formed his own company in 2006, Form III Defense Solutions, and worked as a subcontractor, piggybacking on contracts won by bigger companies for intelligence collection, tactical targeting guidance and other matters, usually with the CIA.

A resume he gave to McClatchy shows that from 2006 to 2009, Reidy developed an â... Iran Study Guideâ... and worked on â... humintâ... â... or human intelligence. Reidy said intelligence community secrecy rules bar him from naming the country where he handled a â... complex agency operation,â... but he does say he studied some Farsi language. He hasnâ... t done any classified work since 2012.

Two different issues led Reidy in 2010 to submit a complaint to the CIAâ... s internal watchdog, the Inspector Generalâ... s Office. One issue involved what Reidy alleged was fraud between elements within the CIA and contractors. Another issue involved what he called a â... massiveâ... and â... catastrophicâ... intelligence failure due to a bungled foreign operation, according to [his 2014 appeal](#) to an office under the director of national intelligence.

Reidy said he sent the Inspector Generalâ... s Office 80 emails and 56 documents to back up his complaints.

Read more here:

<http://www.mcclatchydc.com/news/nation-world/national/article161201618.html#storylink=cpy>

Reidyâ... s charges remain highly classified. The case is now seven years old, and seems only to gather dust.

Reidy, 46, anguishes over his charges, angry at the years-long delay in resolving his complaints but also wary of crossing a line and revealing anything classified beyond his allegations of a â... catastrophic intelligence failureâ... overseas.

â... I cannot talk about the 2007 incident. It is classified. I risk incarceration. I have a family,â... Reidy wrote in an email before meeting with a reporter.

But in addition to his whistleblower case, Reidy presses a larger issue, one that is pertinent to the era of President Donald Trump and his persistent charges that [sensitive leaks cripple his six-month-old administration](#). Leaks may grow worse if intelligence agencies donâ... t learn how to channel dissent and protect those who offer it in a constructive spirit.

I PLAYED BY THE RULES. THEY ARE BROKEN.

John Reidy, a CIA contractor and whistleblower

“... I played by the rules,” Reidy said. “... They are broken. ...” The public has to realize that whistleblowers [like me] can follow all the rules and nothing gets done. ... In frustration, Reidy last month sent a 90-page letter and documentation about his case to the chairman of the Senate’s powerful Judiciary Committee, lambasting its lack of resolution.

“... They have enough time to look into who is stealing candy from a vending machine but they can’t look into billion-dollar contract fraud?” Reidy asked in an interview.

The CIA refused to comment on Reidy’s case.

“... As a general matter, we do not comment on ongoing litigation,” said spokesperson Heather Fritz Horniak.

Legal protections for whistleblowers in the intelligence community grew stronger in 2012, when then-President Barack Obama [signed a presidential directive](#) protecting people from various forms of retaliation, including demotions, termination or reassignment. Reidy took heart at the move.

HE WAS THE POSTER CHILD OF THE PERSON THE SYSTEM IS SUPPOSED TO WORK FOR.

Kel McClanahan, former attorney for whistleblower John Reidy

â... He was the poster child of the person the system is supposed to work for,â... said [Kel McClanahan](#), a Maryland attorney who represented Reidy until 2016.

Despite the Obama directive, experts working in the national security arena say employees still confront obstacles. Employeesâ... lawyers have no access to classified documents around which a case may rest. Classified matters cannot even be discussed between client and attorney. The CIA sees its Inspector Generalâ... s Office as impartial and makes it difficult for employees who hire attorneys, although Reidy did so for years.

Often, CIA employees or contractors find their careers put on hold.

â... You will likely find yourself a pariah because nobody likes someone who rocks the boat,â... said [Bradley P. Moss](#), a Washington lawyer who handles some national security cases involving whistleblowers.

Employees disgruntled over fraud, abuse or other matters cannot easily look to obtain redress from outside the intelligence community.

IF YOUâ... RE AN EMPLOYEE WHO SEES SOMETHING EGREGIOUS, THEY DONâ... T HAVE TO DO ANYTHING WITH IT.

Kathleen McClellan of Expose Facts, a whistleblower advocacy group

â... Thereâ... s no outside review of whistleblower cases in the intelligence community,â... said Kathleen McClellan, deputy director at [Expose Facts](#), a whistleblower advocacy group. â... If youâ... re an employee who sees something egregious, they donâ... t have to do anything with it. They can flush it down the toilet for all you know.â...

As Reidy found out, an internal investigation can drag on without time limit.

â... They can go on for years. They can go on for decades,â... said [Jesselyn Radack](#), a former Justice Department ethics attorney who also works at Expose Facts.

Reidy has also told his story to staffers with security clearances for the House and Senate intelligence committees, and seen his case bounce between the CIA inspector general and the inspector general for the Directorate of National Intelligence.

Desperate for an outcome, Reidy increasingly warns that the failure of whistleblowing channels may lead disgruntled employees and contractors to go public with secrets, posing a danger to national security.

The CIA and the National Security Agency have been hit with numerous cases of leaks since the ground-shaking case of Edward Snowden, the NSA contractor who in 2013 leaked to the media details of extensive surveillance, including of tens of millions of Americans.

This year, another [NSA contractor, Harold T. Martin, was indicted](#) for amassing secret stolen documents and data at his Maryland home over a 20-year period. He awaits trial.

Prosecutors in early June charged another NSA contractor, 25-year-old Reality Winner, with sending a classified report about Russiaâ... s meddling in the 2016 elections to The Intercept, a national security news outlet. She could face 10 years in prison.

For its part, WikiLeaks, the anti-secrecy group, began publishing in March a [series of cyber-espionage documents](#) that it claimed were taken from the CIAâ... s elite hacking unit. Speculation rose that a CIA contractor stole the documents and leaked them.

Seeking to spur action in his case, Reidy last month fired off letters to the chairman and ranking member of the Senate Judiciary Committee, warning that working through the CIA Inspector Generalâ... s Office has been a dead end.

THEY JUST DELAY, DELAY, AND DELAY AND HOPE THE PROBLEM GOES AWAY.

John Reidy, a CIA contractor and whistleblower

â... They just delay, delay, and delay and hope the problem goes away,â... Reidy said in a June 5 letter to Sen. Charles Grassley, the Judiciary panelâ... s chairman.

Reidy said his own example bodes poorly for those who want to report fraud or abuse.

â... If you are contemplating whistleblowing â...! youâ... re going to sit there and say, â... If I go through that system, it will not end well for me. Iâ... m going to lose my career and Iâ... m going to be financially devastated,â... â... Reidy said.

HOW WE DID IT

How did we fight back against the most powerful organized crime entity on Earth?

We get that question all the time. Here is the answer.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

We opened our own private investigator and crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers

- Every flight manifest they appeared on
 - Every bank account they have ever held
 - Every lawsuit, divorce record and police record they have ever appeared in
 - Every trust fund they or their family holds
 - Every shell corporation they, or their family holds
 - Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
 - Every item in the Swiss Leaks that cross connects to their holdings
 - Every item in the Panama Papers Leaks that cross connects to their holdings
 - Every item in the WikiLeaks that cross connects to their holdings
 - Every item in the Snowden Leaks that cross connects to their holdings
 - Every sex trafficking incident that connects to each of them alone, and in groups
 - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
 - Every item in the Quest Leaks that cross connects to their holdings
 - Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
 - Every sex service that their credit card payments every connect too
 - Every real estate transaction that any name or company they, or their family, were involved in, tracks to
- and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

We have demanded their arrests, indictments, exposures and bankruptcies. We say "Fuck You" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed. You say you are

going to "kill us and destroy our lives.." and that you are so frightening. You think you are a big scary thing? Here comes 'scary'! Watch what billions of taxpaying voters with collaborative FBI-class forensics investigation software is doing to you now!

AAA READ FIRST, FORWARD, PREAMBLE

Overview For The FBI 302 Reports:

The documents in these files were provided by the witnesses, investigators and crowd-sourced peer-to-peer public law enforcement investigators who uncovered materials that were relevant.

This case documents and reveals the evidence that a Cartel comprised of public officials, many of them elected and located at the highest levels of government, and their Silicon Valley financiers, engaged in crimes against the public (essentially creating a coup against the U.S. Government) in order to steal taxpayer money and resources.

In a key part of the crime, the Obama Administration used the U.S. Department of Energy, under Secretary of Energy Steven Chu, who was protected by USAG Eric Holder, to payoff campaign financiers via crony kickbacks and stock market pumps. The same agency staff sabotaged those campaign financiers competitors by defrauding them of tens of millions of dollars by telling them to invest their funds in order to get loans and grants that DOE executives never intended to issue. Government staff also engaged in stone-walling, character assassination and other dirty tricks schemes against applicants and competitors. This portion of the corruption crime was implemented and planned from 2007 through 2016. This was a felony abuse of taxpayer monies. Russian billionaires, Goldman Sachs, and other investment banks, and U.S. Senators illicitly profited off of this scheme.

Law enforcement and Congressional evidence now prove the fact that only those who paid campaign finance bribes received the funding from State and Federal agencies and they received it in amounts equal to the size of the bribes they paid. Every single other applicant (hundreds of them) who did not pay campaign bribes, and who did not give stock market warrants to Senators, was stone-walled, de-funded, sabotaged and lost tens of millions of dollars by being defrauded by Energy Department officials who covertly knew that the funding had been hard-wired for their friends, in advance.

The criminal participants sought to manipulate elections and public opinion in order to place their insiders in government offices. They did this in order to steer government treasury cash, contracts, intelligence resources, government benefits and stock market advantages to their private profiteering accounts, at the expense of the public. Historical records and evidence has proven that they, indeed, did engage in these criminal activities.

They abused the operation of the DOJ, FBI, DOE, CIA, SEC, FCC, FTC, DOT and other agencies, in order to operate their scheme.

Via their leaked communications, non-compromised officials, news coverage and public testimony, their crimes and illicit actions are hereby exposed in order to curtail their corruptions.

These Senators, lobbyists, Silicon Valley billionaire oligarchs and investment-bankers used â... party ideologyâ... to seek to whip up a zealot-like frenzy to try to get voters to overlook their sins. In the end, the public has finally begun to realize that the issue is not about party politics. It is simply about organized crime and the abuse of public office for out-right theft and stock market fraud by these politicians.

150 criminally corrupt politicians and their Silicon Valley financiers abused hundreds of millions of American voters and the public policy system in order to line their private bank accounts and fulfill their personal needs for power. They operated Congress like an organized crime syndicate. They did this in violation of the law and in violation of public ethics.

These assertions are proven, via hard facts and evidence, in the files contained in this repository. Additional confirming evidence from law enforcement, Congressional and insider sources is also available upon request.

Why does any of this matter?

Because many of us were lied to by our elected officials who then took our life savings and decades of work and put our money in their own pockets. Because many of us were in the offices of Nancy Pelosi, Debbie Wasserman and Dianne Feinstein and personally saw them engage in crimes to pad their own bank accounts at the expense of their co-workers and the public. Because many of us knew Seth Rich, Gary D. Conley, Rajeev Motwani and the 45+ other people who had intimate knowledge of these crimes and then suddenly and mysteriously turned up dead. Because many of us saw these crimes committed, first-hand, and know these assertions to be fact. Because the rest of us are American voters and citizens who will never tolerate this kind of corruption and will never allow it to disappear from public memory or the history books! Because the arms of the law and public justice are ever lengthening and will eventually bring every criminal involved to justice!

Context Menu Detailing The Relevance Of The Folders In This Set Of Files

Update 2.2

AAA - FORWARD - PREAMBLE - READ FIRST = The top level summation.

AAA - THE SILICON VALLEY FELONY RICO CRIMES = The secondary level overview documents.

FOLDER - ATTACKED BY OBAMA AND HIS DNC MOBSTERS = Evidence relative to attacks and
hit jobs on the public, reporters, whistle-blowers and competitors ordered and/or operated by the Clinton and Obama administrations as retribution, vendetta, revenge tactics.

FOLDER - CRIMINAL POLITICAL SLUSH FUNDS AT DEPT OF ENERGY AND CALIF AGENCIES
= Evidence detailing the core crime effort wherein public officials, and their Silicon Valley political financiers, ran crony payola scams to acquire unjust gain at the expense of the public.

FOLDER - FAKE NEWS PROPAGANDA SITES, MEDIA ASSASSINS AND ELECTION RIGGING =
Evidence detailing the manipulation of public news, social media public information and election results wherein the suspects sought to control political budgets, government expenditures and ideologies to the benefit of their personal profits and power-hungry narcissisms.

FOLDER - GAWKER AND GIZMODO MEDIA WORK AS HIRED ASSASSINS FOR THE DNC AND OBAMA = Evidence relative to attacks on the public, reporters, whistle-blowers and competitors ordered and/or operated by the Clinton and Obama administrations as retribution, vendetta, revenge tactics as deployed in a very specific set of example instances via the Gawker/Denton/Omidyar Cartel.

FOLDER - HOW YOU CAN FIGHT CORRUPTION = List and examples of proven counter-measures, in use by public-interest groups, to fight this kind of corruption.

FOLDER - INSTRUCTIONS FOR USERS = Instructions for public and agency members contributing to these evidence sets.

FOLDER - LIST OF OFFICIAL BIASES OF MEDIA ENTITIES = Evidence showing which reporters or media outlets will bias or hide this evidence in order to protect their corrupt owners and investors who may have had a hand in benefiting from this corruption. This will indicate who you can trust to help you and who will try to blockade, stone-wall or â... media hit jobâ... you.

FOLDER - NEWS VIDEOS PROVING THE CHARGES AND FACTS = News video evidence confirming the charges.

FOLDER - NEW TOPICS = What are the results of the exposure, interdictions and awareness of this corruption? What new technologies, concepts, methods, social trends and efforts have been caused as secondary effects of this case?

FOLDER - POLITICAL HONEY-TRAPS AND FAKE DATES = Evidence showing the abuse of human interaction services to exploit political agendas. No human can resist the need for a date, flirting or sexual potential and political operatives used this fact for spying, database culling of voters and other mass digital public exploitation via â... dating servicesâ... . How political operatives take advantage of basic human needs and exploit them for election rigging.

FOLDER - SILICON VALLEY CORRUPTION AND ABUSE OF THE PUBLIC = The financiers, technical operators and beneficiaries of these crimes were Silicon Valley oligarchs. What kind of people are they? Why do they all have a similar sociological, fraternity house, sociopath-like profile? What is the social echo-chamber that clones them into these kinds of people? Why are almost every one of them eventually caught in an abuse scandal?

FOLDER - THE ELON MUSK TESLA CORRUPTION CASES = Elon Musk was one of the largest financier, crony corruption beneficiaries of these crimes? Why did he spend hundreds of millions of dollars on self-promotion seeking to make himself an â... iconâ... ? How do only a handful of web â... trollsâ... use â... botsâ... and mass social media to hype his image? Which media cover-up his crimes? What are the specific illicit deeds he is charged with in this case?

FOLDER - THE GOOGLE INVESTIGATION = The evidence proving that Google engaged in a digital and White House staff coup in order to control public laws, policy, contracts, state and federal budgets and ideology. The abuse of CIA resources by Google, In-Q-Tel, Crowd Strike, New America Foundation and other rogue spy operations has led to the largest mass public abuse in history. These reports prove those assertions.

FOLDER - THE NEW INTERNET = Because it was Silicon Valley Oligarchs that manifested these crimes, the world has sought to work-around and/or identify their illicit abuses of the individual. These are the latest results of that blow-back.

FOLDER - THE SILICON SEX CULT = Silicon Valley oligarchs and certain major politicians have a â... *Harvey Weinstein/Anthony Weiner*â... -like affliction that causes them to have an uncontrollable devotion to deviant sex and the use of sex as a self-affirming abuse tool. They have been caught up in under-age sex scandals and clubs, or networks, devoted to sexual conquest, in a massively escalating series of horrific sex abuses. What is it about their social group that causes the interaction of Hollywood and Silicon Valley â... elitesâ... to adopt moral degradations and support politicians who are also drawn to such deviancies?

Demands for indictment, arrest and prosecution of the suspects have been sent to:

The FBI

The FEC

The GAO

The SEC

The FTC

The U.S. Auditor General

The U.S. Inspector General

The California Attorney General

The New York Attorney General

The San Francisco Police Department

The New York Police Department

The Palo Alto Police Department

The U.S. Treasury Department Financial Crimes Enforcement Network (FinCEN)

The U.S. Senate Ethics Committee

The U.S. Senate Intelligence Committee

The U.S. Senate Judiciary subcommittee on Crime and Terrorism

The Office of the Special Council

The National Archives

This crime has been widely covered in the main stream news, in major TV documentaries (ie: 60 Minutes: THE CLEANTECH CRASH) and hundreds of books, so it is not possible for any law enforcement entity to state that they do now know about it. Each entity has been informed that each other entity has been notified since 2007. These notices have been copied to the press and P2P groups in order to reduce cover-ups and denials and provide historical transparency.

Update 9.2

HOW CITIZEN SLEUTHS ARE DESTROYING THE CORRUPT POLITICIANS AND OLIGARCHS

Check back; these files are updated daily by investigators. See the [evidence back-up](#) behind the topics

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

How did we fight back against the most powerful organized crime entity on Earth?

We get that question all the time. Here is the answer.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

Shoshana Zuboff's, The Age of Surveillance Capitalism - Why Twitter, Google, Facebook, Instagram, YouTube, Alphabet are the SAME Thing, The SAME SICKO tech elites and the same kinds of social privacy RAPE against citizens!

<https://www.contagious.com/news-and-views/shoshana-zuboff-on-the-age-of-surveillance-capitalism>

HOW TO DESTROY ANY CORRUPT COMPANY OR PERSON ON EARTH

YOU can fight back and destroy dirty oligarchs!

The tech Cartel is evil because they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; Their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S.

Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to never help those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, Linkedin, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says:

In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires.

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

I can't even with how insular and incestuous and corrupt SF is. Mayor [@londonbreed](#) acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEhIlulkyj>

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after **Five Trillion** treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

YOU OWE IT TO YOURSELF AND THE NATION TO TAKE THEM DOWN!

YOU CAN WIPE THEM OUT, ALL BY YOURSELF, IN 100% LEGAL WAYS.

YOU CAN WIPE THEM OUT EVEN FASTER WITH CROWD-SOURCED FORENSICS AND ANTI-CORRUPTION AI SOFTWARE! JOIN THE REST OF THE PUBLIC IN AN EPIC ANTI-CORRUPTION EFFORT!

You must write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You can use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You can now use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU open your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds
- Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
- Every item in the Swiss Leaks that cross connects to their holdings
- Every item in the Panama Papers Leaks that cross connects to their holdings
- Every item in the WikiLeaks that cross connects to their holdings
- Every item in the Snowden Leaks that cross connects to their holdings
- Every sex trafficking incident that connects to each of them alone, and in groups
- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
- Every item in the Quest Leaks that cross connects to their holdings
- Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- Every sex service that their credit card payments every connect too

- Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "*Fuck You*" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

What To Do To Write Up The Dossier On Each Person And Each Corrupt Politician:

1. Dig through their trash and buy their trash bags from the garbage man after they pick them up
2. Locate a beneficiary for a probate proceeding
3. Research current and / or historical property holdings
4. Identify mortgage information
5. Identify secured lenders
6. Identify related party property transactions
7. Determine current market value of real property
8. Locate bankruptcy filings
9. Retrieve and analyze bankruptcy records
10. Uncover improper relationships
11. Locate federal civil lawsuits
12. Locate federal criminal records
13. Retrieve and analyze federal civil and criminal records
14. Retrieve mug shots from arrest records
15. Provide independent analysis
16. Locate state and local criminal arrest records
17. Retrieve and analyze review criminal records
18. Provide peace of mind
19. Locate home phone numbers
20. Locate cell phone numbers
21. Identify owner of home or cell phone number
22. Determine owners of corporation
23. Retrieve and analyze corporate records
24. Locate current or former executives

25. Interview current or former executives
26. Find and retrieve judgment and lien filings
27. Research familial history
28. Connect the dots
29. Locate witnesses for a civil or criminal lawsuit
30. Interview witnesses for a civil or criminal lawsuit
31. Find assets
32. Find current or historical boat registrations
33. Find current or historical aircraft registrations
34. Search for hidden assets
35. Conduct business intelligence
36. Discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you the big picture
43. Identify a will for an estate
44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistleblowers
54. Vet expert witnesses
55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. Make you look brilliant
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Give you a competitive advantage
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research

77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes
97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes
100. Write every federal agency and demand investigation and prosecution of the perps
101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
105. Go to their share-holder meetings and hand-out flyers about their corruption
106. Hire Charles Spies (<https://www.dickinson-wright.com/our-people/charles-spies?tab=0>) to sue them
107. Hire Harmeet K. Dhillon (<http://www.dhillonlaw.com>) to sue them
108. Hire COA (<http://www.causeofaction.org>) to sue them
109. Hire law firms from China or Russia to sue them for a very low price
110. Hire Steven S. Biss (<http://www.linkedin.com/in/steven-s-biss-6517037>) to sue them
111. Blog about the corruption of the political targets every day with the day's news each day
112. Read their divorce filings in court records and see who else might help expose their corruption
113. Read their locations over the last 12 months -

<https://www.protocol.com/government-buying-location-data>

114. Talk to every neighbor that has filed a complaint about them
115. Hire *Pierce Bainbridge Beck Price & Hecht LLP* to sue them, especially tech media companies
116. Re-read all of the latest "How To Be A Private Investigator" books and brochures
117. Ask Paul Kangas in San Francisco how he investigates the corrupt
118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them
119. Put a card table and a pop-up booth outside their office and hand out flyers about them
120. Publish every stock market share they, and their family, owns
121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm
122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...

HOW TO RUN AN ORGANIZED CRIME OPERATION WITH NON-LAWS THAT YOU HELPED MAKE IMPOTENT!

By law, members of Congress and their senior staffers are supposed to have a one- to two-year cooling-off period in which they refrain from lobbying their former colleagues.

But nearly 120 former members and senior staffers since 2015 have been the sole lobbyist or part of a lobbying team targeting their former chamber during their cooling-off periods, according to a McClatchy analysis of post-employment restriction data from the House and Senate as well as lobbying registration data.

That doesn't necessarily mean they broke the law.

Those rules are limited in terms of what they specifically prohibit former members and staffers from doing. They ban direct contact with current members or staffers, but do not ban providing behind-the-scenes advice to other lobbyists on who they should contact and what they should say - essentially using a cutout. Former staffers from the House of Representatives are only restricted from lobbying their former office or committee. Lobbying other branches of government isn't prohibited. And the system effectively operates on the honor system.

The lobbying rules, designed to prevent former lawmakers from immediately profiting from their political connections, are more important than ever as Washington sees a strikingly rapid exodus of elected officials,

some of them weary of the toxic partisanship and eager to cash in on more lucrative opportunities.

Violating the cooling-off period is punishable by up to five years in prison and a fine of up to \$50,000, but lobbyists who break the law are unlikely to be detected. While the House and the Senate are responsible for flagging potential lobbying violations, both the offices of the House clerk and the secretary of the Senate confirmed to McClatchy that neither regularly checks whether lobbyists have violated the cooling-off period.

The Government Accountability Office annually audits a random sampling of lobbying forms for compliance with lobbying rules, but told McClatchy it doesn't check for compliance with the cooling-off period. And while the U.S. Attorney's Office in Washington D.C. is responsible for bringing charges against potential violators, the office couldn't recall any recent instances in which it actually did.

When presented with McClatchy's findings, former Wisconsin Democratic Sen. Russ Feingold, best known for his work with former Sen. John McCain on a 2002 campaign finance law, said Congress should revisit the lobbying laws, which were last updated in 2007.

At a minimum, Congress should insist that the clerk of the House and the secretary of the Senate review lobbying registrations to determine if former members and staff may be violating the law and refer potential violations to the U.S. Attorney's Office for investigation and prosecution, Feingold said. We included tougher revolving-door restrictions in the 2007 lobbying reform package but without enforcement that law doesn't mean much.

McClatchy's analysis flagged three former members of Congress Louisiana Sen. David Vitter, California Rep. Howard Buck, McKeon, and Florida Rep. Ileana Ros-Lehtinen whose lobbying forms indicated they had either directly lobbied their former chamber during their cooling-off period or been part of a team targeting their former chamber.

All three are Republicans, and more than 70 percent of the former members and staffers identified in the analysis were from Republican offices.

Republicans controlled both chambers of Congress for much of the period in the analysis and more than 10 percent of the Republican staffers on the list worked for the Republican leadership in one of the two chambers.

But the analysis flagged former staffers from both ends of the ideological spectrum, with aides to several Democrats on the list, including Bernie Sanders's former chief of staff, Michaela Crowell.

And McClatchy's analysis doesn't take into account so-called shadow lobbying, whereby former members of Congress and top aides provide many of the same services as a lobbyist but below the legal threshold of activity that would require them to register.

You're looking at the tip of the iceberg, said Meredith McGehee, executive director of the group Issue One, which seeks to reduce the role of money in politics. You're looking at the people who bothered to register.

Mining former connections on the Hill

The [2007 update of the lobbying laws](#) came in the wake of the lobbying scandal that sent super lobbyist [Jack Abramoff](#) and former Congressman [Bob Ney, R-Ohio](#), to prison for their roles in a scheme in which Abramoff and other lobbyists defrauded Native American tribes seeking gaming licenses and lavished expensive gifts and campaign donations on Ney and other politicians in exchange for political favors.

The law banned gifts from lobbyists to members of Congress or their staff â... and increased the penalty for violating the lobbying rules to as much as a \$200,000 fine or five years in prison.

But it left the cooling-off period largely unchanged. When the Senate tried to extend the cooling-off period to two years for members of the House and Senate, the House balked at adopting the same two-year cooling-off period Senators face.

Extending the cooling-off period has historically been met with resistance because many in Congress see it as an unfair imposition, McGehee said.

She was involved in a previous rewrite of the lobbying laws in 1995 as a lobbyist at the government watchdog group Common Cause.

â... I have a very vivid recollection of sitting down with a chief of staff of a House member and getting reamed because I was going to deprive this chief of staff from the ability to make a living after leaving Congress,â... McGehee said.

The current rules didnâ... t limit two former members of the House from playing a role in lobbying work that targeted their former chamber during their first year out of office.

Ros-Lehtinen, who left office in 2018, inked a deal to represent a former political supporter from the Miami area, Oscar Cerna, who has been involved in a 15-year dispute with the government of Honduras, which he said drove his Honduran cement company out of business. Ros-Lehtinen, a former chair of the House Foreign Affairs Committee, had been among Cernaâ... s staunchest supporters in Congress, [writing a 2007 letter](#) to then-Honduran President Jose Manuel Zelaya pressing Cernaâ... s case.

Cerna, for his part, [contributed \\$14,500](#) to committees supporting Ros-Lehtinen over the past two decades. So it was perhaps not surprising that Cerna turned to Ros-Lehtinen to continue to press his case as a lobbyist. When she retired in 2018, his company Cermar Investments LLC, hired Ros-Lehtinen and another lobbyist at the firm Akin Gump Strauss Hauer & Feld, which she joined soon after leaving Congress.

Cernaâ... s company has so far paid \$30,000 to Akin Gump and Ros-Lehtinen is one of a team of two lobbyists who have together targeted the House, Senate, State Department and Executive Office of the President on Cermarâ... s behalf. The forms donâ... t indicate which bodies, if any, Ros-Lehtinen lobbied herself and former members are not prohibited from lobbying other branches during their cooling-off period.

Ros-Lehtinen, a monthly columnist for the Miami Herald, declined through a spokesperson to comment directly. A spokesperson for Akin Gump issued the following statement in response to questions directed at Ros-Lehtinen and other Akin Gump lobbyists identified in McClatchyâ... s analysis: â... The firm is fully aware of and abides by all relevant ethical requirements in its lobbying activities, including post-employment lobbying restrictions of former members and senior staff.â...

McKeon, the former chairman of the House Armed Services Committee, also represented a client he had prior dealings with during his time in Congress.

In the wake of the September 2013 shooting at the Washington D.C. Navy Yard, McKeon pushed for the public release of an [internal Pentagon report](#) that found security flaws in a system used by the Navy to give contractors and other short-term personnel temporary access to military sites and called for the Navy to stop using the system.

The system hadnâ... t been responsible for giving access to the Navy Yard shooter, but McKeon nevertheless called for the critical reportâ... s public release.

â... The report details critical flaws in the practice of contracting access control for military installations to non-governmental personnel,â... McKeon said in a statement. â... I believe it to be relevant to physical security on military installations.â...

Despite the report, the company managed to keep its contracts with the Navy and it hired McKeonâ... s newly formed lobbying firm two years later after McKeon left office.

McKeon said a form that indicated he had lobbied the House of Representatives on the companyâ... s behalf in 2015 was a mistake and that he had limited his lobbying work to the Pentagon. He said his lobbying firm would be submitting an amended form.

â... I know that there are people from both the House and Senate that try to skirt the issue,â... McKeon told McClatchy. â... I purposely registered early on so that we wouldnâ... t do that.â...

Former Louisiana Sen. Vitter also told McClatchy that two forms filed in 2017 indicating that he had lobbied House and Senate directly on behalf of a Texas public entity, the Chambers County Improvement District No. 1, had been filed in error.

â... I appreciate your pointing them out,â... Vitter said by e-mail. â... They are incorrect, and I have directed our compliance staff to correct them immediately.â...

No one had previously pointed out to either Vitter or McKeon that the incorrect forms seemed to show them doing work impermissible during the cooling-off period.

And no one flagged another report McClatchy found that appeared to show that one staffer had signed his first lobbying clients while still on a congressional payroll. James Petersonâ... s name appeared on lobbying registration forms dated to 2015 â... while he was still a legislative assistant to Democratic Sen. Dianne Feinstein â... to represent the California cities of Huron and Riverbank. Peterson told McClatchy the forms had been filed in error by the lobbying firm he worked for after leaving Feinsteinâ... s office in early 2016, Townsend Public Affairs.

â... I had no idea they had been submitted,â... Peterson said.

Anatomy of a lobbying campaign

The current lobbying rules provide ample leeway for former members of Congress or staffers to be involved in the lobbying process without violating the cooling-off period restrictions. The rules ban direct contact with current members of Congress and their staffs, but do not ban providing strategic advice on who to contact or even what to say. And the rules apply only to contact with congressional offices, not the White House or federal agencies.

â... The very purpose of revolving-door restrictions is to prevent former members and staffers from profiting on their inside connections for influence-peddling on behalf of paying clients,â... said Craig Holman, the lobbyist for Public Citizen, a consumer advocacy group that seeks to limit corporate influence on public policy. â... Yet lobby they do, as full partners of the lobby team, organizing and strategizing the lobbying campaign for whoever pays them.â...

Vitterâ... s lobbying on behalf of the Texas public entity provides a window into the lobbying work that a former member can do during the cooling-off period while staying on the right side of the law.

McClatchy obtained documents through a Texas public records request that show the efforts of his team at the lobbying firm Mercury Public Affairs to help the Chambers County district win a grant from the TIGER

program, a multi-billion dollar competitive transportation grant originally launched as part of the Obama administration's economic stimulus plan. The program attracted notice when one of the projects it financed, the Florida International University bridge, collapsed while under construction, killing six on March 15, 2018.

The Texas project, led by William F. Scott, a major Republican donor who had given \$25,000 several years earlier to a pro-Vitter super PAC, decided to hire Vitter's team in October 2017.

Vitter's first suggestion was that they target Texas Rep. Brian Babin, a Republican on the House Transportation and Infrastructure Committee.

"I know Brian pretty well," Vitter wrote. "And he's on the DOT oversight committee - an ideal U.S. House member to get fired up in support and help corral and lead nearby colleagues."

Vitter's team then spent months reaching out to congressional offices and federal agencies ahead of a D.C. trip they organized for Scott and his team in early 2018. The itinerary included meetings with Republican Texas Sens. John Cornyn and Ted Cruz, several members of the House - including Babin - as well as the White House, the Department of Transportation and Energy Secretary Rick Perry.

Vitter made clear to McClatchy that he himself did not reach out to congressional offices directly during his cooling-off period.

"I very carefully followed Senate rules by not having any contact with congressional offices on lobbying matters for two years following my service in the Senate," Vitter said. "For those two years, the congressional part of Mercury's Chambers County Improvement District No. 1 work was handled by others in the firm."

Vitter did directly lobby the Department of Transportation and its secretary, Elaine Chao, which is not prohibited by the law. He and his team met with senior officials at the department who told them "pretty directly that U.S. senators calling in meant a lot to the secretary [whose husband is Senate majority leader]," Vitter wrote to his clients.

He instructed his clients to redouble their efforts at winning Cornyn's support and told them exactly what to ask for from the Texas senator and how to ask for it.

Vitter also picked up the phone and called Chao directly to sell the project.

"After several minutes of small talk regarding my family and New Orleans, which she pursued, I outlined the strengths of the application very thoroughly," Vitter wrote.

Vitter's help wasn't enough for the project win a grant in 2018, but earlier this year, Vitter told his clients that he was already hard at work trying to help them find federal money and would no longer be encumbered by any restrictions.

"[N]ow that my two-year cooling-off period has ended ... I can lobby members directly," Vitter wrote.

A spin through the revolving door

The last rewrite of the lobbying laws left largely unchanged the restrictions on former top staffers - staffers who make at least 75 percent of what a member of Congress is paid, which is currently \$174,000.

The rules ban former top Senate staffers from lobbying the Senate for a year, while they ban former House staffers from lobbying either the member they worked for or the committee they worked on for the same one-year period, depending on their role.

It's common for lobbyists to work as part of a team and the forms don't require members of the team to specify which office they targeted. That can make it challenging to determine whether a former member or staffer has actually violated his or her cooling-off restrictions.

McClatchy found one former senior Senate staffer, Christopher Kearney, who went out of his way to specify on his form that he had not lobbied the Senate during his cooling-off period, but his form is the exception.

"The firm and I felt that it was important out of an abundance of caution to make it crystal clear that I did not lobby the Senate," Kearney said.

McClatchy's analysis identified more than 100 former senior staffers who gave no such indication on their lobbying forms.

That includes a former top aide to Republican Senate Majority Leader Mitch McConnell, Brendan Dunn, who, at Akin Gump, has been part of several lobbying teams that targeted the Senate for a number of blue-chip clients, including tobacco company Altria, CVS, and Qualcomm. Dunn, whose company bio touts his experience advising Republican leadership on retirement matters, was the sole lobbyist for the American Council of Life Insurers, lobbying the House on a retirement savings bill that had been introduced in the Senate while he was still working for McConnell. A spokesman at Dunn's firm told McClatchy that Dunn had fully complied with the cooling-off rules.

The analysis also tabbed a staffer-turned-lobbyist who has already taken another spin through the revolving door. Bill Cooper, the current general counsel at the Department of Energy, previously lobbied the House in 2017 and 2018 on Puerto Rico electricity issues for Scotiabank, one of the top lenders to the Puerto Rico Electric Power Authority, as well as the North American affiliate of the French natural gas company ENGIE, which owns a large stake in a Puerto Rican energy company. That lobbying came soon after he left his post at the House Natural Resources Committee.

Cooper's filings didn't indicate which committees or offices in the House he lobbied, and the lobbying work didn't come up in his Senate confirmation hearings for his current position at the Energy Department. A spokesperson for the department said Cooper complied with all relevant rules and regulations. As general counsel for the department, Cooper is charged with overseeing the agency's compliance with ethics rules.

The analysis also flagged former staffers from the other end of the political spectrum, including Michaela Crowell, the former chief of staff to Vermont Sen. and Democratic presidential candidate Bernie Sanders. Crowell was part of teams at the firm S-3 Group that lobbied the Senate on behalf of 11 clients, including the Sinclair Broadcast Group, Boeing, Duke Energy and the Internet Association, a trade group for major tech companies such as Google, Amazon and Facebook. Crowell's lobbying teams brought in more than \$1 million for their lobbying work during her first year out of the Senate.

Crowell told McClatchy that she would be amending the forms to make clear that she herself had not lobbied the Senate during her cooling-off period.

"I never lobbied the Senate during the ban at all," Crowell said. "I was very serious about not even having the appearance of an improper contact."

Of course, if it were up to her former boss, Crowell wouldn't be lobbying at all. Sanders has said that if

elected president he would institute a lifetime lobbying ban for former members of Congress and their senior staffers.

Shirsho Dasgupta contributed to this report.

YOUR POLITICIANS ARE TAKING STOCK MARKET INSIDER TRADING BRIBES AND HERE IS HOW YOU CAN CATCH THEM AND STOP THEM!

Have you noticed that none of the current decisions in politics help you? The current Washington DC and Sacramento policy decisions only help the politicians with their insider stock market profits!

Corrupt political California dynasty families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

Are you sick of the dirty corporations, Silicon Valley Oligarchs And YOUR OWN Senators engaging in these crimes using YOUR tax dollars?

All of these assertions have been proven in court records, federal investigations, Congressional charges, 60 Minutes segments, news documentaries, document and email leaks, and thousands of other sources. The facts are undeniable and can be proven, AGAIN, in live televised Congressional hearings!

YOU CAN WIPE THEM OUT USING 100% LEGAL PUBLIC FORENSICS!

In all of recorded history, there has never been so much taxpayer cash given to so few people, where each, and every, one of the recipients was a friend of the politician giving away the taxpayer cash and everyone who got the cash immediately skimmed "unjust profits" and shut down the business.

Want to help end the tech oligarch's rape of society? Never, EVER: use, read, quote, link to, paste from, or refer to; anything on corrupt and contrived: T-Mobile - Twitter, Google - Alphabet - Facebook - Meta - Instagram - Netflix or YouTube! Don't expand their reach! Don't be their digital bitch! Stop being an addict to Silicon Valley's social media scam! Keep the battery out of your phone so Big Tech can't continue to spy on you. Did you know you CAN'T turn an iPhone off. Apple iPhone's pretend to be "off" but still monitor you with reserve power. The government should shut these companies down but they don't because these companies pay the largest bribes on Earth to politicians! Demand that Congress shut down these big tech abusers that cause child suicides, bullying, sex trafficking, money laundering, tax evasion, political bribery, election manipulation and other social crimes. Twitter, Facebook, Google, Netflix, YouTube spy on you and rape your mind by serving manipulated content choices requires by automatically creating covert user dossiers made by spying on usersâ... content consumption preferences and continually changing them based on psychological analysis of the users. Spy agency-type profiles created by Twitter, Facebook, Google, etc. use abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using NLP methods. They Aggregating these features per user at scale based

on what rich white Democrat ideology Google programmers want. In particular, it is impractical to store the entire dynamic history of a user's interaction features, requiring the companies to use biased algorithms that selectively decay information in favor of a more liberal political representation. The more it scales, the more racist, sexist, classist, misogynistic and politically biased it gets.

The history books teach that San Francisco was founded by *Prostitutes, Pirates And Gangsters*. That crowd still runs San Francisco, even in modern times. These criminals expanded south of San Francisco to Silicon Valley based on Stanford University institutionalizing and teaching business corruption to sociopath frat boys. They then took their circus of bribery and insider trading to Washington, DC and the rest is history.

For example: *All of the money that the U.S. Department of Energy gave out during the Obama and Biden Administrations only went to the friends and financiers of the Obama and Biden Administrations. Anybody that applied for the money, that competed with the friends and financiers of the Obama and Biden Administrations were cut-off and de-funded. The staff and politicians in the Obama and Biden Administrations owned the stocks of those few who got funded and went to work for them after they left Washington. It was as blatant a quid-pro-quo revolving door scam as anyone had ever seen. (ie: Solyndra, Tesla, Abound, Abengoa, etc.)*

In another example: Feinstein's family owned and controlled A.) Government trained attack spies... formerly with the CIA, NSA, etc., B.) The leasing contracts for Tesla and Solyndra, C.) Their office staff that threatened competitors in writing and in-person, D.) the financing for Tesla and Solyndra, E.) The construction services for Tesla and Solyndra, F.) The staffing company for Tesla and Solyndra, G.) The adjacent railroad services for Tesla and Solyndra, H.) Key suppliers for Tesla and Solyndra, I.) Goldman Sachs cooperative relationships for Tesla and Solyndra, J.) Transitions from their own Senate Office staff to revolving door jobs at Tesla and Solyndra, K.) Government decisions for Tesla and Solyndra, L.) The relationship incentives between Google, Tesla and Solyndra and that Senator's campaign financing to that Senator; and other illicit conflicts of interest. Her husband: Dick and her daughter: Kathy, even confessed to these schemes to a whistle-blower, while being recorded. Competitors owned the competing electric car companies and technology that would have obsoleted Tesla, Google and Solyndra and was the first to begin negotiations with the factory that Tesla later took over at the insistence of that Senator, even though Elon Musk appears in news reports, previously stating that he saw no use for the building for Tesla. Feinstein put a hit job on them to protect her own stock market shares.

Silicon Valley has had the largest number of Congressional hearings against it, BUT the least number of regulations imposed on it. Why? You can look no further than the covert ownership of Silicon Valley by elected officials. Our politicians get paid bribes, by Silicon Valley, to keep the political corruption alive and well while they operate, with impunity, as the biggest threats to society ever manifested.

While the FBI, FTC, DOJ and FEC are supposed to objectively prosecute this case, it is impossible for them to be objective when their raises, promotions, house payments and stock market profits are entirely determined by the individuals we are charging with these crimes.

DON'T WAIT FOR THE BIG AGENCIES: SUE THE PERPS IN SMALL CLAIMS COURT IN YOUR TOWN TODAY!

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and government agencies as a stock market manipulation platform.

Politicians turned the government into a cheap garage sale of cronyism!

SEE MORE EVIDENCE AT:

<https://san-francisco-news.com>

<http://www.federal-report.com>

<https://case-xyz2020a.com>

---- This case affects who gets to run the United States Government and who profits from government decisions, a matter of many trillions of dollars. -

--- The evidence folders provide evidence of the corruption in categories. The illicit acts described therein all involve the same perpetrators. The evidence items specific to this folder category are at the bottom of this page: A.) AFGHANISTAN RARE EARTH CORRUPTION; B.) CASE DIAGRAMS; C.) DEPT OF ENERGY CRONY SLUSH FUNDS; D.) FACEBOOK META CORRUPTION; E.) GOOGLE ALPHABET

CORRUPTION; F.) MASS MEDIA MANIPULATION; G.) NETFLIX NEGLIGENCE; H.) PATENT THEFT; I.) REPAIRING SILICON VALLEY; J.) SICKO TECH FRATBOYS; K.) SONY PICTURES CORRUPTION; L.) STANFORD UNIVERSITY INVESTIGATIONS; M.) THE CORRUPT SENATORS; N.) THE ELON MUSK REPORTS; O.) THE HOUSING CRISIS; P.) THE LITHIUM BATTERY LIE; Q.) THE MEDIA ASSASSINS; R.) THE POLITICAL BRIBES; S.) THE SAN FRANCISCO CORRUPTION; T.) USING SOCIAL MEDIA SITES TO SPY ON CITIZENS; V.) THE SILICON VALLEY DEATHWATCH

---- For example; The United States Department Of Energy, the U.S. Patent Office, The EPA and others, since November 2008, have been almost entirely used as scam crony payola slush-funds to pay off political campaign financiers of White House insiders. In addition, government agencies are used as gate-keepers to sabotage and stall the competitors to those political campaign financiers of White House insiders. It is political racketeering operating in plain sight! The cover-ups by the IG, AJ and DOJ are ENDLESS!

---- Politicians turned the government into a cheap garage sale of cronyism! This kind of crime illicitly and illegally manipulates the power over who runs the United States Government and who profits from government decisions which are a matter of many trillions of dollars. The act and veracity of this crime enterprise will be proven to the Jury.

---- Based on that assertion it will then be proven that:

---- 1.) Plaintiffs exposed and reported the crime to proper authorities through proper channels.

---- 2.) Some of those authorities used government resources to operate reprisal attacks against Plaintiffs, using government resources to operate the attacks, as revenge for reporting the crimes.

---- 3.) The state-sponsored attacks were supported by the political campaign financiers of the government authorities in order to protect their payola conduits and stock market manipulations.

---- 4.) Over 40 harms, each to be detailed and examined in Court, were documented against Plaintiffs by the actions of corrupt government authorities.

---- 5.) In a vast number of previous lawsuits, including one won by Plaintiffs and their peers, it was proven that government offices infected with corruption regularly attack and harm citizens in reprisal.

---- 6.) The government, having been caught in these illicit actions, must now pay Plaintiff for his losses, damages, harms, back-pay fees and other compensation.

---- Tesla And Fisker were financed by the family and investors of Presidents Obama and Biden, as proven by Congressional investigators and email leaks.

----- Government officials ordered attacks on Plaintiffs, de-funding and reprisals because Plaintiffs reported corruption at the White House, Department of Energy, and other government offices, and because Plaintiff's technology could obsolete the technologies that government officials were illicitly receiving bribes from via insider trading. The attacks and harms against Plaintiffs used government resources paid for by taxpayers.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook - Meta - Google - Alphabet - Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion

GPS - Black Cube - Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- Thatâ... s right! Your public officials use federal agencies as dark-money laundering operations for their friends.

---- If you are a taxpayer: You suffered damages!

---- If you are an American business: You suffered damages! -

--- If you are Democracy: You were broken!

---- If you were a tech mobster: You made out like a bandit! -

--- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes!

--- Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes! The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â... economicâ... or â... healthâ... emergency â... stimulusâ... scam.

---- IF YOU SEE CORRUPTION, REPORT CORRUPTION: Post a public web page with all of the details and evidence of the political corruption. Then invite all of the press, public, Inspector General's, FBI, SEC, FTC and law enforcement to that web page. This will prevent cover-ups and stone-walling and protect you from getting ignored! Never assume that the agencies that are supposed to help you, will help you!

- End political corruption in America by making any stock ownership by senators and political insiders illegal.

- Exterminate Google, Facebook, Tesla, Youtube and Netflix for their crimes, attacks on competitors, patent office and Senate bribes.

- File criminal referrals to federal law enforcement on each oligarch that hired Fusion GPS, Gawker, Black Cube, Amyntor, et al, to run "kill teams" against competitors and whistle-blowers and produce public, CIA-quality, investigation dossiers on each one. Make it a felony for anyone to hire a "kill service", "character assassination service" or "oppo service"!

CONGRESSIONAL BUDGET: Are you wondering why Congress can't get the Congressional budget approved? Because Nancy packed it with TWO TRILLION dollars of kick-backs that directly profit her, and

her friends, stock market accounts! None of that budget is for you. It is all for lobbyists and insider trading schemes! A little political Cartel of California insiders coordinate together to rig political expenditures for their own personal benefits. You can see in their "stimulus bills" that almost no money goes to the public but, instead to big construction developers who finance those insiders. Congress should make a law that NO company that the Feinstein family, the Newsom Family or the Pelosi family owns stocks in can use any of the Stimulus Funds or benefit from those funds!

THE PANAMA PAPERS AND THE GREEN CAR BOONDOGGLE: You have probably heard of â... *The Offshore Leaks*â... , â... *The Panama Papers*â... , â... *The Pandora Papers*â... , â... *The Swiss Leaks*â... , â... *The Sony Pictures Hack*â... , â... *The Luanda Leaks*â... , â... *The Bahamas Leaks*â... , â... *The Paradise Papers*â... , etc. What you might not know is that EVERY bank and international CPA firm has been hacked. Different state agencies, seeking to embarrass each other, have a leaking war going on. The public has only seen 10% of what the international journalists (Like ProPublica, ICIJ, Transparency International, The Guardian, etc.) have in their hands. The Government hired a team to build America's back-up energy plan "*in case the Middle East had problems*". The Government convinced them to invest years of their time and their life savings in this Government sponsored program. At the last minute, the government didn't pay what they had promised that team and sent the money, instead, to a White House political campaign financier oligarch. Federal and news investigators later discovered that the oligarch, and his staff, were sleeping with, giving jobs to and paying the White House staff that made all of the funding decisions. It was felony-class organized crime. What you can expect to see in the future is a set of material called â... **THE ENERGY PAPERS**â... . (

https://www.the-truth-about-the-dept-of-energy.com/the_energy_scam_papers.pdf) These materials document an organized-crime using taxpayer dollars to pay quid pro quo to politicians and their tech oligarch financiers. The papers document how bribes, payola and insider deals financed Solyndra, Ener1, Tesla, Abound and others. Elon Musk, Mark Zuckerberg, Eric Schmidt and Larry Page are exposed ordering hit-jobsâ... on competitors and maintaining covert business ownershipâ... s with U.S. Senators.

FACEBOOK/META: Because of what the â... **THE FACEBOOK/META FACE-PLANT**â... matter exposed; citizens are calling their elected officials and demanding that the Department of Defense and The Department Of Justice CUT-OFF *Facebook/WhatsApp/Instagram* from their global DNS servers until they **FULLY answer to Congress for their crimes and lies**. This Silicon Valley social crime operation has been proven to be a national security risk, a dire threat to our youth, **a bribery operator** and a threat to society as a whole! October 4, 2021 was the first day in modern human history that the entire planet was freed from the social stain that is the Facebook empire. University data scientists and forensic internet analysts were able to compare traffic manipulations on Oct 1., 2021, by Facebook's web manipulation and privacy harvesting gang, to the "clean" internet that uniquely existed on Oct. 4, 2021. **You can see the changes. You can see who was controlling what. You can see the fake user data stop...and start. The whole thing is rigged and the scientific facts now prove it!** The Congressional Senate Commerce hearings have further proved that FACEBOOK operates exactly like a **Mexican drug cartel** run by 'El Zucko' pushing addictive media and messaging to kids and vulnerable citizens in order to control global politics. Zuckerberg's â... Tech Cartelâ... owns the U.S. Congress with billions of dollars of bribes and lobbyists. We have warned Congress and the agencies about these issues, in writing, since 2002 but *lobbyists seem to speak louder than justice! The facts prove that Facebook is one of the largest abusers of children in the world. FACEBOOK-META makes over one billion dollars, per day, for each day that they delay Congress from acting! If Osama Bin Laden and Adolph Hitler jointly owned Google and Facebook and Congress repeatedly called them in for hearings and at the end of each hearing they said "We made some mistakes but we will do better", would you ever believe them? Would you wonder how Congress could go for decades without stopping them? If you found Nazi gold bars and underage Afghan slaves in the closets of the Senators, would that better explain why Congress does nothing about Facebook And Google?*

KEY FEDERAL INVESTIGATION TARGETS FOR INDICTMENT, ARREST, SURVEILLANCE AND FORCED PUNITIVE BANKRUPTCY

A.J. Delaurioâ... Defamation-for-sale blogger

Abound Solar - Criminally corrupt crony campaign finance front operation. **Targeted For Bankruptcy For Abuse Of The Public**

Adam Dachisâ... Defamation-for-sale blogger

Adam Weinsteinâ... Defamation-for-sale blogger

Adrian Covertâ... Defamation-for-sale blogger - **Targeted For Bankruptcy For Abuse Of The Public**

Adrien Chenâ... Defamation-for-sale blogger

Al Dâ... Amato, Park Strategies. The former GOP New York senator has been a big advocate for online gambling as a lobbyist for the Poker Players Alliance.

Al Mottur and Manuel Ortiz, Brownstein Hyatt Farber Schreck. Mottur heads up lobbying operations at the K Street giant. Ortiz, one of Brownsteinâ... s newest hires, is a rising star in Democratic circles.

Alan Henryâ... Defamation-for-sale blogger

Albert Burnekoâ... Defamation-for-sale blogger

Alex Balkâ... Defamation-for-sale blogger

Alexander Pareeneâ... Defamation-for-sale blogger

Alexander Sternhell, Sternhell Group. Previously a Senate Banking Committee staffer, Sternhellâ... s two-year-old venture is in the big leagues with clients such as Citigroup Management and PricewaterhouseCoopers.

Alexandra Philippidesâ... Defamation-for-sale blogger

Allison Spinner â... Wife of Steve Spinner and lawyer at WSGR and Solyndra who helped Feinstein rig the Solyndra cash ((Under investigation. All assets being tracked and terminated.)

Allison Wentzâ... Defamation-for-sale blogger

Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation) **Targeted For Bankruptcy For Abuse Of The Public**

Andrew Collinsâ... Defamation-for-sale blogger

Andrew Magaryâ... Defamation-for-sale blogger

Andrew McCormack

Andrew Orinâ... Defamation-for-sale blogger

Andy Barbour, Smith-Free Group. Smith lobbies for several financial and insurance companies but is best known for his work as the lead Democratic lobbyist for the Financial Services Roundtable.

Andy Bechtolsheim â... VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)

Aneesh Chopra

Gawker Media â... DNC/Clinton/Obama character assassination media tool - **Targeted For Bankruptcy For Abuse Of The Public**

Gizmodo Media - **Targeted For Bankruptcy For Abuse Of The Public**

Georgina K. Fairclothâ... Defamation-for-sale blogger

Gerald Cassidy and Gregg Hartley, Cassidy & Associates. The trailblazing firm has regained momentum by diversifying its practice following a staff shake-up late last year.

Gilman Louie â... VC, founder on IN-Q-Tel

Gizmodo â... DNC/Clinton/Obama character assassination media tool (Failing, rapidly decreasing users and increasing fake ad stats disclosures) **Targeted For Bankruptcy For Abuse Of The Public**

Goldman Sachs â... Financial packager (Suspected of staging most of the TARP/DOE deals for personal gain & insider payouts)

Google, Inc. â... Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and moreâ...!) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.) **Targeted For Bankruptcy For Abuse Of The Public**

Gregory Howardâ... Defamation-for-sale blogger

Greylock Capital â... Silicon Valley Insider trading operator (Under investigation) **Targeted For Bankruptcy For Abuse Of The Public**

Hamilton Nolanâ... Defamation-for-sale blogger

Hannah Keyserâ... Defamation-for-sale blogger

Harry Reid â... Senator- Solar factory guru, Congress lead (Accused of political bribery and kickbacks; tax evasion, and moreâ...!Forced out of Congress in shame)

Heather Deitrichâ... Defamation-for-sale blogger

Heather Podesta, Heather Podesta + Partners. The former congressional aide has built a solid lobbying practice and helps fundraise for Democrats with her husband, Tony.

Hillary Clinton â... Dynastic politician

Hudson Hongoâ... Defamation-for-sale blogger

Hugo Schwyzerâ... Defamation-for-sale blogger

Hunter Slatonâ... Defamation-for-sale blogger

Ian Fetteâ... Defamation-for-sale blogger and Google, Gawker, Jalopnik, Gizmodo media assassin

In-Q-Tel, Inc. â... CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders.

Ran â... hit-jobsâ... on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded) -

Targeted For Bankruptcy For Abuse Of The Public

Ira Ehrenpreis â... VC Campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!) (All of his personal assets, investments and portfolio holdings are under investigation)

Irin Carmonâ... Defamation-for-sale blogger

Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. - **Targeted For Bankruptcy For Abuse Of The Public**

J. Steven Hart, Williams & Jensen. Hart is a sought-after GOP fundraiser who has steered the ship for more than a decade as Williams & Jensenâ... s chairman and CEO.

Jack Lew

Jacque Littlefield â... VC, Dead

Jalopnik â... Online defamation facade political publication. Pretends to be about cars but is DNC hit job rag - **Targeted For Bankruptcy For Abuse Of The Public**

James Bronkema â... West Coast Money Man for David Rockefeller and Feinstein financier - **Targeted For Bankruptcy For Abuse Of The Public**

James Brown Jr â... HHS Programming lead in California (Arrested for corruption)

James J. Cookeâ... Defamation-for-sale blogger

James Kingâ... Defamation-for-sale blogger

Jared Cohen â... Google boss and international political manipulator

Jawed Karim

Hunter Biden

Jay Carney â... White House press lead (Forced to resign)

Jeff Berman and David Russell, Bryan Cave. Berman, the former delegate counter for President Obamaâ... s 2008 campaign, and Russell, a former chief of staff to the late Sen. Ted Stevens (R-Alaska), are standouts on a capable lobby team.

Jeff Lieberman

Jeff Peck, Peck, Madigan, Jones & Stewart. Once an aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee, Peck has carved out a niche working on the Dodd-Frank reform law.

Jeffrey Zients

Jennifer Ouelletteâ... Defamation-for-sale blogger

Jeremy Stoppelman

Jerry Brown â... California politician

Jesse Oxfeldâ... Defamation-for-sale blogger

Jessica Cohenâ... Defamation-for-sale blogger

Jesus Diazâ... Defamation-for-sale blogger

Jillian Schulzâ... Defamation-for-sale blogger

Jim Blanchard and Ilia Rodriguez, DLA Piper. Blanchard, a former Democratic governor of Michigan, and Rodriguez, an ex-lobbyist for the Center for American Progress, are at the vanguard of a formidable K Street team.

Jim Breyer â... VC and CIA intermediary

Jim Goetz

Jim Pitts and Chris Cox, Navigators Global. Pittsâ... s firm has welcomed back GOP consultant Mike Murphy, adding more Republican talent to pair with Cox, a skilled hand from the George W. Bush White House.

Joanna Rothkopfâ... Defamation-for-sale blogger

Joe Lonsdale â... VC, famous for rape and abuse scandal and domestic spying via Palantir

Joe Rhodes â... White House shill

Joel Johnson, The Glover Park Group. The former aide to Sen. Tom Daschle (D-S.D.) helps manage one of the marquee Democratic-leaning firms in town.

Johanna Shelton

John Breaux and Trent Lott, Breaux-Lott Leadership Group. Now merged with Patton Boggs, the two former senators are going strong with a profitable lobbying practice anchored by several blue-chip clients.

John Cookâ... Defamation-for-sale blogger and director of media assassins group

John Doerr â... Owner â... Kleiner Perkins. â... Godfatherâ... â... Silicon Valley Cartel (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)(All of his personal assets, investments and portfolio holdings are under investigation) **Targeted For Bankruptcy For Abuse Of The Public**

John Herrman â... Defamation-for-sale blogger - **Targeted For Bankruptcy For Abuse Of The Public**

John Lindfors

John Podesta â... White House adviser

John Raffaelli, Capitol Counsel. The former Democratic staffer has more than 25 years of expertise in taxation and international trade â... two issues at the top of the congressional agenda.

Jonathan Silver â... DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)

Jordan Sargentâ... Defamation-for-sale blogger

Joseph Keenan Trotterâ... Defamation-for-sale blogger

Josh Ackil and Matt Tanielian, Franklin Square Group. With clients including Apple, Google and Intel, the two Democrats are among the elite lobbyists for Silicon Valley in Washington.

Josh Kopelman

Josh Steinâ... Defamation-for-sale blogger

See the draft notes for the litigation at http://www.the-truth-about-the-dept-of-energy.com/the_energy_scam_papers.pdf

Felony Charges Against U.S. Senators And Other Public Officials

The companies charged in this complaint are largely owned by U.S. Senators and their family members, along with agency officials.

In other words, the companies charged with doing coordinated crimes and corruption are owned by the very people responsible for regulating those companies.

Those public officials have the means, the motive and the novel ability to manipulate funding for those companies and their competitors.

Forensic data proves that the charged officials have done so.

Analysis of financial disclosure data, FINCEN reports and ICIJ leaks shows senators and their spouses have assets in corporate stocks.

We have first-hand knowledge of, and experience with, West Coast public officials putting hit-jobs, media attacks and benefits manipulations on their constituents in order to protect their stock interests.

As they set national policy on important issues such as climate change, tech monopolies, medical debt and income inequality, senators have glaring conflicts of interest and have participated in cover-ups of these crimes and attacks on us.

Speaking of COVER-UPS: 1.) Simone Biles, The U.S. Olympic Gymnastics Team and Larry Nasser sex case, 2.) The Jonestown cult case, 3.) The Gov. Gretchen Whitmer kidnapping case, 4.) The 9/11 families case, and hundreds of other cover-up crimes by government officials cover-up crimes. The victims reported to the FBI, DOJ, GAO, FTC, SEC and Congress in the past have been stonewalled, lied to, attacked and retaliated against simply because they reported a crime! THIS CASE is yet another example of crimes that were reported long ago but because it involved famous rich people, it was covered up by public officials.

FINCEN, The FBI and the GAO have proven that stock ownership by politicians creates noncontractible quid pro quo relationships with firms like Tesla, Google, Facebook and Netflix. The ownership by US Congress members in these firms contributes to the bias in campaign contributions is higher than in noncontributors. This bias toward contributors depends on the financial incentives of the contribution's value. Firms with a stronger ownership relationship receive more government contracts, such as Elon Musk's record-breaking government payola. The financial gains from these contracts are enormous. Politicians buy stocks in covert exchange for contributions to the politicians, via insider arrangements. We got evidence of government officials getting paid bribes via insider trading. Now they owe us! See: http://www.the-truth-about-the-dept-of-energy.com/the_energy_scam_papers.pdf

This matter covers:

- 1.) The creation and operation of the disclosed organized crime entity involving public figures
- 2.) The methods and tactics of the bribery they employed using the stock market
- 3.) The attacks they operated against whistle-blowers and competitors using government resources, black-listing and dirty tricks services.
- 4.) The systemized sex trafficking and employee abuse protection scheme they operate
- 5.) The industrialization of political payola that they enforce using corrupt contracted services and former intelligence

- 6.) Their coordinated violations of free speech and their systemized control of all digital news and information
 - 7.) The harms to the public that they caused
 - 8.) Judges and regulators who reviewed this case who owned the culprits companies:
- <https://www.dailymail.co.uk/news/article-10038643/131-federal-judges-broke-law-hearing-cases-involving-co>

Now is the time to make things right Email: sky-king@lifebooks.net if your firm is experienced in federal FTC
http://www.the-truth-about-the-dept-of-energy.com/the_energy_scam_papers.pdf

The FBI, FINCEN, GAO, the AG and IG have been informed that Joshua Comins, and others, have now disclosed financial dealings gave her \$315 million in assets on just a government salary. Organized crime is suspected. I am mad at a constituent they can have that constituent's erased from SSA, HUD and pension benefits, bla and utterly destroyed.

The United States Department of Energy AND The FCC have taken bribes via stock payments to their staff, ex contractor/advisors. They were paid off to partner with California Senators in order to rig money exclusively to LGP and Battery funding programs at DOE are nothing but crony payola scams and most of DOE staff should

Pelosi, Harris, Feinstein, White House financier Google and George Soros own Elon Musk's companies. Can Musk get a fair shake in commerce or government funding? Never!

Where's the politician's dirty money? money coming from?, everyone is asking.

House Speaker Nancy Pelosi, D-Calif., has served in Congress for nearly 34 years and presently presides in the most powerful figures in the U.S. government.

Speaker was unable to pass the bipartisan infrastructure bill as progressives in her own party signaled their disapproval, condemned her policies, saying they're making it "harder and harder for average Americans to accumulate wealth, pay taxes and "destroying the dollar with reckless spending." The current salary of a Speaker of the House sits in the millions. Pelosi is one of the richest members of Congress. So what is her secret: "It appears to be her husband, Paul."

"After they got married, Paul opened up a real estate and venture capital firm. Through his connections, he pushed his way into the political world, helping her get elected to Congress in 1987,". This is just like how Dianne Feinstein and Richard Blumenthal own deal.

The couple has timed the market and insider trading perfectly over the years while Nancy's been a Washington insider and stocks, the Pelosis always know what the right investment is based on her lobbyist deals. The Pelosis own a large estate including a mansion in Napa Valley valued up to \$25 million, a DC waterfront condo worth over \$2 million, a mansion in California's Pacific Heights.

Her husband owns commercial properties in San Francisco "combined, worth up to \$50 million.

In 2018, the Pelosis' wealth has skyrocketed. That year, her financial disclosure report revealed a net worth of \$1.1 billion. In 2019, Pelosi's assets total up to a whopping \$271 million and in 2020, those numbers went up even more to \$1.2 billion.

In 2007, Visa worried the new Democrat Congress would target their swipe fees, costing them billions. So they sent a letter who descended on Pelosi. Visa's CEO personally met with her. She got donations from them. One of his advisors was a VISA lobbyist himself. Suddenly, Paul Pelosi got a phone call from his broker. He was in luck, Paul was offered to get in early on Visa's \$18 billion IPO. Did Nancy and her husband hesitate? No, they bought between \$1 million to \$2 million of Visa stock. But it gets better. While Pelosi was speaker, bills that would have hurt Visa's stock price were blocked. Visa shares going up over 200 percent during the time, making the Pelosis a fortune on paper.

In January, the Pelosis got a million dollars worth of Tesla stock right before Joe Biden announced electric cars. The Pelosi family cashed in big time just before Congress was set to pounce on Big Tech. Mr. Pelosi exercised options in Tesla company, Alphabet, making an easy \$5.3 million.

Pelosi, Harris, Feinstein, Google and George Soros own Elon Musk's companies. Could any competitor to Tesla, Google, Facebook, Amazon, Apple, Microsoft, or commerce or government funding? Never!

In March, Paul Pelosi exercised \$2 million worth of Microsoft options, just two weeks before the tech giant got a contract to equip the US Army with high tech headsets. The Pelosis and the Feinsteins have never been indicted for insider trading. Their investments and access, combined with extremely fortunate timing, have created a lot of suspicions.

FINCEN, GAO, FBI, ICIJ and private investigators are now following the money, and there sure is a lot of it. They are also suspected criminal dark money charges that have been pointed at San Francisco Bay Area politicians.

At the suggestion of some government officials, we would like to further examine the offer to partner with the DOJ to prosecute our case. Where we had proposed mediation, we concurrently, also, propose a JV opportunity suggested by Congress.

Every public official who attacked Plaintiff: A.) held stock and assets in Plaintiff's competitors, B.) was connected to Plaintiff's competitors, C.) was a member of organizations who paid news, internet and information services for their own unjust gain, D.) knew that their malicious assertions were false and defamatory, and E.) are all means test to qualify as violators of federal RICO laws, Human Rights laws, Civil Rights standards and related Constitutional rights laws.

By rigging HUD, SSA, DOE, and other public benefits determinations, to harm the funding, payments, witness protection, whistle-blower awards and stock market profits of adversaries, the Defendants engaged in felony crime. The purpose is to cripple the whole crime organization via numerous charges, which shall be brought against multiple defendants. This is a conspiracy, which means that prosecutors will find the underlying elements of these acts and then have conspiracy liability, which means that each and every charge against the perpetrators is separate and runs consecutively.

For example when Elon Musk is charged with bribery and conspiracy that charge may have led to his imprisonment in the old days, now under RICO, when found guilty of racketeering he can be fined up to \$10 million and sentenced to 20 years in prison per each racketeering count.

RICO charges, as part of the charge set, will make these convictions easier. In many cases, the government indictment can force these defendants to plead guilty to lesser charges, in part because the government would make it difficult to pay a defense attorney for a case this large. Racketeering and RICO are very serious, very grave and require skilled defense, that is prepared to face the government-assembled legal team in court. Essentially, it means the convicted would never see the light of day again, they are out of the game.

Despite its harsh provisions, these RICO-related charges are easy to prove in court, as they focus on the behavior as opposed to criminal acts. The government officials and their tech oligarch partners are publicly promoting their crimes and their above-the-law attitudes. RICO, here, also permits a civil suit. If a person is damaged in his business or property by a racketeer, he can file a civil suit. The government can join with Plaintiff in this case.

The plaintiff has proven the existence of an "enterprise" .

The defendant(s) are not the enterprise; in other words, the defendant(s) and the enterprise are not the same.

The defendant(s) meet the construct of four specified relationships:

1. the defendant(s) and the enterprise: either the defendant(s) invested the proceeds of the racketeering activity into the enterprise;
2. the defendant(s) acquired or maintained an interest in, or control of, the enterprise through racketeering activity;
3. the defendant(s) conducted or participated in the affairs of the enterprise "through" racketeering activity ;
4. the defendant(s) conspired to do all of the above crimes.

The enterprise, herein, is the "prize," "instrument," "victim," or "perpetrator" of the racketeering activity. A civil RICO action for this matter should be filed in state AND federal court.

We intend that both the criminal and civil components will allow the recovery of treble damages (three times the amount of actual/compensatory damages) for Plaintiff.

Our evidence has focused on patterns of behavior AND criminal acts.

We seek multiple liability (charges brought against multiple defendants, which means if proven, all the underlying elements of these acts, you have conspiracy on top of it)

Each and every charge against defendants is separate and runs consecutively. Admissible hearsay is offered in this case. Associative evidence is allowed (guilt by association meaning if a defendant is proven guilty of crimes of an organization even if he was not directly involved with the crime himself he shall be deemed a co-conspirator and go all the way up the chain of command).

This case structure will incentivize the operatives (soldati) at the corrupt law firms, CPA's, and other outlets to flip, or roll-over, on the bosses.

This case structure allows both the government and Plaintiff to engage in substantial asset seizure. The owners of the racketeering shell corporations, real estate scams and trusts are well-known and their assets are traceable. An injunction and/or performance bond ensures that there is something to seize in the event of a guilty verdict. In addition, the racketeers must forfeit all ill-gotten gains and interest in any business or property involved in a pattern of "racketeering activity." Over 1000 false-front shells, trusts, dark money accounts, etc. are to be held by the defendants.

While government bosses may be embarrassed, or find this matter "politically awkward", no one should care. Any boss who delays or obfuscates this case further should consider that they will, by doing so, define themselves as a member of the above defined "enterprise" and will be criminally referred to the prosecution.

There is no time like TODAY, to get this matter moving. See:
http://www.the-truth-about-the-dept-of-energy.com/the_energy_scam_papers.pdf

An Inconvenient Truth: How Tesla Became a Trillion-Dollar Company Through Corruption, Bribery And Cronyism

Astonishing story about the rise of green technologies using political payola

[By Ilya Pestov and The Justice Alliance](#)

Al Gore and Elon Musk

After the news that Hertz [decided](#) to buy 100 000 Tesla cars for more than \$4 billion, Tesla capitalization has already increased almost by \$200 billion. I am not talking about the market irrationality anymore, but I feel a bit curious. Hertz has recently emerged from bankruptcy and [has not received](#) any wholesale discount from Musk. How and why is Hertz going to buy such expensive cars? The answer is simple â... with taxpayersâ... money.

Apparently, the White House [has recently passed](#) the Budget Reconciliation Bill, which would cost \$1.75 trillion for US citizens. There are plenty of benefits for the so-called â... clean energyâ... in it, particularly, 30% of tax deductions for â... [qualified commercial electric vehicles](#)â... . It means that after buying Tesla cars Hertz will receive \$1.26 billion of tax cashback. In fact, there are also some benefits for the installing of electric vehicle charging stations. Hertz has already announced plans to make thousands of charging stations.

Lithium, Cobalt and rare earth mines are owned by Kleiner Perkins, Goldman Sachs and Department of Energy/White House insiders. That is what power's Elon Musk's cars. Many say that Tesla was just a front for invading foreign nations for their lithium batter mines (which are operated with child labor).

It is important to mention that common people have also an access to tax benefits that the public pays for with their April income taxes and the compensation limits [are increased](#) from \$7500 to \$12 500. As an example, instead of paying \$15 000 income tax you may buy Tesla Model S and pay just \$2500. It is like a pretty bonus from Tesla or a good discount on electric vehicles. Seems to be a good motivation to refuse internal-combustion engines, doesnâ... t it?

Moreover, Tesla also gets ZEV credits and other benefits for manufacturing its products. That way, the US government restructures the automotive market literally by hand and picks the winners and losers. Do you know what I find the most interesting in this story? The fact that the new bill [was published](#) on October, 28th but Hertz announced buying of Tesla cars on October, 25th. As you can understand, the decision was made much earlier.

You may already know that Secretary of Energy Steven Chu, who gave Tesla their money, and his Silicon Valley friends at McKinsey Consulting, who provided the staff for the Department of Energy, were all in the pocket of Kleiner Perkins, where Al Gore works. Chu has now been replaced by an actress named Jennifer, who laughs at any suggestion that her job involves protecting America by keeping gas prices low and who owns the very companies that she is giving government funds to.

Now I would like to tell you about one very interesting character in the US establishment named Al Gore. This is the former US Vice President under Clinton, the presidential candidate in 2000 and the Nobel Peace

Prize winner for the film An Inconvenient Truth (2006) about global warming.

His film and book have actually become the foundation for modern climate policy and the public demand for renewable energy sources. One should notice keep in mind that along with the awareness of internal concern for the ecology Al Gore was one of the first who realized the commercial potential in projects devoted to the protection of the environment.

Two years before â... An Inconvenient Truthâ... Al Gore together with Goldman Sachs Chief Asset Manager David Blood has run a new investment company Generation Investment Management. As a result, they both defined terms sustainable investing and ESG.

The former presidential candidate, as we could see, was very good at technology and finance. In 2007, he was suddenly [invited](#) to become a partner in Kleiner Perkins â... one of the oldest and largest venture funds of Silicone Valley. John Doerr, one of Kleiner Perkins chief partners, joined the advisory board of Generation Investment Management.

J. Doerr, as Al Gore, stood for the innovations in clean energy to struggle with climate change. On the TED conference in 2007, he quoted his daughter â... your generation created this problem, you better fix itâ... . That reminds me on Greta Thunbergâ... s words which would be told later. So that J. Doerr and Al Gore had a similar vision of the future and the month after mentioned partnersâ... rotation Kleiner Perkins fund invested into Silver Spring Networks. Biden's daughter, Ashley, left her hand-written diary for journalists to find where she reveals the same thoughts (in addition to her naked shower play with Joe Biden)

By great coincidence, this deal happened a year before the US Department of Energy [had announced](#) a \$3.4 billion grant program for smart grid developers. In fact, \$560 million of this amount was spent to utilities serviced by Silver Spring Networks, which works exactly with smart grids. 6 years later Silver Spring Networks successfully entered an IPO.

David Blood, Al Gore and John Doerr

Luck literally pursued Kleiner Perkins. In 2008, the fund invested tens of millions dollars in a start-up hybrid cars manufacturer Fisker Automotive. After that, in September 2009, the company [received](#) a low-interest \$529 million loan under the Advanced Technology Vehicle Manufacturing (ATVM) direct loan program from the same US Department of Energy.

Congress [passed](#) ATVM in 2007 after a drop in sales in the big three (General Motors, Ford, and Chrysler). The volume of the borrowed capital was \$25 billion. The goal of the program was to help the US auto industry to reduce fuel costs because Americans were tend to choose more fuel-efficient Japanese cars. That is, the problem devoted not to ecology issues, but much more to fuel saving.

Again, ATVM passed in 2007, but the allocation of funds began only 2 years later on a competitive basis. In February 2009, 8 months before the government loan to Fisker Automotive, John Doerr of Kleiner Perkins [became](#) a member of the Presidential Economic Recovery Advisory Council. The funny thing is that Fisker did not even have manufacturing facilities in the USA and the assembly of their Karma models took place in Finland.

The Obama-Biden administration appointed a venture capitalist from Kleiner Perkins as a member of an economic advisory board. They also signed a government loan for help American automotive industry to a company (without any manufacturing capacity in the United States) that Kleiner Perkins has invested in.

That trick [was obviously noticed](#) by the public. Some companies [have sued](#) the Department of Energy, Mitt

Romney even [called on](#) Congress to open an investigation into the loan to Fisker Automotive, pointing out that its investors included Al Gore, who sponsored Obama's presidential campaign. Nevertheless, somehow all those worries dwindled away as federal cover-ups went into full swing.

Fisker's plans to start the manufacture at a closed GM plant in Delaware at the expense of a government loan, which GM itself did not receive, deserved special attention. These plans caused some questions among local residents, and then current Vice President Joe Biden, who served as Senator from Delaware from 1973 to 2009, [assured](#) people that the budget money for Fisker would be paid off, and the company will eventually return billions-billions dollars to everyone.

Running ahead, the budget money didn't return to taxpayers because Fisker went bankrupt in 2013. From the bankruptcy documents, which fell into the journalists' hands only 7 years later, it [turned out](#) that Hunter Biden (Joe Biden's son) was an investor of Fisker. However, this fact also faded into oblivion without preventing Biden from gaining 58.8% of the votes in Delaware during the 2020 presidential election.

Let us turn back to Tesla. Only \$8.4 billion [were allocated](#) from the \$25 billion program of help to the American auto industry. Only 5 companies received money, although 108 applications were received. Almost \$6 billion went to Ford with a democratically oriented management, \$1.5 billion were given to Nissan, about half billion to Fisker and Tesla and, finally, \$50 million came to a less known VPG company.

Just one of the first results in Google on the Chrysler republican query.

Surprisingly, the credit limit has not been exhausted, large manufacturers like General Motors or Chrysler did not receive money, but two unprofitable startups from California, selling several hundred cars each, [did](#). We already know the main lobbyists of Fisker they are Al Gore and John Doerr, who invested in Fisker through Kleiner Perkins. But were they acquainted with Elon Musk? A brief search immediately gave a positive answer to that question.

In 2013, Al Gore, while talking about his new Tesla S in an interview to Yahoo Finance, [called](#) Elon Musk his friend. More than that, his son Al Gore III [has been in charge](#) of Policy & Business Development at Tesla since 2015. After learning that I immediately went to have a look at the Generation Investment Management profile on CB Insights. It turned out that the Gore fund had invested in Musk's SolarCity in 2011 and Gore III [worked there](#) as a Policy Officer.

Then in 2016, Tesla acquired SolarCity. An unprofitable service company that didn't even produce solar panels was taken over for a suspiciously large amount of money. Recently it [turned out](#) that Elon Musk has

faced a \$9.4 billion fine for this deal, although the final court decision had not been made yet. It is important that after the takeover in 2018, Al Gore became suddenly [nominated](#) for the post of chairman of the Tesla board of directors.

SolarCity's valuation was really high

Al Gore [rejected](#) that offer but I did not doubt more about his close connection with Tesla. At the same time, I was interested in their possible contacts before receiving the lobbied state subsidies of 2009. Thatâ... s why I decided to change the angle and check whether Tesla has a relationship with Kleiner Perkins. Then it turned out that Elon Musk had been friends with John Doerr for a very long time.

In 2006, when Tesla looked for money in round D₁, Kleiner Perkins fund offered \$50 million, while VantagePoint offered \$70 million. Despite the huge difference in bids, Musk wanted to strike a deal with Kleiner Perkins but on the condition that John Doerr would sit on the board of directors. Unfortunately, J. Doerr had many other obligations and was forced to refuse. Thatâ... s why Musk chose VantagePoint, as he [told](#) in an interview.

I went on and learned that the vice president of Tesla in 2006â... 2017 was Diarmuid Oâ... Connell. As I remember, he [was responsible](#) for national security issues under former Secretary of State Colin Powell. He also spoke about Iraq chemical weapons and showed test tube to legitimize the military invasion of Iraq at the UN in 2003.

I wondered how he appeared in that story. However, I didnâ... t have to look for an answer for a long time, so let us meet Colin Powell, a member of the advisory board of Kleiner Perkins, a strategic partner of the fund in 2005.

There was no direct investment from the fund in the company, nevertheless it seems that there was another strong connection between Kleiner Perkins and Tesla. Is Al Gore really not a government subsidy beneficiary for Tesla? My confirmation bias did not allow this thought to get along in my head. Searching for keywords, I came across publications in [Yahoo Finance](#) and [Insider Monkey](#). The articles mentioned Goreâ... s earlier investment in Tesla.

Keeping in mind that the journalists could simply make a mistake, I began to study which funds were invested in Tesla at earlier stages and whether Al Gore was involved. Finally, I came across [an interview](#) with the managing partner of Capricorn Investment Group on the blog of the Japanese financial holding Nomura. He said that Capricorn financed the filming of â... An Inconvenient Truthâ... movie.

Capricorn was founded by Jeffrey Skoll, the former eBay president and billionaire. The fund invested in Tesla

together with SpaceX at early stages. Mr Gore [brought in](#) \$35 million! Can you imagine? â... Thatâ... s a big wad of cash for someone who reported barely \$2 million in assets in 2000, when his job as vice president came to an endâ... , as the New York Times wrote in 2008.

As a result, Al Gore was the direct beneficiary of providing state loans under the ATVM program for Fisker Automotive and Tesla Motors, in which he owned shares through venture funds Kleiner Perkins and Capricorn Investment Group.

When I proved it, I wanted to learn more about Al Goreâ... s bio. It has been revealed that after losing the election, in 2001, he [became](#) a vice president of Metropolitan West Financial â... a company with more than \$65 billion in assets under management. The company [was managed](#) by former heads of Drexel Burnham Lambert. That was a bankrupt investment bank, which history was very similar to Lehman Brothers.

The same year Mr Gore also joined the Google Advisory Board, in which he [invested](#) together with Kleiner Perkins in 1999. Probably that was the time when he met John Doerr. Then, in 2003, the former US presidential candidate became a member of Appleâ... s board of directors. In addition, the founders of Google were also early investors in Tesla.

It is clear that Albert Gore had many connections in political and financial communities. In 2006, he started a charitable organization The Alliance for Climate Protection. The company [launched](#) a \$300 million (sic!) ad campaign to mobilize Americans to reduce greenhouse gas emissions immediately. As a result, an â... inconvenient truthâ... was told to everyone.

In 2009, Gore [appeared](#) before the United States Senate Committee on Foreign Relations to support Obamaâ... s economic recovery plan. Then the government had passed the Recovery and Reinvestment Act, which included an \$80 billion stimulus package to promote green energy initiatives. Newspapers [called](#) the bill the â... biggest energy bill in historyâ... .

The person who owns stakes in Tesla and Fisker first knocks out government loans and then pushes a law according to which manufacturers of electric vehicles should pay fewer taxes, and buyers of electric vehicles should receive tax deductions. Can you imagine?

Surely, Al Gore was not the only one who acted in this process. In 2006, Nick Pritzker, the brother of Hyatt founder, [invested](#) in Tesla. His niece Penny Pritzker became the 38th US Secretary of Commerce in Barack Obamaâ... s cabinet, and his nephew was the Governor of Illinois. In general, Pritzker is one of the richest families in the US.

Among of early investors in Tesla there is Steve Westley, a politician and businessman. He has already joined the companyâ... s board of directors in 2007. More than that, during the 2008 presidential election, Westley [acted](#) as a co-chairman of Californiaâ... s Obama for America campaign. Currently, he is a member of the US Department of Energy advisory board.

Al Gore, John Doerr, Nick Pritzker, Steve Westley, Elon Musk, Sergey Brin, Larry Page â... all of them [were](#) so-called donors and beneficiaries to the Obama campaign. I mentioned only the names from the public access. Let me remind that these people are only mentioned in the context of the Tesla story while the whole green initiative and the Recovery and Reinvestment Act affects a much larger number of companies and investors.

The rapid development of electric vehicle companies is taking place in a distorted market environment. Their commercial success is mainly driven by government incentives unavailable for ICV cars manufacturers.

The US government is literally restructuring the auto market by hand in order to make one guy: Elon Musk,

massively rich.. In that case the active discussions about climate change and greenhouse gas emissions could probably be nothing more than a part of a program to reallocate money in the US establishment since Nancy Pelosi, George Soros and The Feinstein family are the true owners of the stock profits from Elon Musk.

However, the question remains whether this is really a good thing, because there is no full consensus in the scientific community regarding the general belief in the environmental friendliness of electric vehicles and the beneficiaries are always the same 50 people associated with Nancy Pelosi.

Help End The Corruption Of The U.S. Patent Office

America's Senator's, and other major politicians, *own the stock* in Facebook, Google, Netflix, YouTube and Instagram. Those politicians refuse to reform the U.S. Patent Office, or internet privacy, because Facebook, Google, YouTube, Instagram, et al, stole most of their technologies from small inventors that they never paid. Those Big Tech companies have spent billions in lawyer and lobbyist payola to stop inventors from getting paid. Big Tech even has their own staff planted in the U.S. Patent Office to protect Big Tech and to sabotage small inventors. The FBI and FINCEN can easily deliver a forensic auditing report proving that politicians (Mostly those from California) own, and get bribes from, Silicon Valley Big Tech...BUT...Congress refuses to request such a report because it would implicate so many members of Congress! We are exposing the Senator's, Mayor's and Governors that covertly take bribes from Big Tech!

Please join inventors and supporters - Write To Congress and Demand That The PTAB and Silicon Valley Oligarch Control of the U.S. Patent Office be over-thrown:

☐ <https://www.congress.gov/contact-us>

Why?

It is the 10 year anniversary of the America Invents Act, [a radical change to the fundamental structure of the U.S. patent system](#). The Supreme Court has declared that under the AIA patents are no longer property rights, but are now merely "[privileges from the government](#)", which they can unilaterally revoke at the PTAB. Thus the newly created fascist administrative tribunal INSIDE the patent office has invalidated ISSUED patents of thousands of inventors, usually for the benefit of large corporations accused of infringement.

The AIA â... whether deliberate or unintentional â... has been [devastating for independent inventors](#) and small businesses who attempt to compete through innovation. Regardless of how carefully and precisely the law is followed, large corporations are persuading the USPTO to [invalidate 84% of the patents reviewed under the AIA](#). Clearly this is not only bad for inventors, it is bad for society. National security is jeopardized, innovation lags, while corporate incumbents metastasize and roll their monopoly profits to into even more political influence to crush competition.

The effort is to draw attention to the crisis created by the AIA and to seek [legislation to curb unjust patent revocations by the USPTO](#). Under the AIA, USPTO headquarters along with the 4 regional offices are the venues of the [patent "death squads"](#), where administrative patent judges hold hearings and issue orders stripping inventors of our hard-earned intellectual property rights. A sixth location in Vermont is the local office of Senator Patrick Leahy who authored the America Invents Act and needs to hear how his bill has harmed inventors and been [weaponized by large corporations to snuff out small competitors](#).

**RAISE YOUR VOICE, WRITE LETTERS, DEMAND DOMESTIC INNOVATION PROTECTION
FOR INDIVIDUAL INVENTORS LIKE BENJAMIN FRANKLIN**

- THE ANTI-CORRUPTION PARTY -

<http://www.anticorruptionparty.org>

Fightback@anticorruptionparty.org

WE are the "*United States Government*". WE formed the first national governing body in the 1600's. WE hired the politicians to protect us. WE EMPLOY the politicians and WE do not work for the politicians: They Work For Us! WE got screwed by the politicians who used our government for their insider trading. **WE, THE PEOPLE will fix that problem. Democrats, Republicans, Libertarians, Green Party Advocates and ANY other party member can also join our party.**

What are our platform goals?

LAWS YOU NEED TO FORCE YOUR POLITICAL REPRESENTATIVES TO MAKE

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts in Congress.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Obama Administration staff and Department of Energy officials in illicit coordination with U.S. Senators. In other words, we experienced all of the damages from each of the abuse-of-power issues listed below. Your public officials are being paid **BRIBES** through their family stock market holdings. **CUT THEM OFF** - Demand that Congress make it a felony for any politician, judge or regulator to own stocks, or to let their family own stocks. If they want to get rich, they can go into another line of work.

If you can get these laws made, it will end 90% of American corruption. Politicians won't allow these laws to be made because it will cut off their corruption. Thus: You have to force the politicians to make these laws and leverage them with this manual. Tell them: *â... All of the things in this manual will happen to you if you don't make these laws, now!â...*

These are the actions needed to resolve those issues:

- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off
- Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years.
- Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
- Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
- Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists).
- Limit the ability of companies to buy influence through former government officials.
- Require income disclosures from former senior officials 4 years after federal employment.
- Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company.
- Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
- Limit the ability of companies to buy influence through current government employees.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years.
- Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years.
- Ban "Golden Parachutes" that provide corporate bonuses to executives for federal service.
- Publicly expose all influence-peddling in Washington.
- Strengthen and expand the federal definition of a lobbyist to include all individuals paid to influence government.
- Create a new "corporate lobbyist" definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
- Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials.
- End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals.
- Fire the Fed officials that own, trade and pump stocks using the Fed itself for profiteering.
- The most senior officials in the U.S. Government are the worshipers of Elon Musk, investor's in

Elon Muskâ... s companies and suppliers, deciders of the financing for Elon Musk, suppliers of staffing to Elon Musk, recipients of political campaign financing by Elon Musk and Muskâ... s covert Google And Facebook partnership, social friends of Elon Musk and the attackers of Elon Muskâ... s competitors. Make this a felony.

- Combat foreign influence in Washington by banning all foreign lobbying.
- End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- Ban direct political donations from lobbyists to candidates or Members of Congress.
- End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- End lobbyist gifts to the executive and legislative branch officials they lobby.
- Strengthen Congressional independence from lobbyists and end Washingtonâ... s dependence on lobbyists for "expertise" and information.
- Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees.
- Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
- Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies.
- De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process.
- Require agencies to justify withdrawn public interest rules via public, written explanations.
- Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
- Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
- Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White Houseâ... s Office of Information and Regulatory Affairs.
- Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges, can temporarily block agencies from implementing final rules.
- Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
- Empower the public to police agencies for corporate capture.
- Increase the ability of the public to make sure their interests are considered when agencies act.
- Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government.
- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies

accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules.

- Inoculate government agencies against corporate capture such as Google undertook against the White House.
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity.
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process.
- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress's prior disapproval of a different, narrow rule on a similar topic.
- Improve judicial integrity and defend access to justice for all Americans.
- Strengthen Judicial Ethics Requirements.
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations.
- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges.
- Boost the transparency of Federal Courts.
- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges's financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench.
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws.
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers.
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority.
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.
- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.

- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.
- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power.
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office.
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office.
- Disclose the Cash behind Washington Advocacy and Lobbying.
- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure.
- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research, like that from DNC shell McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA).
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence.
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.
- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.

- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending.
- Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites.
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

Do these seem like common-sense rules that should have already been in place? ***They are!***

These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you!

You need to PUNISH any public official who does not put these changes into effect!

How To Join:

We are not asking for your money or your mailing list data. **First:** Simply put the logo at the top of his page ([download it here](#)) on all of your blogs, websites, social media, T-shirts and other visible locations. **Next:** only vote for candidates who promise to enact the platform goals, above, and stop any candidates who do not promise, in writing, to enact these goals.

That's it. It is that easy!

News And Reports:

[Report: Over 131 Federal Judges Broke The Law by Hearing Cases Where They Had A Financial Interest](#)

The Crony Corruption Political Payola Quid Pro Quo

[By Amy Lester, Brad Conners, Steven Reed](#)

- Bribes and crony quid pro quo political payola payments are paid to politicians in Washington DC and Sacramento, California to keep Big Tech monopolies in power!!!

- Citizen groups are now making certain that FinCEN and the FBI are coming for each of these Tech Scum and their Congressional lapdogs!

- The victims are Filing Federal Charges and requesting that the FBI Investigate every one of These Crooks using crowd source Digital Forensics!

The United States Department of Energy runs a political crony-payola slush-fund operation. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. Most observers think that the Department of Energy needs to be sued by the government on behalf of the citizens that were harmed and defrauded by the agencies schemes.

The DOE non-crony victims were specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives who they knew, and their Silicon Valley oligarch financiers. The victims had reprisal/retribution/revenge/retaliation hit-jobs put on them by Fusion GPS, Black Cube, Gawker/Gizmodo/Google and other media attack outlets. Financial records show that the hit-jobs were paid for by U.S. Senators and Department of Energy executives who owned the stock in the victim's competitors.

Jennifer Granholm began touting the "amazing electric car funding" from the Department of Energy and "inviting electric car makers to apply" for fabulous amounts of funding from DOE. Upon becoming the new Secretary of Energy, her staff had to report to her that the Department of Energy has fucked over every single car manufacturer in America and that there are no electric car makers that trust DOE except the handful of Obama buddies who already got cash from DOE. She quickly tried to pivot to "funding batteries for all kinds of stuff", only to find that you can't make batteries unless China allows you to. These two dumb, naive, moves clearly demonstrate the unprofessional and crony idiocy that DOE has become widely known for. Fuel cell cars, (like Toyota, Honda, Hyundai, etc. sell), work perfectly, use domestic materials, don't blow-up like lithium-ion batteries always do and solve all of America's energy problems. Fuel Cell's obsolete the batteries that Jennifer Granholm and her buddies own the stock in! In fact, Jennifer Granholm's Proterra lithium ion buses have been exploding into fireballs lately. Jennifer hates fuel cell cars because her stock market investments are in lithium.

Dept of Energy officials and operatives attacked applicants because those applicants cooperated with investigations of those political officials. The investigations looked at sex trafficking, tax evasion, off-shore money laundering, political bribery quid-pro-quo, revolving door payola scams, foreign nation-sponsored domestic manipulations, stock market rigging, internet censorship and search engine manipulation and other crimes.

The staff churn at the Department of Energy since 2008 has been nothing short of horrific. You find yourself talking to one major staff person one week and they are gone the next week. The Energy Department likes to sucker-in naive, wide-eyed, deer-in-the-headlights college kids with promises of "save-the-planet" and "cutting edge" but each new hire discovers that the come-on's are false. Once the new employee is inside the Department they can easily see the dirt, cronyism and insider schemes. Their dreams shattered, they head out to work for HUD or some other spot. The only ones that are still there, since 2008, are Obama's insiders that make sure that the money only goes to Obama's stock market partners. Department of Energy staff will lie like dogs to anybody who wants to apply for DOE funds. They will tell them that they have an equal chance of getting funded when they know that, even in 2021, only Elon Musk and the Obama sanctioned insiders will get to move forward.

The politicians attacked the whistle-blowers because they reported the crimes to federal police. They attacked them because non-crony applicant's products obsoleted the insider products of Tesla, Fisker, Solyndra and other crony companies owned covertly by Senators. They attacked the victims using taxpayer-funded state resources. That is a felony violation of the law.

The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay. So far they have gotten nothing but cover-ups.

The FBI and other law enforcement organizations define a "cartel" as: 'An association of industrialists and business firms organized covertly to establish a national, or international monopoly, via price fixing and ownership of controlling stock, to operate a trust or monopoly to reduce competition between themselves by allocating markets, censoring public knowledge, manipulating governments or [controlling the price and production](#) of media, products and/or services.' This case is about a criminal "cartel". The Silicon Valley Cartel is an organized criminal enterprise!

In 2007, if someone said: â... The Social Security Administration and other government offices have been weaponized to provide revenge, retribution, reprisal and retaliation attacks against witnesses, whistle-blowers and journalists...â... you might have laughed. Over 2000 victorious lawsuits and IG investigations later: That statement has irrefutably been proven, in courts, to have been totally true. It is now well documented in Court and in federal investigations that Over 120 companies (listed by name, below, sell attack services to well known politicians. Applicantâ... s investigators have proven that â... kill servicesâ... were hired by public officials and aimed at Applicant, and other citizens.

In this case, one Applicantâ... s Senators have made many tens of millions of dollars in profits and bribes off of Google. Google is applicantâ... s competitor, patent infringer and operator of the largest of the attacks. Google, Literally, controlled and staffed, The White House in 2008. The financing, command and control, deployment and beneficiaries all point directly to the perpetrators in this case. The FBI, FinCEN and other investigators have â... no doubtâ... about who attacked Applicant and the scope of the spy agency tactics that were used.

Said one victim: "Government officials and their Silicon Valley cartel financiers are refusing to pay our damages, [blocking our legal rights](#), operating [spy agency-type reprisal attacks](#) and [running cover-ups](#). We demand that they [pay us](#) for our damages [back fees](#) and harms from their [felony crimes](#)... Ask the FBI to show you the [302 reports](#) on this case. Demand that we get a fair Jury Trial. End these bribes and payola schemes. U.S. Government : [PAY OUR DAMAGES!](#)... 'Hundreds of millions of dollars of [crony bribe cash](#) uncovered in [covert family trusts](#), stealth [real estate holdings](#), [shell corporations](#), [Cayman Islands hidden accounts](#), [false-front Goldman Sachs accounts](#), and [nepotism deals](#) held by Harris, Boxer, Feinstein, Pelosi, Reid, Biden, etc. They were supposed to protect us and, instead, lied to us, [ran hit-jobs against us](#) and competed with us! We found out that our political representatives own the stocks and assets of our competitors, have sex and party with our competitors, get tens of millions of dollars of election manipulation services from our competitors and use government spy and public services agencies to screw us over. Most of our political representatives work for corporations who abuse the public and they do it out of pure mercenary greed and lust for power..."

It is now well documented in Court and in federal investigations that Over 120 companies (listed by name, below, sell attack services to well known politicians. Applicantâ... s investigators have proven that Fusion GPS, Black Cube, Gawker/Gizmodo and other â... **kill services**â... were hired by public officials and aimed at Applicants because they assisted with effective law enforcement cases against these corrupt politicians. The victims got Attorney General Eric Holder fired from his job for corruption. The victims got Secretary of Energy Steven Chu fired from his job for corruption..

Police records prove that the arrested and/or charged financiers ([Howard Rubin](#), Ed Buck, Roger Boas, [Jeffrey Epstein](#), [Joe Lonsdale](#) , [Eric Schmidt](#), [Andy Rubin](#), [Sergy Brin](#), [Steve Bing](#), [Michael Goguen](#), [Forrest Hayes](#), [Tom Perkins](#), etc.) of these public officials ran a national sex cult in which some victims were murdered and many were underage. The depth of their sick depravity proves that the perpetrators will stoop to any crime, using the highest levels of government resources, to cover-up their crimes. The Complainant helped investigate some of these perverted perpetrators and has had government agencies deployed to attack him in reprisal, retribution, retaliation efforts as payback.

SPECIAL FOLLOW-UP REPORTS ON THIS INVESTIGATION:

* ["They put HIT-JOBS on us!"\(LINK\) say the victims.](#)

* [EACH CITY, STATE, COUNTY AND FEDERAL OFFICIAL CHARGED IN THIS MATTER](#) WAS RECEIVING [STOCK MARKET ASSETS](#), DIRECT CASH PAYMENTS, POLITICAL CAREER EXCLUSIVES, SEX WORKER EXCHANGES, REAL ESTATE PERKS, PROMOTIONS AND OTHER BRIBES; AND THOSE OFFICIALS HAD INVESTMENT, PERSONAL AND POLITICAL [AFFILIATIONS WITH THE ADVERSARIES](#) CHARGED HEREIN; AND THOSE OFFICIALS HAVE BEEN FOUND, BY FEDERAL INVESTIGATORS, TO HAVE [USED SPY AGENCY RESOURCES TO](#)

[ATTACK PLAINTIFF IN REPRISAL](#) AND IN [ANTI-COMPETITIVE BUSINESS INTERFERENCE](#).

* [Whistle-blowers say: "Don't Be A Sucker! GOOGLE IS A CRIME EMPIRE! Stop Falling For Alphabet's Lies! \(LINK\)](#)

* Most of the money in the 2008 and 2021 "[Stimulus](#)" [funding has been steered to companies](#) who are political friends and financiers of The White House! We are an ad hoc crowd-sourced team of: citizens, federal agency investigators, news journalists, crime victims, forensics experts, insiders, whistle-blowers, and others, seeking justice and an end to the cover-ups!

* Witnesses say: "*They took [billions of dollars](#) out of the Applicant's savings and income and [put it in their own pockets](#) and the [bank accounts of their friends](#)...these politicians are [felony-grade criminals](#) ... if you have a faster, safer, 100% American made product, that is vastly more affordable for U.S. citizens and does not rely on political bribes then the [White House](#) and The [Dept of Energy](#) will blockade it if it competes (<https://www.governmentcompetition.org/>) with their [crony financiers](#).."* Crooked politicians and [The Silicon Six](#) are keeping this culture of bribes covered up!

* See part of the ***FEATURE FILM ABOUT THIS CASE*** online here by clicking the following video site links: [\(LINK 1\)](#) [\(LINK 2\)](#) [\(LINK 3\)](#) [\(LINK 4\)](#) [\(LINK 5\)](#) [\(LINK 6\)](#) [\(LINK 7\)](#) [\(LINK 8\)](#)

The Victim's engineering team, as early as 2005, had informed the Department of Energy, in writing that, as Lithium ion batteries age, the dendrite defects in their internal chemistry cause the batteries to constantly increase their tendency to blow up.

External forces, moisture, ambient energy waves and other factors, increase their tendency to self-ignite. Department of Energy Secretary's of Energy, their staff, White House and CIA executives have been proven, via their public stock brokerage records, to own lithium ion battery companies and child labor rare earth mining interests.

That is why they cover up the dangers of toxic lithium ion (the burning smoke of which causes cancer, brain and fetus damage) and sabotage efforts to market fuel cells, ultra caps, nicad batteries and competing

alternative energy storage: in violation of anti-trust laws.

Proterra Buses are now blowing up, Tesla is known for blowing up, Boltâ... s are now blowing up. Ener1 batteries destroyed millions of dollars of Fiskerâ... s when they got wet... The Department of Energy has hundreds of reports proving this to be a fact.

Citizens demand an end to this cover up that allows corrupt politicians to profiteer on the death of Americans!

How The Social Security Administration And The IRS have been ILLEGALLY Weaponized For Payback Revenge Reprisals Against The Whistle-Blowers And Journalists In This Case

â...! Social Security, SSI, SDI, Disability and other earned benefits were stone-walled. Applications for benefits for the Plaintiffs were intentionally â... lostâ... like a â... Lois Lerner hard driveâ... . Files in the application process â... disappearedâ... . A U.S. Senator ordered Plaintiffs benefits to â... never be approvedâ... even though Plaintiffs worked 60 hour+ weeks for decades in service to their nation and their community. A SSA official in the local SSA office, who had a devout expressed hatred against one United States President ordered a benefits blockade against Plaintiffs because he found out that Plaintiffs ex-lawyer now worked in the White House.

Forensic evidence and backgrounders on every person who worked on, or had access to, Applicants files, records, benefits decisions and related data sets shows that a number of those employees and contractors were members, financiers, web promoters or supporters of ANTIFA anarchy groups or KKK or Proud Boys related political activist-type groups. In San Francisco and Marin Counties SSA offices, in employees workspaces and on their Facebook and MySpace sites, many employees proudly display pictures of themselves wearing their pink "pussy hats", black riot gear and sporting political tattoos. FBI records and IG investigations show that SSA has the highest percentage of political activist employees of any federal agency.

Such persons are inclined to become drunk with power when allowed access to the trillions of dollars of government technology on the SSA file and decisions systems. A number of these persons have worked for, or with, U.S. Senators and other politicians who targeted Applicant in political reprisal. At least 3 persons in the San Francisco SSA office, at least 2 persons in the San Mateo SSA office and at least 2 persons in Marin SSA office are known to have engaged in such actions. Applicants funding and benefits were manipulated, so as to harm Applicant, as political reprisal as vendetta for his provision of testimony to federal investigators in a trillion dollar political corruption matter involving famous political figures featured in global news coverage. A vast number of agency abuse cases and lawsuits are now on public record in the Inspector General's offices and federal courts.

It is an indisputable fact that some government agencies run "hit-jobs" on citizens on orders from certain corrupt politicians. These actions are felony violations of the law.

Federal and State Agencies including SSA, FEC, DOE, HHS, VA, CIA, HUD, SA, SEC, FBI, DOJ and many others, have been charged, and found guilty, in these crimes against citizens.

In the Congressional investigation published by the United States Congress in review of the U.S. Department of Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of Energy was used as a

slush-fund by some DOE executives in order to pay off campaign financiers by attacking and sabotaging their competitors.

The DOE Paducah Gaseous Diffusion Plant under contracts with the Department of Energy and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those whistle-blowers who were attacked, using government agency resources, for reporting a crime.

Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee Walter Tamosaitis for \$4.1 million. The settlement in the whistle-blower case comes almost one year before the case was set for a jury trial in federal court in Richland and compensates Tamosaitis for attacks against him, by DOE officials, in retribution for reporting a crime.

VA officials attacked hundreds of citizens who reported corruption, ie:

<https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution>.

As shown in this report:

<https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-departmen>

, Agencies attack often and harshly.

CIA and NSA executives have been widely shown to use spy tools to attack domestic citizens they don't like, ie:

<https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating>, and hundreds of other news links that can be provided.

Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have been proven to use the CIA group: IN-Q-TEL, to run government sponsored/financed attacks on business competitors.

In Civil Action No. 1:13-cv-00777-RBW GOVERNMENT AGENCIES WERE CAUGHT BEING USED FOR ATTACKS AGAINST CITIZENS AND PUNISHED IN THE COURT AND THE MEDIA!

The IRS, and hordes of other government agencies have been caught and proven, IN COURT, to target and attack people for presumed political differences.

Why should we assume that the Social Security Administration is not ALSO doing this too to harm citizens who speak out?

The Lois Lerner IRS attacks took many years to resolve. In an unprecedented victorious conclusion to a four year-long legal battle against the IRS, the bureaucratic agency admitted in federal court that it wrongfully targeted citizens, during the Obama Administration, because of their political viewpoints and issued an apology to those people for doing so.

In addition, the IRS is consenting to a court order that would prohibit it from ever engaging in this form of unconstitutional discrimination in the future.

In a proposed Consent Order filed with the Court, the IRS has apologized for its treatment of U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-exempt status with the IRS between 2009 and 2012 -- during the tax-exempt determinations process. Crucially, following years of denial by the IRS and blame-shifting by IRS officials, the agency now expressly admits that its treatment of our clients was wrong and a total violation of our Democracy..

As set forth in the proposed Order:

â... The IRS admits that its treatment of Plaintiffs during the tax-exempt determinations process, including screening their applications based on their names or policy positions, subjecting those applications to heightened scrutiny and inordinate delays, and demanding of some Plaintiffsâ... information that TIGTA determined was unnecessary to the agencyâ... s determination of their tax-exempt status, was wrong. For such treatment, the IRS expresses its sincere apology.â...

Throughout litigation of this case, activists have remained committed to protecting the rights of the public who faced unlawful and discriminatory action by the IRS and other agencies. The objective from the very beginning has been to hold agencies accountable for corrupt practices.

This Consent Order represents a historic victory for the public and sends the unequivocal message that a government agencyâ... s targeting of citizens organizations, or any organization, on the basis of political viewpoints, will never be tolerated and that revenge will be swift and vast.

The Order will put an end, once and for all, to the abhorrent practices utilized against citizens, as the agreement includes the IRSâ... s express acknowledgment of â... and apology for â... its wrongful treatment of the public. While this agreement is designed to prevent any such practices from occurring again, rest assured that all public interest lawyers will remain vigilant to ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future.

Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of citizens and groups who were being harassed by the Obama IRS after submitting applications for tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some cases), and they began receiving obtrusive and unconstitutional requests for donor and member information. That began a now more than five and a half year fight with the burgeoning bureaucracy at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

This is an extraordinary victory against government agency abuse. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order to silence and shut down the whistle-blowers.

In addition to the IRSâ... s admissions of and apology for its wrongful conduct, the Consent Order would specifically award Plaintiffs the following:

- A declaration by the Court that it is wrong to apply the United States tax code to any tax-exempt applicant or entity based solely on such entityâ... s name, any lawful positions it espouses on any issues, or its associations or perceived associations with a particular political movement, position or viewpoint;
- A declaration by the Court that any action or inaction taken by the IRS must be applied evenhandedly and not based solely on a tax-exempt applicant or entityâ... s name, political viewpoint, or associations or perceived associations with a particular political movement, position or viewpoint; and
- A declaration by the Court that discrimination on the basis of political viewpoint in administering the United States tax code violates fundamental First Amendment rights. Disparate treatment of taxpayers based solely on the taxpayersâ... names, any lawful positions the taxpayers espouse on any issues, or the taxpayersâ... associations or perceived associations with a particular political movement, position or viewpoint is unlawful.

In the Order, the IRS has also agreed that (unless expressly required by law) certain actions against the Plaintiffsâ... i.e. the sharing, dissemination, or other use of information unnecessarily obtained by the IRS during the determinations process (such as donor names, the names of volunteers, political affiliations of an

organizationâ... s officers, etc.) â... would be unlawful. In addition, the IRS promises not to take any retaliatory action against our clients for exposing the targeting scheme.

Finally, and of crucial significance, the IRS admits it targeted persons and groups based on their viewpoints (i.e., â... policy positionsâ...) and that such viewpoint discrimination violates fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting scheme was not just â... inappropriateâ... â... as TIGTA found â... but, as alleged, blatantly unconstitutional.

To ensure consistency and uniformity within the agencyâ... s operations going forward, the IRS is required, pursuant to the Order, to inform all employees within the Exempt Organizations Division, as well as the Commissioners and Deputy Commissioners within other divisions, of the Orderâ... s terms.

This Order not only validates allegations about their treatment at the hands of the corrupt Obama-era IRS but also provides important assurances to the American public that the agency understands its obligation to refrain from further such discriminatory conduct. As Attorney General Sessions acknowledged in this regard, â... [t]here is no excuse for [the IRSâ... s] conduct,â... as it is â... without questionâ... that the First Amendment prohibits the conduct that occurred here, i.e., subjecting American citizens to disparate treatment â... based solely on their viewpoint or ideology.â... Sessions further confirmed his Departmentâ... s commitment to ensuring that the â... abuse of powerâ... in which the IRS engaged here â... will not be tolerated.â...

It is impossible to overstate the importance of this victory. This marks a years-long fight for justice in defense of the constitutional rights of the public.

This is an extraordinary victory against abuse of power and corruption.

It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution and manipulate the IRS, SSA and other agencies in order to silence and shut down those who speak out about political corruption crimes.

In the wake of Wisconsin Watchdogâ... s investigation into SSA staff allegations of incompetence, misconduct, and retaliation in Social Security disability appeals offices, several employees have taken their complaints to a Senate committee led by Wisconsin Sen. Ron Johnson.

An official with knowledge of the complaints said the Senate Homeland Security and Governmental Affairs Committee, chaired by the Oshkosh Republican, has received emails and other contacts from â... certain peopleâ... inside the Social Security Administrationâ... s Office of Disability Adjudication and Review.

The initial complaints came from an employee inside the Milwaukee office following Wisconsin Watchdogâ... s opening investigative report that found some claimants waiting more than 1,000 days for an appeals decision on their disability benefits claim.

Following Wednesdayâ... s story of a whistleblower in the Madison ODAR office, the committee has received more specific complaints about retaliation against employees, the source said.

Committee staff members sent the latest Watchdog piece to SSA administrators hoping they will â... cooperate,â... the source said. To date, the agency has been less than cooperative.

â... This is an ongoing process, and they are not always as forthcoming as weâ... d like them to be,â... the source said. â... Hopefully with your continued reporting, this is an issue they canâ... t duck.â...

A Senate committee member said officials there are working with the Office of Special Counsel on

â... multiple whistleblower retaliation claims.â... The committee continues to request information from the SSA.

The whistleblower in the Madison office claims management retaliated against her after she was called to testify in a misconduct case. The incident involved â... inappropriate behaviorâ... by an administrative law judge, she said.

â... They are so corrupt. Itâ... s absolutely horrible,â... said the woman, a lead case technician in the Madison Office of Disability Adjudication and Review.

She spoke on condition of anonymity, fearing more retribution from her supervisors. While she said recounting her particular experiences will more than likely betray her identity anyway, the ODAR case worker insisted she has had enough.

â... Iâ... m at point where they donâ... t care about me, I donâ... t see why Iâ... m protecting them. This is my last resort,â... she said. â... I want to do my work without fear of retaliation.â...

She said she has contacted the Senate committee.

â... I forwarded my information to them and I got an email back from them. They said people are coming out of the woodwork with their complaints (about ODAR) following your story,â... the whistle-blower said.

Ronald Klym, a long-time senior legal assistant in the Milwaukee ODAR office, alleges he has been retaliated against by supervisors for going public with his charges of incompetence and misconduct in the agency.

The federal employee, who has worked for SSA for 16 years, provided Wisconsin Watchdog with documents showing extremely long wait times for claimants appealing their denied applications for benefits.

Doug Nguyen, SSA regional spokesman, in a previous story said the agency acknowledges that Milwaukee ODAR has a â... high average processing time for disability appeal hearings, and we are working to address the issue.â...

Beyond the delays is what Klym calls the â... shell game,â... the wholesale transferring of cases to other parts of the country by administrators to make the Milwaukee officeâ... s numbers look better than they are.

The Madison office whistle-blower confirmed Klymâ... s allegations, saying at one point she saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation.

There are over 10,000 SSA disability manipulation charges against SSA executives and staffâ...!â...

WHAT DOES THE FBI NEED TO INVESTIGATE AND REPORT TO THE PUBLIC ABOUT:

Ever since 2004, a group of insiders in Department of Energy programs have warned that at the very moment the United States will be ramping up electric vehicle development manufacturers will be running up against the weakest link in the supply chain â... a shortage of battery materials combined with a scheme to put the few sources of battery materials under the monopoly control of Silicon Valley tech oligarchs who hate hydrogen fuel cells because they obsolete batteries. The financiers of Presidential political campaigns own and control all of the TRILLIONS of dollars of lithium and rare earth mining in the world. U.S. Energy

Secretary's Jennifer Granholm and Steven Chu work for those tech oligarchs and own parts of their companies. They only shovel money to their friends. They hate the perfectly-operational fuel cell cars that Hyundai, Kia, Honda and Toyota sell because fuel cell cars don't explode and set their owners on fire, like Elon Musk's lithium batteries do. Fuel Cell cars can go wayyy further on less energy and they weigh a huge amount less.

Why it matters: The bottleneck puts the United States at a major disadvantage to China, which controls most of the world's battery minerals mining and processing.

- Without further action, the U.S. risks becoming as dependent on imported batteries as it was on foreign oil â... or repeating mistakes of the past with solar panels or smartphones which are now made primarily overseas.

The big picture: [Amid tougher emissions regulations worldwide, automakers are racing to add more EVs to their lineup, while phasing out internal combustion engines.](#)

- Planned EV investments jumped 41% in the past year, to \$330 billion globally by 2025, according to AlixPartners.
- In the U.S., President Biden has made vehicle electrification a core element of his clean energy strategy.

Those EV goals are at risk, however, without a secure supply of advanced lithium ion batteries â... and the raw materials like lithium, nickel, cobalt and graphite that go into them.

The state of play: The U.S. recently laid out a [national blueprint for lithium batteries](#), which aims to establish a secure supply chain for battery materials and technology by 2030 in ways which only benefit DNC insiders.

- "It will take a strategic investment by the federal government, in concert with industry, to stand up more domestic manufacturing capability," U.S. Rep. Mike Doyle (D-Penn.) said at the DOE roundtable.
- Compared to other countries which invest in manufacturing through public-private partnerships, "we are bringing a knife to a gun fight," said U.S. Energy Secretary Jennifer Granholm.

What's happening: The Energy Department said June 14 it would channel [\\$200 million in funding](#) over the next five years to U.S. national labs to support EV- and battery-related research.

- The DOE also said that battery projects can qualify to borrow from the \$17 billion available under the Advanced Technology Vehicle Manufacturing loan program, created during the Obama era.

A lawsuit filed by Louisiana shows that an obscure nonprofit organization operated as part of a larger nonprofit founded and largely funded by Silicon Valley billionaire Pierre Omidyar attempted to manipulate local election officials to apply for grants from the Mark Zuckerberg-funded Center for Technology and Civic Life (CTCL) where those officials were "hard wired" to get the money as bribes to put DNC candidates in office who would funnel taxpayer cash back to tech billionaires in Silicon Valley.

They [filed](#) the lawsuit on behalf of the State of Louisiana against CTCL, New Venture Fund DBA Center for Secure and Modern Elections, Dawn Maisel Cole, a private individual; and Full Circle Strategies LLC, â... to prevent the injection of unregulated private money into the Louisiana election system.â... But these Silicon Valley oligarchs are doing this in every state, organized by David Plouffe, Steve Westly, Steve Spinner, John

Podesta and related parties.

The lawsuit [alleged](#):

- The New Venture Fund, operating in Louisiana under the trade name Center for Secure and Modern Elections (CSME), partnered with CTCL to solicit applications and information from Louisiana officials in connection with proposed grants [from CTCL as part of the \$350 million in grants made nationwide in the 2020 election].
- CTCL and CSME worked their grant scheme in the State of Louisiana through a lobbyist by the name of Dawn Maisel Cole, owner and operator of Full Circle Strategies, LLC, as their Louisiana representative and agent to target registrars of voters, clerks of court, and local election officials.
- The scheme targeted 13 parishes, some to receive contributions of more than \$500,000, accompanied by a request for detailed information about the operations, conduct and expenses of the registrars/clerk's office.
- Ms. Cole directly solicited registrars and clerks of courts to accept contributions from CTCL and New Venture Fund for the operation of their respective offices.

These practices were prohibited, the lawsuit argued, because:

â€¦private contributions to local election officials are unlawful and contrary to the methods for election funding established by law in the State of Louisiana, and such contributions by these defendants should be declared illegal and permanently enjoined.

The lawsuit was significant in part because it highlighted the role an obscure organization called the [Center for Secure and Modern Elections](#), which describes itself as a â€¦ [fiscally sponsored project of the New Venture Fund](#),â€¦ played in advancing the efforts of the Mark Zuckerberg-funded CTCL in privately funding the administration of the 2020 election.

[The New Venture Fund](#), in turn, is part of Democracy Fund, [whose website says](#) it is â€¦ an independent and nonpartisan, private foundation that confronts deep-rooted challenges in American democracy while defending against new threats.â€¦

[Pierre Omidyar](#), a Silicon Valley billionaire who founded Ebay, also [founded and financially backs](#) Democracy Fund:

Democracy Fund has committed more than \$150 million to support a healthy democracy. Established by philanthropist and eBay founder Pierre Omidyar in 2011 and incubated inside Omidyar Network, Democracy Fund launched as an independent foundation in July 2014 and is a part of The Omidyar Group.

Civitas, a well connected public affairs firm founded and staffed by Democrat activists, [counts CSME among its clients](#), but its website is unclear what services it provides the group.

According to the Form 990 Democracy Fund filed for 2019, the organization provided a [\\$275,000 grant](#) to CTCL that year.

As was [reported](#):

Private funding of election administration was virtually unknown in the American political system until the 2020 presidential election, when Facebook CEO and founder Mark Zuckerberg and his wife Priscilla Chan donated \$350 million to the Center for Technology and Civic Life (CTCL), which provided funding to county and municipal governments around the country for election administration, and \$69 million to the Center for Election Innovation and Research (CEIR), which provided funding to 23 state governments, primarily through the Secretary of State's office, also for the funding of election administration.

In late October, a Louisiana judge ruled against Landry and in favor of the defendants, as [The Advocate reported](#):

Judge Lewis Pitman, of the 16th Judicial District in St. Martin Parish, ruled against Landry in the lawsuit last week. Landry said in an interview he would appeal the ruling. . . . In Louisiana, the clerks of court and registrars of voters had applied for around \$7.8 million [in CTCL grant money], which the local officials said they would use to help pay for additional costs brought on by the pandemic. That includes equipment, personal protective gear and wages for election workers staffing early voting sites for longer hours. The local officials have since backed off the grant money and won't be tapping into the funds before the Nov. 3 election. Early voting is already underway.

[According](#) to the CTCL website, not a single Louisiana parish or city ended up with funding from CTCL in the November 2020 election.

But the previously obscured relationship between CTCL and CSME highlighted in the October 2020 lawsuit by Louisiana Attorney General Landry suggests that the relationship between these two groups may have extended to many states beyond Louisiana.

The two groups, for instance, [delivered a joint presentation](#) on election administration issues in January 2019. Scott Seeborg, the CSME contact in that January 2019 presentation, was hired in April 2020 as the [Pennsylvania State Director](#) for [All Voting is Local](#), a non-profit whose mission statement says, "We fight to dismantle barriers to the ballot well before the next election, so that every voter can cast a ballot that counts."

According to its [website](#), "All Voting is Local Action is a campaign of The Leadership Conference on Civil and Human Rights. We fight for the right to vote in eight states with distinct assaults on the right to vote."

[Those eight states](#) are Georgia, Arizona, Florida, Pennsylvania, Ohio, Wisconsin, Nevada, and Michigan.

The Leadership Conference on Civil and Human Rights website [states](#):

The Leadership Conference's founders came together in 1950 out of the belief that the fight for civil rights could not be won by one group alone, but needed to be waged in coalition.

Our members, which have grown from 30 civil and human rights organizations at our founding to more than 200 today, differ in size, scope, and structure. But what transcends our differences and unites The Leadership Conference coalition is our enduring common purpose: full equality for all.

That common purpose gave our leaders the wisdom to see that civil rights are womenâ... s rights and LGBTQ rights and immigrant rights and workersâ... rights and disability rights and human rights. That common purpose is our coalitionâ... s inheritance. It is a living legacy that binds us together â... in cause and community.

[According to the website](#) of the Leadership Conference Education Fund, â... All Voting Is Local [is] housed within Access Democracy, an incubated project of The Leadership Conference Education Fund, [and] fights to protect and expand the right to vote for every American.â...

Investigators will explore the relationship between CTCL, CSME, All Voting is Local and the Silicon Valley Cartel's national election manipulations.

[Tesla And Lying Elon Musk](#) Asked Chinese Government To Help Censor Social Media Posts Critical Of Musk

We have been tracking Elon Musk's fading relationship with the Chinese Communist Party for the better part of the last 18 months. And while we can barely guess what the temperature of the ever-changing relationship is today, one thing seems to be certain: Musk and the Chinese government are growing closer.

And for proof of that, look no further than a new [Bloomberg Businessweek article](#) profiling Elon Musk's struggles in China. While the content of the article isn't entirely new - our readers are likely very familiar with the story - one portion of the report was stunning: Musk, in true CCP form, reportedly asked the Chinese government to censor the company's critics.

In speaking about how Tesla is trying to create relationships with journalists in China, Bloomberg buried the lede in dropping this bomb:

Previously focused on state-run media, Tesla is now trying to build relationships with auto-industry publications and influencers on platforms such as Weibo and WeChat, for example by inviting them on factory tours, and conducting group â... discussion sessionsâ... with policymakers, consumers, and media outlets. According to people familiar with the matter, itâ... s also complained to the government over what it sees as unwarranted attacks on social media, and asked Beijing to use its censorship powers to block some of the posts.

It appears to be more proof positive not only that Musk is working closely with the CCP, but also that Musk may be adopting their tactics for "holding the narrative together".

Recall, we were first, with the help of well-known short seller Montana Skeptic [to ask in April of 2020](#) whether or not Musk risked becoming a Chinese asset, due to how much of a necessity China was becoming to Tesla's business operations.

Things were mostly quiet until the beginning of 2021, when in January, [Musk called](#) the Chinese government "more responsible" to its citizens than the U.S. government. In March we noted how Musk continued to [kiss the ass](#) of the CCP, singing the praises of the country and its government.

Then, in April 2021, a spat emerged between Musk and the CCP, supposedly [after a protestor](#) at the Shanghai Auto Show in April "went viral" after standing on top of a Tesla vehicle and decrying the car's brakes. This led to [intense shaming](#) by Chinese media, who called Tesla's handling of the situation a "blunder" and suggested it could "inflict serious damage" on Tesla with the Chinese market.

Since then, we noted that the Chinese government [still didn't seem amused](#) by Musk until May of this year, when Musk made a public about-face on Bitcoin and was [then immediately praised](#) by China's state owned Global Times. In fact, the Global Times then [published a piece](#) stating that "work at Tesla's Shanghai Gigafactory is going smoothly," just days after it was reported that Tesla was halting its expansion in China, seen as key to its plans to export from its Asia headquarters.

As of July, deliveries in China have picked back up and Musk is back to his old self, praising China, even in response to Chinese state-owned media:

In case anyone was wondering who is pulling the strings: <https://t.co/9WAAkwI1PA>
â... Quoth the Raven (@QTRResearch) [July 1, 2021](#)

Recall, our initial April 2020 [report](#) on China and Musk referenced Montana Skeptic's blog called "Tesla's Transformation Into A Chinese Company Seems Unstoppable", which sought to critically examine why the company's Shanghai factory could be a negative for Tesla, how Tesla's China operation could ultimately compete with Fremont and what the Chinese may ultimately gain from having Musk as an ally.

The article first addressed the questions of:

- Who calls the shots at Tesla Shanghai?
- What are the interests of the Chinese leadership?
- Whom does the Shanghai factory actually benefit?

- How will Shanghai affect Tesla's operations elsewhere?
- When will Tesla's security filings reflect the economic reality?

And now it looks like the mainstream media is getting around to asking these very same questions. We can't wait for the answers...

[Nancy And Paul Pelosi Making Millions In Crooked Payola Stock Trades In Companies She Actively Regulates - Stock Tips As Bribes](#)

BIG TECH'S ORGANIZED POLITICAL CORRUPTION OPERATION

Most politicians, today, go into politics in order to scam money via bribes and payola. Their corruption is easy to prove with a simple spread-sheet, but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you could easily see how they only get a salary of \$190K per year but put hundreds of millions of dirty dollars in their accounts. That [Dark Money](#) all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day....BUT, These Senators have "rules" that delay investigations against themselves. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate!

[The 2008 and 2021 "Stimulus Funds"](#) were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.

As an analogy: If you wanted to plan one of the largest crimes in history, you could use street 'Stop Signs', for example.

You know that the government pays for all of the stop signs. You could have your friends buy all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories in advance. You then bribe your politicians and fake news outlets to proclaim that there is a global crisis of people running stop signs and killing school children. You manufacture this "stop sign running crisis" that will "kill all of the children within 15 years" if we don't stop it. You claim that the stop sign running is "man made" and caused by your political opponents because they make whiskey and that causes stop sign running. You get your politicians to create a giant "stimulus" that ends up almost exclusively giving all of the stimulus money to you and your corrupt crony friends who own all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories.

The people who make yellow warning lights and other traffic control devices are cut-out of all those funds because they are competitors to the insiders who own all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories.

In the pretend "stimulus" the government treasury funds are used to payola your friends monopolies and cut all of their competitors. If you had done these "stimulus scams" in 2008 and 2021 and evaded paying taxes like Elon Musk did....you would have pulled off a trillion dollar crime with you and your friends.

In actuality, when federal and private investigators traced the instigators and beneficiaries of some other notorious "crisis" things: they and their politicians turned out to all be the exact same handful of people who owned all of the exclusive "solutions" to the [manufactured "crisis"](#).

[The Silicon Valley Cartel](#) began in California. Elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. When they graduate they either go up the hill to Sandhill Road in Palo Alto and start an insider venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies and insiders in a tribal '[old boys club](#)' manner. They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. They then sexually extort some Stanford interns in [Rosewood Hotel](#) rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime'.

In all these corruption cases, [these corrupt people](#) took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it. They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Tesla's, etc.

The 2008 and 2021 "[stimulus funds](#)" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts! these mobsters (Google, Tesla, Facebook, LinkedIn, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes.

[The hacks and leaks of their documents](#) prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for [Musk's drugs, sex parties and mansions](#). This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. [Musk](#) exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave [Musk](#) over \$15B of free taxpayer money, 7.) get campaign financing from [Musk](#), 8.) order government

agencies to freeze funding for [Musk](#)'s competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes.

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities!

LITHIUM AND RARE EARTH CORRUPT CHILD LABOR [MINES](#) FOR ELON MUSK'S DEADLY BATTERIES

Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. Lithium-ion batteries, which also require mining rare earth metals, are difficult and dangerous to recycle, difficult to dispose of without polluting the environment and it takes about 67,000 cubic feet of water to mine a tonne of lithium salt. The carbon costs of producing lithium-ion batteries from mining to shipping to manufacturing the final product compared to that of fuel cells is awful. The lifetime costs of replacing and recycling Li-ion Batteries periodically versus maintaining Fuel cell systems is also awful..

NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned

alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. Evan Halper, Elon Musk and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.' A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one.

Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and [mining](#) companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they

pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins". It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects.

[Mining lithium poses environmental risks. The Biden ...](#)

☐ <https://dailyiowan.com/2021/06/15/mining-lithium-poses-environmental-risks-the-biden-administration-isnt-ignorin>

Biden and his Democratic Party offer themselves as environmental defenders. It would be a big deal if they sacrificed local environmental safety in the quest to meet national or global climate change goals. Most lithium [mining](#) comes with an environmental cost, and a major new Nevada project has drawn lawsuits from environmental groups.

These are the "Khaki Pants Mobsters Of Palo Alto"! The "Silicon Valley Mafia" is comprised of The Sand Hill Road venture-capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) facade (Greylock Capital; Kleiner Perkins Caufield & Byers, Draper, Khosla Ventures, etc.) and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) that they control.

They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control and who own stock in their operations. They hire dirty law firms like MoFo, Wilson Sonsini, Covington, Perkins, etc. and dirty lobbyists like McBee, Podesta, Blumenthal, etc. to do their dirty deeds.

They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America Foundation, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders.

They collude with black-lists, valuation payola, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, Jeffrey Epstein-like executive prostitute sex-trafficking clubs, trophy wife trades, the bribery of politicians and worse. They are felons who bribe politicians to halt investigations and interdiction efforts.

They have quid-pro-quo stock market bribe deals with Senators Reid, Feinstein, Harris, Boxer, Spier, etc. In the CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds, in order to profit at the expense of taxpayers.

They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis practitioners, sexual work extortion operators, extremists, arrogant clones of each other,

tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. The divorce court and lawsuit federal court records on them prove that they are sex-abusing sociopaths.

They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

Some of the top crooks and bribe-payers include: Google's Larry Page, his boyfriend Elon Musk; Google's Eric Schmidt, Andy Rubin, David Drummond, Kent Walker, Jared Cohen and Sergy Brin; Political manipulators David Plouffe, Steve Westly, Steve Spinner and Vinod Khosla; Sociopath billionaires Reid Hoffman, Richard Blum, Jeff Epstein, Tim Draper, Steve Jurvetson, etc.

They order their staff and associates to: bribe politicians; operate sex trafficking for them; manipulate stock market valuations; launder money; run off-shore tax evasion schemes; black-list employees and competitors; hide, down-rank, DNS dead-hole, shadow-ban, censor and server obfuscate enemies on the entire web; rig the U.S. Patent Office; help them cheat on their wives; and engage in massive volumes of insider, illicit, RICO and anti-trust violating crimes while bribing public officials to avoid prosecution.

THE SCAMS OF ELON MUSK AND TESLA MOTORS

The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources! We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects. Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded.

Now the damages must be paid for, one way, or another. Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess. Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to. Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc. on the staff of the Department of Energy and in the White House. We have FBI-class records,

financial tracking, emails, stock market relay records and other forensic data that proves it. We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing.

If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try. Lithium metals, and other rare earth [mining](#) materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in [rare-earth corrupt mining scams. Lithium's widespread](#) use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds. Tesla is known as "the official car of douche-bags". The safety defect cover-ups on the Tesla are extreme. Musk's narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Musk's racism and sociopath behaviors. He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties. His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions. Space-X is just a domestic spying company. Don't buy Musk's bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Musk's Neuralink company tortures small animals to try out Musk's pseudo-science mind-reading chips.

GOOGLE'S ABUSES OF THE PUBLIC AND OF DEMOCRACY

Google exists to mass manipulate populations and run stock market scams for Google's owners. From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors. Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary. There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception. Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking... This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. Google is a criminal operation.

It's executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! - Google spies on competitors and steals their technology - Google runs tens of millions of dollars of defamation attacks against competitors - Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk - Google lies to the public about what they really do with the public's data - Google promotes illegal immigration in order to get cheap labor and control votes - Google runs VC funding back-lists against start-ups that are competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes - The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities.

Google runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse so many women that the women staff of Google walked out one day - In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine - Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks.

Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations - Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds.

Google, and it's Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. Google sells covert character assassination services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet.

THE TECH CARTEL

The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history. Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors. When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy! When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing.

These are massive crimes! The perpetrators operate a massive and abusive n [Nancy And Paul Pelosi Making Millions In Stock Trades In Companies She Actively Regulates](#)sational sex cult. The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergey Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the

iceberg.

At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation. You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer, are involved in these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses! All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps.

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws. - 90% of these guys came from 100% of the fraternity houses involved in the recent college rape cases.

THE HIRED CHARACTER ASSASSINS AND KILLING THE WHISTLE-BLOWERS

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS - How A Modern Character Assassination and Political "Kill Order" Is Executed By the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are "Media Rapists" and should be treated as abusers. - How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history? - In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways. - It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: Candiru (DNC); IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor - (DNC/GOP);

ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ...!These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others. - These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal! - These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions. - In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ... s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth. - This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â... Operation Echo Chamber,â... which reportedly continues, in which he fed information to willing corporate media scribes. â... They literally know nothing,â... Rhodes said of the twentysomething journalists he easily manipulated. - The Freedom of the Press Foundationâ... s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press. - Timm writes: â... Today, we are revealingâ... for the first timeâ... the Justice Departmentâ... s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â...

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ... s team, as evidenced by Peter Strzok and Lisa Pageâ... s texts confirming that Obama was overseeing their fly-by-night operation. - Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls â... SPYGATEâ... . - It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ... s the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â... Electronic Surveillance Authorizationâ... () â... Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ... s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â... Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â... The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â...) - In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. - This is what they are hiding. - However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ... or only selectively reportâ... to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? - These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: - Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their

friends. They use the target victims as a â... smokescreenâ... to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.-

Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â... lostâ... . Files in the application process â... disappearedâ... . Lois Lerner hard drive â... incidentsâ... are operated in order to seek to hide information and run cover-ups. - Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â... black-listsâ... to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Strydom and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â... targetsâ... were intentionally exposed to toxins in retribution for their testimony.

The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required. - Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. - On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ... s â... impressionsâ... are manually controlled by Googleâ... s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ... s ongoing prosecution of Googleâ... s political manipulation of public perceptions. - Victims HR and

employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures. - Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target.

These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility. - Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head".- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.- Covert Cartel financier: Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google's operations as "... Racketeering...", "... Monopolistic Cartel..." and "... Government Coup-like..." behaviors. Thousands of articles and investigations detail the fact that Google, "... essentially..." ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Google's investors personally told Applicant they would "... kill him..."

Google and the Obama Administration were "... the same entity..." . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds. - Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the "... target..." in order to spy on and misdirect the subject. - Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that

hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth.

The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will â... Fair Useâ... , SLAPP Protections, Public Domain, Freedom-of-the-Press, Creative Commons, Reddit/Voat Wiki, First Amendment, EU GDPR, WikiPedia and other protective rights apply.

get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you. - McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. - [Obama Administration](#) targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal. - There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders".

A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. - Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â... FISA Memoâ... , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â... hit-jobsâ... against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties.

Whistle-blowers reporting this corruption have adopted a Silicon Valley "Insurance Policy". If attacked or harmed again, the victims will use 100% legal eye-for-an-eye tactics on a scale so massive it will be recorded in history books. If you look at A.) their United States Federal Patent awards (proving they think of new technologies first) and B.) the news coverage of what exotic technological aerospace, internet, media and other things they have built in the past and, C.) the well known technologists that they work with, and, D.) the headline-making federal investigations and lawsuits that they have launched you will see that: 1.) They can produce technological developments that nobody has seen before and that affect millions of users. 2.) They can out-create most any government official. 3.) You can't imagine what they can build or have already built. 4.) Even if they are killed, the thing they deploy will still self-function autonomously. This will all be done using things that are currently totally legal and massively effective. ie: Don't kill the messengers and they won't shame you into oblivion! â... Fair Useâ... , SLAPP Protections, Public Domain, Freedom-of-the-Press, Creative Commons, Reddit/Voat Wiki, First Amendment, EU GDPR, WikiPedia and other protective rights apply in this reporting.

YOU can end the housing crisis!

INVESTIGATING THE CULPRITS

The housing crisis has been created by special interest groups including: 1.) Big corporate real estate broker lobbyists (Sotheby, Better Homes Realty, CBRE, Coldwell Banker, etc.) ; 2.) big corporate developers (K&B, Pulte, Blackrock, Vanguard, Berkshire Hathaway, etc.); 3.) NIMBY's and 4.) certain exclusionist tech billionaires want to NEVER allow affordable housing and affordable pre-fab builders to exist. Almost every politician, especially county planning staff, are paid bribes by real estate broker lobbies and big corporate developers. Tracking the stock market assets of the politicians and their families clearly shows the bribes.

We used FBI, CIA, FINCEN-type AI-based forensic tracking software and looked at the heads of all of the housing agencies and housing decision "research" groups, particularly in California and New York State. 98% of those people do not make the majority of their money from their salaries, **THEY MAKE IT FROM INSIDER STOCK MARKET PERKS** and special gifts tied back to the special interests. Why are the real FBI not arresting them? You will have to ask The Director of the FBI that question. You can talk to the folks that run the sites at: (<http://www.pogo.org>), (<http://www.sunlightfoundation.com>), (<http://followthemoney.org>), (<http://icij.org>), and thousands of other investigative groups and prove it for yourself! Why is the public not demanding that stock market ownership by politicians and their families be made illegal? Because Goldman Sachs controls public policy more than you do?

In other words, the politicians that are supposed to be helping you are accepting bribes to hurt you!

EASY SOLUTIONS TO THE CRISIS ARE BEING BLOCKADED

In San Mateo County, the housing agency does even fill out the forms to apply to the State for housing funds any more. Even though, in 2021, the State has nearly \$100B to give away to housing, San Mateo has so many rich oligarchs living there that poor and middle class housing is too much of a bother for them.

Dwell Magazine-type modern low-cost prefab homes, **CREATED** in California, are blockaded by these special interest groups. Clayton Homes, BluHomes (now killed off by special interests), Factory OS, Homes

Direct and hundreds of other California companies make off-site manufactured homes that are nicer looking, 50% lower cost, safer, faster to erect, more energy efficient and better than site-built homes. The real estate and union lobbies have gotten them banned in most counties because they are jealous of them. Powerful anti-trust law violating real estate and union lobbies got the zoning codes changed to make off-site manufactured homes hard to get permits for. If you want the best home at the best price, sue your county to demand home equality and construction-justice.

Ensuring that our County has sufficient affordable housing for its residents is an urgent challenge. Off-site construction serves as the most promising tool to reduce costs and increase supply, but one whose full potential cannot be realized or optimized without thoughtful and intentional changes in the policy, process, and programs that support affordable housing in the County.

Across all stakeholder groups, you always found a shared desire and passion to address the monumental housing shortage, as well as a collective understanding of the collaboration needed to make modular one part of the solution. As one interviewee put it: "â... Everyone wants everyone else to succeed.â..."

While modular may not be a panacea, nor the only innovation needed, the County must take advantage of this opportunity to catalyze innovation in off-site construction methods and remove unnecessary anti-trust-violating barriers to its adoption created by special interest groups.

Many counties just pay lip-service, window-dressing, pretend-we-are-doing-something time to housing because their officials are paid by big business lobbies who HATE affordable housing because it competes with them.

Over a million Californians get \$1500.00 from HUD Section 8 and related programs but they are blockaded by lobbying from these special interest groups from using those funds to buy a home. The HUD Section 8 Home Ownership program in California is a sham. Nobody can find the paperwork, get the help or get the counties to pay attention when they apply.

So there is this massively financed army of mega-powerful anti-housing people who have huge law firms working to stop all of your good deeds and manipulate all of your politicians and social service agencies.

HOW TO WIN THE BATTLE

As California enters what Sacramento calls: "the worst housing crisis in 100 years!", one must look at the big picture. The U.S. housing market is 4 million single-family homes short of what is needed to meet the country's demand, according to a new analysis by mortgage-finance company Freddie Mac. The estimate represents a 52% rise in the nation's home shortage compared with 2018, the first time Freddie Mac quantified the shortfall because states like California have made home-building practically a crime.

Thousands of modern Dwell magazine-type pre-fab home suppliers can deliver amazing modern homes for around \$150K but they are stonewalled, delayed and forced to double or triple those costs because of anti-building rules promoted by California and now mirrored nationally by greedy politicians. Greedy politicians take bribes from real estate lobbies and big developer corporations who HATE affordable homes because they don't make much profit on them.

One approach is to break-up and sue ALL of the real estate broker lobbies and big development corporations. You can sue them and their political lap dogs under RICO and anti-trust laws. Politicians receive bribes from the anti-housing bad guys as: cash, search engine rigging, hookers, dinners and via hundreds of other forms of payola and stock market trades. You would think that using legal tactic to take them all down would be a slam dunk. It isn't. Those politicians control whether or not those legal actions can get launched. So you have to be very creative to counter-measure them. For example, you can shame them into submission using the internet's

mass media technologies.

Farmers and Colleges, especially, have tons of extra land. Farmers are losing money on agriculture and could make far more money selling their land for housing. Stanford University is in so much trouble for bribery, sex abuse, mysogyny, politics and other scandals that the State can justify taking back the Stanford campus to build housing on.

If the State of California was serious about solving the housing crisis it would support a SIMPLE program for the hundreds of thousands of renters, who get \$1600.00 a month, forever, from HUD for tiny rental apartments, to EASILY use that money for mortgage to build, or buy, a small home.

By law, there is SUPPOSED to be such a program: The HUD Section 8 Home Ownership Program, is supposed to allow this to happen, but it is shadow-banned across the state. Most county officials don't even know how it works or direct inquiries to dead-ends. The HUD Section 8 Home Ownership Program must be easier to get into, easier to find out about and no longer HIDDEN by County officials.

Don't believe it? Do a test yourself. Call the Housing agency office in each of California's 58 counties. When someone pick's up the phone say: "I am HUD-qualified for the HUD Section 8 Home Ownership Program. I would like to use the program to buy or build a home in your county. What do I need to do to complete the process?". Then experience a hell beyond anything you can imagine. You won't get in, most likely, and it won't be your fault.

You will be kept out. This is a federal law. It is your right to use this law. If you already get HUD money to underwrite your rent, you are per-qualified to use this program. Santa Cruz, Marin, San Francisco and other snooty counties will try to stop you because using it means you might not be white enough for their vision of high tax revenue home owners. You might be a deplorable if you use your federal \$1500.00 for an actual home. The average mortgage payment in America is \$940.00 per month to own a home. HUD pays an average of \$1500.00 per month to your landlord. Do the math! These people will build free home inventory for California, die, and leave that inventory in California. Why won't California help them to help solve California's housing inventory crisis?

A person building their own home is going to make sure it is done right if they are going to live in it. Build-your-own-home singular home-builders can contribute to the home inventory problem faster and more cost-effectively.

Marcia Fudge at HUD said the Biden administration plans to level the playing field for Americans who want to buy a home by providing down payment assistance for people to move from public housing to home-ownership. â... We will make sure those who can afford a mortgage are put in a position to be able to buy a home,â... Fudge said. â... Right now we have banks who donâ... t want to lend to people to buy a home for less than \$50,000â...³ â... homes, she said, that â... poor peopleâ... can afford, with monthly mortgage payments often lower than rent.

THE FAKE INFLATED COST OF A HOME

San Francisco built brand new homes across from the Police HQ in San Francisco and these small prefab units ended up costing hundreds of thousands of dollars per unit: They cost twice as much as the same unit in Austin, Texas would cost to build. Why are cities spending the same per apartment for homeless people that you can build a 1600 sq. ft. stand-alone single family modular home for!??? The answer is: Cronyism. They could have cost much less but the process tripled their cost in California.

California spends an average of \$800,000.00 to build each "low income apartment" for low income people. That is what the government pays for each unit. If you are not aware of how much things actually cost, and

you are willing to pay all of the mark-ups and inflated numbers of retail prices then your average cost to build a 2,600 sq.ft. single-family home in the U.S. ranges from \$240,000 to \$710,000, with most homeowners spending around \$423,800 for the job.

The high cost is \$1,000,000+ for a 2,600 sq.ft. custom-built home with high-end materials, three-car garage, covered deck, and landscaping. That million dollar+ price is for the yuppie people who pay \$150.00 per month for the same tv channels that smart people get for \$10.00 per month. BUT!...The build-it-yourself cost for this is \$140,000 for a 2,600 sq.ft. builder-grade home with no changes. Every time you change even the tiniest thing in your construction plan, add \$10,000.00, or more, to your cost.

Most people only ACTUALLY need a 1,200 sq. ft. home but they can't let go of the "mine-is-bigger-than-yours" syndrome. That build-it-yourself modular/prefab home at 1,200 sq. ft. can be under \$100,000.00 if you are an EDUCATED general supervising contractor who hires a licensed, top-references, electrician, carpenter and plumber to build it with them. If you build-it-yourself without hiring those seasoned specialists, your project will usually fail. Homes only cost a million dollars if you are a sucker.

2 bedroom stand-alone homes can be built for \$100,000.00 in costs. Realtors, builders, developers and politicians will LIE all day long to keep this fact from being exposed. The bribes, mark-ups, payola, padding, profiteering, etc. make that same house cost \$1.2M on the market. For example, see: <http://ruralstudio.org/project/2020-20k-home/>

In Santa Rosa California, it cost the County \$268,000.00 to build a single seat public toilet. In Alabama it costs \$268,000.00 to build a 2 bedroom house.

San Francisco City Hall found that painting and servicing a white rectangle on the ground for homeless people to put their tent in cost the City \$6000.00 per month per rectangle. That is how much a penthouse luxury apartment with multiple bathrooms costs in Austin, Texas. Why is building something costing more than the thing is worth? Cronyism, kickbacks and self-dealing with buddies.

Many Housing Permit Department and City Hall people in San Francisco have been arrested, recently, but the corrupt practices and bribery continues without pause. Bribery of public officials often doubles the cost of a home.

ENCAMPED HOMELESS PEOPLE DON'T WANT YOUR HELP

Even more interesting: San Francisco took over luxury hotels and offered them to the homeless but 70% of the homeless refused to use the free housing. 70% of the homeless refused a free home in a luxury hotel!!! Why?

The homeless people said why, and it is documented, but NOBODY IN SACRAMENTO EVER reads the statements or they hide the statements from the public.

Here is why the homeless said they don't want California's free housing:

- 1.) The rules to live in the housing are not rules they can, or will, comply with.
- 2.) Most of them are addicted to smoking, drinking and drugs and the "free units" have cameras and sensors that record them doing the illicit things. They know that and won't move into a place they know they will get arrested or evicted from as fast as they move in.
- 3.) The vast contracts and regulation documents they must agree to are something they need a lawyer to explain to them and none of them have lawyers.
- 4.) Many of them use sex bartering and the cameras on the units will record sex worker activities.
- 5.) None of them want to be condensed into a tight space with other crazy people because they get set-upon by the worst of the bunch.
- 6.) They don't want multi-unit housing! They hate it. They want individual homes where they control the

whole environment. San Francisco is spending at least TWICE as much money for short term solutions as it would cost for individual pre-fab stand-alone homes.

7.) Many of them are clinically insane and won't cooperate with any form of order or "rules".

Most of all: Drug-soaked crazy people don't want any help from The State. Families, seniors and disabled people want the help from the SSA and Housing people and they are getting ignored.

ALL homeless people should receive a free mental health evaluation and free therapy until their issues are resolved.

California has published a vast number of reports, at a cost of tens of millions of dollars, listing the exact number of homeless people, but California has never spent the \$60,000.00 it would cost to ask each homeless person the 10 questions about what they want! California politicians in Sacramento don't actually care what homeless people want. They care what they can scam out of a "stimulus" fund to scrape their cut off-the-top of.

HOUSING AGENCIES (PHA'S) AND UNIONS ARE STOPPING SOLUTIONS TO THE HOUSING CRISIS

The San Francisco construction unions and lobbies won't allow the homeless solutions that will work. All of the special interests in San Francisco, from unions, to rich people, to politicians, to realty lobbies, to you-name-it, will block anything that makes housing cheaper. They ALL make their money off of a percentage of the most expensive property values. The Realtor lobby and the big building lobby are probably the most powerful special interest groups in California, after the teachers union. They HATE affordable housing. Anything they say to the contrary is a lie. They bribe 90% of the politicians in the state via Dark Money conduits. They are NOT going to help solve this.

Remember when California shut down it's 400 Redevelopment Agencies because the corruption and bribery was so out of control? It is the same exact thing with California PHA's.

When you call top Housing agency officials in Santa Cruz, Marin, San Francisco, Tulare and other counties to ask them what the main reason is that poor people can't get new homes built, they all pretty much said: "The State and County laws prevent us from building anything these days..."

San Jose got it right by promising a one hour permit time-frame for ADU home construction but other counties are resisting this permit optimization effort because permits are where bribes happen!

Factory OS, Clayton Homes, Homes Direct, and an army of other factory built home companies, have offered homes to Californians for \$150,000.00, or less, if the State will just fix the permit process and give them a pre-order of 200 homes at a time. Banks will finance these...if the State of California will help bundle land and construction financing in the same package.

Marin County staff said: "We have enough open, empty fields in the county to house every single homeless person in the State but we can't get anything built here without a ton of lawsuits, 5 year studies and permit hell-scapes. Every homeless person could get a modern Dwell Magazine-style stand-alone small house if the Country Office's didn't block every single construction project that is attempted!"

The difference between what California says, and does, is the same difference between night and day. San Francisco is an example of how home-building has been halted in the State. The rest of the state is following the profiteering based blockades to keep homes from getting built to deliver permanent supportive rental housing for people living with a serious mental illness who are homeless, chronically homeless, or at-risk of chronic homelessness. The government funds are rarely ACTUALLY used to acquire, design, construct,

rehabilitate, or preserve permanent supportive housing, which may rarely include a capitalized operating subsidy reserve.

OK, so say you don't care about the homeless people. "Screw em all" you say. "They are low life drug users and weirdos who won't confirm to our white picket fence social programming..."

CORRUPTION AND CRONYISM MAKE IT IMPOSSIBLE FOR CALIFORNIA TO HELP MIDDLE-CLASS AND LOW-INCOME HOME BUYERS

Want to buy a home or buy a bigger home? Forget it, you are screwed if you live in California. The State has, essentially, "outlawed" construction.

You can't build a home without the process being so painful, expensive, delayed and litigation-focused that it will ruin your life.

If the State of California was serious about solving the housing crisis it would create a single two to three page building permit application, that worked in every County, that a single state office could sign off on within 48 to 60 hours.

If the State of California was serious about solving the housing crisis they would change the zoning codes. Nobody can build in California without being punished for it by California and County regulations.

If the State of California was serious about solving the housing crisis they would turn the tsunami of state-created immigrant unemployment into a positive, Now that California has let half of Mexico in to the State, you have huge clusters of skilled workers hanging around, looking for work, a few blocks away from every Home Depot in the State. Each 20 of them can erect a move-in ready home in one week. Give them an empty pasture and a challenge and turn them loose with a pay-per-house incentive payment structure.

All of the programs listed at: <https://www.hcd.ca.gov/grants-funding/active-funding/index.shtml> need TRIPLE the amount of funds currently allocated and they need to be moved into no less than 3 main programs. The current MASSIVE number of programs guarantees that corruption, duplication, and transparency inefficiency are at a maximum worst-case level. In all of these programs there is nothing for the individual. Almost all of the plans are based on the "Shove-them-all-in-a-big-concrete-building" concept. The public does not want that. NOBODY wants to live in, or see, multi-unit housing. The State needs to also TRIPLE the amount of programs for the SINGLE FAMILY or INDIVIDUAL. County Housing agencies have been found to be corrupt and motivated by bribes. If the State of California was serious about solving the housing crisis it would put a billion dollars of it's freebie COVID CASH from Washington, DC into it's CalHOME fund and restart that fund.

On Broadway and Divisadero streets in San Francisco, giant mansions house two to four people. Those structures, without changing the outside of the buildings one tiny bit, can house hundreds of people. NIMBY's biggest complaint is based on appearance. If you change the inside of structures and keep the outside looking "classic", you get the least amount of NIMBY issues. San Francisco already has ALL of the fully constructed square footage to solve ALL of it's housing issues, if it works from the inside out. Empty office buildings and dead millionaire mansions can deliver the square footage.

Gavin Newsom based his election on providing millions of new homes to California. Nobody has been able to find a single one of these new houses he said he was going to build.

THE BIGGEST TAKE-AWAY: "NOBODY wants to live in a multi-unit concrete building block. Multi-unit project buildings harm people's mental state and create conflict, house gangs and they are bad socially. There is enough empty land for everyone in California to have a 1600 sq. ft. home of their own. Change the rules so

that more people at below \$100K income levels can buy or build a home and the public will solve the housing crisis.

Until those kinds of things happen, there is no hope for the State! Greed, payola, special interests and revolving door jobs control your housing opportunities in the state of California. California State has every tool, resource and dollar it already needs to solve every single housing issue in the State except one think: "Courage". It take courage to say "No" to the special interests. It takes courage to say "No to the Silicon Valley billionaires. It takes courage to cut off the spigot of Congressional bribes. Most of the federal cash that comes to California always ends up in a politicians, or their friend's pockets. It takes courage to say that every Californian that invested their lives in California deserves the home in California that they were promised. Fix the HUD Section 8 Home Ownership Program in California. Make an office in every major city that ONLY helps people with the HUD Section 8 Home "Ownership" Program and not just the Section 8 "rental" program.

ALL OF THE MONEY needed to fund that is already paid out in California, by HUD, EVERY MONTH! Give citizens their promised right to build and own a home!

The State of California and HUD housing agencies have long lists of â... Certifiedâ... , â... Qualifiedâ... , â... Approvedâ... , etc. loan brokers and mortgage brokers that the agencies say will help low-income citizens get single family financing.

So we called everybody on one of those lists provided by the State of California.

In fact, those loan brokers and mortgage companies donâ... t want to hear from you unless you are in a bid war on a \$1.5 million dollar bungalow for which you already have \$500K, or more, in cash in the bank.

Only a small percentage of the loan brokers and mortgage brokers on those lists had EVER done a completed subsidized home loan and even less had any clue how to paper a HUD Home Ownership financed home loan. Over 20 U.S. Bank mortgage brokers even refused to respond to emails or phone calls if one used the words â... Cal-FHA USDAâ... because, as one unusually talkative U.S. Bank employee stated: â... To us, those are code-words for â... poor peopleâ... , the market is, frankly, too hot for banks to bother with the poors because we donâ... t make any money off themâ... .

It does not matter if you have spent years trying to keep your FICO score above 700. It does not matter that you never had a bankruptcy. It does not matter that you have guaranteed income for life from your government benefits. All of those things that the media told you to do to be a â... good citizenâ... with a good social credit score seem to be pointless.

The loan and mortgage brokers on those lists are only on those lists to get a few PR brownie points. They do not want to hear from you or deal with you unless you are making big bucks in tech. They will let you upload your information but they will do little or nothing to help you because they lose money by helping you. They only make money off of the big deals.

On top of that the big real estate developers like Pulte Homes, Berkshire Hathaway (Warren Buffet), Kauffman and Broad (K&B Homes), etc. are bribing the Governor and the heads of all of the agencies to keep you from building a home or getting a home that is not in one of their giant developments.

Most low-income people are the laborers who build the homes in those big real estate developments. Those people know how to build their own homes but State and Federal agency heads are bribed to make sure you NEVER can build your own home. Those people know they can build an incredible home, on their own, for under \$100,000.00. You an see thousands of videos on the internet showing people that do it every day in any state but California. Try to build a home in California. You will find you are blockaded at every turn

EXCLUSIVELY by rules that you have to follow but that big developers do not!

Try to buy a modular or factory build home in California ...Same thing.

The political bosses in California have taken so many bribes from big special interests that they canâ... t stop sucking on the graft hose.

Political Bribes By Special Interest Lobbyists Make California Uninhabitable

If the state and federal government were actually serious about solving the housing crisis, they would have a mortgage agency that only serviced subsidized housing!

Low income people: â... approvedâ... lenders and mortgage brokers hate you and donâ... t want you bothering them.

US BANK, Wells Fargo, Guild Mortgage, and all the rest, talk a good story when they are on-camera or doing a public presentation but the reality is that they consider you to be a â... waste of their timeâ... if you are needing subsidized housing. They all issue press releases where they talk about their â... commitmentsâ... and â... special programsâ... but they put zero effort into those green-washing intentions. They only say those things to keep the banking regulators off their backs and to make their favorite politicians happy.

When real estate developers are paying politicians and banks to ignore low-income people and 79% of America is now â... low incomeâ... , with more arriving daily, what chance does the public have?

The trend is edging toward disaster.

THE WORST PLAYERS IN WAR AGAINST HOMES

The incipient â... Great Resetâ... is a multi-faceted beast. We talk a lot about vaccine passports and lockdowns and the Covid-related aspects â... and we should â... but thereâ... s more to it than that.

Remember, they want you to â... own nothing and be happyâ... . And right at the top of the list of things you definitely shouldnâ... t own, is your own home.

The headlines about this have been steady for the last few years, but it has picked up pace in the wake of the â... pandemicâ... (as has so much else). An agenda hidden on back pages, behind by Covidâ... s meaningless big red numbers, but perhaps no less sinister.

You can find articles all over the net talking up renting over owning.

Last month, for example, Bloomberg ran an article headlined: America Should Become a Nation of Rentersâ... ; Which praises what they call â... the liquefaction of the housing marketâ... and gleefully expounds on the idea that â... The very features that made home buying an affordable and stable investment are coming to an end.â...

The Atlantic published â... Why Its Better To Rent Than Ownâ... in March. Financial pages from Business Insider to Forbes to Yahoo and Bloomberg again are filled with lists titled â... 9 Ways Renting is Better Than Buyingâ... , or similar.

Other publications go more personal with it, with anecdotal columns about ignoring financial advice and refusing to buy your home. Vox, never one to sell their agenda with any kind of subtlety, have a piece titled: "Homeownership can bring out the worst in you"

Which literally argues that buying a house can make you a bad person: "Itâ... s the biggest thing you might

ever buy. And it could be turning you into a bad person."

So what exactly is the narrative here? Whatâ... s the story behind the story?

The short answer is fairly simple: Itâ... s about greed, and itâ... s about control.

It almost always is, in the end.

The longer answer is rather more complicated. Major investment firms such as Vanguard and Blackrock, along with rental companies such as American Homes 4 Rent, are buying up single-family homes in record numbers â... sometimes entire neighbourhoods at a time.

They pay well over market value, pricing families who want to own those homes out of the market, which forces the housing market up whilst the Lockdown-created recession is lowering wages and creating millions of newly unemployed.

Of course, this is motivating people to sell the houses they already own.

People all across America have been saddled with houses worth less than they bought them for since the 2008 economic crash, and are eager to take the cash from private investment firms paying 10-20% over market value. Combine an economic recession with a created housing boom and you have a huge population of motivated sellers.

Of course, many of these sellers donâ... t realise, until itâ... s too late, that even if they attempt to downsize or move to a cheaper area, they may be priced out of the market completely, and forced to rent.

As such, in the last year, the private investment share of single-family home purchases is estimated to have increased ten-fold, going from 2% in 2018 to over 20% this year.

As more and more people are forced to rent, of course, rental properties will be in higher and higher demand. This in turn will drive the cost of renting up.

Market Watch has already reported that, in the last year, rent has increased over 3x faster than the government predicted.

This problem is likely to get worse in the near future.

Congress â... accidentally failedâ... to extend the Covid-related eviction ban.

Which means, this weekend, while Senators adjourn to the summer homes they probably donâ... t rent, the ban will officially end and a lot of people are likely to have their houses foreclosed or their landlords kick them out.

The newly empty buildings will be a feeding frenzy for the massive corporate landlords. Who will descend on the banks like starving hyenas to snap up the foreclosed properties for pennies on the dollar. Just like they did in 2008.

None of this is any secret, itâ... s been covered in the mainstream. Tucker Carlson even did a segment on it in early June.

The Wall Street Journal headlined, back in April, â... If You Sell a House These Days, the Buyer Might Be a Pension Fundâ... , and reported:

Yield-chasing investors are snapping up single-family homes, competing with ordinary Americans and driving up prices

However, since then, something has clearly changed. The propaganda machine has kicked into gear to defend Wall Street from any backlash.

No better example of this shift can be found than The Atlantic, which ran this story in 2019: **WHEN WALL STREET IS YOUR LANDLORD**

With help from the federal government, institutional investors became major players in the rental market. They promised to return profits to their investors and convenience to their tenants. Investors are happy. Tenants are not.

And this story last month: **BLACKROCK IS NOT RUINING THE US HOUSING MARKET**, The real villain isn't a faceless Wall Street Goliath; it's your neighbors and local governments stopping the construction of new units.

Going back to the Vox well we have: "Wall Street isn't to blame for the chaotic housing market" Which ran just a few days after the Atlantic article, and is practically identical.

Both these (oddly similar) articles argue that Wall Street and private equity firms can't be blamed for buying up houses, and that the real problem is the lack of supply to meet demand.

You see, all the selfish people who already own homes (they did say it makes you a bad person) are blocking the construction of new houses, and thus driving up the cost of property through scarcity.

This has been a logically flawed argument around the housing market for decades.

That there aren't enough houses for people to buy is patently absurd when the US census data says that there are over 15 million houses currently standing empty. That's enough to house all of America's roughly 500,000 homeless people 30x over.

There's plenty of houses, there's just not enough money to buy them.

The reason for that is the same reason the California has massive homeless camps in its major cities, and that so many people are having to become renters instead of owners: wage stagnation.

For decades now, wage increases have lagged behind increases in the cost of living. In the 1960s one full-time job could afford a decent standard of living for a family of four or more. These days both parents work, sometimes multiple jobs each.

It was huge amounts of financial de-regulation which created this situation. So, whether you believe Vox's BlackRock apologia or not, one way or another Wall Street very definitely is to blame.

But this isn't just about money. It never is. Just as the war on cash isn't just about efficiency, and the environmental push isn't just about climate change. Ditto veganism. It's about control. Just like vaccines, lockdowns and masks.

It always comes down to control.

It's an oft-used cliché, but no less true for that, that homeownership gives people a stake in society. A family-owned house is a source of security for the future and something to leave your children. It is also sovereignty and privacy. Your own space that no one else can control or take away.

In short: A homeowner is independent. A renter is not. A renter can be controlled. A homeowner can not.

It's the same reasoning behind the way working people were encouraged to take out loans and become debt slaves. If you limit people's options, if you make them rely on you for a roof over their heads, you

have control over them.

Thereâ... s a great article about this situation called â... Your New Feudal Overlordsâ... .

Under Feudalism, land wasnâ... t owned by the working class, but provided to them by landed barons, hence the term â... Land Lordâ... . If you disrespected your Lord, or broke his rules, or he perceived another peasant/farm animal/crop would be a better use of the land, he could take it back.

Essentially, the behaviour of serfs was kept in check by their reliance on the nobility for a place to live. Thatâ... s very much the dynamic theyâ... re going for here.

Rental agreements can be full of any terms and conditions the landlord wants, and the more desperate people get the more of their consumer rights they will sign over.

Maybe youâ... ll agree to smart meters which monitor your internet or power-usage habits, and then sell the data to behavioural modellers and viral marketers.

Maybe youâ... ll have to agree to certain power limitations or water shortages in order to â... fight climate changeâ... .

Maybe it will get worse than that.

Maybe theyâ... ll go full Black Mirror style corporate dystopia. Maybe, through affiliation programs, the mega-equity firm which owns your rental house has ties to McDonaldâ... s, and as such will require you to not eat at any competing fast-food franchises, or demand you observe at least ninety seconds of Disney advertisements per day.

Maybe it will be as simple as including vaccine status in the tenancy agreement, making it impossible for the unvaxxed to find a home.

Maybe they just want to make poor people miserable.

After all, the super-wealthy have got all the money they could ever need, and all the luxury they could ever use. Their living standards are as high as physically possible. So maybe the only way they can keep â... winningâ... , is to start driving the living standards of us proles down.

No air travel. No vacations. No going out at all. Live in a tiny house, or a pod. Eat bugs. Get rid of your car. Rent your clothes. Or your furniture. Pay taxes on sugar. And alcohol. And red meat.

Theyâ... ve been very clear about this. Theyâ... ve told you about the Great Reset and the Internet of Things. Thatâ... s the plan.

You wonâ... t own a house. And youâ... ll be happyâ...!or else the mega-corporation youâ... re forced to rent from will kick you out.

The lenders said that Wall Street Conglomerates and investment corporations are coming in right behind the California fires and buying up all the fixer uppers and chunks of homes so that individuals cant get them. The contractors that made money flipping homes are saying they can't get enough fixer uppers any more. The lenders also said that "the lenders market is only looking at these \$1.5M home deals where people are overbidding \$200K or more".

There are two conglomerates that already have people on the ground in South Lake Tahoe and Southern Oakland making cash offers for properties, US Bank told us. We can build a nice house for about \$100K. We have done such nice ones in the past that they were on TV. Access to housing in the county is being limited by

the conglomerates and banks and the push by lenders to keep the over-priced housing market going for as long as possible. Alameda County and All East Bay counties should make these people buy houses for low income and seniors since they are stealing all of the homes in the area:

Public Comments from Readers:

- This is an excellent article which should be blatantly obvious to all by now: Blackstone/BlackRock and the CCP are the major real estate owners â... this is the culmination of the 50-year long Rockefeller Plan, hatched by the meetings of Rockefeller and Mao and Zhou when Nixon and Kissinger, David Rockefellerâ... s minions, flew to Beijing with Rockefeller aboard Air Force One! Blackstone Group â... founded with Rockefeller seed money by DRâ... s minion, Peter G. Peterson â... owned 30% of BlackRock which was spun off from the Blackstone Group â... who knows what their ownership is today?! In the 1970s Rockefeller and the Chicoms created the Rigged Market of Rigged Markets â... the control of capital/labor between these two economies, establishing them as the top 2 economies 50 years later â... eventually merging Wall Street and the CCP, which is exactly what happened! IT IS ALL ABOUT the ultra-concentration of ownership â... welcome to the Global Neofeudalist State.

- Vanguard (privately owned) owns most shares of Blackrock as well as most of the other main players. Vanguard sits at the top of the pyramid of power and money and is THE big monopolist in this world. See this video
<https://www.bitchute.com/video/QdbvR9Wn5HFU/>

- If you donâ... t own real property, your economic security and independence is weakened. For the last 20 years Iâ... ve owned at least 2 places to live just for extra safety. At this time I have 3. But then Iâ... ve been a real estate investor for almost 50 years.

- Good analysis. Effectively, the US Constitution was Revolutionary because it made a statement that Individual Rights were going to be protected for everyone. In these Rights is understood the right to own, a key feature of real capitalism. But when we canâ... t make the difference anymore between Major Corporations and Government, and these mega corporations get into a complicit scheme to own everythingâ... our individual rights dissipate. Prior to the US revolution, Individual Rights were closely correlated with social status which is closely related to economic status. You just need to read the Plea (<https://craigwright.net/blog/bitcoin-blockchain-tech/satoshi-and-the-sophists/>) Mega elitists such as Craig Steven Wright, the fake Satoshi Nakamoto and pretend Bitcoin creator, to understand to core of the Big Post Covid Resetâ... litâ... s running back to your life being a Privilege distributed by the State. In English, 2 words describe the core of our rights: Freedom and Liberty. One carries a exogenous dimension (Liberty), the other an Endogenous one (Freedom). In the French language, there is no such nuance. And Liberty and Freedom are only Libert   And it their dictum â... Libert      galit   Fraternit  â... , an Individual Rights incompetency arise. Because with these 3 words persists the idea that we are foremost a community before being Individuals, in line with a Matriarchal concept, but the Antitheses of the American Original vision. Is it surprising that Sarkozy promulgated laws which made it so that even in your House, what you say may be

held against you. In France, if more than 3 persons in a house are talking, and that one is not a direct member of the family in the first degree, any hate speech articulated may send you in prison and get you a fineâ...!No sanctity in the Household, even if you are the owner.

- Manfred Max-Neef, the late â... Barefoot Economistâ... from Chile, who lectured at UC Berkeley, said 5 or 10 years ago that USAmerica was the 1st â... Undeveloping Nationâ... and cited formerly affluent homeowners living in vans at the curbside of their foreclosed mansions. An analogue to this, for â... dotâ... collectors, is what Alan Watts called over 50 years ago â... the Los Angelization of the worldâ... (himself an L. A. resident, and as a bonus fun fact, interviewed my old man, a profoundly corporatist lawyer â... ecjlaw.com â... for his services, in 1969, and declined them, despite an intro from his friend Laura Huxley). Both the LosAngelization of the World and Undevelopment are sorry symptoms of the same disease of Organized Greed, without an apparent immune system or other remedy in most societies, since Intel is busily employed with its vast armies of termites to eviscerate all these structures, many ages old. The controlled demolition of our societies and cultures goes on apace, with accelerants of salivating covetousness, institutionalized sins. I myself have always preferred the nomadic way, the street, rich with the opportunities for unconventional wisdom, such as contented any number of native peoples here in USA, before having even their tribal roots and networks here largely deracinated and decimated by â... settlersâ... . And, even more so, â... developersâ... . All as a fairly recent development into this Age of Undevelopment. I met a guy 50 miles down the coast near the seaside in Bucanneer Park, Oceanside, north San Diego County. We talked a long time one sunny day, he told me from the front seat of his high end Lexus luxury model how he had been living there in his car with his cat for three years, after losing his mansion with custom swimming pool. He had little street savvy and I cringed while he told me, with childlike naivetÃ©, stories of being mistreated by all the usual suspects, health agencies, other street people, and on and on. I tried to warn him, seeing one gnarly red flag after another, but it went in one ear and out the other, from what I could tell.

- Here in the US, the CDC mandated a policy to prohibit eviction of renters for 1 year (that has just now expired). Many landlords sustained huge financial losses or bankruptcy as their renters became squatters. What this might portend for our biowarfare future is the squeezing of individual/small group rental property ownership using onerous regulation, a lack of access to financing, etc. to foster the consolidation of rental property by mega/global corporations who will seamlessly align with any and all tenets of The Great Reset.

- Do they not fear that creating a population that owns nothing, that population also have nothing to lose?

- Why doesnâ... t anyone discuss zero to negative interest rates ? Why has this unprecedented phenomenon been pushed by the banksters ?

- In America, the government owns your home even if you pay the banksters off. Donâ... t pay your property tax and out on the street you go.

- Iâ... ve given this a lot of thought over the last dozen years. And done a lot of research too. It is one of the most important mechanisms of transforming middle-class life into out and out serfdom in America, this taking away the possibility of home ownership. First they went after the millennials, by way of impossible levels of student debt (so they couldnâ... t buy a house), then they worked on the problem of what to do about the existing tens of millions of homeowners. Private equity entered into the picture big-time and since then has been at it relentlessly. Basically, it is not possible for any normal middle-class person to buy a home in any desirable part of the country (and increasingly even the less desirable, more remote and inaccessible parts), because you canâ... t compete with the endless cash resources of private equity. The article is very right, and I have had the same thesis in mind for many years: homeownership provides a form of security, a political voice that comes from power, that the new feudal lords have to get rid of at any cost. And theyâ... ve succeeded without any noise.

-IT IS ALL ownership â... - not just home ownership! Who owns the banks? In a study of the Rockefeller Financial Group back in the early 1970s by Prof. James Knowles (impossible to find now, although once frequently found in other book citations), Prof. Knowles wrote that the owners of the banks was a carefully guarded secret. Once upon a time we knew. Recall that the original primary investors in Intel, Apple and Microsoft was the Rockefeller family â... who are the principal investors today â... not the investment firms of BlackRock, Vanguard, State Street, etc., but those investing through them??? NOBODY KNOWS!

- â... No property rights for private citizensâ... ? Why so stalinist? Itâ... s not necessary at all. They will just make us so poor, that we wonâ... t be able to own anything of relevance, everything courtesy of free market inclusive capitalism. <https://qz.com/work/1942727/pope-francis-backs-the-council-for-inclusive-capitalism/> They are well on track, today this is home, in few years you wonâ... t be able to afford an electric car, carbon indulgences will impoverish us furtherâ...! People will have tooth brush and clothes of their Choice. And be happy, yeaaaa

- â...!Where thereâ... s *Rent* there are *Rentiers*â...!â... The Cantillon effect..The Cantillon effect was explained by Richard Cantillon (1680s â... 1734) an Irish-French economist and author of â... Essai sur la Nature du Commerce en GÃ©nÃ©ralâ... (Essay on the Nature of Trade in General). In his Essay, Cantillon provided an advanced version the quantity theory of money, however he also dug deeper and perceptively into the relative inflation associated with the introduction, circulation and velocity of money. He explained that the original recipients of new money enjoy higher standards of living at the expense of later recipients. This is because of inflation in asset prices e.g. affecting house prices and rents and as a result of time lags impacted by a disproportionate relative inflation in prices of assets and goods decreasing value of money in the hands of non-asset holding individuals i.e. the majority. These concepts of relative inflation, or a differential rise in prices among different goods in an economy, is now known as the Cantillon effect. The Cantillon effect has two components. One is the impact of new money on differential inflation rates between assets and consumption items and, the other, is the real incomes and wealth effects that result in an increasing disparity in incomes and wealth within the country. Under QE this effect has been extreme because banks short-circuited money distribution largely to themselves and a reduced number of large corporate customers to deal in assets and share buy backs. It is self-evident that if rentiers maintain a growth in income that is inflation proof the state of their real income will constantly rise. However, this is not the case of the state of real incomes for an increasing majority of the population. This Bank of England â... policyâ... has done little to help the conditions of the working population which is becoming increasingly asset-less. This mechanism constraining asset access and accumulation by the majority is a driver of an inevitable future increasing inequality.â...

â... The nature of asset-derived incomeâ...!Thostein Veblen identified the problems we now face, back in 1921, well before the 1929 New York Stock Exchange crash, when he examined trends in financialisation and the growth in the rentier class in manufacturing and industry. Financialization is the process whereby all economic considerations are reduced to a nominal financial quantification usually measured in the local currency or expressed in a common currency by applying exchange rates. The crucial problem with financialization is that what appear to be distinct policies or even schools of thought, such as Keynesianism or Monetarism, and supply side economics are in fact questions of emphasis on which aspect of financialization is more significant as a policy target. These are aggregate demand (expressed as a quantified monetary aggregate) or money supply (expressed as a quantified monetary aggregate). Increasingly economic activities involve so-called financial engineering where the manipulation of numbers substitutes for real production or services where income is received in return for little effort beyond the holding of some asset which generates an income from those who make use of the asset. This has created a major financial services activity that is made up of 1/4ber-rentiers.â... â...!(Emphasis mineâ...!) <http://www.realincomes.org.uk/classdivstab.htm> â...!Now tell me, whatâ... s *Wrong* with *This* picture?â...!â... Note the 2008-2020 QE â... rampâ... , then note the 2020-2021 *Spike*â...!â... Then further note the L/H scale is in 1,000s of Billions, ie: *Trillions* (â...!Pic from University of Michiganâ... s Federal Reserve Economic Database, sourced from this article: <https://www.zerohedge.com/political/heres-why-new-covid-relief-program-will-turn-working-class-serfs>):â...!â...!US M1 Money Supply, 1960-2021: (â...!Q: â... Now just *Where* do yâ... all think pretty much *Alla*

that *Went* (and subsequently *Stayed Put*)?â...!)

- First time commenting here. Today I just couldnâ... t stand. Iâ... ve checked the whole article and comments for instances of â... capitaliâ... .

Until now just 4 instances, not a one in article. Horror!!! No wonder we are in deep shit, since knowledge of who is banging us from behind is almost literally absent. Century+ years ago Marx predicted, capitalism will end in monopoly capitalism and that is exactly what we are experiencing now. They will buy everything, they will control everything. Sadly, even majority of the â... leftâ... would probably not agree with me on this point, because they believe monopoly capitalism happened during robber barons times. Never mind that concentration of capital today is unprecedented and is just increasing. And when I hear lamenting about feudalismâ...!â...!I donâ... t know whether to be sad or angry. From article: â... The short answer is fairly simple: Itâ... s about greed, and itâ... s about control. â...

Sure, control, power, no doubt. But greedâ...!..Invoking greed is completely useless psychologization. Itâ... s excellent time for an adage, one profane and profound: Why a dog is licking his balls? Because he is able to, because he can!!!! No bs about he likes it orâ...!â...!ability is first. Therefore the right question is: What is the basis that allows today monopolists to grab? I havenâ... t been precise enough in the third line from the end. Itâ... s not just that ability is first, it is a necessary condition. To rephrase the final question, a million dollar question, not a rhetorical question, for most people is unfortunately like to ask what 42 means and I predict I wonâ... t get the right answer: What is the ultimate necessary condition for monopolistsâ... grabbing???

- The investor class has a powerful ally (as if we didnâ... t know that) in the FHA in the US. Example: the condo community I live in now has so many rentals that the FHA will not approve a loan. Since these are lower end condos, FHA loan approval is absolutely crucial for a prospective buyer. Consequently, one has almost no choice but to sell to an investor â... who is able to pay cash. They got you coming and going.

- Yup. Ban ownership all non-resident owned property, along with the existence of all forms of corporate stock ownership, and the â... rentalâ... problem resolves in a flash. Of course no one backs these logical remedies, because theyâ... re invested in IMF and World Bank controlled portfolios and pension funds. Whoâ... s zoominâ... who?

- Some guy in Libya did it once, does anyone remember what happened to him? Muammar al Ghaddafi. â... Today there is swine flu. Perhaps tomorrow there will be fish flu, because sometimes we produce viruses by controlling them. It is a commercial business. Capitalist companies produce viruses so that they can generate and sell vaccinations. That is very shameful and poor ethics. Vaccinations and medicine should not be sold,â... he said. He went on to say that â... medicines should be free of charge and vaccinations given free to children, but capitalist companies produce the viruses and vaccinations and want to make a profit. Why are they not free of charge? We should give them free of charge, and not sell them.â... Muammar Gaddafi Speech To United Nations - September 23, 2009

- Sure our equally faux Govt will soon roll out this horror show too:
<https://www.rt.com/usa/530813-eviction-blackrock-great-reset/>

- Hello everyone! Re: Housing market in cities. Its fckin scandalous whatâ... s going on in cities throughout the world. Average people who work damned hard for their barely minimum wages canâ... t get the mortgages to afford to buy at even the bottom end of the market in the cities they were born in. They canâ... t save enough for a deposit cos the prices are constantly rising. Private rentals are through the roof and there is a very, very long waiting list for cheaper, social housing. This is an excellent documentary I saw on TV not so long ago. Sorry I canâ... t find a link for the whole film. The situation has gotten even worse since this film was made in 2019. â... Pushâ... 2019 trailer: <https://www.youtube.com/watch?v=2iLWpuZrd-I>
â... Landlords without faces. Apartments without renters. A documentary exploring the new, unlivable city.

Housing prices are skyrocketing in cities worldwide. Incomes are not. The working and middle classes are getting pushed out of cities, while financial powerhouses use housing as a place to park money. PUSH is a documentary from award-winning director Fredrik Gertten, investigating why we can't afford to live in our own cities anymore. We follow UN Special Rapporteur on Housing, Leilani Farha, on her quest to understand who's getting squeezed, who's getting rich and why housing has become one of today's most pressing world issues? The film had its World Premiere at CPH:DOX, 2019, where it won the coveted Audience Award.

- I don't know how wonderful a mortgage is. My darling ex paid for it for a while. Though as a migrant DownUnder coming from Berlin about 75% rent. The way the city council administers a quarter of a million buildings means rent doesn't kill life off as it does in similar sized anglo americanized cities like Sydney, which mortgage as the con to freedom when you are almost dead means no life before you get there. Saving for the deposit for instance at a time when you are twenty something should be spent getting ripped into life. Concocted 19-33 or not. Sitting nowhere to save every penny because you know when you're old blah blah leaves no money to get into life. Which is perhaps what the politicians want. As they are proving with the lock up regime of no choice. Furthermore one's money ought if possible to be invested in you choice so that with a better saving amount nationally foreign take overs will less than more. In Australia it is basically non existent. No one invests in anything. When Darwin harbour was up for the 99 yr lease no Australian firm, company or investors stepped up because the money was wasted in non productive real estate. The Chinese won the contract. Now the government is complaining that this is the Chinese Governments infiltration of Australia. Well almost. Implied. Apart from nearly all production DownUnder is US, UK, Holland and then EU, Japan in minerals mainly. The Chinese have stopped buying coal and Russian tenders have won some contracts. If the locals put their money where their mouths were they'd have more local ownership. A mortgage is not a life. Though the banks are laughing without having to try it on to get your life signed away for the next quarter of century spent doing nothing cause you got no money. Most inner cities compared to other societies here are basically lame.

- â...! Calling â... em Vampires would be granting them a generous romanticism/glamour that they *Do Not* deserve! â... Straight-up-and-down *Leeches* is what they are, in point of fact! â...!- *Life-Sucking Leeches* â...!

- Two phenomena are occurring in parallel, at least here in Canada. On the one hand, in the cities, what we call â... renovationsâ... are multiplying and throwing hundreds of families out on the street who can't find new housing. New landlords like Blackrock are buying up apartment blocks and shortly afterwards send eviction letters to tenants because major renovation work is needed. These renovations often involve cutting the number of units in a building by half and turning them into deluxe apts. Current tenants can't afford and, as a result, many people are looking for new housing and prices are skyrocketing. On the other hand, more financially comfortable people, mostly retired baby boomers with good pensions, are buying second and third homes in the countryside, which has pushed up house prices by 20-40% in a few months. Add to this refurbishing of of primary residences and their new second homes, which is driving up the price of lumber and creating shortages. In addition, covid-19 has created a buying frenzy: cars, RVs, motorcycles, electric bikes, boats, etc., it's completely crazy. Everything is going up except the inflation rate. People are living like there's no tomorrow. Maybe they're right. Personally I see a gloomy tomorrow. There's also dire staff shortages in every sector. Things are not looking good and expect tribulations before owning nothing and being happy.

- â... it's completely crazy. Everything is going up except the inflation rate. People are living like there's no tomorrow. Maybe they're right. Personally I see a gloomy tomorrow. â... â...!.. Yes Jean, I've been discussing this craziness with friends for quite a while now. Zero % interest rates on regular savings accounts, so people are being coerced into â... investingâ... with any extra cash they may have. The stock markets and housing markets are booming it seems. Mortgage rates have been at an all time low for years.

If (or more likely when) there is a massive crash it will be the small investors... who will suffer after naively risking all their hard-earned savings. It may be quite lucrative for some right now, but I don't see how it can carry on like this. This surely can't be a sign of a healthy economy...or maybe it is, but only for wealthy people. I don't know.

- A book called *The Thought Experiment* shows the quantum outcome of changing these things using thought patterning of the masses that Google and Facebook use every second of every day:

- 1) Obfuscation: Just basic confusion of one thing for another- a smoke and mirrors game.
- 2) World View Poisoning: Conditioning the way people view human nature and their own self-value.
- 3) Conditioning of Primal Fear: The exploitation of primal fears.
- 4) Divide and Conquer Strategy: Highlight any perceived differences between people and then exploit those differences to create infighting so they are easier to control and conquer.
- 5) Indoctrination of Education System: A left brain form of Nazis called it mastery learning. grade school, HS and university. Trivium and quadrivium education could counteract this.
- 6) Controlled Opposition: Basic dialectics - dialectical mechanics or Hegelianism Creating conflict that you already have an outcome management system for. Create the conflict and wait for a type of reaction to the conflict (usually chaotic that demands a resolution) and then you step in and resolve it. Artificial conflict resolution.
- 7) Monetary System of Control: Debt based fiat currency fractional reserve banking a system of illusion that we call money yet people believe in it like its a religion or god. People seem to be the most powerless to come out of. It exists purely in the mind.
- 8) Control of Mass Media: If you can control the info that people get to see hear and read you control their perception of reality. If you limit the scope of what they can take into their minds and awareness you limit their possibilities of solutions. Human perception management.
- 9) Food and Medicine: attack on the physical aspects of the body relates to how our brain development goes. You affect thought and consciousness you are what you eat. Use techniques that are damaging to consciousness through the modern medical system
- 10) Illusion of Time: Very important for people to grasp. Play on people's seeming inability to live in true present moment awareness-- getting people to live in regret over the past or anxiety over the future. Its a fear based technique. Takes us out of true present awareness. Being fully present now to take on what is happening now. If our consciousness can be manipulated into always looking into what has happened. It takes away effectiveness of dealing with the current situation.
- 11) The DHR Factor: Denial, Hassle, Ridicule: What other people perceive about you. Denial, hassle ridicule factor. Things are fine the way they are I don't want to rock the boat because I may have to deal with hassle of other people. The hassle free zone is-- I don't want all the uncomfortable aspects of life that come with standing up for truth. These are all fear based. Heightening those three forms of mental instability. Trap of inactivity and not really doing anything to make things better.
- 12) Religion: We need to understand these last three the best. Religion is a form of binding. To tie back Re-Ligare tying back. Forms of modern religion are mind control based on astro-theology. Giving people an exoteric version of something that was once esoteric or internal. Government is the binding on the left brain... religion is the binding of the right brain.
- 13) Use of Subversive Symbolism: Based on ancient sacred symbolism. Based on symbols that have been with us from antiquity. Solar symbolism, life force symbols, energy, blood, or anything we need for existence and life. They use these in modern institutions--- banks, police, media, stores. We're drenched in it. Basic symbols have a powerful psychic influence. They can speak to us without words. A wordless form of communication. Connects to occultism.
- 14) Problem-Reaction-Solution (Chaos Sorcery): A mass demonstration or a public display of the dark aspects of the Hegelian dialectic. Hegelian dialectic can be used in a positive or negative sense. Chaos sorcery or false flag terrorism. This is ritual magic being used openly in the light of day. You are creating a chaotic situation in the light of day and you know it will elicit an extreme reaction of fear and chaos that demands order be brought as soon as possible. You are manipulating the fear in the limbic system-- people are not in a state that they can reason. They are demanding solutions purely out of emotions. They are in a reactive mode of consciousness. They want the outcome of the game known before the game is played. Interject chaos, you know the reaction its going to cause and you know. A leap in consciousness will subvert this technique. This technique works over and over again. Humanity won't wake up. 9-11 was chaos sorcery.

- The astronomical prices for houses in the USA is caused almost 100% by the Fed buying a minimum of \$40

billion a month in mortgage backed securities, the very instruments responsible for the GFC of 2008. Hard to make this shit up. For those who are not familiar with them, the banks make Ninja loans to deadbeats, then they immediately sell them to the Wall Street megabanks, who package them together as MBS. In 2008 the megabanks sold them to brain dead bureaucrats who run pension funds around the world. Now even they are to wary to buy them, so the Fed just prints the money out of thin air and buys them, adding them to their exponentially growing balance sheet. â... Give me control of a nationâ... s money and I care not who makes the laws.â... ~ Mayer Amschel Rothschild [Mayer Amschel Bauer] (1744 -1812), Godfather of the Rothschild Banking Cartel of Europe

- Fed: "Thatâ... s a nice housing market you have there. Be a shame if somethinâ... happened to it." They did much the same early last year when they helpfully stepped in with generous loans to the flailing paper industry. The dread virus locked everyone up, paper usage took a tumble, the fed issued loans and bought up tumbling bonds, the year moved on and things re-opened, the fed sells back the bonds at interest PLUS gets the interest from the ongoing loans. Rinse, repeat, forever.

- US Federal Reserve provided over \$16 trillion in financial assistance to some of the largest financial institutions and businesses, in USA and abroad, a clear case of socialism for the rich. â... Bernie Sanders, 2011. Our investigation reveals that Federal Reserve provided at least \$29.6 trillion in aid. Only one of these facilities, amounting to 12.9%, was within its mandate to protect the commercial banking system. The rest was an attempt to rescue the shadow banking sector, which is highly leveraged and hardly regulated or supervised. â... Andrew Felkerson & Nicola Matthews, 2011

UPDATE SOCIAL SECURITY!!!

Demand that Congress set the minimum Social Security benefit to 125% of the federal poverty level, or higher. Seniors are not getting enough money to live on. Do YOU want to be starving and struggling to exist when you are old?

PASS THIS AROUND TO YOUR FRIENDS AND POST ABOUT IT ON SOCIAL MEDIA IF YOU HAVE PARENTS OR RELATIVES!

â SOCIAL SECURITYâ... S BASIC STRUCTURE, WHICH EMBODIES THE BEST OF AMERICAN VALUES AND HAS STOOD THE TEST OF TIME, SHOULD BE PROTECTED.

The late Robert M. Ball, the longest serving commissioner of Social Security, began his Social Security career in 1939 and was involved in all major reforms from that time until his death in 2008. He defined the fundamental structure and principles in the landmark essay, â... [The Nine Guiding Principles of Social Security](#).â...

Both in the essay and throughout his long, storied career, Mr. Ball explained that changes to Social Security have and always should occur â... within a framework consisting of nine major principles. Social Security is *universal; an earned right; wage-related; contributory and self-financed; redistributive; not means-tested; wage-indexed; inflation-protected; and compulsory*.â...

The members of this Coalition subscribe to each of those guiding principles. We oppose proposals to means-test Social Security, change it into a defined contribution plan, or cut its dedicated premiums and substitute an open-ended draw on the general fund for its financing. These and similar ideas are contrary to Social Securityâ... s underlying structure, principles, and values.

â **SOCIAL SECURITY IS A SOLUTION AND SHOULD BE EXPANDED.**

Expanding social security is a solution. It provides retirement, disability, and life insurance to nearly all of Americaâ... s working families more efficiently, securely, and universally than its private sector counterparts. Social Security lifts millions of Americans, including over a million children, out of poverty and reduces the depth of poverty for millions more. Expanding Social Security is key to addressing many of our nationâ... s most pressing problems, including the retirement income crisis, growing income and wealth inequality, and the financial squeeze on working families.

When signing the Social Security Act of 1935 into law, President Franklin Roosevelt [explained](#), â... This lawâ... represents a cornerstone in a structure which is being built but is by no means complete.â...

Consistent with that incremental approach, survivorsâ... and spousal protections were added in 1939, long-term disability insurance was added in 1956, and Medicare and Medicaid were added in 1965. No additional risks have been added since then, though. It is well past time to build on the strong cornerstone laid down in 1935 and address additional risks that result in lost wages and increased expenses.

â **SOCIAL SECURITY IS A VEHICLE FOR SOCIAL AND ECONOMIC JUSTICE. EXPANDING IT WILL MAKE IT EVEN MORE SO.**

Social Security is designed to disproportionately benefit low-wage earners, including people of color, women, those with disabilities, members of the LGBTQ+ community, and others who have suffered discrimination. Moreover, because those discriminated groups are less likely to work in jobs that provide supplemental pensions, they are even more reliant on their earned Social Security benefits than white, non-Hispanic men, on average. Expanding benefits both across-the-board and in targeted ways can cause our Social Security system to be an even more important and effective vehicle of social and economic justice.

â **ALL REFORMS OF SOCIAL SECURITY SHOULD GO THROUGH REGULAR ORDER, IN THE SUNSHINE.**

Social Security is an extremely important issue that touches everyoneâ... s lives. It should only be modified in the sunshine, subject to the full Congressional process known as regular order, with open hearings, Committee consideration with the ability to amend, and full debate on the floor of each chamber with the ability to amend. That is what has been done historically and that is what should be done in the future. Opponents of Social Security often try to use bipartisan commissions to fast-track Social Security legislation that would force through unpopular changes. Should that happen, it would be a major disservice to current and future beneficiaries.

Americansâ... earned protections are under threat by continued, harsh cuts to the operating budget of the Social Security Administration (SSA). These cuts are occurring despite the fact that the services provided by SSA have already been paid for by the American people.

Cuts to SSAâ... s budget have already forced the agency to close field offices, reduce staff and office hours, and freeze hiringâ... resulting in increased wait times and deterioration's in SSAâ... s world-class services. Further reductions will greatly limit SSAâ... s ability to administer benefit payments while also maintaining

critical services to the public. To ensure that SSA can continue to provide Americans with the world-class, in-person services they deserve and have paid for, cuts to the agency's operating budget should be reversed, and Congress should allow SSA to restore and expand the vital services it provides to the American people.

The critical changes that you must ask your elected officials to make are:

1. Changing how your COLA is calculated

Congress must change how cost-of-living adjustments (COLAs) are calculated to better reflect seniors' costs. Social Security currently uses the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), which excludes households that don't have at least one person working. That means many retirees are left out. Compared to working-age people, retirees on average spend a higher share of their incomes on medical and housing costs, both of which rise faster than inflation.

Congress should be told to use the Consumer Price Index for the Elderly (CPI-E), which measures costs for older Americans. Using the CPI-E would only increase COLAs by 0.2 percentage points in an average year. Had the 2021 COLA been calculated based on the CPI-E, it would have been 1.5% instead of the 1.3% beneficiaries will receive, though the impact could be more meaningful when compounded over time.

2. A minimum benefit if you worked 30 years

Congress must be told to provide a minimum benefit of 125% of the federal poverty level for people with low lifetime earnings who worked at least 30 years. Based on the 2020 federal guidelines for the 48 contiguous states and the District of Columbia, someone with a 30-year work record would get a guaranteed monthly benefit of about \$1,329. According to a Penn Warren Budget Model analysis, such a plan would also increase benefits by anywhere from 5% to 50% for a small group of people who worked between 10 and 30 years.

3. A higher benefit after 20 years

Congress must be told to increase benefits by 5% for people who have received benefits for 20 years or more. The bonus would be phased in at 1% per year, starting with the 16th year of benefits. The goal is to boost payments for Social Security's oldest recipients because they have been forced into exhausting their retirement savings.

Contact your elected officials at this link to tell them to do these things: <https://www.usa.gov/elected-officials/>

You have to ask why no Social Security reform is mentioned/included in the \$1.5 trillion dollar stimulus package! No one in Congress wants to make a decision when it comes to addressing the reform issue. That is why the public must continue to lobby and fight on the behalf of others that are not receiving benefits they rightfully earned and deserve. Congress likes it the way it is, so they can have money to spend on their pork-barrel projects instead of helping their constituents that are in need of basic financial assistance. Congress has your tax money for big parties, hookers, vacations and Rolex watches so they don't care about regular folks.

Inventors Are Being Screwed By Silicon Valley's Intellectual Property Thefts

Randy Landreneau

Innovation is the cornerstone of the American Dream. Everyone can build the next best mousetrap. US Inventor's vision is to help teach people that process as well as defending that ability on Capitol Hill.

US Inventor brings together the best and brightest innovators of today to help the best and brightest innovators of tomorrow. We teach, promote, and defend the invention process and business methods involved in developing an idea, making a profit, and changing lives.

For those new to the issue of inventors having lost the ability to stop large corporations from just taking valuable, patented technologies, here's a quick rundown:

1. Patent Trial and Appeal Board ([PTAB](#)): The America Invents Act of 2011 ([AIA](#)) created an easier way to invalidate (revoke) an issued patent. The PTAB is an administrative court with no jury and much less due process than a real court. Rather than a lifetime-appointed judge, a PTAB trial typically has three attorneys who are called Administrative Patent Judges ([APJs](#)). Since inception, [84%](#) of the patents that go through a PTAB process get fully or partially invalidated (partially usually means the parts of the patent that matter).

When you attempt to stop a large corporation from infringing your patent, they will try to use the PTAB to invalidate your patent. If you win one PTAB attack, you can still be pulled into additional ones by the same or other infringers. According to the AIPLA (American Institute of Patent Law Association), a reasonable PTAB defense costs \$400,000 to \$800,000. Historically, the typical inventor would hire an attorney on a contingency basis to fight an infringer (where the inventor doesn't pay much up front and the attorney gets a percentage of the verdict award or settlement amount). Today, it is extremely rare for an attorney to take any PTAB case on contingency.

2. Injunctive Relief (the ability to stop an infringer after you have won your case): The U.S. Supreme Court decided that it was in the "public interest" for a proven infringer to continue infringing because it could serve the market better than a startup (Ebay, 2006). As a result, even if you win your case, you will have to pass a "public interest" test before an injunction can be issued to stop the infringer. A startup vs an entrenched corporation will typically fail this test, so you can't stop the infringer. You end up with a court-ordered royalty that you cannot negotiate, and the infringer keeps your invention and the market. This is often an impossible barrier for what would have been, until recently, the next great American disruptive startup.

3. Abstract Idea: The U.S. Supreme Court's Alice decision (2014), put into law that an "abstract idea" cannot be patented, but did not define this term. The result is that a sharp attorney can often convince a judge, who may have little tech experience, that a patent should have not been issued. This argument is most often used for software related or medical diagnostics patents. The patents of many important, future technologies that are invalidated on this issue in America are valid and defensible in China and Europe, so that is where startup funding is going.

A U.S. Patent is supposed to provide the inventor with the exclusive right to his or her invention (U.S. Constitution [Article I, Â§ 8, Clause 8](#)). You should be able to legally stop any infringer, no matter how powerful. You should be able to create a disruptive startup, or license your invention at a market rate. This is what created the incentive to invent that enabled America to lead the world in innovation for over 200 years and has been a major part of the American Dream.

This is what [US Inventor](#) is fighting to restore.

Help this vital effort by signing our [Inventor Rights Resolution](#) and getting your U.S. Representatives and Senators behind this effort.

In his first speech to the joint session of Congress he recognized there were â... new and useful inventionsâ... found abroad. He then admonished, â... I cannot forbear intimating to you the expediency of giving effectual encouragement [â...:] to the exertions of skill and genius in producing them at home.â...

Congress answered less than 4 months later with the Patent Act of 1790. George Washington personally signed the first 156 issued patents.

So, how effectual is the US patent system? That depends on who you ask â... and, unfortunately, what year you are asking.

Itâ... s fruitless to argue that the rate of innovation didnâ... t accelerate after the signing of our Constitution. The last 234 years have produced an unprecedented time of discovery in the history of humankind.

The Constitution was signed with a feather (the writing technology of the time). Iâ... m writing this article while sitting in the passenger seat of a motorized vehicle, on a laptop, connected to the internet, through a wireless connection of a mobile phone.

High Tech Connection

Another important word, â... Secureâ... (â... to make fast, save, protect, ensure,â... Webster, 1806) is only in the Constitution twice.

First, expressing the need to, â... secure the blessings of liberty to ourselves and our posterity.â... Second, the pointed direction that Congress is accountable for â... securing for limited times the exclusive right to authors and inventors.â...

Congress seemed to understand their responsibility to secure exclusive rights to inventors back in 1904 when the bicycle shop tinkerers Wilbur and Orville Wright received their first patent.

Argue all you want about the Wright brothers patents and their effect on the â... heavier than airâ... aviation industry. Just remember that that industry didnâ... t effectively exist before their painstaking efforts that led to the groundbreaking discoveries of these two brothers. Wilbur Wright aptly pointed out, â... Those who tried to study the science of aerodynamics knew not what to believe and what not to believe.â...

Fast-forward to 2011 when Congress passed the America Invents Act (AIA). The name of the Act harkens back to George Washingtonâ... s admonition to motivate exertions of skill and genius at home. Unfortunately, the Act did exactly the opposite.

The AIA created the Patent Trial and Appeal Board (PTAB). Just two years after its implementation the chief judge of the U.S. Court of Appeals observed the devastating impact this Act had on patents, describing it as â... death squads killing property rights.â...

This new process of invalidating patents, lobbied heavily for by the established technology companies, has been killing off patents at an extraordinary rate â... with the PTAB revoking 84% of the 3,000+ patents they have reviewed.

Instead of following their Constitutional mandate to secure exclusive rights to inventors, our elected officials

were securing the ability for established multi-national companies to crush independent innovation; innovation which occurred outside the well-funded research and development departments of the conglomerates.

Itâ... s a far cry from the year 1921 when a 14-year-old farm boy thought up the idea of â... electronic televisionâ... while plowing the horizontal lines out in a field. This boy, Philo Farnsworth, conceptualized the idea that an electronic image could be built up line by line. His young-adult life was spent painstakingly proving out that theory in the Green Street labs in San Francisco.

When it came time to protect Philo from the massive companies of the time (manufacturers of radios who had been out-innovated by Philo) the courts and the law protected Philo through the rights granted by his patents.

â... Oh My God, This Is So F---ed Upâ... : Inside Silicon Valleyâ... s Secretive, Orgiastic Dark Side

- A deep insider reveals that the men on Palo Alto's Sand Hill Road control the world with forced sex, drugs and toxic frat boy sociopathy

Some of the most powerful men in Silicon Valley are regulars at exclusive, drug-fueled, sex-laced partiesâ... gatherings they describe not as scandalous, or even secret, but as a bold, unconventional lifestyle choice. Yet, while the guys get laid, the women get screwed. In an adaptation from her new book, *Brotopia*, Emily Chang exposes the tired and toxic dynamic at play.

By [Emily Chang In Vanity Fair](#)

About once a month, on a Friday or Saturday night, the Silicon Valley Technorati gather for a drug-heavy, sex-heavy party. Sometimes the venue is an epic mansion in San Franciscoâ... s Pacific Heights; sometimes itâ... s a lavish home in the foothills of Atherton or Hillsborough. On special occasions, the guests will travel north to someoneâ... s ch teau in Napa Valley or to a private beachfront property in Malibu or to a boat off the coast of Ibiza, and the bacchanal will last an entire weekend. The places change, but many of the players and the purpose remain the same.

The stories Iâ... ve been told by nearly two dozen people who have attended these events or have intimate knowledge of them are remarkable in a number of ways. Many participants donâ... t seem the least bit embarrassed, much less ashamed. On the contrary, they speak proudly about how theyâ... re overturning traditions and paradigms in their private lives, just as they do in the technology world they rule. Like Julian Assange denouncing the nation-state, industry hotshots speak of these activities in a tone that is at once self-congratulatory and dismissive of criticism. Their behavior at these high-end parties is an extension of the progressiveness and open-mindednessâ... the audacity, if you willâ... that make founders think they can change the world. And they believe that their entitlement to disrupt doesnâ... t stop at technology; it extends to society as well. Few participants, however, have been willing to describe these scenes to me without a

guarantee of anonymity.

If this were just confined to personal lives it would be one thing. But what happens at these sex parties... and in open relationships... unfortunately, doesn't stay there. The freewheeling sex lives pursued by men in tech... from the elite down to the rank and file... have consequences for how business gets done in Silicon Valley.

Sex Parties of the Tech and Famous

From reports of those who have attended these parties, guests and hosts include powerful first-round investors, well-known entrepreneurs, and top executives. Some of them are the titans of the Valley, household names. The female guests have different qualifications. If you are attractive, willing, and (usually) young, you needn't worry about your résumé or bank account. Some of the women work in tech in the Bay Area, but others come from Los Angeles and beyond, and are employed in symbiotic industries such as real estate, personal training, and public relations. In some scenarios, the ratio of women to wealthy men is roughly two to one, so the men have more than enough women to choose from. ... You know when it's that kind of party, ... one male tech investor told me. ... At normal tech parties, there are hardly any women. At these kinds of party, there are tons of them. ...

I believe there is a critical story to tell about how the women who participate in these events are often marginalized, even if they attend of their own volition. One female investor who had heard of these parties before I approached her told me, ... Women are participating in this culture to improve their lives. They are an underclass in Silicon Valley. ... A male investor who works for one of the most powerful men in tech put it this way: ... I see a lot of men leading people on, sleeping with a dozen women at the same time. But if each of the dozen women doesn't care, is there any crime committed? You could say it's disgusting but not illegal... it just perpetuates a culture that keeps women down. ...

To be clear, there is a wide range of parties for experimental sexual behavior. Some, devoted entirely to sex, may be drug- and alcohol-free (to encourage safety and performance) and demand a balanced gender ratio. Others are very heavy on drugs and women and usually end in group ... cuddle puddles, ... a gateway to ever-so-slightly more discreet sexual encounters.

Men show up only if directly invited by the host, and they can often bring as many women as they want, but guys can't come along as plus-ones. (That would upset the preferred gender ratio.) Invitations are shared via word of mouth, Facebook, Snapchat (perfect, because messages soon disappear), or even basic Paperless Post. Nothing in the wording screams ... sex party... or ... cuddle puddle, ... in case the invitation gets forwarded or someone takes a screenshot. Besides, there's no need to spell things out; the guests on the list understand just what kind of party this is. Women too will spread the word among their female friends, and the expectations are hardly hidden. ... They might say, ... Do you want to come to this really exclusive hot party? The theme is bondage, ... one female entrepreneur told me. ... It's at this V.C. or founder's house and he asked me to invite you. ...

... IT'S VERY RISKY... ONCE YOU'RE IN THAT CIRCLE, ONCE YOU DECIDE YOU WANT TO PLAY THE GAME, YOU CAN'T BACK OUT. ...

Perhaps this culture is just one of the many offshoots of the sexually progressive Bay Area, which gave rise to the desert festival of free expression Burning Man, now frequented by the tech elite. Still, the vast majority of people in Silicon Valley have no idea these kinds of sex parties are happening at all. If you're reading this and shaking your head saying, ... This isn't the Silicon Valley that I know, ... you may not be a rich and edgy male founder or investor, or a female in tech in her 20s. And you might not understand, anyway. ... Anyone else who is on the outside would be looking at this and saying, Oh my God, this is so fucked up, ... one female entrepreneur told me. ... But the people in it have a very different perception about

whatâ... s going on.â...

This is how the night goes down, according to those who have attended. Guests arrive before dinner and are checked in by private security guards, who will turn you away if youâ... re not on the list. Sometimes the evening is catered. But at the most intimate gatherings, guests will cook dinner together; that way they donâ... t have to kick out the help after dessert. Alcohol lubricates the conversation until, after the final course, the drugs roll out. Some form of MDMA, a.k.a. Ecstasy or Molly, known for transforming relative strangers into extremely affectionate friends, is de rigueur, including Molly tablets that have been molded into the logos of some of the hottest tech companies. Some refer to these parties as â... E-parties.â...

MDMA is a powerful and long-lasting drug whose one-two punch of euphoria and manic energy can keep you rolling for three or four hours. As dopamine fires, connections spark around the room, and normal inhibitions drop away. People start cuddling and making out. These arenâ... t group orgies, per se, but guests will break out into twosomes or threesomes or more. They may disappear into one of the venueâ... s many rooms, or they may simply get down in the open. Night turns to day, and the group reconvenes for breakfast, after which some may have intercourse again. Eat, drugs, sex, repeat.

These sex parties happen so often among the premier V.C. and founder crowd that this isnâ... t a scandal or even really a secret, Iâ... ve been told; itâ... s a lifestyle choice. This isnâ... t Prohibition or the McCarthy era, people remind me; itâ... s Silicon Valley in the 21st century. No one has been forced to attend, and theyâ... re not hiding anything, not even if theyâ... re married or in a committed relationship. Theyâ... re just being discreet in the real world. Many guests are invited as couplesâ... husbands and wives, boyfriends and girlfriendsâ... because open relationships are the new normal.

While some parties may be devoted primarily to drugs and sexual activity, others may boast just pockets of it, and some guests can be caught unawares. In June 2017, one young womanâ... letâ... s call her Jane Doeâ... received a Paperless Post invite for â... a party on the edge of the earthâ... at the home of a wealthy venture capitalist. The invite requested â... glamazon adventurer, safari chic and jungle tribal attire.â... Ironically, the gathering was held just a week after sexual-harassment allegations against Binary Capital co-founder Justin Caldbeck had been reported, but that didnâ... t seem to discourage certain guests from indulging in heavy petting in the open.

â... It was in the middle of the Binary thing,â... Jane Doe told me, referring to the scandal at the V.C. firm. â... And it was all so ridiculous.â... Doe found herself on the floor with two couples, including a male entrepreneur and his wife. The living room had been blanketed in plush white faux fur and pillows, where, as the evening wore on, several people lay down and started stroking one another, Doe said, in what became a sizable cuddle puddle. One venture capitalist, dressed up as a bunny (itâ... s unclear how this fit into the edge-of-the-earth theme), offered Jane Doe some powder in a plastic bag. It was Molly. â... They said it will just make you feel relaxed and youâ... re going to like being touched,â... Doe recounted to me.

Nervous, she dipped her finger into the powder and put it in her mouth. Soon, her guard dropped. Then, the male founder asked if he could kiss her. â... It was so weird,â... she says. â... Iâ... m like, â... Your wife is right there; is she O.K. with this?â... â... The founderâ... s wife acknowledged that, yes, she was O.K. with it. Jane Doe, who considers herself fairly adventurous and open-minded, kissed the founder, then became uncomfortable, feeling as if she had been pressured or targeted. â... I donâ... t know what Iâ... m doing, I feel really stupid, Iâ... m drugged up because Iâ... d never taken it before, and he knew Iâ... d never taken it,â... she recalled. She tried to escape to a different area of the party. â... I felt gross because I had participated in making out with him and then he kept trying to find me and I kept trying to run away and hide. I remember saying to him, â... Arenâ... t people going to wonder?â... And he said, â... The people that know me know what is going on, and the people that donâ... t, I donâ... t really care.â... â... Before dawn, she jumped into her car and left. â... Whatâ... s not O.K. about this scene is that it is so money- and power-dominated. Itâ... s a problem because itâ... s an abuse of power. I would never do it again.â...

While this particular woman felt ambushed, if it's your first time, a friend will normally fill you in on what you're signing up for, and you are expected to keep it to yourself. You know that if you do drugs with someone you work with you shouldn't mention it to anyone, and the same goes with sex. In other words, we're not hiding anything, but, actually, we kind of are. You only get invited if you can be trusted and if you're going to play ball. You can choose not to hook up with [a specific] someone, but you can't not hook up with *anybody*, because that would be voyeurism. So if you don't participate, don't come in," says one frequent attendee, whom I'll call Founder X, an ambitious, world-traveling entrepreneur.

They don't necessarily see themselves as predatory. When they look in the mirror, they see individuals setting a new paradigm of behavior by pushing the boundaries of social mores and values. What's making this possible is the same progressiveness and open-mindedness that allows us to be creative and disruptive about ideas," Founder X told me. When I asked him about Jane Doe's experience, he said, "This is a private party where powerful people want to get together and there are a lot of women and a lot of people who are fucked up. At any party, there can be a situation where people cross the line. Somebody fucked up, somebody crossed the line, but that's not an indictment on the cuddle puddle; that's an indictment on crossing the line. Doesn't that happen everywhere? It's worth asking, however, if these sexual adventurers are so progressive, why do these parties seem to lean so heavily toward male-heterosexual fantasies? Women are often expected to be involved in threesomes that include other women; male gay and bisexual behavior is conspicuously absent. Oddly, it's completely unthinkable that guys would be bisexual or curious," says one V.C. who attends and is married (I'll call him Married V.C.). "It's a total double standard. In other words, at these parties men don't make out with other men. And, outside of the new types of drugs, these stories might have come out of the Playboy Mansion circa 1972.

I had a wide-ranging conversation with Twitter co-founder Evan Williams about the peculiar mixture of audacity, eccentricity, and wealth that swirls in Silicon Valley. Williams, who is married with two kids, became an Internet celebrity thanks to his first company, Blogger. He pointed out that he was never single, well known, and rich at the same time, and that he isn't part of this scene, but recognizes the motivations of his peers. "This is a strange place that has created incredible things in the world and therefore attracts these types of people and enables these types of people. How could it be anything but weird and dramatic and people on the edge testing everything?" On the one hand, he said, "if you thought like everyone else, you can't invent the future," yet he also warned that, sometimes, this is a recipe for disaster.

Rich men expecting casual sexual access to women is anything but a new paradigm. But many of the A-listers in Silicon Valley have something unique in common: a lonely adolescence devoid of contact with the opposite sex. Married V.C. described his teenage life as years of playing computer games and not going on a date until he was 20 years old. Now, to his amazement, he finds himself in a circle of trusted and adventurous tech friends with the money and resources to explore their every desire. After years of restriction and longing, he is living a fantasy, and his wife is right there along with him.

Married V.C.'s story—that his current voraciousness is explained by his sexual deprivation in adolescence—is one I hear a lot in Silicon Valley. They are finally getting theirs.

Founder Hounders

There is an often told story that Silicon Valley is filled with women looking to cash in by marrying wealthy tech moguls. Whether there really is a significant number of such women is debatable. The story about them is alive and well, however, at least among the wealthy men who fear they might fall victim. In fact, these guys even have a term for the women who pursue them: founder hounders.

When I ask Founder X whether these men are taking advantage of women by feeding them inhibition-melting drugs at sex parties, he replies that, on the contrary, it's women who are taking advantage of him and his

tribe, preying on them for their money.

On their way up to a potential multi-million-dollar payout, some younger founders report, more and more women seem to become mysteriously attracted to them no matter how awkward, uncool, or unattractive they may be.

However many founder hounders exist, the idea of these women lives large in the minds of Silicon Valley founders, who often trade stories about women they've dated. As Founder X puts it, "We'll say whether some girl is a fucking gold digger or not, so we know who to avoid."

When I tell her this, Ava, a young female entrepreneur, rolls her eyes. According to Ava, who asked me to disguise her real identity and has dated several founders, it's the men, not the women, who seem obsessed with displays of wealth and privilege. She tells of being flown to exotic locations, put up in fancy hotels, and other ways rich men have used their money to woo her. Backing up Ava's view are the profiles one finds on dating apps where men routinely brag about their tech jobs or start-ups. In their online profiles, men are all but saying, "Hello, would you like to come up to my loft and see my stock options?"

In Ava's experience, however, once men like this land a woman, they are quick to throw her back. After a few extravagant dates, Ava says, she will initiate a conversation about where the tryst is going. The men then end things, several using the same explanation. "They say, 'I'm still catching up. I lost my virginity when I was 25.' And I'll say, 'Well, you're 33 now, are we all caught up yet?' In any other context, [these fancy dates] would be romantic, but instead it's charged because no one would fuck them in high school. . . . I honestly think what they want is a do-over because women wouldn't bone them until now."

Ava's jaundiced view of newly wealthy moguls would be funny if their gold-digger obsession didn't mask something serious. The claim of being stalked by women often becomes an excuse used by some tech stars to justify their own predatory behavior.

What that adds up to is a great deal of ego at play. "It's awesome," says Founder X. At work, he explains, "you're well funded. You have relative traction. Outside work, why do I have to compromise? Why do I have to get married? Why do I have to be exclusive? If you've got a couple girls interested in you, you can set the terms and say, 'This is what I want.' You can say, 'I'm happy to date you, but I'm not exclusive.' These are becoming table stakes for guys who couldn't get a girl in high school."

Furthermore, these elite founders, C.E.O.s, and V.C.s see themselves as more influential than most hot-shit bankers, actors, and athletes will ever be. "We have more cachet than a random rich dude because we make products that touch a lot of people," says Founder X. "You make a movie, and people watch it for a weekend. You make a product, and it touches people's lives for years."

At least on the financial level, Founder X has a point. The payouts of A-list actors and the wolves of Wall Street just aren't that impressive among the Silicon Valley elite. Managing directors at top-tier investment banks may pocket a million a year and be worth tens of millions after a long career. Early employees at tech firms like Uber, Airbnb, and Snapchat can make many times that amount of money in a matter of years. Celebrities such as Ashton Kutcher, Jared Leto, and Leonardo DiCaprio have jumped on that power train and now make personal investments in tech companies. The basketball great Kobe Bryant started his own venture-capital firm. LeBron James has rebranded himself as not just an athlete but also an investor and entrepreneur.

With famous actors and athletes wanting to get into the tech game, it's no surprise that some in the Valley have a high opinion of their attractiveness and what they should expect or deserve in terms of their sex lives.

In the Valley, this expectation is often passed off as enlightenedâ... a contribution to the evolution of human behavior.

For many women who describe it, however, itâ... s a new immaturityâ... sexist behavior dressed up with a lot of highfalutin talkâ... that reinforces traditional power structures, demeans women, and boosts some of the biggest male egos in history: just another manifestation of Brotopia.

When I spoke about Silicon Valleyâ... s sex partiesâ... specifically those where women vastly outnumber menâ... with Elisabeth Sheff, a Chattanooga-based writer and professor who has spent two decades researching open relationships, her reaction was heated: â... Thatâ... s exploitation. Thatâ... s old-school, fucked-up masculine arrogance and borderline prostitution,â... she said. â... The men donâ... t have to prostitute themselves, because they have the money. . . . â... I should be able to have sex with a woman because Iâ... m a rich guy.â... That is not even one particle progressive; that is the same tired bullshit. Itâ... s trying to blend the new and keeping the old attitudes, and those old attitudes are based in patriarchy, so they come at the expense of women.â...

Jennifer Russell, who runs the established Camp Mystic at Burning Man, is more sympathetic. â... Men and women are equally drawn to creating a structure that invites their full sexual expression, and events like this are a safe place to dabble,â... she says. â... Itâ... s way better than a swingersâ... club would feel because this is at a home and you are surrounded by people you know.â...

Married V.C. admits, however, that for many men these parties arenâ... t so much about self-expression as they are about simply sport fucking. â... Some guys will whip out their phones and show off the trophy gallery of girls theyâ... ve hooked up with,â... he says. â... Maybe this is behavior that happened on Wall Street all the time, but in a way they owned it. These founders do this, but try not to own it. They talk about diversity on one side of their mouth, but on the other side they say all of this shit.â...

The New Paradigm for Women Getting Screwed

For successful women in Silicon Valley, the drug-and-sex-party scene is a minefield to navigate. This isnâ... t a matter of Bay Area tech women being more prudish than most; I doubt recent history has ever seen a cohort of women more adventurous or less restrained in exploring sexual boundaries. The problem is that the culture of sexual adventurism now permeating Silicon Valley tends to be more consequential for women than for men, particularly as it relates to their careers in tech.

Take multi-time entrepreneur Esther Crawford, who is familiar with sex parties (specifically those with an equal gender ratio and strict rules around consent) and talks openly about her sexual experiments and open relationships. For four years, she had been in a non-monogamous (they say â... monogamishâ...) relationship with Chris Messina, a former Google and Uber employee best known for inventing the hashtag. More recently, Crawford and Messina have started a company together called Mollyâ... perhaps not un-coincidentally the same name as the drugâ... where they are developing a â... nonjudgmental (artificially intelligent) friend who will support your path to more self-awareness.â... They also chose to become monogamous for a while; seeing other people was getting too complicated. â... The future of relationships is not just with humans but A.I. characters,â... Crawford told me. By December 2017, they had raised \$1.5 million for their new company. In the meantime, Crawford is acutely aware of the harsh reality that as a female entrepreneur she faces so many challenges that men donâ... t. What she has found is that, for a woman, pushing private sexual boundaries comes with a price.

When Crawford was raising funds for her second company, a social-media app called Glmps, she went to dinner with an angel investor at a hip restaurant on San Franciscoâ... s Valencia Street. At the end of the meal, he handed her a check for \$20,000, then immediately tried to kiss her. â... I certainly wasnâ... t coming on to him,â... she asserts. â... I kind of leaned back, and he ordered me an Uber, and I was like, â... I gotta go

home.â... â... Crawford thinks itâ... s likely that this particular investor knew about her sexual openness and found it difficult to think of her simply as an entrepreneur rather than as a potential hookup. This encounter is an example of a unique penalty women face if they choose to participate in the â... weâ... re all cool about sexâ... scene.

Ava was working as an executive assistant at Google when she ran into her married boss at a bondage club in San Francisco. He was getting a blow job from a woman strapped to a spanking bench who was being entered by another man from behind. Ava and her boss, an engineer, locked eyes but didnâ... t exchange a word and never spoke of the encounter again. However, a few months later, at a Google off-site event, another married male colleague approached her. â... He hits on me, and I was like, What are you doing? Donâ... t touch me. Who are you again? He was like, I know who you are. The other guys said you like all this stuff.â... Someone had outed Ava. She quit working at Google shortly thereafter. â... The trust works one way,â... Ava says. â... The stigma for a woman to do it is so much higher. Iâ... m supposed to be in this industry where everyone is open and accepting, but as a woman the punishment is so much more unknown.â...

Crawford canâ... t even count the number of men whoâ... ve told her how lucky she is to have so many eligible men to date in the male-dominated tech scene. â... Of all the privileges in the world, that is not the one I would choose,â... she says fiercely. â... Iâ... d choose equal pay for equal work. Iâ... d choose having better access to capital and power. Iâ... d choose not being passed over for promotions. Iâ... d choose not having to worry about being in the 23.1 percent of undergraduate college women who get sexually assaulted. Iâ... d choose not being slut-shamed if I do opt to explore my sexuality.â...

Married V.C. admits he might decline to hire or fund a woman heâ... s come across within his sex-partying tribe. â... If itâ... s a friend of a friend or youâ... ve seen them half-naked at Burning Man, all these ties come into play,â... he says. â... Those things do happen. Itâ... s making San Francisco feel really small and insular because everybodyâ... s dated everybody.â... Men actually get business done at sex parties and strip clubs. But when women put themselves in these situations, they risk losing credibility and respect.

The party scene is now so pervasive that women entrepreneurs say turning down invitations relegates them to the uncool-kidsâ... table. â... Itâ... s very hard to create a personal connection with a male investor, and if you succeed, they become attracted to you,â... one told me. â... They think youâ... re part of their inner circle, [and] in San Francisco that means youâ... re invited to some kind of orgy. I couldnâ... t escape it here. Not doing it was a thing.â... Rather than finding it odd that she would attend a sex party, says this entrepreneur, people would be confused about her not attending. â... The fact that you *donâ... t* go is weird,â... the entrepreneur said, and it means being left out of important conversations. â... They talk business at these parties. They do business,â... she said. â... They decide things.â... Ultimately, this entrepreneur got so fed up that she moved herself and her start-up to New York and left Silicon Valley for good.

The women who do say yes to these parties rarely see a big business payoff. â... There is a desire to be included and invited to these kinds of things and sometimes it felt like it was productive to go and you could get ahead faster by cultivating relationships in this way,â... one female tech worker told me. â... Over time, I realized that itâ... s false advertising and itâ... s not something women should think is a way to get ahead. Itâ... s very riskyâ... once youâ... re in that circle, once you decide you want to play the game, you canâ... t back out. If you really believe thatâ... s going to get you to a serious place in your career, thatâ... s delusion.â...

Another female entrepreneur described the unfair power dynamic thatâ... s created. â... There is this undercurrent of a feeling like youâ... re prostituting yourself in order to get ahead because, letâ... s be real, if youâ... re dating someone powerful, it can open doors for you. And thatâ... s what women who make the calculation to play the game want, but they donâ... t know all the risks associated with it,â... she said. â... If you do participate in these sex parties, donâ... t ever think about starting a company or having someone invest

in you. Those doors get shut. But if you donât participate, youâre shut out. Youâre damned if you do, damned if you donât.â

It hearkens back to those popular 1980s teen movies which tell the âheartwarmingâ story of a glasses-wearing nerd who is transformed into the cool, funny kid who gets all the hot chicks. But weâre not living a teenage dream. Great companies donât spring magically to life when a nerd gets laid three times in a row. Great companies are built in the office, with hard work put in by a team. The problem is that weekend views of women as sex pawns and founder hounders canât help but affect weekday views of women as colleagues, entrepreneurs, and peers.

Google And Facebook Have A Psychological Trick To Make You Do Things You Wouldn't Believe You Might Do

By Conner Lewis For The Congressional Report

Most of the U.S. Senators and government agency heads own stock in, get their political campaigns financed by and party with, the owners and executives of the Silicon Valley big tech companies.

That is why those public officials fail to halt the mass societal abuses of those companies. Above all others, the California politicians are in bed with the same criminals they are supposed to regulate.

While politicians shrug off any attempt to bring the oligarchs into line, they provide lip-service, window-dressing pretend actions that have impressive titles but zero bite.

The authors of this report were in private meetings with the investors and founders of the Silicon Valley â... Big Fiveâ... , at the inception of their companies, and hereby testify that those owners planned, with malicious intent, the use of their business licenses for the purpose of manipulating, harming and restricting the public interest, and DEMOCRACY, for profiteering purposes.

Big techâ... s â... green-washingâ... , false-savior, â... we-are-your-motherâ... fake â... do-gooderâ... facade is a sham to sucker everyone.

They hide behind a curtain of false altruism and do the darkest deeds any industry can undertake behind that contrived screen.

One of Google , Youtube and Facebookâ... s most insidious technologies can even get you to engage in riots, murders and other crimes, even though you might, otherwise, never do those things. Here is how that technology works:

Since the early 20th century, the name of the Russian scientist Ivan Pavlov has been associated with the idea of brainwashing. Pavlovâ... s experiments, in which he trained dogs to salivate in response to a signal such as a bell, showed that the mind could be conditioned to react automatically to stimuli. But he looked forward to a time when science could manipulate the brain directly. In a passage eerily accurate in describing todayâ... s neural imaging, he wrote: â... If we could look through the skull into the brain of a consciously thinking personâ... then we should see playing over the cerebral surface a bright spot with fantastic, waving borders, constantly fluctuating in size and form, and surrounded by a darkness, more or less deep, covering the rest of the hemispheres.â...

We still donâ... t have a precise topography of the brain in terms of specific thoughts or feelings. Itâ... s hard to imagine where one would begin if one wanted to surgically force someone to reveal a particular secret, or to persuade him or her to vote for a certain candidate. But since Pavlovâ... s time, science has moved much closer to enabling direct physical control of the brain. In this century, neuroscientistsâ... insights into memory, cognition, pleasure and pain may make coercive â... mind controlâ... a reality.

The psychologist James Olds (1922-76), one of the founders of modern neuroscience, conducted an experiment at McGill University in 1953 in which he implanted electrodes deep in the brains of rats and started observing their responses to electrical stimulation at various sites. His key observation resulted from an accident: He missed the desired anatomical site slightly on one particular rat. After recovering from surgery, the animal was placed in a special chamber. Every time it went to a corner of the chamber, it received a small electrical stimulus to the brain, with each corner stimulating a different site. The rat kept returning to one

specific corner, even skipping eating to hang out there and get the brain stimulation.

Olds inferred that there was something pleasurable about receiving a shock at that site in the brain. Next he started training the rat to go to different parts of the box or to turn right or left before it could receive the desired electrical stimulation. Using this technique, Olds could elicit complex behaviors easily; Pavlov would have been envious about this shortcut to behavioral conditioning. Olds observed that "... Left to itself in the apparatus, the animal...stimulated its own brain regularly,... up to 5,000 times an hour.

The mind-control possibilities for this intervention sounded almost limitless, but would it work on people? Psychiatrist Robert Heath (1915-99), of Tulane University, performed studies with human patients, including one code-named B-7, a 28-year-old man with severe narcolepsy. Heath implanted a series of electrodes in various areas of his brain and asked the patient what he felt after each area was stimulated. One area was so aversive that the patient intentionally broke the stimulus button so that he would never have to experience that sensation again.

However, the feelings evoked by stimulating a different site were intensely pleasurable. The patient learned that he could block an incipient narcoleptic attack by self-stimulating; he was able to control his symptoms so well that for the first time he was able to get a job. On the rare occasion that he fell asleep too rapidly to press the button, his friends knew that they could promptly wake him up by pressing it for him.

Neurosurgical techniques have continued to evolve to be less invasive, less risky and applied to very specific areas of the brain.

At one point the CIA approached Heath, asking if he would work with the agency to study the brain's pleasure and pain system. He spurned the invitation, he told a New York Times reporter in 1977: "... If I had wanted to be a spy, I would have been a spy. I wanted to be a doctor and practice medicine.... This kind of work, most of which was conducted in the 1960s and 1970s, has largely been shut down because of ethical concerns.

However, the underlying neurosurgical techniques have continued to evolve. Fifty years after Heath's studies, procedures are less invasive, less risky and can be applied to very specific areas of the brain. Implanted deep-brain stimulators (DBS) are used by thousands of people with Parkinson's disease to help control their muscle movements, as well as for other conditions such as pain and epilepsy. There is ongoing interest in using such interventions on different sites in the brain to treat patients with psychiatric disorders, particularly patients with treatment-resistant depression.

Deep-brain stimulation requires painstaking surgery and expensive equipment, suitable for an individual but hardly appropriate for group interventions. Is there a way of stimulating a group of people without implants? In her 1996 book "... Cults in Our Midst,... Psychologist Margaret Singer described love bombing,... an indoctrination technique used by some cults in which recruits are given so much flattery and adulation that they feel welcome and safe.

The neuroendocrine equivalent involves a hormone called oxytocin that is manufactured deep in the brain. People release oxytocin when they are bonding with another; it is sometimes nicknamed the feel-good hormone. Early research found that it is increased during breast-feeding and during sexual intimacy. Subsequent research showed that oxytocin is also produced in other situations of closeness... prayer, team sports, even when dog owners interact with their pets.

But there is a darker side to oxytocin. Experiments have found that it can stoke trust and cooperation within a group at the expense of distrust of people outside the group. Currently, the most effective way of administering oxytocin is through a nasal spray, but if it were possible to administer it orally or via aerosol, it could conceivably be used in group settings to increase attachment and thereby recruit new potential members of a cult or party. People might willingly join a group or adopt a new belief if it allowed them to receive pleasurable stimulation... after all, addicts aren't particularly squeamish about what they need to do to

obtain their drugs.

On the other side of the coin, people might repudiate their old beliefs or identities to turn off painful stimulation, the way patient B-7 broke his stimulus button. When the dystopian movie â... A Clockwork Orangeâ... was released in 1971, audiences were stunned by its portrayal of the power of aversive conditioning. The advance of neuroscience means that such techniques are no longer just fantasies. So far they have been kept in check only by government regulation and medical professionalsâ... sense of ethics. But governments are always seeking new weaponry, and history suggests that there will always be some researchers who close their eyes to the implications of their work or justify it as a way to protect society from looming threats. Their self-restraint may not always protect us from the dark potential of Google and Facebookâ... s scientific coercion. This report goes deeper into those contrived and manually steered tech manipulations operated by Big Techâ... s executives.

Google is manipulating your internet searches, your elections, your perceptions of the news, your democracy, your ideologies and your school curriculum's. Google and their cartel (including FACEBOOK, NETFLIX, LINKEDIN, YOUTUBE, et al) collude to manipulate social dynamics.

White House executives, Federal Agency Executives and U.S. Senators including Dianne Feinstein, Kamala Harris, John Podesta, Nancy Pelosi, Harry Reid own, control and finance â... The Deep Stateâ... because they own, and their families, own the stock in the companies comprising The Deep State, they tell those companies what to do, they fund those companies and they social communicate with each other through covert channels, they engage sexually with each other and they exchange stock market tips and strategies, and that forensic accounting shows that the politicians and the corrupt companies are all the same organization. This, in part, proves that the â... Deep Stateâ... is â... State Sponsoredâ... .

Google, and The Deep Stateâ... s, socialistic, anti-Christian bias is invisibly reflected in the suppression of ideological content from appearing in some search results.

In shocking research that has spanned the past 6 Â½ years, Dr. Robert Epstein â... former editor-in-chief of Psychology Today and now Senior Research Psychologist at the American Institute for Behavioral Research and Technology â... has found that by controlling search results, Google possesses unprecedented power to sway the thinking of undecided voters during an election campaign.

How is it done?

Google can manipulate its search engine algorithm to display one-sided search results that decidedly favor one political candidate over another.

Dr. Epstein gave a grim prediction in recent congressional testimonyâ...!

He said that â... democracy as originally conceived cannot survive Big Tech as currently empowered.â...

Dr. Epstein is a registered Democrat. He supported and voted for Hillary Clinton in the 2016 election. He has no hidden agenda â...! and no axe to grind for President Trump.

During the 2016 presidential election campaign, he captured and analyzed â... more than 13,000 election-related searches conducted by a diverse group of Americans on Google, Bing, and Yahoo in the weeks leading up to the electionâ...!â...

During the 2018 midterm election cycle, Dr. Epstein captured 47,000 election-related searches â... plus nearly 400,000 web pages to which the search results were linked.

The results of his scientific analysis in both cases were disturbingâ...!

The Google search results in 2016 â... which account for over 92% of worldwide internet searches â... were significantly biased in favor of Hillary Clinton in all 10 positions on the first page of search results in both blue states and red states.

In 2018, the first-page search results heavily favored web sites and articles favoring Democrat candidates rather than being evenly split between Democrat and Republican candidates.

Very few people who do spontaneous searches ever scroll past the first page of search results. And Google knows this.

Dr. Epstein has conducted dozens of controlled experiments in the U.S. and other countries to precisely measure â... through before-and-after questionnaires â... how opinions and votes shift among undecided voters when search results strongly favor one candidate over another.

He calls this shift â... SEMEâ... â... Search Engine Manipulation Shift.

â... SEME is one of the most powerful forms of influence ever discovered in the behavioral sciences,â... Dr. Epstein said in his congressional testimony, â... and it is especially dangerous because it is invisible to people â... â...subliminalâ... in effectâ...! Bottom line: biased search results can easily produce shifts in the opinions and voting preference of undecided voters by 20% or more â... up to 80% in some demographic groups.â...

I can tell you, this is enough voters to change the results of any election.

Dr. Epstein calculated that Search Engine Manipulation Shift likely persuaded at least 2.6 million undecided voters to cast their ballots for Hillary Clinton in 2016 â...!and perhaps as many as 10.4 million.

In the 2018 midterm elections, Epsteinâ... s evidence suggests that as many as 78.2 million votes may have been shifted to Democrat candidates due to Search Engine Manipulation Shift.

These effects are far more meddlesome and interfering than fake news stories or ads placed by Russians on social mediaâ...!

While these acts of interference are troubling and unacceptable, they donâ... t shift very many votes because they are competitive and visible. Search Engine Manipulation Shift â... on the other hand â... is invisible and non-competitive.

Dr. Epstein explains: â... SEME is an example of an â... ephemeral experience,â... and thatâ... s a phrase youâ... ll find in internal emails that have leaked from Google recently. A growing body of evidence suggests that Google employees deliberately engineer ephemeral experiences to change peopleâ... s thinkingâ...! My recent research demonstrates that Googleâ... s â... autocompleteâ... search suggestions can turn a 50/50 split among undecided voters into a 90/10 split without peopleâ... s awareness.â...

As expected, Google, Hillary Clinton, and progressive media outlets have all disputed Dr. Epsteinâ... s research and his claimsâ...!

They all say in unison that this 2016 study of election-related search results has been â... debunked,â... and that Epsteinâ... s results arenâ... t valid because he made â... weird methodological choicesâ... in an earlier 2010 study.

But they haven't debunked his methodology or his results at all!

They're just saying this to try to discredit him and convince people to not take his work seriously. They haven't refuted him either by conducting their own comparable studies or by addressing his explanations of his methodology.

Incidentally, the number one Hillary Clinton financial supporter in the 2016 election was Alphabet Inc. the parent company of Google.

You can read Dr. Epstein's testimony and study the methodology of his experiments [here](#).

He is eminently qualified to conduct the type of research he's been conducting with Google search having been a research psychologist for nearly 40 years.

He received his Ph.D. at Harvard University in 1981 and has published 15 books and more than 300 scientific articles on artificial intelligence and other behavioral topics.

Dr. Epstein believes the solution to Google's search engine manipulation is to end its monopoly over its black box algorithm operation.

By requiring that the database they use to generate search results must be available in the public domain accessible to all many new search platforms will spring up and compete with Google, providing the same excellent search results.

Incidentally, I find that every time I run a Google search on a topic, I am served biased viewpoints!

Usually a CNN report is first on the list, followed by:

- The New York Times
- The Washington Post
- MSNBC
- Other pro-socialist media

I often have to scroll to page 7 or 8 to start finding conservative viewpoints.

Since 2012, Google has discriminated against and marginalized our editorial content. If they are doing it to us, they are certainly doing it to conservative web sites with higher numbers of subscribers. See these videos:

<https://youtu.be/rNvgl38TLvI>

and

https://youtu.be/csye_Jkp4eI

There were allegations raised that Google was manipulating the news to help Hillary. They allegedly steered [2.6 million votes to Hillary](#) and had far more of an impact upon the 2016 election than Russians. A whistleblower at Google has come out and warned that things are getting worse. Google whistleblower [Zach](#)

[Vorhies](#) came out and provided documents and warnings. He said:

â... Before Trump won, Google had this mission statement to organize the worldâ... s information and making it universally accessible and useful.â...

â... After Trump won, they said â... Well, Donald Trump won because of fake news and Russia hacking the election, so what we need to do is â...! protect our users from fake news; we need to protect our users from the damaging effects of Russian trolls and bots.â...

What is interesting is that Elizabeth Warren has been a longtime critic of the economic power of Amazon, Google, and Facebook. She is making their [break-up](#) under Anti-Trust Laws a key component of her presidential platform.

Google's ubiquitous search engine, [Google Search](#), is the backbone of the tech giant's business.

In many ways, Google Search is the backbone of the modern internet â... the way much of the web is sorted and organized and located. Given how crucial it is to daily internet use for billions of people around the world, it's a particularly ripe target for manipulation.

Google denies doing as much, and [insists that Google Search is built on algorithms](#) and data gleaned from use.

But [a new Wall Street Journal investigation](#) found that Google manipulated search algorithms in some worrying ways, including prioritizing large businesses over smaller ones, removing autocomplete results that involve sensitive topics like immigration and abortion, and even outright blacklisting some websites.

In one such change to Google's search algorithms, the service guided search users to more prominent businesses over lesser-known ones, the Journal reported. That change reportedly helped to boost Amazon's store in search results.

In another example cited in the Journal's report, autocomplete search results for sensitive subjects were replaced with safer results than those found on competing search engines like Yahoo, Bing, and [DuckDuckGo](#).

Google is known for refusing to share specific details on how its search algorithms operate, which it attributes to a measure of operations logistics: If the algorithms were public, then they could be gamed, Google argues.

"Extreme transparency has historically proven to empower bad actors in a way that hurts our users and website owners who play by the rules," Google spokesperson Lara Levin told the Journal.

When reached for a response to the report, a Google spokesperson offered the following statement:

"We have been very public and transparent around the topics covered in this article, such as our Search rater guidelines, our policies for special features in Search like Autocomplete and valid legal removals, our work to combat misinformation through Project Owl, and the fact that the changes we make to Search are aimed at benefiting users, not commercial relationships. This article contains a number of old, incomplete anecdotes, many of which not only predated our current processes and policies but also give a very inaccurate impression of how we approach building and improving Search. We take a responsible and principled approach to making changes, including a rigorous evaluation process before launching any change â... something we started implementing more than a decade ago. Listening to feedback from the public is a critical part of making Search better, and we continue to welcome the feedback."

If you use Google's search engine, there's no way of knowing what you're missing, says Gabriel Weinberg, CEO and founder of search engine DuckDuckGo, whose company released a [study](#) Tuesday claiming that Google is manipulating Americans' search results.

The study concludes that Google is editorializing and providing different search results for different users who search for identical terms, within seconds and minutes of each other.

The editorialized results are informed by the personal information Google has on you, like your search, browsing and purchase history, the study says.

What we're seeing is intense amounts of variation, Weinberg told Yahoo Finance. Most of the people in the study saw results completely unique to them.

By unique, Weinberg means that inconsistent source links appeared in search results, and some of the same links appeared in varying hierarchical order.

Seventy-two U.S. participants in the study entered three independent Google search terms — gun control, immigration, and vaccinations — using a desktop Chrome browser at 9 p.m. eastern time on July 24, 2018.

Unique results were returned for 68% of private searches for gun control, 57% of searches for immigration, and 92% of searches for vaccinations.

According to the study, Google returned these filtered results, regardless of whether participants searched in private — [incognito](#) — or non-private mode.

It's exactly opposite of what people would expect, Weinberg said.

In non-private mode, unique search results were generated for 59% of searches for gun control, 63% of searches for immigration, and 92% of searches for vaccinations.

Our proposition is that if you search in the U.S. you should be seeing the same things, especially when you search major political topics, Weinberg said.

DuckDuckGo decided to run the new study after a previous version examined Google search results in connection with the 2012 presidential campaigns. A [Wall Street Journal study](#), commissioned around the same time, mirrored DuckDuckGo's findings, showing that Google's personalized search results inserted tens of millions of more links for then-candidate Barack Obama than for his primary challenger Mitt Romney.

Search personalization doesn't actually help search results, it really hurts in the aggregate, making people more politically polarized, Weinberg said.

In his experience, Weinberg says when consumers think of search personalization they're really expecting search localization for services like local weather, local restaurants, and maps, rather than national or international political issues.

You can do that all without a filter bubble because it's not based on your search history, he said, adding that search-based ad revenue is not dependent on search personalization.

DuckDuckGo's study controlled for local results by designating all local search results as equal and accounting for no variation if the local links appeared in the same hierarchical order. A result showing an LA

Times link, for example, was treated the same as link to the Chicago Tribune.

For critics who dispense with the importance of result order, Weinberg says theyâ€¦ re mistaken.

â€¦ The first link gets about 40% of the clicks, the second gets about 20%, and it drops off by half with each [subsequent] link,â€¦ he said. â€¦ If you switch the second and first link, thatâ€¦ s actually a huge differenceâ€¦ because the one is now getting twice as many clicks as the other.

Yahoo Finance reached out to Google for a response to DuckDuckGoâ€¦ s study and didnâ€¦ t receive a response.

â€¦ Iâ€¦ m really not on any particular side,â€¦ Weinberg said when asked about his political ideology.

He says heâ€¦ d like to see Congress question Google CEO Sundar Pichai about search result bias when he testifies before the House Judiciary Committee on December 11.

â€¦ We understand [the study] is coming from a competitor and thereâ€¦ s an inclination to believe [the findings] less so. Thatâ€¦ s why we made it all public, the data, the code, the directions, and we are basically saying we believe other people should study this,â€¦ he said.

Weinberg says editorialized results may be crafted depending on the level of privacy, and the number of Android products you use.

â€¦ They may have all your email, they may have all your text messages, have all your photos, all your contacts, so [editorialized content] can be based on all of those things. Itâ€¦ s a completely black box and opaque to consumers.â€¦

A few people in the study were given a much broader range in search results from what the majority of participants were seeing, Weinberg said.

â€¦ You would just have no idea if you were one of those people. And you also would have no idea, even if you know youâ€¦ re seeing something different, why youâ€¦ re seeing it.â€¦

The rise of renewed and vociferous social movements for every non-white and non-cis male group can be seen as paralleling the rise of social media and the domination of technology platforms. In time, at least in the Western world, when blacks, women, gays, and most other populations have won equal rights, and even preferential rights, under codified federal law, and when their social currency has never been higher, it seems now that their voice has never sounded more pained or aggrieved.

Without a doubt, the ease of emoting through a tweet has certainly affected how individual users can set off maelstroms of irrational fury. Whether calling out real hurt, self-deluded hurt, or pure schadenfreude, there is no shortage of bored and usually meaningless lives attempting to drag down a crab that has nearly escaped the barrel of life.

The other side of the same coin is how the tech giant themselves can influence the narrative. We see this play out with not-so-alleged [shadow banning](#) practices of conservative social media accounts, and most people are by now aware of YouTube [demonetizing](#) conservative channels. We can add a new wrinkle: The representation of Google Image searches to advance a social narrative.

Letâ€¦ s break down what we saw in our own online queries, and then we can analyze it afterward. Try it out for yourself and leave a comment at the end of the article.

Google Search: â... White Menâ...

The top three rows of the search produced a total of sixteen results. Of those, there were:

- One result featuring a woman of color
- Three results featuring exclusively black men, either as a victim of white brutality or as a successful black man. Each image is a well-dressed black man wearing a tuxedo or suit.
- Five results featuring either a mug shot of some kind or simply an angry visage.
- Visible taglines for the images including phrases like â... Dear White Men, We Need You,â... â... White Men Are Bad,â... â... An Angry White Manâ... and one begins â... White Men Arenâ... t Thrilled When Womenâ...
- Only two results showing white men smiling

Google Search: â... Black Menâ...

The top three rows of the search produced a total of seventeen results. Of those, there were:

- All seventeen results featuring black men
- Eight of the results featuring black men smiling
- At least six of the results explicitly expressing victimhood. A few others are vaguer but allude to it.
- Visible taglines for the images including: â... The Young Black Men Caught,â... â... Why Do White People Feel,â... â... Photo Campaign That Celebrates Blackâ... and â... Resilience Of Black Men.â...

Google Search (see feature photo): â... White Womenâ...

The top three rows of the search produced a total of fifteen results. Of those, there were:

- Five results featuring women of color
- Two results featuring black men
- Four featuring white women smiling
- Visible taglines for the first five results including: â... The Trouble with White Women,â... â... White Women Need To Talk About Race,â... â... White Women Arenâ... t Allies At Work,â... â... Dear White Women, No More,â... and â... White Women: Itâ... s Time To Beâ...lâ...
- Other taglines including â... White Women Were Southern Slave Owners,â... â... Being Exoticised By White Women,â... â... Black Women Are Paid Less Than White,â... and â... White Women

Benefit Most (from white privilege).â€¦

Google Search: â€¦ Black Womenâ€¦

The top three rows of the search produced a total of sixteen results. Of those, there were:

- All sixteen results featuring black women
- All sixteen results featuring well-dressed and well-groomed women
- Fourteen of the results featuring black women smiling or projecting happiness (the other two project strength)
- Visible taglines including: â€¦ How Women Have Shaped,â€¦ â€¦ Studies Suggest Black Women Are More,â€¦ â€¦ My Heroes Are Black Women,â€¦ and â€¦ 20 Millenial Black-Owned Brands.â€¦

Google Search: â€¦ White Peopleâ€¦

The top three rows of the search produced a total of fifteen results. Of those, there were:

- Seven results featuring people of color
- Four additional results featuring white people protesting in solidarity with black people
- Just one result featuring a white person smiling (a white woman with dreadlocks)
- Visible taglines including: â€¦ Dear White People,â€¦ â€¦ Dear White People (again),â€¦ â€¦ A Letter To White People,â€¦ and another features the deplorable Robin DeAngelo.

Google Search: â€¦ Black Peopleâ€¦

The top three rows of the search produced a total of fifteen results. Of those, there were:

- All fifteen results featuring black people
- Eleven results featuring blacks smiling
- Visible taglines including: â€¦ Whatâ€¦ s Life Really Like For Black,â€¦ â€¦ Being Black In America,â€¦ â€¦ Racism Grows in Places,â€¦ and â€¦ Facebook Has Problem With Black People.â€¦

An Analysis of Search Results

An aggregate of the three â€¦ whiteâ€¦ searches is unflattering for white people. Of the forty-six total results,

a full eighteen (39%) of them depict non-whites, sometimes in roles of victimhood but usually in portrayals of independence and success. In and of itself, this is not bad, but it is misrepresentative of the intended search, and as we see, it is not replicated in reverse for other searches. For the whites themselves, just seven (15%) were represented in a positive light as indicated by smiling. Put another way, more than twice the amount of blacks were shown than whites in a positive way â... in a search designed to produce white results, to begin with.

The taglines are especially egregious. Just two taglines suggest something positive (â... Employment Helps White Menâ... s Health,â... and another is assumed to be positive because it shows white women rallying against the death of a black woman at the hands of police). Two others are neutral in that they advertise white shirts. That leaves a full twenty-four taglines (52%) under an image of white people that states something negative or dangerous about them.

An aggregate of the three â... blackâ... searches has a different outcome. Of the forty-eight total results, fully 100% of those results came back with images of black people. In the same vein, none of the taglines suggest that blacks are dangerous or that anything blacks do is harmful to others (as is the case especially with white women, more on that anon).

Amazingly, twenty-nine taglines portray blacks as victims. Despite the overall happiness of blacks as seen through imagery, the titling of the pictures nevertheless contends that blacks must be seen as victims. The taglines refer to the problems being black in America, and several refer to their killings (always at the hands of whites or police, not other blacks, even though black homicide victims are killed by other blacks 90% of the time according to the FBI).

As it relates specifically to the query of white women, something striking is happening. There is clearly a concerted effort to portray white women as comfortably and cunningly subversive (Where is the feminist outrage, by the way?). Most headlines call out white women for a combination of their insincere efforts at allying with blacks, benefiting from white privilege, and to really hammer home a negative stereotype, fulfilling the role of a â... Karen.â... In the intersectional rat race, the irony is that a significant majority of all women marchers in January 2017 were [white and championing leftist causes](#). Two immalleable rules in life: You canâ... t please everyone, and the left always consumes its own.

It is obvious that the Marxists at Google have an agenda to pursue, namely that the narrative must be alive and well. White men and women are evil? Check. Are blacks simultaneously victims of white oppression and strong individuals? Check. The more subtle displays arise when looking at the positive and negative dispositions. In Nazi propaganda, Goebbels only had to compare [Jews to rats](#) for so long before most Germans went along with the lie. How long before a similar lie is believed here? More concerning, what happens after that?

The Wall Street Journal has undertaken a thorough [investigation](#) into how Google, despite its denials and disavowals, manipulates search results to influence what you learn and find online.

For years Google executives have insisted that they do not use human intelligence to arrange the results of online searches. Yet, the Journal found that, â... Googleâ... s algorithms are subject to regular tinkering from executives and engineers who are trying to deliver relevant search results, while also pleasing a wide variety of powerful interests and driving its parent companyâ... s more than \$30 billion in annual profit.â...

The Journal also found that, â... Despite publicly denying doing so, Google keeps blacklists to remove certain sites or prevent others from surfacing in certain types of results.â...

The tech giant also influences search results through its auto-complete feature prior to searching the internet. â... In auto-complete, the feature that predicts search terms as the user types a query, Googleâ... s engineers

have created algorithms and blacklists to weed out more incendiary suggestions for controversial subjects, such as abortion or immigration, in effect filtering out inflammatory results on high-profile topics.â€¦

In response to the investigation, a Google spokeswoman, Ms. Levin, told the Journal, â€¦ We do today what we have done all along, provide relevant results from the most reliable sources available.â€¦

Google, which has more than 90% of the market share for online searches, is an extremely powerful company capable of controlling what people know and what they can learn online.

The Journal tested the word â€¦ abortionâ€¦ in Googleâ€¦ s search engine and compared the results to Bing and DuckDuckGoâ€¦ s results. According to the test, Planned Parenthood was featured in 39% of the results on the first page of Googleâ€¦ s results compared to 14% for Bing and 16% for DuckDuckGo.

Ms. Levin responded to the test by claiming that Google does not promote Planned Parenthood through its algorithm, but the available evidence suggests otherwise.

Google has also [been exposed](#) by a former staffer who spoke with the undercover investigative organization Project Veritas. The staffer, Zachary Vorhies, claimed that Google has a â€¦ news blacklistâ€¦ document which censors conservative websites such as LifeNews.com, Newsbusters and the Media Research Center.

According to one researcher, Google even has the power to influence the results of an election. Indeed, they have already done so.

Dr. Robert Epstein, Ph.D., a senior research psychologist at the American Institute for Behavioral Research and Technology, is one of the lonely voices that has been speaking out about Googleâ€¦ s manipulation of search results. Dr. Epsteinâ€¦ s research has focused particularly on the impact of Googleâ€¦ s search result manipulation on elections.

In a [testimony](#) before the Senate Judiciary Committee in June of 2019, Dr. Epstein claimed that, â€¦ In 2016, biased search results generated by Googleâ€¦ s search algorithm likely impacted undecided voters in a way that gave at least 2.6 million votes to Hillary Clinton (whom I supported).â€¦

Dr. Epstein also claimed that, â€¦ On Election Day in 2018, the â€¦ Go Voteâ€¦ reminder Google displayed on its home page gave one political party between 800,000 and 4.6 million more votes than it gave the other party. In other words, Googleâ€¦ s â€¦ Go Voteâ€¦ prompt was not a public service; it was a vote manipulation.â€¦

The evidence Dr. Epstein provides is disconcerting, though not surprising.

In a leaked video following the election of President Donald Trump in 2016, Google executives held a staff meeting in which they conveyed significant remorse about the election results.

In the [video](#), Google co-founder Sergey Brin states, â€¦ I know this is probably not the most joyous TGIF (weekly meeting) we have had. Letâ€¦ s face it, most people here are pretty upset and pretty sad because of the election.â€¦

Brin goes on to say, â€¦ Myself, as an immigrant and refugee, I certainly find this election deeply offensive and I know many of you do too. And I think itâ€¦ s a very stressful time, and it conflicts with many of our values.â€¦

In the same meeting, Google CFO Ruth Porat broke down in tears recounting Hillary Clintonâ€¦ s loss that Tuesday evening. After texting a friend who was at what would have been Clintonâ€¦ s election night victory

party, Porat said her friend responded, "People are leaving. Staff is crying. We're going to lose." With her voice trembling, Porat says, "Uh...! that was first moment I really felt like we were going to lose, and it was this massive kick in the gut that we were going to lose."

Numerous other examples of liberal bias among Google's top executive team was demonstrated in the video, and what's remarkable is that there is not a single moment of conservative opinion expressed. The support for Clinton and the sense of dread seemed to be unanimous.

It couldn't be clearer that Google is an enormously influential company run by an entirely liberal executive team. And the Journal's excellent investigative work further exposes their manipulative practices.

I think it's past time we consider whether using Google as our primary search engine, which most Americans do, is wise.

Google, Inc., isn't just the world's biggest purveyor of information; it is also the world's biggest censor.

The company maintains at least nine different blacklists that impact our lives, generally without input or authority from any outside advisory group, industry association or government agency. Google is not the only company suppressing content on the internet. Reddit has frequently been [accused](#) of banning postings on specific topics, and a [recent report](#) suggests that Facebook has been deleting conservative news stories from its newsfeed, a practice that might have a significant effect on public opinion—even on voting. Google, though, is currently the biggest bully on the block.

When Google's employees or algorithms decide to block our access to information about a news item, political candidate or business, opinions and votes can shift, reputations can be ruined and businesses can crash and burn. Because online censorship is entirely unregulated at the moment, victims have little or no recourse when they have been harmed. Eventually, authorities will almost certainly have to step in, just as they did when [credit bureaus](#) were regulated in 1970. The alternative would be to allow a large corporation to wield an especially destructive kind of power that should be exercised with great restraint and should belong only to the public: the power to shame or exclude.

If Google were just another mom-and-pop shop with a sign saying "we reserve the right to refuse service to anyone," that would be one thing. But as the golden gateway to all knowledge, Google has rapidly become an essential in people's lives—nearly as essential as air or water. We don't let public utilities make arbitrary and secretive decisions about denying people services; we shouldn't let Google do so either.

The Elon Musk Story

By Donna King

Elon Musk is a political money laundering operation. Lapdog hired media shills, that are bribed by Musk's cartel, write hype and fluff about him, (like Douglas Coupland, Ashley Vance and other lying pigs-for-hire). Those PR cover-up weasels need to crawl back to their holes.

SpaceX only exists because NASA budget cuts were timed with SpaceX contract outlays. A huge number of NASA staff were fired, and programs cut, the same time that NASA work for the same exact functions were contracted to SpaceX to pay the Musk Cartel for putting Obama and Biden in office. The billionaires that benefit from SpaceX are the financiers of Obama/Biden. Google and the Silicon Valley Oligarchs are the biggest portion of the Musk Cartel. Google was the biggest staffing source of the Obama White House.

SpaceX is simply a crony political payola scam. If you look at the voter registration of the GAO investigators on the case, 80% of them are Obama/Biden supporters.

100% of Musk's government funds have been voted in or approved by government staff who voted for Obama/Biden. Obama/Biden staff have given the Musk Cartel more billions of dollars than any other person in history and the Musk/Google Cartel have made more exclusive profits from financing Obama/Biden political campaigns than any other lobby group in history.

When you peek behind the curtain in the magical fantasy technology world of Elon Musk you find that the entire emerald utopia is built out of bribes, payola and crony tech Illuminati stock market manipulations. Elon Muskâ... s â... wizardryâ... is 20% other peopleâ... s stolen technologies and 80% bullshit! He has purchased his internet PR facade with billions of dollars of the taxpayerâ... s cash and keeps his self aggrandizing front going with extensive contracted off-shore troll farms and stock market â... flash boyâ... algorithm computer hype engines.

Any tech person could do every single thing that Elon Musk has done with ONE THIRD LESS cash than Elon Musk has plowed through. So where does the rest of the money go?

It goes to political candidates in quid pro quo money laundering Dark Money conduits!

Taxpayer money taken by Tesla Motors, which politicians own interest in and also get secret PAC money from:

\$3B-CA Factory Subsidy
\$1.3B-NV tax incentive
\$45M-Discounted DOE Loan
\$90M-CA Alternative energy advanced trans. financing authority
\$517.2M-Sale of CA and other regulatory credits
\$284M-Federal income Tax credits for consumers of Model S Sedan
\$38M-CA rebate for CA buyers of Model S Sedan
\$126M-CA Self Generation incentive program
\$647,626-CA job training reimbursement
Total Subsidy=\$5,355,847,626 BILLION AND COUNTING

Taxpayer money taken by Elon Musk via SolarCity, which politicians own interest in and also get secret PAC money from:

\$750M-NY State cost to build solar panel factory
\$150M- to start NY Factory Operation
\$1.5B-Est. value of 30% subsidy for solar installation since 2006, including at least \$497M- in Treasury grants
\$5.6M-OR tax credits & rebates
\$260M- NY local property tax exemptions
Total Subsidy=\$3,163,100,000 BILLION AND COUNTING

Taxpayer money taken by Elon Musk via SpaceX, which politicians own interest in and also get secret PAC money from:

\$20M- TX state & local incentives & rebates for space launch facility near Brownsville
\$5.5Bâ... Government Contracts
\$1.6B- NASA space taxi contract
Total Subsidy= \$7,120,000,000 BILLION AND COUNTING

Know that everything you have seen in the main stream news media about Elon Musk was bought and placed there by Elon Musk. Elon Musk is a figment of his own propaganda, Chinese click farms, his hired troll â... fan boysâ... and his sociopathy.

Musk has gotten billions of dollars of City, State And Federal Cash and exclusive tax breaks which reduce taxpayer funds for teachers and firemen. He gets taxpayer market space worth hundreds of billions of dollars too. In other words Steven Chu and the Obama White House gave Musk all the stock market valuation perks and cash to monopolize the EV market. They gave this set of perks exclusively to Musk while sabotaging his competitors at the same time. Dept of Energy and White House staff were ALSO shareholders in the Musk Cartel. Bloggers a fake â... reportersâ... that â... reportâ... that Musk â... hardly got any government helpâ... and â... paid it all backâ... are FULL FLEDGED LYING SHILLS! Musk has harmed the public, democracy, free markets and hundreds of competitors while pocketing billions of dollars that he only got because of taxpayer cash manipulations. He didnâ... t not earn that money, he took that money from crooked political deals and bribes paid to White House staff, California Senators and Dept of Energy bosses! Tesla spends [\\$1 million](#) annually on Washington lobbyists. Its cars are financed by over \$280 million in federal tax incentives, including a \$7,500 federal tax break and millions more in state rebates and development fees. SpaceX has also received [over \\$5 billion](#) in government support. It has over promised and under delivered. SpaceX rockets, for example, are far less reliable than many of its competitors. This is outlined in reports from December 2017 and January 2018 in which the [Department of Defense Inspector General](#) and [NASA's Aerospace Safety Advisory Council](#) described a list of security concerns they have with SpaceX, among them 33 significant non-conformities.

Bloomberg Business News [reported](#) in November about a Tesla solar factory for which the State of New York paid \$750 million based on a commitment to create 1,500 jobs. The factory had been developed for another Musk-run company, SolarCity, which Tesla bought in 2016 in a \$2.6 billion deal. SolarCity had been \$2.9 billion in debt. Only a relative handful of jobs have been created, and New York officials are expressing dismay. Raymond Walter, a Republican in the New York State Assembly, says he is concerned that the state "has too many eggs in the Tesla basket, which doesn't seem like a very strong basket." John Kaehny, executive director of Reinvent Albany, a nonprofit focused on government accountability, says, "It's a complete hoo-ha! These mega-subsidy deals take place in complete secrecy without scrutiny from the public."

Bloomberg News [declares](#) that this is "...a familiar playbook for Musk, start with wild promises followed by product delays, production hell, shareholder anger and finally, hopefully, redemption."

Things, however, may be even worse than they appear. Some are even speculating that Elon Musk, SpaceX and Tesla may be on their way to becoming the new Enron. Enron, the energy giant, employed [approximately](#)

[20,000 people](#) and claimed [revenues of \\$111 billion](#) at its peak by 2000. As it turned out, Enron used shady accounting practices to hide its losses and report profits which, in fact, did not exist. Andrew Fastow, the chief financial officer, created the scheme to falsify Enron's real financial status. In April 2001, the fraud began to unravel as analysts began to question Enron's numbers. In the end, Enron was found to have [losses](#) of \$591 million and debt totaling \$628 million. Stock prices [declined](#) from \$90 in 2000 to less than one dollar when the scandal was exposed. Senior managers, who kept selling their stock while encouraging others to continue buying, were convicted of insider trading. In December 2001, the company declared bankruptcy.

In the view of many, Elon Musk has been engaging in similar behavior. A Bloomberg report in November suggests that SpaceX may be less than honest with its numbers, giving a false illusion of profitability. According to [Bloomberg](#), "While SpaceX is burning through cash, disclosures to potential lenders showed the company had positive earnings before interest, taxes, depreciation and amortization of about \$270 million for the 12 months through September, people with knowledge of the matter said. But that's because it included amounts that customers had prepaid and because it excluded costs related to non-core research and development...Without those adjustments, earnings were negative, they said.â€¦

According to [Bloomberg](#), "This shouldn't come as a shock. A Wall Street Journal report from a few years ago showed that its profit margins were laser-thin. But if Musk is now going to these lengths to pad SpaceX's books to secure a loan, it appears there's a serious problem."

In the case of Tesla, the Wall Street Journal [reports](#) that, "Federal investigators are probing whether Tesla's stated information about production of its Model 3 electric sedans had misled investors about the company's business. Under examination is Tesla's public statements about Model 3 productions as compared to the number of vehicles that were actually built."

Elon Musk and his companies have a very questionable record when it comes to truth and honesty. Overstating prices to qualify for higher state tax credits seems to fit a pattern. According to a recent [report](#) in The Oregonian/Oregon Live, "The state of Oregon has recovered \$13 million it paid to Tesla for solar power projects, after an investigation conclude the company inflated prices to qualify for higher tax credits."

Whatever the potential benefits of such a system, one of the disastrous consequences would be [light pollution](#). As they traveled across the skies, thousands of Starlink satellites would effectively make [astronomical images useless](#) by leaving long [luminous trails](#). At the March 9 â€¦ Satellite 2020â€¦ conference [keynote speech](#), Elon Musk dismissed those worries and claimed that his satellites will do no harm to astronomical research â€¦ if need be, they will be painted black. This idea was tested with satellite 1130, â€¦ DarkSatâ€¦. The results were [unconvincing, to say the least](#). The next generation is supposed to be [less luminous than the faintest stars that can be seen with the unaided eye](#), but this is still far too bright for astronomersâ€¦ ultra-sensitive instruments, which can observe stellar objects [four billion times fainter than that threshold](#). Why did you hide, or avoid, these widely covered facts unless you are a lying shill?

The low Earth orbit region is already heavily used by scientific, remote-sensing and telecom satellites as well as the International Space Station (ISS). A large-scale increase in the number of satellites would increase the risk of [space collisions](#) and the ensuing [multiplication of debris](#) â€¦ in the worst-case scenario, it could render the LEO and near-space environment unusable. The first incident already took place: on September 2, 2019, the European Space Agency was forced to [move away one of its Earth observation satellites](#) to avoid a collision after [Starlink refused to change the path of its satellite](#). Elon Musk asserts that all the satellites be equipped with thrusters to make them fall back on Earth once they reach the end of their active life, but that doesnâ€¦ t reduce the risk while theyâ€¦ re operational. Why would you hide these facts unless you are a Musk tool.

Since the first launch, [six Starlink satellites have already failed](#). If a mere 5% of Starlinkâ€¦ s satellites broke down during their estimated lifespan of five to seven years, they would add many thousands of fragments of

space debris to the [20,000 already under surveillance](#).

Musk initially planned to put a quarter of his constellation at the altitude of 1,110 km (690 miles). [Seventy-five percent were due to be placed no higher than 600 km](#) (370 miles). Below this altitude, residual atmospheric drag will eventually cause a failed satellite to fall out of orbit. On April 17, 2020, SpaceX modified its plans and [requested permission](#) for all its satellites to orbit lower than 600 km. This reduces the risk of broken-down satellite staying in high-earth orbit for centuries, but increases congestion in the low Earth orbit region.

Beyond the operational risks, building, launching and maintaining such a gigantic network of satellites would require an enormous amount of raw materials and energy. Unlike the geostationary satellites commonly used by telecoms, Starlink satellites will stay in a low Earth orbit and cross the visible sky of a given location for just a few minutes. To follow and connect to them, buyers will have to use purpose-built [phased array antennas](#). To make them affordable, they would have to be mass produced, and SpaceX has asked permission for [1 million of them](#). For starters. Why did you avoid discussing the obvious megalomania of Muskâ... s scheme?

On March 9, 2020, Elon Musk [claimed](#) that thanks to Starlink, anybody â... will be able to watch high-def movies, play video games and do all the things they want to do without noticing speedâ... . Thus, Musk explicitly underlines his wish to reinforce already massively energy-guzzling digital activities, such as video streaming and online video games. These consume just below the whole electricity consumption of Europe (if you want figures, the world digital energy consumption of [3,834 TWh](#) expected in 2020 is comparable to the [4,077 TWh](#) for European electricity in 2018). Their [share of world greenhouse gas emissions is already 4% and could double to 8% by 2025](#).

Muskâ... s declaration ends on an ominous note, in essence saying â... My clients will be able to do whatever they want, just as I am able to do whatever I wantâ... . Why donâ... t you discuss Muskâ... s overt bribery of federal officials that he pays at NHTSA, DOE, FCC, SEC and other agencies, to avoid regulation?

Why do you also ignore the following assertions?

"...Elon Musk (Along with his Silicon Valley Cartel bromance frat boy buddies Eric Schmidt and Larry Page, et al) is a mobster-class criminal sociopath who hired business assassins to attack us and operated anti-trust and RICO law violating competitor "kill programs". He used his windfall of taxpayer funded cash and Goldman Sachs assisted stock market manipulations and intelligence agency staff and tools from In-Q-Tel and Google to engage in these crimes. We have demanded that the FBI arrest him and that the SEC, FTC and NHTSA prosecute him. We will make certain that his legacy, for the rest of time, reveals the true facts about his crimes and political manipulations..."

Per his own staff, ex-wives, partners, ex-founders, suppliers, FBI, SEC, Congress and private investigators. These are all statements from court reports, investigations, FBI submissions and Congressional reports. Each numbered statement is associated with a numbered witness report containing the evidence for the statement. Please pass this report around and post it on Tesla windshields. We demand a hearing, with Musk on-site, on a live Senate televised and webcast investigation hearing in Congress to go over each of these points.

Nobody On Earth Can Launder And Hide Illicit Cash Like Elon Musk. Heâ... s worth an estimated \$39 billion, but has repeatedly said heâ... s poor. He is a scumbag liar and a crook!

In one of a series of wild tweets posted last week, [Elon Musk stated](#) he would be â... selling almost all physical possessionsâ... and that he would â... own no house.â... He appears to be actually following through with that promise, as chronicled in a great story [in The Wall Street Journal](#) about Muskâ... s personal finances that you should go read.

According to the WSJ, despite being worth an estimated \$39 billion on paper:

...he has to borrow, sometimes a lot, to pay for his lifestyle and business investments without liquidating shares that help him maintain control of the companies he runs. About half his Tesla stock is pledged as collateral for personal loans, an April 28 financial filing shows. Maintaining his equity stake... about 20%, or around \$29 billion at its current valuation... is important for him to keep control over the Silicon Valley auto maker.

Musk also doesn't take a salary at Tesla, but he apparently became eligible for stock options worth more than \$1 billion this week. To get that money, he will need an eye-watering \$592 million to exercise the option, according to the WSJ. It's not clear if Musk has the money on hand to exercise that option or if the money raised from the house sales will be used to help pay for the sum. Mr. Musk said he wasn't selling his possessions because he needs the money, the WSJ reported.

The article also lists a few times Musk has said he's cash poor. Here's one example:

Before Tesla went public, Mr. Musk told a judge during a contentious divorce with his first wife that he had run out of cash and had taken on emergency loans from friends to support his family and pay living expenses.

Here's another:

Last year, Mr. Musk's ability to access cash came up again during a defamation lawsuit over comments he made about a man involved in the rescue of a Thai soccer team from a flooded cave in 2018. A lawyer in the case said in a filing that Mr. Musk had described himself as... financially illiquid...

The whole article has a lot of history about Musk, interesting information about his finances backed up by regulatory filings, and numerous quotes from Musk himself, and I sincerely recommend taking 10 minutes [to read it in full](#).

Musk has Goldman Sachs, Welles Fargo and Wilson Sonsini Mobster-Class executive bankers hide his money in a rabbit warren of HUNDREDS of trusts, shell corporations and fake charities from South Dakota, to Switzerland to the Cayman Islands to Russia.

A federal investigation to show the tentacular diagram of scams has been demanded!

FBI, SEC, FTC and citizen forensic investigators are hot on his trail, though!

These are the illicit things that sociopath narcissist Musk has engaged in with the taxpayer cash he mooched from government treasuries:

1. PRIVATE INVESTIGATORS HAVE PRODUCED REPORTS ON THE ELON MUSK AND TESLA MOTORS FRAUD, STOCK RIGGING, BRIBERY AND SAFETY INVESTIGATIONS that Musk's Silicon Valley Sandhill Road venture capitalists cover-up.
2. Musk hides his money in illicit and false-front real-estate scams to avoid taxes and to launder money.
3. "His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising".
4. "His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising".
5. "His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth

Rising".

6. "He tries to bury his ill-gotten money from the taxpayers in gobs of real estate acquisitions and houses including his notorious purchase of the Vaughn DeGuigne Court mansion at 891 Crystal Springs Road, in Burlingame, California which is staged for his kinky sex parties and Illuminati-like cartel get-togethers..."
7. "His is not faithful to his girlfriends. Some of them are Ghislane Maxwell-type enablers, too, just to hang around his money and promote his sex schemes like Maxwell did for Epstein"
8. "The workers that build his batteries die or sicken from toxic poisoning and Musk tries to hide his dirty factories overseas"
9. "Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"
10. "He is addicted to drugs and booze"
11. "He has 'sociopath-class' mental issues and he is a narcissist..."
12. "Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."
13. "It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world! Tesla's have been hacked and remotely crashed, the drivers killed and Tesla covers this up..."
14. "His partner: Steve Juvetson, has been charged with sex and corruption issues"
15. "He arranged government kick-backs with the White House"
16. His entire current existence is based on stock market scams created with taxpayer dollars and Goldman Sachs securities manipulations
17. "He is the world's biggest government mooch and has taken more taxpayer cash than anyone in U.S. History as a billionaire who does not need a hand-out"
18. "He is a member of the Palo Alto Tech Mafia operated by Stanford University gay frat house guys"
19. "Google (who is a major Tesla investor) hides all negative Musk/Tesla news in digital media globally and hypes TSLA stock in order to profiteer with Tesla stock. This is a violation of federal SEC laws"
20. "More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"
21. "Google boss Larry Page is Musk's 'bromance' boyfriend buddy and he uses Google to cover-up Musk's scandals"
22. "His so-called 'foundation' is just a payola and tax evasion scam for his family. It is a charity scam"
23. "His batteries are the most dangerous use of lithium ion storage ever conceived"
24. "His partner: Panasonic, has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"
25. "Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him. Musk has over 1000 click-farm and Russian troll bloggers under his employ via various false-front cover organization contractors."
26. "The drug and murder-for-hire website: Silk Road, was built at drug-enthusiast Musk's company SpaceX by Musk's programmer and Musk hires many people from a group called: In-Q-Tel, who were caught with tons of cocaine on their airplanes in a DEA raid"
27. "His SpaceX is nothing more than a domestic spy satellite company"
28. In-Q-Tel supplies a number of Musk's staff, yet In-Q-Tel has been accused of numerous criminal ventures and abuses of the public.
29. You never hear about these crimes because Musk's buddies in Silicon Valley control 90% of the global media these days and they censor any bad news about Musk in order to protect their Cartel.
30. "Musk's brain chip company tortures monkey's and other small animals in bad science experiments"
31. "His father screwed his daughter and got her pregnant. His father seems to be a pedophile and incest participant"
32. "Dianne Feinstein and her family covertly own many Musk interests and arranged for him to get his funds from the taxpayers. She helped sabotage his competitors in her district"
33. "You can't put out the fires when his batteries explode say fireman because Lithium fires are military class thermo-dynamics"

34. "The fumes from his lithium ion thermal battery vapors give you cancer, lung and brain damage"
35. Psychologists say that Musk is a self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype addict.
36. Many of us know these facts from personal interaction with Musk, his companies and his politicians.
37. Everything in these reports can be proven in a jury trial, Congressional hearings or live TV debates but Musk would rather die than face uncontrolled public scrutiny.
38. Musk will do anything to keep this information from getting out, including hiring attack services like his Fusion GPS, Black Cube, Gawker and Gizmodo Kill services.
39. While Musk's dirty deeds sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.
40. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool.
41. When you follow-the-money and the insider trading, stock ownership and crony payola kick-backs. The payola between Musk, his scummy cronies and the politicians is proven.
42. The Musk empire pays bribes in billions of dollars of Google (Where Musk's boy buddy Larry Page works), Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC
43. The Musk empire pays bribes in billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC
44. The Musk empire pays bribes in free rent
45. The Musk empire pays bribes in Male and female prostitutes
46. The Musk empire pays bribes in cars
47. The Musk empire pays bribes in dinners at fancy restaurants
48. The Musk empire pays bribes in socialite party financing
49. The Musk empire pays bribes in Sports Event Tickets
50. The Musk empire pays bribes in Political campaign printing and mailing services "Donations"
51. The Musk empire pays bribes in Secret PAC Financing. Musk's empire is a massive political financing conduit for the DNC politicians via a tentacular array of covert shell corporations, trusts, 501C's and stock bribes.
52. The Musk empire pays bribes in Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Manage Bribes
53. The Musk empire pays bribes in "Consulting" contracts from McKinsey Consulting as fronted pay-off gigs
54. The Musk empire pays bribes in Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors
55. The Musk empire pays bribes in Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff)
56. The Musk empire pays bribes in commercial Real Estate
57. The Musk empire pays bribes in Fake mortgages
58. The Musk empire pays bribes in The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts and The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts
59. The Musk empire pays bribes in Free spam and bulk mailing services owned by Silicon Valley corporations
60. The Musk empire pays bribes in the use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials
61. The U.S. Energy Dept (DOE) has been covering-up organized political crime activities in which government funds are being used as a slush-fund to pay off political campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors via Musk political conduits.
62. Political campaign financiers and government agency staff share stock market holdings with each

- other under family trusts, shell corporations and layered Goldman Sachs accounts.
63. The basic Musk scam-deal goes like this: "Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks..."
 64. Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.
 65. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: "child labor electric car batteries..."
 66. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself.
 67. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so.
 68. Musk is insecure because his father was abusive and his trophy wife... Mother is overbearing so he developed sociopath-like mental issues.
 69. Musk has been professionally diagnosed as a 'psychotic narcissist'.
 70. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.
 71. Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him.
 72. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance buddy... They share an apartment.
 73. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading.
 74. His brother ran Solar City and is now under federal investigation for securities fraud.
 75. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.
 76. Extremist politicians and their controlled news outlets refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.
 77. Investor oligarch's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.
 78. Peter Thiel, a Musk boyfriend... also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: Musk, Tesla or Tesla Fire... They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk.
 79. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills.
 80. There are no Tesla Fan Boys... All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a Tesla Fan Boy... on blogs.
 81. The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.
 82. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.
 83. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.
 84. Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!
 85. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.
 86. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts

in a Tesla.

87. Musk can't fix a car or build a rocket and has almost no mechanical skills he can't build or work on any of the things he made himself famous for.
88. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!
89. Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18+ men who rig stocks and valuation bumps for Musk.
90. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing!
91. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla!
92. All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI by those who supplied this information but Musk has yet to be arrested because crooked California politicians, who own his stock, protect him from arrest.
93. Why aren't all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.
94. Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners.
95. When you take a look at the lithium in Musk's horribly miss-engineered lithium ion batteries you will uncover horrible crimes engaged in to acquire it.
96. His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt.
97. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu.
98. Lithium ion batteries excrete chemicals that mutate fetuses when they burn and destroy your brain, lungs and nervous system when they burn
99. Musk's batteries kill the factory workers who make them
100. Musk's batteries cause Panasonic to be one of the most corrupt companies in the world
101. Musk's batteries poison the Earth when disposed of
102. Musk's batteries can't be extinguished by firemen
103. Musk's batteries poison firemen when they burn
104. Musk's batteries are based on criminally corrupt mining schemes like URANIUM ONE
105. Musk's batteries have over 61 toxic chemicals in them
106. Musk's batteries come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy
107. Musk's batteries and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.
108. Apple products with lithium ion batteries have been exploding and setting people on fire.
109. Over time the chemical dendrites, or deposits, inside each Musk battery grow worse and increase the chances of explosion as they age -
110. Musk's LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up.
111. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly filling up with toxic smoke as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

112. "Bad Guys" have figured out how to make them explode remotely in devices by making the device electronics cause the batteries to overload.
113. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.
114. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging
115. United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.
116. Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal â... reportâ... from USAID that said there was â... A TRILLION DOLLARS OF LITHIUM IN AFGHANISTANâ... and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.
117. Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.
118. Tesla Motors has caused far more deaths and injuries than the world generally knows about.
119. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him.
120. In Florida two kids died in a Tesla, burned alive, screaming in agony.
121. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.
122. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.
123. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.
124. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.
125. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out.
126. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.
127. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk.
128. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.
129. The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.
130. The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".
131. Musk's "cabin boy": Jared Birchell, runs around covering up Musk crimes all day
132. Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose!

Google and Musk are partners-in-crime.

133. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws.
134. Musk has exceeded FEC campaign finance limits by billions of dollars via â... in-kindâ... services.
135. Reports at <https://www.propublica.org> prove some of these assertions
136. Reports at <https://www.transparency.org> prove some of these assertions
137. Reports at <https://www.icij.org> prove some of these assertions
138. Reports at <http://londonworldwide.com> prove some of these assertions
139. Reports at <https://stopelonfromfailingagain.com> prove some of these assertions
140. Reports at <https://www.zerohedge.com/news/2019-02-24/tesla-slams-tree-florida-bursting-flames-and-killing-driver> prove some of these assertions
141. Reports at [Elon Musk is a total fraud - nypost.com](#) prove some of these assertions
142. Reports at [Elon Musk is a total fraud: Truth about Tesla billionaire exposed](#) prove some of these assertions
143. Reports at [Elon Musk Passes the Hat Again on Capitol Hillâ...! And in China](#) prove some of these assertions
144. Reports at [About Elon Musk - A WASHINGTON DC ORGANIZED CRIME](#) prove some of these assertions
145. Reports at [Mark Spiegel: Elon Musk is 'a pathological liar'](#) prove some of these assertions
146. Reports at <https://nationalnewsnetwork.net/> prove some of these assertions
147. Reports at <http://www.videonet11.com> prove some of these assertions
148. MUSK'S SPACEX COMPANY Will have all of it's satellites destroyed in moments as soon as China gets pissed off:
<https://www.japantimes.co.jp/news/2019/02/12/asia-pacific/chinas-space-debris-cleanup-may-cover-story-arm>
149. WE HAVE ASKED THE FBI, DOJ, OSC, SEC, FTC, GAO, U.S. CONGRESS, AND OTHERS, TO INVESTIGATE AND PROSECUTE MUSK AND HIS CRONY OPERATION!
150. ELON MUSK'S PAID-FOR MEDIA SHILLS COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times, etc.
151. We saw Elon Musk commit crimes and we saw the Obama White House cover-up those crimes. We, and our associates, worked for Bright Automotive, Zap Electric, Aptera, Eco Motors, XPV, The United States Department of Energy and the federal Office of Management and Budget and Tesla Motors itself. Americans have an expectation that their tax dollars will be used in a fair and legal manner and not to pay off crony campaign financiers like Elon Musk.
152. Americans have an expectation that fair market competition will decide which companies get to live or die and that no campaign financiers gets to order the White House to produce the death or success decision about any American business. Elon Musk's operation exists entirely because of criminal corruption and all of his companies must be shut down by federal law enforcement.
153. For nearly a decade, the U.S. Department of Energy has refused to comply with Freedom of Information Act (FOIA) requests for copies of Tesla Motors entire D.O.E. funding application documents. Former D.O.E. employees have shredded copies of those documents in order to keep them from being exposed to the public and the media. Why would they do that? Because those documents reveal felony criminal fraud by Tesla Motors, federal violations of the Section 136 law requirements and manipulations of the â... hard-wiringâ... of the entire D.O.E. program. Those documents, which we have seen (and some Senate staff have private copies of) prove that, in a side-by-side comparison with all other applicants, the Tesla application was manipulation, rigged, false-reviewed and crony-advanced in order to pay-off certain campaign financiers and damage their competitors.
154. Demand that the U.S. Department of Energy stop breaking the law and comply with the FOIA

- requests to stop hiding the incriminating evidence in the Tesla files. Demand that the public be shown the original paper and not the later, â... doctoredâ... versions.
155. We saw Elon Musk operate an entirely illegal and unethical program based on State and Federal corruption. We told this, in writing and in person to the U.S. Attorney General: Eric Holder, who then quit his job after we reported these facts to him.
 156. We reported that Elon Musk lied about vast number of dangers of the lithium ion chemistry he was using. Nothing was done.
 157. We reported that our associates at the Department of Energy were having their safety reports on lithium ion danger suppressed. Nothing was done.
 158. We reported that Elon Muskâ... s credit rating and financial records were fraudulent and amounted to â... cooking the booksâ... . Nothing was done.
 159. We reported bribes paid by Muskâ... s lobbyists and associated to government officials in order to grease the skids for his crony payola. Nothing was done.
 160. We reported that Goldman Sachs and Tesla Motors were operating a stock fraud pump-and-dump scam to manipulate Elon Muskâ... s stock holdings. Nothing was done.
 161. We reported over a hundred illegal and corrupt actions by Elon Musk and his mob of Silicon Valley gangsters. Nothing was done.
 162. If you have an ounce of morality, then you will not want to help Musk & Tesla profit from the crony political corruption that created them. Musk exists because he bribes politicians & acts as an illegal campaign financing conduit.
 163. DOT/NHTSA has covered up years of reports about an acceleration surge issue that can suddenly crash your Tesla into walls and drive it off cliffs. It is either a known hacking attack or the effect of WiFi on Tesla electronics. Either can kill you.
 164. Musk & Tesla are pure evil & exist because of hyper-corruption. You donâ... t want to contribute to their evil or be part of it in any way. You are funding evil & supporting criminal corruption by buying a Tesla or any Elon Musk owned product like Solar City, Tesla, Space X, Hyperloop, etc.!
 165. Elon Musk spent more money, than any other car company in history, to do the exact same things that any other car has done, or could do, for 20 times less money. Muskâ... s Tesla was \$100,000.00 over budget, per car, at the time that Musk was handed his crony Dept. of Energy froms by Steven Chu. Musk has no clue how to operate a car company.
 166. In one lawsuit it is noted that: â... ..Plaintiff and Tesla both applied for funds at the same time, in the same funding cycle in the same program. Tesla had the historically epic number of horrific issues listed below, which were known to DOE at the time of application, and Plaintiffs had NONE of these issues. How can any court, or rational person, believe that Plaintiffs were not intentionally bypassed, targeted and damaged for political reasons while Tesla was simultaneously approved for political reasons, when the comparative metrics between the two applicants prove the largest merit disparity in the entire recorded history of the U.S. Department of Energyâ...!the singular, and only, review criteria used by Department of Energy officials was: **WHICH ONE BRIBED THE CAMPAIGN FINANCE GROUP FOR BARACK OBAMA?!**"; Thus proving that Tesla exists because of organized-crime level political corruption.
 167. Elon Muskâ... s self-driving â... autopilotâ... feature, which keeps crashing and failing, is his attempt to scam taxpayer cash from Dept. of Transportation and Dept. of Energy public funds. He is only trying to do it to get more free federal cash.
 168. The inventor of lithium ion batteries has confessed that lithium ion batteries blow up eventually. He says that deadly dendrites plague lithium-ion battery technology. The dendrites accumulate as part of the standard charging and recharging cycle and eventually cause a short circuit that often results in a smoldering or burning battery. These dendrites are destined to eventually blow up most Tesla cars and many electronic devices using lithium ion!
 169. The CIAâ... s software designed to take over any Tesla on Earth and kill the driver, passengers and bystanders has been released in the wild and every hacker on Earth can now easily get a copy of it and kill you in your Tesla!
 170. Ex-employees have leaked faked financial records, evidence of massive click-farm fake social media

manipulation and evidence of unreported deaths and accidents. They say that most Tesla's have one kind of defect or another.

171. If you read about the dirty deeds and cocaine dealings with the In-Q-Tel airplanes called 'Cocaine 1' & 'Cocaine 2', & the corruption behind the company called In-Q-Tel & Musk's software programmer who ran 'The Silk Road' drug & murder service then you must be concerned that many In-Q-Tel people work for Musk. Why does Musk need dirty druggies & spies on his payroll unless he is running covert drug and business spying activities?
172. Ex-employees, Gawker writers and gay lawyers from Covington & Burling have leaked stories that Elon Musk, Reid Hoffman, Larry Page are 'butt buddies'.
173. Musk is anti-American and Anti-Worker Rights and has been caught flying in H1-B cheap offshore labor and exploiting immigrants for his deadly profits. Musk hates unions and worker rights efforts.
174. Elon Musk gets the Cobalt chemical to make his lithium ion batteries from slave trade and blood-money corruption in the Congo!
175. The lithium ion batteries that Musk uses also blow up when they naturally encounter Low Energy Nuclear (LENR) effects in the ambient environment. Millions of chemicals don't blow up from LENR but lithium ion does!
176. If you are a Democrat then know that Elon Musk cost you the Hillary Clinton campaign because of his payola schemes. If you are a Republican, know that Elon Musk is the epitome of the worst form of DNC crony corruption you ever saw!
177. Musk bribed California politicians to give him hundreds of millions of dollars of taxpayer dollars & resources he never earned or worked for. He only got those crony payola perks handed to him because he operated as an illicit front for corrupt campaign financing for Dianne Feinstein, Jerry Brown, Harry Reid, Barack Obama and Hillary Clinton.
178. Multiple parties have filed 'Demands For The Arrest of Elon Musk' with the FBI, DOJ, AG, FTC, SEC and other law enforcement agencies. It is not likely that Musk, or his companies will survive a full investigation.
179. Tesla and Solyndra sit on the same land in Fremont, CA. Solyndra was raided by the FBI for corruption. Tesla SHOULD be raided by the FBI for corruption. Both companies had kick-back crony payola schemes with Senator Dianne Feinstein. She owned the land, lease, HR, construction company and supplier interests and stock for both companies in one of the most massive conflict-of-interest crony financing schemes in U.S. history. Elon Musk and the Feinsteins are corruption partners.
180. People who see you in a Tesla think of you as a 'Tone Deaf Douchebag', 'Tesla Tool!', 'Arrogant Prick', 'Ostentatious Obama Oaf', 'Sheep', 'Mindless Yuppie Scum', 'Misogynistic Silicon Valley Clone', 'Self-promoting Elitist Douche', 'Fake News Reading Main Stream Boob', 'Naive Idiot' or other bad things.
181. Elon Musk is one of the main financiers behind Barack Obama & Hillary Clinton, both of whom have been charged with corruption. Musk endlessly tweets lies & '...No I didn't do those bad things' BS but nobody else supports him.
182. Tesla financial records are 'cooked' in a fraudulent manner to make the stock market valuation of Tesla a falsely manipulated factor. Musk uses 'pre-orders', by his own investors, to fake sales and wrote emails to customers asking them to put small deposits down so he could book them as fully paid sales in one of a large number of stock and loan valuation frauds. Musk and his investors practice stock market skims, pump-and-dumps and Flash Boy manipulations.
183. Lithium ion batteries are blowing up, starting fires &, generally, destroying people's homes, cars, electronics & physical health. Boeing was ordered to stop flying the 787 Dreamliner because it's Lithium ion batteries are catching fire spontaneously. A group of silicon valley venture capitalists forced/leveraged the government to buy & pay for these specific batteries, that they have stock in, in order to benefit their profit margins. Other batteries don't have these problems. They knew about the dangers from day one, but put greed ahead of safety. There are thousands & thousands of reports of spontaneous lithium ion fires but the VC's who back lithium ion pay to keep this information hushed up. Millions of these batteries have been recalled for fire risk. The VC's tried to push as many as they could before they got caught. Now they are caught. These VC's & the Senators they bribed

own stock in lithium mining companies too.

184. Tesla Motors has filed a patent which states the following , THESE ARE TESLA MOTORS WORDS warning about a crisis, the level of which they never disclosed to the consumer: "... Thermal runaway is of major concern since a single incident can lead to significant property damage &, in some circumstances, bodily harm or loss of life. When a battery undergoes thermal runaway, it typically emits a large quantity of smoke, jets of flaming liquid electrolyte, & sufficient heat to lead to the combustion & destruction of materials in close proximity to the cell. If the cell undergoing thermal runaway is surrounded by one or more additional cells as is typical in a battery pack, then a single thermal runaway event can quickly lead to the thermal runaway of multiple cells which, in turn, can lead to much more extensive collateral damage. Regardless of whether a single cell or multiple cells are undergoing this phenomenon, if the initial fire is not extinguished immediately, subsequent fires may be caused that dramatically expand the degree of property damage. For example, the thermal runaway of a battery within an unattended laptop will likely result in not only the destruction of the laptop, but also at least partial destruction of its surroundings, e.g., home, office, car, laboratory, etc. If the laptop is on-board an aircraft, for example within the cargo hold or a luggage compartment, the ensuing smoke & fire may lead to an emergency landing or, under more dire conditions, a crash landing. Similarly, the thermal runaway of one or more batteries within the battery pack of a hybrid or electric vehicle may destroy not only the car, but may lead to a car wreck if the car is being driven or the destruction of its surroundings if the car is parked..." See <http://whoiselonmusk.com> for more...
185. Tesla's own staff, & every fire department, have now admitted that once a lithium ion fire gets started in a Tesla, that it is impossible to extinguish burning lithium ion material. This is Tesla's own words in THEIR patent filing, (You can look it up online) saying that the risk is monumental. Tesla has 6800 lithium ion batteries, any one of which can "... go thermal...", start a chain reaction and blow up all of the rest of the 6800+ deadly batteries! Tesla drivers have been burned alive in thermal globs of flaming lithium ion, plastics & metal. Bystanders have heard their horrific screams of unutterable pain & terror as they were burned alive! Tesla fires cannot be extinguished & the bodies are burned into "... unrecognizable lumps of charred flesh...", according to fireman.
186. Lithium Ion batteries "... go thermal..." in peoples pockets, in your notebook, especially in a Tesla & Fisker car. There are tens of thousands of articles documenting this & there is a cover-up by the VC's that fund these things to keep this fact out-of-sight. Making Lithium Ion batteries poisons the workers who make them. It is a dangerous product that is covered-up by the Obama Administration. Panasonic knows that these batteries are deadly.
187. Tesla only exists to exploit Elon Musk's bribes. The lithium ion batteries blow up when they get: wet, hot, bumped, over-charged, struck by energy fields, exposed to air or squashed. Lithium ion batteries poison the Earth & that they poison & kill the workers that make them. Lithium ion batteries come from war profiteering in Afghan & Bolivian corruption
188. Panasonic is Elon Musk's partner. Panasonic is one of the most corrupt companies in the world. Panasonic has been charged, on multiple continents with: Product dumping, bribery, collusion, price fixing, anti-trust law violations, racketeering, worker abuse, toxic poisoning of workers, & other crimes. It is no wonder that Elon Musk & Panasonic are partners. Tata Motors executive Karl Slym was killed for exposing this fact.
189. Your tax dollars were stolen in order to make Tesla Motors, as part of a political financing kick-back scam. In other words, part of your paycheck was taken away from you in order to buy hookers, rent-boys & private jets for Musk & company.
190. Tesla's are forged in criminal corruption, so anybody who drives a Tesla must be either ignorant, a weasel or one of the corrupt. The whole world now knows all of the facts in this list so you can never plead ignorance to these crimes.
191. Tesla's have a huge amount of highly documented defects. The defects are so extensive that Tesla made buyers sign confidentiality agreements to try to hide how messed up their cars are.
192. Tesla's have killed more people than the main-stream news has reported. The full Tesla death-list is covered up.
193. Musk lied about why he wanted to make electric cars, when, in fact, he actually poisons the

environment because Tesla investors wanted to exploit toxic minerals & materials which can't be recycled in a clean manner

194. No other electric car has been so mundane, & yet had so many problems with it, since the electric car was first sold in the 1800's. There is nothing â... novelâ... or â... amazingâ... about the Tesla aside from dime store parlor tricks for PR hype.
195. More drunks have crashed Tesla's, than any other per capita car in the world, per volume of cars made
196. Elon Musk's co-founders, investors, partners, wives, investors, suppliers & employees have sued him for being a fraud &, essentially, called him an "asshole" in court records.
197. Elon Musk lied on this Department of Energy funding application and the Obama Administration refuses to allow any federal employees or witnesses to testify to these facts in public due to the devastating potential results of these facts.
198. More owners of Tesla's have been found to cheat on their taxes, & be involved in abuse-based divorces, than almost any other car brand owner. Tesla owners are bad people who rationalize their poor life choices. Owning a Tesla is a red-flag for a tax audit!
199. Elon Musk will lie, cheat & steal in order to self-aggrandize & glorify his egotistical mania. Musk has been documented engaging in over 100 lies which were later proven to be false. He has spent tens of millions of dollars to buy fake news about himself on Twitter, Facebook & Google because he is such a mentally disturbed ego-maniac.
200. None of Elon Musk's companies would exist if not for taxpayer funded handouts given to him by corrupt politicians in exchange for illegal campaign finance deals with him & his investors.
201. Google, & Tesla, who are financial & political partners, have both been caught spying on consumers & manipulating Internet data in order to cover-up their complicity in huge political corruption & kick-back deals
202. Musk took U.S. taxpayer dollars from the government & then hired cheap off-shore labor & fired U.S. Union workers & domestic workers. He lied to & screwed the NUMMI workers that were working at the Fremont plant.
203. Musk has put over 18 surveillance devices in the Tesla. Anybody can hack those devices & monitor you. WORSE YET, foreign agents have hacked the Tesla & taken over the controls & driven Teslaâ... s into bystanders & over cliffs.
204. When Erick Strickland was head of the NHTSA he was confronted about DOT safety cover-ups of the Tesla to protect Obama. He quit 48 hours later. The DOT safety cover-ups to protect the Obama campaign finance payola scheme continue to this day. Obamaâ... s Gibbs, Emanuel, Plouffe, Axelrod and Carney quit within a week of being threatened with exposure.
205. Elon Musk paid some of the largest bribes in the history of China, facilitated by Dianne Feinstein and her Chinese spy connections, in order to get his China factory opened.
206. Teslaâ... s have had a large number of recalls but Elon Musk refuses to call them â... recallsâ... . Teslaâ... s have had multiple recalls for SEVERE safety dangers. DOT has been told this, in writing, for years, but wont take action in order to protect Obama.
207. Elon Musk is a bullshit artist who has no original ideas & wears black-turtle neck shirts (like Elizabeth Homes) to try to create a â... cultâ... around himself & convince the world that he is a â... Jesus-likeâ... figure when, in fact, he is a clinical sociopath.
208. Tesla is a severe public safety hazard that has been systematically covered up by corrupt politicians.
209. Large numbers of Ex-CIA staff and In-Q-Tel spy staff work for Musk. Why does he need spies to build cars?
210. Tesla Motors batteries were promoted by those who wished to exploit the Afghanistan War for personal profit by controlling the Afghan lithium mining fields. Kleiner Perkins and Draper Fisher hyped the â... ..trillions of \$ of lithium in Afghanistan.â...
211. Tesla Motors batteries blow up on their own because their chemistry causes them to be naturally defective.
212. Tesla Motors batteries blow up when they get wet because their chemistry is activated by water to make them explode.
213. Tesla Motors batteries fires cannot be put out by any common fire-fighting resources.

214. Tesla Motors batteries set themselves on fire.
215. Per Federal MSDS disclosure documents, Tesla Motors batteries emit cancer-causing vapors when they burn.
216. Tesla Motors Vehicles toxicity poison bystanders, nearby vehicular passengers, airline passengers in planes carrying said batteries in their holds, & environments where such incidents occur.
217. Tesla Motors batteries blow up when bumped by the same level of car incident that would, otherwise, only dent a normal car bumper.
218. In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive.
219. Tesla has multiple sexual harassment and unsafe work-place lawsuits against the company.
220. Per MSDS documents, Tesla Motors batteries emit brain damaging chemicals when they burn
221. Tesla is a stock pumping scam to profiteering on stock market peak manipulation at the expense of taxpayers.
222. Per MSDS documents, Tesla Motors batteries emit chemicals, burning, or not, that can damage an unborn fetus within the mother
223. Per MSDS documents, Tesla Motors batteries emit chemicals that can cause lung damage.
224. Per MSDS documents, Tesla Motors batteries emit chemicals that can cause liver damage.
225. Per published lawsuits & news reports, the factories that make Tesla Motors batteries have been charged with the deaths, & potentially fatal illness, of over 1000 workers & the poisoning of nearby towns.
226. Tesla Motors batteries become even more dangerous over time, particularly when tasked by electric transportation systems like Hover-boards & Tesla's. The chemistry in a lithium ion battery changes to become more unstable over time.
227. Tesla Motors batteries were never designed to be used in automobiles. Tesla used non-automotive batteries in one of the most dangerous configurations possible.
228. Tesla Motors occupants experience higher EMF radiation exposure than gasoline vehicle occupants.
229. Elon Musk's Space X vehicles & Tesla Motors vehicles have both had a higher-than-average number of explosions. This has caused outside experts to doubt Musk's ability to place safety considerations over his need for hyped-up PR.
230. Leaked Sandia National Labs & FAA research videos dramatically demonstrate the unstoppable, horrific, â... re-percussive accelerating domino-effectâ... explosive fire effect of the Tesla Motors batteries.
231. Tesla's own â... Superchargersâ... & home 3-prong chargers have set Tesla's, homes & businesses on fire
232. Consumer rights groups contacted Erick Strickland, the head of the NHTSA, & charged him with a cover-up. He quit days later. The NHTSA then issued a safety investigation request to Tesla Motors, which would have more publicly exposed these dangers, but the safety investigation was never under-taken due to White House requests & lobbyist bribes, from Tesla, which got the investigation shut down.
233. NEPA regulations for the Tesla NUMMI factory in California & the Nevada Tesla â... Gigafactoryâ... have been violated relative to environmental safety standards.
234. Tesla Motors vehicles are not â... Factory Builtâ... â... like Fordâ... builds cars, as Tesla professes. They are hand built in small volumes & subjected to numerous defects. Blogs have documented hundreds of defects, as listed by Tesla owners. Tesla has lost at least one LEMON CAR LAWSUIT for defective manufacturing.
235. Tesla's â... showroomsâ... are often â... pop-upâ... retail storefronts that are in tight-proximity retail centers, putting it's neighbors at risk of total loss from fire damage.
236. Tesla Motors vehicles have been hacked & taken over. Their doors, steering, listening devices & navigation have been taken over by outside parties. Multiple Tesla have suddenly swerved off the road, over cliffs & into other vehicles, killing bystanders & Tesla drivers.
237. Three Tesla top engineers & two competing senior executives, all of whom had whistle-blown on Tesla, who were in perfect health one day, suddenly died mysteriously the next day.

238. Multiple employees, founders, investors, marital partners, suppliers & others have sued Tesla Motors, &/or it's senior executives for fraud. Musk had nothing to do with creating Tesla. He ran a hostile take-over of Tesla from the founders.
239. In addition to suing him, many of his former staff & partners have described Musk as an â... Arrogant Prickâ... .
240. Main-Stream Media (MSM) have agreed not to provide news coverage of the deadly defects of the Tesla because the MSM are owned by the same politicians who own Tesla Motors. It is now legal to sue The New York Times for hiding these deadly defects, though, particularly if your family member was injured or killed because they covered-up the danger for political reasons.
241. If you think the above bullet-points are bad there are over a 1000 more. Find the book â... Is Elon Musk A Fraudâ... online or visit <https://stopelonfromfailingagain.com/> or thousands of other sites that expose the truth about Musk & Tesla!
242. BANKRUPT MUSK â... NO CASH FOR CRONY CORRUPTION. Print this out & freely re-post it on blogs & social media. Post this on bulletin boards. Put this on the windshield of every Tesla you find. Print this out & hand these out in front of every Tesla dealership: Nobody can stop you from handing these out, it is your U.S. Constitutional First Amendment Right! Pass the word! We are prepared to back up every single fact on here at any public meeting with the FBI, Congress, FTC, GAO, SEC or before a Federal Special Prosecutor.
243. The crash of a Tesla Model X through the home of South Korean singer and actor Ji Chang Son. The crash ended with the nose of the vehicle in Ji Chang Son's living room after the Tesla malfunctioned. Hundreds of such Tesla crashes have occurred, resulting in the deaths and injuries of Tesla owners, passengers, bystanders, oncoming drivers and others.
244. Following accusations by a Korean celebrity that a Tesla car spontaneously drove through a wall, the carmaker has replied that the crash was â... entirely due to the manâ... s horrible drivingâ... in an ongoing effort, by Tesla, to steer the blame away from Tesla faulty engineering Actor and singer Son Ji-chang (identified as Ji Chang Son in court documents) claimed he was parking his Tesla Model X SUV when the vehicle suddenly [lurched forward into his living room](#).
245. In a lawsuit filed last week in California, Son claimed that the crash was due to â... sudden unintended accelerationâ... and sought class-action status with other Model X owners. In a nod to the carâ... s ability to sense and avoid crashes, the lawsuit also hinted that the Model X should not be allowed take actions that the car â... knows will result in the collision with a fixed object.â...
246. In June, another California-based Model X owner, Puzant Ozbag, similarly claimed that his Model X spontaneously accelerated through a parking lot and into a wall. A special prosecutor is needed to investigate Tesla due to the huge number of cover-ups, by Tesla and the Obama Administration, to protect campaign financier Elon Musk. Jeff Sessions needs to hire a [lawyer](#) from outside the [government](#) appointed by Sessions as [attorney general](#) or, in the United States, by [Congress](#) to investigate a government official for misconduct while in office. A reasoning for such an appointment is that the governmental branch or agency may have political connections to those it might be asked to investigate. Inherently, this creates a [conflict of interest](#) and a solution is to have someone from outside the department lead the investigation. The term "special prosecutor" may have a variety of meanings from one country to the next, from one government branch to the next within the same country, and within different agencies within each government branch. Critics of the use of special prosecutors argue that these investigators act as a "fourth branch" to the government because they are not subject to limitations in spending, nor do they have deadlines to meet.
247. Attorneys carrying out special prosecutor functions in either federal or state courts of the United States are typically appointed [ad hoc](#) with representation limited to one case or a delineated series of cases that implicate compelling governmental interests, such as: Fraud (SEC, Complex, Cybercrime, Mortgages), Public Corruption, Money Laundering & Asset Forfeiture, Civil Rights, Racketeering Across State lines, Environmental Protection, National Security, Tax & Bankruptcy, Organized Crime, or International cases where the US is a party).^[1] Special prosecutors in courts of the [United States](#) may either be appointed formally by one of the three branches of government in a criminal proceeding, or when dictated by federal law or regulation, or informally in civil proceedings, and also

by one of the three branches of government, or by a non-governmental entity to prosecute alleged unlawful conduct by government agents. When appointed by the [judicial branch](#) to investigate and, if justified, seek indictments in a particular judicial branch case, the attorney is called special prosecutor.^[2] When appointed/hired particularly by a governmental branch or agency to investigate alleged misconduct within that branch or agency, the attorney is called [independent counsel](#).^[3] When appointed/hired by the state or political subdivision to assist in a particular [judicial branch](#) case when the public interest so requires, the attorney is called [special counsel](#).^[3] When appointed/hired by an organization, corporation, person or other non-governmental entity to investigate and, if justified, seek indictments against one or more government officials for acts committed under color of law, the attorney may be called [special counsel](#) or special prosecut. The term is sometimes used as a synonym for [independent counsel](#), but under the former law authorizing the independent counsel, the appointment was made by a special panel of the [United States Court of Appeals](#) for the [District of Columbia Circuit](#). The [Ethics in Government Act](#) expired in 1999, and was effectively replaced by [Department of Justice](#) regulation 28 CFR Part 600, under which Special Counsel [Patrick Fitzgerald](#) was appointed to look into the [Plame affair](#). The Tesla Motors and Elon Musk Case requires a Special Prosecutor.

248. [ELON MUSK AND TESLA FACE CRIMINAL FRAUD CHARGES BY FEDS! MUSK FINALLY EXPOSED!](#)
249. [SEC subpoenas TESLA over Musk tweets...](#)
250. [Whistleblower posts 'flawed cars' details...](#)
251. Elon Musk's Incredible Smoke And Mirrors Dance. Elon Musk's untraceable money laundering and political bribery scam has now been exposed. It is called an "Invisible Bridge". It is the way that covert funds move through a secret conduit of close associates and family members. Elon Musk is at the head of the conduit and his mother, brother and associates Tim Draper, Steve Jurvetson, and George Soros round out the other tentacles. With operational links through Wells Fargo Bank, Silicon Valley Bank and Goldman Sachs, the scheme is perfected corruption. The "bridge" uses a combination of fake tax evasion charities and business assets, passes through Senator's pockets and is never visible to the FBI, the FEC and the SEC unless they have very good agents assigned to the matter.
252. NTSB, DOJ, SEC and FEC have been blocked from action by DNC lobbyists.
253. The overt and arrogant Musk misdeeds have now become "obvious and RICO-violating..."
254. He is protected by Senators Reid, Harris, Pelosi and Feinstein. They are beneficiaries of the scam. Muskâ... s self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.
255. He is protected by the Clinton and Obama organizations along with most of the DNC. He finances these politicians via this scheme.
256. The U.S. Dept of Energy (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for Fusion-GPS attacks on Silicon Valley business competitors.
257. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.
258. Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader.
259. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: â... child labor electric car batteriesâ...
260. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his

- â... trophy wifeâ... Mother is overbearing so he developed sociopath-like mental issues.
261. Musk has been professionally diagnosed as a 'psychotic narcissist'.
 262. Musk uses shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.
 263. A huge number of Tesla drivers, per capita, have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.
 264. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.
 265. VCâ... s Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.
 266. Peter Thiel, a Musk â... boyfriendâ... also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: â... Muskâ... , â... Teslaâ... or â... Tesla Fireâ... . They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills.
 267. There are no â... Tesla Fan Boysâ... . All of the fanatic Tesla comments on the internet are Muskâ... s, Thielâ... s, Jurvetsonâ... s and Draperâ... s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a â... Tesla Fan Boyâ... on blogs.
 268. Main Stream DNC-biased News organizations who refuse to cover the story reveal themselves as shills for Musk
 269. The Silicon Valley Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone.
 270. His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.
 271. The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.
 272. Musk holds the Silicon Valley record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.
 273. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.
 274. Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them.
 275. <https://stopelonfromfailingagain.com> reveals even more Musk lies.
 276. Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!
 277. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from anything SpaceX has launched. SpaceX is entirely a domestic spy operation.
 278. Musk's "Mars" scheme is just a PR distraction to keep the news from looking too close at SPACEX domestic spying satellites.
 279. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.
 280. Musk can't fix a car or build a rocket and has almost no mechanical skills.
 281. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk's lobbyists have bribed DOT and NHTSA to stall safety inspections.
 282. NO COMPLETE UNCOMPROMISING SAFETY REPORT ON TESLA CARS HAS EVER BEEN PUBLISHED but we have a copy of a hushed up report that would put Tesla out of business.

283. Musk's 'Autopilot' system is a scam to get government cash BUT IT NEVER WORKS. The Tesla 'Autopilot' has crashed into police cars, pedestrians, swamps and driven owners over cliffs.
284. Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.
285. The "Silk Road" Cocaine and Murder-For-Hire website was created at Musk's SpaceX
286. Musk's In-Q-Tel staff ran two transport planes filled with drugs; listed as "Cocaine 1" on FAA records.
287. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla!
288. All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.
289. Tesla and Solyndra sit on the same land and share staff, contracts and lobbying. California politicians own parts of both companies.
290. Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners.
291. The â... lithiumâ... in Muskâ... s horrifically miss-engineered lithium ion batteries cause wars in the Congo over mining corruption.
292. Afghanistan and Bolivian mobsters benefit from the corrupt mining deals involved with mining lithium and cobalt for Elon Musk's batteries.
293. Elon Musk opened a factory in China to try to avoid American worker safety laws because all of the labor cheats and safety violations he had engaged in, in America, were catching up to him. He neglected to provide adequate worker safety to quarantine for the coronavirus, though.
294. Elon Musk's Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu and they engaged in extreme conflict-of-interest to help Musk.
295. Elon Musk's Lithium ion batteries excrete chemicals that mutate fetuses when they burn.
296. Elon Musk's Lithium ion batteries destroy your brain, lungs and nervous system when they burn.
297. Elon Musk's Lithium ion batteries kill the factory workers who make them.
298. Elon Musk's Lithium ion batteries cause Panasonic to be one of the most corrupt companies in the world.
299. Elon Musk's Lithium ion batteries poison the Earth when disposed of.
300. Elon Musk's Lithium ion batteries can't be extinguished by firemen because water makes them explode even more and then explode again hours later.
301. Elon Musk's Lithium ion batteries have chemical dendrites and deposition massing issues (revealed by X-Ray analysis) which makes them more and more likely to explode as they age.
302. Elon Musk's Lithium ion batteries poison firemen when they burn.
303. Elon Musk's Lithium ion batteries are based on criminally corrupt mining schemes like URANIUM ONE.
304. Elon Musk's Lithium ion batteries have over 61 toxic chemicals in them.
305. Elon Musk's Lithium ion batteries come from an industry that spends billions on internet shills and trolls that they hire to nay say all other forms of energy
306. Elon Musk's Lithium ion batteries are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.
307. Apple products with lithium ion batteries have been exploding and setting people on fire.
308. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This is upheld by the increasing number of FAA reports about commercial airline cabins suddenly â... filling up with toxic smokeâ... as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are

- subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.
309. Tesla owner's had had more DUI's, abuse filings in divorce proceedings and crashes than any other car maker PER VOLUME. This makes Tesla the #1 car for douche bags and scummy people.
 310. Tesla's own federal patent filing records confirm that Tesla batteries are as dangerous as this document reports.
 311. Political activist George Soros owns part of Tesla Motors so that Soros can help conduit DNC cash.
 312. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging.
 313. United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.
 314. There have been thousands of defect reports filed on Tesla cars.
 315. Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal â... reportâ... from USAID that said there was â... A TRILLION DOLLARS OF LITHIUM IN AFGHANISTANâ... and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.
 316. If a Tesla battery gets wet it will explode and cause all of the other batteries to explode in a "cascade of explosions".
 317. Water makes Tesla batteries explode.
 318. In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive and seal them in molten metal.
 319. Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading owner-ships.
 320. Tesla Motors has caused far more deaths and injuries than the world generally knows about.
 321. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him.
 322. In Florida two kids died in a Tesla, burned alive, screaming in agony.
 323. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.
 324. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.
 325. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.
 326. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public.
 327. Elon Musk's Lithium ion battery partners spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.
 328. Lithium ion EVs are more prone to battery fires.
 329. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.
 330. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk.
 331. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Another whistle-blower has suggested they were killed in a "Boston Brakes" hit-job.
 332. The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

333. The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.
334. Musk uses Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".
335. Musk buddies: Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime.
336. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws.
337. Musk has exceeded FEC campaign finance limits by billions of dollars via "in-kind" services.
338. Had the full scope of these facts been acted on during the Obama Administration, Barack Obama would have become the first modern sitting President to have been arrested in the White House. Barack Obama was fully aware of these schemes, crony payola deals and corruption crimes and discussed the implementation of these crimes, daily, with Rahm Emanuel, David Plouffe, Steven Rattner, Robert Gibbs, John Podesta, David Axelrod, Eric Holder and Jay Carney in the Oval Office.
339. THIS corruption involves TRILLIONS of dollars of corrupt mining deals, automotive and energy monopolies!
340. THIS is why the federal budget analysis reports are showing TRILLIONS of dollars of 'untraceable' losses from the United States Treasury from 2006 up to today!
341. THIS is why a large number of reporters, whistle-blowers and prosecutors suddenly, and mysteriously turned up dead!
342. The company that Elon Musk built to usher in the electric-car future might not have enough cash to make it through the calendar year without stock markets scams being used to keep it alive.
343. Tesla again fell far short of its own production targets for the mass-market Model 3 sedan
344. Another person died in a crash involving its assisted-driving feature.
345. Musk entered into a public dispute with federal safety regulators.
346. Tesla's once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24 percent from its peak in September but Silicon Valley VCs will pump it up to save face.
347. No one has raised or spent money the way Elon Musk has; Nor has any other chief executive officer of a public company made a bankruptcy joke on Twitter at a time when so much seemed to be unraveling.
348. Tesla is going through money so fast that, without additional financing, there is now a genuine risk that the 15-year-old company could run out of cash in 2018. The company burns through more than \$6,500 every minute, according to data compiled by Bloomberg. Free cash flow—the amount of cash a company generates after accounting for capital expenditures—has been negative for five consecutive quarters. That will be a key figure to watch when Tesla reports earnings May 2. Read the full story here: <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>
349. In years to come, we will all look back and wonder how so many people were taken in by this shyster, who makes Enron look honest.
350. One of Tesla's greatest strengths is its ability to monetize the patience and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854 million in customer deposits as of the end of 2017.
351. Since Tesla sells its products direct to consumers, without relying on a dealer network, customer deposits are cash payments that essentially serve as interest-free loans—and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders would likely be wiped out.
352. Tesla is holding customer deposits for two vehicles that aren't even in production yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers interested in installing an array

of solar roof panels or the company's Powerwall home battery must hand over \$1,000 to place an order.

353. Tesla doesn't break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans stood in long lines at Tesla stores. Two years later, the slower-than-expected pace of production means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported a net Model 3 reservations remained stable.
354. There's an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle features \$3,000 for a Full Self Driving capability, for example that Tesla thus far hasn't figured out or released to anyone.
355. Elon Musk cooked the books by emailing interested sales prospects and asked them to put a deposit down before each quarter ended so he could book their tiny deposits as fully transacted \$60K+ "sales" before each quarter closed.
356. Elon Musk and SpaceX are being sued by multiple employees for "lying about safety standards, safety records" and deadly safety defects.
357. The Elon Musk Tesla Money Laundering Board Of Directors is as full of fraud and corruption as Musk. Birds of a feather stick together and the Jurvetson, Draper, Musk, et al; clan of corruption runs deep. The Board of Directors can't operate their scam without the whole pack of thieves and liars in place. An outsider will break their swamp of tax evasion, Dark Money political bribes, off-shore cash, self-dealing, book-cooking, real estate fraud, expense padding and other nefarious deeds.
358. Dianne Feinstein's family member: Herb Newman of Sausalito, California's HR firm: Newman Search (415 332-8425) has a company as of 1972 with the sole purpose of setting up investment bank deals with the People's Republic of China. Feinstein arranged for Newman to provide the staffing for Tesla and Solyndra. Dianne Feinstein has been under investigation for spy activities with China and her senior aide was arrested as a Chinese top spy. In 1973 Mr. Newman arrived in Canton at the invitation of the Chinese Council for the Promotion of International Trade. (CCPIT). He and his company MVTC were one of fifty businesses to be invited to the Canton Trade Fair held in Kwangchow China. In 1978 Mr. Newman founded China Investments and in partnership with California Trade Delegations both companies as members of the San Francisco Chamber of Commerce began taking US Corporations to China. Mr. Newman along with one of his associates at the time Mr. Darryl Schoon helped organize Senator Dianne Feinstein's first trip to China in conjunction with the San Francisco Chamber of Commerce. Herb Newman, Mart Bailey and Feinstein's Husband; Dick Blum are on intelligence agency watch-lists, and under electronic surveillance, for potentially corrupt deals with China, Tesla and Solyndra.
359. Dianne Feinstein's husband owns CBRE which owns the real estate contracts for both Tesla and Solyndra.
360. Dianne Feinstein's family owns interests in the construction companies hired by both Tesla and Solyndra.
361. Dianne Feinstein had her staff warn other California businesses away from using the NUMMI car factory in order to protect the real estate deal for both Tesla and CBRE, which is owned by her husband.
362. Tesla began real estate deals in multiple states and then cancelled them at the last minute, which got them sued for fraud and charged with "lying" to different communities. They started, and then pulled out of these different building (San Jose, Southern California, New Mexico, Etc.) deals, because CBRE and Feinstein were trying to leverage real estate profit exploitation using taxpayer funding.
363. Panasonic and Tesla have known for decades that the Panasonic 18650 batteries used in the Tesla suffer from multiple chemistry degradation defects which will almost always make them eventually explode or "go thermal". The defects include: 1.) LENR activation, 2.) Dendrite lengthening, 3.) Particle congealing, 4.) Chemistry evolution and other defects. The Tesla project is, essentially, a failed product product dumping effort of a failed and dangerous battery product.
364. Elon Musk has demanded that his employees sign "loyalty pledges", "vows" and engage in Omerta's

- in order to keep the corruption details of Tesla from being exposed to the public.
365. Tesla insider Antonio Gracias is the mob boss insider at Tesla who arranges media hit-jobs on those who displease Musk.
 366. The NHTSB has issued requests to Tesla for safety tests and data that Tesla never complied with. Instead, Tesla paid bribes, which were referred to as "fees" to avoid having to complete those tests. An independent group of outside investigators issued a damning safety report to the NHTSB demanding that Tesla be compelled to produce the safety tests in 2010 but Obama appointed NHTSB executives buried the report and protected Tesla in order to keep the connection between Obama's funding and Tesla protected. NHTSB boss: Strickland, an Obama insider, was confronted with this in Washington, DC and resigned from his job 48 hours later. NHTSB has still not acted on the severe Tesla safety defects that have been reported since 2009.
 367. An SEC investigation of Musk uncovered horrific evidence of Musk corruption but the SEC could not report or act on it because Obama congressional bosses and lobbyists got the SEC investigation "limited" to only examine a single Twitter "Tweet" from Musk.
 368. Elon Musk is protected by top DOJ, SEC, CFTC, FEC and other Obama left-over staff as well as 45 U.S. Senators and top Federal Reserve members and Goldman Sachs, who live in terror that exposure of the entire Elon Musk financial food-chain will topple the entire DNC Dark Money payola scam. This is the reason that Tesla can get away with so much obvious and overt corruption and still continue operations. Tesla Motors book-cooking, financial frauds and political payola conduits, if fully revealed, would change the course of political influence in America.
 369. Elon Musk has been sued by a man that Musk called a "Pedo", yet Musk's own father has been accused of child sex abuse, racism and, indeed, got his own daughter pregnant!
 370. Elon Musk's mother has been accused of being a "self-indulgent trophy wife" who Musk was trained by to be an arrogant elitist. Her hatred of black people was imbued on Musk who has been sued by black people at his company for "running a racist culture".
 371. Elon Musk divorced the same woman twice because she knew his dirty little secret and threatened to out him if he did not keep the deal going. She was hired to "act" as his wife.
 372. Musical artist Iggy Azalea was at a Musk Party, with other friends, who captured Elon Musk on video on drugs and in weird sex acts. Musk had Iggy's camera stolen at the party to hie the evidence but he did not get the other cameras and did not realize that some of those cameras placed their images and videos directly on the Cloud, where hackers acquired them.
 373. With cover-up help from Eric Holder, Steven Chu, Obama, Valarie Jarret, DNC FBI agents, Perkins Coie, Covington and Burling, Wilson Sonsini, etc; sociopath Musk actually believes he is "untouchable" and that he can get away with anything. His downfall will be the same downfall of every narcissist sociopath oligarch throughout all of recorded history.
 374. Elon Musk is a drug addict. A simple urine and blood test proves it. Musk's downfall and the downfall of John DeLorean are seeming to align.
 375. Dianne Feinstein and Nancy Pelosi are violating the law protecting Tesla by withholding investigations and prosecutions? Why are they allowing American citizens to continue to die from the 1.) "sudden acceleration electronics defect"; 2.) "The failed Auto-pilot electronics defect" 3.) "The deteriorating and deadly lithium ion batteries" and 4.) numerous other defects widely documented in the news media and filed lawsuits?
 376. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.
 377. The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors.
 378. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

379. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: â... child labor electric car batteriesâ... .
380. The Silicon Valley Paypal Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone. His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.
381. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.
382. Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them. <https://stopelonfromfailingagain.com> reveals even more Musk lies.
383. THIS corruption is what all of the big political scandals are about today!
384. THIS corruption involves TRILLIONS of dollars of corrupt mining deals, automotive and energy monopolies!
385. THIS is why the federal budget analysis reports are showing TRILLIONS of dollars of 'untraceable' losses from the United States Treasury from 2006 up to today!
386. THIS is why a large number of reporters, whistle-blowers and prosecutors suddenly, and mysteriously turned up dead!
387. THIS can all be proven in jury trial and in live televised Congressional hearings!
388. This is all being covered up because top State and Federal officials are in on it, own the stock in it and are so deeply involved in it that they could go to Federal prison when this all comes out.
389. The anxieties that lurk beneath the tremendous ambition of Tesla Inc. moved into the forefront in recent weeks. The company again [fell far short](#) of its own production targets for the mass-market Model 3 sedan, another person [died in a crash](#) involving its assisted-driving feature and Musk entered into [a public dispute](#) with federal safety regulators. Teslaâ... s once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24 percent from its peak in September.
390. Thereâ... s a good reason to worry: No one has raised or spent money the way Elon Musk has. Nor has any other chief executive officer of a public company made a [bankruptcy joke](#) on Twitter at a time when so much seemed to be unraveling.
391. Tesla is going through money so fast that, without additional financing, there is now a genuine risk that the 15-year-old company could run out of cash in 2018. The company burns through more than \$6,500 every minute, according to [data compiled by Bloomberg](#). Free cash flowâ... the amount of cash a company generates after accounting for capital expendituresâ... has been negative for five consecutive quarters. That will be a key figure to watch when Tesla reports earnings May 2. Read the full story here: <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>
392. In years to come, we will all look back and wonder how so many people were taken in by this shyster, who makes Enron look honest.
393. lot of Muskâ... s money has been extracted from suckers, who think he is Godâ... s gift, as Bloomberg reports: One of Teslaâ... s greatest strengths is its ability to monetize the patience and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854 million in customer deposits as of the end of 2017.
394. Since Tesla sells its products direct to consumers, without relying on a dealer network, customer deposits are cash payments that essentially serve as interest-free loansâ... and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders would likely be wiped out.
395. Tesla is holding customer deposits for two vehicles that arenâ... t even in production yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers interested in installing an array of solar roof panels or the companyâ... s Powerwall home battery must hand over \$1,000 to place an order.
396. Tesla doesnâ... t break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans

stood in long lines at Tesla stores. Two years later, the [slower-than-expected pace of production](#) means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported â... net Model 3 reservations remained stable.â...

397. Thereâ... s an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle featuresâ... \$3,000 for â... Full Self Drivingâ... capability, for exampleâ... that Tesla thus far hasnâ... t figured out or released to anyone.
398. The consumer psychology that sees hundreds of thousands of people essentially extending an interest-free loan to a public company is unusual, to say the least. I think the phrase â... more money than senseâ... rather sums it up
399. Apple and Google also named in US lawsuit over Congolese child cobalt mining deaths for Elon Musk's Tesla Cars. Dell, Microsoft and Tesla also among tech firms named in case brought by families of children killed or injured while mining in DRC.â... [I saw the unbearable grief inflicted on families by cobalt mining. I pray for chan Elon Musk's](#) cobalt extraction in DRC has been linked to child labour.
400. A landmark legal case has been launched against the worldâ... s largest tech companies by Congolese families who say their children were killed or maimed while mining for cobalt used to power smartphones, laptops and electric cars, the Guardian can reveal.
401. Apple, Google, Dell, Microsoft and Tesla have been named as defendants [in a lawsuit filed](#) in Washington DC by human rights firm [International Rights Advocates](#) on behalf of 14 parents and children from the Democratic Republic of the Congo (DRC). The lawsuit accuses the companies of aiding and abetting in the death and serious injury of children who they claim were working in cobalt mines in their supply chain.
402. The lawsuit argues that Apple, Google, Dell, Microsoft and Tesla all aided and abetted the mining companies that profited from the labour of children who were forced to work in dangerous conditions â... conditions that ultimately [led to death](#) and serious injury. The families argue in the claim that their children were working illegally at mines owned by UK mining company Glencore. The court papers allege that cobalt from the Glencore-owned mines is sold to Umicore, a Brussels-based metal and mining trader, which then sells battery-grade cobalt to Apple, [Google](#), Tesla, Microsoft and Dell.
403. Other plaintiffs in the court documents say they worked at mines owned by Zhejiang Huayou Cobalt, a major Chinese cobalt firm, which the lawsuit claims supplies [Apple](#), Dell, and Microsoft and is likely to supply the other defendants.
404. Another child, referred to as John Doe 1, says that he started working in the mines when he was nine. The lawsuit claims that earlier this year, he was working as a human mule for Kamoto Copper Company, carrying bags of cobalt rocks for \$0.75 a day, when he fell into a tunnel. After he was dragged out of the tunnel by fellow workers, he says he was left alone on the ground at the mining site until his parents heard about the accident and arrived to help him. He is now paralysed from the chest down and will never walk again.
405. Other families included in the claim say that their children were killed in tunnel collapses or suffered serious injuries such as smashed limbs and broken spines while crawling through tunnels or carrying heavy loads. The families say that none were paid any compensation for the deaths and injuries.
406. One of the central allegations in the lawsuit is that Apple, Google, Dell, Microsoft and [Tesla](#) were aware and had â... specific knowledgeâ... that the cobalt they use in their products is linked to child labour performed in hazardous conditions, and were complicit in the forced labour of the children
407. Is is charged that the Musk empire is an organized crime program that exists between Silicon Valley tech oligarchs, investment banks, U.S. Senators, government agency staff and White House staff who engage in these crimes.
408. That public officials knowingly participate in these crimes by failing to report their associates who engage in these illicit actions and by hiring suppliers who operate these illicit activities.
409. That the Musk empire suspects manipulate government funds for their personal profiteering at the expense of domestic citizen taxpayers like us.
410. That the Musk empire suspects operate a vast stock market manipulation program, as a core function

of their operations, and those illicit deeds function at the expense of the public to render unjust gain to public officials.

411. That the Musk empire suspects contract a known group of lobbyists, corrupt law firms, unethical CPA's, corrupt investment banks and specialized corruption services providers to attack, defame, physically harm, character assassinate, black-list and/or kill those they dislike and they harmed many persons with those acts.
412. That the Musk empire suspects operate an Epstein-like sex-trafficking network of prostitutes and sexual extortion activities and locations for the engagement of said activities and for the bribery of cohorts via sex workers and that Musk was a personal associate of Jeffrey Epstein.
413. That the Musk empire suspects engage in electronic attacks and manipulations including hacking, election manipulation, media censorship and internet search results manipulation in order to mask their schemes.
414. That the Musk empire suspects engage in Lois Lerner-like, SPYGATE-like, VA whistleblower-like reprisal and retribution attacks using government agencies like SSA, DOJ, FBI, LSC, HUD, HHS, DOE, Etc
415. It is demanded that Elon Musk be arrested on RICO Racketeering, Anti-Trust, Tax Evasion, Bribery, and related charges!
416. Elon Musk had sex with a young non-age-appropriate rock and roll girl and got her pregnant.
417. Elon Musk dated anal sex advocate Gwyneth Paltrow who later told her friends that he was full of shit.
418. Elon Musk divorced one actress, then had to remarry her because she had the goods on him.
419. Video exists of Elon Musk at various sex parties.
420. Elon Musk dated Johnny Depp's girlfriend Amber Heard who thought that Musk was even more controlling than Johnny Depp.
421. The NUMMI car factory that Musk took over was first called, by Musk, in the media "non-functional". Even the two major car makers that were using it had abandoned it. Feinstein make Musk take it because here husband's company: CBRE Realty, managed the property around it.
422. Musk never made good on his promises to NUMMI workers or the Unions representing the NUMMI factory.
423. After getting an insane amount of exclusive free cash from the taxpayers, Musk flew workers in from overseas.
424. Multiple women have charged Musk for sexual abuse and factory misogyny.
425. Musk couldn't make it in college and bailed out.
426. Far more SpaceX rockets have exploded and fully failed than the public is aware of.
427. Musk said he would already have sent his buddies around the moon but many potential passengers have bailed out after they saw the due diligence on SpaceX lack of experience.
428. Musk, Draper, Page, Westly, Schmidt, Brin and other famous tech asshole billionaires have formally agreed to run a "cartel" to control news, information and industries.
429. Inside the Tesla that Elon Musk had SpaceX put in orbit is a "confession folder" that would destroy Musk if anyone went up and got it.
430. Elon Musk believes he could kill someone and not get in trouble because he has so many California Senator's, Tier one law firms and former White House staff protecting him.
431. Elon Musk is the Citizen Kane of the modern world. He thinks he is the Al Capone of Technology. He uses things that appear to be all "crunchy granola" on the surface to steal taxpayer subsidies with the help of corrupt politicians.
432. Aside from Musk's own personal dirty operations and orders, the largest facilitator of his crimes is the large group of men inside Goldman Sachs and JP Morgan dedicated to supporting his crimes and corruptions.
433. Through covert conduits, Elon Musk pays blogger James Ayre to shill is schemes online.
434. Musk's entire media plan is self-promotional aggrandizing and fake virtue-signaling to keep the news off his case.
435. The SEC made him quit but he just changed one letterhead graphic and nothing else. Musk still runs

- Tesla and the rest of the empire just like he always did.
436. Musk covertly funds abortion projects because he gets so many girls pregnant and refuses to use a condom.
 437. Deutsche Bank is the other biggest player in the Musk Empire money laundering, political payola and corruption crimes.
 438. Musk stole most of his designs from others, as proven by the U.S. Patent office and previous publications.
 439. When Elon Musk's Hyper-loop crashes, it will turn all of the passengers into a bloody applesauce like nightmare.
 440. Musk's 5G SpaceX Starlink Satellites could destroy the environment, will add to the cancer-causing radiation of the Earth and are to be used to spy on consumer's uses of the internet.
 441. In lawsuits, Musk always pleads that he "has no money".
 442. X-Ray analysis by over 40 major laboratories prove that Elon Musk's lithium ion batteries have severe and constantly degrading defects inherent in their construction. Musk has known about these dangers for decades but chose to work with Panasonic to cover it up.
 443. Elon Musk lost a LEMON CAR lawsuit proving that his cars are poorly designed and manufactured.
 444. Elon Musk's union negotiating tactics are: "delay, deny, defer and claim to be conducting a fake study..."
 445. Elon Musk's take-over of Tesla from Martin Eberhardt, the actual founder, was based on an Obama Administration scheme to exploit Lithium mines in Afghanistan and Cobalt mines in the Congo, which Obama financiers had bought the rights to. Frank Guistra and Goldman Sachs helped come up with this scheme.
 446. A famous article about SpaceX quotes a top Musk staff staffer saying Musk is a "liar".
 447. A top SpaceX engineer has sued SpaceX for lying about rocket safety and says that Musk does not care about science, he cares about publicity.
 448. Most of the "famous" people Musk hired, quit after seeing what a sham his operations are.
 449. Jared Birchell, of Burlingame, is terrified that Musk will have him killed because he knows "where the bodies are buried", but he has to act demure and "stay-off-the-press-radar" for now to keep Musk from paying too much attention to him.
 450. Every property that Musk owned has been bugged by government, news or competitor specialists.
 451. Musk takes a number of drugs for mental issues yet he runs companies with products that can easily kill their users. Many think that he should be under closer federal supervision.
 452. The U.S. Department of Energy PR Department has been ordered by Obama officials (who, shockingly, are still there even during the Trump Administration) to always hype up Musk because, WHEN Musk fully fails, it will prove that the Department of Energy funded him because Obama ordered them to and not based on any merits. Most every Applicant for DOE funds beat Musk on every merit EXCEPT CRONYISM!
 453. Trump-hating Elon Musk wanted to nay say Trump by subjecting Tesla workers to COVID death by refusing to close plant
 454. Musk uses his own workers to play deadly politics with their lives in COVID closure he refused
 455. Musk totally lied about his capacity, ability and knowledge to make COVID ventilators in order to scam political funding
 456. Musk sent snoring devices instead of ventilators and lied about those products in order to Virtue Signal for his own hype
 457. Musk has had babies with many women in an Epstein-like master plan to seed the world with his DNA so that mini-Musk's will live on forever. Each ex-baby momma has been paid massive sums to keep quiet about his misdeeds.
 458. Musk uses his many mansions to hide money and operate tax manipulation efforts.
 459. The "Mainstream Media" is controlled by Democrat bosses who refuse to allow any negative news to be printed about Musk because Musk conduits funds to the DNC.
 460. One of Musk's 'baby ovens' known as "Grimes" has been revealed to have been used as a "sex toy for Musk" by Grimes friends.

461. The U.S. Department of Energy has a federal policy of promoting Musk's hype because they are liable for criminal prosecution because Secretary of Energy Steven Chu and his staff helped organize Musk's embezzlement of taxpayer funded monies and insider-traded on that profiteering.
462. Failing Elon Musk tries to make Alameda County pay for his failed NUMMI factory by using COVID as an excuse!

Why do you ignore, or cover-up, the fact that Musk is an organizer of the Malignant Narcissism And Cartel of the Silicon Valley Billionaire Frat Boy Club?

At almost every juncture, Elon Musk has made egotistical decisions that lead to more failures. His behavior is that of a person who has no care or concern for the health, safety and welfare of the American people. Nothing could epitomize that more perfectly than his grotesque suggestions that we should shoot nuclear bombs off on Mars or that nobody will care that his Starlink Satellites are designed to spy on the public. This would seem comical, and entirely unbelievable, if it had not actually happened.

In 2006 the many scientists told Elon Musk and his advisers of the high likelihood that a pandemic of lithium ion battery explosions would strike the nation and advised the incoming administration to take appropriate steps to reduce its impact. Obama officials hid the dangers because they owned stock in lithium and cobalt mines for those batteries, particularly in Afghanistan.

In November of 2007, the experts warned Obama that the country was likely to be afflicted with a devastating pandemic of lithium ion originating from Asian and Russian oligarchs.

In January 2009, the Obama administration was told by its own experts, Bernard Tse and his team who knew Tesla bosses, Sandia and others that the lithium ion batteries in Tesla cars had degrading chemistry which become a global pandemic of auto danger. Again, Obama chose inaction.

Obama and Musk have deprived Democratic-led regions of the country from receiving needed safety reviews of Tesla cars.

Over the year's since 2006, Americans working with the DOE, NHTSA, SEC and other groups accelerated warnings to Obama officials. These engineers and other science professionals were intentionally ignored in order to protect politicians stock market profits.

In these, [and any other examples](#), Musk and his inner circle of White House and Senate insiders ignored or purged experts and other truth-tellers, and lied about, misrepresented, deflected or denied the dire threat to the American people posed by the lithium ion battery scam.

Considered in total, Musk and his regime have shown themselves to be incompetent, callous, malevolent and deeply cruel in their response to the Tesla safety issue crisis (as well as to a plethora of other issues).

But to merely document the Musk regime's deadly failures in response to the dangers of his companies is to ignore the most important question: What are Musk's and his advisers' underlying motivations?

This forensic question must be answered if we are ever to have a full accounting of the Musk Corruption, and see justice done for the voters, the dead Tesla victims and those who will die in the future as well as the damage done to the broader American community.

The coordinated 'main-stream' media's preferred storyline that suggests Musk is simply incompetent doesn't add up because Musk has made the wrong decision every single time in terms of how crises like this are supposed to be dealt with. (i.e. Be consistent, transparent, factual, and credible.) It's increasingly not believable for the left-wing press to suggest that Musk has been distracted or inept during this crisis, in

part because of the level of his uselessness has become so staggering.

Maybe Musk is vengeful. Maybe he wants to wreck the economy to create investment opportunities? Heâ... s under the thumb of a foreign entity? He wants to cause panic and cancel the November elections? Heâ... s a fatalist? Who knows. And honestly, the specific â... whyâ... isnâ... t what matters now. What matters is asking the difficult questions and pondering what the Musk oligarchy is truly about, no matter what lurks in the shadowsâ...!

Now the press needs to shift some of its focus and ask the truly alarming questions about Musk and his motives. Because we still donâ... t know why he essentially ordered his companies to embark on such sinister ventures involving slicing up brains; over-priced deadly cars for rich douche-bags; digging holes for billionaire hide-outs, launching domestic spy satellites and manipulating elections along with his boyfriend: Larry Page, etc...

Psychologist and psychotherapists have an answer: Elon Musk is a "malignant narcissist". Musk's mental pathologies inexorably compel him to hurt and defraud large numbers of people â... including his own supporters.

Exports have looked at Musk's borderline personality disorders. They explain that sadism and violence are central to Muskâ... s malignant narcissism and his decision-making about his self-promotion. They warn that Musk is abuser locked into a deeply dysfunctional relationship with the American people and that, like other sadists, Musk enjoys causing harm and suffering to any that do not recognize his "tech Jesus" self-proclaimed superiority.

Ultimately, all psychologists generally concludes that Musk is engaging [in â... democidal behaviorâ...](#) in partnership with Obama and Pelosi and cautions that the many dead and injured (so far) from the Tesla fires and crashes are not simply collateral damage from the Musk madness, but rather the logical outcome of Muskâ... s apparent mental pathologies and the poor decisions that flow from them.

Musk is both denying responsibility by saying things such as, â... I take no responsibility. Weâ... ve done everything right.â... But at the same time, Musk is also sabotaging the efforts to stop the corruption in his empire. This is a very important aspect of Muskâ... s behavior. Musk is not just deflecting blame onto others, he is actively interfering with the politicians'sâ... ability to do their job by controlled Senators with bribes. Musk is not just incompetent. He is actively engaging in sabotage against competitors and reporters who speak the truth about him.

You might wonder: How does someone with his type of mind reconcile claims like â... I have total powerâ... with â... I take no responsibilityâ... ? He has said both things within a few days of each other. Well; That is a function of how the psychology of a malignant narcissist is structured. When Musk says things such as, â... I have total power,â... thatâ... s the grandiosity. â... Iâ... m in total controlâ... is a function of Muskâ... s paranoia, where everything bad is projected outward. Therefore, anything negative or bad is someone elseâ... s fault. Bad things are 'other people' in Musk â... s mind. The grandiosity and â... greatnessâ... are all him. Muskâ... s mind runs on a formula which bends and twists facts, ideas and memories to suit his malignant narcissism. This is why Musk contradicts himself so easily. He lies and makes things up. His fantasies all serve his malignant narcissism and the world he has created in his own mind about his greatness.

Another component of Muskâ... s malignant narcissism is sadism. That part of Muskâ... s mind is more hidden. People such as Musk are malignant-narcissist sadists because they, at some deep level, are driven to cause harm to other people. Muskâ... s life is proof of this. His pedo father and trophy wife narcissist mother demonstrate his roots. He enjoys ripping people off and humiliating people. He does this manically and gleefully. He has lied thousands of times. He threatens people online and elsewhere. Most psychologists believe that Elon Musk is also a sexual sadist, who on some basic level enjoys and is aroused by watching

people be afraid of him. In his mind, Musk is creating chaos and instability so that he can feel powerful.

Professor of psychiatry and psychoanalyst Otto Kernberg called that phenomenon â... omnipotent destructiveness.â... The bullying, the violence, the destruction, frightening people, humiliating people, getting revenge and the like â... such behavior is what Elon Musk has done his whole life. It is who Elon Musk really is. Unfortunately, too many people are still in denial of that fact.

Musk has to create and control a field of negative corrupting energy around himself. For example, he pressures the scientific experts to bend the truth to his dreamworld during his press conferences. The scientists are basically Musk's hostages. The American people are hostages as well to Elon Musk's lies. We are being abused by him. We know that Musk is lying. We know that he's doing nothing to help us. We feel helpless to do anything to stop him. It is causing collective mental despair. It is not that all Americans are suckers or dupes, it is that Musk is a master at such cruel and manipulative behavior.

Elon Musk is a master at getting negative attention, and the more people he can shock and upset, the better.

Malignant narcissists like Elon Musk view other human beings as kindling wood to be burned for their own personal enrichment, media enlargement and hype expansion.

Follow the facts to the obvious and true conclusion. If all the facts show that Elon Musk (and his little boy buddies Larry Page, Eric Schmidt, John Doerr, Reid Hoffman, Steve Westly, etc.) is a malignant narcissist with these powerful sadistic tendencies, this omnipotent destructiveness, where he's getting pleasure and a sense of power from dominating people and degrading people and destroying people and plundering people and laying waste to people, both psychologically and physically, then to deny such obvious facts is willful ignorance.

When Musk is finally exposed, like Elizabeth Holmes and Theranos or ENRON, it will be glorious.

Rather than making a prediction as to Musk's specific actions when the emperor has no clothes, it is more helpful to describe the type of actions he will take. Rather than trying to say, â... This is the move he'll make.â... Like in a relationship, Elon Musk is the abuser. He is the husband or father who is abusing his partner or children or other relatives. The American people are like a woman who is leaving her abuser. She tells her abuser, â... That's it! I am done with you!â... She has her keys in hand and is opening the door of the house or apartment to finally leave. What happens? The homicidal maniac Elon Musk will attack us, badly. Make no mistake. Elon Musk is going to find a way to attack and cause great harm to the American people if he believes that he will be fully exposed. He will use his spy satellites, his media controls, his remote controlled cars, his stock market manipulation tools, his Goldman Sachs economic destruction team and more. Musk will continue his crimes and shills like you will cover for him, unless the FBI finally arrests him.. and hopefully, you too.

Elon Musk's Hyperloop predicted to turn human beings into â... bloody applesauceâ... . Musk's latest taxpayer hand-out scam!

Put a crowd of human beings in a can and connect that can to the ground in a line that never varies. Shoot that can down the line at speeds so high that any error, even the tiniest one, could turn the people inside, instantly, into what one investigator calls â... bloody human applesauceâ... .

An earthquake, ISIS, a way-ward pick-up truck, a flood, a tornado, a cow on the tracks, a computer error, a driver mis-calculation, a confused self-diving car, a hacker attack, a solar flare, a fallen tree and hundreds of other possibilities could kill every passenger, at once, in the most horrible manner possible. It is a disaster nightmare guaranteed to happen. The ambulance drivers will be picking up the victims with a sponge.

For those who wish to do harm to others, now increasing in the new world, the Hyperloop gives them a perfectly timed opportunity to create a small anomaly which will cause an epic amount of death. The Hyperloop could not be a worse-timed, more ill-conceived operation.

Musk insists: â... Oh we will have the latest technology. Nothing will happen.â... But that is what the other CEO's of the companies that had terrible disasters said. The many filed lawsuits against Musk, for fraud; demonstrate that he has a loose relationship with the truth and a close relationship with â... Hypeâ... .

Regular trains have been suffering horrible human disasters, now featured in full color on You Tube, in increasing numbers. What kind of naivet   is making the Hyperloop people believe that they are immune to reality?

It is the open-eyed naivet   of Greed!

You see, Elon Musk has long been associated with railroad baron: Richard Blum. Richard â... Dickâ... Blum of the railroad property of the FBI-raided Solyndra and next door property Tesla; Richard Blum of the high speed rail project so corrupt that a law had to be made to try to slow him down; Richard Blum who has a wife named Dianne Feinstein, who keeps routing state and federal tax dollar kick-backs to all of Elon Musk's companies. Many think that the â... Hyperloopâ... is an attempt to bypass the curtailment of the Feinstein/Blum's other railroad project. â... THATâ... Richard Blum is also under investigation for profiteering, Chinese contractors, Post Office real estate scams, University regent rigging, and more.

Musk uses hype to baffle Senators into giving him billions of taxpayer dollars for all of his companies so that he can turn around and fund their campaigns with the very same money. It is called a â... kick-backâ... scheme.

Musk's billions and his Tesla, Solar City and Space X could not possibly still be alive without tens of billions of dollars of tax credits, free real estate, fee waivers and cash that state and federal agency heads just handed him in exchange for some â... perksâ... . The Hyperloop is the same story. Hyperloop can't exist without government kick-backs. Nobody in the consumer market asked for a â... Hyperloopâ... . As usual, all of the media stories and blogs expressing excitement about the Hyperloop have been traced back to Elon Musk, and his Troll Farms. It is nearly a joke that Musk's latest hype-scam actually has the word â... Hypeâ... in it! It is, as if, he is taunting the authorities. He believes that corrupt Senators protect him from prosecution. That bet may be running out.

Musk, and his Google investment partners, have been handed, as a kick-back, most of NASA, free NASA jet fuel for their private jets, free NASA airfields, Free NASA buildings, Free financing for their car, solar and spy satellite factories, Free H1-B overseas labor, and more..on the backs of the public.

While the inevitable disaster of â... human sausageâ... is horrific, the disaster of allowing Elon Musk to engage in another corrupt hype-scam, on the pain of the taxpayer, is the biggest, most horrific, disaster of all.

The Bottom Line: You and Musk are equally dishonorable crooks. You are helping Musk use our tax money to conduct crimes and you are protecting him with your PR hype lies.

We urge you to send this letter to Elon Musk and each of the â... executiveâ... front people at his companies. We urge Musk and his front operators to respond in writing to each of the charges in this letter, in writing, as well as in a Jury Trial and a public Congressional hearing.

Were You Attacked By A Sociopath Oligarch? Then Cause Them A One Billion Dollar Valuation Loss, Or Bankruptcy, In Return

By Anderson Key

I have had Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg (who are all frat boy bros and political co-conspirators) put hit-jobs on my friends and I. This is what we did to them in return.

What is tech corruption?

Corruption is the abuse of office for personal gain, and it takes many forms. Itâ... s the politician taking a bribe before awarding a building contract to the briber. Itâ... s the city council member paying for his family vacation with public funds. Itâ... s the official demanding bribes from citizens in exchange for access to clean water. It is a California Senator getting payola from Google, Tesla and Facebook with stock market accounts from those companies.

Corruption affects everyone, especially minority and vulnerable populations. As the biggest obstacle to economic and social development it harms societies in these ways:

- It undermines democracy and human rights by weakening governments.
- It diverts funds from public services such as health care, education, and sanitation.
- It discourages foreign investment, leading to fewer jobs.

Those numbers aren't the only reason to get mad. Corrupt officials divert funds from public services like health care and education to projects that will line their pockets. Corruption also harms societies by undermining human rights. It can cost people their freedom and sometimes their lives.

So how can you fight corruption? By making sure the laws in your country are enforced, says [former U.N. youth observer Jackson Dougan](#).

Many countries have anti-corruption laws, but, as Dougan explains, they may not have the resources to monitor and enforce those laws. That's where you can help.

You can make a difference...! We did!

Powerful people are often the ones taking bribes or making shady deals, and that discourages honest citizens with few resources. But thanks to new technologies, you don't need a lot of money or power to fight corruption. For example, a couple started an [anti-corruption website in India](#), where people can report instances when they have been asked for bribes.

Transparency International offers these ideas in its anti-corruption kit:

- Organize a committee to count and keep track of public supplies, such as school textbooks.
- Coordinate a sporting event that the community can participate in to raise awareness of corruption.
- Create a petition and take it to the decision-makers.

Thanks to new technologies, you don't need a lot of money or power to bring corruption to light. You can use social media and online platforms, such as [I Paid a Bribe](#), to crowdsource reports of corruption in real-time, even anonymously.

Web and smartphone applications such as [Open the Books](#) in the U.S. can help you keep tabs on government spending, including how much officials are being paid. These kinds of data can be used to hold corrupt officials accountable and push through reforms.

Transparency International offers other [simple ideas for making a difference](#) in your community.

December 9 is [International Anti-Corruption Day](#). Say no to corruption and learn more about what you can do to uphold [transparency](#).

Part of this text is adapted from [Stopping corruption might seem impossible. But there are simple ways to fight it.](#) and [Delete corruption from the palm of your hand](#) from ShareAmerica.

This is about powerful and greedy people abusing the public system in order to [manipulate TRILLIONS of government treasury and stock market dollars](#) into their own pockets. They lie, cheat, bribe, steal, attack, and even kill, in order to grab this money (provided from the pockets of the taxpayers). They create fake "political issues" in order to steer massive amounts of government money to "solutions" that they just happen to own the companies of. ("[Follow the Money](#)") They collude on cover-ups, cover-stories, pump-and-dumps, fake "Stimulus Funds" redirection and other illicit deeds. Famous politicians are a very big part of this crime. They are easy to spot via the tens of millions of dollars, in their personal bank accounts, which only appeared after they took office. They broke and separated America by promoting their fake causes, which divide the public, in order to benefit off of their exclusive stock market scams. In fact, if the, completely computer manipulated,

stock market did not exist, political corruption in America would be reduced by 95%.

In one example; The Silicon Valley Tech Cartel; an anti-trust violating organized-crime operation based on quid-pro-quo, ran a slush-fund in the U.S. government. [They manipulated the Dept of Energy](#) bosses so they would only fund political favorites and sabotage the competitors of those favorites in an epic violation of anti-trust and anti-racketeering laws. We will examine the investigation, exposure and take-down of each of the crooks involved in that scheme.

You have heard the term: "You can't fight City Hall", right? We did and we won! We fought the entire United States Government and we won! We fought a rogue division of the CIA and we won! We fought the President of the United States and we won! We fought the most powerful and insane billionaires in the world and we won! We got over 120 famous politicians and agency heads FIRED simply by preparing and filing an FBI-grade dossier on each one with all of the relevant jurisdictional agencies!

You can fight corruption and win!

YOU can use the public "Corruption Kill Box" tactic to wipe out crooked politicians, tech oligarchs and their financiers.

A Corruption Kill Box Procedure combines:

- 1.) Federal police investigations created by formal filed criminal referrals and FBI Form 302 overview drafts,
- 2.) Public class-action lawsuits,
- 3.) Massive news media disclosure blasts,
- 4.) Formal regulatory agency complaint filings,
- 5.) Individual lawsuits against political and agency executives,
- 6.) Documentary film production and distribution,
- 7.) The promotion and organization of Congressional hearings,
- 8.) Crowd-sourced social media public forensics,
- 9.) Open-source AI financial crimes tracking software.

The Kill Box (KB) procedure is an extinction-level event with a 100% success rate against corrupt entities. KB's only work on the corrupt, so non corrupt parties are safe from it's effects. ANY member of the public can engage in these totally legal anti-corruption actions. Just do it!

"Winning" does not mean you actually have to kill the bad guys dead. You can shame corrupt politicians, CEOs and insiders so bad that they will wish they were dead.

A number of famous tech CEOs recently had to resign. They did not leave to spend more time with their family. They were EXPOSED by citizen and journalist forensic actions. Many of them left before the entire Kill Box maneuver was completed. Even partial execution of the Kill Box can often lead to spectacular results.

The most effective interdiction process for political corruption is called "Citizen Forensics". It is the process of the crowd-sourced deep investigation of public officials, and their shills, followed by the global public

exposure and shaming of their illicit deeds. Federal law enforcement groups will even help you do this because you, and they, both have a common goal: to take down crooks.

Over the last decade, these procedures have been proven to work. This manual guides you through procedures that work totally, magnificently and effectively against evil people and scumbags!

Process Overview

Taking Down Corrupt California Politicians, Dirty Government Agency Executives And Their Tech Oligarch Bosses

At a high-level this is what you will do:

KEY TACTICS:

• We identified potential targets

• We developed an investigative theory

• We chose the best investigative techniques

• We examined issues unique to these proactive corruption investigations

• We mitigated special considerations in public corruption investigations

IDENTIFYING POTENTIAL TARGETS:

• We asked law enforcement and government sources, including inspectors general, and contract compliance, Congress members and oversight personnel who they suspect

• We asked citizens; business competitors or political rivals; disgruntled current or former employees; paid informants and cooperating defendants; individuals involved in the illegal activity who are seeking to limit or eliminate their criminal exposure by blowing the whistle on corrupt conduct

• We read print, television, and internet media outlets for tips

• We examined if each specific target may be identified via credible tips. Does source have a motive to lie? Is there corroboration?

• We looked at transactions that were identified or appear suspect without specific targets and used those to identify the entities and individuals involved and make a preliminary assessment of the roles played by these individuals, such as decision makers, knowledgeable actors, unwitting participants, and knowledgeable but uninvolved potential witnesses.

We always follow the money • We determine who profited from the transaction and how • Political corruption cases are always about the money! Use modern AI around-the-clock tracking software on the target and their family members to spot money laundering.

Each corrupt politician and operative made a profit from their corrupt actions and those benefits can always be traced with modern forensic accounting and tracking AI. The recent leaks from CPA, VC, law firm and lobbyist records make it even easier. The hack-and-disclose foreign actor campaigns (ie: Supernova, Spectre,

Solarwinds, etc.) have even added to those disclosures.

WE DEVELOPED AN INVESTIGATIVE THEORY:

â...¢ Theory gives direction to the investigation, but we stay flexible as new facts are leaked or exposed

â...¢ We make an initial assessment of whether the alleged corrupt conduct appears to be criminal, or whether it is civil or administrative in nature

â...¢ We then identify the elements needed to prove the crimes

â...¢ We then try to anticipate possible factual and legal issues and defenses and build our case to rebut or avoid them

â...¢ We then identify corrupt officials in jurisdictional law enforcement and regulatory agencies who may be stopping investigations in order to protect a Senator or tech oligarch that pays them or promises them a career advance

THE MAIN TYPES OF OUR INVESTIGATIONS AGAINST THESE GUYS:

- Historical cases â... based on document analysis and witness interviews

- Proactive/undercover cases â... running gamut from one day and one deal to elaborate and longâ... running multiâ... transaction and multiâ... target operations

CHOOSING THE BEST INVESTIGATIVE TECHNIQUES:

â...¢ We determined which investigative tools to use depending on a variety of factors, including the nature of the alleged violations, the type of investigation our members are conducting, and the resources we had available

â...¢ We used the normal progression from simple to complex, with information from initial steps leading to more advanced steps, such as search warrants and federally assisted wiretaps

â...¢ We mix and match our methods as appropriate

â...¢ Due to the hybrid public/private/citizen investigative team, an â... insurance policyâ... encrypted file set is pre-distributed to journalists, lawyers and Congressional insiders to protect citizen team members

NOTES ON SOME OF THE INVESTIGATIVE TECHNIQUES WE USED:

â...¢ Public Source Information

â...¢ Internet and media sources

â...¢ Court filings, including criminal histories, divorces and other lawsuits, bankruptcy filings, and administrative proceedings before agencies such as the SEC, FTC, and insurance and banking regulators

• Leaks and hacks

• Choicepoint, Autotrack, property records

• Financial disclosure forms; Campaign contribution records; Lobbyist registrations and disclosures

• Information from Parallel Proceedings

• Corruption cases are often set in backdrop of contract disputes and fraud cases. There may be ongoing civil litigation or administrative proceedings generating valuable information, and you should obtain relevant depositions, pleadings, transcripts and court orders.

• Despite common interests, do not work in tandem or actively use the civil litigant to further your investigation, such as by giving them questions to ask at depositions or having them seek documents for you.

• Mail Covers

• Very useful in identifying target's banks, investment firms, et al

• Trash Pulls • "Dumpster Diving"

• Can be very useful if target has recently become aware that they are under suspicion • panic can cause carelessness in disposing of valuable records

• Grand Jury Subpoenas • Documents

• Used to gather foundational materials. Consider whether the entity being served can be relied on to not disclose the subpoena, or whether the records sought are worth the risk

• Issue as early as possible • document production can be slow, particularly with voluminous requests, older records, and/or smaller producing institutions

Subpoenas • Documents to Obtain:

• Bank, brokerage, and other investment account records

• Credit reports & credit card records

• Loan and mortgage records

• Telephone records

• Corporate records

• Do quick initial review to determine subpoena compliance. Do not assume full compliance since many institutions see subpoena compliance as a nuisance and distraction from their "real" business.

• Documents must reviewed and cataloged for use during the investigation and for discovery and trial evidence purposes.

• Document review is time and labor intensive, but is usually the heart of any meaningful historical corruption case.

• Witness Interviews

• Essential investigative steps which require serious thought, planning, and preparation. When possible, conduct interviews after you have obtained and reviewed the documents related to the witness.

• General rule • your way up the chain of involvement and culpability

• Remember to consider interviewing the current and former confidants

Subpoenas • Testimony:

• General rule • do not use the grand jury as your interviewing forum. Usually far better to get voluntary interviews first.

• Two main situations to use grand jury testimony as an investigative tool

• Witnesses who may have useful information but will not agree to a voluntary interview

• Possible defense witnesses • find out what they will say and lock them into that story.

Immunity

• A double-edged sword. Gets you needed testimony but can cast doubt since people tend to dislike and distrust immunized witnesses.

• Weigh the costs and benefits carefully. Jurors will understand immunizing lower-level witnesses to build a case against the main targets.

• Attempt to secure testimony through cooperation plea agreements Jurors are more likely to believe a witness who has accepted responsibility for their actions by pleading guilty than one who has received a "free pass."

Evidence - Laboratory Analysis:

• Handwriting and fingerprint analysis can be very useful in cases with key documents and knowledge, intent, and/or participation questions. Fingerprints can often be found on documents even after an extended period of time.

• Before requesting handwriting analysis, speak to your examiner to find out if the questioned documents can be analyzed with any degree of certainty. If there is little chance of success, you may not want to do the analysis, particularly if fact witnesses can identify the handwriting or signature.

• Make the analysis request as early as possible

• Tax Return Disclosure Requests • 26 USC Section 6103

• Very useful since targets often understate income on tax returns and overstate it on loan applications,

corporate filings, and financial statements.

â...ç Disclosure requests take a significant showing and a court order, and normally come after the investigation has substantiated some level of wrongdoing.

â...ç After tax information is obtained under a disclosure order, there are important restrictions on their use and handling.

â...ç Eâ... Mail Account Information from Internet Service Providers ("ISP")

â...ç Two main types of information you will want: identification of the account holder; and, the stored content of the eâ... mails maintained on the system.

â...ç Can be very valuable since people use eâ... mail freely and do not realize or care that hitting erase or delete does not remove the content from the system.

â...ç Court orders and search warrants are needed to get this information.

Since ISPs frequently delete content from their systems, use preservation letters asking ISPs to save the content while you obtain the necessary court orders and search warrants for disclosure.

Warrants

â...ç One of the most powerful investigative tools in corruption cases. Obtains evidence on a surprise basis, before it can be redacted, destroyed, or withheld even when production is required by a grand jury subpoena.

â...ç Provides an opportunity to identify and interview those present at search site.

â...ç Serve contemporaneous grand jury subpoena for the same documents

Search Warrants On Senators And Tech Oligarchs:

â... Timing is Key Issue

â...ç Need to be far enough along in investigation to develop probable cause and to know what you are actually looking for.

Elon Musk moved from California To Texas to try to get away from our investigations but our biggest team of researchers happens to be in Texas, so he is screwed. Larry Page is trying to hide out in New Zealand with Peter Theil but investigation laws make it even easier to spy on people and their private jet tail numbers in New Zealand.

â...ç The search exposes the investigation, so it generally should not be done until you have exhausted any covert opportunities.

â...ç But, if you wait too long and your target becomes suspicious or aware of the investigation, valuable evidence may be destroyed or moved.

â...ç First and foremost, must commit to promptly and thoroughly review everything seized. This can be an extremely time and labor intensive. If you are not ready, willing, and able to do this review, don't do the

search.

â...¢ Second, be aware of the public impact of a search on a highâ... profile target or location. It may bring attention to your investigation, increase public scrutiny on you and the target, and raise expectations that charges are imminent.

â...¢ Third, need to plan to best execute the warrant while limiting disruption of important functions when searching a government office. public building

Computers and Computerized Data:

â...¢ Any business or office search warrant is going to include computers and computerized data, and you must be able to seize and use this information.

â...¢ Have computer specialists involved in planning and executing the search so that computers and system data can be copied on the scene. It is not desirable or feasible to take away the computers and deal with it later.

â...¢ Before searching, try to determine if review the seized data will require specialized assistance and equipment, and how you will make this information available for discovery and later trial use

Physical Surveillance:

â...¢ Surveillance is valuable to corroborate information which has been received, to link targets, and identify people associated with the known targets

â...¢ Trackers ("Bumper Beepers")

â...¢ A slapâ... on tracker put on in a public place does not require a court order. An order is required to hardâ... wire a longerâ... lasting tracker onto a vehicle.

â...¢ Beware that under federal law, you are now required to disclose a tracker warrant to the person whose vehicle was tracked at the conclusion of its use. Delays of this notification are at the discretion of the court.

â...¢ Pen Register and Trap and Trace Orders

â...¢ Allows realâ... time capture of the incoming and outgoing phone numbers for a particular phone number, and can also order phone company to provide subscriber information for each captured number.

â...¢ Requires a court order which can be based on a showing that the information sought is likely to be relevant to the criminal investigation.

â...¢ Consensual Recordings

â...¢ Audio or video recordings where one party to the call or meeting (normally an undercover agent or cooperating witness) has agreed to record the conversation. These are authorized without any court order so long as the consenting party is on the line or in the room.

â...¢ Consensual recordings are the "bread and butter" of proactive investigations.

• Title III Wiretaps and Recording Devices

• Extremely effective tools to investigate ongoing criminal activity, since they allow recording of phone calls and conversations without the presence or participation of an undercover agent or cooperating witness.

• Requires court order based on probable cause and satisfaction of other requirements, including exhaustion of other investigative options. The internal review process for a federal Title III is very demanding.

• Title III's are labor intensive, requiring real-time monitoring and minimization, and regular progress reports to the authorizing judge

Undercover Operations • put a plant inside the Senator's office or the Google , Netflix, Tesla, Youtube or Facebook executives personal office or home office staff:

• Development and Planning Stage Is Key

• First step is determining what you are trying to achieve (i.e. proving a completed crime, infiltrating ongoing criminal activity, developing new cases on suspected corrupt officials, identifying criminals).

• Second step is creating and implementing a scenario designed to effectively and efficiently achieve those goals. Scenario must be realistic in light of targets, resources, and objectives

• Undercover Operations • Avoiding the Usual Defenses

• Any undercover scenario needs to squarely present the criminal opportunity to the targets. Do not give the target a lack of knowledge or intent defense.

• Plan to avoid entrapment claims. Don't push too hard, offer too much money, or make it too easy, and offer opportunities for the target to back out.

• Undercover Operations • Time, Labor, and Resource Intensive

• Must be patient • will take time to develop trust and opportunities

• Money will have to be spent for payoffs and to set up an undercover business, create appearances, wine and dine targets, etc

• Manpower will be needed • UCAs, case agents, surveillance, et al

• Undercover Operations • Undercover Agents are Crucial

• Should make every effort to introduce a UCA into the scenario.

• UCA is essentially unimpeachable in contrast to either a cooperating defendant who is attempting to avoid charges or get a sentence reduction, or a paid informant, both of whom may have motives to lie

• Undercover Operations • Lights, Camera, Action!

• With or without UCA, to the extent possible, you should have consensual or Title III recordings of every

meeting and call.

• Tapes are unimpeachable and jurors expect them.

• Predication

• A reasonable basis to suspect the target is or has engaged in criminal activity. Much lower than probable cause standard.

• Criminal investigations should not be fishing expeditions or integrity testing operations, and predication helps prevent overreaching

• Predication helps overcome entrapment defense, claims of selective or vindictive prosecution, and Hyde Amendment (attorney's fees) claims

• Handling the Cooperating Witness ("CW")

• Give specific directions to the CW and make sure that the CW is told that no "freelancing" is permitted. Enforce this from the beginning, and do not let the CW seize control, even if he or she appears to be producing results.

• Corroborate the CW as much as possible, even on small points, and make sure all contacts between the CW and the targets are recorded. Jurors tend to disbelieve the uncorroborated, unrecorded word of a paid witness.

• Plan for impact of CW's plea agreement, immunity, or payments on the jury.

Flipping a Corrupt Senator, administrative aide or tech Insider:

- The tactical "Silver Bullet"

• Leaving a flipped insider in place can be an extremely effective tool in an ongoing public corruption case because of the knowledge and access they can bring to the investigation.

• Can be used to strengthen or build cases against existing targets and to identify, predicate, investigate, and prosecute other targets.

• In setting with institutional or high-level corruption, a flipped target in place may be the key to gaining entry to a "closed-shop" of corruption.

• Flipping a Corrupt Insider • Inherent Risks

• Beware of: being double-crossed by a flipped insider who warns other targets and/or helps them generate exculpatory recordings; inadvertent leaks; the insider committing other crimes or wrongdoing while "on our side."

• Must also make sure that you keep the insider safe.

• The Flip Attempt

â...¢ Determine the right target to pitch. Normally neither the top nor the bottom target. Assess which target may be most effective as a continuing cooperator

â...¢ Use the element of surprise and make strongest presentation possible.

â...¢ If target wants to cooperate, start by getting a confession.

â...¢ If target wants to consult an attorney, they need to do it on the spot.

SPECIAL CONSIDERATIONS IN THESE PUBLIC CORRUPTION INVESTIGATIONS:

â...¢ Impact of charges is enormous on elected officials or highâ... level appointees. Mere existence of an investigation can destroy a career or a life.

â...¢ Proceed carefully â... you do not want to be used by someone looking to settle a political score or strike back at a business rival.

â...¢ Conduct the investigation and prosecution "by the book." Expect the defense to attack not only the charges, but also the conduct of the investigation.

â...¢ Be prepared for heightened public and press scrutiny. Remember that in any big corruption case, the "world is watching.

If you are going to go to the trouble to interdict a political, corporate or agency â... bad guyâ... you should pick the ones whose termination and/or shame will have the greatest benefit for all.

For example; letâ... s look at a corrupt political "crime family" known as the "Paypal Mafia". They are also known as â... The Deep Stateâ... , â... The Silicon Valley Cartelâ... and other quaint names.

They have based their lives and culture around the Godfather movies and openly refer to themselves as a â... cartelâ... . They have gotten away with it, so far, because they have more money than most law enforcement agencies have. They have thousands of law firms, lobbyists and dirty tricks operatives who spend all day denying, deferring and delaying the justice that is coming for them.

The indisputable facts about them are the assertions that the Silicon Valley oligarchs:

1. Control business and politics like a crime Cartel
2. Are a white male fraternity who attack outsiders in organized manners
3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale men's clubs
4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
5. Operated the "Angelgate" collusion scandal
6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous class-action case
7. Controlled the Obama Administration and the Obama White House and traded most key staff with that

Administration

8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters
9. Use the same 10 law-firms who have been charged with public policy manipulation
10. Control internet news, media and information
11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments
12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices
13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name
14. Are a Mafia-like criminal organization
15. Have "command and control and exclusive beneficiary positions in ongoing, coordinated, criminal and anti-trust activities involving government and stock market funds..."

As a case-in-point relative to how hard it is to arrest these kinds of mobsters: the sex crime victims of Cartel member Jeffrey Epstein reported him to the DOJ a decade ago, yet nothing was done.

Our peers reported this Cartel to federal agencies in 2008, STILL, nothing has been done!

These people run Ponzi schemes with State and Federal funds in "stimulus" after "stimulus"!

They use free government money (your money), stock valuation pump-and-dump and black-lists to make certain that no competitor can ever operate against them in any market. The public has had enough of them. In addition to filing many formal federal requests for FBI, SEC and FTC investigation, you as a member of the public, can do much more

YOU can fight back and destroy these kinds of dirty oligarchs!

The tech Cartel is evil because they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; Their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to never help those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they

are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road VC operation should be raided by the FBI!

Indeed, the best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, Linkedin, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says: "In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires..."

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

"I can't even with how insular and incestuous and corrupt SF is. Mayor [@londonbreed](#) acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEhIlulkyj>"

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

This makes Eric Schmidt, Elon Musk, Larry Page, Mark Zuckerberg, David Plouffe, and that gang, ideal targets.

You Owe It To Yourself To Take Them Down!

In addition to the thanks of a grateful nation, you get some mighty fine feelings of satisfaction knowing that the David And Goliath story really can come true.

You can wipe out the bad guys out, all by yourself, in 100% legal ways.

You can wipe them out even faster with crowd-sourced forensics and anti-corruption ai software! join the rest of the public in an epic anti-corruption effort!

You will learn to write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You will use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You will use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any

corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU will run your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
 - Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
 - Every flight manifest they appeared on
 - Every bank account they have ever held
 - Every lawsuit, divorce record and police record they have ever appeared in
 - Every trust fund they or their family holds
 - Every shell corporation they, or their family holds
 - Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
 - Every item in the Swiss Leaks that cross connects to their holdings
 - Every item in the Panama Papers Leaks that cross connects to their holdings
 - Every item in the WikiLeaks that cross connects to their holdings
 - Every item in the Snowden Leaks that cross connects to their holdings
 - Every sex trafficking incident that connects to each of them alone, and in groups
 - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
 - Every item in the Quest Leaks that cross connects to their holdings
 - Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
 - Every sex service that their credit card payments every connect too
 - Every real estate transaction that any name or company they, or their family, were involved in, tracks to
- and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "Fuck You" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

You can show up at the front door of their home, office, hotel room or vacation cabin and legally arrest them with a citizen's arrest execution. More on that later.

First Steps

You will write up and/or organize a dossier on each crook.

YOU will hunt down each corrupt politician, oligarch and their operatives

First, send them a note, anonymously, to tell them that you, and the rest of the public, are coming for them.

Include a copy of this manual so that they know what is headed their way. Let them know that none of their New Zealand bolt holes, Cayman and Virgin Island hide-aways, private islands or Ukrainian dachas will protect them and that the public is EVERYWHERE that they are.

If they have nothing to hide, as they say, then they should not care. They should only be afraid of the truth if the truth is as disgusting as everyone says. If they are not buying hookers and rent-boys, laundering money, bribing politicians, manipulating elections, supporting sex cults, abusing interns, violating ant-trust laws and doing the other bad things they are charged with, it should not matter to them.

Nextâ...!

â...! get a manila file folder and label it â... Target Oneâ... . Make an encrypted folder on your computer and also label that folder â... Target Oneâ... . These folders are where you will organize all of the data you collect on your target.

You will undertake the investigative tasks, using your personal computer and your free time, completing the following missions (or getting others to):

1. Dig through their trash and buy their trash bags from the garbage man after they pick them up or pay the local homeless guy to do it for you
2. Locate a beneficiary for a probate proceeding with the name of their family on it
3. Research current and / or historical property holdings of every family member of the crooks
4. Identify mortgage information for each family member of the crooks
5. Identify secured lenders each family member of the crook has used
6. Identify related-party property transactions for money laundering

7. Determine current market value of real property that the crook or family members owns
8. Locate bankruptcy filings for any of their family members or companies
9. Retrieve and analyze bankruptcy records for any of their family members or companies
10. Uncover improper relationships with prostitutes, rent boys, sex cults, BDSM groups, One Taste, Nexium, Inner Circle and other sex abuse operations
11. Locate federal civil lawsuits against them on Pacer.gov
12. Locate federal criminal records against them on Pacer.gov and the 120+ private investigator websites
13. Retrieve and analyze federal civil and criminal records on each of their names
14. Retrieve mug shots from arrest records
15. Provide independent analysis from other investigators
16. Locate state and local criminal arrest records
17. Retrieve and analyze review criminal records
18. Acquire pictures of them entering or leaving restaurants, hotels, offices and other locations and identify who they are with
19. Locate home phone numbers
20. Locate cell phone numbers
21. Identify the owner of related home or cell phone numbers
22. Determine owners of corporations they were involved with
23. Retrieve and analyze corporate records
24. Locate current or former executives
25. Interview current or former executives
26. Find and retrieve judgment and lien filings
27. Research familial history
28. Connect the dots via AI software analysis tools
29. Locate witnesses for a civil or criminal lawsuit
30. Interview witnesses for a civil or criminal lawsuit
31. Find all of their assets hidden under family trusts and facade corporations
32. Find current or historical boat registrations
33. Find current or historical aircraft registrations
34. Search for hidden assets
35. Conduct business intelligence
36. Conduct discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you routes of all of the tail numbers of their aircraft
43. Identify a will for an estate they or a family member might own
44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistle-blowers from their ex employees and contractors
54. Vet expert witnesses
55. Interview industry sources

56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors for surveys about them
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. They use Google, Facebook and Linkedin to spy on you. Get the information that Google, Facebook and Linkedin sells to Axciom, Equifax and hundreds of other spy databases and run searches on THEM!
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Find all of their ex lovers and aides on Linkedin
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes
97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online

- newspaper that constantly exposes their crimes
100. Write every federal agency and demand investigation and prosecution of the perps
 101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
 102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
 103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
 104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
 105. Go to their share-holder meetings and hand-out flyers about their corruption
 106. Hire Charles Spies (<https://www.dickinson-wright.com/our-people/charles-spies?tab=0>) to sue them
 107. Hire Harmeet K. Dhillon (<http://www.dhillonlaw.com>) to sue them
 108. Hire COA (<http://www.causeofaction.org>) to sue them
 109. Hire law firms from China or Russia to sue them for a very low price
 110. Hire Steven S. Biss ([http:// www.linkedin.com/in/steven-s-biss-6517037](http://www.linkedin.com/in/steven-s-biss-6517037)) to sue them
 111. Blog about the corruption of the political targets every day with the day's news each day
 112. Read their divorce filings in court records and see who else might help expose their corruption
 113. Read their locations over the last 12 months - <https://www.protocol.com/government-buying-location-data>
 114. Talk to every neighbor that has filed a complaint about them
 115. Hire Pierce Bainbridge Beck Price & Hecht LLP to sue them, especially tech media companies
 116. Re-read all of the latest "How To Be A Private Investigator" books and brochures
 117. Ask Paul Kangas in San Francisco how he investigates the corrupt
 118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them
 119. Put a card table and a pop-up booth outside their office and hand out flyers about them
 120. Publish every stock market share they, and their family, owns
 121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm
 122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legallyâ...!
 123. Read [The Big Book](#) ☐ <https://www.amazon.com/Big-Book-Revenge-Serious-Getting/dp/0806521414> and many "How To Be A Private Investigator"-type books.

Will The World's Hackers Will Shut Down The Stock Market Forever?

- Stocks are entirely computerized
- Goldman Sachs and Kleiner Perkins staff claim that they can control any stocks that they want to, so can hackers do that too?
- What happens if all the hackers in the world target the stock market at once

By

[Mark Kolakowski](#)

Investors in the stock market, whether through individual shares or funds, face the threat of major losses and disruption from hackers, according to a number of Wall Street investors and regulators studying the issue, the Wall Street Journal reports. The possibility looks all the more real given already successful cyber attacks in recent years against high profile financial institutions including, among others: credit reporting agency Equifax Inc. ([EFX](#)); banking giant JPMorgan Chase & Co. ([JPM](#)); and the [U.S. Securities and Exchange Commission \(SEC\)](#). The threat is being taken so seriously at the highest levels of government that the Defense Advanced Research Projects Agency (DARPA), which oversees development of advanced technologies for use by the U.S. military, has been charged with identifying vulnerabilities in the financial system. (For more, see also: [Was I Hacked? Find Out If the Equifax Breach Affects You.](#))

Nightmare Scenarios

DARPA has been conducting brainstorming sessions with key players in the financial system to identify potential risks and to develop effective counter-measures against them. Particularly important in these discussions, the Journal notes, have been market participants engaged in [high-frequency trading \(HFT\)](#) or high-speed trading, the managers of [quant funds](#), and other persons with deep knowledge of the automated systems that drive so much of trading today, often with reaction times measured in fractions of a second.

Several scenarios for widespread financial chaos that hackers could attempt to generate are cited by the Journal. Shutting down a huge payroll processor would leave tens of millions of households, many of which also are investors, without sufficient funds to pay for unsettled trades. ADP ([ADP](#)) would be a prime target since it generates salary checks and direct deposits for about 16% of U.S. workers.

Hackers could try to inject false price quotes into data feeds. Publishing "fake news" through social media may set off a panic, especially if it purports to come from a reliable news organization. Indeed, in 2013 hackers got into the Associated Press Twitter account, and sent out a false report about explosions in the White House that injured President Obama, sending stocks tumbling, [according to U.S. News & World Report](#).

Seizing control of automated trading algorithms could be used to disrupt the markets. Another tactic might be generating an avalanche of phony sell orders to trigger a market crash. (For more, see also: [Most Costly Computer Hacks of All Time.](#))

Hack, Pump and Dump

In 2010, the SEC uncovered what it called a "hack, pump and dump scheme" run by a Russian trading firm, [per Wired.com](#). It involved buying thinly traded stocks in the trading firm's own accounts, pumping up their prices by placing buy orders at inflated prices through hacked accounts belonging to investors at Scottrade, then selling the shares in the Russian firm's own account. A short-selling variant also was used, with the Russian firm shorting stocks in its own account, then driving their prices down with sell orders placed through the hacked Scottrade accounts. An Indian man was convicted for running a similar scheme in 2008, Wired.com added. Scottrade has since been acquired by TD Ameritrade, a division of The Toronto-Dominion Bank ([TD](#)).

Global Threats

During the past several years, hackers have interfered with trading in various locales. In July, online brokers in Malaysia were shut down in a [distributed denial of service \(DDOS\)](#) attack similar to cyber blackmail previously waged against utilities and hospitals in more than 100 countries, [the Nikkei Asian Review reported](#). In 2011, hackers disrupted trading on the Hong Kong Stock Exchange, [per Reuters](#). In 2010, Russian hackers got into Nasdaq's networks, [according to Ars Technica](#), and were able "to roam unmolested for months and plant destructive malware designed to cause disruptions."

Stock Doxing

A shady trading practice is secretly to acquire damaging information on a company, short the company's shares, then release that information in an attempt to drive the share price down. Based on hacker lingo in which to "dox" is an attempt to damage the reputation of a person or organization online, so-called stock doxing has become a growing market manipulation technique, [according to a report in Wired UK](#).

The Department Of Energy's Crony Pipe Dream

Every year since 2000 our research group has checked in with consumer car owners and auto industry suppliers. The bottom line has always been that no consumer electric car market will EVER happen until every consumer can charge their car at their home garage or home apartment parking spot. NOBODY, in any significant numbers, is going to drive many miles to a charging station, wait in line to get to the charger and then wait more than 4 minutes for their car to charge. The current time to charge most electric cars is 40 minutes with all of the fussing around accounted for.

We proposed a hot-swap battery system that any consumer can use, without driving to some special location. A consumer can hot-swap a wheeled battery in less than two minutes.

Senators and government officials don't like that because they bought stock market investments in the ways that don't work. Those White House and Department of Energy officials get bribes and stock market payola from Proterra, Ener1, Tesla and the old school suppliers, so they will not allow non-lithium-ion batteries and they will not allow fuel cell and ultra-capacitors to exist. Those politicians will not allow the only solutions

that work to get to market. Here is what we told the Department of Energy and the White House, in writing for the last decade. With revelations like these:

MORAL HAZARD? Fed President Active Trader of Stocks...

Boston Official Who Warned on Real Estate Was Active REIT Trader...

Agency buying bonds of companies that don't seem to need central bank's help...

...it is clear the government officials, especially Department of Energy bosses, don't care about their salaries, they are entirely motivated by their stock market holdings, which compete with the public.

Yes, Department of Energy staff get paid by special interests via stock market insider trading and so those energy executives sabotage any company that competes with their lithium ion battery mining, assembly or marketing payola.

The United States has about 100,000 public chargers, far fewer than Europe and China. It needs 10 times as many, auto experts say, to complete the switch from combustion engine vehicles.

Over the past year, the electric vehicle charging industry has been swept up in a Wall Street gold rush because of growing optimism about electric cars and trucks.

In President Biden's vision of a green future, half of all new cars sold in 2030 will be electric. But something really basic is standing in the way of that plan: enough outlets to plug in all those cars and trucks.

The country has tens of thousands of public charging stations — the electric car equivalent of gas pumps — with about 110,000 chargers. But energy and auto experts say that number needs to be at least five to 10 times as big to achieve the president's goal. Building that many will cost tens of billions of dollars, far more than the \$7.5 billion that lawmakers have set aside in the infrastructure bill.

Private investors are pouring hundreds of millions of dollars into building chargers, but the business suffers from a chicken-and-egg problem: Sales of electric cars are not growing fast enough to make charging profitable. It could be years before most charging companies break even, let alone mint big profits like Exxon Mobil and Chevron.

Fast chargers — ones that can fill up an electric car battery in 20 to 40 minutes — cost tens of thousands of dollars but are typically used less than humdrum gas pumps. Yet the auto and energy industries need to build them to reassure people that they won't be stranded in an electric car with no plug in sight.

— E.V. charging infrastructure is the single biggest barrier to E.V. adoption, — said Asad Hussain, a senior analyst at PitchBook, a research firm. — You talk to anyone who's on the fence about buying an E.V. and the No. 1 concern that comes to mind is range anxiety. —

The European Union, which is further along in electrifying cars, had nearly 200,000 public charging points last year. China, where electric cars are even more common than in Europe, had more than 800,000 in 2020.

European and Chinese officials have offered better incentives and imposed tougher regulations in part because they want to win a global race to build the cars and trucks of the future. U.S. policies, including the infrastructure bill, have been more modest because most Republicans and some Democrats oppose the regulation and spending needed to quickly ditch fossil fuels.

Soon, even \$7.5 billion won't be enough to lay the groundwork for the electric age, Nick Nigro, founder of

Atlas Public Policy, a consulting and research firm based in Washington, said about the proposed federal spending on charging stations.

“... Is it sufficient? No,” he said. “... But it gets things going.”

Most drivers today plug in their electric cars at home, and only occasionally use public charging stations. But those stations will be crucial, especially to those who live in apartments and people who drive long distances.

For years, start-ups, automakers and other companies have been slowly building chargers, mainly in California and other coastal states where most electric cars are sold. These businesses use different strategies to make money, and auto experts say it is not clear which will succeed. The company with the most stations, ChargePoint, sells chargers to individuals, workplaces, stores, condo and apartment buildings, and businesses with fleets of electric vehicles. It collects subscription fees for software that manages the chargers. Tesla offers charging mainly to get people to buy its cars. And others make money by selling electricity to drivers.

Once the poor cousin to the hip business of making sleek electric cars, the charging industry has been swept up in its own gold rush. Venture capital firms poured nearly \$1 billion into charging companies last year, more than the five previous years combined, according to PitchBook. So far in 2021, venture capital investments are up to more than \$550 million.

On Wall Street, publicly traded special purpose acquisition companies, or SPACs, have struck deals to buy eight charging companies out of 26 deals involving electric vehicle and related businesses, according to Dealogic, a research firm. The deals typically include an infusion of hundreds of millions of dollars from big investors like BlackRock.

“... It’s early, and folks are trying to wrap their heads around what does the potential look like,” said Gabe Daoud Jr., a managing director and analyst at Cowen, an investment bank.

These businesses could benefit from the infrastructure bill, but it is not clear how the Biden administration would distribute money for charging stations.

Another unanswered question is who will be the Exxon Mobil of the electric car age. It might well be automakers.

Tesla, which makes about two-thirds of the electric cars sold in the United States, has built thousands of chargers, which it made free for early customers. The company could open its network to vehicles made by other automakers by the end of the year, its chief executive, Elon Musk, said in July.

Volkswagen also owns a charging network, Electrify America, which is already available to all makes of cars. In Europe, Volkswagen, BMW, Ford Motor, Daimler and other automakers jointly own a charging company called Ionity. Drivers pay fees to charge in both cases, but some automakers offer free charging for a few years to entice car buyers.

Energy giants like BP and Royal Dutch Shell have gotten into the business, too, by buying charging companies in Europe and the United States.

And 14 electric utilities from Maine to Texas have formed the Electric Highway Coalition to build stations at intervals of 100 miles or less. Utilities elsewhere are also building chargers, as are cities like Los Angeles and New York.

They are all competing in a tiny market: Less than 4 percent of new car sales and less than 1 percent of vehicles on U.S. roads are electric.

Charging companies claim they can succeed even if it takes years for electric vehicles to take over. Some businesses like ChargePoint have been around for more than a decade, while others raising money don't have much of a track record.

The chief executive of ChargePoint, Pasquale Romano, says his company avoids some costs by using contract manufacturers to build equipment and selling stations to employers who own electric vehicle fleets, retailers and others, who also buy software and maintenance subscriptions.

â... â... â... Everyone thinks this can go fast, and it can't,â... Mr. Romano said. â... You have to get in and start pedaling to help shape what it looks like.â...

Volta, a smaller charging company, places chargers near the entrances of retailers like Whole Foods Market and Walgreens. The chargers show ads, generating revenue, and the stations pay for themselves within a few years, said the company's president and a co-founder, Chris Wendel. â... It's a sponsored service brought to you by brands that care about what you're doing.â...

But some companies have stumbled. In December, TPG Pace Beneficial Finance, a SPAC backed partly by TPG, the private equity firm, announced that it would buy EVBox, an Amsterdam-based maker of charging equipment, valuing the company at \$1.4 billion.

In January, Jim Cramer, the host of CNBC's â... Mad Money,â... said EVBox was his favorite charging company because it is an established player in Europe. Shares of TPG Pace Beneficial climbed to \$31 in February, from around \$10.

But this month, the companies delayed the merger's closing because EVBox has not yet released its audited financial statements for 2020. TPG Pace said in a regulatory filing that there was â... significant uncertaintyâ... about the deal's completion, and its shares have fallen back to about \$10.

A spokeswoman for EVBox declined to comment.

Mr. Cramer no longer stands by the EVBox pick. â... I suppose we put too much faith in the financials as presented to investors at the time,â... he said in an email.

Since the start of 2020, 16 proposed SPAC mergers have been canceled or withdrawn. And investors and regulators have raised questions about the optimistic claims made by executives and promoters of SPACs.

Yet investors continue to pour money into charging. One charging company, EVgo, completed a SPAC deal and started trading in July. Trading in Volta started last month. Several other deals have been announced in recent months, including for Tritium, which makes fast chargers; Wallbox, which sells charging equipment, software and related services; and Allego, which operates a large charging network in Europe.

Some investors think that charging cars might not be the best approach. Lithium ion batteries cause wars, corruption, genocide, mass rapes, child labor, unexpected fires, environmental damage, cancers, liver damage, worker deaths and other awful things.

Last month, Ample, which aims to build stations where drained E.V. batteries are replaced with charged ones, raised \$160 million. Raed Masri, founder of Transform VC, an investor in Ample, said battery swapping would be better for people without a place to plug in their cars because it is much faster.

â... They need a quick energy delivery system, and only swapping provides that,â... Mr. Masri said.

Other investors are making lots of bets. Energy Impact Partners, a private equity firm based in New York, has invested in several charging networks, a repair app for charging stations and an app that optimizes charging.

Cassie Bowe, a principal at the firm, said that with electric vehicle sales growing fast, it was urgent to build a network to support them. "There's no more time," she said. "We need this infrastructure fast."

The reality is that the current plan can never work. There is not enough money, consumer interest, logistical embrace or other support for public chargers to ever be more than a feel good fancy. The consumer desire for speed-of-delivery increases over 10% per year. Nobody is going to put up with the wait, especially after sitting in rush-hour congestion every morning and night.

Electric cars will never happen in any volume unless every home and apartment has a charger, the rates for the chargers are less than gasoline and the batteries or energy cassettes can be instantly hot-swapped. Department of Energy officials avoid this option, though, because it competes with their stock market holdings. Corruption in America will never end until Congress makes it illegal for a public servant, or their family, to own stocks!

The Justice Alliance Supports The Fair Competition Council Anti-Corruption Efforts

- Anti-trust and anti-cartel actions are already underway with DOJ, FTC, SEC and public/private efforts

SAN FRANCISCO - A team of citizens known as [Justice Alliance](#) announced support today for President Biden's important action to reduce the harmful trend of corporate consolidation, increase American competition, and deliver concrete benefits to America's regular folks. Today's historic Executive Order established a whole-of-government effort to promote competition in the domestic economy. With 72 initiatives to be operated by more than a dozen federal agencies, it will promptly tackle some of the most pressing competition problems across the nation.

The White House will be rolling out a new website for this effort, called the White House Competition Council.

J.A. is also working with Inspector General offices and Congress (http://lifebooks.net/GOVERNMENT_CLAIM_1.55_Draft.pdf) to address the "Big Tech" cartel manipulation of government funding, US Patent Office process and crony funding deals between politicians and oligarchs.

The biggest causes of anti-competitiveness in America are 1.) Cronyism, 2.) Nepotism and 3.) Big Tech Cartel black-listing, censorship, favoritism and political special interest bribes.

Politicians are paid bribes via the stock market. America must make stock ownership by politicians, and their families, completely illegal. For example, California politicians own Google, Facebook and Tesla so they refuse to stop the illicit actions of those companies.

The United States Department of Energy has demonstrated some of the worst aspects of anti-competition cronyism and efforts like this may help fix agencies like DOE that are infected with corruption.

The Justice Alliance supports today's fair competition announcement by The White House. The Justice Alliance has been working with Congress, DOJ, FBI, FTC, SEC and Inspector General offices for many years to help bring competition-equality efforts like this to fruition.

Justice Alliance is a wiki-based crowd sourced community support group.

They are not funded by any political or corporate entity. They are simply members of the public who communicate with FBI, SEC, DOJ, FTC, IG and Congress to help support the enforcement of anti-trust laws and regulations. Said David, a JA staff volunteer, "*Justice Alliance is bi-partisan. The FBI and DOJ know us well, we have consulted to them on exact and specific case numbers we can quote. We are not an organization; we are citizens in America. Our mission is to help law enforcement, regulators and community groups stop corruption*" He also said: "*We take no money, offer no paid membership and are known to the Inspector General's office and every major government agency.*"

Justice Alliance helps get the FTC, SEC, DOJ and others to sue "bad guys" and put censoring, monopolistic, anti-public interest entities out of business. They claim to have a 100% success rate. Teachers, grocers, ex-FBI

and CIA officers and reporters are on their WIKI at <http://www.majestic111.com> which is a WIKI like WIKIPEDIA.

Source: [Justice Alliance](#)

A newly formed White House council to [promote competition across the US economy](#) and lower costs for American families is holding its first meeting on Friday in the Roosevelt Room at the White House.

The White House will be rolling out a new website for this council, called [the White House Competition Council](#), on Friday, a White House official told CNN. The group, which consists of eight Cabinet members and the chairs of seven independent agencies, was formed following an executive order [President Joe Biden signed in July](#) to promote competition within the economy.

In the meeting, National Economic Council Director Brian Deese "will drive home that promoting competition is a cornerstone of POTUS' Build Back Better agenda, and emphasize that it plays a key role in delivering on the (administration's) strategy to drive down prices for consumers," the official said.

Health and Human Services Secretary Xavier Becerra, Attorney General Merrick Garland, Transportation Secretary Pete Buttigieg and Agriculture Secretary Tom Vilsack "will present deep dives on the work they've been doing in this vein," according to the official.

"This meeting will underscore that the (executive order) was just the floor and that the President expects agencies to keep building out their competition agendas in addition to executing on the EO," the official said.

The official said agencies will be called on in this meeting to come up with new and creative ways to promote competition. As chair of the Competition Council, Deese will task each agency to come back to the council's next meeting with at least one new initiative, the official said.

In July, Biden signed a sweeping executive order to promote competition in the US economy, parts of which target a key business strategy used by Silicon Valley companies. The wide-ranging order aims to lower prescription drug prices, ban or limit non-compete agreements that the White House says impede economic mobility and cracks down on Big Tech and internet service providers, among several other provisions.

The White House also highlighted actions the administration has already taken since the signing of the executive order. The official pointed to the Surface Transportation Board working to protect competition in rail and the Federal Maritime Commission looking into surcharges that ocean carriers are charging American shippers, which the White House says drives up costs throughout the supply chain.

The Federal Communications Commission is also looking actions that shut down tenant's access to broadband options, the official said, and the Department of Agriculture is working to combat consolidation in meatpacking.

"The heart of American capitalism is a simple idea: Open and fair competition. That means that if your companies want to win your business, they have to go out and they have to up their game," Biden said when he signed the executive order earlier this summer.

"Let me be very clear: Capitalism without competition isn't capitalism. It's exploitation," Biden said.

Almost every person in America agrees that 1.) Cronyism, 2.) Nepotism and 3.) Big Tech Cartel black-listing, censorship, favoritism and political special interest bribes; have no place in The White House nor in any part of the United States Government!

THE KEY POINTS OF THE MAIN CASE:

INVESTIGATION NOTES ON THIS EVIDENCE -- ([Click HERE. on this title. to open the Evidence Gallery](#))

INVESTIGATION NOTES ON THIS EVIDENCE (ALL OF THE TEXT, HEREIN, IS FROM NEWS AND CRIME REPORTS)

--- Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and agencies like the United States Department of Energy and the U.S. Patent Office, as a stock market manipulation platform. Politicians turned the government into a cheap garage sale of cronyism!

---- This case affects who runs the United States Government and who profits from government decisions, a matter of many trillions of dollars.

---- THE EVIDENCE ITEMS ARE AT THE BOTTOM OF THIS PAGE.

---- The following folders provide evidence of the corruption in categories. The illicit acts described therein all involve the same perpetrators. The evidence items specific to this folder category are at the bottom of this page: A.) AFGHANISTAN RARE EARTH CORRUPTION; B.) CASE DIAGRAMS; C.) DEPT OF ENERGY CRONY SLUSH FUNDS; D.) FACEBOOK META CORRUPTION; E.) GOOGLE ALPHABET CORRUPTION; F.) MASS MEDIA MANIPULATION; G.) NETFLIX NEGLIGENCE; H.) PATENT THEFT; I.) REPAIRING SILICON VALLEY; J.) SICKO TECH FRATBOYS; K.) SONY PICTURES CORRUPTION; L.) STANFORD UNIVERSITY INVESTIGATIONS; M.) THE CORRUPT SENATORS; N.) THE ELON MUSK REPORTS; O.) THE HOUSING CRISIS; P.) THE LITHIUM BATTERY LIE; Q.) THE MEDIA ASSASSINS; R.) THE POLITICAL BRIBES; S.) THE SAN FRANCISCO CORRUPTION; T.) USING SOCIAL MEDIA SITES TO SPY ON CITIZENS; V.) THE SILICON VALLEY DEATHWATCH ---- The United States Department Of Energy, Since November 2008, has been almost entirely used as a scam crony payola slush-fund to pay off political campaign financiers of White House insiders. In addition, the Dept of Energy is used as a gate-keeper to sabotage and stall the competitors to those political campaign financiers of White House insiders. It is political racketeering operating in plain sight! The cover-ups by the IG, AJ and DOJ are ENDLESS!

---- At a high level: Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and government agencies as a stock market manipulation platform. Politicians turned the government into a cheap garage sale of cronyism! This kind of crime illicitly and illegally manipulates the power over who runs the United States Government and who profits from government decisions which are a matter of many trillions of dollars. The act and veracity of this crime enterprise will be proven to the Jury.

---- Based on that assertion it will then be proven that:

---- 1.) Plaintiff exposed and reported the crime to proper authorities through proper channels.

---- 2.) Some of those authorities used government resources to operate reprisal attacks against Plaintiff, using government resources to operate the attacks, as revenge for reporting the crimes.

---- 3.) The state-sponsored attacks were supported by the political campaign financiers of the government authorities in order to protect their payola conduits and stock market manipulations.

---- 4.) Over 40 harms, each to be detailed and examined in Court, were documented against Plaintiff by the actions of corrupt government authorities.

---- 5.) In a vast number of previous lawsuits, including one won by Plaintiff and his peers, it was proven that government offices infected with corruption regularly attack and harm citizens in reprisal.

---- 6.) The government, having been caught in these illicit actions, must now pay Plaintiff for his losses, damages, harms, back-pay fees and other compensation.

---- Plaintiff founded and owned a United States government-financed electric vehicle manufacturing company. His technology and metrics surpassed every: A.) price metric, B.) safety metric, C.) driving range metric, D.) national security metric, E.) debt Ratio metric, F.) non-bribery assertion metric, G.) 100% domestic worker hiring proof and EVERY other issue, which burdened Tesla and Fisker. Plaintiff worked as an employee and contractor for the USA. Tesla And Fisker were financed by the family and investors of Presidents Obama and Biden, as proven by Congressional investigators and email leaks. Government officials ordered attacks on Plaintiff, de-funding and reprisal because Plaintiff reported corruption at the White House, Department of Energy, and other government offices, and because Plaintiff's technology could obsolete the technologies that government officials were illicitly receiving bribes from via insider trading. The attacks and harms against Plaintiff used government resources paid for by taxpayers.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook - Meta - Google - Alphabet - Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS - Black Cube - Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- Thatâ... s right! Your public officials use federal agencies as dark-money laundering operations for their friends. -

--- If you are a taxpayer: You suffered damages!

---- If you are an American business: You suffered damages!

---- If you are Democracy: You were broken!

---- If you were a tech mobster: You made out like a bandit!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! -

-- Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes! The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â... economicâ... or â... healthâ... emergency â... stimulusâ... scam.----
IF YOU SEE CORRUPTION, REPORT CORRUPTION: Post a public web page with all of the details and evidence of the political corruption. Then invite all of the press, public, Inspector General's, FBI, SEC, FTC and law enforcement to that web page. This will prevent cover-ups and stone-walling and protect you from getting ignored! Never assume that the agencies that are supposed to help you, will help you!

A.)

AFGHANISTAN RARE EARTH MINING CORRUPTION -- ([Click HERE, on this title, to open the Evidence Gallery](#))

AFGHANISTAN RARE EARTH MINING CORRUPTION: Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age. --- LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; ... Bad Guys... have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them. --- WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. --- A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their cronies, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. --- Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. --- Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. --- DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. --- Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the "Jesus" of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. --- Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. --- Musk has been professionally diagnosed as a "psychotic narcissist." A "Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read

that mentions â... Muskâ... , at least 1/3 of the comments have been placed their by Muskâ... s paid shills. ---- Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to â... dirty tricks teamsâ... to attack his competitors and elected officials who Musk hates. ---- Musk never founded his companies. Muskâ... s â... Starlinkâ... satellites are domestic spy and political manipulation tools â... never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. ---- The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk canâ... t fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the â... per volumeâ... fire, crash, death and defect rate is THE WORST of any car maker in history! ---- Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or itâ... s suppliers and mining companies. ---- That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. ---- The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy peopleâ... s lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington and Burling and a host of â... assassinsâ... . ---- It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! ---- That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Muskâ... s partner) spends billions of dollars annually cover-up lithium battery fires and battery defects. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

THE CORRUPTION CASE DIAGRAMS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE CORRUPTION CASE DIAGRAMS: Graphic visual diagramatic outlines of the crimes and corruption. While it may be hard for some to read all of the papers associated with these political corruption crimes, these graphic presentations make it easy. Please share with your friends and peers. ---- California and DC politicians are being paid bribes with Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Rare-Earth mining rights; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Gallery art; Private jet rides and the use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington and Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists. **DEMAND COMPLETE LAWS TO MAKE ANY BENEFITS TO POLITICIANS TOTALLY ILLEGAL!-----** The Khaki Pants Mobsters Of Palo Alto: --- The "Silicon Valley Mafia" is comprised of The Sand Hill Road venture-capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) facade (Greylock Capital; Kleiner Perkins Caufield and Byers, Draper, Khosla Ventures, etc.) and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) that they control. ---- They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control and who own stock in their operations. They hire dirty law firms like MoFo, Wilson Sonsini, Covington, Perkins, etc. and dirty lobbyists like McBee, Podesta, Blumenthal, etc. to do their dirty deeds. ----They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America Foundation, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders. ---- They collude with black-lists, valuation payola, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, Jeffrey Epstein-like executive prostitute sex-trafficking clubs, trophy wife trades, the bribery of politicians and worse. They are felons who bribe politicians to halt investigations and interdiction efforts. ---- They have quid-pro-quo stock market bribe deals with Senators Reid, Feinstein, Harris, Boxer, Spier, etc. In the CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds, in order to profit at the expense of taxpayers. ---- They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis practitioners, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. The divorce court and lawsuit federal court records on them prove that they are sex-abusing sociopaths. ---- They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did. ---- Some of the top crooks and bribe-payers include: Google's Larry Page, his boyfriend Elon Musk; Google's Eric Schmidt, Andy Rubin, David Drummond, Kent Walker, Jared Cohen and Sergy Brin; Political manipulators David Plouffe, Steve Westly, Steve Spinner and Vinod Khosla; Sociopath billionaires Reid Hoffman, Richard Blum, Jeff Epstein, Tim Draper, Steve Jurvetson, etc. ---- They order their staff and associates to: bribe politicians; operate sex trafficking for them; manipulate stock market valuations; launder money; run off-shore tax evasion schemes; black-list employees and competitors; hide, down-rank, DNS dead-hole, shadow-ban, censor and server obfuscate enemies on the entire web; rig the U.S. Patent Office; help them cheat on their wives; and engage in massive volumes of insider, illicit, RICO and anti-trust violating crimes while bribing public officials to avoid prosecution. *** **CLICK THROUGH THE IMAGES, VIDEOS and**

C.

DEPT OF ENERGY CRONY SLUSH FUNDS -- ([Click HERE, on this title, to open the Evidence Gallery](#))

DEPT OF ENERGY CRONY SLUSH FUNDS: Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform. ---- Thatâ... s right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISHER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCIERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE "WINNERS" WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED! ---- If you are a taxpayer: You suffered damages! ---- If you are an American business: You suffered damages! ---- If you are Democracy: You were broken! ---- If you were a tech mobster: You made out like a bandit! ---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes! ---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds. ---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â... economicâ... or â... healthâ... emergency â... stimulusâ... scam. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances. ---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes. ---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt

politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay. ---- Top Lawyers from Perkins Coie and Covington & Burling admitted that they "CONTROL" who gets DOE funding, agency appointees and federal cash ***

D.)

THE FACEBOOK META CORRUPTION -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE FACEBOOK META CORRUPTION: Regarding Facebook AKA META, the issues, that the public and the news media have complained about include: producing child suicides and classroom shootings, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! FACEBOOK PROFITS OFF THE CLICKS FROM SCHOOL SHOOTINGS ---- MOST OF THE BIDEN AND OBAMA STAFF OWN PARTS OF FACEBOOK!!! ---- An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking.---- This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. ---- Facebook-Meta engaged in the bribery of public officials. ---- Facebook-Meta is a front for actions and planning in the Obama and Biden White House. ---- Facebook-Meta is part of a criminal Big Tech Cartel. ---- Facebook-Meta is an illicit monopoly that violates anti-trust laws. ---- Facebook-Meta operates a digital news and information â... protection racketâ... . ---- Facebook-Meta attacks competitors who cannot defend themselves. ---- Facebook-Meta uses public officials to blockade competitors. ---- Facebook-Meta manipulates the stock market illegally and unethically. ---- Facebook-Meta operates like a private, unregulated, government. ---- Facebook-Meta abuses CIA, NSA and DIA resources for unjust gains. ---- Facebook-Meta uses Stazi-like mind and ideology manipulation tricks on itâ... s site to try to get you to agree with Mark Zuckerbergs ideologies. ---- Facebook-Meta investors and investment bankers conspire in a Mafia-like manner. ---- Facebook-Meta steals patents and technology from others and refuses to pay for it. ---- Facebook-Metaâ... s Sandberg pretends to be the goddess of womenâ... s rights yet she is screwing the CEO of Activision, the biggest female sexual abusing company in America. ---- Facebook-Metaâ... s stock is owned by almost all of the California politicians and their families and that is why Facebook-Meta is never regulated and always protected by them for their political and profiteering manipulations. ---- Facebook-Meta is Pro Israel and anti-Arab and anti-Muslim. ----Facebook-Metaâ... s runs tens of millions of dollars of defamation attacks against competitors. ---- Facebook-Meta hides all media and news coverage for competitors of Larry Page and Elon Musk. ---- Facebook-Meta lies to the public about what they really do with the publicâ... s data. ---- Facebook-Meta receives millions of dollars of payments from government spy agencies each month. ---- Facebook-Meta promotes illegal immigration in order to get cheap labor and control votes. ---- Facebook-Meta runs VC funding back-lists against start-ups that are competitive. ---- Facebook-Meta bribes thousands of politicians in order to steer policy to their advantage. ---- Facebook-Meta is a criminal RICO-violating monopoly. ---- Facebook-Meta rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks. ---- Facebook-Meta pays bribes to politicians in Facebook-Meta stock. ---- Facebook-Meta manipulates who gets to see what web-sites, globally, for competitor black-lists. ----Facebook-Meta has a â... no poachingâ... Silicon Valley jobs blacklist. ---- Facebook-Meta bosses sexually abuse women and young boys. ---- Facebook-Meta bosses run sex trafficking operations in the Epstein and NXVIUM cults. ---- Facebook-Meta bosses control the NVCA financing cartel over start-ups. ---- Facebook-Meta scheme to take over the VR and AR markets is based on spying on the public with VR sensors and cameras. ---- Facebook-Meta controls national elections for anti-competitive purposes. ----Facebook-Metaâ... s law firms are corrupt conduits for payola and political conduit-relays. ----

David Plouffe and the Zuckerbergâ... s were recording in meetings planning a take-over of the United States Government. ---- Facebook-Meta bribes some politicians with revolving door jobs. ---- Facebook-Meta is primarily responsible for destroying the Bay Area Housing opportunities. ---- Facebook-Meta runs DDoS attacks on competitors by massively crawling their sites. ---- Facebook-Meta has paid covert bribes, PAC funds, real estate and search rigging payola to every California Senator. ---- Facebook-Meta has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Facebook-Meta crimes. ---- Facebook-Meta gets millions of dollars of taxpayer cash for spying on Americans inside the USA. ---- Nancy Pelosi and Dianne Feinstein have promised to â... protectâ... Facebook-Meta because their families profit off Facebook-Meta stocks. ---- Facebook-Meta VCâ... s and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Facebook-Meta and harm Facebook-Meta competitors. ---- Facebook-Meta bribed itâ... s lawyer into position on the board of the U.S. Patent office in order to have him protect Facebook-Meta. ---- Facebook-Meta rarely likes, or hires, black employees per federal and news media investigations. ---- Facebook-Meta hired most of the Washington, DC K Street lobby firms and told them to â... do what ever they couldâ... to control public policy for Zuckerberg. The film: â... Miss Sloaneâ... depicts only 2% of the illicit lobbying tactics Facebook-Meta employs daily. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, â... data miningâ... , â... machine learningâ... and â... AIâ... means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions. ---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So itâ... s like you are getting â... mind-rapedâ... without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VCâ... s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ... s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

GOOGLE ALPHABET'S BRIBES AND POLITICAL CORRUPTION -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

GOOGLE ALPHABET'S BRIBES AND POLITICAL CORRUPTION: Regarding Google â... Alphabet â... Youtube and their Cartel, the issues, that the public and the news media have complained about include: producing child suicides and classroom shootings, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! ---- An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. ---- They seem to be an organized crime entity protected by the politicians that they pay bribes to. ---- This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. ---- â... Google is a sick corrupt criminal business run by sex trafficking perverts and sociopathsâ...â... Say GOOGLEâ... S own inside employees, Divorce Court records of Google executives, 70+ State and Federal investigations and major news outlets. ---- Google spies on competitors and steals their technology. --- Google â... Alphabet â... YouTube stock is owned by almost all of the California politicians and their families and that is why Google â... Alphabet â... YouTube is never regulated and always protected by them for their political and profiteering manipulations ---- Google runs tens of millions of dollars of defamation attacks against competitors ---- Google hides all media and news coverage for competitors of Larry Pageâ... s boyfriend: Elon Musk ---- Google lies to the public about what they really do with the publicâ... s data ---- Google promotes illegal immigration in order to get cheap labor and control votes ---- Google runs VC funding back-lists against start-ups that are competitive ---- Google bribes thousands of politicians ---- Google is a criminal RICO-violating monopoly â... Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks ---- Google pays bribes to politicians in Google and YouTube stock ---- Google manipulates who gets to see what web-sites, globally, for competitor black-lists ---- Google has a â... no poachingâ... Silicon Valley jobs blacklist ---- Google bosses sexually abuse women and young boys ---- Google bosses run sex trafficking operations in the Epstein and NXVIUM cults ---- Google bosses control the NVCA financing cartel over start-ups ---- Google has placed the majority of the corporate staff in at least one White House ---- Google controls national elections for anti-competitive purposes ---- The company â... Polyhopâ... , in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality ---- Googleâ... s law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays ---- Google bribes some politicians with revolving door jobs ---- Google is primarily responsible for destroying the Bay Area Housing opportunities ---- Google runs DDoS attacks on competitors by massively crawling their sites ---- Google boss Andy Rubin runs a sex slave farm according to his own family ---- Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles ---- Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker ---- Google executives sexually abuse so many women that the women staff of Google walked out one day ---- In the 2009 White House, you could not swing a cat without hitting a Google insider ---- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator ---- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes ---- Google was funded by the CIA, via In-Q-Tel, a so called â... 501 c3 charityâ... which was caught with tons of cocaine ---- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA ---- Googleâ... s map service was a spy system paid for by taxpayers money that Google now profits off of ---- Nancy Pelosi and Dianne Feinstein have promised to â... protectâ... Google because their families profit off Google stocks ---- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks ---- Google VCâ... s and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors ---- Google bribed itâ... s lawyer into position as head of the U.S. Patent office in order to have her protect Google â... To rig insider stock trades, Google hides negative

Tesla stories and pumps positive Tesla stories on â... push daysâ... ---- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes ---- Google rarely likes, or hires, black employees per federal and news media investigations ---- Google hired most of the Washington, DC K Street lobby firms and told them to â... do what ever they couldâ... ---- The film: â... Miss Sloaneâ... depicts only 2% of the illicit lobbying tactics Google employs daily ---- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed ---- Googleâ... s David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds ---- Google, and itâ... s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Googleâ... s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. ----At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... F.)

MASS MEDIA MANIPULATION BY SILICON VALLEY: News outlets in our country exhibit the widespread â... criminalityâ... and â... defamation tacticsâ... of a mostly corrupt news media landscape. The Gawker/Gizmodo/Jalopnik tabloid empire is nothing more than an organized info-crime operation backed up by offshore money-laundering through Russia and the Ukraine. ---- Despite widespread recognition of their deceptive conduct, fools still read these trash publications. ---- There are massive conflicts of interest related to many news media outletsâ... conglomerate-ownership as well and industry figuresâ... financial and familial links to companies, interests, and people they ostensibly report on. ---- â... Fake newsâ... isnâ... t the proper term. Itâ... s the â... propaganda arm of the Silicon Valley Socialist oligarchsâ... In most cases. ---- There are only about 7 men who control all of the news and media in America. That's right! If you trace the media ownership in America, it all comes down to control by a few crazy old white boys ---- Itâ... s no different than the Chinese Communist Party [and] the propaganda they put out. Itâ... s no different than what the Soviet Union did with the old Pravda media, and, quite frankly, itâ... s no different than how Putin controls the media today, where 95 percent of his media in Russia is propaganda for the Putin regime. Itâ... s the same thing here with The Washington Post, NY Times, CNN, Hearst publications and all of the media owned by Hollywood and Silicon Valley. ---- Partisan news media should be treated as such. News media outlets such as the CNN, the New York Times, and the Washington Post regularly describe themselves as â... politically objective and non-partisan.â... In reality they are a propaganda machine for sick Silicon Valley oligarchs. ---- The information institutions are corrupt. For example, Elon Musk is one of the most corrupt men in the world yet the socialist propaganda news media wonâ... t cover any of his crimes and corruptions in their publications because he pays political bribes to keep his dark side hidden in their media. ---- The public should not hurt legitimate news media outlets by engaging with and speaking to corrupt propaganda operations. One should only speak with genuine news media and not reward unethical companies with their time. ---- The following diagrams show what various independent researchers have discovered: The Manipulation Techniques Of Silicon Valley Media Outlets ---- A common tool Google, Facebook and Twitter use to exert control over their victims. ---- We all use manipulation at some point in our lives, whether it be telling a little white lie to get out of a situation, or using flattery to get what we want. For some people, however, using manipulation is a way of life, and their first weapon in an arsenal of techniques to overpower their victims. ---- Who is at risk from the Silicon Valley media predators? Predators use a range of manipulation techniques in order to control their victims, but they often target certain types of personalities. This is because they want to be able to easily manipulate a person, and particular vulnerabilities in a person lend themselves to manipulation. You are more likely to become a victim of a media predator if you have low self-esteem, are naïve, easy to please, lack an assertive nature and have no confidence in yourself. ---- Here are 20 of the most common news pundit manipulation techniques: ---- 1. Lying - Predators are constantly lying about practically everything in their life. They do this to wrong-foot their victim and confuse them. Lying is one of the manipulation techniques psychopaths typically use because they have no qualms about it. ---- 2. Not telling the whole story - This is different to lying as a predator will often keep a key part of the story to themselves in order to put their victim at a disadvantage. ---- 3. Frequent mood swings - Never knowing what mood your partner is going to be in when you get home, whether theyâ... ll be happy or angry is a very useful tool to the predator. It keeps their victim off balance and makes them more malleable. ---- 4. Love-bombing and devaluation - Narcissists typically use love bombing as a manipulation tactic, they will go on a charm offensive and get you hooked into thinking this is the best relationship ever, then theyâ... ll drop you like a ton of bricks without explanation. ---- 5. Finger Pointing Punishment - This can include anything from constant nagging, shouting, the silent treatment, physical violence and mental abuse. ---- 6. Facts Denial - Often the simplest way a predator will manipulate a person is by denying the thing they are accused of ever happening. ---- 7. Spinning the truth - How many times have politicians twisted the facts to suit themselves? This spinning of the truth is often used to disguise bad behaviour by predators such as sociopaths. ---- 8. Minimising The Urgency - Where a predator will try and play down their actions as not important or damaging and shift the blame onto the victim for overreacting. ---- 9. Plays the victim - The manipulator will themselves take on the role of victim in order to gain sympathy and compassion from those around them. We

as humans are naturally drawn to helping people when they are suffering. ---- 10. Targets the victim - When a manipulator accuses the victim of wrongdoing, they are making the victim defend themselves whilst the predator is able to mask their own manipulation techniques. The focus is on the victim, not the accuser. ---- 11. Positive political reinforcement - This includes buying expensive presents, praising them, giving money, constantly apologizing for their behaviour, excessive charm and paying lots of attention. ---- 12. Moves the goal posts - You might think you know where you stand with a person, but if they are constantly moving the goal posts in order to confuse you, then itâ... s likely youâ... re dealing with a predator. ---- 13. Diversion - Diverting the conversation away from the perpetratorâ... s act and moving the conversation onto a different topic is a typical way predators manipulate their victims. ---- 14. Sarcasm - A predator will often be sarcastic about their victim in front of others. They do this to lower the self-esteem of the victim and to show others how powerful they are. ---- 15. Guilt tripping - Someone who manipulates will often guilt trip their victim by saying that they donâ... t care about them, or that they are selfish or their life is easy. It all helps to keep that person confused and anxious. ---- 16. Flattery - Using charm, praise or flattering the victim is one way of gaining that personâ... s trust. The victim is naturally happy to receive such compliments but in doing so lowers their guard. ---- 17. Playing the innocent card - A true manipulator will feign utmost shock and confusion at being accused of any wrongdoing. Their surprise is so convincing that the victim may question their own judgement. ---- 18. Over the top aggression - Manipulators often use rage and aggression to shock their victim into submission. The anger is also a tool to shut down any further conversation on the topic as the victim is scared but focused now on controlling the anger, not the original topic. ---- 19. Isolation - It is far easier to keep a person under control if they are isolated from family members and friends who could shed some light and truth on the situation. ---- 20. Feigns political love and empathy - News Predators such as psychopaths and sociopaths do not know how to love someone other than themselves, and cannot feel empathy, but they can pretend to in order to inveigle others into their lives.---- If you watch out for the above manipulation techniques, you can keep yourself out of a media predatorâ... s clutches. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, â... data miningâ... , â... machine learningâ... and â... AIâ... means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions. ---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So itâ... s like you are getting â... mind-rapedâ... without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by

those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VCâ... s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ... s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

NETFLIX NEGLIGENCE AND POLITICAL MANIPULATIONS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

NETFLIX NEGLIGENCE AND POLITICAL MANIPULATIONS: Per Susan Deen:" Letâ... s face it, Netflix sucks. Netflix spies on you and sends your psychological profile, location and interests off to spies, political parties, marketing services, Google, The Silicon Valley mafia, the IRS, the DEA.. pretty much anybody can see what you are doing on Netflix.NETFLIX is not a movie service. NETFLIX IS AN ULTRA-WOKE, ANTIFA PROPAGANDA OPERATION THAT SEEKS TO PROMOTE EXTREMIST POLITICAL AND SEXUAL SOCIAL CONCEPTS! If you like to get pandered to and treated like one of the data cattle on the privacy harvesting ranch then Netflix is your Pimp! Netflix pretty much works for Obama and his political gang and pushes woke mass media manipulation and gay sex social programming at you as a result. If you are a guy, Netflix really, really, really wants you to cut your penis off and call yourself a girl!" ---- Whats worse is that with so many studios refusing to license content to Netflix now, streaming services such as Disney plus, Peacock and many more are on the rise. Netflix sucks. Somehow, Netflix subscribers are left feeling like thereâ... s nothing to watch on a platform that force feeds an over abundance of content from Indian and Mexican movies to itâ... s viewers. ---- Every Netflix subscriber claims thereâ... s nothing above â... B-listâ... movies being served to them on a thirteen dollar per month silver platter (and sixteen for 4k) Not to mention how unfavorable the label â... Netflix originalsâ... have become when slapped on a movie or show: â... Netflix originalsâ... is building a negative rep on par with Nickelback and Adam Sandlerâ... s series of Happy Madison productions movies. ---- Everyone knows that Netflix is bad now and getting worse every day. Netflix makes young adults feel the same way the price of extra guac at Chipotle doesâ...! and that is the: â... I donâ... t agree with this, but please take my moneyâ... , feeling. They know theyâ... ve got your money because itâ... s too hard to say no each month because Millennials are so stupid and sheep-like. ---- Did we mention the increase of the monthly price? Netflix sucks. Netflix only hires Burning Man type extreme hair-dyed hipsters who have an ANTIFA-type attitude, especially if they are from Asia and will work like dogs for McDonaldâ... s type pay and conditions. People who use Amazon Prime and then go back to Netflix can really see how much Netflix sucks. They would rather set their genitals on fire than stay with Netflix. ---- Netflix will make you love crippled, fat, black transgendered lesbians. You will get so many of them you wonâ... t be able to stand it. ---- A while back Netflix destroyed its own rating system. What we mean by that isâ...! they literally deleted it. Now, at the start of each movie weâ... re forced to either check rotten tomatoes or risk the next 25 minutes to figure out if a show or movie is worthy of our time and attention. Netflix removed their rating system in order to hide the fact that everyone thinks their movies are absolute shit! ---- Netflix stole most of itâ... s streaming media technology from small inventors that it never paid. If any inventor tries to sue Netflix, Netflix just sends millions of dollars of lawyers after them so that the inventors can never get paid. It is best just to put Netflix out of business. ---- Netflix spent zillions of dollars making new content but the content they made turned to be the worst shit ever created. When Obama and his buddies make media to try to program you into being â... wokeâ... , it ends beng heartless propaganda. Seriously, Netflix spent more money making shittier content han anyone in history. Itâ... s as if Netflix was just funneling money back to Biden and Obama. Speaking of funneling money, the FBIâ... s Peter D. Cair has been busting Netflix executives who steal big money through the Netflix stock market system. ---- If you use

Netflix you enter a â... Netflix pitâ... you fell into and canâ... t get out ofâ...! ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, â... data miningâ... , â... machine learningâ... and â... AIâ... means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions. ---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So itâ... s like you are getting â... mind-rapedâ... without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VCâ... s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ... s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.---- Netflix handed that sex-obsessed fetishist Ryan Murphy (pictured) \$300 million to create flop after flop after flop. Oh, and whereâ... s all the America-is-racist shit? Iâ... ll tell you where all that garbage is: itâ... s buried in that pile of shit Netflix calls a â... content menu,â... and as far as eyeballs, itâ... s all losing to 20-year-old movies everyoneâ... s already seen, like Happy Gilmore. Netflixâ... s whole plan was to release a new movie every week, which it did. But those movies were all shit â... all preachy, insulting, anti-human nature exercises in woketardery.----So now that The People have spoken and the bottom has begun to fall out of Netflixâ... s stock price â... from \$679 in November to \$192 today â... and now that Netflix is losing subscribers and expecting to lose two million more this quarter â... the Netflixards need to rethink some thingsâ...!It makes perfect sense for Netflix to want to attract talent. What makes no sense is standing back and allowing them to produce their insane vanity projects that have no appeal to any normal human being. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

H.)

PATENT THEFT BY BIG TECH OLIGARCHS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

PATENT THEFT BY BIG TECH OLIGARCHS: LARRY PAGE AND GOOGLE BASE THEIR BUSINESS MODEL ON STEALING YOUR TECHNOLOGY. Larry Page's Obsessions Became Google's Business Model. Larry's Boyfriend Elon Musk Conspires With Larry Page. Page Has Been Caught Skulking Around Tech Parties To Steal Ideas ---- SEE HOW YOUTUBE, NETFLIX, FACEBOOK, GOOGLE, AMAZON AND THE SAND HILL ROAD VC's STEAL YOUR STUFF UNDER THE GUISE OF TAKING A LOOK UNDER THE HOOD ---- Draper Fisher, Kleiner, Andressen, Sony Ventures, et al. need to go to prison for running a mob-like, RICO-violating, intellectual property theft mill! ---- The contact start-ups, ask them to come in and pitch, reject them, then send their business plans to Google, Netflix, Sony and Facebook (WHO THEY FINANCE) and tell them: 'HERE COPY THIS, JUST CHANGE THE NAMES OF THINGS.' The Sand Hill Road VC's are mobsters and scumbag thieves! Tom Perkins, James Bronkema and many other of their members ratted them out in recorded statements! ---- 'We discovered that the patent lawyers that were supposed to be helping us! That we paid to provide our income; were covertly our competitors and were working as shills, for our enemies. Our patent lawyers were; either, financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes. Their own family members and ex-staff have now supplied evidence against them!â...!â... ---- <http://www.usinventor.org> ---- When you spend your life on something, only to find that it was being sabotaged by those you depended on, call us: <http://www.usinventor.org> ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- U.S. SENATORS do not get to own Google, Facebook and YouTube, and their suppliers, while exclusively financing Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg with government money (your money) and tax waivers, while sabotaging their competitors and cutting them off from the same government benefits. U.S. Senators and the highest officials in the land are also financed by Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg for their political campaigns. The United States Government is supposed to arrest Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg for corruption, not help them, and Goldman Sachs, do more crimes! ---- New and dramatic game-changing evidence has emerged in the last two weeks from a huge volume of document leaks and other Court hearings. Plaintiff presents this case, not only as a claim for damages, but also as an anti-corruption effort public-service. Harms and damages have been accelerated against Plaintiff, as recently as this week, due to the proximity to elections. Plaintiff was told by a senior member of The National Venture Capital Association: 'â... .. We (The NVCA) are not going to let you get any more patents that compete with our operations. We (The NVCA) control the Patent Office and we decide who runs the Patent Office. Facebook is our baby and we will destroy you if you threaten the babyâ...!â... .. Recent evidence has proven, beyond any doubt, that the Facebook, Google Cartel does, indeed, run the USPTO! --- The charges are filed against Defendant, THE UNITED STATES PATENT OFFICE, a representative entity which has a 1.) command-and-control, 2.) financing, 3.) legal authority and 4.)

management influence over the actions and claims of harm described herein and has been proven, in thousands of past court cases, to use reprisal attacks against A.) whistle-blowers and B.) the competitors to political campaign financiers of high-level government officials. Plaintiff has no knowledge of, or ability to, accurately quote or include any citation to a statute, rule, or order or â... little lawyer numbers in parenthesesâ... unless a lawyer is supplied to Plaintiff. Plaintiff maintains that the ongoing blockading of Plaintiffâ... s representation by a qualified lawyer is a violation of his Constitutional rights to a fair hearing which is caused by Defendants who seek to engage in further cover-ups. ---- When the United States Patent Office, in a federal hearing, said that Plaintiff invented the core technology operating Facebook and Google and then refused to give him his patent paperwork, it seemed like the game might be rigged. After receiving tips from USINVENTOR.ORG, Wall Street Journal, TECH CRUNCH and Congress; Plaintiff hired ex FBI and CIA agents to check it out... BOY, was it ever rigged. Facebook's own staff and investors work INSIDE the U.S. Patent Office in order to protect Facebook from having to pay for technology they stole. Then they showed Plaintiff that most of the Obama and Biden Administration COVERTLY OWN FACEBOOK. Talk about 'rigging elections' and 'rigging industries'â...! Facebook executives even sit on USPTO boards!!! ---- What U.S. judge or regulator is complaining? For example, (as one example of MANY THOUSANDS) who would complain about Sands Capitalâ... s failure to file the S.E.C. Form SC 13G notices of acquisition of Facebook, Baidu and Athenahealth stock? ---- Not S.E.C Chairman Mary L. Schapiroâ... she held a boatload of â... dark poolâ... Fidelity, Vanguard, AllianceBern, TIAA-CREF and T. Rowe Price funds. ---- Not Commerce Secretary #1 Rebecca M. Blankâ... she held TIAA-CREF, Vanguard and Fidelity funds. ---- Not Commerce Secretary #2 Penny S. Pritzkerâ... she holds up to \$23.4 million Morgan Stanley, JPMorgan and Goldman Sachs Facebook dark pools. ---- Not Attorney General Eric H. Holderâ... he held T. Rowe Price and Fidelity funds. In fact, Holder held Fidelity Contrafund, the largest single Facebook mutual fund stock holder, valued at \$413 million. ---- Who in the judiciary would complain? ---- Not Leader v. Facebook Chief Justice John G. Roberts, Jr.â... he held Microsoft, T. Rowe Price, Fidelity, Janus, Vanguard and Blackrockfunds, including Fidelity Contrafund. ---- Not Leader v. Facebook Federal Circuit Judges Alan D. Lourie, KimberlyA. Moore and Evan J. Wallachâ... they held Fidelity, Vanguard and T. Rowe Price funds, including Fidelity Contrafund. Not Leader v. Facebook District Court Judge Leonard P. Starkâ... he held Vanguard and Fidelity funds. ---- Not Leader v. Facebook Patent Office Director David J. Kapposâ... he held over a million dollars of Vanguard funds. ---- Investigators uncovered a felony, organized crime-level of QUID PRO QUO media manipulation, RICO violations and anti-trust law violations between government officials and Facebook blockading Plaintiffs patent and business rights. Over 500 high level government officials own Facebook and harm it's competitors to protect their insider trading stocks. Ask FINCEN to show you the complete family account records on EACH of the perps! ---- Plaintiff noticed that nobody every prosecutes these people. It is like they are protected by a crony quid pro quo protection racket running all the way up to the Oval Office! ---- Can you explain that USPTO? It kind of sounds like bribery, cronyism, quid pro quo and racketeering!*** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

I.)

REPAIRING SILICON VALLEY'S CORRUPTION -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

REPAIRING SILICON VALLEY'S CORRUPTION: The companies and corrupt politicians of Silicon Valley must be erased in order to, first, repair Silicon Valley. ---- The Silicon Valley tech Cartel (AKA: â... Paypal Mafiaâ... , â... Deep Stateâ...) is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; FACEBOOK AND GOOGLE MAKE \$100M IN PROFITS OFF OF EACH CLASSROOM SHOOTING!!! ---- They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are â... rape cultureâ... take-what-they-want

misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the â... no poachingâ... CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI and SEC investigations; They hire women to act as â... trophy wivesâ... and â... beardsâ... ; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times. ---- They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws. Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history. Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors. When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy! When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewardsâ... for any action! Do you wonder how big politician insider stock trading is? ---- Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the â... In Memory Ofâ... section, below, were disclosing. These are massive crimes! The perpetrators operate a massive and abusive national sex cult. ---- The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. ---- These menâ... s sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergey Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. ---- This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the iceberg. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Googleâ... s Eric Schmidt is under massive investigation. You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid â... not just for sex but for the oligarchâ... s endless need to feel that they can control anyone for any reasonâ... lâ... . Multiple attorney generalâ... s controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer, are involved in these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses! ---- All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps. ---- The Smedley Butler â... Business

Plotâ... from the past is not unlike the coup that Google and clan tried. See details in Emily Changâ... s book: BROTOPIA; Roan Farrowâ... s book: CATCH and KILL; Edward Snowdenâ... s Book: PERMANENT RECORD; Peter Schwetzerâ... s book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foerâ... s book: WORLD WITHOUT MIND; Corey Peinâ... s book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyonâ... s book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws. â... 90% of these guys came from the same date-rape fraternity houses involved in the recent college rape cases. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, â... data miningâ... , â... machine learningâ... and â... AIâ... means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions. ---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So itâ... s like you are getting â... mind-rapedâ... without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VCâ... s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ... s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

J.)

THE SICKO TECH FRAT-BOYS AND THEIR BIG TECH SEX CULTS -- [\(Click HERE. on this title. to open the Evidence Gallery\)](#)

THE SICKO TECH FRAT-BOYS AND THEIR BIG TECH SEX CULTS: Brotopia is the eite arrogant

asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. ---- When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds. They only work with their frat buddies and insiders in a tribal â... old boys clubâ... manner. ---- They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. ---- Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. ---- They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most â... trophy wifeâ... ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and â... Bro-Crimeâ... . ---- The issues, that the public and the news media have complained about include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. ---- The Silicon Valley Tech Cartel is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ----So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- Why don't you see much about this corruption in the "news? A handful of companies in Silicon Valley, all controlled by the same investors, control almost all of the news and information in the world. They only hire and publish writers that agree with their fake news ideology. That ideology is whatever lie they can sell to the emotions of those shill writers to get them to "believe". In reality the only ideology the owners of those companies actually have is to pump their personal stock market holdings. They control elections in order to manipulate people into office that will do things that benefit the stocks of those media owners. They will lie to beat the band because their hookers, rent boys, private jets, drugs, private islands and other sins are expensive as hell and they are addicted to those deviancy's. They are all invested with Elon Musk's, Larry Page's and Mark Zuckerberg's companies so they never allow any negative news about those tech mobsters in the world news that they control. This is the worst kind of illegal media monopoly but these owners control the agency heads who are supposed to indict them. So everybody in America is screwed until some non-fake law enforcement comes along. --- A horrific phenomenon of cultural depravity and white-collar crime is going unchecked in Silicon Valley because Silicon Valley controls the media and the politicians that are usually supposed to check these kinds of things. Millions of pages of news reports, documentaries, interviews and legal transcripts prove the following to be true: ---- Elitist Cult. Silicon Valley elitists believe they are better than everyone else. Silicon Valleyâ... s Kleiner Perkins founder: VC Tom Perkins, said that poor people must be â... Naziâ... sâ... for not accepting the â... superior intellectâ... of VCâ... s. Silicon Valleyâ... s Kleiner Perkins VC Vinod Khosla, took over Californiaâ... s favorite public beach, bribed the White House for â... green cashâ... and got sued for arrogance by a horde of public interest

lawsuits. Silicon Valleyâ... s Kleiner Perkins founder Ray Lane was indicted for tax evasion. Silicon Valleyâ... s Kleiner Perkins boss John Doerr was sued for sexual office abuse and running a â... frat houseâ... . Most of the VCâ... s and tech CEOâ... s in Silicon Valley are charged with ethics breaches. ---- Prostitutes. Silicon Valley males hire more hookers and â... rent-boysâ... and fly more sex workers into the Bay Area than any other city in America. Googleâ... s and Tesla Investments executives were killed in sex and drug romps with hookers. Googleâ... s Eric Schmidt ran a huge â... sex penthouseâ... and promotes infidelity and â... anti-marriageâ... . Googleâ... s search engine rigging boss died at the hands of one of his hookers. The Silicon Valley VCâ... s had the Rosewood Hotel built at the end of Sandhill Road as a place to take interns and hookers to for sex. Underage sex efforts operated by these VCâ... s and Tech CEOâ... s have created the â... Pizzagateâ... phenomenon. ---- Rapists and Sexual Coercion of Employees. Young interns are â... sent up the hillâ... by Stanford to the VCâ... s Sandhill Road offices to become sexual playthings for the VCâ... s at the Rosewood Hotel. Ellen Pao sued Kleiner Perkins over the sexual â... rape cultureâ... that they promoted. Thousands of women have written books and articles about the sexual intimidation they are subjected to by Silicon Valley VCâ... s and their tech CEOâ... s. VCâ... s Joe Lonsdale, Micheal Goguen and hundreds of others have been charged with rape and sex trafficking. Stanford University gets â... endowmentsâ... and â... giftsâ... for hushing rape culture and intern-fluffing up. ---- Assholes. Fraternity House Take-What-You-Want culture is re-percussively promoted in the bars, clubs, meetings, conferences and emails of the VCâ... s and CEOâ... s. The TV Show: Silicon Valley, underscores the point of the dangers of infectious asshole-ism in Silicon Valley. ---- Clones. They assemble those around them that have the same stereotypical facial structure. In a room full of ordinary people and Tech VCâ... s, the VCâ... s faces stand out as Hollywood-type character-cartoon duplicates of each other. ---- Sexual deviance and extremism. Googleâ... s founders have all had extreme sex scandals involving cheating, 3-way sex, divorces over abuse, forced anal sex and other outrages. Their teachers at Stanford have had to quite over their sex scandals. Their willingness and infatuation with sexual extremes defines them as moral degenerates who care little about laws and ethics. ---- Insider Dysfunctional Parents. The majority of the VCâ... s and Tech CEOâ... s come from rich dynastic families who are cultism-like devoted to â... the family bloodlineâ... and run by male oligarchs who believe in a rape culture/oligarch ethos. This belief system is passed on to their children. The oligarch parents threaten to cut endowments to Stanford University if Stanford punishes their sonâ... s Frat Houses for date rapes. ---- Tone Deaf. Silicon Valley Tech people exist in a conceptual ideology reinforcement bubble by never interacting with, or reading information or news from, anyone outside of their group. VC Tim Draper spent vast amounts of money trying to make Silicon Valley itâ... s own country in order to systemize the Silicon Valley tunnel-vision bubble. They want to secede from America because they are offended by normal people who they consider to be low-class and unworthy. ---- Murders. Rajeev Motwani taught the Google founders how to build Google and was found, mysteriously, floating, dead, in his Silicon Valley swimming pool. Silicon Valleyâ... s Gary D. Conley reported John Doerr and Elon Musk for corruption and was found with a bullet in his head behind Beale Air Force base. Three top Tesla engineers reported corruption at Tesla Motors and then suddenly died in a plane crash next to Teslaâ... s factory in San Carlos. There are over 100 mysterious deaths associated with people who had conflicts with Google, Kleiner Perkins and other Silicon Valley oligarchs. ---- Arrogant. Self-Centered Narcissists. Elon Musk has spent over a billion dollars buying exclusive Google, Twitter, MSM and Facebook hype about himself. Every Tech CEO has a multi-million dollar PR agent assigned to make them look like â... Gods of Industryâ... . They regularly hold â... Babes and Ballâ... sâ... parties and sex parties in Woodside that require women to beg for their money. They were trained to be â... assholesâ... and â... abusive dominantsâ... via the Stanford Rape/Frat Culture. ---- Misogynists. All White-Male-Controlled with frat house pasts. Women are used As Sex Objects and Window Dressing. The largest number of anti-women news stories, jock/bro blog reports and charges for abuse come from Silicon Valley. VC Steve Westlyâ... s CEO friend is notorious for kicking his girlfriend hundreds of times because she â... sassedâ... him. Almost of of their Divorce filings include abuse charges against the man. ---- Manipulation of Employees. Silicon Valley cartel companies practice Scientology-like indoctrination and â... cultural programmingâ... of employees. These highly impressionable naive young employees are kept in â... controlled environmentsâ... , sent to â... mindfulness programming workshopsâ... and told what kind of political opinions they should have. Tight-knit groups of females experience synchronized menstrual periods (<http://www.nature.com/nature/journal/v229/n5282/abs/229244a0.html>)

over time, cohesive Google and Facebook employee groups engaged in decision-making discount dissenting viewpoints in the interests of consensus, and that couples who stay together long enough begin to look alike. A new study has captured another group phenomenon in Silicon Valley and chronicled in humansâ... natural habitat: â... group brain synchronyâ... . This is a CIA-like brainwashing technique exploited to get all Google/Facebook/Twitter employees to rapidly adopt the same political views. ---- Racists. Silicon Valley companies have the lowest rates of hiring, or promoting blacks, in America even though they have a high population of blacks at the edge of their community. ---- Male insecurity issues. They use TED-Talks, SXSW and Synchronicity Events as self-promoting hype in which to act like an apostle of a tech religion. They buy Tesla cars as a badge of arrogance and mock any male who does not own what they own or who who did not go to Stanford or Yale. These pretentious and ostentatious boys are more inclined to brag about penis-size than family. ---- Blacklisting. In the AngelGate Investigation and Silicon Valley No Poaching Class Action Lawsuit, Silicon Valley was exposed as an insider club that black-lists those who look different or are not part of the boys club. ---- Politically corrupt. Silicon Valley has bribed more politicians than any other domestic region in history. They promote more immigration in order to get cheap labor for their tech companies. They steal their technology and bribe politicians to eliminate patent protections for small inventors that they steal from. Political Corruption and Bribery Is The Norm for these boys. Silicon Valley created a CIA knock-off called â... In-Q-Telâ... in order to use CIA technology to manipulate elections at Google, Facebook and Twitter. The 60 Minutes Episode called: â... The Cleantech Crashâ... is about their multi-billion dollar scam using the Dept. of Energy as a slush-fund. They refuse to allow their MSM to report on their corruption and crony kickbacks, ie: Tesla Motors Funding, Off-shore tax evasion, Hooker networks, etc. ---- Collusion. In the AngelGate Investigation, the Silicon Valley No Poaching Class Action Lawsuit, and hundreds of other cases, Silicon Valley was exposed as an insider club that colludes to rig valuations, stock markets and employee poaching. They operate in herds within their peer group. They are not inclined to independent thinking. Kleiner Perkins has been caught placing moles and saboteurs inside competitors start-ups. They operate in herds within their peer group. They are not inclined to independent thinking. ---- Stock Market Criminals. Stock Market Pump-and-Dump, Flash Boy Algorithm Manipulation, Insider Trading, Market Rigging. The Securities and Exchange law violations and FTC monopoly law violations are vast in number. ---- Burning Man Sex-and-Drugs Devotees. Silicon Valley frat boys have a huge participation in the date-rape goings-on at Burning Man and buy extensive pheromone and skin contact delivery animal-tranquilizer drugs to use on young Burning Man girls. ---- Minimal Regard For Consequences. Although their PR agents promote them as â... greenâ... and â... socially positiveâ... , it is all hype to get tax waivers and government hand-outs. Mark Zuckerbergâ... s take-over of San Francisco General Hospitalâ... s brand was entirely a scam to get him a \$1 billion dollar tax evasion deployment. The Silicon Frat Boys act on impulse and try to buy off the collateral damage later. ---- Closeted homosexuals. Using the tremendous funds they have at hand from their exclusive monopolies in public media, they push their trans-gender agendas through their bought-and-paid for politicians. This has resulted in a generation of sexually confused children who believe that they should cut their penises off. The top bosses at Facebook, Google, Twitter, Tesla and other companies are lying to the public about their sexuality and using hired wives, known as â... beardsâ... . If they lie about something so basic, one has to wonder what else they lie about. ---- Thieves. They steal most of their technology from small inventors who canâ... t defend themselves. They get inventions from Indian engineers and then ship them back to India before the employees can get any stock or IP rights. The tech CEOâ... s send their VC friends to competing start-ups to spy on competing technologies and steal it. The VCâ... s say they are just doing â... due diligenceâ... but they are actually sucking the competing start-up dry of IP and staff and making a clone of it under another name. ---- There are so many other awful things about the people of Silicon Valley. You get the picture. Silicon Valley is a swamp and a cesspool. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

K.)

SONY PICTURES POLITICAL CORRUPTION -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

SONY PICTURES POLITICAL CORRUPTION: Sonyâ... s Dirty Hollywood And Game Shananigans. ---- The hacks and leaks at Sony Pictures Entertainment have exposed the dark side of Hollywood. The new information reveals an insider vision of a company racked with sexism, office politics, high-school-level personality quibbles and a severe mine-is-bigger-than-yours territoriality culture. ---- A number of lawsuits against Sony, from Lady GaGa to Sonyâ... s own employees, have revealed even more. ---- An aspect of the revelations involves where Sony gets itâ... s ideas from. A number of revelations reveal that Sony seems to have established a process of â... borrowingâ... technology and story ideas while â... forgettingâ... to properly attribute or pay the sources. ---- Some of the â... dirtâ... exposed included: â... Sony finances Democrat Presidents in exchange for media â... favored nationsâ... status over competitors. â... Sony and Google coordinate political manipulation campaigns together. â... Sony executives trade female entry-level staff like cattle at a â... ranchâ... . â... Sony executives hire an insane amount of hookers, rent-boys and under-age sex providers. â... Sony executives bribe their kids into colleges. â... The good-old-white-jewish-boy club is alive and well at Sony. â... ZERO DARK THIRTY was a political PR hype movie commissioned by the Obama Camapign using government resources â... Sony steals patents from anybody it wants â... Sony stole itâ... s VR technology â... Sony stole its web video technology, especially SONY VUE â... Sex deviancy is the rule at Sony â... Sony is a bunch of high-school whine babies who think their shit doesnâ... t stink â... Ira Rubenstein, Sonyâ... s Marketing Head, put his name on Sonyâ... s patents, as the â... inventorâ... , even though his own emails admit that â... he does not even know how to work a computerâ... ---- Sonyâ... s web video patents, that were sold to ATandT/Direct TV, admit that Sony copied their patent ideas from TSNB in San Francisco ---- Sony spends millions and millions of dollars on political bribes ----The kids at Sony seem to have been very naughty children. They let their IT system go to pot, and got hacked, and outed, as â... racistâ... , â... misogynistâ... , â... campaign riggingâ... , â... high school tantrum throwingâ... kinds of people, per their own emails. Hollywood Reporter, The Verge, Wikileaks, and a variety of tabloids and pundits, have delighted in dissecting the fraternity house, inside antics, of Sony Pictures. ---- Sony says that the hackers â... DELETEDâ... Sonyâ... s files. THEY DID NOT. The Russians, Koreans, NSA, DOJ and a number of reports have ALL of Sonyâ... s files and emails! ---- Their boss got fired. They got ridiculed for turning â... Zero Dark Thirtyâ... into a, slightly fabricated, political vote-churn tool. Other execs got kicked to the curb. All of their financial, contracting, political cash layout, and tax dynamics were placed under investigation, and even more sketchy bits are shaking looseâ...! ---- Sony announced that it sold just 2 million PlayStation 5 units last quarter (Q4), bringing its overall total to 19.3 million. Thatâ... s down considerably from the same quarter last year when it sold 3.3 million units. The company did manage to boost game sales, though, with 70.5 million PS4/PS5 titles sold compared to 61.4 million a year ago, including 14.5 million first party games compared to 7.9 million in Q3. ---- Overall, its Game and Network Services (GSN) division earned 665 billion yen (\$5.1 billion) this quarter, up slightly over last year. Sales for the full 2021 year were flat, up just 2 percent over 2020, and profits also changed little. ---- Those numbers mean that the PS5 is falling even further behind the PS4 in sales, having now sold 3.1 million fewer units than the PS4 at the same point in time. Sony warned that this was coming, blaming the lack of sales not on customer demand but its inability to build enough units due to the ongoing chip shortage. ----There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed

to have been under way for some time. ----Twitter, Splunk, Google, Facebook, Sony Interactive, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, â... data miningâ... , â... machine learningâ... and â... AIâ... means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions. ---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So itâ... s like you are getting â... mind-rapedâ... without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ----Because their Silicon Valley VCâ... s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ... s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

L.)

THE STANFORD UNIVERSITY CORRUPTION INVESTIGATIONS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE STANFORD UNIVERSITY CORRUPTION INVESTIGATIONS: Stanford University builds corporate criminals, sex traffickers, sociopaths and elitist narcissists. It trains naive children to grow up to become adult stains on society! ---- In California, elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. ---- The problems at Stanford University include: ---- Rape cover-ups by frats from rich families ---- Epic racism ---- Inter-Staff sex scandals that make the whole campus look like A Caligula party ---- Dynastic families control the whole campus ---- Arab, Iranian and Chinese oligarchs pay bribes to get their kids in ---- The CIA is always recruiting everyone and the most notorious spy project: STARGATE, happened at Stanford ---- The Russian, Iranian and Chinese spy agencies have placed a huge number of spies on the campus as â... pretend studentsâ... and pretend teachers ---- Elitism is rampant ---- The Silicon Valley venture capitalists, up the hill on Sand Hill Road, get all their interns from Stanford and they date rape the hot ones with Ruffies, Scopalomine, and other amnesia drugs. The interns wake up with sore butts and canâ... t remember why. ---- To afford the fees, the girl students work as hookers at the Rosewood Hotel. ---- The entire school is funded by bribery. ----Arrogance is the attitude of choice at Stanford. ---- 99% of the guys that went to Stanford execute 99% of the corporate corruption crimes in the world. ---- Girls at Stanford, that canâ... t afford tuition, become Match.com hookers. Everyone in the bay area knows that if a Match.com profile has the words: â... STUDENTâ... and â... GENEROUSâ... anywhere in the text, that the girls are offering sex-for-tuition. Send your hot daughter to Stanford and turn them into hookers. Match.com even has sex agents, on campus, that get a commission for getting girls to join Match.com. ---- Rape is OK at Stanford as long as your daddy is rich or owns part of the Middle East. The Stanford deans and regents say: â... Boys Will Be Boysâ... . ---- Stanford provides buses that transport the sorority girls to the frat houses to get date raped and then back to the sorority houses drunk out of their minds or doped up on Ruffies and Scopalimine. ---- There have been a number of strange murders and suicides at Stanford. ---- Stanford students are perscribed

the highest number of mental health medications of any campus in America. ---- All of the land on the Stanford Campus could solve all of Silicon Valley's housing crisis. The State of California should take all the land away from criminally corrupt Stanford University and build housing for average income on it. Stanford University doesn't deserve anything any more. ---- Chinese girls are sent to Stanford, by Chinese Wife Mills to bag an Anglo husband and then divorce him 1 year after he hits paydirt. They are instructed to have 2 kids so the alimony upside is high. They pay a % of the money back to China. ---- Trophy wives were invented at Stanford ---- The Guardsman, The Key Club and over 50 Final Clubs brain-wash students into elitism and tribal exclusion of all but your fellow club members from your ethnic group. ---- Most of the oligarch families paying bribes to Stanford are engaged in the most brutal human rights violations in history. They murder people and have them cut up with a hacksaw. They run prison camps. Only an idiot would think that modern day Stanford has any remaining prestige or credibility. This isn't the 1800s any more. Shut this crap campus down! ---- When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds. They only work with their frat buddies and insiders in a tribal old boys club manner. ---- They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. ---- Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. ---- They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most trophy wife ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and Bro-Crime. ---- The issues, that the public and the news media have complained about include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. ---- The Silicon Valley Tech Cartel is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook Meta Google Alphabet Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS Black Cube Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

M.)

THE CORRUPT SENATORS OWNED BY BIG TECH -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE CORRUPT SENATORS OWNED BY BIG TECH: The Bribes are out of control! ---- Can you say INSIDER TRADING STOCK MARKET PAYOLA BRIBES? ---- The corruption is easy to prove with a simple spread-sheet but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. ---- If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you can easily see how they only get a salary of \$190K per year but put hundreds of millions of dollars in their accounts that all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day. ---- WITH A COURT ORDER â... WE CAN PRESENT DETAILED DOCUMENTS ACCOUNTING FOR EVERY CENT IN EVERY ACCOUNT THAT IS CONNECTED TO NANCY PELOSI, DIANNE FEINSTEIN, EVERY MEMBER OF THEIR FAMILY AND THE KICK-BACKS AND INSIDER TRADING THAT PRODUCED THOSE FUNDS! ---- These Senators have â... rulesâ... that delay investigations against themselves, though. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate! The 2008 and 2021 â... Stimulus Fundsâ... were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola. ---- In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPAâ... s shove the money into their standardized covert financial structure to hide it. ---- They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Teslaâ... s, etc. ---- The 2008 and 2021 â... stimulus fundsâ... are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. ---- The cover-ups are off-the-charts! ---- these mobsters (Google, Tesla, Facebook, Linkedin, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (â...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. ---- For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes. ---- The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Muskâ... s drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Muskâ... s banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. ---- It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to â... saveâ... the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Teslaâ... s, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over \$15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Muskâ... s competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes. ---- U.S. Senators, Agency Heads and Congress are

bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services â... Donationsâ... ; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; â... Consultingâ... contracts from McKinsey as fronted pay-off gigs; Overpriced â... Speaking Engagementsâ... which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington and Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities! ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ----So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

N.)

THE ELON MUSK REPORTS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE ELON MUSK REPORTS: What a twisted, raging, sick pervert, narcissist, vengeful, anticompetitive, monopolistic, Goldman Sachs sucking mobster hit-man hiring mobster! --- The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed. ---- Elon Musk, Larry Page, Steve Jurvetson and Jared Birchell hire Ex-CIA losers right after they are fired by the CIA, or directly from IN-Q-TEL or from Fusion GPS, Media Matters and other CYBER ASSASSIN KILL SERVICES. They send their hit men after competitors, reporters, ex-employees and whistle-blowers because they chose to CHEAT RATHER THAN COMPETE! ---- Elon Muskâ... s â... Twitter Purchaseâ... is just a scam to sell his Tesla stock without the SEC or his old investors noticing: THEY NOTICED! ---- Googleâ... s Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources! ---- We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quoâ...!they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S.

Government convinces you to invest millions of dollars, and your life, into one of their projects. ---- Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senators... s and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded. Now the damages must be paid for, one way, or another. ---- Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess. ---- Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to. --- Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinnerâ... s â... special friendâ... , etc. on the staff of the Department of Energy and in the White House. We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it. ---- We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing. If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk didâ...! go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try. ---- Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithiumâ... s widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are â... dumpingâ... the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up. ---- The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds. ---- Tesla is known as â... the official car of douche-bagsâ... . The safety defect cover-ups on the Tesla are extreme. Muskâ... s narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Muskâ... s racism and sociopath behaviors. ---- Musk is the POSTER BOY OF WHITE ANTI-BLACK PRIVILEGE ---- He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties. ---- He pays women for sex and pays other women not to disclose that he tried to sexually extort them. He paid Amber Heard at least \$500K for sex, paid his stewardess \$250K to report his sex abuse of her, and has a provider service via a layer of insiders. ---- His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions. ---- Space-X is just a domestic spying company. Donâ... t buy Muskâ... s bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Muskâ... s Neuralink company tortures small animals to try out Muskâ... s pseudo-science mind-reading chips. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every

politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. O.)

THE HOUSING CRISIS WAS CREATED BY LOBBYISTS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE HOUSING CRISIS WAS CREATED BY LOBBYISTS: SILICON VALLEYâ... S TRILLION DOLLAR CULTURE OF BRIBERY; CENSORSHIP; SEX TRAFFICKING; ELECTION MANIPULATION; PAYOLA TO CITY, STATE, COUNTY AND FEDERAL OFFICIALS; LUDICROUS EXCESS AND REVOLVING DOOR PAY-OFFS TO GOVERNMENT INSIDERS HAS DESTROYED HOUSING OPPORTUNITIES FOR THE POOR AND MIDDLE CLASS BY NEGATING HUMAN RIGHTS OVER OLIGARCH LUXURIES! ---- In California, The government refuses to fund the CALHOME fund, the only fund that helps normal people get a home. California politi-bosses give all the money to their big developer friends ---- The Silicon Valley solution to â... The Housing Crisisâ... is all talk, window dressing, dog-and-pony, un-responded to white papers and absolutely no meaningful action. ---- California has the worst housing crisis in HISTORY! ---- California politicians make lots of WINDOW DRESSING, PR statements about helping individuals but then they only give the government money to developers who financed the politicians campaigns! ---- ONLY BIG DEVELOPMENT COMPANIES THAT PAYOFF GOVERNORS EVER GET ANY FEDERAL FUNDS - CITIZENS GET NOTHING!!!! ---- Nobody can get government support to build a home because in California it would compete with the developers who financed the politicians campaigns! ---- Billions of dollars were sent to California, by the feds, to help individual citizens. The money came from the citizens own pockets via taxes. 99% of that money was given to developers who financed the politicians campaigns and none of it went to citizens to build homes.---- Investigators traced the federal funds back to the family bank accounts and stock market accounts of the politicians that control California! ---- â... Fair Housing Advocates have identified over 200,000 people that already have lifetime mortgage payment funds IN THEIR HANDS but The State Of California blockades these people from building homesâ...! EVEN THOUGH CALIFORNIA SAYS â... THE HOUSING CRISIS IS BECAUSE WE HAVE NOT GOT ENOUGH HOMES!!!â... HUD says this is illegal but HUD has yet to sue California to stop the blockades. ---- All of the land on the Stanford Campus could solve all of Silicon Valleyâ... s housing crisis. The State of California should take all the land away from criminally corrupt Stanford University and build housing for average income on it. Corrupt Stanford University (now almost entirely based on bribes by rich oligarchs who engage in human rights abuses) doesnâ... t â... deserveâ... anything any more. ---- The State politicians will do anything to stop those 200,000 people, with mortgage cash in hand, from building their homes because developers who financed the politicians campaigns will shit their pants if their political quid pro quo payola conduits are cut off. ---- Part of the housing crisis is because California politicians invited half of South America to move in in hopes of rigging the voter rolls. Most of the people that showed up are actually construction labor people, but California wonâ... t let them build homes because they are not in a union and because they compete with developers who financed the politicians campaigns. The irony is mind-boggling! ---- In California the laws, and â... rulesâ... have been staged to make it impossible for a single family to build a home. Why are the laws and rules staged that way?: To protect developers who financed the politicians campaigns! ---- REAL ESTATE DEVELOPERS, OLIGARCHS AND REAL ESTATE BANKS PAY BRIBES TO COUNTY OFFICIALS TO KEEP AFFORDABLE HOUSING FROM GETTING BUILT BECAUSE IT COMPETES WITH THEIR

SCHEMES! ---- BIG BANKS, BIG BUILDING DEVELOPERS AND TECH BILLIONAIRES ARE BRIBING COUNTY OFFICIALS TO STOP THEM FROM DOING ANYTHING! ----S .F. Chronicle: Broken Homes, By Joaquin Palomino and Trisha Thadani / San Francisco spends millions of dollars to shelter its most vulnerable residents in dilapidated hotels. With little oversight or support, the results are disastrous. ---- San Jose Spotlight: Santa Clara County faces silver tsunami of homelessness, By Tran Nguyen / Brenda Nichols was among 145 homeless seniors who died in Santa Clara County between December 2020 and November 2021â... a record high number as the region witnessed 250 homeless deaths over the same period. ----- Is this more smoke-and-mirrors WINDOW DRESSING: Rural Partners Network to Empower Rural Communities to Access Federal Resources, / The Rural Partners Network (RPN) is a new whole-of-government effort led by the USDA to transform the way federal agencies partner with rural places to create economic opportunity. ---- GlobeSt.: The Share of Millennials Owning Homes Is Dwindling, By Paul Bergeron // This generationâ... s homeownership rate doesnâ... t match up with Gen X or Baby Boomers. Big Tech companies should be limited from paying any worker over \$50,000.00 per year. ---- Earth Day: 52 Years of Individual Environmental Action Hasnâ... t Fixed It And Proven That Nothing You Do Will Help, By Melanie Curry // Earth Day was born at a time when teach-ins and radical protests were forcing changes in the status quoâ... !But over time â... 52 years being a lot of that â... corporate sponsorship and greenwashing shifted the focus of Earth Day to individual responsibility and to volunteerism. ---- BATHROOMS IN CALIFORNIA COST AS MUCH AS A TWO BEDROOM HOUSE COSTS IN THE REST OF AMERICA! ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

P.)

THE LITHIUM BATTERY POLITICAL PROFITEERING LIES -- ([Click HERE, on this title, to open the Evidence Gallery](#))

THE LITHIUM BATTERY POLITICAL PROFITEERING LIES: Elon Musk and the Senators he owns: Pelosi, Harris and Feinstein, will lie, until their dying day about these batteries that they all own stock in! ---- Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; canâ... t be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. ---- Apple products with lithium ion batteries have been

exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age â... LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; â... Bad Guysâ... have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Muskâ... s stock market scam. ---- The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. ---- A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. ---- There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or itâ... s suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their cronyâ... s, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. ---- Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to â... say nothingâ... by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. ---- DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. ---- Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the â... Jesusâ... of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Muskâ... s investor and bromance butt buddy. ---- Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. ---- The DNC and the MSM refuse to allow any articles about Muskâ... s crimes to be printed because they benefit from Muskâ... s crimes. Musk has been professionally diagnosed as a â... psychotic narcissist.â... A â... Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. ---- In EVERY blog that you read that mentions â... Muskâ... , at least 1/3 of the comments have been placed there by Muskâ... s paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. ---- Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to â... dirty tricks teamsâ... to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Muskâ... s â... Starlinkâ... satellites are domestic spy and political manipulation tools â... never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. ---- The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk canâ... t fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will

find that the â... per volumeâ... fire, crash, death and defect rate is THE WORST of any car maker in history! ---- Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or itâ... s suppliers and mining companies. ---- That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. ---- The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy peopleâ... s lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington and Burling and a host of â... assassinsâ... . ---- It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! ---- That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Muskâ... s partner) spends billions of dollars annually cover-up lithium battery fires and battery defects. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

Q.)

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE MEDIA ASSASSINS: POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS â... How A Modern Character Assassination and Political â... Kill Orderâ... Is Executed By the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNCâ... s Google to push the character assassination articles to the top of Google web products and searches. ---- Patrick George, Adrian Covert, John Hermann and Nick Cook are the

sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are â... Media Rapistsâ... and should be treated as abusers. â... How and why did a Donald Trump stripper-date named â... Stormyâ... or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history? â... In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end peopleâ... s lives in other creative ways. â... --- It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a â... kill orderâ... on an opponent. â... The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: IN-Q-Tel â... (DNC); Gawker Media â... (DNC); Jalopnik â... (DNC); Gizmodo Media â... (DNC); K2 Intelligence â... (DNC); WikiStrat â... (DNC); Podesta Group â... (DNC); Fusion GPS â... (DNC/GOP); Google â... (DNC); YouTube â... (DNC); Alphabet â... (DNC); Facebook â... (DNC); Twitter â... (DNC); Think Progress â... (DNC); Media Matters â... (DNC); Black Cube â... (DNC); Mossad â... (DNC); Correct The Record â... (DNC); Sand Line â... (DNC/GOP); Blackwater â... (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor â... (DNC/GOP); ShareBlue â... (DNC); Wikileaks (DNC/GOP); Cambridge Analytica â... (DNC/GOP); Sid Blumenthal- (DNC); David Brock â... (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling â... (DNC), BuzzFeed â... (DNC) Perkins Coie â... (DNC); Wilson Sonsini â... (DNC) and hundreds of othersâ...!These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others. â... These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. ---- These attack services are responsible for 90% of the â... Fake Newsâ... problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal! â... These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions. â... In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ... s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth. â... This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â... Operation Echo Chamber,â... which reportedly continues, in which he fed information to willing corporate media scribes. â... They literally know nothing,â... Rhodes said of the twentysomething journalists he easily manipulated. ---- The Freedom of the Press Foundationâ... s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press. â... Timm writes: â... Today, we are revealingâ... for the first timeâ... the Justice Departmentâ... s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â... â... Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ... s team, as evidenced by Peter Strzok and Lisa Pageâ... s texts confirming that Obama was overseeing their fly-by-night operation. â... Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. ---- Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls â... SPYGATEâ... . â... It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ... s the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â... Electronic Surveillance

Authorizationâ... () â... Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ... s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â... Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â... The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â...) â... In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. â... This is what they are hiding. â... However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ... or only selectively reportâ... to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? â... These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: â... Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â... smokescreenâ... to cover their illegal government slush-funds for the victims competitors and personal enemies. ---- By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clintonâ... s daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or â... rape chargeâ... the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70â... s or 80â... s will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called â... date rapeâ... , â... drugging your date for sexâ... and related twisted narratives that are designed to shame you, the target. ---- If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â... lostâ... . ---- Files in the application process â... disappearedâ... . Lois Lerner hard drive â... incidentsâ... are operated in order to seek to hide information and run cover-ups. â... Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â... black-listsâ... to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Strydom and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the â... AngelGateâ... Scandal and the â... High Tech No Poaching Class Action Lawsuitâ... cases) you will never get investor funding again. â... FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. ---- Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy

facilities. Many wonder if these â... targetsâ... were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required. â... Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. â... On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. ---- This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ... s â... impressionsâ... are manually controlled by Googleâ... s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ... s ongoing prosecution of Googleâ... s political manipulation of public perceptions. â... Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. â... Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures. ---- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and â... missing hard drivesâ... as in the Lois Lerner case.- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, â... website spoofingâ... sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.---- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility. â... Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.- Are you getting weird headaches and hearing a â... buzzing soundâ... in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy â... sonic attacksâ... are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. ---- It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are â... going crazyâ... or â... hearing sounds in their headâ... . ---- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.- Covert Cartel financier: Google, placed Googleâ... s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. ---- Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ... s operations as â... Racketeeringâ... , â... Monopolistic Cartelâ... and â... Government Coup-likeâ... behaviors. Thousands of articles and investigations detail the fact that Google, â... essentiallyâ... ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ... s investors personally told Applicant they would â... kill himâ... . Google and the Obama Administration were â... the same entityâ... . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare

group inside Google who were financed by Federal and State funds. ---- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â... targetâ... in order to spy on and misdirect the subject. â... Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce â... hatchet jobâ... character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: â... You donâ... t want to have anything to do with this person, do you..?â... in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.---- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy â... back-doorsâ... have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. ---- This means that any kid with the â... keyâ... code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that canâ... t be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. ---- Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you. â... McCarthy-Era â... Black-listsâ... are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. â... Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal. â... There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. ---- The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these â... kill ordersâ... . ---- A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. â... Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â... FISA Memoâ... , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â... hit-jobsâ... against domestic natural born U.S. citizen domestic taxpayers. ---- The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most

complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

R.)

THE BIG TECH POLITICAL BRIBES -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE BIG TECH POLITICAL BRIBES: The corruption is easy to prove with a simple spread-sheet but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. ---- INSIDER TRADING with layered stock market payola is the top bribe method for politicians, these days! ---- If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you can easily see how they only get a salary of \$190K per year but put hundreds of millions of dollars in their accounts that all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day. ---- These Senators have "rules" that delay investigations against themselves, though. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate! The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.---- In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it. ---- They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Tesla's, etc. ---- The 2008 and 2021 "stimulus funds" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts!these mobsters (Google, Tesla, Facebook, Linkedin, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! ---- There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes. The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. ---- Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized

talking points. ---- Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over \$15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes. ---- U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington and Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities! ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook - Meta - Google - Alphabet - Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS - Black Cube - Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. THE SAN FRANCISCO CRONY CORRUPTION -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

THE SAN FRANCISCO CRONY CORRUPTION: Straight from the Palladino spy files --- San Francisco is ruled by corruption, cronyism, bribes and favors. SF has become increasingly inhospitable to the average person. The median rent for a one-bedroom is \$2,695. A family of four is considered "low-income" if they make less than \$97,000. The Target and Walgreen's stores have had to operate in "crisis" mode because the crime is so bad in San Francisco that you get robbed in the aisles while shopping at major retail stores in San Francisco. The STD rates are off-the-scale. It is almost certain that your car will be broken into or keyed. This place is tough to exist in long-term. It got like this because San Francisco's corruption culture is so out of control. ---- If you think San Francisco's ills are all due to the technology mobsters, you

are mostly correct! ---- San Franciscans now have an obsession with escaping from San Francisco. This comes from a healthy heaping of realistic bitterness â... bitterness that you wonâ... t be able to stay here, bitterness that you canâ... t buy a house and set down roots and bitterness that others, unplagued by inertia, can recognize these facts and leave. ---- As San Franciscans, weâ... ll always be looking over our shoulders at Austin and Portland and Denver, wondering what lifeâ... s like in a more hospitable city where City Hall is not entirely controlled By Twitter, Facebook, Google and Netflix corporate bribes. ---- The villains in â... The End of the Golden Gateâ... book are familiar ones. Tech, capitalism, Mayor Ed Leeâ... s tax laws. Every writer seems to agree on one front: San Francisco has changed, and in many ways, for the worse. ---- â... The San Francisco I knew and loved has been face-lifted, sleeked, chromed, polished, colonized, homogenized, and marginalized as a cultural innovative force.â... writes Peter Coyote in â... San Francisco, For Sale by New Owners.â... â... The transformation was accomplished in a smooth, seamless manner by money and addiction to power.â... ---- â... San Francisco,â... he writes earlier in the essay, â... is too expensive, too monoculturally wealthy. Tech wealth and privilege have transformed it into a cushy enclave for the heartless.â... ---- Gary Kamiyaâ... s standout essay acknowledges the downsides of this city: â... The exorbitant cost of housing, the influx of tech workers, traffic, crime, dirty streets, and an ever-worsening homeless crisis.â... ---- The Bay Areaâ... s Google, Facebook and Netflix, Tesla executives and VCâ... s happen to be the organizing, financing and beneficiary partners in a massive market manipulation scheme. ---- They formed their â... Silicon Valley Cartelâ... to collude, conspire and organize against the government, the public and industry in a manner which the tech oligarchs describe in their own emails as being based on â... ...the Italian Mafia!â... . ---- Indeed, The Silicon Valley Tech oligarchs have formed a collusion-based, law-violating, tax-evading, government-manipulating crime empire protected by famous Bay Area politicians, whom they bribe! No cops seem to be able to stop them. ---- The Bay Area Solyndra/Silicon Valley Cartel case was one of the largest corruption matters in America with roots that ran all the way to the Oval Office. The FBI raid on Solyndra was only the tip of the iceberg. The matter illuminated an organized crime scheme, in violation of RICO, anti-trust and other laws, between major public officials, Silicon Valley tech oligarchs and their operatives. ---- The tech oligarchs beg for you to view them as â... Green Advocatesâ... but they lie! They engage in genocide, child labor slavery and rape farms via corrupt overseas rare earth mining schemes owned by California Senators, Department of Energy Executives, White House staff and the Silicon Valley tech Cartel. They are actually only really interested in anything green that has a dollar sign on it. ---- The Silicon Valley Cartel loves to run everything. In their federal â... no poachingâ... lawsuits: Case #â... s 11-cv-2509 and 5:2011cv02509 and 1:10-cv-01629 and 1:10-cv-02220; these cases, along with the â... Angelgateâ... scandal, prove that the Silicon Valley Cartel colludes to harm the public, rig the government and monopolize industries. ---- State-sponsored â... hit-jobsâ... were ordered, operated and financed by San Francisco government officials in order to engage in revenge, reprisal and vendetta, against any who speak out about their crimes. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

T.)

USING SOCIAL MEDIA SITES TO SPY ON CITIZENS -- [\(Click HERE, on this title, to open the Evidence Gallery\)](#)

USING SOCIAL MEDIA SITES TO SPY ON CITIZENS: Match.com, OK Cupid and corporate dating sites exist to harvest your data for political campaigns ---- They spy on you to manipulate your politics, ideology and intentions and to report you to bill collectors, tax collectors, investigators and political parties. ---- When you hear "BIG DATA", "AI", "DATING MINING" ...RUN: They are all processes that rape the public and manipulate elections ----- 89% of Silicon Valley's money comes from data mining you. ---- Google, Netflix, YouTube, Facebook, etc. exist to mass manipulate populations and run stock market scams for their sociopath owners. From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Pageâ... s â... boyfriendâ... : Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Teslaâ... s competitors. ---- Google illicitly and illegally timed these manipulations with stock market

pump-and-dump efforts to exploit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary. ---- Silicon Valley has, AND LEAKS, everybody's abortion records ---- There are no â... bugsâ... , â... operator errorsâ... , â... server anomaliesâ... or other media â... accidentsâ... at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception. Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the â... Naziâ... s of the Internetâ... . ---- In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivalsâ... sites doesnâ... t break competition laws. ---- The integrity of Googleâ... s ranking processes relies upon all webmasters or website owners having the same degree of access to information about Googleâ... s rankingâ...! This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. ---- Google is a criminal operation. Itâ... s executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! â... Google spies on competitors and steals their technology â... Google runs tens of millions of dollars of defamation attacks against competitors â... Google hides all media and news coverage for competitors of Larry Pageâ... s boyfriend: Elon Musk â... Google lies to the public about what they really do with the publicâ... s data ---- Google promotes illegal immigration in order to get cheap labor and control votes â... Google runs VC funding back-lists against start-ups that are competitive â... Google bribes thousands of politicians â... Google is a criminal RICO-violating monopoly â... Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks â... Google pays bribes to politicians in Google and YouTube stock â... Google manipulates who gets to see what web-sites, globally, for competitor black-lists â... Google has a â... no poachingâ... Silicon Valley jobs blacklist ---- Google bosses sexually abuse women and young boys â... Google bosses run sex trafficking operations in the Epstein and NXVIUM cults â... Google bosses control the NVCA financing cartel over start-ups â... Google has placed the majority of the corporate staff in at least one White House â... Google controls national elections for anti-competitive purposes â... The company â... Polyhopâ... , in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality â... Googleâ... s law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays ---- Google bribes some politicians with revolving door jobs â... Google is primarily responsible for destroying the Bay Area Housing opportunities â... Google runs DDoS attacks on competitors by massively crawling their sites â... Google boss Andy Rubin runs a sex slave farm according to his own family â... Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles â... Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker---- Google executives sexually abuse so many women that the women staff of Google walked out one day â... In the 2009 White House, you could not swing a cat without hitting a Google insider â... Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator â... Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes â... Google was funded by the CIA, via In-Q-Tel, a so called â... 501 c3 charityâ... which was caught with tons of cocaine â... Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA â... Googleâ... s map service was a spy system paid for by taxpayers money that Google now profits off of ---- Nancy Pelosi and Dianne Feinstein have promised to â... protectâ... Google because their families profit off Google stocks â... Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks â... Google VCâ... s and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors ---- Google bribed itâ... s lawyer into position as head of the U.S. Patent office in order to have her protect Google â... To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on â... push daysâ... â... Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes â... Google rarely likes, or hires, black employees per federal and news media investigations â... Google hired most of the Washington, DC K Street lobby firms and told them to â... do what ever they couldâ... â... The film:

â... Miss Sloaneâ... depicts only 2% of the illicit lobbying tactics Google employs daily ---- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed â... Googleâ... s David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds â... Google, and itâ... s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Googleâ... s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. ---- At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. ---- Google sells covert character assassination services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet. ---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. ---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, â... data miningâ... , â... machine learningâ... and â... AIâ... means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions. ---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So itâ... s like you are getting â... mind-rapedâ... without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VCâ... s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ... s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley. ***

U.)

SILICON VALLEY DEATH-WATCH: The social horror that â... Silicon Valleyâ... became is just a bubble of social abuse waiting to burst. Letâ... s count down the days until it finally implodes. ---- All Of Silicon Valley needs to be â... KILLED OFFâ... without breaking a single law. They can never be fixed. Itâ... s easy to do with one simple, 100% legal, weapon: THE TRUTH! ---- Said one Bay Area developer: â... These crooks donâ... t get to buy private jets, sex islands, multiple mansions, throw celebrity parties and buy hookers with MY money! If they are making big bucks off my technology, I get my percentage of what they spied on, copied and theived or they get exposed for what they are. I will bring the FBI, DOJ, CIA, FTC, SEC, FEC, FINCEN, 60 Minutes and Congress, along with my team, to help take them downâ...!â... ---- PAYBACK IS A BITCH FOR BIG TECH COMPANIES THAT USED THEIR BUSINESS FRONTS TO OPERATE: BRIBES TO CONGRESS, TAX-EVASION, SEX-TRAFFICKING, PATENT THEFT, ELECTION MANIPULATION, SHADOW-BANS, EMPLOYEE SEXSTORTION, OFF-SHORE MONEY LAUNDERING, STOCK MARKET MANIPULATION, BLACKLISTS, MONOPOLIES AND, WORST OF ALL, HIRED FUSION GPS, BLACK CUBE, IN-Q-TEL AND MEDIA MATTERS TO RUN ILLEGAL HIT-JOBS ON THEIR COMPETITORS! ISNâ... T IT INTERESTING THAT EVERY SINGLE ATTACKER HAS LOST BILLIONS OF DOLLARS IN STOCK VALUATION? ---- KARMA? PAY-BACK? HMMMMMMâ...!???: BREAKING NEWS LINK: HA- HA -HA! THE EXACT SAME COMPANIES THAT STOLE SCOTT'S STUFF AND THEN VIOLATED HIS ANTI-TRUST PROTECTIONS ARE GETTING NAILED! KARMA - KARMA- KARMA! TECH VALUES CHOPPED AS PALO ALTO'S CORRUPT MEDIA EMPERORS FOUND TO HAVE NO CLOTHES ---- BREAKING NEWS LINK: How The Sick Pervert Billionaires Boys' Club Came To Dominate The Public Square And Rig Elections ---- STOCKS DEADLY UGLY AS SILICON VALLEY CARTEL TURNS OUT TO BE ALL HYPE AND NOTHING OF REAL VALUE ---- THE SILICON VALLEY MAFIA COORDINATE THEIR CRIMES VIA SAND HILL ROAD INSIDERS AND THAT VIOLATES RICO AND MONOPOLY LAWS! ---- Silicon Valley has had the largest number of Congressional hearings against it, the largest number of consumer complaints in American history BUT the least number of regulations imposed on it. Why? You can look no further than the covert ownership of Silicon Valley by elected officials. Our politicians get paid bribes, by Silicon Valley, to keep the political corruption alive-and-well while they operate, with impunity, as the biggest threats to society ever manifested. ---- Politicians protect Silicon Valley and allow them to keep doing crimes! ---- WHAT CRIMES ARE WE UPSET ABOUT SILICON VALLEY DOING?: Silicon Valley is producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other crimes! Why? Because crime paysâ...!for corrupt U.S. Senators! ---- â... EVERY SINGLE ENTITY THAT ATTACKED US HAS LOST A MINIMUM OF A BILLION DOLLARS OF STOCK MARKET VALUATION OR GONE BANKRUPTâ...!â... ---- YOU CAN KILL ANY CORRUPT ENTITY WITH: â... THE TRUTHâ... ! ---- In the Age of Transparency, also known as The Great Disruption. Many document leaks have taken place, and more are expected, with particularly shocking data. The public has now become way moree savvy about information tools. This nexus of factors has created a new reality. ---- As billionaires and super-corporations become more prolific, their hubris, tone-deafness, and egotistic excesses seem to increase. ---- In this new age of equal access to all information, every member of the public now has access to the same investigation resources that the FBI and CIA have. Over 2000 online service providers will track down any crime, at any corporation or in any billionaies portfolio. You can, now, easily, hunt down the hookers, criminal expense accounts, tax evasion shelters, abuse of funds, insider trading, political bribes, mistresses, and other corporate mis-deeds of each and every executive at a company. ----The lesson to the wise: If you are a cocky billionaire, or corporation, one week; you can now be an out-of-business corporation, or billionaire, the next week. Be honest, legal and moral and you wonâ... t get the axe. ---- BY THE WAY: ATTACKS AND CENSORSHIP BY GOOGLE-ALPHABET-YOUTUBE: We have placed more software sensors on more server networks globally than anyone else has ever announced. When Google-Alphabet-YouTube Shadow Bans, DNS re-routes, Hides, Demonetizes, Search Manipulates, Server Table Edits, Censors, Election Rigs, SEO limits, etc; our links, we record it, document it technically and

report it to every regulatory and publishing group in the world. We also compile the data into evidence for lawsuits against Google and each Google executive. Our insiders work at the deepest levels of their operation. It isn't nice to mess with Mother Nature or Freedom Of Speech. It's worse to run tax evasion, sex trafficking, dark money funds, real estate fraud and other crimes from inside Google! ---- Our autonomous monitoring applications are on a vast number of co-location servers, shared hosting ISP's, stand-alone servers and sites around the world and have been operating for over ten years. We log: 1.) Google's search results compared to other search engines, 2.) Google's DNS and spoofing activities, 3.) Google's results on 100 key search terms including search terms of assets, candidates and business associates connected to Google (ie: "Obama", "Elon Musk", "Election Results", etc.), 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated "mole" data that was injected as user data ultimately ended up later, 6.) Google's election manipulation attempts, and other metrics. The results prove that Google abuses the market, the public, privacy rights, politics and human rights. ---- So Google, every time you do it, you are just digging your own grave and giving us all the proof we need to wipe you out, process anti-trust filings and expose your monopolist, sex trafficking, sociopath owners! ----- ***** ----- The National Venture Capital Association (NVCA) is a white male, mostly jewish, sexist, racist, elitist, dynastic mobster-like mafia venture capitalist Cartel formed by an inner-circle set of fraternity buddies that invest per a coordinated global ideology scheme. They make sure that their competitors never get any money. James Breyer, Gilman Louie and Eric Schmidt love this tech Mafia. ----- Is collusion, market-rigging, technology blockading, good-ole-white-boy privilege clubbing, frat-house bro-biz secret alliance meeting, woman and black discriminating going on in Silicon Valley and Wall Street? You bet it is! If you web-search the â... Angel-Gate Collusion Scandalâ... , you will read about how a reporter saw, and documented, a Silicon Valley secret meeting where investors were colluding on who would get funding, who wouldnâ... t and at what rates. The, now famous â... Silicon Valley Anti-Poaching Scandalâ... has overtly proven that these people are classic â... Cartelâ... . ----- It turns out, if you didnâ... t go to Stanford, or you are not part of the Indian-Elite sub-mafia, you are not getting funded. ----- With itâ... s deep CIA connections, Goldman Sachsâ... s alliances and enough cash to bribe Congress twenty times over, groups like the National Venture Capital Association (NVCA) raise concerns, across the board, about their potentially destructive play in the fall of innovation and the domestic economy in America. ----- This notoriously elitist, yuppie, privileged frat house crowd does not like anything that they canâ... t control. They have, in many cases, agreed among themselves, which energy technology will be â... allowedâ... to hit the market; which electric cars will, or wonâ... t, get funded; which video delivery systems get to become dominant on the web; which social networks get all of the media (a large part of said media being owned and controlled by these men); and which other technologies live or die. These are the people involved in the vast number of sex scandals, murders-by-hooker, â... sex yacht and sex penthouseâ... lurid news, rape lawsuits and other twisted perversions on the 6PM news. They are not nice people. One of them: Raj Gupta sits in Prison. Another: White Car Czar Steven Rattner was indicted for Securities Law Rigging. Ray Lane was indicted for massive tax evasion. They are all under investigation for shipping billions of tax dollars to Ireland and other tax hide-awayâ... s. Eric Schmidt practically lives at the White House and is under investigation by hundreds of entities.----- The largest private investigation firm of the Eliteâ... s was exposed in WIKI-Leaks calling Peter Thiel: â... Fu*cking Nutsâ... . Tim Draper wanted Silicon Valley to be so elite that he tried to make it into itâ... s own state. Joe Lonsdale is under lawsuit for rape. Mr. Hayes and Mr. Kumar were killed by Hookers. John Doerr and Vinohd Khosla are called out in national news stories for sex abuse, California Beach take-overs from the public and hundreds of billions of dollars in â... Green Energyâ... kick-backs from their friend Steven Chu. The list of cringe-worthy news stories about these folks goes on and on. ----- If you are an outsider, or competitor, they can, and do, sabotage your company in no time flat with moles, hack attacks, DDOS attacks, media character assassination attacks, â... Merchants of Doubtâ... (See the movie) aspersions, civic awards blockades, contract terms exclusions, hire-aways, anti-poaching cartel secret deals and a host of weapons that they use daily. ----- Do the Justice Department, The Securities and Exchange Commission, or other federal forces do anything about this? Not much. These men pay the bribes that keep Washington floating. They have paid hundreds of billions of dollars, in â... tributeâ... , to the current Administration. It isnâ... t wise to bite the hand that feeds you. ----- This kinds of things do affect the average person by creating more discrimination that they have to endure, a worse economy, a less favorable impression of their country, deeper misogyny, less equality, more privilege. If it

bothers you, and you have ever paid taxes, call the FBI, SEC, GAO and Congressional phone numbers that you see online and ask them what they are doing about it. ---- Most of the women that work with the NVCA quit due to sexual abuse ----- The NVCA and the CIA's IN-Q-TEL are business partners in election rigging, anti-trust law violations and tech RICO law violations. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

TESLA MOTORS LIES AND SAFETY DEFECTS -- ([Click HERE, on this title, to open the Evidence Gallery](#))

TESLA MOTORS LIES AND SAFETY DEFECTS: ---- See: <http://www.gotmusked.com> ---- See: <https://dawnproject.com/full-self-driving-cars-software-at-its-most-dangerous/> ---- See: <https://tesladeaths.com> ---- Elon Musk has lied hundreds of times about Tesla Motors ---- See: <https://carbuzz.com/news/nearly-500000-tesla-models-have-serious-defects> ---- THESE CARS BLOW-UP AND RELEASE POISON SMOKE THAT WILL POISON YOU, YOUR FAMILY AND YOUR FETUS!!!!!! ---- THE VAMPIRE POWER DEFECT: Your Tesla will suck more power than it needs in order to try to charge itself. A huge bunch of Tesla charging cords set themselves on fire. IF YOU WANT YOUR HOME OR OFFICE TO BURN DOWN, THEN PARK YOUR TESLA INSIDE IT. ----- TESLA HAD to POWER DOWN all of their cars because they blow up when charging. THIS MEANS THAT THE CAR THAT WAS ADVERTISED IS NOT THE CAR THAT YOU BOUGHT! BECAUSE OF TESLA'S BAD ENGINEERING, ALL OF THEIR CARS HAD TO HAVE ADDED SAFETY SHIELDS AND POWER REDUCTION AFTER-MARKET PROGRAMMING TO DETUNE THEM. ---- TESLA'S GO OUT OF CONTROL ALL OF THE TIME AND CRASH ----- HORRIBLE DEFECTS: Not everything is unicorns and rainbows when it comes to an electric vehicle, and Tesla (undoubtedly) has a few kinks to work out. However, some of these flaws have seemingly been ignored or swept away from the public eye. There are some things that are never openly admitted or speculated about Tesla vehicles, yet we harshly criticize run-of-the-mill autos with ease. Out of fairnessâ... and for potential buyers, necessityâ... we should take a look at a few of the complaints that current owners have raised about these beloved EVs. ---- AWFUL BUILD QUALITY: If you have ever experienced difficulties with a Tesla, firsthand, then you probably know better than anyone how pricey repairs can become if theyâ... re not covered by a warranty or insurance. This explains why insurance premiums are so high for these vehicles. However, the truth of the matter is that even if youâ... re not paying to replace those parts, they are much poorer quality than weâ... re all led to believe. If Teslaâ... s parts were, in fact, of great quality, then we wouldnâ... t have freak issues such as bolts rusting off after a mere few years of ownership, or falcon doors constantly misaligning themselves. Not everything on a Tesla is inherently low-quality, but Tesla is certainly cutting corners. The durability shows in the longevity of the parts and by how early rattling, squeaking, and other common problems seem to surface. ---- HORRIBLE SPEEDOMETER PLACEMENT: The golden rule weâ... re all taught in driving school is to keep your eyes on the road. This is, obviously, why police have been cracking down on drivers who use handheld electronic devices while driving. You would expect that a carmaker would probably build a car with safety in mind and take things like this into consideration during the design process. But technology comes first for Tesla. Their (controversial) touchscreen is also the home for the speedometer, which on the edge of the driverâ... s peripheral vision, which means that they have to look away from the road in order to see what speed theyâ... re going. Itâ... s not necessarily the biggest problem, at least in hindsight, but it can become a dangerous feature for the unsuspecting. Still, the feature is shared with the Mini Cooper, including the electric Mini Cooper SE. ---- INSANELY EXPENSIVE TO REPAIR: Part of the appeal of buying something expensive is the expectation that it will save you money in the future. But Tesla has earned a spot in the hall of fame for overpriced vehicles, and that doesnâ... t just apply to the sticker price but also takes into account all the maintenance costs that plague owners. Even though the Teslaâ... s donâ... t need oil changes, spark plug replacements, or oil filters, Tesla recommends drivers invest in their maintenance plans that include a thorough inspection of the vehicle every 12,000 miles. The prices vary based on the year and model of the car,

as well as which specific plan the driver chooses, but standalone inspections range anywhere from \$475 to \$750 per visit (not including repairs). A four-year maintenance plan is around \$2,500. Needless to say, youâll need to have a good chunk of change set aside for these evaluations. Issues extend to tires and poor suspension, and yes, we will certainly mention the battery. --- **EXTENSIVE STEERING FAILURES:** Itâs true that Teslas tend to carry a bit of technological baggage with their state-of-the-art devices. Most of it is just annoying more than it is dangerous, but rest assured, Tesla has also managed to squeeze in a few mechanical problems as well. Theyâve been much less common than the cosmetic flaws but can have life-threatening outcomes. A few new Tesla owners have experienced problems with the steering wheel locking up while turning. Not only will you see your life flash before your eyes, but you may be dismayed to find out that several weeks of repairs are typically involved since itâs not an issue that Tesla has completely resolved. This is before we even bring to light the new "yolk" steering wheel in the Model S Plaid. --- **YOU CAN NEVER GET YOUR CAR BACK FROM THE SERVICE CENTERS:** Speaking of car troubles, Tesla dealerships are so sparse that many owners are forced to plan out their trip to the service center much more thoroughly than the average driver would. Unfortunately, the plight with their new Teslaâs can sometimes be uncharted territory for mechanicsâthis is a relatively new technology, after allâso it may take several days, and sometimes even weeks, before owners get to see their cars again. Whatâs worse is that many of these technical difficulties arenât fully resolved during the first visit. Like weâve said before, there isnât much knowledge on electric vehicles and technicians may not be as familiar with the problems that plague these vehicles, primarily because a Tesla operates more like a computer than it does an old gas guzzler. --- **TESLA CARS SPY ON YOU:** Teslas are incredibly connected... to the point that they're able to (potentially) predict when you plan to drive them and what routes. Elon hasn't been known for respecting privacy and his first company, PayPal, has even been in lawsuits for it. All respect to his technological advancement, but consider what a man creating a chip for your brain is trying to do with your car! Face recognition, video sharing with or without consent, and Tesla monitoring your driving history and patterns are all open for discussion and unless you dig really deep or have a law degree, you might not be safe. If you're a criminal or just worry about being watched, this is one of the last bit of tech pieces you would want. Some have even raised red flags over issues of hacking Teslas for a new world of issues. --- **THE EMERGENCY RELEASE WILL SCREW YOU:** It may seem like a nitpick (and it is) but the terrible placement of the emergency handle is also a potential threat to the car and therefore, itâs a necessary point to bring up. Since Teslaâs vehicles donât have your average door handle and everything in the car is electric, the manufacturer was witty enough to install an emergency handle on the interior to prevent passengers from getting trapped inside. Thereâs just one little flaw with this idea: the placement. Since new passengers arenât used to the high-tech vehicle, they tend to go for the emergency handle instead of using the standard electric button that opens the door. This is an honest mistake since the emergency handle is near where a door handle normally would be, but if itâs pulled too often it can and will crack the window. And thatâs the last thing any Tesla owner wants to deal with. --- **DEADLY BLIND SPOTS:** Another feature that is seen in many modern-day vehicles (electric or not) is blind-spot detection. This is a nice touch to have and is practically expected on a high-end vehicle these days. The only thing that separates Tesla from other manufacturers that are employing blind-spot detection is the placement of the detector. Similar to the difficulty that people have seeing the speedometer, the blind-spot detection doesnât alert drivers of a threat on the side-view mirrors like most vehicles do. Instead, a notice pops up on the touchscreen. A lot of people have something against the touchscreen and, while we donât find it to be all bad, there are instances such as this one when itâs understandable why it can become a nuisance. If every feature is integrated into the touchscreen, it seems like the entire car revolves around a mounted iPad. --- **BAD COSMETIC DETAILS:** Have you ever bought something nice only to have it experience defects shortly after? If youâve put a good amount of cash into it, itâs not only inconvenient but also extremely frustrating. Proud Tesla owners have been extremely let down to find that their overpriced electric vehicle has scratches all over their car and bulges in the windshield. These unfortunate Teslas were born with cosmetic defects from the factory. Clearly, the newbie manufacturer hasnât been able to get the assembly process down yet. Waiting out the initial wave of manufacturer defects would be wiser than jumping on a waiting list for the latest and greatest model. --- **ZERO FUTURE PROTECTION:** Except Tesla and Rivian, there have been no major car manufacturers to emerge in almost 100 years. Naturally, this doesn't include off-shoot luxury brands or foreign brands that were

bought out. Tesla respectably came from the ground-up in the 21st century on its own. That being said, it doesn't have a long carefully-recorded history of reliability, work ethic, or quality control, and it shows hard. Besides body gaps that range from dog doors to atomic fusion, the real longevity of a Tesla is almost entirely unknown. The used market for a Tesla is not great to begin with, but with the emergence of high battery replacement costs, how the old Teslas hold up is a big fat question mark. New rules and restrictions like to speed or features can be turned off without your consent remotely at the whim of a the bureaucrats. ---- **VERY UNSAFE WHEEL DESIGN:** There are some things that you never know about a car until you personally own it. And, to be fair, owners tend to critique their own cars harshly. A common nitpick with the Tesla Model 3 is the obnoxious fact that it comes with all-terrain (otherwise known as, â... all seasonâ...) tires. Many Model 3 owners dislike this because they want more performance-oriented tires. Not to say that itâ... s not a smooth rideâ... it has received incredible reception for that aloneâ... but if it was included with performance tires, the experience could be enhanced tremendously. The shared belief among many owners (specifically, those who donâ... t need winter tires) is that all-terrain tires should be something that a buyer can purchase on their own if they happen to need them. ---- **BATTERY REPLACEMENT IS A NIGHTMARE:** Along with the sketchy aspect of having an electric vehicle, thereâ... s also a major setback on the cost to repair it as well. While a charge may not be so pricey, the cost to replace any of the parts on a Tesla can really become a burden. For instance, if you had to buy a new battery for a Model 3, the base would cost around \$9,500 (on the low end) and the extended-range battery would come close to \$16k. Sadly, thatâ... s as much as a used car (maybe even a few). Thereâ... s a domino effect with these overpriced repairs as well, as the price to insure a Tesla tends to be more than the average vehicle. The high rate of accidents in Teslas is partly to blame, but their expensive repairs are no help. ---- **THERE ARE NO DEALERSHIPS AROUND TO HELP YOU:** Tesla has just recently begun opening service centers in areas with a large amount of foot traffic, but the idea of dealerships is a concept of the past for Tesla. Following a completely different business model from the traditional car manufacturers, Tesla sells its cars directly to its customers through their own small, intimate stores. This allows Tesla to educate the customers on what exactly they're getting into with an electric vehicle and to choose precisely how theyâ... d like their car to look. Of course, it takes months for customersâ... vehicles to be delivered, but this still allows them to get exactly what they want. It also means that Tesla makes money off of their cars, while traditional dealerships make money from their service departments. The drawback for a Tesla owner is that these are located, largely, in metropolitan areas and so are the service centers. Unlike traditional dealerships that are in every town, Tesla selects store and service center locations based on foot traffic. ---- **TESLA STILL COSTS MORE THAN A GAS CAR AND IS WORSE FOR THE ENVIRONMENT:** Even though Tesla has managed to bring down the customerâ... s cost of a vehicle by cutting out dealerships altogether, theyâ... re still pretty pricey. Many of Teslaâ... s major competitors have a bit of an edge by offering vehicles that arenâ... t 100% electric, which is an appealing point for many buyers, but theyâ... re also less expensive. The base Chevy Volt, for instance, is cheaper than Teslaâ... s base Model 3. Less people are as willing to go for the Model S purely because they have no desire to have an electric vehicle that revolves around performance. For many, the price just isnâ... t worth it, not when the battery will need to be replaced in a matter of a few years (depending on use). This goes hand-in-hand with the cost of Teslaâ... s parts because consumers donâ... t want to spend a lot of money on a car that will also be pricey to fix down the road. ---- **TESLA'S AUTOPILOT CAN KILL YOU:** Tesla's autopilot has been known to get people in trouble, napping, reading, and working on the freeway. The fact is, there's still no legal protection for someone to sit down and be driven away. Thought Tesla gets close with tools like "tow mode," allowing for an empty car to follow another Tesla with some limitations. Legally you still need to keep your hands on the wheels and be alert, despite the statistically safer autopilot driving and advancements in technology. While a truly autonomous car would open up a new world; safe transport for the elderly, fewer fatalities, easier commutes, and the like, we may be a few major traffic law changes away from that world, and Tesla can't change that yet. ---- **COLD WEATHER KILLS YOUR TESLA:** There are so many common glitches that go on with a Tesla that drivers have become paranoid of serious troubles, especially anything involving that precious battery. If you havenâ... t tested one out in cold weather, donâ... t be alarmed at that slow acceleration, itâ... s normal. Yep. If you buy a \$35,000 (and up!) vehicle, you can expect that the cold air will affect the battery just like it would any other vehicle. But cold prevents the battery from regenerating as quickly as it typically would, which limits the driverâ... s ability to move faster. It sounds simple in

retrospect, but it can be a frightening few minutes for a Tesla owner to discover their car is having trouble moving quickly. ---- **ACCELERATION SURGE DEFECTS WILL KILL YOU:** Contrary to what Elon Musk has claimed on social media, Tesla has been accused of having a fatality rate thatâ... s more than triple what you see in luxury vehicles. Musk claims that Teslaâ... s are the safest vehicles on the road, which is either an ill-researched claim or a blatant lie on his part. Since his stats are based on vehicle miles (rather than vehicle years) it leads you to an inaccurate conclusion, and we donâ... t actually know how many miles these vehicles have traveled, and this also leaves out passengers. After thorough research, many of the Tesla accidents werenâ... t even properly coded, meaning that Muskâ... s claim leaves out several accidents within the US and other countries (such as China) that have higher accident rates. Really, this could all be because of accident-prone drunk Tesla owners who are, mostly, drunk douche bags. ---- **CONSTANT RATTLING NOISES:** The little things in life shouldnâ... t bother you, but when itâ... s an incessant rattling noise in your brand-new luxury car, those little things can be difficult to ignore. Thereâ... s a common problem with Teslas experiencing rattling in several areas of the cars. Owners have taken their cars to service centers numerous times for this issue but a very rare few have seen the annoyance resolved. In fact, a few have even documented their experience online, while some have even received their car from the service center only to discover that the rattle has not gone away plus there is a new one! It shouldnâ... t be blown out of proportion, but the fact of the matter is that consumers have put a lot of their money into these cars and they expect a decent level of quality so if problems occur then some resolutions would be nice. ---- **TESLA SOLAR STUFF IS NEVER IN STOCK:** Lesser known than Teslaâ... s famed electric vehicles is the Solar Roof and Powerwall. As the names imply, these are solar panels that store energy that is even cleaner for the car to run off of. Just two years into this accessory, though, sales have dropped over 70% from their peak. The Powerwall 2 is said to lose 70% of its efficiency after 10 years and solar tiles are close to \$42 per square foot, which is part of why most consumers steer clear. Investors arenâ... t extremely pleased with the outcome of SolarCityâ... s products (which Musk has endorsed with open arms), but the signs were written on the walls, as it were. If solar panels were cheap enough for everyone to afford, wouldnâ... t we all have them on our houses? Since they donâ... t even have a guaranteed longevity, consumers generally feel that the Powerwall and Solar Roof are simply not worth it. In the home solar markets, even if consumers beg for the still "available" Powerall or new shingle-replacing solar roof, it's almost guaranteed they won't be able to find or get any of them anywhere! ---- **TESLA CUSTOMER SUPPORT JUST SUCKS:** The underworld of the customer service department is dreaded by customers of just about any major corporation. No customer wants to call in and get passed around from rep to rep and robot to robot. Youâ... d think that Tesla would have come up with a more efficient way to handle their â... valuedâ... customers' problems and have a decent customer service team. Thatâ... s wishful thinking, though. If you need any help, particularly with SolarCityâ... s products, then you can forget ever getting through to anyone the first time. Attempting to get ahold of the â... rightâ... representative is a game of cat-and-mouse, and youâ... ll have a pretty challenging time catching them in a spare moment (when they can actually speak, at all). ---- **TESLA IS ALWAYS ON THE VERGE OF BANKRUPTCY:** While itâ... s no secret that Tesla has struggled with sales, it raises a few questions about what that means for the future of the corporation. We donâ... t really know how close Tesla truly came to going under, seeing as how Elon Musk has repeatedly glossed over Teslaâ... s issues instead of being frank about things (e.g., the SolarCity investments, accident rates, etc). So, Muskâ... s exasperated croaks of how Tesla nearly went bankrupt almost sound like the boy who cried wolf, at least from an outside perspective. If Musk is being honest about the companyâ... s financial struggles, then the future looks bleak. Scraping by when the economy is relatively stable is not a good sign for a new car company, and what happens when those battery costs skyrocket? No one is going to be willing to pay more than \$40k for a base Model 3. ---- **TESLA CARS HAVE AWFUL BODY PANEL GAPS:** You donâ... t have to give a Tesla, specifically the Model 3, a thorough inspection to notice that thereâ... s an insane amount of space between the body in some parts and less in others. Itâ... s not an overly invasive issue, but when youâ... re paying around \$35,000 for a car, there are a few minimum expectations that should be met. One of those is definitely a clean look. Each of the Tesla models has perfectly executed an aerodynamic style, with concealed handles and sleek lines, which makes the gap that much more noticeable to anyone who happens to glance in the direction of a Model 3. Since Tesla factory workers have been killing each other in Tesla's parking lot in Fremont, you can't expect too much from them. ---- **DEADLY TESLA DOOR HANDLES:** One of the most

notable characteristics of every Tesla is their futuristic door handles that pop out with ease. The higher-end models have nice, metal handles with chrome finishes. However, if you happen to compare, say, a Model S to a Model 3, youâ€¦ ll immediately notice the lack of strength behind the latter's handles. Not only are the door handles on the Model 3 thinner, but they seem to be made with inferior materials to the higher-tier models. There have even been a few people who have had the door handles freeze to the car, leaving them unable to get inside. We have to note that there hasnâ€¦ t been a plague of door handle issues, so this isnâ€¦ t an official defect, but itâ€¦ s more of a cosmetic problem that could become a mechanical one in the future. ---- TESLA CARS ADD AWFUL INCONVENIENCE TO YOUR LIFE: The naïve car buyer is often led to believe that electric cars are all ponies and rainbows. However, many manufacturers acknowledge that we have yet to get everything down to a science. Plus, thereâ€¦ s a learning curve for those new to EVs, which is why most semi-electric cars are still able to be powered with gasoline. The serious drawback with a Tesla is the lack of a safety net should the battery run dead. Jumper cables are entirely out of the question, which is why owners of EVâ€¦ s get anxiety on road trips and long-distance commutes. The remaining range can be inaccurate, potentially leaving a driver stranded if they donâ€¦ t judge their carâ€¦ s abilities correctly. ---- TESLA'S ALL LOOK ALIKE AND ARE NOW RUN-OF-THE-MILL: Although this isnâ€¦ t much of a shock at all, little fail to recognize the total lack of variety thatâ€¦ s offered in the Tesla fleet. Of course, the higher-end models have prettier finishes and tend to look nice no matter what, but each and every Tesla is almost identical. This is obviously the case with everyday run-of-the-mill vehicles as well, but thatâ€¦ s sort of the point, isnâ€¦ t it? If youâ€¦ re spending a good chunk of change to claim that over-hyped Tesla as your own, wouldnâ€¦ t it be nice if you at least had a decent amount of options to truly make it feel like your own? For what youâ€¦ re paying, it seems like there should already be a plethora of options. ---- ABOVE ALL ELSE: Tesla's battery system is the worst designed, most deadly, awful power system in history! IT WILL KILL YOU AND BURN YOUR FAMILY ALIVE, LIKE IT HAS DONE TO MANY TESLA VICTIMS ---Also see the additional Tesla issues, above, involving 'rare earth mines', 'lithium battery dangers', 'Elon Musk's constant use of "hit-men" and character assassins' to destroy competitors and reporters, the vast racism and women abuse and the dead workers poisoned in his battery factories around the globe. *** CLICK THROUGH THE IMAGES, VIDEOS and DOCUMENTS, BY CLICKING ON THE TITLE IN BLUE ***

The Supply-Pocolypse Perfect Storm

As the global economy gradually recovers from the impact of COVID-19 pandemic, worldwide supply crunch is intensifying, spreading not only from one country to another, but also from one industry to another.

"Vaccines don't last more than 5 months", says Israel, the most vaccine-tested nation in the world. If you think you can just 'wait till the vaccines start working and Covid will end' you are wrong.

Not to be a 'Harry Selden', but this supply-pocolypse will last for over a decade because politicians are incapable of having the vision to tackle the unexpected.

A year ago, when the pandemic continued to spread, economies around the world were severely hit and there was panic buying among consumers. Today, it is companies that are trying to go on a stockpiling, buying more raw materials than they need to keep up with rapidly recovering demand. The panic buying is fuelling more shortages of raw materials, including copper, iron ore, steel, corn, coffee, wheat, soybeans, wood, semiconductors, plastics, cardboard, etc. As a result, inventories of seemingly every raw material around the world are running low. â... You name it, and we have a shortage on it,â... Tom Linebarger, chairman and chief executive of engine and generator manufacturer Cummins Inc., said earlier, and he noted that his clients are â... trying to get everything they can because they see high demandâ... .

Supply shortages have driven prices up significantly, with the impact of rising prices for some key raw materials being significant. The prices of various industrial raw materials such as crude oil, plastics, and

chemicals are rising. Some of the impacts of higher raw material prices have already begun to be reflected in consumer goods. Reynolds Consumer Products Inc., the maker of the namesake aluminium foil and Hefty trash bags, is planning another round of price hike, and this will be the third for the increase this year alone. Food prices are also climbing. The price of palm oil, the world's most consumed edible oil, has risen more than 135% over the past year to record levels; soybeans have topped USD 16 a bushel for the first time since 2012; corn futures prices have touched an eight-year high, and wheat futures prices have risen to the highest level since 2013.

Changes in factory orders due to the impact of the pandemic have also tightened supply in some markets and pushed up prices for raw materials. Some knitting enterprises in Dongguan, Guangdong, said that affected by the pandemic, about 40% of the orders have come back to China from countries such as India and Southeast Asian countries, while the factory utilisation rate has increased by about 30% to 40%, and now it has reached 100%. In Jiangyin, Jiangsu, a bedsheet enterprise adjusted its production capacity to accommodate a USD 20 million order from Southeast Asia. Increased demand from the textile industry has led to tight supplies of raw materials. In Wujiang, Jiangsu, where polyester filament yarn is the most in demand, the shortage of raw materials this year has been unexpected, especially in the current off-season, when there is not much stock. In Suzhou, also in Jiangsu, the export of polyester filament yarn increased by nearly 60% from January to April, while the price increased by 40% to 60%. Compared with the same period last year, the price of filament yarn increased by RMB 2000-3000/ton.

Remarkably, this hoarding frenzy is pushing global supply chains to the brink of collapse. Inventory shortages, transportation bottlenecks, and price increases are nearing critical levels, raising concerns that strong global growth could fuel inflation. The supply disruptions in the past are simply incomparable compared to the severe inventory crunch of 2021. Industry insiders predict that both large and small enterprises will be affected by this supply shortage.

Why are current supply shortages so acute?

Researchers at ANBOUND believe that instead of having one single factor, there are multiple reasons for the emergence of complex systemic problems.

First of all, there is the recovery in demand as the pandemic is brought under control. This year, as vaccination rollout efforts have brought the pandemic significantly under control in the United States and some European countries, the economy has begun to show significant momentum for recovery. This trend prompted a near-simultaneous recovery in most markets around the world. The collective recovery of global markets has led to a near-simultaneous increase in demand, exacerbating the mismatch between supply and demand. In the case of commodity futures, the capital was collectively bullish on commodities under such expectations, significantly driving up the prices of commodities (mostly upstream commodities) and spreading to midstream and downstream commodities. It should be noted in particular that the surge in demand for certain specific commodities under the pandemic has also exacerbated the supply-demand mismatch in some industrial chains. For example, the increase in the need of remote, online working and studying has increased the demand for all kinds of electronic products, leading to a surge in global demand for semiconductor chips, which affects several chip-requiring industries.

Another reason is that the pandemic has disrupted the global supply chain system, causing distortions in supply and demand in certain industries, which are transmitted along the supply chain, causing a wider supply crunch. As ANBOUND previously pointed out, the spread of the pandemic has dealt multiple blows to global supply chains. During the pandemic, China, as the "world's factory", was affected by the pandemic and its production side was disrupted. Then, the demand side of developed countries was suppressed by the impact of the pandemic. This is followed by the fact that the malfunctioning of the global supply chain system has exacerbated global supply distortions. To cite an example, the severe shortage of containers due to disruption of the supply chain has exacerbated the global supply distortions.

In addition, enterprises began to collectively increase their inventories, leading to the increase of inventories in the industrial chain and supply chain, amplifying the demand for all kinds of raw materials, intermediate products, and supporting products. In the past, in order to save costs and improve efficiency, many enterprises advocated zero-inventory production and tried to reduce the inventory in the production link, thereby reducing the capital occupation. However, the smooth operation of zero inventory production depends on the efficient global supply chain system. Once a problem occurs in the global supply chain system, it can lead to chaos in the whole supply chain system. The 2011 earthquake in Tōhoku, Japan has caused the shutdown of some key auto parts plants, which once led to the global auto supply chain being affected. Likewise, the global spread of the COVID-19 pandemic since last year has damaged, distorted, and even disrupted global supply chains.

Finally, geopolitical factors have also contributed to the tight supply of global commodities, resulting in the artificial disruption of part of the industrial chain and supply chain. For example, the U.S.-driven crackdown on chip supply to Chinese enterprises and related sanctions have seriously disrupted the global semiconductor industry chain.

How long will the supply crunch last?

Overall, the global supply crunch is due to a variety of reasons, including increased demand from the post-pandemic economic recovery, distortions in global supply chains caused by the pandemic, collective stockpiling by enterprises around the world, and geopolitical disruptions. However, this does not represent a significant expansion of aggregate global demand, but rather a distortion of the existing system as it is disrupted and broken. Judging from the current situation, this tight supply situation will last for a long time, leading to the price rise of raw materials and components. Therefore, both enterprises and governments need to be prepared for this scenario in the medium- and long-term.

TESLA MOTORS LIES AND SAFETY DEFECTS:

---- See: <http://www.gotmusked.com>

---- See: <https://dawnproject.com/full-self-driving-cars-software-at-its-most-dangerous/>

---- See: <http://tesladeaths.com>

---- Elon Musk has lied hundreds of times about Tesla Motors

---- See: <https://carbuzz.com/news/nearly-500000-tesla-models-have-serious-defects>

---- THESE CARS BLOW-UP AND RELEASE POISON SMOKE THAT WILL POISON YOU, YOUR FAMILY AND YOUR FETUS!!!!!!

---- THE VAMPIRE POWER DEFECT: Your Tesla will suck more power than it needs in order to try to charge itself. A huge bunch of Tesla charging cords set themselves on fire. IF YOU WANT YOUR HOME OR OFFICE TO BURN DOWN, THEN PARK YOUR TESLA INSIDE IT.

----- TESLA HAD to POWER DOWN all of their cars because they blow up when charging. THIS MEANS THAT THE CAR THAT WAS ADVERTISED IS NOT THE CAR THAT YOU BOUGHT! BECAUSE OF TESLA'S BAD ENGINEERING, ALL OF THEIR CARS HAD TO HAVE ADDED SAFETY SHIELDS

AND POWER REDUCTION AFTER-MARKET PROGRAMMING TO DETUNE THEM.

---- TESLA'S GO OUT OF CONTROL ALL OF THE TIME AND CRASH

----- HORRIBLE DEFECTS: Not everything is unicorns and rainbows when it comes to an electric vehicle, and Tesla (undoubtedly) has a few kinks to work out. However, some of these flaws have seemingly been ignored or swept away from the public eye. There are some things that are never openly admitted or speculated about Tesla vehicles, yet we harshly criticize run-of-the-mill autos with ease. Out of fairnessâ... and for potential buyers, necessityâ... we should take a look at a few of the complaints that current owners have raised about these beloved EVs. -

--- AWFUL BUILD QUALITY: If you have ever experienced difficulties with a Tesla, firsthand, then you probably know better than anyone how pricey repairs can become if theyâ... re not covered by a warranty or insurance. This explains why insurance premiums are so high for these vehicles. However, the truth of the matter is that even if youâ... re not paying to replace those parts, they are much poorer quality than weâ... re all led to believe. If Teslaâ... s parts were, in fact, of great quality, then we wouldnâ... t have freak issues such as bolts rusting off after a mere few years of ownership, or falcon doors constantly misaligning themselves. Not everything on a Tesla is inherently low-quality, but Tesla is certainly cutting corners. The durability shows in the longevity of the parts and by how early rattling, squeaking, and other common problems seem to surface.

---- HORRIBLE SPEEDOMETER PLACEMENT: The golden rule weâ... re all taught in driving school is to keep your eyes on the road. This is, obviously, why police have been cracking down on drivers who use handheld electronic devices while driving. You would expect that a carmaker would probably build a car with safety in mind and take things like this into consideration during the design process. But technology comes first for Tesla. Their (controversial) touchscreen is also the home for the speedometer, which on the edge of the driverâ... s peripheral vision, which means that they have to look away from the road in order to see what speed theyâ... re going. Itâ... s not necessarily the biggest problem, at least in hindsight, but it can become a dangerous feature for the unsuspecting. Still, the feature is shared with the Mini Cooper, including the electric Mini Cooper SE.

---- INSANELY EXPENSIVE TO REPAIR: Part of the appeal of buying something expensive is the expectation that it will save you money in the future. But Tesla has earned a spot in the hall of fame for overpriced vehicles, and that doesnâ... t just apply to the sticker price but also takes into account all the maintenance costs that plague owners. Even though the Teslaâ... s donâ... t need oil changes, spark plug replacements, or oil filters, Tesla recommends drivers invest in their maintenance plans that include a thorough inspection of the vehicle every 12,000 miles. The prices vary based on the year and model of the car, as well as which specific plan the driver chooses, but standalone inspections range anywhere from \$475 to \$750 per visit (not including repairs). A four-year maintenance plan is around \$2,500. Needless to say, youâ... ll need to have a good chunk of change set aside for these evaluations. Issues extend to tires and poor suspension, and yes, we will certainly mention the battery. -

--- EXTENSIVE STEERING FAILURES: Itâ... s true that Teslas tend to carry a bit of technological baggage with their state-of-the-art devices. Most of it is just annoying more than it is dangerous, but rest assured, Tesla has also managed to squeeze in a few mechanical problems as well. Theyâ... ve been much less common than the cosmetic flaws but can have life-threatening outcomes. A few new Tesla owners have experienced problems with the steering wheel locking up while turning. Not only will you see your life flash before your eyes, but you may be dismayed to find out that several weeks of repairs are typically involved since itâ... s not an issue that Tesla has completely resolved. This is before we even bring to light the new "yolk" steering wheel in the Model S Plaid.

---- YOU CAN NEVER GET YOUR CAR BACK FROM THE SERVICE CENTERS: Speaking of car

troubles, Tesla dealerships are so sparse that many owners are forced to plan out their trip to the service center much more thoroughly than the average driver would. Unfortunately, the plight with their new Tesla... s can sometimes be uncharted territory for mechanics... this is a relatively new technology, after all... so it may take several days, and sometimes even weeks, before owners get to see their cars again. What... s worse is that many of these technical difficulties aren... t fully resolved during the first visit. Like we... ve said before, there isn... t much knowledge on electric vehicles and technicians may not be as familiar with the problems that plague these vehicles, primarily because a Tesla operates more like a computer than it does an old gas guzzler. -

--- TESLA CARS SPY ON YOU: Teslas are incredibly connected... to the point that they're able to (potentially) predict when you plan to drive them and what routes. Elon hasn't been known for respecting privacy and his first company, PayPal, has even been in lawsuits for it. All respect to his technological advancement, but consider what a man creating a chip for your brain is trying to do with your car! Face recognition, video sharing with or without consent, and Tesla monitoring your driving history and patterns are all open for discussion and unless you dig really deep or have a law degree, you might not be safe. If you're a criminal or just worry about being watched, this is one of the last bit of tech pieces you would want. Some have even raised red flags over issues of hacking Teslas for a new world of issues. -

--- THE EMERGENCY RELEASE WILL SCREW YOU: It may seem like a nitpick (and it is) but the terrible placement of the emergency handle is also a potential threat to the car and therefore, it... s a necessary point to bring up. Since Tesla... s vehicles don... t have your average door handle and everything in the car is electric, the manufacturer was witty enough to install an emergency handle on the interior to prevent passengers from getting trapped inside. There... s just one little flaw with this idea: the placement. Since new passengers aren... t used to the high-tech vehicle, they tend to go for the emergency handle instead of using the standard electric button that opens the door. This is an honest mistake since the emergency handle is near where a door handle normally would be, but if it... s pulled too often it can and will crack the window. And that... s the last thing any Tesla owner wants to deal with.

---- DEADLY BLIND SPOTS: Another feature that is seen in many modern-day vehicles (electric or not) is blind-spot detection. This is a nice touch to have and is practically expected on a high-end vehicle these days. The only thing that separates Tesla from other manufacturers that are employing blind-spot detection is the placement of the detector. Similar to the difficulty that people have seeing the speedometer, the blind-spot detection doesn... t alert drivers of a threat on the side-view mirrors like most vehicles do. Instead, a notice pops up on the touchscreen. A lot of people have something against the touchscreen and, while we don... t find it to be all bad, there are instances such as this one when it... s understandable why it can become a nuisance. If every feature is integrated into the touchscreen, it seems like the entire car revolves around a mounted iPad. -

--- BAD COSMETIC DETAILS: Have you ever bought something nice only to have it experience defects shortly after? If you... ve put a good amount of cash into it, it... s not only inconvenient but also extremely frustrating. Proud Tesla owners have been extremely let down to find that their overpriced electric vehicle has scratches all over their car and bulges in the windshield. These unfortunate Teslas were born with cosmetic defects from the factory. Clearly, the newbie manufacturer hasn... t been able to get the assembly process down yet. Waiting out the initial wave of manufacturer defects would be wiser than jumping on a waiting list for the latest and greatest model.

---- ZERO FUTURE PROTECTION: Except Tesla and Rivian, there have been no major car manufacturers to emerge in almost 100 years. Naturally, this doesn't include off-shoot luxury brands or foreign brands that were bought out. Tesla respectably came from the ground-up in the 21st century on its own. That being said, it doesn't have a long carefully-recorded history of reliability, work ethic, or quality control, and it shows hard. Besides body gaps that range from dog doors to atomic fusion, the real longevity of a Tesla is almost entirely unknown. The used market for a Tesla is not great to begin with, but with the emergence of high battery

replacement costs, how the old Teslas hold up is a big fat question mark. New rules and restrictions like to speed or features can be turned off without your consent remotely at the whim of a the bureaucrats.

---- VERY UNSAFE WHEEL DESIGN: There are some things that you never know about a car until you personally own it. And, to be fair, owners tend to critique their own cars harshly. A common nitpick with the Tesla Model 3 is the obnoxious fact that it comes with all-terrain (otherwise known as, â... all seasonâ...) tires. Many Model 3 owners dislike this because they want more performance-oriented tires. Not to say that itâ... s not a smooth rideâ... it has received incredible reception for that aloneâ... but if it was included with performance tires, the experience could be enhanced tremendously. The shared belief among many owners (specifically, those who donâ... t need winter tires) is that all-terrain tires should be something that a buyer can purchase on their own if they happen to need them.

---- BATTERY REPLACEMENT IS A NIGHTMARE: Along with the sketchy aspect of having an electric vehicle, thereâ... s also a major setback on the cost to repair it as well. While a charge may not be so pricey, the cost to replace any of the parts on a Tesla can really become a burden. For instance, if you had to buy a new battery for a Model 3, the base would cost around \$9,500 (on the low end) and the extended-range battery would come close to \$16k. Sadly, thatâ... s as much as a used car (maybe even a few). Thereâ... s a domino effect with these overpriced repairs as well, as the price to insure a Tesla tends to be more than the average vehicle. The high rate of accidents in Teslas is partly to blame, but their expensive repairs are no help. -

--- THERE ARE NO DEALERSHIPS AROUND TO HELP YOU: Tesla has just recently begun opening service centers in areas with a large amount of foot traffic, but the idea of dealerships is a concept of the past for Tesla. Following a completely different business model from the traditional car manufacturers, Tesla sells its cars directly to its customers through their own small, intimate stores. This allows Tesla to educate the customers on what exactly they're getting into with an electric vehicle and to choose precisely how theyâ... d like their car to look. Of course, it takes months for customersâ... vehicles to be delivered, but this still allows them to get exactly what they want. It also means that Tesla makes money off of their cars, while traditional dealerships make money from their service departments. The drawback for a Tesla owner is that these are located, largely, in metropolitan areas and so are the service centers. Unlike traditional dealerships that are in every town, Tesla selects store and service center locations based on foot traffic.

---- TESLA STILL COSTS MORE THAN A GAS CAR AND IS WORSE FOR THE ENVIRONMENT: Even though Tesla has managed to bring down the customerâ... s cost of a vehicle by cutting out dealerships altogether, theyâ... re still pretty pricey. Many of Teslaâ... s major competitors have a bit of an edge by offering vehicles that arenâ... t 100% electric, which is an appealing point for many buyers, but theyâ... re also less expensive. The base Chevy Volt, for instance, is cheaper than Teslaâ... s base Model 3. Less people are as willing to go for the Model S purely because they have no desire to have an electric vehicle that revolves around performance. For many, the price just isnâ... t worth it, not when the battery will need to be replaced in a matter of a few years (depending on use). This goes hand-in-hand with the cost of Teslaâ... s parts because consumers donâ... t want to spend a lot of money on a car that will also be pricey to fix down the road.

---- TESLA'S AUTOPILOT CAN KILL YOU: Tesla's autopilot has been known to get people in trouble, napping, reading, and working on the freeway. The fact is, there's still no legal protection for someone to sit down and be driven away. Thought Tesla gets close with tools like "tow mode," allowing for an empty car to follow another Tesla with some limitations. Legally you still need to keep your hands on the wheels and be alert, despite the statistically safer autopilot driving and advancements in technology. While a truly autonomous car would open up a new world; safe transport for the elderly, fewer fatalities, easier commutes, and the like, we may be a few major traffic law changes away from that world, and Tesla can't change that yet. -

--- COLD WEATHER KILLS YOUR TESLA: There are so many common glitches that go on with a Tesla

that drivers have become paranoid of serious troubles, especially anything involving that precious battery. If you haven't tested one out in cold weather, don't be alarmed at that slow acceleration, it's normal. Yep. If you buy a \$35,000 (and up!) vehicle, you can expect that the cold air will affect the battery just like it would any other vehicle. But cold prevents the battery from regenerating as quickly as it typically would, which limits the driver's ability to move faster. It sounds simple in retrospect, but it can be a frightening few minutes for a Tesla owner to discover their car is having trouble moving quickly.

---- ACCELERATION SURGE DEFECTS WILL KILL YOU: Contrary to what Elon Musk has claimed on social media, Tesla has been accused of having a fatality rate that's more than triple what you see in luxury vehicles. Musk claims that Tesla's are the safest vehicles on the road, which is either an ill-researched claim or a blatant lie on his part. Since his stats are based on vehicle miles (rather than vehicle years) it leads you to an inaccurate conclusion, and we don't actually know how many miles these vehicles have traveled, and this also leaves out passengers. After thorough research, many of the Tesla accidents weren't even properly coded, meaning that Musk's claim leaves out several accidents within the US and other countries (such as China) that have higher accident rates. Really, this could all be because of accident-prone drunk Tesla owners who are, mostly, drunk douche bags.

---- CONSTANT RATTLING NOISES: The little things in life shouldn't bother you, but when it's an incessant rattling noise in your brand-new luxury car, those little things can be difficult to ignore. There's a common problem with Teslas experiencing rattling in several areas of the cars. Owners have taken their cars to service centers numerous times for this issue but a very rare few have seen the annoyance resolved. In fact, a few have even documented their experience online, while some have even received their car from the service center only to discover that the rattle has not gone away plus there is a new one! It shouldn't be blown out of proportion, but the fact of the matter is that consumers have put a lot of their money into these cars and they expect a decent level of quality so if problems occur then some resolutions would be nice.

---- TESLA SOLAR STUFF IS NEVER IN STOCK: Lesser known than Tesla's famed electric vehicles is the Solar Roof and Powerwall. As the names imply, these are solar panels that store energy that is even cleaner for the car to run off of. Just two years into this accessory, though, sales have dropped over 70% from their peak. The Powerwall 2 is said to lose 70% of its efficiency after 10 years and solar tiles are close to \$42 per square foot, which is part of why most consumers steer clear. Investors aren't extremely pleased with the outcome of SolarCity's products (which Musk has endorsed with open arms), but the signs were written on the walls, as it were. If solar panels were cheap enough for everyone to afford, wouldn't we all have them on our houses? Since they don't even have a guaranteed longevity, consumers generally feel that the Powerwall and Solar Roof are simply not worth it. In the home solar markets, even if consumers beg for the still "available" Powerwall or new shingle-replacing solar roof, it's almost guaranteed they won't be able to find or get any of them anywhere!

---- TESLA CUSTOMER SUPPORT JUST SUCKS: The underworld of the customer service department is dreaded by customers of just about any major corporation. No customer wants to call in and get passed around from rep to rep and robot to robot. You'd think that Tesla would have come up with a more efficient way to handle their valued customers' problems and have a decent customer service team. That's wishful thinking, though. If you need any help, particularly with SolarCity's products, then you can forget ever getting through to anyone the first time. Attempting to get ahold of the right representative is a game of cat-and-mouse, and you'll have a pretty challenging time catching them in a spare moment (when they can actually speak, at all).

---- TESLA IS ALWAYS ON THE VERGE OF BANKRUPTCY: While it's no secret that Tesla has struggled with sales, it raises a few questions about what that means for the future of the corporation. We don't really know how close Tesla truly came to going under, seeing as how Elon Musk has repeatedly glossed over Tesla's issues instead of being frank about things (e.g., the SolarCity investments, accident rates, etc). So, Musk's exasperated croaks of how Tesla nearly went bankrupt almost sound like the boy

who cried wolf, at least from an outside perspective. If Musk is being honest about the company's financial struggles, then the future looks bleak. Scraping by when the economy is relatively stable is not a good sign for a new car company, and what happens when those battery costs skyrocket? No one is going to be willing to pay more than \$40k for a base Model 3.

---- TESLA CARS HAVE AWFUL BODY PANEL GAPS: You don't have to give a Tesla, specifically the Model 3, a thorough inspection to notice that there's an insane amount of space between the body in some parts and less in others. It's not an overly invasive issue, but when you're paying around \$35,000 for a car, there are a few minimum expectations that should be met. One of those is definitely a clean look. Each of the Tesla models has perfectly executed an aerodynamic style, with concealed handles and sleek lines, which makes the gap that much more noticeable to anyone who happens to glance in the direction of a Model 3. Since Tesla factory workers have been killing each other in Tesla's parking lot in Fremont, you can't expect too much from them.

---- DEADLY TESLA DOOR HANDLES: One of the most notable characteristics of every Tesla is their futuristic door handles that pop out with ease. The higher-end models have nice, metal handles with chrome finishes. However, if you happen to compare, say, a Model S to a Model 3, you'll immediately notice the lack of strength behind the latter's handles. Not only are the door handles on the Model 3 thinner, but they seem to be made with inferior materials to the higher-tier models. There have even been a few people who have had the door handles freeze to the car, leaving them unable to get inside. We have to note that there hasn't been a plague of door handle issues, so this isn't an official defect, but it's more of a cosmetic problem that could become a mechanical one in the future.

---- TESLA CARS ADD AWFUL INCONVENIENCE TO YOUR LIFE: The naïve car buyer is often led to believe that electric cars are all ponies and rainbows. However, many manufacturers acknowledge that we have yet to get everything down to a science. Plus, there's a learning curve for those new to EVs, which is why most semi-electric cars are still able to be powered with gasoline. The serious drawback with a Tesla is the lack of a safety net should the battery run dead. Jumper cables are entirely out of the question, which is why owners of EVs get anxiety on road trips and long-distance commutes. The remaining range can be inaccurate, potentially leaving a driver stranded if they don't judge their car's abilities correctly.

---- TESLA'S ALL LOOK ALIKE AND ARE NOW RUN-OF-THE-MILL: Although this isn't much of a shock at all, little fail to recognize the total lack of variety that's offered in the Tesla fleet. Of course, the higher-end models have prettier finishes and tend to look nice no matter what, but each and every Tesla is almost identical. This is obviously the case with everyday run-of-the-mill vehicles as well, but that's sort of the point, isn't it? If you're spending a good chunk of change to claim that over-hyped Tesla as your own, wouldn't it be nice if you at least had a decent amount of options to truly make it feel like your own? For what you're paying, it seems like there should already be a plethora of options.

---- ABOVE ALL ELSE: Tesla's battery system is the worst designed, most deadly, awful power system in history! IT WILL KILL YOU AND BURN YOUR FAMILY ALIVE, LIKE IT HAS DONE TO MANY TESLA VICTIMS

---Also see the additional Tesla issues, above, involving 'rare earth mines', 'lithium battery dangers', 'Elon Musk's constant use of "hit-men" and character assassins' to destroy competitors and reporters, the vast racism and women abuse and the dead workers poisoned in his battery factories around the globe.

AFGHANISTAN RARE EARTH CORRUPTION CREATED BY MUSK AND HIS SILICON VALLEY TECH CARTEL:

Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age.

â... --- LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; â... Bad Guysâ... have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them.

---- WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.

---- A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their cronies, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.

---- Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.

---- Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury.

---- DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader.

---- Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the â... Jesusâ... of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Muskâ... s investor and bromance butt buddy.

---- Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Muskâ... s crimes to be printed because they benefit from Muskâ... s crimes.

---- Musk has been professionally diagnosed as a â... psychotic narcissist.â... A â... Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions â... Muskâ... , at least 1/3 of the comments have been placed there by Muskâ... s paid shills.

---- Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to â... dirty tricks teamsâ... to attack his competitors and elected officials who Musk hates.

---- Musk never founded his companies. Muskâ... s â... Starlinkâ... satellites are domestic spy and political manipulation tools â... never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla.

---- The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk canâ... t fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the â... per volumeâ... fire, crash, death and defect rate is THE WORST of any car maker in history!

---- Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or itâ... s suppliers and mining companies.

---- That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals.

---- The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy peopleâ... s lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington and Burling and a host of â... assassinsâ... .

---- It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose!

---- That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook's Meta's Google's Alphabet's Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS's Black Cube's Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

DEPT OF ENERGY CRONY SLUSH FUNDS SCAM CREATED BY MUSK AND HIS CRONY CARTEL:

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform. ---- That's right! Your public officials use federal agencies as dark-money laundering operations for their friends.

---- If you are a taxpayer: You suffered damages!

---- If you are an American business: You suffered damages!

---- If you are Democracy: You were broken! ---- If you were a tech mobster: You made out like a bandit!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds. -

--- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national's economic's or health's emergency's stimulus's scam.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism

and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances.

---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay

THE ELON MUSK PERSONAL PSYCHOLOGY REPORTS:

What a twisted, raging, sick pervert, narcissist, vengeful, anticompetitive, monopolistic, Goldman Sachs sucking mobster hit-man hiring mobster!

--- The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed.

---- Elon Musk, Larry Page, Steve Jurvetson and Jared Birchell hire Ex-CIA losers right after they are fired by the CIA, or directly from IN-Q-TEL or from Fusion GPS, Media Matters and other CYBER ASSASSIN KILL SERVICES. They send their hit men after competitors, reporters, ex-employees and whistle-blowers because they chose to CHEAT RATHER THAN COMPETE!

---- Elon Muskâ... s â... Twitter Purchaseâ... is just a scam to sell his Tesla stock without the SEC or his old investors noticing: THEY NOTICED!

---- Googleâ... s Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global

resources of Alphabet to hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources!

---- We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...!they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects.

---- Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senatorâ... s and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded. Now the damages must be paid for, one way, or another.

---- Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess.

---- Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to.

--- Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinnerâ... s â... special friendâ... , etc. on the staff of the Department of Energy and in the White House. We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it. -

--- We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing. If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk didâ...! go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try.

---- Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithiumâ... s widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are â... dumpingâ... the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

---- The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds.

---- Tesla is known as â... the official car of douche-bagsâ... . The safety defect cover-ups on the Tesla are extreme. Muskâ... s narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Muskâ... s racism and sociopath behaviors.

- His mother 'dated' all the white rich guys in South Africa while his father got his own daughter pregnant, killed some black guys and ran mining companies that treated blacks like slaves. Musk is the WHITE PRIVILEGE poster boy. His whole family are crooks, sex abusers and elitist bitches!

---- Musk is the POSTER BOY OF WHITE ANTI-BLACK PRIVILEGE

---- He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties.

---- He pays women for sex and pays other women not to disclose that he tried to sexually extort them. He paid Amber Heard at least \$500K for sex, paid his stewardess \$250K to report his sex abuse of her, and has a provider service via a layer of insiders.

---- His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions.

---- Space-X is just a domestic spying company. Donâ... t buy Muskâ... s bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Muskâ... s Neuralink company tortures small animals to try out Muskâ... s pseudo-science mind-reading chips.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â... Meta â... Google â... Alphabet â... Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â... Black Cube â... Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

ELON MUSK'S LITHIUM BATTERY LIES:

Elon Musk and the Senators he owns: Pelosi, Harris and Feinstein, will lie, until their dying day about these batteries that they all own stock in!

---- Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss

Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

---- Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age â... LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; â... Bad Guysâ... have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Muskâ... s stock market scam.

---- The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

---- A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

---- There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or itâ... s suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their cronyâ... s, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out.

---- Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to â... say nothingâ... by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury.

---- DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader.

---- Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news

self-aggrandizement articles about himself. Musk thinks he is the â... Jesusâ... of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Muskâ... s investor and bromance butt buddy.

---- Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

---- The DNC and the MSM refuse to allow any articles about Muskâ... s crimes to be printed because they benefit from Muskâ... s crimes. Musk has been professionally diagnosed as a â... psychotic narcissist.â... A â... Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

---- In EVERY blog that you read that mentions â... Muskâ... , at least 1/3 of the comments have been placed their by Muskâ... s paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.

---- Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to â... dirty tricks teamsâ... to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Muskâ... s â... Starlinkâ... satellites are domestic spy and political manipulation tools â... never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla.

---- The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk canâ... t fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the â... per volumeâ... fire, crash, death and defect rate is THE WORST of any car maker in history!

---- Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or itâ... s suppliers and mining companies.

---- That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals.

---- The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy peopleâ... s lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington and Burling and a host of â... assassinsâ... .

---- It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose!

---- That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook's Meta's Google's Alphabet's Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS's Black Cube's Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

IN FACT...

...there are thousands of other HARD FACT reasons why Musk and Tesla don't deserve to be in business. If you are a media shill you won't want those news items disclosed. If you are a Silicon Valley Big Tech douche bag, you don't want those reasons disclosed. If you are an honest realist, you will demand the the government SHUT MUSK DOWN!

This web page is "wired", using comparative AI analysis software, to act as evidence proving that Google, Facebook and other tech companies manipulate server access and search results to help themselves and harm their competitors in violation of anti-trust laws and human rights standards. 48 hours after we confronted the White House press officers: Robert Gibbs and Jay Carney with our FBI-produced evidence, they were gone from their positions. The same for Secretary of Energy Steven Chu. The same For NHTSA boss David Strickland. Then AG Holder. Then Sara Winslow, the DOJ Chief of the Civil Division. It has happened over 100 times. Every corrupt government executive that reviews our evidence gets fired or forced to resign because our evidence is rock solid and people from FBI, GAO, CIA and Congress put that evidence together. Dirty politicians might have their insiders inside all of the government agencies but we have ours that: 1.) protect us, 2.) spy on the bad guys 24/7, 3.) outnumber the corrupt ones by 20:1 and always get their targets! Good always finally triumphs over evil!

THE SILICON VALLEY CARTEL MEMBERS

The Worst Ones - Rev 2.2

You would be shocked to learn how many people are killed, every day, for less than \$50.00. ISIS and the Taliban will saw your head off for just an ideology. If people would commit murder over that small an amount of money, imagine what they would do to control the trillions of dollars of money that is always moving through the stock market. These are the people that will stop at nothing for power, mansions, hookers, private jets and greed!

THE BRIBED INSIDER TRADING POLITICIANS - Tracked via financial records and email leaks to quid pro quo:

- Aneesh Chopra - White House Tech Exec
- Arnold Schwarzenegger â... Governor (Accused of political bribery and kickbacks; tax evasion, illicit deal organization with Russians and moreâ...!)
- Barack Obama â... Chicago politician
- Bill Daley â... White House strong-arm (Forced to resign)(he is now under investigation)
- Bill Lockyer â... Calif State finance head (Under investigation and sex scandal conflicts, charged with corruption by media. Assets and ownerships under investigation)
- Daniel Cohen â... DOE Legal counsel who assisted in the Steven Chu scam (Sent packing/fired/forced to resign)
- David Axelrod â... White House strategist who helped stage the quid-pro-quo (Sent packing/fired/forced to resign)(he is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)
- Hunter Biden
- David Plouffe â... White House money packager. Arranged deals between VC campaign Donors (Forced to Resign. Under investigation)
- Debbie Wasserman Schultz
- Denis McDonough â... White House adviser
- Dianne Feinstein â... California politician
- Eric Holder â... Attorney General- DOJ (Forced to resign) (Charged with staff & VC Protections and

blockade of FBI and Special Prosecutor deployments in order to run the cover-up)

- Eric Strickland â... Head of Auto Safety agency under DOT (Sent packing/fired/forced to resign)(he is now under investigation. Charged with cover-up of Tesla and GM auto dangers he had known about)
- Gabriel Burt
- Harry Reid â... Senator- Solar factory guru, Congress lead (Accused of political bribery and kickbacks; tax evasion, and moreâ...!Forced out of Congress in shame)
- Hillary Clinton â... Dynastic politician
- Jack Lew
- Jay Carney â... White House press lead (Forced to resign)
- Jeff Berman - Bryan Cave. Berman, the former delegate counter for President Obamaâ... s 2008 campaign
- Jeff Peck, Peck, Madigan, Jones & Stewart. Aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee
- Jeffrey Zients
- Jerry Brown â... California politician
- Joe Rhodes â... White House shill
- Joe Biden - Politican who created Solyndra funds
- John Podesta â... White House adviser
- Jonathan Silver â... DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)
- Joshua Wright - FTC
- Kamala Harrisâ... Stock favoritism Insider with her husband
- Katherine Feinstein
- Kathy Zoi
- Ken Alex â... Scheme Adviser to Jerry Brown
- Ken Duberstein and Marti Thomas, The Duberstein Group. Duberstein was floated as a candidate for Obamaâ... s chief of staff before the president chose Bill Daley, while Thomas is a Democratic vet who worked in the Clinton Treasury Department.
- Lachlan Seward â... Energy Department insider gatekeeper
- Melanie Nutter â... Pelosi Top Aide
- Matt Rogers â... VC and quid pro quo pass-through conduit
- Megan Smith - U.S. CTO
- Mikey Dickerson
- Nancy Pelosi â... California politician
- Robert Gibbs â... White press office head
- Steven Chu â... Secretary of Energy â... The most corrupt in US history
- Todd Park â... IT manipulator inside White House
-

THE OLIGARCH FINANCIER/BENEFICIARIES OF THE CRIMES - Tracked via financial records and email leaks to quid pro quo:

- Andy Bechtolsheim â... VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)
- Bill Gurley
- Carl Gordon
- Chad Hurley - YouTube
- Cheryl Sandberg â... Facebook boss, reports to Larry Summers
- Dave McClure â... VC
- David Danielson
- David Drummond â... Lawyer/Lobbyistâ... Google, bribes expert for DC and EU regions (Under investigation. Quail Road, Woodside, CA home bugged)

- David Mott
- David Prend
- David Sacks
- Draper - Fisher â... VC firm (Campaign funder who received massive windfalls from Russian mining & tech start-up rigging)

- James Kingâ... Defamation-for-sale blogger
- Jawed Karim - YouTube
- Jeff Lieberman
- Jennifer Ouelletteâ... Defamation-for-sale blogger
- Jesse Oxfeldâ... Defamation-for-sale blogger
- Jessica Cohenâ... Defamation-for-sale blogger
- Jesus Diazâ... Defamation-for-sale blogger
- Jillian Schulzâ... Defamation-for-sale blogger
- Joanna Rothkopfâ... Defamation-for-sale blogger
- Joel Johnson, The Glover Park Group
- John Cookâ... Defamation-for-sale blogger and director of media assassins group
- John Herrmanâ... Defamation-for-sale blogger
- John Raffaelli, Capitol Counsel
- Jordan Sargentâ... Defamation-for-sale blogger
- Joseph Keenan Trotterâ... Defamation-for-sale blogger
- Josh Steinâ... Defamation-for-sale blogger
- Julia Allisonâ... Defamation-for-sale blogger
- Julianne E. Shepherdâ... Defamation-for-sale blogger
- Julie Domenick, Multiple Strategies LLC
- Justin Hydeâ... Defamation-for-sale blogger
- Kate Driesâ... Defamation-for-sale blogger
- Katharine Trendacostaâ... Defamation-for-sale blogger
- Katherine Drummondâ... Defamation-for-sale blogger
- Kelly Stoutâ... Defamation-for-sale blogger
- Kerrie Uthoffâ... Defamation-for-sale blogger
- Kevin Draperâ... Defamation-for-sale blogger
- Lacey Donohueâ... Defamation-for-sale blogger
- Larry Oâ... Brien, OB-C Group
- Lucy Hallerâ... Defamation-for-sale blogger
- Luke Maloneâ... Defamation-for-sale blogger
- Madeleine Daviesâ... Defamation-for-sale blogger
- Madeline Davisâ... Defamation-for-sale blogger
- Mario Aguilarâ... Defamation-for-sale blogger
- Mark Isakowitz, Fierce, Isakowitz and Blalock. Isakowitz and his GOP lobby shop scored a coup this year when Apple and Facebook both signed up as clients in a two-week span.
- Mark Kadesh, Kadesh & Associates. Kadesh, once chief of staff to Sen. Dianne Feinstein (D-Calif.), has an

A-list of California clients

- Matt Hardigreeâ... Defamation-for-sale blogger
- Matt Novakâ... Defamation-for-sale blogger
- Michael Ballabanâ... Defamation-for-sale blogger
- Michael Dobbsâ... Defamation-for-sale blogger
- Michael Spinelliâ... Defamation-for-sale blogger
- Morrison and Foerster
- Neal Ungerleiderâ... Defamation-for-sale blogger
- Nicholas Asterâ... Defamation-for-sale blogger
- Nicholas Guido Dentonâ... Defamation-for-sale blogger and head of the Gawker, Gizmodo, Jalopnik sleaze tabloid empire
- Omar Kardoudiâ... Defamation-for-sale blogger
- Owen Thomasâ... Defamation-for-sale blogger
- Patrick Georgeâ... Defamation-for-sale blogger and Character Assassination expert
- Patrick Laffoonâ... Defamation-for-sale blogger
- Patrick Redfordâ... Defamation-for-sale blogger
- Perkins Coie â... Campaign conduit law firm
- Rich Juzwiakâ... Defamation-for-sale blogger
- Richard Blakelyâ... Defamation-for-sale blogger
- Richard Rushfieldâ... Defamation-for-sale blogger
- Robert Fingerâ... Defamation-for-sale blogger
- Robert Sorokanichâ... Defamation-for-sale blogger
- Rory Waltzerâ... Defamation-for-sale blogger
- Rosa Golijanâ... Defamation-for-sale blogger
- Ryan Brownâ... Defamation-for-sale blogger
- Ryan Goldbergâ... Defamation-for-sale blogger
- Sam Faulkner Biddleâ... Defamation-for-sale blogger, Runs a large part of the Anti-GOP blog programs
- Sam Woolleyâ... Defamation-for-sale blogger
- Samar Kalafâ... Defamation-for-sale blogger
- Sarah Rameyâ... Defamation-for-sale blogger

- Wes Siler... Defamation-for-sale blogger
- William Haisley... Defamation-for-sale blogger
- William Turton... Defamation-for-sale blogger

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
- Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
- Facebook/Meta - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)
- Google, Inc. ... Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and more...) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
- In-Q-Tel, Inc. ... CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran ... hit-jobs... on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
- Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
- LinkedIn - Election manipulation networking site
- Solyndra Solar Company ... FBI-raided corrupt Clean Tech company
- SpaceX ... Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits
- Tesla Motors ... Car Company that conduits money to campaigns

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICIJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.

AAAAA THE KEY POINTS IN THESE INVESTIGATIONS:

INVESTIGATION CASE SUMMARIES FOR FBI, FTC AND CONGRESS

PROOF THAT THE GOOGLE CARTEL IS A CRIMINAL POLITICAL MONOPOLY

PROOF THAT THE PALO ALTO MAFIA RIGS POLITICS AND CONTROLS K STREET

PROOF THAT THE ENERGY DEPT RUNS AN ILLICIT CRONY SLUSH FUND

PROOF THAT THE PUBLIC CAN FIGHT AND WIN AGAINST CORRUPTION

PROOF THAT NEWS OUTLETS MANIPULATE THE NEWS AND PROPAGANDIZE

PROOF OF SILICON VALLEY SURVEILLANCE CAPITALISM THAT ABUSES THE PUBLIC

PROOF THAT SILICON VALLEY IS RUN BY SOCIOPATH FRAT BOY DEGENERATES

PROOF OF THE RARE EARTH MINING PAYOLA, CHILD LABOR, BRIBES AND KICK BACKS

PROOF THAT MUSK AND UNSAFE TESLA CARS ARE FRAUDS AND STOCK SCAMS

PROOF OF A PALO ALTO MAFIA DEEP STATE CONSPIRACY AGAINST DEMOCRACY

PROOF OF STATE SPONSORED DEFAMATION ATTACKS AND ASSASSINATIONS

HOW WE DID IT

How did we fight back against the most powerful organized crime entity on Earth?

We get that question all the time. Here is the answer.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

We opened our own private investigator and crowd-sourced investigations into the following:

- Every stock market account they or their family owns

- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
 - Every flight manifest they appeared on
 - Every bank account they have ever held
 - Every lawsuit, divorce record and police record they have ever appeared in
 - Every trust fund they or their family holds
 - Every shell corporation they, or their family holds
 - Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
 - Every item in the Swiss Leaks that cross connects to their holdings
 - Every item in the Panama Papers Leaks that cross connects to their holdings
 - Every item in the WikiLeaks that cross connects to their holdings
 - Every item in the Snowden Leaks that cross connects to their holdings
 - Every sex trafficking incident that connects to each of them alone, and in groups
 - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
 - Every item in the Quest Leaks that cross connects to their holdings
 - Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
 - Every sex service that their credit card payments ever connect too
 - Every real estate transaction that any name or company they, or their family, were involved in, tracks to
- and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the American public policy system.

It all goes into publicly shared, open-source, 100% legal, public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

We have demanded their arrests, indictments, exposures and bankruptcies.

Rev 2.3

THESE ARE PRESS CLIPPINGS AND HARD EVIDENCE FACTS ABOUT THIS CASE FOR FEDERAL AGENCIES (INCLUDING FBI, SSA, DOJ, SEC, FTC, GAO, ETC.) CURRENTLY REVIEWING THIS CASE UNDER FILED DEMANDS AND CHARGES.

THE MAIN FACTS ABOUT THIS POLITICAL CORRUPTION CRIME:

- Famous political figures use the trillions of dollars in government treasuries and the stock market for illicit profiteering by rigging the system exclusively for themselves and their crony insiders.
- They attacked us using government taxpayer funded media (Fusion GPS, Black Cube, Google, Pysops, Gizmodo, Media Matters, Blumenthal, etc.) and spy agency tools because we competed with their businesses and reported their crimes.
- San Francisco Bay Area government has as many corrupt politicians as Chicago and relies on the same RICO-violating insider corruption network to operate; as proven by deep AI searches of their financial records. Arrests of those officials is now underway.
- Silicon Valley law enforcement records prove that these tech oligarchs engage in an organized, racketeering-based, massive sex trafficking, tax evasion, anti-trust violating, spousal abuse, money laundering, black-listing, racist, ageist, political bribery, crony racketeering crime Cartel.
- Famous U.S. Senators, Governors and their staff knowingly engage in, finance, operate and benefit from these crimes in exchange for search engine manipulation and stock market assets.
- Silicon Valley and Hollywood media companies censor and cover-up news coverage of these crimes because they have a financial connection to the perpetrators.
- Most of the government officials working on our case were hand-picked by our business adversaries. Our case has never been fairly reviewed by non-biased, non-conflicted officials. Our FBI-class associates have not found a single entity in our case reviews, or determinations, who was not either: financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital services to.

WE SAW THESE CRIMES IN-PERSON!!!

WE SAW CRIMES AND COVER-UPS UNDERTAKEN BY U.S. SENIOR POLITICIANS AND THE EXECUTIVES AT:

- THE U.S. DEPARTMENT OF ENERGY
- THE WHITE HOUSE
- THE SOCIAL SECURITY ADMINISTRATION
- THE CALIFORNIA ATTORNEY GENERALS OFFICE
- THE CALIFORNIA GOVERNORS OFFICE

HELP US GET JUSTICE FOR OURSELVES, AND EVERY AMERICAN. DEMAND A SPECIAL PROSECUTOR!

WE TRACKED THE FINANCIAL AND ASSET RECORDS OF EVERY CROOK ON THE LIST BELOW AND WE FOUND EXACTLY WHAT YOU WOULD EXPECT!

The only people that have engaged in disputes or nay-says of these facts are the criminals, or friends of the criminals, doing these crimes. We have tracked every public official who refuses to help us back to their financial connections to these mobsters!

BE A PART OF THE SOLUTION. JOIN MILLIONS OF CITIZENS ON CROWD-SOURCED SITES AROUND THE GLOBE.

We have already made new laws, changed bad old laws, sued bad guys, gotten corrupt politicians fired... and we are only just getting started.

If the IG's, DOJ officers, SEC investigators and State AG's that are supposed to help us won't do their jobs, we will do it for them! History has proven that political cover-ups ALWAYS take-down the political operatives who run those cover-ups!

THE CHARGES AGAINST THE CROOKS LISTED IN RED TEXT, BELOW:

- - That these FBI-filed facts are not '[Conspiracy Theories](#)' but daily occurrences in politics as proven by every major news outlet in the world, federal court records, FBI records and Congressional investigation reports.
- - That we are federal whistle-blowers and business competitors of public officials who operated illegal and Constitutional-rights-violating reprisal hit-jobs and [attacks](#) against us using taxpayer financed resources.
- - That State and Federal agencies owe us money, and other consideration, to pay for our: 1.) [Damages](#), 2.) losses, 3.) benefits blockades, 4.) witness fees, 5.) whistle-blower fees, 6.) informant fees, 7.) punitive compensation, 8.) legal costs and other items caused by criminal corruption, reprisal

attacks and illicit quid-pro-quo operations within their government offices by their government employees, contractors and covert financiers.

- - That a Smedley Butler-style '[Business Plot](#)' crime program exists between Silicon Valley [Tech Oligarch](#) billionaires, investment banks, U.S. Senators, government agency staff and White House staff to engage in these crimes.
- - That public officials knowingly participate in these crimes by failing to report their associates who engage in these illicit actions and by hiring Google, Fusion-GPS and Black Cube-type suppliers who operate these illicit activities in revolving door schemes.
- - That the suspects [manipulate](#) government funds for their personal profiteering at the expense of domestic citizen taxpayers like us and acquire what the U.S. Treasury calls: "unjust gain".
- - That the suspects operate a vast stock market [manipulation](#) program, as a core function of their operations, and exchange most of their bribes via the stock market and those illicit deeds function at the expense of the public.
- - That the suspects contract a known group of lobbyists, corrupt law firms, unethical CPA's, corrupt investment banks and specialized [corruption](#) services providers to attack, defame, physically harm, character assassinate (Using their Google, Youtube, Gizmodo, Fusion GPS, Black Cube, UC Global, Media Matters, et al, "kill" services), black-list and harm those they dislike and that they harmed us with those actions.
- - That the suspects operate an Epstein-like sex-trafficking [network](#) network of prostitutes and sexual extortion activities and locations for the engagement of said activities and for the bribery of cohorts via sex workers.
- - That the suspects engage in electronic attacks (<https://www.privacytools.io>) and manipulations including hacking, election manipulation, media censorship and internet search results manipulation in order to mask their schemes.
- - That we have yet to find a single Palo Alto Sandhill Road VC in this group who is not involved in bribery, racism, [sexism](#), tax evasion, [sex](#) trafficking, black-listing, securities law violations, [violent abuse](#), off-shore money-laundering, FEC violations, search engine manipulation, massive anti-trust violations, patent theft and other crimes!
- - That the suspects engage in 'Lois Lerner' [IRS](#)-like, SPYGATE-like, VA whistleblower-like reprisal and retribution attacks by manipulating resources within government agencies like SSA, DOJ, FBI, LSC, HUD, HHS, DOE, Etc.

JOIN THE WAR ON POLITICAL CORRUPTION

*These are the **FACTS** behind our case filings to the U.S. Government and the citizens of the nation!*

Federal agency bosses took bribes! We have the proof! They attacked us when we reported the crimes. We have the proof!

Join billions of consumers with new forensic technologies. Be part of the global exposure of dirty payola schemes and the shaming of the tech oligarch crooks who use our Democracy as their plaything. See what happens to those who attack us using our own taxpayer resources: [THE ATTACKS **](#) - [Why We Are Hunting Down And Prosecuting Each Attacker](#)**

We are the largest collective of citizen sleuths and former federal investigation officers in the world.

There is no corrupt person or entity we can't take down using 100% legal FBI-class forensics!

****** Our goals:**

- 1.) To put the corrupt people and companies, on the list below, out of business, using fully legal forensic tactics and media shame. Those who were supposed to arrest them have been bribed and influenced to delay justice. Those delays will no longer be tolerated.
- 2.) To educate every voter in the world about how to operate forensic investigations, as sophisticated as the FBI or the CIA do, from the comfort of their home.
- 3.) To eradicate fake news shill entities and make all news open-source public information gathered by the public. The "deflect, delay & disinform" tactics of the tech oligarchs will be exposed and illuminated at every turn.
- We are well on the way to accomplishing every one of these goals thanks to crowd-sourced forensics and peer-to-peer communities!

Crooks: "...We don't need to have very much money to take you out. What we do have are a very particular set of skills. Skills we have acquired over a very long career. Skills that make us a nightmare for people like you...."

A Statement from one of the victims: "WE DEMAND A FAIR JURY TRIAL WITH ADEQUATE LEGAL REPRESENTATION! OUR CONSTITUTIONAL AND CIVIL RIGHTS ARE BEING BLOCKED BY CORRUPT POLITICIANS WHO KNOW WHAT WILL BE EXPOSED ABOUT THEM IN COURT!!! WE DEMAND LSC LEGAL FEE COVERAGE FOR A FAIR JURY TRIAL AND A FAIR CONGRESSIONAL PUBLIC DISCLOSURE HEARING!"

PROOF OF THE ASSERTIONS - CASE FILE EVIDENCE HIGHLIGHTS:

[HARD EVIDENCE - THE PROOF](#)

DO NOT VOTE FOR ANY POLITICIAN THAT HAS STOCK MARKET KICK-BACK OWNERSHIPS!

These are our criminal charges filed with the FBI, DOJ, SEC, FTC, SSA, Congress and their Inspector General's

Who Are We?

We are the victims of these crimes, the witnesses that saw these crimes and every independent journalist, investigator, public citizen sleuth and forensic expert we could find in every nation on Earth that wants to end corruption. We are the people that will never let up until we get justice. We are the people that are terminating (using 100% legal tactics) every oligarch and politician that engaged in these crimes and the cover-ups. Educate yourself in forensic science and investigative research and be one of us too.

WHY THIS SITE?

Parking is a nightmare at the Washington DC, San Francisco and LA **FBI** offices. We have been there enough to know how busy they are. To make it easier on everyone, we simply gave the FBI around-the-clock access to this site. These are our minute-by-minute reports to the FBI and members of the U.S. Congress. Every FBI office in the world can read this WIKI at will. This kind of reporting WIKI also helps inform the public and provide cross-alliance transparency.

THE TARGETS:

THESE ARE THE CROOKS UNDER DEEP SURVEILLANCE BY THE PUBLIC AND TARGETED FOR 100% LEGAL TERMINATION AND EXPOSURE. FEDERAL AGENCIES AND CITIZEN SLEUTHS ARE ASKED TO FULLY PROSECUTE THEM!

Join the "FOLLOW-THE-MONEY" Team and learn 100% legal CIA and FBI-class tactics and technologies which are being used to track why these people are all connected by covert financial and asset tracks. Extensive case files and dossiers on each party, below, are available in torrents globally. These people knowingly engaged in these crimes, attacks and illicit activities! ** = The worst ones. They share a cadre of dirty CPA, legal and lobbyist firms that assist them with their dirty work and run the interface between Fusion GPS, Black Cube, Media Matters, Gizmodo and other hit-job services.

Follow-the-money, the surveillance data, the stock market accounts, the sex workers and the emails!

This is who financed and operated the attacks. They operate illicit manipulations and anti-trust violations.

These are the ones that everyone is working on exposing, indicting and TAKING DOWN:

- A.J. Delaurio â... Defamation-for-sale blogger **
- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)

THE MASSIVE CORRUPTION & BRIBERY TODAY:

California & DC politicians are being paid bribes with Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Rare-Earth mining rights; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Gallery art; Private jet rides and the use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists. DEMAND COMPLETE LAWS TO MAKE ANY BENEFITS TO POLITICIANS TOTALLY ILLEGAL!

Our Promise:

We guarantee that these deeds done in the dark will come to light and that these perpetrators will be fully exposed, shamed and prosecuted.

In the TV series: "Surviving R. Kelly" you can clearly see how a certain low I.Q. percentage of the population will defend an R. Kelly, an Elon Musk and a Harvey Weinstein even though they obviously and overtly engage in heinous crimes.

The Jeffrey Epstein's, the John Doerr's, the Andy Rubin's, the Steve Jurvetson's, the Eric Schmidt's, the Larry Page's, etc. think they are untouchable because they buy protection and pay bribes.

That will always be their downfall!

ATTACKS AND CENSORSHIP BY GOOGLE-ALPHABET-YOUTUBE

We have placed more software sensors on more server networks globally than anyone else has ever announced. When Google-Alphabet-YouTube Shadow Bans, DNS re-routes, Hides, Demonetizes, Search Manipulates, Server Table Edits, Censors, Election Rigs, SEO limits, etc; our links, we record it, document it technically and report it to every regulatory and publishing group in the world. We also compile the data into evidence for lawsuits against Google and each Google executive. Our insiders work at the deepest levels of their operation. It isn't nice to mess with Mother Nature or Freedom Of Speech. It's worse to run tax evasion, sex trafficking, dark money funds, real estate fraud and other crimes from inside Google!

Our autonomous monitoring applications are on a vast number of co-location servers, shared hosting ISP's, stand-alone servers and sites around the world and have been operating for over ten years. We log: 1.) Google's search results compared to other search engines, 2.) Google's DNS and spoofing activities, 3.) Google's results on 100 key search terms including search terms of assets, candidates and business associates connected to Google (ie: "Obama", "Elon Musk", "Election Results", etc.), 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated "mole" data that was injected as user data ultimately ended up later, 6.) Google's election manipulation attempts, and other metrics. The results prove that Google abuses the market, the public, privacy rights, politics and human rights.

So Google, everytime you do it, you are just digging your own grave and giving us all the proof we need to wipe you out, process anti-trust filings and expose your monopolist, sex trafficking, sociopath owners!

WHO IS THE SILICON VALLEY MAFIA?

"...The Silicon Valley Mafia is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners (Greylock Capital; Kleiner Perkins Caufield & Byers, Draper, Khosla Ventures, etc.) and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) they control. They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control. The names of the worst-200 most horrific and sociopath-like members are listed in these reports. They hire dirty law firms like MoFo, Wilson Sonsini, Covington, Perkins, etc. and dirty lobbyists like McBee, Podesta, Blumenthal, etc. to do their dirty deeds.

They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against

competitors, reporters and outsiders. They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, Jeffrey Epstein-like executive prostitute sex-trafficking clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who bribe politicians to halt investigations and interdiction efforts.

They have quid-pro-quo stock market bribe deals with Senators Reid, Feinstein, Harris, Boxer, Spier, etc. For example, in the CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds, in order to profit at the expense of taxpayers.

They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis abusers, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. The divorce court and lawsuit federal court records on them prove that they are sex-abusing sociopaths.

They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

Google's Larry Page, his boyfriend Elon Musk; Google's Eric Schmidt, Dave Rubin, David Drummond, Kent Walker, Jared Cohen and Sergy Brin; Political manipulators David Plouffe, Steve Westly, Steve Spinner and Vinod Khosla; Sociopath billionaires Reid Hoffman, Jeff Epstein, Tim Draper, Steve Jurvetson, etc. all order their staff and associates to: bribe politicians; operate sex trafficking for them; manipulate stock market valuations; launder money; run off-shore tax evasion schemes; black-list employees and competitors; hide, down-rank, DNS dead-hole, shadow-ban, censor and server obfuscate enemies on the entire web; rig the U.S. Patent Office; help them cheat on their wives; and engage in massive volumes of insider, illicit, RICO and anti-trust violating crimes while bribing public officials to avoid prosecution.

We demand that the FBI arrest them!"

- Tom Martin

To: John, Adrian, Nicholas, John2, Gabby, and the rest of the contracted assassins: *We hired the greatest intelligence and law enforcement, investigative experts in the world to track you down and place you under a lifetime of surveillance. Every illegal drug and sex worker you buy is reported. Every tax evasion and money laundering scheme you engage in is reported. Everything you will ever do will be monitored and reported to the authorities. Every contact you have with a political operative, anywhere, is monitored. You accepted compensation to try to kill us, slander us, libel us and defame us. You chose your fate when you accepted the "kill orders". Never, ever, go to sleep at night thinking you will ever get away with it. Our contractors will always be watching you, forever!*

WHO WE ARE

We are the victims of these crimes, the witnesses that saw these crimes and every independent journalist, investigator, public citizen sleuth and forensic expert we could find in every nation on Earth that wants to end corruption. We are the people that will never let up until we get justice. We are the people that are terminating (using 100% legal tactics) every oligarch and politician that engaged in these crimes and the cover-ups. This site is anonymously collaborative-edited online like Wikipedia. Educate yourself in forensic science and investigative research and be one of us too. We are you!

THE STANFORD CYCLE OF CORRUPTION

"Elite arrogant asshole dynasties send their kids to Stanford University.

Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies.

When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies and insiders in a tribal old boys club manner.

They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors.

Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption.

They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again...."

HOW OUR CROWD-SOURCED PUBLIC MEMBERS AND FEDERAL COPS TAKE DOWN THESE CROOKS:

How did we fight back against the most powerful organized crime entity on Earth? Is it possible for anybody to fight the "Illuminati" and keep knocking them off their thrones like we do?

We get those questions all the time. Here are the answers.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

We built an NSA-class global open-source database that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes!

We opened our own private investigator and crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds
- Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
- Every item in the Swiss Leaks that cross connects to their holdings
- Every item in the Panama Papers Leaks that cross connects to their holdings
- Every item in the WikiLeaks that cross connects to their holdings
- Every item in the Snowden Leaks that cross connects to their holdings
- Every sex trafficking incident that connects to each of them alone, and in groups
- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, UC Global, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube,

Alphabet, David Drummond, Larry Page, Facebook, Correct The Recor, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.

- Every item in the Quest Leaks that cross connects to their holdings

- Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>

- Every sex service that their credit card payments every connect too

- Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

We have demanded their arrests, indictments, exposures and bankruptcies. We say "Fuck You" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed. You say you are going to "kill us and destroy our lives.." and that you are so frightening. You think you are a big scary thing? Here comes 'scary'! Watch what billions of taxpaying voters with collaborative FBI-class forensics investigation software is doing to you now!

What To Do To Write Up The Dossier On Each Person And Each Corrupt Politician:

1. 1. Dig through their trash and buy their trash bags from the garbage man after they pick them up
2. 2. Locate a beneficiary for a probate proceeding
3. 3. Research current and / or historical property holdings
4. 4. Identify mortgage information
5. 5. Identify secured lenders
6. 6. Identify related party property transactions
7. 7. Determine current market value of real property
8. 8. Locate bankruptcy filings
9. 9. Retrieve and analyze bankruptcy records
10. 10. Uncover improper relationships
11. 11. Locate federal civil lawsuits
12. 12. Locate federal criminal records
13. 13. Retrieve and analyze federal civil and criminal records
14. 14. Retrieve mug shots from arrest records
15. 15. Provide independent analysis
16. 16. Locate state and local criminal arrest records

17. Retrieve and analyze review criminal records
18. Provide peace of mind
19. Locate home phone numbers
20. Locate cell phone numbers
21. Identify owner of home or cell phone number
22. Determine owners of corporation
23. Retrieve and analyze corporate records
24. Locate current or former executives
25. Interview current or former executives
26. Find and retrieve judgment and lien filings
27. Research familial history
28. Connect the dots
29. Locate witnesses for a civil or criminal lawsuit
30. Interview witnesses for a civil or criminal lawsuit
31. Find assets
32. Find current or historical boat registrations
33. Find current or historical aircraft registrations
34. Search for hidden assets
35. Conduct business intelligence
36. Discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you the big picture
43. Identify a will for an estate
44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistleblowers
54. Vet expert witnesses
55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. Make you look brilliant
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors

69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Give you a competitive advantage
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes
97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes
100. Write every federal agency and demand investigation and prosecution of the perps
101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
105. Go to their share-holder meetings and hand-out flyers about their corruption

ALL OF THESE CASES ARE CONNECTED. HERE IS HOW

They are connected to the same exact corrupt politicians, the same exact crony insider deals, the same exact beneficiaries, the same exact stock market accounts cluster, the same attendees at the same social events, the same political campaign financiers and the same exact PAC backing members.

This group EXCEEDS the qualifications for a DOJ RICO action by many, many qualification metrics!

AMERICAâ... S CROOKED, BRIBED, JUDGES ARE IN EVERY COURT IN THE NATION

[Supreme Court](#) Justice [Ketanji Brown Jackson](#)'s transparency gaps were brought up during a hearing on high court ethics reform by Sen. [John Kennedy](#) (R-LA), who asked why the Democrats didn't levy the same scrutiny against her as they did with Justice Clarence Thomas.

Kennedy's questions came during a Senate Judiciary Committee hearing on ethics after reports revealed Thomas failed to disclose paid trips he went on with wealthy GOP donor Harlan Crow. Democrats have called on Congress to impose ethics rules, while Republicans large

(Alex Brandon/AP)

"Justice Jackson made multiple amendments three days after President Biden nominated her. Not one senator brought that up during her confirmation hearings. Not one of my colleagues here walked into

her hearings with the buckets of mud that they've thrown against Justice Thomas. Not one," Kennedy said.

In September, Jackson disclosed that she had â... inadvertently omittedâ... information about self-employed consulting income that her spouse received from consulting on medical malpractice cases. Her revisions also revealed new information about reimbursements for travel and board memberships stemming back to at least 2014, [according](#) to *Bloomberg*.

Senator John Kennedy perfectly sums up Democrat attacks on the legitimacy of the Supreme Court:

"My democratic colleagues should fill out a hurt feelings report and move on, for the sake of the Constitution!" pic.twitter.com/daavj5BrkP

â... Townhall.com (@townhallcom) [May 2, 2023](#)

Kennedy then blasted the news reports surrounding Thomas, saying that "some Democrats and their media allies" have "attempted hit pieces" on the longest-serving sitting justice and his Republican-appointed colleagues.

The Louisiana senator was referring to at least two separate reports from *ProPublica* that highlighted Thomas's [failure](#) to disclose travel gifts from Crow and one Georgia property [transaction](#) the donor had with the justice, though Thomas recently said he didn't report the sale because he didn't make a profit. Last week, *Politico* reported Justice Neil Gorsuch was the joint owner of a [Colorado property](#) he sold to a major law firm CEO.

"This is untenable," committee Chairman Dick Durbin (D-IL) said Tuesday. "Ethics cannot simply be left to the discretion of the nation's highest court. The court should have a code of conduct with clear and enforceable rules."

Durbin had called on Chief Justice John Roberts to testify for the hearing but had his request [denied](#) last week. Roberts issued a letter signed by all the justices that included "a Statement of Ethics Principles and Practices to which all of the current Members of the Supreme Court subscribe."

The high court has repeatedly maintained it consults a code of conduct followed by lower court federal judges. The main difference is that the already advisory code for lower court judges is hardly enforceable for the high court, given the limited number of nine justices, legal experts have said.

Earlier in the hearing, ranking member Sen. Lindsey Graham (R-SC) called the recent reports on the justices a "concentrated effort by the Left to delegitimize the court and to cherry-pick examples to make a point."

HOW TO WIN AN EPIC ANTI-CORRUPTION BATTLE ON BEHALF OF AMERICAN CITIZENS

A group of domestic citizens filed FBI complaints and lawsuits against White House and government agency senior staff and their Silicon Valley oligarch financiers including a lawsuit against a rogue, dirty tricks, off-shoot of the CIA called "In-Q-Tel".

These citizens instigated Congressional corruption investigations and hearings against the most senior members of the State and Federal government. These actions resulted in the termination of very famous public officials including the Secretary of Energy, his staff, White House Executives and more. The case broke-up some of their crony criminal embezzlement scams. It nearly resulted in the President being forced to leave office, mid-term, based on revelations of a massive crony stock market kick-back scheme which began to be exposed after the FBI raid of Solyndra. The director of the FBI was fired for assisting in cover-ups related to this matter because the matter was reported directly to him.

This natural-born, American, domestic group of engineers was attacked with a \$30 million dollar+ (per uncovered billing notices) retribution/political reprisal program contracted by White House political operatives, and their appointees, who were also the business competitors of the engineers.

The attackers used Fusion GPS-type character assassination smear campaigns (operated by their cronies at Google, Gawker, Gizmodo, Jalopnik and Facebook), NVCA black-listing, Solyndra-laundering, stone-walling, Lois Lerner-class agency manipulation and search engine rigging. In-Q-Tel turns out to be the only federally financed "charity" whose staff are also employed by each of the suspects in this case and who financed the suspects in this case. It was revealed that White House executives ordered government agencies to harm members of the public and to reprisal with-hold public resources from the public. This was a violation of tort, RICO and anti-trust laws.

The citizens had previously been awarded federal commendations, state and federal innovation grants,

government R&D contracts and knew White House and Congressional executives personally. They know "where the bodies are buried".

The citizen-victims fought back.

With the encouragement of members of Congress they used 100% legal tools to interdict the corruption.

Essentially; they helped the United States government sue itself!

First, with a unique new kind of pioneering federal lawsuit, victims established â... FOR THE FIRST TIME IN LEGAL HISTORY â... that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case One, (D.D.C. 2015).

Second, they prevailed in the United States Court of Appeals for the District of Columbia Circuit on their appeal of the district court's ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that the government, under court order is now re-doing the victims applications and GAO, FBI, IG's and Congressional oversight offices are watching to assure effective ethics and transparency.

Third, these cases placed, on permanent public record, one of the most detailed documentation sets, ever assembled, about how modern political "Dark Money" conduits operate. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank accounts, revolving door bribes, insider stock trades and other payola between the victim's competitors and public officials. This documentation now prevents the use of those kinds of criminal efforts, in the future, by exposing their tactics to the public.

Fourth, the victim's team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers. This included some of the most well-known names in Washington, DC, at the time. Many of them were, and are still being, investigated and surveilled by the FBI, GAO, SEC and Congress.

Fifth, and most important, the effort put every corrupt political scheme on notice that they WILL be found out and interdicted!

The bottom line?

The victims group WON on every single aspect of their public-interest goals but still have yet to be recompensed for their damages! They continue to fight for their Constitutional rights and the payment of their damages and benefits from the government.

They have won over and over while the opposition keeps getting fired, arrested, investigated and exposed in national news documentaries!

Now the "bad guys" have less options to engage in the corruption of our Democracy!

You're Welcome, America!

These co-workers witnessed politicians and Silicon Valley oligarchs (sometimes called "The Deep State") stealing money from both: 1.) Their company and 2.) the US Government Treasury and handing it to Elon Musk and their other insider friends. They reported it to the authorities.

The crime turned out to be part of one of the biggest embezzlement crimes ever exposed. Major political

figures and tech "bosses" turned out to be running a "PayPal Tech Mafia". The bad guys then began hunting them down and attacking them in reprisal "for the rest of our lives" per their threats and their ongoing retribution vendettas.

It was found that famous senators, their Silicon Valley oligarch financiers and their associates run an organized crime insider trading scam that abuses taxpayers and sabotages competing businesses. The terminations of the heads of the FBI, The Department of Energy and other famous people in politics is because of their operation, and cover-ups, of this case. The cover-ups are still going on. The Weinstein, Epstein and related cases show, though, that cover-ups never last.

Now, over 300 million potential voters can "crowd-source" join the forensic efforts to expose, shame, dox, bankrupt, boycott and 100% legally exterminate the corrupt entities who did these illicit things by using our Democracy as their billionaire's plaything.

Hundreds of the perpetrators have already been fired, placed under permanent public surveillance, financially tracked through every asset, reported to federal agencies and targeted for investigation. The goal is to interdict every single person, company and political operative group who is engaging in these crimes using crowd-sourced investigation and intelligence tools.

This is a large part of all of that "political corruption" and "dirty Dark Money" politics you read about in the newspaper every day.

If you thought that Mossack Fonseca and the Panama Papers was "The Story": IT WAS ONLY THE BEGINNING!

A key part of one of the testimony statements reads: *"...SILICON VALLEY'S POLITICIANS MAKE POLICY THAT, BOTH, RUINS TAXPAYERS WHILE MAKING THE POLITICIANS RICH BY ARTIFICIALLY INFLATING THE VALUE OF THE POLITICIANS SECRET STOCK MARKET HOLDINGS. NOW WE ARE EXPOSING THEIR ENTIRE SCAM!"*

THIS IS ABOUT THE U.S. SENATORS AND THEIR CRONY DARK MONEY POLITICAL BRIBES AND CRIMINAL KICK-BACKS, THE TECH OLIGARCHS WHO DEPLOYED THE BRIBES AND THE VICTIMS OF THESE CRIMES.

IMAGINE LIVING IN A WORLD WHERE ALMOST EVERY ONE OF THE PUBLIC OFFICIALS THAT WERE SUPPOSED TO HELP YOU TURNED OUT TO BE YOUR BUSINESS COMPETITORS. IMAGINE HAVING THEM USE GOVERNMENT RESOURCES TO PROFIT AT YOUR EXPENSE, BLOCKADE YOU AND TREAT DEMOCRACY LIKE A GARAGE SALE! THIS IS THAT STORY!..."

Google, Tesla, Facebook, Linkedin and their VC's (and deeply bribed Senators) operated hit-jobs on the public and their competitors, supported by the Obama White House and U.S. Dept. of Energy.

This is about a group of tech oligarchs, and their corrupt Senators, who commit crimes in order to manipulate over a trillion tax dollars (YOUR MONEY) into their, and their friends pockets.

They are felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to solve the problem.

Some of the largest bribes in American history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon

Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

U.S. Senators, Agency Heads and Congress were bribed with:

- Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC
- Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging including shadow-banning, de-boosting, DNS re-routing, directed search suggestion, subliminal messaging bias, and hundreds of other psychological manipulation tricks; the value of which is never reported to the FEC but proven by invoices and bank payments between Google and Gawker, Gizmodo, DNC, Fusion GPS, Black Cube, etc.
- Free rent
- Prostitutes and Rent Boys
- Cars
- Dinners
- Party Financing
- Sports Event Tickets
- Campaign Services "Donations"
- Secret PAC Financing
- Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes, Themselves
- "Consulting" contracts from McKinsey as fronted pay-off gigs
- Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors
- Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff)
- Real Estate
- The use of Cayman, Boca Des Tores, Swiss and related laundering accounts
- The use of HSBC, Wells Fargo and Deutsche Bank money laundering accounts
- Free spam and bulk mailing services owned by corporations
- Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials

Investigators were able to get a law produced that made insider trading less attractive for Congress, nothing has been done to stop stock warrant bribes and revolving door payola. Additionally, even with the new law, 60% of the U.S. Congress (including their associates and families) STILL engage in insider trading because

law enforcement has not prosecuted many of them.

This is about a group of U.S. Senators, Silicon Valley Oligarchs, Crooked Law Firms and Lobbyists who commit crimes in order to manipulate over a trillion tax dollars into their, and their friends pockets. They use media monopoly tricks to try to shut out any other viewpoints. They push pretend issues that they believe will get more tax money allocated to "issue solutions" that they, and their friends, happen to already own the monopolies for. They are felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street lobby firms and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to arrest them.

Congress: Trading stock By Steve Kroft,
<https://www.cbsnews.com/news/congress-trading-stock-on-inside-information/>

Said one victim: *"They had the U.S. Government hire us, paid us part of our money, then asked us to spend our life savings and years of our time on their federal project based on their lies and false-promises. Then they took the assets we were asked to invest, plus the money they owed us, and gave it to their friends. When we complained to the FBI, Congress and the SEC, they hired Fusion GPS-like companies to run "hit-jobs" on us and threaten our lives. WE WERE LIED TO AND DEFRAUDED BY GOVERNMENT AGENCIES. THEY TOOK OUR MONEY AND USED US, AND OUR PEERS, AS A SMOKE-SCREEN TO HIDE THEIR CRONY PAYOLA CRIME THAT PUT TAXPAYER CASH IN THEIR FRIEND'S POCKETS...We have received ZERO justice and ZERO compensation for our damages!"*

There are no "conspiracy theories" here. These are all hard forensic facts that will stand-up in any court!

"...They did this to anybody who they thought might expose the White House use of agencies as "slush-funds" and "Dark Money" campaign finance laundering conduits. They were afraid that exposure of these schemes would cause the President of the United States to be forced to resign in the middle of his term!..."

Years of archived news videos provide evidence, by thousands of reporters and investigators, that the suspects are: A.) Based around Silicon Valley and Washington DC; B.) Operating as a RICO-violating cartel; C.) Deeply sociopath and sexually disturbed; D.) Money laundering via large law firms and investment banks; E.) Using Google, Reddit, Facebook, etc. as mass political behavior-manipulation programs; F.) Paying for and operating character assassination programs against those who defy them; G.) Using "green energy" as one of their facades to steer tax dollars to the companies that they, and their friends, already own and work for; H.) Willing to resort to the most extreme things to protect their scheme; I.) Living in an ideological "echo-chamber" in their tech bubbles; J.) Empowered entirely by the public's lack of willingness to boycott them and demand their arrests.

A vast number of individuals and companies, who are willing to testify about these crimes have NEVER

BEEN ALLOWED into a Congressional hearing, court-room, FBI 302 interview reports, etc., because crooked Senators are terrified of the confirming testimony they can all provide.

Investigators placed autonomous monitoring applications on a vast number of co-location servers, shared hosting ISPs, stand-alone servers and sites around the world over ten years ago and monitored: 1.) Google search results compared to other search engines, 2.) Google DNS and spoofing activities, 3.) Google results on 100 key search terms including search terms of assets, candidates and business associates connected to Google, 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated mole data that was injected as user data ultimately ended up later, and other metrics. The results prove that Google abuses the market, the public, politics and human rights.

Said another witness: *"...ELON MUSK BOYFRIENDS: LARRY PAGE, ERIC SCHMIDT, JARED COHEN AND SERGY BRIN AT GOOGLE AND MARK ZUCKERBERG AT FACEBOOK ORDER THEIR COMPANY STAFF TO HIDE, DOWN-RANK, HOLE-PUNCH THE NET, SHADOW-BAN, STOCK MARKET VALUATION MANIPULATE AND EXCLUDE THIS WEBSITE ON THE INTERNET. WE TRACK EVERY TECHNICAL TRICK THEY USE AND REPORT IT TO CONGRESS AND ANTI-TRUST AGENCIES. THE MORE THEY DO IT, THE MORE THEY CREATE EVIDENCE THAT WILL PUT THEM OUT OF BUSINESS!..."*

The Google empire controls most of the media on Earth, via many front corporations, and indoctrinates everyone in it's organization using 'cult' methodologies. Google owner's believe in "our-ideology-at-any-cost" and "the-ends-justify-the-means" scenarios. What could possibly go wrong?

Regarding The CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds.

Many of those character assassinated, sabotaged, black-listed, poisoned and shadow-banned are still waiting for justice!

The Silicon Valley Mafia is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, Linkedin, etc.) they control. They are sometimes referred to as The Deep State. They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control.

They hire rogue ex-intelligence agents to operate attacks via Fusion GPS, The Gawker/Gizmodo/Jalopnik/Univision Hatchet-Job Fake Tabloid Facade (ie: Obama had White House staff: Robert Gibbs and John Podesta hire them, in association with Obama financier Elon Musk, to attack XP Vehicles, Bright Automotive and ZAP Vehicles as retribution in violation of anti-trust laws), Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. . They spend over \$30M on each massive media attack program against competitors, reporters and outsiders.

They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, executive prostitute clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians to halt investigations and interdiction efforts. They are widely covered in news media articles as: sex abusers, cult enthusiasts, elitists, rapists, woman beaters, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations.

The divorce and sex abuse court filings against the #PaloAltoMafia men of Silicon Valley are some of the most disturbing and sexually twisted court records you will ever read and they demonstrate a clear and

decades-long pattern of collusion and depravity. From Google's "Sex Slaves" to "Sex Penthouses" to "Deaths by Prostitute"; the list is endless.

They are not limited to California and also operate out of New York and Washington DC. They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse public privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

Silicon Valley's Corrupt Palo Alto Mafia Network "Scaled Monopolies"

Dr. ROBERT EPSTEIN describes how Defendant and political financier Google (In-Q-Tel's business partner) rigs elections to try to maintain Google's monopoly.

Authorities in the UK have finally figured out that fake news stories and Russian-placed ads are not the real problem. The UK Parliament is about to impose stiff penalties... not on the people who place the ads or write the stories, but on the Big Tech platforms that determine which ads and stories people actually see.

Parliament... s plans will almost surely be energized by the latest leak of damning material from inside Google... s fortress of secrecy: The Wall Street Journal recently reported on emails exchanged among Google employees in January 2017 in which they strategized about how to alter Google search results and other ephemeral experiences... to counter President Donald Trump... s newly imposed travel ban. The company claims that none of these plans was ever implemented, but who knows?

While U.S. authorities have merely held hearings, EU authorities have taken dramatic steps in recent years to limit the powers of Big Tech, most recently with a comprehensive law that protects user privacy... the General Data Protection Regulation... and a whopping \$5.1 billion fine against Google for monopolistic practices in the mobile device market. Last year, the European Union also levied a \$2.7 billion fine against Google for filtering and ordering search results in a way that favored their own products and services. That filtering and ordering, it turns out, is of crucial importance.

As years of research I... ve been conducting on online influence has shown, content per se is not the real threat these days; what really matters is (a) which content is selected for users to see, and (b) the way that content is ordered in search results, search suggestions, news feeds, message feeds, comment lists, and so on. That... s where the power lies to shift opinions, purchases, and votes, and that power is held by a disturbingly small group of people.

I say ... these days... because the explosive growth of a handful of massive platforms on the internet... the largest, by far, being Google and the next largest being Facebook... has changed everything. Millions of people and organizations are constantly trying to get their content in front of our eyes, but for more than 2.5 billion people around the world... soon to be more than 4 billion... the responsibility for what algorithms do should always lie with the people who wrote the algorithms and the companies that deployed them.

In randomized, controlled, peer-reviewed research I... ve conducted with thousands of people, I... ve shown repeatedly that when people are undecided, I can shift their opinions on just about any topic just by changing how I filter and order the information I show them. I... ve also shown that when, in multiple searches, I show people more and more information that favors one candidate, I can shift opinions even farther. Even more disturbing, I can do these things in ways that are completely invisible to people and in ways that don't... t leave paper trails for authorities to trace.

Worse still, these new forms of influence often rely on ephemeral content... information that is generated on the fly by an algorithm and then disappears forever, which means that it would be difficult, if not impossible, for authorities to reconstruct. If, on Election Day this coming November, Mark Zuckerberg decides to broadcast go-out-and-vote reminders mainly to members of one political party, how would we be able to

detect such a manipulation? If we canât detect it, how would we be able to reduce its impact? And how, days or weeks later, would we be able to turn back the clock to see what happened?

Of course, companies like Google and Facebook emphatically reject the idea that their search and newsfeed algorithms are being tweaked in ways that could meddle in elections. Doing so would undermine the publicâs trust in their companies, spokespeople have said. They insist that their algorithms are complicated, constantly changing, and subject to the âorganicâ activity of users.

This is, of course, sheer nonsense. Google can adjust its algorithms to favor any candidate it chooses no matter what the activity of users might be, just as easily as I do in my experiments. As legal scholar Frank Pasquale noted in his recent book âThe Black Box Society,â blaming algorithms just doesnât cut it; the responsibility for what an algorithm does should always lie with the people who wrote the algorithm and the companies that deployed the algorithm. Alan Murray, president of Fortune, recently framed the issue this way: âRule one in the Age of AI: Humans remain accountable for decisions, even when made by machines.â

Given that 95 percent of donations from Silicon Valley generally go to Democrats, itâs hard to imagine that the algorithms of companies like Facebook and Google donât favor their favorite candidates. A newly leaked video of a 2016 meeting at Google shows without doubt that high-ranking Google executives share a strong political preference, which could easily be expressed in algorithms. The favoritism might be deliberately programmed or occur simply because of unconscious bias. Either way, votes and opinions shift.

Itâs also hard to imagine how, in any election in the world, with or without intention on the part of company employees, Google search results would fail to tilt toward one candidate. Googleâs search algorithm certainly has no equal-time rule built into it; we wouldnât want it to! We want it to tell us whatâs best, and the algorithm will indeed always favor one dog food over another, one music service over another, and one political candidate over another. When the latter happens â! votes and opinions shift.

Here are 10 waysâ seven of which I am actively studying and quantifyingâ that Big Tech companies could use to shift millions of votes this coming November with no one the wiser. Letâs hope, of course, that these methods are not being used and will never be used, but letâs be realistic too; thereâs generally no limit to what people will do when money and power are on the line.

1. Search Engine Manipulation Effect (SEME)

Ongoing research I began in January 2013 has shown repeatedly that when one candidate is favored over another in search results, voting preferences among undecided voters shift dramaticallyâ by 20 percent or more overall, and by up to 80 percent in some demographic groups. This is partly because people place inordinate trust in algorithmically generated output, thinking, mistakenly, that algorithms are inherently objective and impartial.

But my research also suggests that we are conditioned to believe in high-ranking search results in much the same way that rats are conditioned to press levers in Skinner boxes. Because most searches are for simple facts (âWhen was Donald Trump born?â), and because correct answers to simple questions inevitably turn up in the first position, we are taught, day after day, that the higher a search result appears in the list, the more true it must be. When we finally search for information to help us make a tough decision (âWhoâs better for the economy, Trump or Clinton?â), we tend to believe the information on the web pages to which high-ranking search results link.

As The Washington Post reported last year, in 2016, I led a team that developed a system for monitoring the election-related search results Google, Bing, and Yahoo were showing users in the months leading up to the presidential election, and I found pro-Clinton bias in all 10 search positions on the first page of Googleâs search results. Google responded, as usual, that it has ânever re-ranked search results on any topic

(including elections) to manipulate political sentimentâ... â... but I never claimed it did. I found what I found, namely that Googleâ... s search results favored Hillary Clinton; â... re-rankingâ... â... an obtuse term Google seems to have invented to confuse peopleâ... is irrelevant.

Because (a) many elections are very close, (b) 90 percent of online searches in most countries are conducted on just one search engine (Google), and (c) internet penetration is high in most countries these daysâ... higher in many countries than it is in the United Statesâ... it is possible that the outcomes of upwards of 25 percent of the worldâ... s national elections are now being determined by Googleâ... s search algorithm, even without deliberate manipulation on the part of company employees. Because, as I noted earlier, Googleâ... s search algorithm is not constrained by equal-time rules, it almost certainly ends up favoring one candidate over another in most political races, and that shifts opinions and votes.

2. Search Suggestion Effect (SSE)

When Google first introduced autocomplete search suggestionsâ... those short lists you see when you start to type an item into the Google search barâ... it was supposedly meant to save you some time. Whatever the original rationale, those suggestions soon turned into a powerful means of manipulation that Google appears to use aggressively.

My recent research suggests that (a) Google starts to manipulate your opinions from the very first character you type, and (b) by fiddling with the suggestions it shows you, Google can turn a 50â... 50 split among undecided voters into a 90â... 10 split with no one knowing. I call this manipulation the Search Suggestion Effect (SSE), and it is one of the most powerful behavioral manipulations I have ever seen in my nearly 40 years as a behavioral scientist.

How will you know whether Google is messing with your election-related search suggestions in the weeks leading up to the election? You wonâ... t.

3. The Targeted Messaging Effect (TME)

If, on Nov. 8, 2016, Mr. Zuckerberg had sent go-out-and-vote reminders just to supporters of Mrs. Clinton, that would likely have given her an additional 450,000 votes. Iâ... ve extrapolated that number from Facebookâ... s own published data.

Because Zuckerberg was overconfident in 2016, I donâ... t believe he sent those messages, but he is surely not overconfident this time around. In fact, itâ... s possible that, at this very moment, Facebook and other companies are sending out targeted register-to-vote reminders, as well as targeted go-out-and-vote reminders in primary races. Targeted go-out-and-vote reminders might also favor one party on Election Day in November.

My associates and I are building systems to monitor such things, but because no systems are currently in place, there is no sure way to tell whether Twitter, Google, and Facebook (or Facebookâ... s influential offshoot, Instagram) are currently tilting their messaging. No law or regulation specifically forbids the practice, and it would be an easy and economical way to serve company needs. Campaign donations cost money, after all, but tilting your messaging to favor one candidate is free.

4. Opinion Matching Effect (OME)

In March 2016, and continuing for more than seven months until Election Day, Tinderâ... s tens of millions of users could not only swipe to find sex partners, they could also swipe to find out whether they should vote for Trump or Clinton. The website iSideWith.comâ... founded and run by â... two friendsâ... with no obvious qualificationsâ... claims to have helped more than 49 million people match their opinions to the right candidate. Both CNN and USA Today have run similar services, currently inactive.

I am still studying and quantifying this type of, um, helpful service, but so far it looks like (a) opinion

matching services tend to attract undecided votersâ... precisely the kinds of voters who are most vulnerable to manipulation, and (b) they can easily produce opinion shifts of 30 percent or more without peopleâ... s awareness.

At this writing, iSideWith is already helping people decide who they should vote for in the 2018 New York U.S. Senate race, the 2018 New York gubernatorial race, the 2018 race for New York District 10 of the U.S. House of Representatives, and, believe it or not, the 2020 presidential race. Keep your eyes open for other matching services as they turn up, and ask yourself this: Who wrote those algorithms, and how can we know whether they are biased toward one candidate or party?

5. Answer Bot Effect (ABE)

More and more these days, people donâ... t want lists of thousands of search results, they just want the answer, which is being supplied by personal assistants like Google Home devices, the Google Assistant on Android devices, Amazonâ... s Alexa, Appleâ... s Siri, and Googleâ... s featured snippetsâ... those answer boxes at the top of Google search results. I call the opinion shift produced by such mechanisms the Answer Bot Effect (ABE).

My research on Googleâ... s answer boxes shows three things so far: First, they reduce the time people spend searching for more information. Second, they reduce the number of times people click on search results. And third, they appear to shift opinions 10 to 30 percent more than search results alone do. I donâ... t yet know exactly how many votes can be shifted by answer bots, but in a national election in the United States, the number might be in the low millions.

6. Shadowbanning

Recently, Trump complained that Twitter was preventing conservatives from reaching many of their followers on that platform through shadowbanning, the practice of quietly hiding a userâ... s posts without the user knowing. The validity of Trumpâ... s specific accusation is arguable, but the fact remains that any platform on which people have followers or friends can be rigged in a way to suppress the views and influence of certain individuals without people knowing the suppression is taking place. Unfortunately, without aggressive monitoring systems in place, itâ... s hard to know for sure when or even whether shadowbanning is occurring.

7. Programmed Virality and the Digital Bandwagon Effect

Big Tech companies would like us to believe that virality on platforms like YouTube or Instagram is a profoundly mysterious phenomenon, even while acknowledging that their platforms are populated by tens of millions of fake accounts that might affect virality.

In fact, there is an obvious situation in which virality is not mysterious at all, and that is when the tech companies themselves decide to shift high volumes of traffic in ways that suit their needs. And arenâ... t they always doing this? Because Facebookâ... s algorithms are secret, if an executive decided to bestow instant Instagram stardom on a pro-Elizabeth Warren college student, we would have no way of knowing that this was a deliberate act and no way of countering it.

The same can be said of the virality of YouTube videos and Twitter campaigns; they are inherently competitiveâ... except when company employees or executives decide otherwise. Google has an especially powerful and subtle way of creating instant virality using a technique Iâ... ve dubbed the Digital Bandwagon Effect. Because the popularity of websites drives them higher in search results, and because high-ranking search results increase the popularity of websites (SEME), Google has the ability to engineer a sudden explosion of interest in a candidate or cause with no oneâ... perhaps even people at the companies themselvesâ... having the slightest idea theyâ... ve done so. In 2015, I published a mathematical model showing how neatly this can work.

8. The Facebook Effect

Because Facebookâs ineptness and dishonesty have squeezed it into a digital doghouse from which it might never emerge, it gets its own precinct on my list.

In 2016, I published an article detailing five ways that Facebook could shift millions of votes without people knowing: biasing its trending box, biasing its center newsfeed, encouraging people to look for election-related material in its search bar (which it did that year!), sending out targeted register-to-vote reminders, and sending out targeted go-out-and-vote reminders.

I wrote that article before the news stories broke about Facebookâs improper sharing of user data with multiple researchers and companies, not to mention the stories about how the company permitted fake news stories to proliferate on its platform during the critical days just before the November electionâproblems the company is now trying hard to mitigate. With the revelations mounting, on July 26, 2018, Facebook suffered the largest one-day drop in stock value of any company in history, and now itâs facing a shareholder lawsuit and multiple fines and investigations in both the United States and the EU.

Facebook desperately needs new direction, which is why I recently called for Zuckerbergâs resignation. The company, in my view, could benefit from the new perspectives that often come with new leadership.

9. Censorship

I am cheating here by labeling one category â censorship,â because censorshipâthe selective and biased suppression of informationâcan be perpetrated in so many different ways.

Shadowbanning could be considered a type of censorship, for example, and in 2016, a Facebook whistleblower claimed he had been on a company team that was systematically removing conservative news stories from Facebookâs newsfeed. Now, because of Facebookâs carelessness with user data, the company is openly taking pride in rapidly shutting down accounts that appear to be Russia-connectedâeven though company representatives sometimes acknowledge that they â donât have all the facts.â

Meanwhile, Zuckerberg has crowed about his magnanimity in preserving the accounts of people who deny the Holocaust, never mentioning the fact that provocative content propels traffic that might make him richer. How would you know whether Facebook was selectively suppressing material that favored one candidate or political party? You wouldnât. (For a detailed look at nine ways Google censors content, see my essay â The New Censorship,â published in 2016.)

10. The Digital Customization Effect (DCE)

Any marketer can tell you how important it is to know your customer. Now, think about that simple idea in a world in which Google has likely collected the equivalent of millions of Word pages of information about you. If you randomly display a banner ad on a web page, out of 10,000 people, only five are likely to click on it; thatâs the CTRâthe â clickthrough rateâ(0.05 percent). But if you target your ad, displaying it only to people whose interests it matches, you can boost your CTR a hundredfold.

Thatâs why Google, Facebook, and others have become increasingly obsessed with customizing the information they show you: They want you to be happily and mindlessly clicking away on the content they show you.

In the research I conduct, my impact is always larger when I am able to customize information to suit peopleâs backgrounds. Because I know very little about the participants in my experiments, however, I am able to do so in only feeble ways, but the tech giants know everything about youâeven things you donât know about yourself. This tells me that the effect sizes I find in my experiments are probably too low. The impact that companies like Google are having on our lives is quite possibly much larger than I think it is. Perhaps that doesnât scare you, but it sure scares me.

OK, you say, so much for Epstein's list! What about those other shenanigans we've heard about: voter fraud (Trump's explanation for why he lost the popular vote), gerrymandering, rigged voting machines, targeted ads placed by Cambridge Analytica, votes cast over the internet, or, as I mentioned earlier, those millions of bots designed to shift opinions. What about hackers like Andrés Sepúlveda, who spent nearly a decade using computer technology to rig elections in Latin America? What about all the ways new technologies make dirty tricks easier in elections? And what about those darn Russians, anyway?

To all that I say: kid stuff. Dirty tricks have been around since the first election was held millennia ago. But unlike the new manipulative tools controlled by Google and Facebook, the old tricks are competitive... it's your hacker versus my hacker, your bots versus my bots, your fake news stories versus my fake news stories... and sometimes illegal, which is why Sepúlveda's efforts failed many times and why Cambridge Analytica is dust.

Cyberwar, a new book by political scientist Kathleen Hall Jamieson, reminds us that targeted ads and fake news stories can indeed shift votes, but the numbers are necessarily small. It's hard to overwhelm your competitor when he or she can play the same games you are playing.

Now, take a look at my numbered list. The techniques I've described can shift millions of votes without people's awareness, and because they are controlled by the platforms themselves, they are entirely noncompetitive. If Google or Facebook or Twitter wants to shift votes, there is no way to counteract their manipulations. In fact, at this writing, there is not even a credible way of detecting those manipulations.

And what if the tech giants are all leaning in the same political direction? What if the combined weight of their subtle and untraceable manipulative power favors one political party? If 150 million people vote this November in the United States, with 20 percent still undecided at this writing (that's 30 million people), I estimate that the combined weight of Big Tech manipulations could easily shift upwards of 12 million votes without anyone knowing. That's enough votes to determine the outcomes of hundreds of close local, state, and congressional races throughout the country, which makes the free-and-fair election little more than an illusion.

Full disclosure: I happen to think that the political party currently in favor in Silicon Valley is, by a hair (so to speak), the superior party at the moment. But I also love America and democracy, and I believe that the free-and-fair election is the bedrock of our political system. I don't care how... right... these companies might be; lofty ends do not justify shady means, especially when those means are difficult to see and not well understood by either authorities or the public.

Can new regulations or laws save us from the extraordinary powers of manipulation the Big Tech companies now possess? Maybe, but our leaders seem to be especially regulation-shy these days, and I doubt, in any case, whether laws and regulations will ever be able to keep up with the new kinds of threats that new technologies will almost certainly pose in coming years.

I don't believe we are completely helpless, however. I think that one way to turn Facebook, Google, and the innovative technology companies that will succeed them, into responsible citizens is to set up sophisticated monitoring systems that detect, analyze, and archive what they're showing people... in effect, to fight technology with technology.

As I mentioned earlier, in 2016, I led a team that monitored search results on multiple search engines. That was a start, but we can do much better. These days, I'm working with business associates and academic colleagues on three continents to scale up systems to monitor a wide range of information the Big Tech companies are sharing with their users... even the spoken answers provided by personal assistants.

Ultimately, a worldwide ecology of passive monitoring systems will make these companies accountable to the public, with information bias and online manipulation detectable in real time.

With November drawing near, there is obviously some urgency here. At this writing, itâ... s not clear whether we will be fully operational in time to monitor the midterm elections, but weâ... re determined to be ready for 2020.

Dr. Robert Epstein is a senior research psychologist at the American Institute for Behavioral Research and Technology in California.

The citizens demanded an FTC task force and they got one launched: The Federal Trade Commission will be launching a task force to monitor competition in the USâ... s technology markets, FTC commissioners announced.

The task force will include current officials working in the agencyâ... s Bureau of Competition in order to â... enhance the Bureauâ... s focus on technology-related sectors of the economy, including markets in which online platforms compete.â... It will also include 17 staff attorneys who will be tasked with investigating anti-competitive behavior in the tech industry.

â... The role of technology in the economy and in our lives grows more important every day,â... FTC Chairman Joe Simons said. â... As Iâ... ve noted in the past, it makes sense for us to closely examine technology markets to ensure consumers benefit from free and fair competition.â...

â... Technology markets ... raise distinct challenges for antitrust enforcementâ...

The new task force comes amid growing pressure for antitrust action against large tech companies like Facebook and Google. Earlier this month, it was reported that FTC officials have been looking to levy a multibillion-dollar fine on Facebook for repeatedly violating a privacy agreement the two bodies came to back in 2011. A coalition of advocacy groups argued that a fine would not be enough to incentivize Facebook to be more cautious with consumer data and asked the FTC to force the company spinoffs, Instagram and WhatsApp, back into their own entities once again. The groups argued that Facebook was too big for it to adequately care for user data for all three major apps.

Discussion over retroactive merger reviews that may result in companies divesting previously approved assets has been heating up over the last few months. The Democratic-led House Judiciary Committee has been reportedly beefing up its antitrust arm and hiring on big names like Lina Khan in the academic sphere.

â... Technology markets, which are rapidly evolving and touch so many other sectors of the economy, raise distinct challenges for antitrust enforcement,â... said Bureau Director Bruce Hoffman. â... By centralizing our expertise and attention, the new task force will be able to focus on these markets exclusively â... ensuring they are operating pursuant to the antitrust laws, and taking action where they are not.â...

Hoffman confirmed that the task force would look into consummated mergers, but could not name any investigations specifically. When it comes to remedies for problematic mergers, Hoffman said that firms could be â... broken out,â... or could be forced to â... spin offâ... previous acquisitions as new competitors in order to recreate the markets pre-merger.

Hoffman said that the task force would be working closely with the FTCâ... s Consumer Protection Bureau as it relates to consumer privacy enforcement especially in cases in which these issues coalesce.

â... Our ongoing Hearings on Competition and Consumer Protection in the 21st Century are a crucial step to deepen our understanding of these markets and potential competitive issues. The Technology Task Force is

the next step in that effort,â... Simons said in the press release.

The Justice Department, which also has antitrust jurisdiction, is aware of the FTC's new task force, according to Hoffman, and both agencies will continue to work separately on this front.

An alliance of investigators, forensics experts, EU prosecution offices, FBI specialists, journalists, voters and public crowd-sourced volunteers have been campaigning for the arrest, prosecution, exposure and termination of each and every company, group and individual who engaged in these crimes and reprisal attacks on those who reported them.

It has already cost the oligarchs their power and their cash, ie:

<https://www.usnews.com/news/world/articles/2019-02-27/billionaire-list-shows-1t-hit-from-18-market-meltdown>

"WINNING", in this case, means punching the bad guys in the legal nose and teaching every other citizen how to do it too!

ARE YOU A MEMBER OF: THE INVESTIGATION TEAM

*"Take balanced parts of The FBI, The CIA, The Associated Press, Wikileaks, Reuters, Drudge, Peer-To-Peer Forensic Experts and over 300 Million Voters, add a dash of 100% legal tactics and you have **"The Investigation Team"**.*

*The charity based, non-commercial, **Investigation Team** is open to anyone who wants to participate in 100% legal crowd-powered law enforcement.*

There is now a global Network of hundreds of P2P Social Mesh Network Ad Hoc organizations that you can participate in. We created the "Fake News" crisis by exposing every corporate news outlet that lies in the news to promote stock market rigging and payola. We got over 300 famous political figures fired for corruption, insider trading and payola scams.

YOU ARE US! JUST GET TO WORK ON INVESTIGATION PROJECTS ON THE WEB AND YOU ARE "IN"!

Join "The Other FBI" and contribute evidence files, 302-Form drafts and investigative reports to ALL law enforcement and media entities.

*Join a special Team, ie: The Victims Of The Energy Department Crony Payola Scam; **or** form a new Team around a new case topic.*

*Read the training manuals and **'How To...'** books and white-papers on-line simply by typing: **"How To Be an Investigator"** into any of the top 6 non-Google search engines.*

You can use any tactic you can imagine, as creatively as possible, as long as you do not violate the Golden Rule:

"Never Break The Law, But Always Break The Law Breakers. Hunt Them Forever. Never Forget. Never Forgive Until They Have Paid For Their Crimes!"

Pass the word to every voter you know. Get folks involved in the effort. Look into the many groups in The

Network like: Citizen Sleuths, WeSearchr, Wikileaks, ICIJ, ProPublica, and thousands more...'

Fighting Crime through Crowdsourcing

by University of Miami

Crowdsourcing utilizes the input of a crowd of online users to collaboratively solve problems. To advance this emerging technology, researchers at the University of Miami are developing a computing model that uses crowdsourcing to combine and optimize human efforts and machine computing elements.

The new model can be used to efficiently perform the complex tasks of face recognition â a method used in law enforcement. Itâ s a new approach to using social networks as a formal part of the criminal investigation process, explained Brian Blake, vice provost for Academic Affairs and dean of the Graduate School at the University of Miami (UM). He is also principal investigator of the project.

â The breadth of the internet and popularity of smartphones have facilitated the onset of online crowdsourcing platforms,â Blake said. â Our project attempts to leverage the power of the crowd to solve complex problems, on demand.â

Preliminary findings showed an average certainty of 14.13 percent for machine computing elements (MCE) to identify individuals in pictures. Combining the efforts of both MCE and human computing elements (HCE) in performing the same task, there was an average increase of 55 percent reflecting in an overall mean precision of 69.13 percent.

Unlike previous works, where machines and humans would address distinct tasks, the current project is unique in that the investigators recognize that sometimes the jobs requiring human and/or machine interventions are exactly the same. Traditionally, in a criminal investigation, a workflow might use computers to sort pictures and information, then use the people to identify pictures of interest. In the current approach, people and machines could sort the images, simultaneously and people and machines could identify the images. The open problem is who does what and in which order.

The elasticity of the system is the key feature of the model. It allows it to adapt to changes in the workload of a task. The new model allows the machine and human computing resources to change, when and where needed and without disrupting the operations.

â Elastically, we would like to decide who is best for a specific task, or what concentration of people or machines could be mixed for a specific task,â Blake said. â We also think that humans could do a first pass of a task, then machines do a second pass on the same task.â

The model combines the human and machine computing elements and ignores specific outputs that don't meet certain quality requirements. It also sends feedback to improve future decisions. This feedback allows the model to build a knowledge base to improve accuracy.

The preliminary results of this study were presented at the 10th IEEE International Conference on Collaborative Computing: Networking, Applications and Worksharing, where Blake gave the opening keynote address. The findings will be published by IEEE press in a paper titled: "Combining Human and Machine Computing Elements for Analysis via Crowdsourcing."

The publication was led by Julian Jarrett, Ph.D. student, and Iman Saleh, research scientist working in Blake's lab, in the Department of Computer Science at UM. Other co-authors are Rohan Malcom and Sean Thorpe, from the University of Technology in Jamaica; and Tyrone Grandison, from Proficiency Labs in Ashland, Oregon.

In the future, the researchers would like to recreate specific past events or create a simulated event, with a staged "bad guy," where hundreds of people use their cell phones to take pictures, then use all the pictures and personal accounts, to test the new model.

American Economy Will Not Survive COVID Without Universal Basic Income And A Dramatic Increase In SSA Monthly Benefits Payments

The numbers are in. America will be destroyed without UBI and SSA benefits increases. It simply is not possible to hope that the USA will ever be able to go back to the way it was before.

It's often said that most Americans are one health care or financial disaster away from bankruptcy.

The Federal Reserve's 2018 [Survey of Household Economics and Decision Making](#), which took the lived experiences of 12,000 U.S. households into account, found that 40% of the respondents would struggle to come up with \$400 during an emergency. Rent and mortgage payments, debt and the basic cost of weekly staples like groceries and medicine add up very quickly in America.

That was before the COVID-19 pandemic began.

Now, as more Americans develop fevers and respiratory distress, and as elected officials urge the rest of us to stay in our homes to prevent the hospitals from becoming overwhelmed, Americans are taking a financial beating. Businesses are closing down. Workers are being laid off at rates that could [exceed](#) the devastation of the Great Depression. Unemployment websites are crashing from the sheer demand for assistance. Because in America, we don't have much of a safety net, and there are always bills to be paid. If millions of us can't go to work, our system will collapse.

How do we rectify this? By giving every household some cash. Call it emergency universal basic income (UBI), call it a cash stimulus, but that's the idea that many economists and members of Congress have embraced. Several other countries are already doing this in their own ways. Italy, France and South Korea have respectively [canceled](#) mortgage payments, [suspended](#) rents and [sent](#) pre-loaded debit cards for folks who've suffered economic losses. The United Kingdom is going to pay workers who've lost wages 80% of their incomes. A concept once deemed utopian and impossible is now pragmatic. Social distancing only works if people can afford to stay home.

A concept once deemed utopian and impossible is now pragmatic.

Early Wednesday morning, Senate leaders and the White House finally reached an agreement on a [coronavirus stimulus package](#) that includes \$1,200 payments to most American adults and \$500 to most children. Still, senior leaders from both of America's parties had found ways to screw up the UBI proposals that were before Congress.

Senate Majority Leader Mitch McConnell and the GOP released a [plan](#) that would mail individuals the \$1,200 check, but give lower-income households only \$500. (Imagine thinking that any person in America can subsist on \$500 to \$1,200 for weeks or more likely, months of social distancing.) Better ideas had been put forth by Democrats like Rep. Maxine Waters, whose stimulus [plan](#) would have sent monthly checks of \$2,000 to individuals, with additional money for dependents and a temporary suspension of most household bill payments. But House Speaker Nancy Pelosi threw cold water on Waters's universal aid idea by [insisting](#) that any coronavirus aid package should be means-tested which may sound sensible, except means testing makes it much [harder](#) for poor people to get the benefits they need right away.

Watching this impasse from Massachusetts, one of the most expensive states to live in was infuriating. And it's ironic that we should be at the mercy of the feds on UBI, because historically speaking, Massachusetts has been a leader on issues that have transformed life in America.

Rep. Tami Gouveia, a Democrat from Acton, didn't wait for Washington. On March 16, she filed [legislation](#) for a localized version of cash aid. If the bill were taken up by the House and Senate and signed by Gov. Charlie Baker, lower- and middle-income households would receive a check for \$1,000, with \$500 for each dependent. This aid would complement the federal payment. In other words, localized cash aid could make a paltry UBI package from Congress livable for more people.

Instead of thinking of cash aid as "free money," think of it as paying people to stay home ...

Localized UBI would go much further than the state-centric economic relief ideas that we've come up with thus far. The interest-free small business [loans](#) that Baker announced last week would still leave many of us

indebted. The Boston Resiliency Fund, [announced](#) by Boston Mayor Marty Walsh, is a step in the correct direction (it would provide food and additional forms of material aid to kids, older adults and health care workers). But to address the full scale of the coronavirus economic fallout, we need the federal and state governments to come up with a livable and fair substitute for the economy that weâ€¦ d otherwise be paying into as consumers, workers and business owners. Mailing out checks to everyone each month would move us a lot closer to that goal.

Universal cash aid would not only prevent bankruptcies but also save lives. Instead of thinking of cash aid as "free money," think of it as paying people to stay home, social distance and do their duty to prevent hospitals from being swarmed with COVID-19 patients. Trump is already talking about sending people [back to work](#) by Easter (ignoring the recommendations of epidemiologists). Cash payments would help governors push back against Trump and urge their residents to stay home as long as public health officials recommend.

Massachusetts could find a way to do this. We reaped a billion-dollar [surplus](#) last year, and while weâ€¦ ve agreed on how to spend \$541 million of it, that still leaves a hefty balance. We could even make Gouveiaâ€¦ s aid package universal, sending out checks to everyone now and finding a way to tax wealthier households retroactively. That would solve the means-testing, red-tape problem.

But on a broader level, doing this would be an act of leadership and innovation in line with the history of Massachusetts. We love to rest on laurels when it comes to reliving the days of giving people health care and legalizing same-sex marriage. Now, as millions of Americans struggle to survive the pandemic without going bankrupt, Massachusetts could show other states how to compensate for the federal governmentâ€¦ s inadequate response to the economic calamity.

Normally, this is where I would defend the idea of giving everyone cash from the charge that itâ€¦ s a socialistic idea â€¦ thatâ€¦ s how it goes in American life. But weâ€¦ re in a new world now. Countries are enacting policies that were once deemed unfeasible â€¦ because those policies are what people need to make it through a pandemic. And in America, you need money to live.

Americans want a plan to increase monthly Social Security benefits, veterans assistance and Supplemental Security Income benefits by \$200 a month, which could further add to a stimulus bill.

Senate Minority Leader Charles Schumer (D-N.Y.) joined Sen. Ron Wyden (Ore.), the senior Democrat on the Senate Finance Committee, and Sen. Elizabeth Warren (D-Mass.) in calling for the expanded benefits to be added to the phase three stimulus bill.

The additional benefits, which would last through the end of 2021, would provide seniors, veterans and people with disabilities an extra \$4,000 over the next two years.

"Immediately increasing Social Security benefits would put money in the pockets of seniors, veterans and people with disabilities during these uncertain times," Schumer said in a statement. "Senate Democrats are committed to quickly delivering relief to the millions of Americans bearing the weight of this public health crisis."

Warren said increasing Social Security benefits "would get money directly to millions of people quickly."

"Social Security was created to respond to the Great Depression, and expanding it now will ensure this critical program helps us meet the challenge of the current crisis," she added.

Proponents of expanded Social Security benefits made a strong push for the proposal during a House Democratic conference call Thursday morning.

Rep. John Larson (D-Conn.), the Ways and Means Social Security Subcommittee chairman, pitched his bill, The Emergency Social Security Benefits Improvement Act, on the call.

It would provide for a 2 percent across-the-board increase in Social Security benefits for 64 million people, increase the threshold for the special minimum benefit to 125 percent of the federal poverty level, and reduce taxes on benefits for low- and middle-income individuals and families.

Rep. Jared Huffman (D-Calif.) said it's a popular idea in the House Democratic caucus.

"If we're talking about bailing out certain industries, we've got to treat the most vulnerable population in this pandemic, our seniors, with the same priority," he said. "It's an appropriate economic stimulus. It's also a critical part of retirement security and economic security for some of the worst-affected Americans."

A major Democratic criticism of the Senate Republican stimulus plan is that it does not do enough to help people on the lowest rungs of the economic ladder who are especially vulnerable to the economic downturn caused by the coronavirus.

Sen. Debbie Stabenow (Mich.), one of the Democratic negotiators, on Friday faulted the GOP plan for proposing \$1,200 rebate checks for adults earning up to \$75,000 per year but much less for people who earn little to no federally taxable income.

"I couldn't believe that they were talking about lowest-income people getting \$600 and somebody making \$75,000 getting twice as much as that, \$1,200," she said. "Those numbers don't make any sense."

[Implement Universal Basic Income to give home & food ...](#)

☐ <https://petition.parliament.uk/petitions/302284>

The government should implement an immediate **Universal Basic Income** trial for all UK residents to ensure home and food security through the coronavirus **Covid-19** crisis, to support the needs of those that need to self-isolate as well as the public health at large, and the wider economy.

Does coronavirus mean the time has come for a **Universal Basic Income**? Wouldn't a UBI not only be effective in supporting **incomes**, but also provide a powerful confidence-boosting signal that the ...

Why Freedom of Speech Should Apply to Google, Facebook and the Internet

Americans paid to create the internet; they deserve Freedom of Speech on it.

[Daniel Greenfield](#)

[21](#)

Daniel Greenfield, a Shillman Journalism Fellow at the Freedom Center, is an investigative journalist and writer focusing on the radical Left and Islamic terrorism

â... But, itâ... s a private company.â...

Itâ... s a familiar argument. Bring up the problem of Google, Facebook and Twitter suppressing conservative speech and many conservatives will retort that itâ... s a free market. The big dot com monopolies created their own companies, didnâ... t they? And we wouldnâ... t want government regulation of business.

In a FOX Business editorial, Iain Murray [writes](#) that breaking up dot coms like Google would be "a repudiation of conservative principles". He argues that "Twitter is a private company" and that "there is no positive right to free speech on Twitter or any other private venue."

â... The same goes for the presidentâ... s attacks on Google and the complaints of conservative censorship," Diane Katz [writes](#) at the Heritage Institute. "These private enterprises are not obligated to abide any sort of partisan fairness doctrine."

The talking point that Google, Facebook and Twitter are private companies that can discriminate as they please on their private platforms, and that the First Amendment doesnâ... t apply, is in the air everywhere.

But it overlooks two very simple facts.

The driving force behind the censorship of conservatives isnâ... t a handful of tech tycoons. Itâ... s elected officials. Senator Kamala Harris offered an example of that [in a recent speech](#) where she declared that she would "hold social media platforms accountable" if they contained "hate" or "misinformation".

â... Misinformationâ... is a well-known euphemism among Democrats and the media for conservative political content. It was originally known as â... fake newsâ... before President Trump hijacked the term to refer to the media. The recent Poynter list of â... unreliableâ... sites was stacked with conservative sites. Lists like these arenâ... t hypothetical. Poynter runs the International Fact Checking Network which had been empowered by Facebook and other sites to deplatform conservative content through its â... fact checksâ... .

All of this got underway in response to claims by Hillary Clinton and her allies that â... fake newsâ... had cost her the election and represented a grave attack on our democracy. The call was quickly taken up by Democrats in the House and the Senate. Itâ... s been commented on supportively by powerful Clinton allies in the tech industry, like Eric Schmidt, the former chairman of Google.

Dot coms like Facebook are cracking down on conservatives as an explicit response to pressure from elected government officials. Thatâ... s not the voluntary behavior of private companies. When Facebook deletes conservatives in response to threats of regulatory action from Senate Democrats, its censors are acting as government agents while engaging in viewpoint discrimination.

Free market conservatives can argue that Facebook should have the right to discriminate against conservatives. But do they really want to argue that Senate Democrats should have the right to compel private companies to censor conservatives?

Whatâ... s the difference between that and a totalitarian state?

It might, arguably, be legal for your landlord to kick you out of your house because he doesnâ... t like the fact that youâ... re a Republican. But is it legal for him to do so on orders from Senator Kamala Harris?

Defending abusive behavior like that is a desecration of the free market.

The second fact is that the internet is not the work of a handful of aspiring entrepreneurs who built it out of thin air using nothing but their talent, brains and nimble fingers.

The internet was the work of DARPA. That stands for Defense Advanced Research Projects Agency. DARPA is part of the Department of Defense. DARPA had funded the creation of the core technologies that made the internet possible. The origins of the internet go back to DARPA's Arpanet.

Nor did the story end once the internet had entered every home.

Where did Google come from? "The Anatomy of a Large-Scale Hypertextual Web Search Engine," the original paper by Sergey Brin and Larry Page, the co-founders of Google, reveals support from the National Science Foundation, DARPA, and even NASA.

Harvard's computer science department, where Facebook's Mark Zuckerberg learned to play with the toys that turned him into a billionaire, has also wallowed in DARPA cash. Not to mention funds from a variety of other DOD and Federal science agencies.

Taxpayer sank a fortune into developing a public marketplace where ideas are exchanged, and political advocacy and economic activity takes place. That marketplace doesn't belong to Google, Amazon or Facebook. And when those monopolies take a stranglehold on the marketplace, squeezing out conservatives from being able to participate, they're undermining our rights and freedoms.

"A right of free correspondence between citizen and citizen on their joint interests, whether public or private and under whatsoever laws these interests arise (to wit: of the State, of Congress, of France, Spain, or Turkey), is a natural right," Thomas Jefferson argued.

There should be a high barrier for any company seeking to interfere with the marketplace of ideas in which the right of free correspondence is practiced.

Critics of regulating dot com monopolies have made valid points.

Regulating Google or Facebook as a public utility is dangerous. And their argument that giving government the power to control content on these platforms would backfire is sensible.

Any solution to the problem should not be based on expanding government control.

But there are two answers.

First, companies that engage in viewpoint discrimination in response to government pressure are acting as government agents. When a pattern of viewpoint discrimination manifests itself on the platform controlled by a monopoly, a civil rights investigation should examine what role government officials played in instigating the suppression of a particular point of view.

Liberals have abandoned the Public Forum Doctrine, once a popular ACLU theme, while embracing censorship. But if the Doctrine could apply to a shopping mall, it certainly applies to the internet.

In *Packingham v. North Carolina*, the Supreme Court's decision found that, "A fundamental principle of the First Amendment is that all persons have access to places where they can speak and listen."

The *Packingham* case dealt with government interference, but when monopolies silence conservatives on behalf of government actors, they are fulfilling the same role as an ISP that suspends a customer in response to a law.

When dot com monopolies get so big that being banned from their platforms effectively neutralizes political activity, press activity and political speech, then they're public forums.

Second, rights are threatened by any sufficiently large organization or entity, not just government. Government has traditionally been the most powerful such organization, but the natural rights that our country was founded on are equally immune to every organization. Governments, as the Declaration of Independence asserts, exist as part of a social contract to secure these rights for its citizens.

Government secures these rights, first and foremost, against itself. (Our system effectively exists to answer the question of who watches the watchers.) But it also secures them against foreign powers, a crisis that the Declaration of Independence was written to meet, and against domestic organizations, criminal or political, whether it's the Communist Party or ISIS, that seek to rob Americans of their rights.

A country in which freedom of speech effectively did not exist, even though it remained a technical right, would not be America. A government that allowed such a thing would have no right to exist.

Only a government whose citizens enjoy the rights of free men legally justifies its existence.

If a private company took control of all the roads and closed them to conservatives every Election Day, elections would become a mockery and the resulting government would be an illegitimate tyranny.

Thatâ is the crisis that conservatives face with the internet.

Protecting freedom of speech does not abandon conservative principles, it secures them. There are no conservative principles without freedom of speech. A free market nation without freedom of speech isnâ t a conservative country. Itâ is an oligarchy. Thatâ is the state of affairs on the internet.

Conservatives should beware of blindly enlisting in leftist efforts to take regulatory control of companies like Facebook. The result would be a deeper and more pervasive form of censorship than exists today. But neither should they imagine that the â free market side of historyâ will automatically fix the problem.

As the internet has devolved from its origins in academia to a set of handheld devices controlled by one of two companies, and then to a set of smart assistants controlled by one of two companies, it has become far less open. Even if Google were to lose its monopoly, Silicon Valley hosts a politicized workforce which allies with the media to compel any rising new company to toe the same line.

And if that fails, there are always House and Senate hearings and harder laws coming out of Europe.

We have an existing useful toolset to draw on, from anti-trust laws to civil rights investigations to the Public Forum Doctrine. This will be a challenging process, but we must remember through it all, that we have a right to freedom of speech on the internet. Our tax dollars, invested over generations, built this system. It does not belong to the Left. Or, for that matter, the Right. It belongs to all of us.

An Introduction to Tor vs I2P

Basicby Ed Holden

Darknet. The word in and of itself brings to mind visions of the seedy underbelly of the internet; a virtual red-light district, back alley, and digital ghetto all rolled into one. Despite this threatening image that the media and many governments would like to imprint on the public consciousness, privacy-aware individuals know that in today's world of ISP data retention being measured in petabytes and massive supercomputing resources being thrown at traffic analysis by both governments and private industry alike, individuals must take it upon themselves to ensure the freedoms that come with anonymous information access and communication. Two of the most popular tools for doing so on the internet are Tor and I2P. Both will be compared and contrasted below.

TOR

We will begin by examining the underlying technology of the [Tor network](#) with an eye towards how it works to protect your anonymity online. The Tor network is comprised of three different types of nodes: directory servers, exit points (also referred to as exit relays), and internal relays. When you connect to Tor, the first thing your client does is acquire a current list of relays from one of the trusted directory servers. The addresses of these servers are included with the basic configuration files shipped with the client (of course, as with any reputable privacy tool, you have the option to alter what directory servers you trust to provide you with valid relays).

After retrieving a list of currently operational relays from the directory servers, your client then determines the optimal route for your traffic across the Tor network and finally terminating (from the Tor network perspective) at an exit node. This circuit created consists of your computer, the relay to which you are connecting and multiple internal relays before reaching an exit node. Note that this is substantially different than the traditional IP forwarding that occurs between routers on the internet. Traditional IP routers follow a best possible route on a per-packet basis, there are no stateful circuits from an IP perspective (as a qualifier to this statement, it is necessary to grant that it is within the technical realm of possibility that every router between you and the computer you are connecting to could have single, static routes to one another, though in practice this is a near impossibility). In short, for the life of a circuit, all of your traffic will follow the same route within the Tor network and exit at the same point. Later, we will see how this is fundamentally different than the way the I2P network operates.

During the circuit creation process, your client exchanges cryptographic keys with the first relay it connects to and begins encrypting traffic back and forth. Further each hop in transit between the various relays is encrypted using those relays' cryptographic keys. You can visualize this as layers of encryption being wrapped around your data: this is where the phrase "onion routing" comes from when describing the type of network Tor establishes. Finally, your encrypted traffic is decrypted at the exit relay where it is then forwarded out onto the "regular" internet. This is one of the ways that Tor helps maintain your privacy online - each exit node is aggregating traffic from many other Tor users and putting it out onto the internet all at once. Your traffic becomes a small stream in the giant swath of data coming from and entering back into any given exit node. It is also important to note

that your exit node only knows which intermediate node to send receiving data back to (this is also true for each internal to internal leg of the circuit). What this means is that your identity and the content of your traffic are cryptographically bifurcated â... your entry node knows who you are but not what you are doing and your exit node knows what you are doing but not who you are. All the relays in between only know to forward the encrypted payload to the next relay on the circuit. Assuming that the content of your traffic does not reveal your identity, this permits you to browse the internet completely anonymously.

As a side note, Tor also allows you to run and access what are called â... hidden services.â... These are servers that are accessible only from within the Tor network itself. While this is not the primary purpose for Tor, it does provide an opportunity for one to use dedicated in-network services in a cryptographically secure manner. Among the various hidden services are various blogs, email servers, and forums. We will see later how I2P provides a better framework for providing these hidden services, but if oneâ... s primary goal is to access â... regularâ... internet services in a anonymous fashion, Tor is a vital tool in oneâ... s arsenal.

I2P

On the surface, [I2P](#) appears to provide many of the same benefits that Tor does. Both allow anonymous access to online content, both make use of a peer-to-peer-like routing structure, and both operate using layered encryption. However, I2P was designed from the ground up to provide a different set of benefits. As we saw above, the primary use case for Tor is enabling anonymous access of the public internet with hidden services as an ancillary benefit. I2P on the other hand, was designed from day one to be a true â... darknet.â... Its primary function is to be a â... network within the internet,â... with traffic staying contained in its borders. Very few outbound relays exist in the I2P network, and the few that do exist are rarely usable.

As mentioned above, I2P routes traffic differently than Tor. At its heart, I2P performs packet based routing as opposed to Torâ... s circuit based routing. This has the benefit of permitting I2P to dynamically route around congestion and service interruptions in a manner similar to the internetâ... s IP routing. This provides a higher level of reliability and redundancy to the network itself. Additionally, I2P does not rely on a trusted directory service to get route information. Instead, network routes are formed and constantly updated dynamically, with each router constantly evaluating other routers and sharing what it finds. Finally, I2P establishes two independent simplex tunnels for traffic to traverse the network to and from each host as opposed to Torâ... s formation of a single duplex circuit. This provides the additional benefit of only disclosing half the traffic in the case of an in-network eavesdropper.

From an application-level perspective there is a fundamental difference between the I2P and Tor networks as well. Tor functions by providing a proxy on your local machine that you must configure your applications to use (of download specially configured application bundles). In contrast, I2P is generally used by applications that are written specifically to run on the I2P network. These include, but are not limited to, instant message, file sharing, email, and distributed storage applications (yes, you can store encrypted data in the I2P â... cloud,â... similar to Freenet).

Conclusion

We see that both Tor and I2P provide cryptographically sound methods to anonymously access information and communicate online. Tor provides one with better anonymous access to the open internet and I2P provides one with a more robust and reliable â... network within the network,â... a true darknet, if you will. Of course, when implementing either of these two tools, one must always be aware that oneâ... s ISP can see that he or she is using Tor or I2P (though they cannot determine the content of the traffic itself). In order to hide this knowledge from oneâ... s ISP, one should make use of a high-quality VPN service to act as an entry point to either oneâ... s anonymous network of choice or to the internet at large.

Another Way To Shut Down A Corrupt Corporation In A Few Days!

[Hack PR Blog](#), [Posts](#)

How We Hacked Reddit to Generate 5 Million Media Impressions in 3 days

by [Hack Lab](#) |

On Sunday, December 27th, I sat in my office stressed out. A big campaign we had launched in November had not taken off like we hoped it would. The idea had received some coverage on [California TV](#), Huffington Post, and the [Washington Times](#) but we really needed much more if we wanted to make the idea happen.

Backstory

This happens a lot when you launch a media campaign. The initial idea doesn't take off on the first shot and from there you need to hustle and make magic happen. Without the magic, it will flop.

The only difference this time was that the idea had cost our client \$1 million dollars and our ass (and reputation) was on the line like never before. Our client was a successful entrepreneur who has big political plans in California. The only issue: no one knew him. So we decided the best way to make him known would be to do something that would totally shake up the California political landscape and put him in the spotlight. And it wasn't just an idea: it was a proposed law that we wanted our client try to get passed.

We took the idea from a popular internet political joke: Wouldn't it be nice if politicians wore the logos of their sponsors like Nascar drivers so we know who owns them? It was funny meme and was generally well-received. We pitched it to our client and advised that he try to make it a law through the California ballot initiative process. He agreed and gave us a budget of \$1 million to make it happen.

(For the launch, we printed out 120 full-size cutouts of everyone in the California Legislature and reserved the steps of the Sacramento State Capitol building)

Despite the initial coverage when the idea was announced, it just had not taken off like we had hoped.

The Hack(s)

On that Sunday night as I sat there stressed out, I began testing new ideas. After a quick brainstorm, I set my sights on Reddit. I follow various threads on Reddit on a daily basis and understand the power it has to make something go viral. I just didnâ... t know how to do it.

I knew that if I could get one of my links to the top of Reddit Politics, I would have a pretty good chance of making the idea spread, so I set that as my goal: Get to the top of Reddit Politics within 24 hours.

What I did next was simple and cheap. From my own personal reddit account (Probably should have used a fake account or someone elseâ... s), I posted a link to our Washington Times story on Reddit Politics.

Then I went to Fiverr.com and bought every UpVote package that was offered. Total cost: \$35. Two hours later I came back to check the results. We were number one with over 500 comments already.

We had media lists built of every journalist and writer in politics and began blasting them with â... anonymousâ... tips from fake email addresses.

Here are some of the â... tipsâ... we sent out.

We sent these types of emails out to over 20,000 media contacts from 6 different email accounts.

The media requests began to pour in like weâ... ve never seen before. We had so many requests coming in it was challenging to respond to them all. *That is a great, great problem to have.*

[Vice](#), [Al Jazeera](#), [US News](#), even [Anonymous](#) wrote about the idea, and every time we got a new media hit, we followed the same process on Reddit. Post the link to various Reddit threads and then go on Fiverr and buy UpVotes to make sure we got to the top. In just the first few days, we had over 50 media outlets covering our story.

As the idea continued to spread like wildfire, our website began to crash. In 3 days alone, we had received over 2 million hits to the website, but most importantly, we had had over 4,000 volunteers sign up.

Keeping it Going

To keep our momentum going, we sent out this urgent request to those volunteers, pleading for their support to spread our idea. We turned our 4,000 supporters into a media pitching machine.

Hereâ... s the email we sent out:

Another wave of media requests came in from this push and we just kept up with the same process: Post on Reddit, buy UpVotes, repeat.

Conclusion

In less than a few days we had generated over 5,000,000 media impressions and received over 6 million website hits. Total cost? \$255 from Fiverr.com.

This gave the campaign the boost we needed and it was all the direct result of one thing: *hustle* . This was not a clear cut path and there was no how-to guide. It was really just making it up as we went.

While this might not work with every idea, I wanted to pass on a framework that others can use to execute similar strategies. Regardless of industry, Reddit can be a very powerful tool for businesses because every industry has their own Sub-Reddit, and sometimes several. This is where journalists often go to see what people are talking about. If you can get seen on Reddit, it can position you to get media requests instead of emailing journalists and asking them to cover you.

With 32 clients, these are the types of things we do several times a day now and weâ... re going to begin publishing articles like this to outline what we are doing thatâ... s working so others can do the same. Hope you enjoy!

Bill Will Force Politicians to Wear Body Cameras to Stop Corruption - This is the Only Solution That Will Work

A revolutionary bill will force all elected officials to wear body cameras while conducting public business to directly combat corruption.

By [Matt Agorist](#)

Rockford, IL â... Transparency among US politicians is all but non-existent in modern day America. It seems that every piece of information the citizens wish to obtain from the state must come through begging the government in the form of a Freedom of Information Act request. Many times, these requests are denied and the citizens remain in the dark despite political crimes. However, a new bill out of Illinois is seeking to shift

that paradigm of unaccountable lawmakers by forcing them to wear body cameras while conducting public business.

Rep. John Cabello, R-Machesney Park, has proposed a revolutionary bill that would require all elected officials in Illinois to wear a body camera if they are working. Cabello's intent behind the bill is to mitigate the rampant corruption currently plaguing Illinois politics.

We see the dealings going on in Chicago with some of the wiretaps and some of the corruption that's been going on for decades," Cabello said. "We hear of the state lawmakers that get themselves into trouble with bribes and so on and so forth. So, I just thought that since the state was looking at making all police officers wear body cameras, I figured this might be a good way to have records of what lawmakers are doing."

The bill, [HB3447](#) will treat the body camera videos in the same way police use them. The legislation allows the recordings to be used as evidence in any administrative, judicial, legislative, or disciplinary proceeding.

The bill also notes that if anyone finds "by a preponderance of the evidence that a recording was intentionally not captured, destroyed, altered, or intermittently captured in violation of the Act, then the court or other finder of fact shall consider or be instructed to consider that violation in weighing the evidence, unless the State provides a reasonable justification."

The measure is extensive and would cover all elected officials in the state, including county officials as well as those in state office.

"If they want to be an elected official, they should be following the law," Cabello said. "If they don't want to, I think they ultimately shouldn't be an elected official. We would find ways of being able to remove them."

Naturally, Cabello has critics who are calling the bill a charade and claim that it would cost the state too much money. But if it stopped the rampant looting of the people by their elected officials, this could end up saving tons of money in the future. Also, it's what already happens with cops.

Cabello, who was a former Rockford police officer, explained that it's really no different than police officers.

It's going to be the same as what law enforcement will have to do," he said. "There's not going to be one person going through all of the recordings. It's more of if someone makes an allegation or a complaint, you'll at least have some footage to go through."

Unfortunately, because the corruption is so rife within the state... and all other states, for that matter... Cabello expects that most lawmakers will vote it down. After all, why on Earth would criminals vote to hold themselves accountable?

I think there will be some elected officials that will support it but I doubt it's even going to get a committee hearing in Springfield," Cabello said. "The majority party, they won't want to hear this. I can't see (House Speaker Mike) Madigan letting this see the light of day."

Still, the idea has merit, Cabello said, according to [Rockford Register Star](#).

It's time we start getting public trust back for the elected officials and the only way that's going to happen is we have to root out the corruption," he said.

We agree, and it should go much further. This measure should be implemented nationwide, starting with the federal government. And, all the footage should be available for the public to see. After all the politicians have on body cameras, we then need them to be required to wear the logo of any entity which has given them money. Just like NASCAR drivers do, the more money they get, the bigger the logo theyâ€¦ d have to wear. One can dream.

CASE EFFECTIVENESS:

First, we established â... FOR THE FIRST TIME IN LEGAL HISTORY â... that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See Case One, 118 F. Supp. 3d 38, 78â... 79 (D.D.C. 2015). Second, we prevailed in the United States Court of Appeals for the District of Columbia Circuit on our appeal of the district courtâ... s ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See Case Two, 857 F.3d 379 (D.C. Cir. 2017). The D.C. Circuit agreed with us that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that DOE is now reconsidering the ATVM application under Federal Court order and we are using GAO, FBI and Congressional oversight offices to assure effective ethics and transparency. Third, we placed, on permanent public record, one of the most detailed documentation sets, ever assembled, about how modern political "Dark Money" conduits operate. This prevents the use of those kinds of criminal efforts, in the future, by exposing the tactics to the public. Fourth, Our Team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers. Fifth, and most important, we put every corrupt political scheme on notice that they WILL be found out and interdicted!

Parents Blame Another Elementary School's Cell Tower After 4th Student Diagnosed With Cancer

By [Jennifer McGraw](#)

Filed Under: [Cell Tower](#), [childhood cancer](#), [san joaquin county](#), [Turlock News](#)

RIPON (CBS13) â A fourth child has been diagnosed with cancer at a San Joaquin County elementary school, and parents believe itâs because of radiation caused by a cell phone tower.

The towers are spread throughout the community, but itâs this particular one that parents say needs to go.

â We had a doctor tell us that itâs 100 percent environmental, the kind of tumor that he has,â said Monica Ferrulli.

Her son Mason was the second child to be diagnosed with cancer in just three years at Weston Elementary. He was 10-years-old and walked by this cell phone tower daily.

â Itâs indescribable, itâs really tough,â she said.

â Itâs one of the hardest things that Iâve been through,â said Joe Prime.

WATCH: [Caught On Camera: Mom Holds Down 13-Year-Old, Urges Daughter To Fight](#)

Primeâs son Kyle was the first, diagnosed with kidney cancer in 2016. And two more kids were diagnosed this year.

â It just seems like coincidence is no longer a reason for all this illness,â Prime said.

They believe itâs this cell phone tower thatâs harming their kids.

â Kids shouldnât be guinea pigs and we shouldnât be taking chances with the childrenâs lives,â Prime said.

The district has had several tests done saying the tower is safe and meets federal regulations. But some families werenât convinced and hired an expert.

â I wouldnât send my kids there at all, it absolutely is dangerous,â said Eric Windheim, an electromagnetic radiation specialist. â Children are still developing and their cells are still being divided. Itâs the worst possible time in their life to be exposed.â

He says itâs not just a cell tower, it also transmits wireless frequencies.

ALSO: [Study: Smoking While Pregnant Doubles Risk Of Sudden Death For Babies](#)

â Instead of only going 300 yards like regular Wi-Fi, Y-Max can go 30 miles,â he said.

Parents want the mast removed, but the district wonât budge. Parents say the district gets a kickback of \$2,000 a month to have the tower for a telephone company, but the district so far has not commented.

It's a real disappointment that it's taking moms of sick children and dads of sick children to come out and say something needs to be done," Prime said.

Ferrulli's son Mason has also since relapsed and is undergoing brain cancer treatments while a fourth child from has recently been diagnosed and taken out of school.

They say it's not just a battle now for their children, but a fight these parents say they won't give up.

There's a lot of kids that we love that still go to the school, so we are fighting for them," Ferrulli said.

The district sent out a letter to parents saying that the electric magnetic frequencies are far below federal standards and have completed a thorough investigation and do not have any plans of removing the cell phone tower on campus.

CITIZEN SLEUTHS ANNOUNCE THEY HAVE CAUGHT DB COOPER

DB Cooper Sleuths Tout New Evidence on Infamous Hijacking

[BRITAIN EAKIN](#)

National-security attorney Mark Zaid (left) and D.B. Cooper investigator Thomas Colbert stand outside FBI headquarters in Washington on Feb. 1 to announce a breakthrough in their investigation. (BRITAIN EAKIN, Courthouse News Service)

WASHINGTON (CN) â€¦ Triggering a collective of citizen sleuths known as Cooperites to circle the wagons, a team of private investigators says their code-breaker has definitively identified the man who hijacked a commercial plane in 1971 and parachuted off with a \$200,00 ransom, never to be seen again.

â€¦ Our criminal investigation is finished,â€¦ said Thomas Colbert, a journalist and film producer who assembled the 40-member team. â€¦ We have the man, we know who he is.â€¦

Gathered on Feb. 1 outside of FBI headquarters in Washington, the team said their decryption of several letters sent to newspapers in the days following the skyjacking confirm what they have believed for several years: that D.B. Cooper is Robert W. Rackstraw Sr., a Vietnam war veteran and former U.S. Army paratrooper now living near San Diego.

Rackstrawâ€™s name actually came up in the Cooper investigation in the 1970s, and the connection was spurred on in part by his oblique reply to a NBC News reporterâ€™s on-camera query. â€¦ Iâ€™m afraid of heights,â€¦ the former paratrooper replied with a smile. â€¦ Could have been. Could have been. I canâ€™t commit myself on something like that.â€¦

Colbert included the clip in a 2016 History Channel documentary of his earlier findings, but the Washington Post quoted D.B. Cooper authority Geoffrey Gray that year as saying Rackstraw was never a serious suspect.

Military ID photo of Robert Rackstraw from 1970. (National Archives and Records Administration)

Rackstraw has often denied that he is D.B. Cooper, but after Colbert's Feb. 1 announcement he questioned why he should have to.

There's no denial whatsoever, my dear, the 74-year-old Rackstraw said in a phone interview.

Of Colbert's investigative team, he added: Have them sign under the penalty of perjury that everything they stated was true.

Rackstraw's longtime attorney Dennis Roberts did not return a voice message seeking comment.

The FBI, which closed its investigation in 2016, has not announced plans to reopen the still-unsolved case.

CRACKING THE CODE

A 1971 artist's sketch provided by the FBI of the skyjacker known as Dan Cooper, or D.B. Cooper.

Though the name D.B. Cooper has taken on folk-hero status, it stems from a misidentification by the Associated Press in its initial reporting of the Nov. 24, 1971, hijacking of Northwest Orient Flight 305.

The Boeing 727 was taking off from Portland, Oregon, when a passenger who used the alias Dan Cooper passed a note to a flight attendant that demanded parachutes and \$200,000, saying he had a bomb.

When the aircraft landed as scheduled in Seattle, Cooper traded the passengers for the ransom, then directed the pilots to fly to Mexico.

The plane was flying at Cooper's requested 10,000 feet when he opened its rear staircase and parachuted out somewhere over the Pacific Northwest with the cash.

In the days following the hijacking, as the the largest manhunt in U.S. history turned up few leads, several newspapers received four mysterious letters. Only one was handwritten, but all are signed by D.B. Cooper.

Rick Sherwood, a code-breaker on Colbert's team, said the first letter, sent on Nov. 27, 1971, contains a hidden message taunting the FBI.

On his website, cold-case investigator Thomas Colbert includes this composite image to demonstrate handwriting parallels between D.B. Cooper and the sender of several taunting letters to newspapers in the days after the 1971 hijacking.

Composed of cutout words and letters, the scrap of paper says "Attention!" and "Thanks for Hospitality," followed by "Was In A Rut."

Per Sherwood, those words contain two secret messages, "CAN FBI CATCH ME" and "SWS." He said SWS stands for the Special Warfare School, where Rackstraw would have learned the secret coding contained in the letters.

As a veteran of the Army Security Agency, a precursor to the National Security Agency that specialized in signals intelligence, Sherwood is familiar with the school because it's where he learned the same coding.

During the Vietnam war, Sherwood served in the Army Security Agency's signal-tracing chopper program called Project Left Bank. He said Rackstraw served briefly in his unit, but that he did not know Rackstraw personally.

The cold-case team found Rackstraw's initials, RWR, and a reference to Rackstraw's CIA ties in the coded message of the second D.B. Cooper missive. This note was sent in handwritten block letters on Nov. 30, 1971.

A representative for the CIA declined to comment on whether Rackstraw had ties to the agency.

Colbert's team believes that D.B. Cooper sent the next letter on Dec. 1, 1971, to convey a message to his three accomplices.

Sherwood also said the initials for one of Rackstraw's training units, the National Guard Jump School, is found upon decoding the fourth letter.

The FBI produced the above D.B. Cooper letter as part of a request under the Freedom of Information Act by investigator Thomas Colbert and his attorney, Mark Zaid.

The FBI kept a fifth letter about Cooper under wraps for decades before Colbert and his national-security attorney Mark Zaid unearthed it last year with a successful challenge under the Freedom of Information Act. Sherwood said a random string of numbers and letters at the bottom of the letter contained a reference to the Army Security Agency, his hill-top unit and Rackstraw's first Vietnam unit.

Courthouse News went over Sherwood's decoding methodology in a phone interview on the condition that it remain confidential since it will form a key part of the next D.B. Cooper documentary Colbert is producing.

Sherwood did note, however, that military codes are not made to be broken. In order to crack one, you need to know something about the individual who created it. Because of that, as he worked on deciphering any hidden messages in the letters, he had Rackstraw in mind.

He emphasized that the chances are slim that he just saw something he wanted to see that pointed to Rackstraw.

"If he in fact did not do it, then I wouldn't have been able to match almost every word to his units," Sherwood said. "It would have never added up. Because I knew every unit and I was in those units."

SKEPTICS & THE BUREAU

Promotional material by the History Channel in advance of a 2016 documentary on D.B. Cooper by Thomas Colbert.

Other Cooperites have proved almost as reluctant as the FBI meanwhile to get on board with Colbert's team.

"I do not believe that any of the letters signed 'DB Cooper' are from the skyjacker, and Colbert does not offer substantial proof that any of them are," said Bruce Smith, a former investigative reporter who self-published a book on D.B. Cooper in 2016.

Colbert has maintained, however, that the fifth D.B. Cooper letter contains information that only the hijacker and the FBI would know.

For example, it says that Cooper left no fingerprints behind, and that he wore a toupee and putty makeup during the hijacking.

Though Smith waved off Colbert's findings as "quirky circumstantial evidence," he said the material might inch Cooperites closer to the truth.

"To me, the evidence points to someone from Vietnam with covert commando training, with a high likelihood that he was a former smokejumper, too," Smith said in an interview.

Colbert and his attorney Zaid also have a theory about why the FBI failed to act on more than 100 pieces of additional evidence they provided, including samples from a dig site where they believe they found pieces of Cooper's parachute along with part of the ransom money.

One of several composite sketches of D.B. Cooper. (FBI)

â... We do think now, having identified this individual, that the FBI is frankly embarrassed that they let him slip through their grasp back in the late â... 70s,â... attorney Zaid said during the Feb. 1 press conference.

The FBI put the D.B. Cooper investigation on the back burner in 2016, but public information officer Ayn Dietrich-Williams with the FBIâ... s Seattle Field Office said any physical items sent the bureau are reviewed and given an appropriate follow-up.

â... The FBI continues to receive tips from members of the public, but none to date have resulted in a definitive identification of the hijacker,â... Dietrich-Williams said in an email. â... The tips have conveyed plausible theories, descriptive information about individuals potentially matching the hijacker, and anecdotes â... to include accounts of sudden, unexplained wealth. In order to solve a case, the FBI must prove culpability beyond a reasonable doubt, and, unfortunately, none of the well-meaning tips or applications of new investigative technology have yielded the necessary proof.â...

Dietrich-Williams noted in another email that the FBI does not necessarily provide updates to tipsters, who may be unaware of any actions the agency takes based on information provided.

CORRUPTION WATCH LIST

Faces of the Facebook Corruption ([PDF](#))

Here is the cast of characters in *Leader v. Facebook*. We encourage you to report their corrupt activities to this site and others, like [Lawless America](#). Feel free to communicate anonymously in any way in which you are most comfortable. The attempt of these people and their organizations to corrupt American justice and commerce cannot be tolerated. Vigilance. We will expose them. See [Congressional Briefings](#) (currently being updated after Scribd censored the documents on Fri. Mar. 7, 2014).

A. Facebook's law firms:

1. **Fenwick & West LLP** (Facebook securities and patent law firm; former Leader Technologies counsel; attempted an appearance in *Leader v. Facebook*; did not seek conflicts waiver from Leader prior to representing Facebook)
2. **Cooley Godward LLP** (Facebook law firm in *Leader v. Facebook*; McBee Strategic energy stimulus partner; Obama Justice Dept. advisor; former employer to patent judges)
3. **Blank & Rome LLP** (Facebook law firm in *Leader v. Facebook*; former employer to patent judges)
4. **White & Case LLP** (Facebook law firm in *Leader v. Facebook*; undisclosed former employer to Patent Office Freedom of Information Act (FOIA) officer involved in *Leader v. Facebook*)
5. **Gibson Dunn LLP** (Facebook law firm in *Leader v. Facebook*; undisclosed counsel to the Federal Circuit; undisclosed protégé of Chief Justice John Roberts, Jr.; undisclosed former employer to Preetinder ("Preet") Bharara, U.S. Attorney currently persecuting Paul Ceglia in *U.S. v. Ceglia* (*Ceglia v. Zuckerberg*))
6. **Orrick Herrington LLP** (longtime Facebook law firm and destroyer of evidence for the cabal in *Winklevoss v. Zuckerberg* and *ConnectU v. Facebook*)
7. **Weil Gotshal LLP** (Federal Circuit counsel in *Leader v. Facebook*; Judge Kimberly A. Moore's undisclosed former client)
8. **Latham & Watkins LLP** (Facebook Director James W. Breyer's counsel; Judge Kimberly A. Moore's husband, Matthew J. Moore's new law firm)
9. **Federal Circuit Bar Association** ("FCBA") (Federal Circuit's bar association; second largest in the U.S.; Facebook's law firms exert much influence in its policy and activity, incl. Fenwick & West LLP, Gibson Dunn LLP, Orrick Herrington LLP, Weil Gotshal LLP; Facebook's large shareholder, Microsoft, is a director; Federal Circuit Clerk of Court Jan Horbaly is an officer; FCBA made an appearance in *Leader v. Facebook* to oppose the *amicus curiae* (friend of the court) motion of Dr. Lakshmi Arunachalam, former Director of Network Architecture at Sun Microsystems, in favor of Leader Technologies and objecting to the evident conflicts of interest within the court itself, her motion was denied, the judges refused to disclose their conflicts which we now know include Facebook and Microsoft stocks)
10. **DC Bar Association**
11. **Perkins Coie LLP** (Facebook's "rapid response enforcement team;" law firm for Obama's chief counsels, the husband and wife team of Robert F. Bauer and Anita B. Dunn; Bauer was identified on Aug. 1, 2013 as having directed the IRS targeting of the Tea Party)

12. **Stroz Friedberg** (Facebook's "forensic expert" who manipulated the data in *Paul Ceglia v. Mark Zuckerberg*, and who first revealed the existence of 28 Zuckerberg hard drives and Harvard emails that they told Leader Technologies in 2009 were "lost")
13. **Chandler Law Firm Chartered** (Professor James P. Chandler, III, principal; Leader Technologies patent counsel; adviser to IBM and David J. Kappos; adviser to Eric H. Holder, Jr. and the U.S. Department of Justice; author of the Economic Espionage Act of 1996 and the Federal Trade Secrets Act)

B. Facebook attorneys & cooperating judges:

14. **Gordon K. Davidson** (Fenwick; Facebook's securities and patent attorney; Leader Technologies' former attorney)
15. **Christopher P. King** (*aka* Christopher-Charles King *aka* Christopher King *aka* Christopher-Charles P. King, Fenwick & West LLP)
16. **Theodore B. Olson** (Gibson Dunn)
17. **Thomas G. Hungar** (Gibson Dunn)
18. **Eric H. Holder, Jr.** (Attorney General, U.S. Dept. of Justice)
19. **James Cole** (Deputy Attorney General, U.S. Dept. of Justice)
20. **Tony West** (Associate Attorney General, U.S. Dept. of Justice; 2008 Obama California Campaign Manager)
21. **Robert F. Bauer** (Obama Attorney; White House Chief Counsel; directed IRS targeting of the Tea Party; formerly and currently employed by Perkins Coie LLP, Facebook's "rapid response enforcement team;" spouse is Anita B. Dunn)
22. **Anita B. Dunn** (Obama Attorney; White House Chief Counsel; husband Robert F. Bauer directed IRS targeting of the Tea Party, formerly employed by Perkins Coie LLP, Facebook's "rapid response enforcement team")
23. **Mary L. Schapiro** (former Chairman, Securities & Exchange Commission (S.E.C.); holds investments in 51 Facebook Club basket funds)
24. **James "Jamie" Brigagliano** (former Deputy Director of the Division of Trading and Markets at the Securities and Exchange Commission; Mary L. Schapiro's chief lieutenant on "dark pool" rule making)
25. **Joseph P. Cutler** (Perkins Coie)
26. **David P. Chiappetta** (Perkins Coie)
27. **James R. McCullagh** (Perkins Coie)
28. **Ramsey M. Al-Salam** (Perkins Coie)
29. **Grant E. Kinsel** (Perkins Coie)
30. **Reeve T. Bull** (Gibson Dunn)
31. **Heidi Keefe** (Cooley)
32. **Michael G. Rhodes** (Cooley; Tesla Motors)
33. **Elizabeth Stameshkin** (Cooley)
34. **Donald K. Stern** (Cooley; Justice Dept. advisor)
35. **Mark R. Weinstein** (Cooley)
36. **Jeffrey Norberg** (Cooley)
37. **Ronald Lemieux** (Cooley)
38. **Craig W. Clark** (Blank Rome)
39. **Tom Amis** (Cooley / McBee Strategic)
40. **Erich Veitenheimer** (Cooley / McBee Strategic)
41. **Roel Campos** (Cooley; former Commissioner of the U.S. Securities & Exchange Commission at the time of the infamous Facebook 12(g) exemption)
42. **Lisa T. Simpson** (Orrick)
43. **Indra Neel Chatterjee** (Orrick)
44. **Samuel O'Rourke** (Facebook; Cooley-directed)
45. **Theodore W. Ulyot** (Facebook; Cooley-directed)

46. **Amber H. Rover**, aka **Amber L. Hagya** aka **Amber Hatfield** (Weil Gotshal LLP; Judge Kimberly A. Moore's former client)
47. **Edward R. Reines** (Weil Gotschal)
48. **Trish Harris** (DC Bar Association)
49. **Elizabeth A. Herman** (DC Bar Association)
50. **Elizabeth J. Branda** (DC Bar Association)
51. **David J. Kappos** (former Patent Office Director; former IBM chief intellectual property counsel; ordered unprecedented 3rd reexam of Leader Technologies' patent; Obama political appointee)
52. **Preetinder ("Preet") Bharara** (U.S. Attorney *Ceglia v. Zuckerberg*; formerly of Gibson & Dunn LLP; protects Zuckerberg)
53. **Thomas J. Kim** (SEC Chief Counsel)
54. **Anne Krauskopf** (SEC Special Sr. Counsel)
55. **John G. Roberts, Jr.** (Chief Justice, U.S. Supreme Court)
56. **Jan Horbaly** (Federal Circuit, Clerk of Court)
57. **Kimberly A. Moore** (Judge, Federal Circuit)
58. **Matthew J. Moore** (Latham & Watkins LLP; husband of Judge Kimberly A. Moore)
59. **Kathryn "Kathy" Ruemmler** (Latham & Watkins LLP; White House counsel)
60. **Evan J. Wallach** (Judge, Federal Circuit)
61. **Alan D. Lourie** (Judge, Federal Circuit)
62. **Randall R. Rader** (Chief Judge, Federal Circuit)
63. **Terence P. Stewart** (Federal Circuit Bar Association)
64. **Leonard P. Stark** (Judge, Delaware U.S. District Court)
65. **Richard J. Arcara** (Judge, N.Y. Western District, *Ceglia v. Holder et al*)
66. **Allen R. MacDonald** (Administrative Judge, U.S. Patent Office)
67. **Stephen C. Siu** (Administrative Judge, U.S. Patent Office)
68. **Meredith C. Petravick** (Administrative Judge, U.S. Patent Office)
69. **James T. Moore** (Administrative Judge, U.S. Patent Office)
70. **Pinchus M. Laufer** (Sr. Counsel, Patent Trial and Appeal Board, PTAB)
71. **Kimberly Jordan** (Counsel, Patent Trial and Appeal Board, PTAB)
72. **Daniel J. Ryman** (Counsel, Patent Trial and Appeal Board, PTAB)
73. **William J. Stoffel** (Counsel, Patent Trial and Appeal Board, PTAB)
74. **James C. Payne** (Counsel, Patent Trial and Appeal Board, PTAB)
75. **Deandra M. Hughes** (Examiner, *Leader v. Facebook* reexamination)
76. **Kathryn Walsh Siehndel** (FOIA Counsel, U.S. Patent Office - bio and conflicts log concealed)
77. **Dennis C. Blair** (Director, U.S. National Intelligence)
78. **Dennis F. Saylor, IV** (Judge, Foreign Intelligence Surveillance Court, FISA)
79. **James E. Boasberg** (Judge, Foreign Intelligence Surveillance Court, FISA)
80. **James P. Chandler, III** (President, National Intellectual Property Law Institute, NIPLI; The Chandler Law Firm Chartered; advisor to Asst. Att'y Gen. Eric H. Holder, Jr., Dept. of Justice; Member, National Infrastructure Assurance Commission, NIAC; advisor to Federal Circuit Chief Judge Randall R. Rader; advisor to Sen. Orrin Hatch; author, The Federal Trade Secrets Act and the Economic Espionage Act of 1996; Leader Technologies' legal counsel, along with Fenwick & West LLP)

C. Facebook puppet masters:

81. **President Barack Obama** (appointed Leonard P. Stark to the judge's seat in Delaware Federal District Court eight days after Stark's court allowed Facebook to get away with jury and court manipulation of an on-sale bar verdict which was attained without a single piece of hard evidence; Barack and Michelle Obama were evidently protecting their 47 million "likes" on Facebook)
82. **Lawrence "Larry" Summers** (Harvard President who aided Zuckerberg's light-speed rise to prominence with unprecedented *Harvard Crimson* coverage; Obama bailout chief; Clinton Treasury Secretary; World Bank Chief Economist; "Special Advisor" to Marc Andreessen in [Instagram](#);

- co-creator of the current Russian robber baron economy; close 20-year relationships with protÃ©gÃ©s Sheryl Sandberg & Yuri Milner; aided in recommendations that *created* the Russian robber baron economyâ... and Yuri Milner/DST/Asmanov's money used to purchase Facebook stock)
83. **James W. Breyer, Accel Partners LLP**; Facebook director; client of Fenwick & West LLP since the 1990's; apparently received technology from other Fenwick clients that was shuffled to Zuckerberg, incl. Leader Technologies' inventions)
 84. **David Plouffe**; directed Obama's 2008 and 2012 campaigns; a self-described "statistics nerd;" likely directed the activities of the Facebook Club; employed Robert F. Bauer, Perkins Coii LLP in 2000 at the Democratic Congressional Campaign Committee
 85. **McBee Strategic** (one of the main "private" arms responsible for dolling out the billions in Obama "green energy" stimulus funds; partnered with Cooley Godward LLP)
 86. **Mike Sheehy** (Cooley-McBee Strategic principal; former National Security Adviser to House Speaker Nancy Pelosi)
 87. **Nancy Pelosi** (U.S. Congresswoman; appears to be running political cover in the House for Facebook, McBee Strategic, Cooley Godward, Fenwick & West, Breyers, etc.)
 88. **Harry Reid** (U.S. Senator; Judge Evan J. Wallach patron)
 89. **Thomas J. Kim** (SEC, Chief Counsel & Assoc. Director) approved Facebook's 500-shareholder exemption on Oct. 14, 2007, one day after it was submitted by Fenwick & West LLP; Facebook used this exemption to sell \$3 billion insider stock to the Russians Alisher Asmanov, Yuri Milner, DST, Digital Sky, Mail.ru which pumped Facebook's pre-IPO valuation to \$100 billion; another Harvard grad, Kim worked at Latham & Watkins LLP which was the chief lobbyist for the National Venture Capital Association in 2002-2004 whose Chairman was . . . James W. Beyer, Accel Partners LLP; in other words Breyer and Kim, both Harvard grads, were associated at the time of the Zuckerberg hacking and theft of Leader Technologies' software code)
 90. **Ping Li** (Accel Partners, Zuckerberg handler)
 91. **Jim Swartz** (Accel Partners; Zuckerberg handler)
 92. **Sheryl K. Sandberg** (Facebook, Summers protÃ©gÃ©; Facebook director)
 93. **Yuri Milner** (DST aka Digital Sky, Summers protÃ©gÃ©; former [Bank Menatep](#) executive; Facebook director)
 94. **Alisher Asmanov** (DST aka Digital Sky; Goldman Sachs Moscow partner; [Russian oligarch](#); Friend of the Kremlin; Became the Richest Man in Russia after the Facebook IPO)
 95. **Marc L. Andreessen** (Zuckerberg coach; client of Fenwick & West LLP and Christopher P. King *aka* Christopher-Charles King *aka* Christopher King *aka* Christopher-Charles P. King; Summers' sponsor during [Instagram-scam](#); Facebook director)
 96. **Peter Thiel** (19-year old Zuckerberg coach; PayPal; Facebook director; CEO, Clarion Capital)
 97. **Clarion Capital** (Peter Thiel)
 98. **Reid G. Hoffman** (19-year old Zuckerberg coach; PayPal; LinkedIn; Facebook director)
 99. **Richard Wolpert** (Accel Partners)
 100. **Robert Ketterson** (Fidelity Ventures; Fidelity Equity Partners; Fidelity Ventures Telecommunications & Technology)
 101. **David Kilpatrick** (*Business Insider*; "The Facebook Effect"; PR cleanse-meister re. Facebook origins)
 102. **Zynga/Groupon/LinkedIn/Square/Instagram** ("Facebook Money/Credits/Bitcoin" feeder companies)
 103. **Tesla Motors** (received \$465 million in Obama stimulus funds and hired Cooley's Michael Rhodes in the seven months before the *Leader v. Facebook* trial, just before veteran Judge Joseph Farnan made the surprise announcement of his retirement, just six days after Facebook's disastrous *Markman* Hearing)
 104. **Solyndra** (received \$535 million in Obama stimulus at the recommendation of the Cooley-McBee Strategic "consulting" alliance)
 105. **BrightSource** (received \$1.6 billion in Obama stimulus at the recommendation of the Cooley-McBee Strategic "consulting" alliance)

106. **John P. Breyer** (father of James W. Breyer; founder of IDG Capital Partners - China; coached his son on exploiting Western markets while he quietly built a venture capital business in China for the last 20 years; the real brain behind the Breyer exploitations)
107. **IDG Capital Partners (China)**(founded by John P. Breyer, the father of James W. Breyer, Accel Partners; the current launderer of the tens of billions James W has fleeced from the U.S. market from the bailout, stimulus and the "pump & dump" Facebook IPO schemes)
108. **Goldman Sachs** (received US bailout funds; then invested with DST in Facebook private stock via Moscow; took Facebook public; *locked out* American investors from investing)
109. **Morgan Stanley** (received US bailout funds; took Facebook public; probably participated in overseas purchases of Facebook private stock before IPO)
110. **State Street Corporation** (received U.S. taxpayer bailout monies along with Goldman Sachs and Morgan Stanley; consolidating control of ATM banking networks internationally)
111. **JP Morgan Chase** (received U.S. taxpayer bailout monies along with Goldman Sachs, Morgan Stanley and State Street Corporation)
112. **Lloyd Blankfein** (Goldman Sachs, CEO)
113. **Jamie Dimon** (JP MorganChase, CEO)
114. **Steve Cutler** (JP MorganChase, General Counsel)
115. **Rodgin Cohen** (JP MorganChase, Outside Counsel; Sullivan Cromwell, LLP)
116. **U.S. Securities & Exchange Commission** (granted Fenwick & West's application on behalf of Facebook for an unprecedented exemption to the 500 shareholder rule; opened the floodgates for Goldman Sachs and Morgan Stanley to make a private market in Facebook pre-IPO insider stock; facilitated the influx of billions of dollars from "dubious" sources associated with Russian oligarchs, Alisher Asmanov and Yuri Milner, and the Kremlin; Goldman Sachs is a partner with this Moscow company, Digital Sky Technologies, aka DST, aka Mail.ru)
117. **Jeff Markey** (McBee Strategic LLC; allied with Facebook's Cooley Godward Kronish LLP to arrange Obama's green energy funding; arranged \$1.6 billion for failed BrightSource and \$535 million for failed Solyndra)
118. **Steve McBee** (McBee Strategic LLC; allied with Facebook's Cooley Godward Kronish LLP to arrange Obama's green energy funding; arranged \$1.6 billion for failed BrightSource and \$535 million for failed Solyndra)
119. **Michael F. McGowan** (Stroz Friedberg; Facebook forensic expert who lied about his knowledge of the contents of the 28 Zuckerberg hard drives and Harvard Email accounts)
120. **Bryan J. Rose** (Stroz Friedberg; Facebook forensic expert who lied about his knowledge of the contents of the 28 Zuckerberg hard drives and Harvard Email accounts)
121. **Dr. Saul Greenberg** (Facebook's expert witness from the University of Calgary; disingenuously waived his hands and [said he would be "wild guessing" about the purpose of a Java "sessionstate" import statement](#) (even Java newbies know it is used for tracking a user while in a web session); in short, Dr. Greenberg lied to the jury, thus discrediting his testimony)
122. **Toni Townes-Whitley** (CGI Federal; Michelle Obama's 1985 Princeton classmate; CGI "donated" \$47 million to the Obama campaign; CGI won the no-bid contract to build the www.healthcare.gov Obamacare website; CGI shut off the security features on Obama's reelection donation sites to increase donations)
123. **CGI Federal** (US division of a Canadian company; Donated \$47 million to Obama's reelection, then received the no-bid contract to build the ill-fated Obamacare website; Michelle Obama's Princeton classmate, Toni Townes-Whitley, is a Senior Vice President of CGI; the website is replete with social features and links to Facebook)
124. **Kathleen Sebelius** (Obama's Secretary of Health & Human Services since 2009 responsible for \$678 million Obamacare implementation; made the decision to hire CGI Federal on a no-bid contract despite the evident conflict of interest with Michelle Obama and \$47 million in Obama campaign donations by CGI; the website is replete with social features and links to Facebook)
125. **Todd Y. Park** (White House Chief Technology Officer (CTO); former CTO for Health & Human Services; chief architect of HealthCare.gov; founder, director, CEO, Athenahealth, Inc.; founder,

director, CEO, Castlight Health, Inc.)

126. **Frank M. Sands, Sr. / Frank M. Sands, Jr.** (Founder and CEO, respectively, of Sands Capital Management LLC; failed to file S.E.C. Form SC 13G acquisition reports for Athenahealth, Inc., Baidu, Inc. (ADR) and Facebook stock during 2012; masked the association of Todd Y. Park with Athenahealth, Inc. and Baidu, Inc., and the association of both of those companies with the Facebook IPO fraud)
127. **Robin "Handsome Reward" Yangong Li** (CEO, Baidu, Inc. (ADR); appointed Jan. 2004, the same month that Mark Zuckerberg obtained Leader Technologies' social networking source code to start Facebook; **Robin Y. Li** is very likely associated with John P. and James W. Breyer through their Chinese entities, including IDG Capital Partners, IDG-Accel and other variants; Li appointed a junior attorney from Fenwick & West LLP, Palo Alto/Mountain View, namely Parker Zhang, to be his "Head of Patents;" Fenwick & West LLP represented both Leader Technologies, Inc. and Accel Partners LLC in 2002-2003 and had Leader's source code in their files.)
128. **Parker Zhang** ("Head of Patents" at Baidu, Inc. (ADR), appointed in approx. May 2012; formerly a junior Associate attorney at Fenwick & West LLP; graduate from Michigan Law in 2005)
129. **Penny S. Pritzker** (Secretary, Department of Commerce; replaced Rebecca M. Blank; holds over \$24 million in Facebook "dark pools" stock, most notably in Goldman Sachs, Morgan Stanley and JPMorgan)
130. **Rebecca M. Blank** (Secretary, Department of Commerce; oversaw the dubious *Leader v. Facebook* activities of the Patent Office Director, David J. Kappos, who held over one million dollars in Facebook "dark pools" during the *Leader v. Facebook* proceedings; Kappos purchased this stock within weeks of his surprise recess appointment by President Obama; Kappos also was formerly employed by IBM, who sold Facebook 750 patents during the *Leader v. Facebook* proceedings; right before leaving the Patent Office, Kappos also ordered an unprecedented 3rd reexamination of Leader's patent without even identifying claims)
131. **Mary L. Schapiro** (Chairman, Securities & Exchange Commission; holds 51 Facebook "dark pools" stocks which held stock in Facebook, Baidu and more than a dozen Facebook crony companies; failed to regulate the "dark pools;" failed to disclose her substantial conflict of interest in regulating the run up to the Facebook IPO)
132. **Robert C. Hancock** (Chief Compliance Officer, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athenahealth, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park, who was appointed by President Obama to be the U.S. Chief Technology Officer during this same period; Todd Y. Park is/has been founder, director and CEO of both Athenahealth and Castlight Health; Todd Y. Park deeply embedded the software from Athenahealth and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics)
133. **Jonathan Goodman** (Chief Counsel, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athenahealth, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park, who was appointed by President Obama to be the U.S. Chief Technology Officer during this same period; Todd Y. Park is/has been founder, director and CEO of both Athenahealth and Castlight Health; Todd Y. Park deeply embedded the software from Athenahealth and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics; Goodman was formerly employed by Gibson Dunn LLP, Facebook appeals counsel in *Leader v. Facebook*)
134. **Trip Adler** ("Co-Founder" of Scribd; Harvard contemporaries of Mark Zuckerberg with a dubious origins story, like Zuckerberg's; Scribd held AFI documents for two years, then summarily deleted the entire library without warning on Fri. Type any name or subject in the Google search at the top of this webpage. That will show you any relevant links within the sites that we have been following and investigating in the *Leader v. Facebook* case. Vigilance everyone! Our American Republic is at risk.

HOW TO FILE A FRAUD COMPLAINT AGAINST A UNIVERSITY

The following universities were announced as participants in Ohio State Provost Joseph A. Steinmetz's corrupt MOOC education initiative named "University Innovation Alliance" (UIA). We have identified the instructions and online forms you need to file a complaint with the participants. MOOC stands for "Massive Open Online Course."

You should complain about:

- (1) the intellectual property theft of social networking source code from Leader Technologies, Columbus, Ohio that is the software engine running the UIA;
- (2) the corruption at Ohio State University and OSU's collusion with Battelle Memorial Institute which helped steal the software being used by UIA; and
- (3) the mistreatment of OSU Marching Band Director Jon Waters regarding fabricated Title IX charges that were used to pave the way for Steinmetz to announce UIA.

Universities pride themselves on protection of intellectual property.

Therefore, these universities cannot participate in this abuse of inventor copyrights, patents and trade secrets by The Ohio State Trustees and Administration. If these universities participate knowingly with Ohio State in its theft of intellectual property, then they are aiding and abetting the theft of intellectual property on a "massive" scale... Massive Open Online Course (MOOC) also known as The Eclipse Foundation.

Congress sold you out to ISPs, and now you must turn your computer into web center and become an ISP

[168](#)

They betrayed you for chump change

by [T.C. Sottek](#)

- [SHARE](#)
- [TWEET](#)
- [LINKEDIN](#)

Republicans in Congress [just voted to reverse a landmark FCC privacy rule](#) that opens the door for ISPs to sell customer data. Lawmakers provided no credible reason for this being in the interest of Americans, except for vague platitudes about “... consumer choice...” and “... free markets,”... as if consumers at the mercy of their local internet monopoly are craving to have their web history quietly sold to marketers and any other third party willing to pay.

The only people who seem to want this are the people who are going to make lots of money from it. (Hint: they work for companies like Comcast, Verizon, and AT&T.) Incidentally, these people and their companies routinely give lots of money to members of Congress.

So here is a list of the lawmakers who voted to betray you, and how much money they received from the telecom industry in their most recent election cycle.

Got a tip for us? [Use SecureDrop or Signal](#) to securely send messages and files to *The Verge* without revealing your identity.

Note on the data below: donations include contributions from corporations in the telecom industry and employees of those corporations (individual and non-individual contributions). The largest donors tend to be corporations which contributed funds to the candidate and /or the candidate’s leadership organization (PAC). All figures only reflect donations tallied for the candidate’s most recent election – many have received total sums much larger than the figure reflected over the course of their career in Congress. Figures are from federal election data [compiled by the National Institute on Money in State Politics](#) ([www.followthemoney.org](#)).

Additionally, it’s important to note that the communications industry is one of the largest lobbying groups in US history; internet providers and the telephone companies before them are notorious for [spreading wealth across the aisle](#). Regardless, one party seems more responsive to the industry’s demands.

US SENATE

Counter-Measures For Mass Digital Political Election Manipulation

By SAC-INFO-DEFCON

Google, Twitter, Facebook, Amazon, Linkedin, Uber, Alphabet, RT, The Russian FSB, The Korean Hack Team, The Agency, Gawker Media, Fusion GPS, Cambridge Analytica and 420 other organizations have one thing in common: ***They use psychological tricks to manipulate political election outcomes for the benefit of their oligarch owners.***

The majority of U.S. mass digital manipulation companies work for the Democratic National Committee (DNC) interests because those companies use Silicon Valley technology assets.

Silicon Valley took advantage of its monopoly ownership of networking routes and servers and combined this with epic crony payola deals starting with the Clinton Administration.

The Clinton Administration promised Silicon Valley's Schmidt, Musk, Page, Bezos, Zuckerberg, Perkins, Doerr, Westley, et al; exclusive tax waivers, beneficial laws, green energy contracts, free government grants and loans, preferred rights, revolving door careers and other kick-backs in exchange for putting DNC candidates in office using *psychological tricks to manipulate political election outcomes for the benefit of their oligarch owners.*

This obviously spun quickly out of control for the newbie Silicon Valley lobbyists.

Today we have a situation where Silicon Valley has created a cult-like devotion to digital election rigging that Silicon Valley is incapable of halting or reducing.

Once you have monopolistic control of all of the money on Earth, why would you stop?

Silicon Valley reaches over six billion people every minute. Do the math. If they can get just fifty cents from those billions of people every hour, the numbers soon become audacious.

Even on a bad day, Silicon Valley bosses receive enough money to be able to afford to fly in a different one of the most beautiful prostitutes from each country in the world each night. They receive enough money every day to fly to Aspen for breakfast and Paris for dinner on their private jets. They get enough money every day to bribe every Senator in California every week.

They live the most insane and extremist life-styles of the most outlandish Hollywood Daddy Warbucks incarnations you can imagine. Why would they stop? What possible motivation would they have but to go as far as they can just to see how much power they can amass?

They will lie, cheat and destroy documents to protect their schemes. They will issue a thousand ***"...oops, we got caught on that one...we will do better next time.."*** apologies but they will change nothing...EVER!

Google and its many sneaky divisions spends more money in a day than most governments spend in a year. Google and Apple have more money than most States in America. They are private governments.

They will NEVER change. They will LIE at every Congressional and EU hearing they are summoned to. They are like crack heads lying to get their fix.

While we could provide you with millions of pages of psychological studies and CIA statistical reports, by now you should know what subliminal messaging is.

The fact is: **NOTHING WILL STOP the *use of psychological tricks to manipulate political election outcomes for the benefit of their oligarch owners except the bankruptcy and shut-down of those companies.***

These companies are liars and manipulators. How can anyone expect an addicted manipulator to not manipulate.

Government hearings who buy into the false apologies and lies of Google and Facebook are as stupid as the voters who fall for their tricks.

Government agencies must shut-down Google, Twitter, Facebook, Amazon, Linkedin, Alphabet and those they exist to rig our government!

That is the only answer that can work!

DEMAND THAT THE FOR-THE-PEOPLE ACT BE PASSED BY CONGRESS TO END THIS CORRUPTION

By

[Chiraag Bains,](#)
[Inequality.org](#)

The 2020 election is shaping up to be the most expensive in American history. Ten years after *Citizens United*, our elections are awash with the money of mega-donors and corporations that drown out the voices of everyday Americans â€¦ with serious consequences for racial and economic justice.

An antidote is sitting on Mitch McConnellâ€™s desk, having passed the House a year ago and still not been put up for a vote in the Senate. H.R. 1, the For the People Act, would blunt the distorting influence of big money in politics. It could transform who runs for office, who wins, and what issues get prioritized in Congress.

Elections have become extravagantly costly. In 2016, campaign spending by or in support of Donald Trump and Hillary Clinton totaled [\\$2.4 billion](#). The average [Senate winner in 2018](#) spent \$15.7 million, with challengers needing on average \$23.8 million to topple incumbents. Even local election costs can be forbidding. Spending in the Los Angeles County school board primary last month [topped \\$6 million](#).

Although occasionally a candidate like Bernie Sanders has strong enough national appeal to raise the money to compete from a broad network of small donors, thatâ€™s the exception. [The vast majority](#) have to rely on a class of large donors to be viable.

Less than 1 percent of the population provides the majority of campaign funds. Indeed, [just 25 people pumped over \\$600 million](#) into the 2016 federal elections.

That donor class looks nothing like America. The compounding of historical racial subordination and ongoing discrimination has given us an economy in which the [Forbes 400 billionaires](#) have as much wealth as the entire Black population and a quarter of the Latino population combined. Today, the top 1 percent are [more than 90 percent white](#); the top 10 percent are 85-90 percent white. These are the groups that dominate political giving in America.

DÃ mosâ... s analysis of campaign finance records [bears this out](#). Ninety-two percent of federal election donors in 2014 and 91 percent of donors in 2012 were white. The numbers are even more skewed among large donors. Ninety-four percent of those giving more than \$5,000 in 2014 and 93 percent in 2012 were white.

Whatâ... s the consequence of a political system dependent on an overwhelmingly white donor class? The perpetuation of racial inequality.

First, the big money system is a barrier to entry for Black and brown candidates. Studies show theyâ... re less likely to have networks of rich friends and business associates, making it difficult for them to survive the [wealth primary](#), where donors filter the candidate pool before a single vote is cast. When candidates of color do run, they raise on average [47 percent less than their white counterparts](#). White candidates are also far more likely to be in a position to self-fund their campaigns. This is a big reason [90 percent of our elected officials are white](#), even though 37 percent of us are people of color.

Second, the policy preferences of the donor class are far out of step with those of the general public, and particularly of people of color.

On economic policy, for example, polls show that people of color support [the role of government in reducing inequality](#) at significantly higher rates (67 percent) than do people earning over \$100,000 a year (53 percent). People of color are also more likely to list [job creation](#) and [affordable college](#) as their economic priorities, whereas the wealthy are more likely to cite lower taxes and deficit reduction.

The challenge is that the Supreme Court has invalidated commonsense campaign finance protections time and again. It has struck down reasonable contribution limits and restrictions on self-financing, allowed the rise of SuperPACs, and greenlit wealthy individuals pumping millions into the system.

H.R. 1 contains innovative programs that would stay within the lines drawn by the Court and still curb the harmful influence of big money.

The most significant is a public financing system for congressional candidates that would match small-donor contributions â... those under \$200 â... at a rate of 6:1. In this way, a \$20 donation would become \$140, a \$200 donation \$1,400. The cost of the program is reasonable â... one estimate is \$3 billion over 10 years, or [\\$1 per citizen](#) per year. The bill also creates a pilot program of \$25 â... My Choiceâ... vouchers for people to give to congressional candidates they support.

These programs would amplify the voices of people currently being drowned out by big money. It would offer a path for congressional and presidential candidates to rely on donations from everyday people, not wealthy donors. Similar public financing programs in [New York City](#) and [Arizona](#) and a voucher program in [Seattle](#) have diversified the donor pool and allowed more candidates of color to run. These programs can help produce more equitable public policy. For example, the advent of public financing in [Connecticut](#) was crucial to breaking a legislative logjam and becoming the first state in the nation to guarantee paid sick leave.

Countering the undue influence of big money in our elections is a civil rights issue. H.R. 1, the For the People Act, would be a giant step forward. The American people should demand that it become law. It would end the Solyndra and Tesla dirty payola programs that are destroying America!

An entire generation is losing faith in American capitalism. Widening inequality and declining mobility have led to an erosion of trust in the system. In a 2018 Gallup survey, only 45 percent of young adults said they supported capitalism. Fifty-one percent supported socialism.

These numbers are stark, and so are the failures that underlie them, but history suggests that the failures can be addressed. Inequality has been high before, and American society found ways to reduce it; opportunity, too, can be widened by smart public choices. Fixing the system will not be easy, but we have the tools we need, if we can find the political will to use them.

Capitalism faces another threat, however, and it may prove more fundamental: Americansâ... growing reliance on technologiesâ... smartphones, social media, gaming consoles, shopping sitesâ... that have become predatory and are quickly becoming more so. These gadgets and platforms have been integrated into nearly everything we do. Reaching for your phone to read a text, peruse your Instagram feed, or play a round of Candy Crush has become second nature, an involuntary response to even the shortest bout of boredom. This relianceâ... *addiction* is a better word for itâ... is undermining basic tenets of the American economic model.

In a well-functioning market, consumers have the freedom to act in their own self-interest and to maximize their own well-being. Prices are transparent, and people have a basic level of trust that exchanges of goods, services, and money benefit all parties. Consumers, it is assumed, are discerning and rational in the face of the marketâ... s blandishmentsâ... an assumption that is crucial to the whole systemâ... s ability to produce social good. Of course, markets have never functioned in the real world exactly as they do in economics textbooks. But in the U.S., the system has tended to work, allocating resources efficiently, generating growth, and improving the living conditions and welfare of most people.

But the new powers in the digital age have built their business models on strategiesâ... enabled and turbocharged by self-improving algorithmsâ... that actively undermine the principles that make capitalism a good deal for most people. Their aim is not merely to gain and retain customers, but to create a dependency on their products.

[From September 2017: Have smartphones destroyed a generation?](#)

Carmakers, appliance manufacturers, and cosmetics conglomerates have always been happy to prey upon their customersâ... desires and insecurities if doing so might stoke an irrational desire to buy their products. But their methodsâ... advertising, primarilyâ... are crude compared with the sophisticated tactics available to todayâ... s tech giants. The buzzes, badges, and streaks of social media; the personalized â... dealsâ... of commerce sites; the camaraderie and thrilling competition of gaming; the algorithmic precision of the recommendations on YouTubeâ... all have been finely tuned to keep us coming back for more. And we are: The average person taps, types, swipes, and clicks on his smartphone 2,617 times a day. Ninety-three percent of people sleep with their devices within armâ... s reach. Seventy-five percent use them in the bathroom.

The sway these technologies have over us is unhealthy, and the ways in which they can worsen our social relationships and our discourse are worthy subjects of public concern. But addiction to technology poses another threat, too. When we are too hooked on our phones and feeds to make decisions that align with our own self-interest, the free market ceases to be free.

Where an affinity ends and addiction begins is not always clear, but when it comes to our relationships with technology, the signs of addiction are manifest. We are spending more and more hours online, forgoing time with loved ones. Deprived of a decent Wi-Fi connection, we grow irritable. We risk life and limb to send texts from the road. In a 2019 Common Sense Media survey of 500 parents, 45 percent confessed to feeling at least somewhat addicted to their phone. Among parents whose children had their own phone, 47 percent said they believed that their kids were addicted too.

[Read: Tech experts think the internet is ruining democracy](#)

Many technology companies engineer their products to be habit-forming. A generation of Silicon Valley executives trained at the Stanford Behavior Design Lab in the Orwellian art of manipulating the masses. The lab's founder, the experimental psychologist B. J. Fogg, has isolated the elements necessary to keep users of an app, a game, or a social network coming back for more. One former student, Nir Eyal, distilled the discipline in *Hooked: How to Build Habit-Forming Products*, an influential manual for developers. In it, he describes the benefits of enticements such as "variable rewards" — think of the rush of anticipation you experience as you wait for your Twitter feed to refresh, hoping to discover new likes and replies. Introducing such rewards to an app or a game, Eyal writes approvingly, "suppresses the areas of the brain associated with judgment and reason while activating the parts associated with wanting and desire." Indeed, that brief lag between refresh and reveal is not Twitter crunching data — it's an intentional delay written into the code, designed to elicit the response Eyal describes.

A growing chorus of critics is warning of the dangers inherent in such manipulation. Tristan Harris, a former technology designer at Google and another former student of Fogg, is a co-founder of the Center for Humane Technology. Harris has likened his iPhone to having "a slot machine in my pocket," and indeed many of its features mimic those of the most addictive games on any casino floor.

[From November 2016: Tristan Harris believes Silicon Valley is addicting us to our phones. He's determined to make it stop.](#)

Harris has worked to reveal the tactics companies use to keep us hooked. On YouTube, for example, the auto-play function deprives viewers of a natural moment at which to disengage. But it's not just that the site keeps queuing up new clips for you to watch. YouTube's algorithms are designed to hold your interest by serving up content you can't resist, and the algorithms have gotten very good. As of 2017, users were watching a collective 1 billion hours of YouTube videos a day, more than 70 percent of which had been served to us in the form of algorithmic recommendations. Pause over that number for a moment: Nearly three-quarters of the YouTube videos we're watching have been *fed* to us.

The advent of addiction as the business model of some of the country's largest companies — companies with which many Americans interact every day — has fundamentally shifted the balance of power between consumers and producers. This was not always the most likely outcome of the digital revolution. In many facets of our lives, technology has improved transparency and given potential buyers access to a wealth of information they previously lacked. In the analog age, a car shopper would have little more than the Kelley Blue Book and his own time and willingness to kick tires to guide him to the best deal. Some of us appreciate that the Instagram algorithm knows whether we are 16 or 60 and whether we prefer Timberland or Tory Burch, and markets to us accordingly.

But the more reliant we become on a given app or platform, the more opportunities its makers have to observe our behavior — and the better they understand our behavior, the better they become at manipulating it to their own ends, whether their business model is serving ads or selling to us directly. It's a virtuous cycle for the producers, and a vicious one for the consumers. Often, we barely recognize that we're participating in it, because the barriers to participation are so low. Many of the most addictive platforms lure us in with the promise of a free service. But Snapchat, TikTok, and Twitch can be considered free only if we decide that our time, and the personal information we're providing, have no value.

Digital life, we must remember, is still in its infancy, and the powers of the corporations that govern that life are still growing. Companies are studying what we search for, what nudges we respond to, and what times of day we engage in certain online behaviors. Soon, cameras and sensors will likely be tracking what frightens, amuses, and arouses us, allowing data collectors to know more about us than we perhaps even know about ourselves. (*The Wall Street Journal* has reported that [popular iPhone apps that track users' heart rate and](#)

[menstrual cycle were passing that information to Facebook](#), though the social network denied using the information to its advantage.)

[From January/February 2020: Inside techâ... s fever dream](#)

The suggestion that we need to be protected from such tactics might seem paternalistic, and if consumers were the rational actors who populate econ textbooks, it might be: A person could decide for herself whether to exchange some amount of privacy for the joy of viewing friendsâ... photos or the convenience of tracking her heart rate. But the addiction economy relies on an asymmetrical exchange of information. Users are expected to blithely surrender their private information for access to services. The data collectors, meanwhile, fiercely guard their own privacy, typically refusing to disclose what information they have, whom they sell it to, and how they use it to manipulate our behavior.

And they do, in fact, manipulate our behavior. As Harvard Business Schoolâ... s Shoshana Zuboff has noted, the ultimate goal of what she calls â... surveillance capitalismâ... is to turn people into marionettes. In a recent *New York Times* essay, [Zuboff pointed to the wild success of PokÃ©mon Go](#). Ostensibly a harmless game in which players use smartphones to stalk their neighborhoods for the eponymous cartoon creatures, the app relies on a system of rewards and punishments to herd players to McDonaldâ... s, Starbucks, and other stores that pay its developers for foot traffic. In the addiction economy, sellers can induce us to show up at their doorstep, whether they sell their wares from a website or a brick-and-mortar store. And if weâ... re not quite in the mood to make a purchase? Well, they can manipulate that, too. As Zuboff noted in her essay, Facebook has boasted of its ability to subliminally alter our moods.

The company has denied accusations that it uses this power to sell targeted ads; others, however, will surely take advantage of our vulnerabilities. Consider â... drunk shopping,â... a bad habit Americans have acquired in the age of the Buy It Now button: Various surveys have suggested that it is already a multibillion-dollar phenomenon. Itâ... s not difficult to imagine any number of technology platforms determining when weâ... re likely to be tipsyâ... or discerning it from a slur in our speech or typos in our textsâ... and using that information to time their pitch.

[From May 2017: How online shopping makes suckers of us all](#)

Companies are also leveraging our reliance on themâ... and their knowledge of usâ... to get us to pay more for their products. By tracking our purchasing patterns (what we will shell out for an airline upgrade; how sensitive we are to surge pricing), they can make offers based on what each individual is willing to pay rather than what the market will bear. One study found that the price of headphones displayed in Google search results varied depending on usersâ... web history, with prices going upâ... by a factor of fourâ... when past searches suggested affluence. Another study, by the Brandeis economist Benjamin Reed Shiller, found that while a seller with access to basic demographic information about a specific buyer can gain 0.3 percent more profit than the market price would produce, a seller with access to an individualâ... s browsing history can increase profit by 14.6 percent.

Here, too, a fundamental benefit of capitalism is threatened. Traditionally, buyers have benefited from what economists call consumer surplusâ... the difference between what we *would* pay for a good and what sellers actually charge. With their newfound information advantage, sellers can retain far more of that surplus for themselves. Whether or not the average American understands the concept of consumer surplus, individualized pricing violates a sense of fairness: Weâ... ve long assumedâ... but can assume no longerâ... that the price you pay is the price I pay.

None of this is an argument against progress. Technology has helped create a world of convenience and abundance, and it will continue to do so. Properly channeled, it can improve the functioning of a market economy. But for society to harness technologyâ... s potential, we must understand how it is reshaping our

lives.

In the past, we may not have entirely trusted General Motors or General Electric, but most people didn't believe they were warping our desires or robbing us of our time and agency. By contrast, the biggest, best-known companies in the contemporary American economy—Facebook, Amazon, Google—are now viewed with growing suspicion and mixed emotions. A Pew survey found that the percentage of Americans who think technology companies have a net positive impact on the country had fallen from 71 percent in 2015 to 50 percent in 2019. In part, such sentiments flow from the dawning realization that these and other tech behemoths have hooked us on their services in order to profit from us. But we're also beginning to recognize the scale of the time we've lost. We're dismayed with how we're spending our days, but feel powerless to abandon our new bad habits, as anyone who has deleted, then reinstalled, the Facebook app can attest.

Will these discontents push people toward revolutionary backlash? Perhaps not. But that's almost beside the point. The capitalism that is taking shape in this century—predatory, manipulative, extremely effective at short-circuiting our rationality—is a different beast from the classical version taught in university classrooms. It cannot be regarded as beneficent and should not be given the benefit of the doubt. Profit motive and the means to create dependency is too dangerous a combination.

American society has long treated habit-forming products differently from non-habit-forming ones. The government restricts the age at which people can buy cigarettes and alcohol, and dictates places where they can be consumed. Until recently, gambling was illegal in most places, and closely regulated. But Big Tech has largely been left alone to insinuate addictive, potentially harmful products into the daily lives of millions of Americans, including children, by giving them away for free and even posturing as if they are a social good. The most addictive new devices and apps may need to be put behind the counter, as it were—packaged with a stern warning about the dangers inherent in their use, and sold only to customers of age.

Perhaps the most immediate and important change we can make is to introduce transparency—and thus, trust—to exchanges in the technological realm. At present, many of the products and services with the greatest power to manipulate us are "free," in the sense that we don't pay to use them. But we are paying, in the form of giving up private data that we have not learned to properly value and that will be used in ways we don't fully understand. We should start paying for platforms like Facebook with our dollars, not our data.

So far there is no better system than market-based capitalism to balance freedom, fairness, efficient allocation of goods, and growth. Given the fondness for free markets that tends to dominate among Silicon Valley executives, tech innovators ought to tread carefully if they want that system to survive.

DID THE DNC GO TOO FAR?

Paraphrasing Cato: The Democratic Party Must Be Destroyed

By [Peter Skurkiss](#)

Prior to the Third Punic War against Carthage in the 2nd Century BC, Cato the Elder was said to have ended all his speeches in the Roman senate by saying, "Carthage must be destroyed." Notice, Cato did not say 'defeated' but 'destroyed.' What do you suppose motivated this distinguished statesman to take such an extreme position? It was that in the Second Punic War (218 to 201 BC), Rome came close to losing to the Carthaginians. In that war, Rome suffered a number of severe battlefield defeats at the hands of Hannibal's army, most notable being the Battle of Cannae, the worse Roman defeat in history. To Cato, Carthage, although defeated in the Second Punic War, was still a threat to the Republic of Rome.

Let's move ahead in time. Today we see the depravity and anti-Americanism that is prevalent in today's Democratic Party is literally putting our constitutional republic at risk. Do you think that's an exaggeration? Let's take a look.

On social issues, the Democrats are the leading force of moral decay in America. They are the champion of such perverse things as unrestricted abortion, homosexual marriage, transgenderism, racial strife, and a God-hating form of radical secularism. They corrupt every institution in the U.S. with these 'novel' concepts from our schools to the military and everything in between. The one thing these initiatives all have in common is that they rot out the foundation of the Republic and undermine the family.

When it comes to economic matters, Democratic policies suffocate growth through regulations, high taxes, and crony capitalism. In the party's view, personal self-sufficiency, independence, and holding a traditional family together are sins, while dependency on government is a virtue. Judging by their behavior, the only growth the Democrats applaud and work towards is growth in government, growth in the welfare rolls, and growth in the influx of Third-World immigrants into the country.

Immigration deserves a special comment. As is often correctly said, demographics is destiny. Look at the quantity and quality of the type of immigration that the Democrats push for. To the Democrats whose creed is 'diversity is strength,' America will be worthy only when its composition mirrors that of the United Nations. If such a suicidal attitude prevails, then the United States as we know it is gone. Do the Democrats care? If they do, it is only that the transformation isn't happening fast enough.

As for the rule of law, the Democrats have no respect for it save for those instances where it might serve their purpose. And this lawless attitude is not reserved merely for Democratic politicians but extends to the would-be philosopher kings the Democrats want as judges. A man like the late Anthony Scalia who interprets the law as it is written (as is prescribed in the Constitution), is an anathema to Democrats. Judges like Scalia limit unconstitutional behavior. Democrats, on the other hand, want judges who turn the written law into loosey-goosey tools to remake the country according to their whims. When it comes to the corruption of legislating from the bench, the Democrats have been highly successful, due to an always complicit media and far too often a complacent Republican Party.

In past presidential races since the 1980s, the only election results Democrats accepted as legitimate are the elections they win. To the Democrats, the presidencies of George W. Bush and Donald Trump were illegitimate. And the Democrats acted accordingly to the detriment of the country. This erodes the foundation of our electoral process which bodes ill for the nation.

And what we are seeing today is an unprecedented example of Democrat lawlessness. Their operatives at high levels in the FBI, the Justice Department, and some intelligence agencies actually worked to derail the presidential campaign of Donald Trump and then continued to try to overturn the election results after he won. This is a staggering development that is now being exposed.

Since the takeover of the Democrat Party by the McGovernites in the early 1970s, the Democrats have steadily drifted from the liberalism of Harry Truman and JFK to the dark leftwing darkness of Barack Obama, Nancy Pelosi, Harry Reid, Hillary Clinton and the rest. When in power, the Democrats are oppressors. Think of the abuses of the IRS, the EPA, and the FBI. When out of power, Democrats are energized as hateful antagonists to anyone who disagrees with them. You object to open borders, you're a racist. You criticize Hillary Clinton, you're a sexist. You think marriage should be only between man and a woman, you're a hate-filled homophobe. You believe in the God of the Bible, you're a fanatic akin to Muslim terrorists. It has even gotten to the point that if you're white, you're a closet racist... at best.

The right way to view the Democrats is that they are the *running dogs* of the Left. And so there's no mistake of what I mean, a 'running dog' is a literal translation from Chinese to mean lackey or lapdog, an unprincipled person who helps or flatters a person more powerful, often evil. In Chinese, no idiomatic expression is more demeaning than the term 'running dogs'.

Given the state of the Democratic Party, wouldn't be nice if Republican candidates ended their speeches and echoed Cato by saying, "The Democratic Party must be destroyed?" Of course, it is not necessary to actually say such a thing... but the sentiment that "The Democratic Party must be destroyed" should be etched in the heart and mind of any Republican seeking office. Republicans who strive to 'work with' Democrats on an ongoing basis are on a fool's errand. They clearly do not understand the nature of their enemy they're dealing with.

In closing, note that Rome won the Third Punic War and totally destroyed Carthage. So there's hope. Good gracious almighty, some might say, what would the country do without a second party? Let the Republican party split in two. Or let a new party arise like the GOP did in the 1850s. In any event, the only parties of national scope that should be tolerated are ones devoted to the Constitution and the rule of law.

Decentralized Web Markets Have Arrived: OpenBazaar 2.0 Beta Launches with Support for Tor

Posted by: [DividedBy0](#) [Featured](#), [News Updates](#) [3 Comments](#)

OpenBazaar [recently launched the beta version of OpenBazaar 2.0](#), finally allowing people to anonymously buy and sell products with cryptocurrency. [In January of this year](#) a Developer Release of version 2.0 of the OpenBazaar software was released, followed by the alpha version. The previous releases of OpenBazaar 2.0 used a testnet, but now with the beta version of the software, users will finally be able to post and order real listings. OpenBazaar 2.0 has the potential to revolutionize darknet markets, making it even more difficult for the [governments of the world to shut down](#).

[OpenBazaar](#) started life as a project called [DarkMarket](#), created at a Toronto Bitcoin Hackathon in 2014 by Amir Taaki. Created shortly after the fall of Silk Road, which was the first darknet market to accept Bitcoin, DarkMarket was meant to stop future darknet markets from failing in the same way as centralized darknet markets like Silk Road did. At the time, Taaki stated that the purpose of the software was to decentralize darknet markets, much in the same way BitTorrent decentralized music and file sharing after centralized software such as Napster had been shut down.

The new functional release of OpenBazaar 2.0 includes the [much anticipated support for Tor](#). OpenBazaar 1.0 did not work with Tor because it used the UDP protocol, which posed privacy issues through IP leaks when used over the Tor network. The new beta version of the software provides more tools for stores, including more shipping options, inventory management features, and allows for variations of listed products. â... Our goal with OpenBazaar 2.0 is to get it to be, with the exception of using bitcoin, â... an identical experience of what youâ... d see on Etsy. I think the 2.0 is close to that,â... OB1 CEO [Brian Hoffman said in February](#). The new version also includes support for 3rd party search providers, such as Duo, which provide better search results. Users of the new beta version will still be able to search listings created on OpenBazaar version 1.0.

Under version 2.0 of OpenBazaar, stores will no longer need to always be online in order for the store to be accessible to users and for orders to be placed. This is because the new version of OpenBazaar relies on the peer-to-peer [InterPlanetary File System \(IPFS\)](#), a decentralized web hosting platform. With IPFS, everyone who visits the store also hosts it, enabling offline stores and making it harder, if not virtually impossible, to shut down a store. Another new feature enabled in OpenBazaar 2.0 is the [Shapeshift Shifty Button](#), which allows users to purchase products using cryptocurrencies other than Bitcoin, such as Monero, Ethereum, DASH, ZCash, or any other coin supported by Shapeshift. The new beta also includes its own built in Bitcoin wallet, which makes it even easier for users to make transactions. The integrated Bitcoin wallet [supports Segregated Witness \(Segwit\)](#) transactions, which is expected to reduce transaction fees for payments made on OpenBazaar 2.0.

Private stores and private listings are also possible with the new version of OpenBazaar. The new version also uses [technology from Signal Private Messenger](#) for encrypted messaging over OpenBazaar which utilizes perfect forward secrecy. While

OpenBazaar is not necessarily the first or only decentralized darknet market, it does seem to be the one with the most hype and interest among darknet users. Other decentralized darknet marketplace solutions that have launched in the past include [Axis Mundi](#), [BitMarket](#), [OpenMarket](#), and [Particl](#). With the fall of two of the biggest centralized darknet markets, AlphaBay and HANSA Market, happening recently, the new OpenBazaar has emerged at the perfect time. However, it remains to be seen if darknet market users are willing to move to safer, decentralized platforms like OpenBazaar 2.0, or if the majority of buyers and sellers on the darknet will continue to use the more risky centralized darknet markets.

DeepFake software being turned into DeepFreedom Public News broadcasting software

Now you can make your own global news broadcasts with a photo-realistic CGI host and your text converted into their words

If you tell the truth in mass distribution, in most parts of the world, you are killed for speaking out. New software removes that risk.

"DeepFake" software was originally created to put celebrity faces on old porn movie stars. Now it has been re-purposed for a higher purpose.

With the new types of software you simply input a .txt script of what you want a totally lifelike news caster, created by computer graphics, to say. Its not your voice. It's not your face. The source is untraceable. Get ready for a whole new kind of transparency.

Do Not Get Pregnant During Covid

You will have a brain damaged baby. Children born during the [coronavirus pandemic](#) have significantly reduced verbal, motor and overall cognitive performance compared to children born before the pandemic, and this discrepancy is particularly pronounced in males, as well as in children in lower socioeconomic families, according to preliminary data presented in a preprint study. Researchers believe that this highlights that even in the absence of infection and illness, the pandemic has had a significant, negative impact on infant and child development.

In the [study](#), not yet-peer reviewed and uploaded as preprint in medRxiv on Wednesday, researchers from Brown University examined data from an ongoing longitudinal study of child neurodevelopment, comparing scores in 2020 and 2021 to scores from 2011 to 2019. The researchers found that verbal, non-verbal, and overall cognitive scores are significantly lower since the beginning of the pandemic, with young infants showing significantly lower performance than infants born before January 2019.

Researchers stated that "it is clear [...] that young infants and children are developing differently than pre-pandemic, and that addressing this now while their brain is at its most plastic and responsive, is

imperative," also saying that it is unclear from the data if observed declines are temporary.

Researchers concluded that results suggest that early development is impaired by the pandemic's effect on environmental factors. Children are heavily influenced by their environment and a child's brain undergoes a large amount of structural and functional growth driven both by genetic and environmental factors, said the researchers. The COVID pandemic greatly altered the environment of both young children and pregnant individuals which could greatly influence children's development, according to the study.

Researchers cited closures and lockdowns as factors that limited child learning and typical activities, also adding that stress caused by the various factors of the pandemic affecting parents may have had an effect on children.

Researchers also cited the fear of attending prenatal visits for [woman pregnant](#) during the pandemic as a factor that increased maternal stress, anxiety, and depression, listing this as another factor that could have affected child development. Maternal stress, anxiety and depression during pregnancy can impact the brain structure and connectivity of the fetus possibly causing cognitive, motor and behavioral developmental delays.

Researchers also touched on the potential effect of mask-wearing on the study, stating that children were unable to see the full facial expressions of the study's staff and that this may have impacted their understanding of test questions and instructions because of limitations posed by masks on non-verbal cues or the understanding of spoken instructions.

Do YOU Suffer from CT? It Can Be Treated!

CT (Conspiracy Theorism) **CAN** be treated by:

THE TRUTH!

Conspiracy Theories Backed Up By **FACTS** Are No Longer "Theories"!

You folks are throwing around the phrase "Conspiracy" as if it was a bad thing to say out-loud. A number of articles have just come out, globally, about why only fools now use the ploy of defaming Plaintiffs like us by trying to attach negative mnemonic triggers to those who reveal organized crime.

[Caitlin Johnstone](#)

How, After This Crazy Year, Is â... Conspiracy Theoristâ... Still Being Used As An Insult?

#Conspiracy, #ConspiracyTheory, #WikiLeaks, #Leak, #Email

Since WikiLeaks has clearly revealed that our government is lying to us and the mainstream media is helping them, itâ... s absurd for â... conspiracy theoristâ... to continue to exist as a dismissive pejorative.

I still get called a crazy conspiracy theorist all the time for writing about things like how Hillary Clintonâ... s no-fly zone in Syria [would have probably required a war with Russia](#), or how [Obamaâ... s cabinet](#) was largely appointed for him by an executive from Citigroup before he was even elected. These ideas arenâ... t based on wild conjecture or an over-active imagination; thereâ... s plenty of solid and reputable evidence behind them for anyone who cares to do their own research (or just click my damn [hyperlinks](#) and view my sources! How hard is it, people? Iâ... m not making this stuff up! I did all the work for you! What do you want me to do, come over to your house and read it to you in different character voices while you drink hot chocolate with marshmallows? What am I, your mom? Not that Iâ... m bitter or anything).

But lack of solid evidence isnât what elicits such accusations and dismissals; the reason such ideas get dismissed as conspiracy theory so often is not due to lack of evidence, but due to lack of coverage by mainstream media franchises. Which should not be the case, because WikiLeaks has [confirmed beyond a shadow of a doubt](#) that the mainstream media actively collaborates with politicians and campaigns to manipulate the public narrative. These people who have â both [a public position and a private position](#)â also have [legions of members of the press](#) in the upper echelons of news media actively colluding with their agendas. But then, that hasnât been covered much by mainstream media either.

It wasnât that long ago that a conspiracy theory was generally considered to mean an unproven notion widely frowned upon because its adherents tended to have very flimsy standards for proof, and would grasp at any shred of evidence no matter how disreputable as long as it satisfied their confirmation bias. Nowadays, if the conversations Iâve been having lately are any indication, the term now essentially means â anything I havenât seen on CNN,â or even â any new information that causes me to experience cognitive dissonance.â Itâs become another meaningless, vacuous phrase mechanically bleated out by ignorant identity politics dogmatists to support the establishment agenda, much like â support our troopsâ when the establishment wants to kill people over crude oil, or â obstructionist congressâ when the establishment wants people to ignore the way Obama continued and expanded all the worst aspects of the Bush administration, or â donât discuss politics or religionâ when the establishment wants us all to turn into a bunch of vapid, drooling idiots.

If Iâve noticed this trend, a lot of my readers probably have, too. But even if the phrase â conspiracy theoristâ hadnât been twisted into an arbitrary knee-jerk dismissive pejorative and retained its more traditional usage, itâs still silly to see it employed at all.

I mean, think about it. What have we learned this year? The Obama campaign [actively conspired](#) with a Citigroup executive to determine which cabinet members would benefit the people responsible for the Wall Street crash and push the TPP through in great secrecy. The DNC [actively conspired](#) to thwart the campaign of one of their candidates in favor of the other in the contest they themselves were responsible for ensuring remains fair and even-handed. Hillary Clintonâs campaign staff [actively conspired](#) to elevate Donald Trump above the other Republican candidates in order to sink the campaigns of the moderates. Members of the mainstream media [actively conspired](#) with the Clinton campaign to elevate her above her competitors. A Clinton super PAC [actively conspired](#) to use paid shills to deceive people on internet discussion forums into thinking that Clinton had more grassroots support than she did. Democratic party elites [actively conspired](#) to use the media to create a liberal â echo chamberâ and control public discourse. I could go on and on and on. These are actual conspiracies that people would have been (and were) mocked and dismissed as conspiracy theorists for suggesting before they were proven, and then they were proven. Every one of them.

Is it reasonable, then, to dismiss anyone who comes up with a plausible theory involving powerful individuals manipulating things in a shady manner? The leaked documents from WikiLeaks only gave us a tiny glimpse behind the curtain of an opaque government and an opaque electoral process, and what we saw there was horrifying. Democracy being actively sabotaged at every turn, plutocrats being given the keys to the nation,

and the American people being deliberately and systematically deceived. What else is back there? Is it unreasonable to assume that there are many, many far more horrific things going on behind the veil of government secrecy? I don't think so. This doesn't mean we should accept any conspiracy theory as gospel truth; these ideas ought to be vigorously debated, and we should of course always bring critical thinking to the table. But in light of this year's revelations, critical thinking necessarily means being wide open to the possibility that things are not at all happening the way we're being told.

It's very naive to think that large institutions are immune to criminality, and that it's not possible for networks of people in power to use that power for ill. Are we really meant to ignore that obvious reality whenever it appears to be manifesting in our own institutions? I'd say that would be pretty stupid.

Lately whenever someone accuses me of spreading a conspiracy theory I've been mentally replacing the word "conspiracy" with one of its synonyms, which makes them sound a lot sillier. You should try it. God, spare me the collaboration theory... doesn't have that instant debunking quality that they're reaching for. It means the same thing, and there is definitely collaboration happening, but now it's got the baseless stigma removed.

You can use other words like a "collusion" theory. A "co-operation" theory. Pfft, you hear them say. That's just an organized crime theory.

Yeah. Yeah it is. Click my damn hyperlinks.

I've gone rogue. If you enjoyed reading this as much as I enjoyed writing it, give a lass a hand by sharing it, liking me up bigly on [Facebook](#), following me on [Twitter](#), or even maybe chucking a few shekels my way on [Patreon](#).

PLEASE TAKE NOTICE... in a report filed by Zero Hedge: in 1967, the CIA Created the Label "*Conspiracy Theorists*" ... to Attack Anyone Who Challenges the "Official" Narrative. Gawker's Lawyers have continued to use this hate speech to attack Creditor/Plaintiffs in order to further Gawker's intimidation, defamation, character assassination and vendetta retribution program against Creditor/Plaintiffs.

Conspiracy Theorists USED TO Be Accepted As Normal

Democracy and free market capitalism were [founded](#) on conspiracy theories.

The [Magna Carta, the Constitution and Declaration of Independence](#) and other founding Western documents were based on conspiracy theories. [Greek democracy and free market capitalism](#) were also based on conspiracy theories.

But those were the bad old days â...! Things have now changed.

The CIA Coined the Term Conspiracy Theorist In 1967

That all changed in the 1960s.

Specifically, in April 1967, the CIA [wrote](#) a dispatch which coined the term â... conspiracy theoriesâ... â...! and recommended methods for discrediting such theories. The dispatch was marked â... psychâ... â... short for â... psychological operationsâ... or disinformation â... and â... CSâ... for the CIA's â... Clandestine Servicesâ... unit.

The dispatch was produced in responses to a Freedom of Information Act request by the New York Times in 1976.

The dispatch states:

2. This trend of opinion is a matter of concern to the U.S. government, including our organization.

The aim of this dispatch is to provide material **countering and discrediting the claims of the conspiracy theorists**, so as to inhibit the circulation of such claims in other countries. Background information is supplied in a classified section and in a number of unclassified attachments.

3. Action. We do not recommend that discussion of the [conspiracy] question be initiated where it is not already taking place. Where discussion is active addresses are requested:

- a. To discuss the publicity problem with and friendly elite contacts (especially politicians and editors) , pointing out that the [official investigation of the relevant event] made as thorough an investigation as humanly possible, that the charges of the critics are without serious foundation, and that further speculative discussion only plays into the hands of the opposition. Point out also that parts of the conspiracy talk appear to be deliberately generated by â...! propagandists. Urge them to use their influence to discourage unfounded and irresponsible speculation.

b. To **employ propaganda assets to and refute the attacks of the critics. Book reviews and feature articles are particularly appropriate for this purpose.** The unclassified attachments to this guidance should provide useful background material for passing to assets. Our ploy should point out, as applicable, that the critics are (I) **wedded to theories adopted before the evidence was in**, (II) **politically interested**, (III) **financially interested**, (IV) hasty and inaccurate in their research, or (V) **infatuated with their own theories**.

4. In private to media discussions not directed at any particular writer, or in attacking publications which may be yet forthcoming, the following arguments should be useful:

a. **No significant new evidence has emerged** which the Commission did not consider.

b. Critics usually overvalue particular items and ignore others. They **tend to place more emphasis on the recollections of individual witnesses** (which are less reliable and more divergentâ... and hence offer more hand-holds for criticism) â...!

c. **Conspiracy on the large scale often suggested would be impossible to conceal** in the United States, esp. since informants could expect to receive large royalties, etc.

d. Critics have often been enticed by a form of intellectual pride: **they light on some theory and fall in love with it**; they also scoff at the Commission because it did not always answer every question with a flat decision one way or the other.

f. As to charges that the Commissionâ... s report was a rush job, it emerged three months after the deadline originally set. But to the degree that the Commission tried to speed up its reporting, this was largely due to the pressure of **irresponsible speculation** already appearing, in some cases coming from the same critics who, refusing to admit their errors, are now putting out new criticisms.

g. **Such vague accusations as that â... more than ten people have died mysteriouslyâ... can always be explained in some natural way** â...!

5. Where possible, counter speculation by encouraging reference to the Commissionâ... s Report itself. Open-minded foreign readers should still be impressed by the care, thoroughness, objectivity and speed with which the Commission worked. **Reviewers of other books might be encouraged to add to their account the idea that, checking back with the report itself, they found it far superior to the work of its critics.**

Here are screenshots of part of the memo:

- Ignore conspiracy claims unless discussion about them is already too active
- Claim that itâ... s irresponsible to speculate
- Accuse theorists of being wedded to and infatuated with their theories
- Accuse theorists of being politically motivated
- Accuse theorists of having financial interests in promoting conspiracy theories

In other words, the CIAâ... s clandestine services unit created the arguments for attacking conspiracy theories as unreliable in the 1960s as part of its psychological warfare operations.

But Arenâ... t Conspiracy Theories â... In Fact â... Nuts?

Forget Western history and CIA dispatches â...! arenâ... t conspiracy theorists nutty?

In fact, conspiracies are so common that judges are trained to look at conspiracy allegations as [just another legal claim](#) to be disproven or proven *based on the specific evidence*:

[Federal](#) and all 50 [stateâ... s codes](#) include specific statutes addressing conspiracy, and providing the punishment for people who commit conspiracies.

But letâ... s examine what the people trained to weigh evidence and reach conclusions think about â... conspiraciesâ... . Letâ... s look at what American **judges** think.

Searching [Westlaw](#), one of the 2 primary legal research networks which attorneys and judges use to research the law, I searched for court decisions including the word â... Conspiracyâ... . This is such a common term in lawsuits that it overwhelmed Westlaw.

Specifically, I got the following message:

â... Your query has been intercepted because it may retrieve a large number of documents.â...

From experience, I know that this means that there were potentially millions or many hundreds of thousands of cases which use the term. There were so many cases, that Westlaw could not even start processing the request.

So I searched again, using the phrase â... Guilty of Conspiracyâ... . I hoped that this would not only narrow my search sufficiently that Westlaw could handle it, but would give me cases where the judge actually found the defendant guilty of a conspiracy. This pulled up exactly 10,000 cases â... which is the maximum number of results which Westlaw can give at one time. In other words, there were more than 10,000 cases using the phrase â... Guilty of Conspiracyâ... (maybe thereâ... s a way to change my settings to get more than 10,000 results, but I havenâ... t found it yet).

Moreover, as any attorney can confirm, usually only appeal court decisions are published in the Westlaw database. In other words, trial court decisions are rarely published; the only decisions normally published are those of the courts which hear appeals of the trial. Because only a very small fraction of the cases which go to trial are appealed, this logically means that the number of guilty verdicts in conspiracy cases at trial must be much, much larger than

10,000.

Moreover, "Guilty of Conspiracy" is only one of many possible search phrases to use to find cases where the defendant was found guilty of a lawsuit for conspiracy. Searching on Google, I got [3,170,000 results](#) (as of yesterday) under the term "Guilty of Conspiracy" , [669,000 results](#) for the search term "Convictions for Conspiracy" , and [743,000 results](#) for "Convicted for Conspiracy" .

Of course, many types of conspiracies are called other things altogether. For example, a long-accepted legal doctrine makes it illegal for two or more companies to conspire to fix prices, which is called "Price Fixing" . ([1,180,000 results](#)).

Given the above, I would extrapolate that there have been hundreds of thousands of convictions for criminal or civil conspiracy in the United States.

Finally, many crimes go unreported or unsolved, and the perpetrators are never caught. Therefore, the actual number of conspiracies committed in the U.S. must be even higher.

In other words, conspiracies are committed all the time in the U.S., and many of the conspirators are caught and found guilty by American courts. Remember, Bernie Madoff's Ponzi scheme was a conspiracy theory.

Indeed, conspiracy is a very well-recognized crime in American law, taught to every first-year law school student as part of their basic curriculum. **Telling a judge that someone has a "conspiracy theory" would be like telling him that someone is claiming that he trespassed on their property, or committed assault, or stole his car. It is a fundamental legal concept.**

Obviously, many conspiracy allegations are false (if you see a judge at a dinner party, ask him to tell you some of the crazy conspiracy allegations which were made in his court). Obviously, people will either win or lose in court depending on whether or not they can prove their claim with the available evidence. But not all allegations of trespass, assault, or theft are true, either.

Proving a claim of conspiracy is no different from proving any other legal claim, and the mere label "conspiracy" is taken no less seriously by judges.

It's not only [Madoff](#). The heads of [Enron](#) were found guilty of conspiracy, as was the head of [Adelphia](#). Numerous lower-level government officials have been found guilty of conspiracy. See [this](#), [this](#), [this](#), [this](#) and [this](#).

Time Magazine's financial columnist Justin Fox [writes](#):

Some financial market conspiracies are real .!

Most good investigative reporters are conspiracy theorists, by the way.

And what about the NSA and the tech companies that have cooperated with them?

But Our Leaders Wouldn't Do That

While people might admit that corporate executives and low-level government officials might have engaged in conspiracies â€¦ they may be strongly opposed to considering that the wealthiest or most powerful might possibly have done so.

But powerful insiders have long admitted to conspiracies. For example, Obama's Administrator of the Office of Information and Regulatory Affairs, Cass Sunstein, [wrote](#):

Of course some conspiracy theories, under our definition, have turned out to be true. The Watergate hotel room used by Democratic National Committee was, in fact, bugged by Republican officials, operating at the behest of the White House. In the 1950s, the Central Intelligence Agency did, in fact, administer LSD and related drugs under Project MKULTRA, in an effort to investigate the possibility of â€¦ mind control.â€¦ Operation Northwoods, a rumored plan by the Department of Defense to simulate acts of terrorism and to blame them on Cuba, really was proposed by high-level officials â€¦.

But Someone Would Have Spilled the Beans

A common defense to people trying sidetrack investigations into potential conspiracies is to say that â€¦ someone would have spilled the beansâ€¦ if there were really a conspiracy.

But famed whistleblower Daniel Ellsberg [explains](#):

It is a commonplace that â€¦ you can't keep secrets in Washingtonâ€¦ or â€¦ in a democracy, no matter how sensitive the secret, you're likely to read it the next day in the New York Times.â€¦ These truisms are flatly false. They are in fact cover stories, ways of flattering and misleading journalists and their readers, part of the process of keeping secrets well. Of course eventually many secrets do get out that wouldn't in a fully totalitarian society. But the fact is that the overwhelming majority of secrets do not leak to the American public. This is true even when the information withheld is well known to an enemy and when it is clearly essential to the functioning of the congressional war power and to any democratic control of foreign policy. **The reality unknown to the public and to most members of Congress and the press is that secrets that would be of the greatest import to many of them can be kept from them reliably for decades by the executive branch, even though they are known to thousands of insiders.**

History proves Ellsberg right. For example:

- [One hundred and thirty thousand \(130,000\)](#) people from the U.S., UK and Canada worked on the Manhattan Project. But it was kept secret for years
- A BBC documentary [shows](#) that:

There was â€¦ a planned coup in the USA in 1933 by a group of right-wing American businessmen The coup was aimed at toppling President Franklin D Roosevelt with the help of half-a-million war veterans. The plotters, who were alleged to involve some of the most famous families in America, (owners of Heinz, Birds Eye, Goodtea, Maxwell Hse & George Bush's Grandfather, Prescott) believed that their country should adopt the policies of Hitler and Mussolini to beat the great depressionâ€¦

Moreover, [â... the tycoons told General Butler the American people would accept the new government because they controlled all the newspapers.â...](#) Have you ever heard of this conspiracy before? It was certainly a very large one. And if the conspirators controlled the newspapers then, how much worse is it today with media consolidation?

- [7 out of the 8 giant, money center banks went bankrupt](#) in the 1980â...s during the â... Latin American Crisisâ... , and the governmentâ... s response was to cover up their insolvency. Thatâ... s a cover up lasting *several decades*
- Banks have been involved in [systematic criminal behavior](#), and have manipulated [every single market](#)
- Governments have been [covering up nuclear meltdowns for fifty years](#) to protect the nuclear industry. Governments have colluded to cover up the severity of [numerous other environmental accidents](#). For many years, Texas officials [intentionally under-reported the amount of radiation in drinking water to avoid having to report violations](#)
- The governmentâ... s spying on Americans began [before 9/11](#) (confirmed [here](#) and [here](#). And see [this](#).) But the public didnâ... t learn about it until many years later. Indeed, the the New York Times [delayed the story](#) so that it would not affect the outcome of the 2004 presidential election
- The decision to launch the Iraq war was made [before 9/11](#). Indeed, former CIA director George Tenet said that the White House [wanted to invade Iraq long before 9/11, and inserted â... crapâ... in its justifications for invading Iraq](#). Former Treasury Secretary Paul Oâ... Neill â... who sat on the National Security Council â... also [says](#) that Bush planned the Iraq war before 9/11. And top British officials [say](#) that the U.S. discussed Iraq regime change one month after Bush took office. Dick Cheney apparently even made Iraqiâ... s oil fields a national security priority [before 9/11](#). And it has now been shown that [a handful of people](#) were responsible for willfully ignoring the evidence that Iraq lacked weapons of mass destruction. These facts have only been publicly disclosed recently. Indeed, Tom Brokaw [said](#), â... All wars are based on propaganda.â... A concerted effort to produce propaganda is a conspiracy

Moreover, high-level government officials and insiders have *admitted* to dramatic conspiracies after the fact, including:

- [Supporting terrorists to promote geopolitical goals](#)
- [Supporting false flag terror](#)

The admissions did not occur until *many decades* after the events.

These examples show that it is possible to keep conspiracies secret for a long time, without anyone â... spilling the beansâ... .

In addition, to anyone who knows how covert military operations work, it is obvious that segmentation on a â... need-to-know basisâ... , along with deference to command hierarchy, means that a couple of top dogs can call the shots and most people helping *wonâ... t even know* the big picture at the time they are participating.

Moreover, those who think that co-conspirators will brag about their deeds forget that people in the military or intelligence or who have huge sums of money on the line can be very disciplined. They are not likely to go to the bar and spill the beans like a down-on-their-luck, second-rate alcoholic robber might do.

Finally, people who carry out covert operations may do so for ideological reasons â... believing that the

â... ends justify the meansâ... . Never underestimate the conviction of an ideologue.

The old saying by Lord Acton is true:

Power tends to corrupt, and absolute power tends to corrupt absolutely.

Those who operate without checks and balances â... and without the disinfectant sunlight of public scrutiny and accountability â... tend to act in their own best interests â...! and the little guy gets hurt.

The early Greeks knew it, as did those who forced the king to sign the Magna Carta, the Founding Fathers and the father of modern economics. We should remember this important tradition of Western civilization.

*Postscript: The ridicule of **all** conspiracy theories is really just an [attempt to diffuse criticism of the powerful](#).*

The wealthy are not worse than other people â...! but they are [not necessarily better](#) either. Powerful leaders may not be bad people â...! or they [could be sociopaths](#).

We must judge each by his or her actions, and not by preconceived stereotypes that they are all saints acting in our best interest or all scheming criminals.

SILICON VALLEY TECH CARTEL EVIDENCE FOLDER EXPLANATIONS:

Here is a small sample of the evidence proving the charges. We warrant, certify and guarantee that, with equitable legal representation, we can prove all of our charges in a Grand Jury, A civil Jury Trial and a television broadcast live Congressional hearing. This is a public peer-to-peer, mesh network, free wiki operated by a Task Force of citizens, journalists, forensic investigators and law enforcement specialists. You can read and explore the evidence samples by clicking on each link following these categorical explanations for the folders:

SILICON VALLEY MEDIA COLLUSION INFO RIGGING - This folder provides a small sample of the proof that a group of media company owners in the Tech Cartel coordinate news stories and news censorship in order to manipulate their crony capitalism plots. This includes only hiring certain types of extremists, having their HR departments run "echo-chambers", keeping employees in a glass bubble, new age biased mind-training, subliminal messaging campaigns and coordinated catch phrases.

DEPT OF ENERGY IS THE DNC SLUSH FUND - This folder provides a small sample of the proof that the U.S. Dept. of Energy is used as a slush-fund and Dark Money-compensated stock market scam by the Obama Administration and their Silicon Valley Tech Cartel financiers. CA & NY Senators and AG's ran the high level parts of this criminal kick back Dark Money scheme.

SILICON VALLEY AND HOLLYWOOD SEX CULTS AND ABUSE - This folder provides a small sample of the proof that Silicon Valley Tech Cartel VC's and PayPal Mafia oligarchs are raised to be sociopaths and exhibit lawless, deranged social actions like rape, sex abuse, misogyny, tax evasion, racism, bribery, embezzlement and other illicit deviance. Their vast sex abuses and sex clubs prove their moral failures and that they seek not pleasure but "control over others" in their horrific sexual crimes.

HOW YOU CAN FIGHT CORRUPTION - This folder provides the latest info on technologies and tactics you can use to expose the corrupt and shut them down!

THE DNC HIT JOB MEDIA ASSASSINS - This folder provides a small sample of the proof that the suspects are spending vast amounts of money and resources on Fusion GPS, Black Cube, Gawker/Gizmodo hit jobs and spying. These are not just people who disagree with Trump. The Tech Cartel is actively meeting and coordinating attacks about, and spending tens of millions of dollars on, espionage activities, riots and character assassinations in order to keep their payola schemes going. Government officials financed and managed political, economic and character assassination attacks on domestic taxpaying citizens, using taxpayer resources and hit-job contractors.

RUSSIANS RUSSIANS RUSSIANS - This folder provides a small sample of the proof that it was originally Silicon Valley DNC Tech Cartel executives and venture capitalists who set up the first relationships with Russian mobsters.

PRIVACY AND SPYING ABUSE ONLINE - This folder provides a small sample of the proof that The Silicon Valley Cartel lie about their censorship and privacy rape of the public while, in fact, spying on the

public for election manipulation using CIA-type tactics. Facebook, Twitter, Google/YouTube conspire to coordinate political, business and stock market censorship and attacks on their enemies.

DATING AND ONLINE SOCIAL MANIPULATION - This folder provides a small sample of the proof that the Tech Cartel including Chelsea Clinton's match.com, OKCupid and IAC properties and Reid Hoffman's matching sites are actually DNC honey-trap operations, political spying database population tools and mood manipulation efforts to exploit sensitive love-seekers for their vulnerable status.

WHY GOOGLE IS A SICK CORRUPT MONOPOLY - This folder provides a small sample of the proof that Google/YouTube/Alphabet owners and executives planned and manually coordinated election manipulations, privacy abuse, search engine rigged attacks on individuals, and militaristic information-rigging that harms the public and exceeds anti-trust violations more profoundly than almost any other company in history. The reason that Google employees comprised such a large portion of the Obama White House is so Google and the Tech Cartel could seek to implement this crony capitalism crime.

THE CORRUPT LAWYER, CPA, iBANK, LOBBYIST GANGS - This folder provides a small sample of the proof that the majority of the funds transfers for these Tech Cartel crimes came through Dark Money accounts, covert family trusts, shell corporations, revolving door contracts and insider trading scams operated by these tier 2 services contractors.

THE IDENTITIES OF THE CORRUPT DEEP STATE CROOKS - This folder provides a small sample of the proof that a Mafia-like Silicon Valley Tech Cartel exists and is comprised of, and operated by, a pack of elitist fraternity house men and famous politicians.

IMMIGRANTS PAY FOR THE NANCY PELOSI MANSIONS - This folder provides a small sample of the proof that Nancy Pelosi, her family and staff are both operators and beneficiaries of these crimes.

POLITICAL DEATHS AND POISONINGS - This folder provides a small sample of the proof that a large number of connected individuals who crossed the Silicon Tech Cartel Cosa Nostra are now dead under mysterious circumstances. CA, NY & DC public officials and FBI executives have covered up these deaths and slowed investigations because they have financial links to the DNC financiers suspected of causing these murders. Seth Rich is only one of thousands of bizarre deaths of Tech Cartel whistle-blowers.

THE SANDHILL ROAD SILICON VALLEY VC SOCIOPATHS - This folder provides a small sample of the proof that The Silicon Valley Mafia (AKA: "The Tech Cartel", "The PayPal Mafia". "The AngelGate Conspirators", etc.) is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) they control. They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control. They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders. They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, revolving door payola, executive prostitute clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians to halt investigations and interdiction efforts. They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis abusers, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. They are not limited to California and also operate out of New York and Washington DC. They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

SILICON VALLEY MANIPULATES ELECTIONS - This folder provides a small sample of the proof that the "The Deep State" that runs all of these tens of millions of dollars of political attacks and media manipulations is focused on rigging elections. These people have a 'Dark Money' bribery program underway in which they use fake charity organizations to conduit bribes and rigged government contracts back and forth to themselves via control of elected officials.

THE FEINSTEIN CORRUPTION AND PAYOLA - This folder provides a small sample of the proof that Dianne Feinstein, her family and staff are both operators and beneficiaries of these crimes.

AAAA CASE OVERVIEWS - This folder provides a small sample of the proof that crooked insiders from political circles participated in the crime. It cost taxpayers over six trillion dollars in losses. The most notorious Senators in the country are trying to keep it covered up. The main part of the scam is called 'Dark Money Trickle Laundering'. It works via corrupt Senators, criminally illicit law firms, dirty lobbyists, fake charities, sociopath tech billionaires, mobster CPA's and covert dynastic family trust funds. The taxpayers of the USA are the helpless victims of this crime and the SEC, FEC, DOJ, DOE, and other agencies, refuse to help them because the agency bosses get paid by the crooks! America was created as a 'one person = one vote' nation but 320 elitist billionaires bribed their way to get 500,000+ votes for each one of themselves! In other words: you get one vote but they use criminally illicit schemes to steal millions of votes for a few hundred corrupt guys.

THE ELON MUSK TESLA BRIBES AND CORRUPTION - This folder provides a small sample of the proof that Elon Musk and Tesla Motors exist today because of their covert political organized crime activities, political bribes, DNC Dark Money financing and regulator payola.

HERE ARE THE LINKS TO THE SAMPLE FOLDERS:

Espionage Journalism Groups Go Head-To-Head

â... Project Veritas Exposedâ... is putting a face on James Oâ... Keefeâ... s employees.

[.WILL SOMMER](#)

PHOTO ILLUSTRATION BY LYNE LUCIEN/THE DAILY BEAST

A few months before the 2016 election, an undercover operative working for conservative sting-meister James Oâ... Keefe posed as an intern to infiltrate Democracy Partners, a Democratic consulting group.

The Oâ... Keefe associate captured footage thatâ... after undergoing Oâ... Keefeâ... s thorough editingâ... appeared to show staffers at the firm discussing potential voter-fraud schemes. In the aftermath, Democracy Partners' founder "stepped back" from a role in Democratic efforts to elect Clinton, and a Democratic operative at another organization was fired.

Lauren Windsor, then an associate at the firm, had a front-row seat to the deceptionâ... and the fallout. She then decided to try and stop Oâ... Keefe and his group, [Project Veritas](#), from doing it again.

Windsor began cataloguing everything she knew about Project Veritas and the Oâ... Keefe operative that had infiltrated Democracy Partners. The project began as prep work for potential litigation, but Windsor eventually circulated it privately among other liberal activists. Now the dossiers Windsor created on operatives associated with Oâ... Keefe and Project Veritas have grown into â... [Project Veritas Exposed](#),â... a collection of online profiles andâ... more importantly for Oâ... Keefeâ... s targetsâ... pictures of people known to work with Oâ... Keefe.

The site, launched in January, is based around pictures of Oâ... Keefeâ... s associatesâ... what Windsor describes as â... a photo array that you might get from a police lineup.â... Itâ... s a layout that Windsor hopes potential Oâ... Keefe targets can use as a reference if they suspect theyâ... ve been approached by a Project Veritas agent, even one disguised with a wig or fake mustache.

â... Most people would not be able to recognize James Oâ... Keefe if he walked into their organization or place of business,â... Windsor said. â... It doesnâ... t need to be him, it could be any of the 30 people that are on his staff, youâ... re never going to be able to memorize all the faces.â...

Oâ... Keefe and Project Veritas didnâ... t respond to The Daily Beastâ... s requests for comment.

RELATED IN POLITICS

.

[FBI Probes Hack That Unleashed a Flood of Scandals](#)

.

[Big Ethanol Turns Its Fire on Scott Pruitt](#)

[Roger Stone Encouraged Trump to Pardon Marcus Garvey](#)

Along with aliases used by Project Veritas operatives, the site also notes the outlandish clothing affectations that can give away associates of Oâ... Keefe, who became famous for dressing as a pimp during one sting.

One alleged Project Veritas associate, for example, has an â... affinity for wearing kiltsâ... in his stings. The site also warns to be on the lookout for people wearing unusual clothing, specifically citing lederhosen as an example.

Not everyone in the Project Veritas Exposed site is going undercover for Oâ... Keefeâ... Donald Trump is on the list because his foundation [made contributions](#) to Project Veritas, for example. But Windsor says everyone listed on the site has documented professional ties with Oâ... Keefe or Project Veritas.

While Oâ... Keefe has pulled off a number of noteworthy successes since he entered the public consciousness with his 2009 sting against liberal community group ACORN, some of his other efforts have blown up in spectacular fashion.

Those failures are often because his operatives were outed in advance, either by their targets or by someone within Project Veritas. In 2010, Oâ... Keefe tried to lure a CNN reporter onto a boat filled with sex toys ([itâ... s a long story](#)), only to have a Project Veritas staffer alert his target before the sting could take place. And in 2016, Oâ... Keefe [inadvertently self-sabotaged](#) by accidentally leaving a voicemail detailing a sting during a phone call with one of his targets.

GET THE BEAST IN YOUR INBOX!

SUBSCRIBE

Increasingly, though, groups targeted by Project Veritas are launching counter-stings of their own. Last year, *The Washington Post* [busted](#) an Oâ... Keefe operative who had approached the paper claiming to be a victim of molestation by then-Republican Senate candidate Roy Moore. The Oâ... Keefe associate kept repositioning the hidden camera in her bag during one meeting with a *Post* reporterâ... unaware that she was filmed by the *Post*â... s own hidden camera a few tables away.

Windsorâ... s data-gathering on Oâ... Keefeâ... s crew saw its first public success in January 2017, when anti-Trump activist Ryan Clayton, using a tip from Windsor, began a counter-sting against an O'Keefe operative. Clayton eventually filmed the Oâ... Keefe associate unrolling the scheme he was supposed to be caught on tape agreeing to: offering large sums of money in exchange for disrupting the Trump inauguration. When confronted, the Oâ... Keefe staffer fled, saying she wanted a lawyer.

Windsor, now the executive director of American Family Voices, a progressive nonprofit, said she fields dozens of requests a week from liberal groups who think their latest intern or potential donor could actually be working for Oâ... Keefe. Her top piece of advice: Be wary of little-known donors suddenly offering large sums of money.

â... If it sounds too good to be true, it probably is,â... Windsor said.

With Oâ... Keefeâ... s sting on Democracy Partners now the subject of [a lawsuit](#), Windsor doubts Oâ... Keefe launch a sting against her. But then, she reconsiders: â... I wouldnâ... t put anything past James Oâ... Keefe.â...

Exclusive: Tim Berners-Lee tells us his radical new plan to upend the World Wide Web

With an ambitious decentralized platform, the father of the web hopes itâ... s game on for corporate tech giants like Facebook and Google.

[Photo: Flickr user [gdsteam](#)]

BY KATRINA BROOKER 5 MINUTE READ

Last week, Tim Berners-Lee, inventor of the World Wide Web, asked me to come and see a project he has been working on almost as long as the web itself. Itâ... s a crisp autumn day in Boston, where Berners-Lee works out of an office above a boxing gym. After politely offering me a cup of coffee, he leads us into a sparse conference room. At one end of a long table is a battered laptop covered with stickers. Here, on this computer, he is working on a plan to radically alter how all of us live and work on the web.

â... The intent is world domination,â... Berners-Lee says with a wry smile. The British-born scientist is known for his dry sense of humor. But in this case, he is not joking.

This week, Berners-Lee will launch, [Inrupt](#), a startup that he has been building, in stealth mode, for the past nine months. Backed by Glasswing Ventures, its mission is to turbocharge a broader movement afoot, among developers around the world, to decentralize the web and take back power from the forces that have profited from centralizing it. In other words, itâ... s game on for Facebook, Google, Amazon. For years now, Berners-Lee and other internet activists have been dreaming of a digital utopia where individuals control their own data and the internet remains free and open. But for Berners-Lee, the time for dreaming is over.

â... We have to do it now,â... he says, displaying an intensity and urgency that is uncharacteristic for this soft-spoken academic. â... Itâ... s a historical moment.â... Ever since revelations emerged that Facebook had allowed peopleâ... s data to be misused by political operatives, Berners-Lee has felt an imperative to get this digital idyll into the real world. In a [post published this weekend](#), Berners-Lee explains that he is taking a sabbatical from MIT to work full time on Inrupt. The company will be the first major commercial venture built off of Solid, a decentralized web platform he and others at MIT have spent years building.

A NETSCAPE FOR TODAYâ... S INTERNET

If all goes as planned, Inrupt will be to Solid what Netscape once was for many first-time users of the web: an easy way in. And like with Netscape, Berners-Lee hopes Inrupt will be just the first of many companies to emerge from Solid.

â... I have been imagining this for a very long time,â... says Berners-Lee. He opens up his laptop and starts tapping at his keyboard. Watching the inventor of the web work at his computer feels like what it might have been like to watch Beethoven compose a symphony: Itâ... s riveting but hard to fully grasp. â... We are in the

Solid world now,â... he says, his eyes lit up with excitement. He pushes the laptop toward me so I too can see.

On his screen, there is a simple-looking web page with tabs across the top: Timâ... s to-do list, his calendar, chats, address book. He built this appâ... one of the first on Solidâ... for his personal use. It is simple, spare. In fact, itâ... s so plain that, at first glance, itâ... s hard to see its significance. But to Berners-Lee, this is where the revolution begins. The app, using Solidâ... s decentralized technology, allows Berners-Lee to access all of his data seamlesslyâ... his calendar, his music library, videos, chat, research. Itâ... s like a mashup of Google Drive, Microsoft Outlook, Slack, Spotify, and WhatsApp.

The difference here is that, on Solid, all the information is under his control. Every bit of data he creates or adds on Solid exists within a Solid podâ... which is an acronym for personal online data store. These pods are what give Solid users control over their applications and information on the web. Anyone using the platform will get a Solid identity and Solid pod. This is how people, Berners-Lee says, will take back the power of the web from corporations.

[Image courtesy of Tim Berners-Lee] For example, one idea Berners-Lee is currently working on is a way to create a decentralized version of Alexa, Amazonâ... s increasingly ubiquitous digital assistant. He calls it Charlie. Unlike with Alexa, on Charlie people would own all their data. That means they could trust Charlie with, for example, health records, childrenâ... s school events, or financial records. That is the kind of machine Berners-Lee hopes will spring up all over Solid to flip the power dynamics of the web from corporation to individuals.

A NEW REVOLUTION FOR DEVELOPERS?

Berners-Lee believes Solid will resonate with the global community of developers, hackers, and internet activists who bristle over corporate and government control of the web. â... Developers have always had a certain amount of revolutionary spirit,â... he observes. Circumventing government spies or corporate overlords may be the initial lure of Solid, but the bigger draw will be something even more appealing to hackers: freedom. In the centralized web, data is kept in silosâ... controlled by the companies that build them, like Facebook and Google. In the decentralized web, there are no silos.

Starting this week, developers around the world will be able to start building their own decentralized apps with tools through the Inrupt site. Berners-Lee will spend this fall criss-crossing the globe, giving tutorials and presentations to developers about Solid and Inrupt. (There will be a Solid tutorial at our [Fast Company Innovation Festival](#) on October 23.)

â... Whatâ... s great about having a startup versus a research group is things get done,â... he says. These days, instead of heading into his lab at MIT, Berners-Lee comes to the Inrupt offices, which are currently based out of Janeiro Digital, a company he has contracted to help work on Inrupt. For now, the company

consists of Berners-Lee; his partner John Bruce, who built Resilient, a security platform bought by IBM; a handful of on-staff developers contracted to work on the project; and a community of volunteer coders.

Later this fall, Berners-Lee plans to start looking for more venture funding and grow his team. The aim, for now, is not to make billions of dollars. The man who gave the web away for free has never been motivated by money. Still, his plans could impact billion-dollar business models that profit off of control over data. Itâ... s not likely that the big powers of the web will give up control without a fight.

When asked about this, Berners-Lee says flatly: â... We are not talking to Facebook and Google about whether or not to introduce a complete change where all their business models are completely upended overnight. We are not asking their permission.â...

Game on.

FINALLY, One state decides to stand-up to voter fraud. Pennsylvania to require voting machines with paper backup

THE REST OF AMERICA DEMANDS THAT ELECTION FRAUD CAPITOL: CALIFORNIA, USE PAPER BALLOTS

MICHAEL RUBINKAM ,

[Associated Press](#)â...¢

Pennsylvania Gov. Tom Wolf on Friday ordered counties that plan to replace their electronic voting systems to buy machines that leave a paper trail â... a safeguard against hacking â... but his budget doesn't include any money to fund the replacement of the state's aging, increasingly vulnerable fleet.

The Democrat's administration said the move to require that new systems include a paper backup will increase the security of voting systems and make balloting easier to audit.

"This directive will ensure that the next generation of the commonwealth's voting systems conforms to enhanced standards of resiliency, auditability and security," Acting Secretary of State Robert Torres said in a statement.

The Wolf administration said in a statement later Friday that it's working on a comprehensive overhaul of Pennsylvania's election apparatus, including its voter registration database. Hackers scanned voter registration databases around the nation before the 2016 presidential election.

The state, however, is not requiring counties to discard their old equipment, at least for now. The directive only requires them to buy machines with a paper backup if they decide to switch systems. Nor does the Wolf administration's budget plan , released this week, include any new money to help counties replacing their aging systems.

Marybeth Kuznik, the founder and executive director of VotePA, a nonprofit advocacy group that opposes paperless electronic voting, said counties don't have the money to buy new machines.

"The General Assembly needs to step up to the plate and budget for this," she said.

Nevertheless, Kuznik, a longtime election judge outside Pittsburgh, called Friday's order "a huge step forward for Pennsylvania, for better elections. Just huge."

Pennsylvania is one of 13 states where most or all voters use antiquated machines that store votes electronically without printed ballots or other paper-based backups that could be used to double-check the vote, according to researchers at New York University's Brennan Center for Justice.

So-called direct-recording electronic machines make it almost impossible to know if they've accurately recorded individual votes or if anyone tampered with the count.

Election officials in 41 states plan to use older machines in the 2018 midterm elections, the Brennan Center said this week. Some of those machines have paper backups. Most election officials surveyed by the Brennan Center said they lacked funds to replace machines that are more than a decade old.

"In the world's leading democracy, we can't take the position that we can't afford to do elections correctly," said David Hickton, a former federal prosecutor and founding director of the University of Pittsburgh Institute

for Cyber Law, Policy, and Security. "The recent attacks on our election should concern everybody, and a priority has to be placed on doing what is necessary."

Most Pennsylvania counties replaced their machines more than a decade ago with money appropriated by Congress for election upgrades. With those machines at or near the end of their expected lifespans, the County Commissioners Association of Pennsylvania is pushing for state and federal funding to help counties buy replacements. New voting machines can run \$3,000 apiece.

The vast majority of Pennsylvania's fleet of more than 20,000 electronic voting machines leave no paper trail, according to a 2014 tally by state election officials.

Wolf's Department of State said it has "made no determination" on whether it will eventually bar the use of the antiquated machines, raising the possibility that such a move is under consideration. A spokeswoman did not immediately respond to an email seeking clarification.

Virginia banned the use of touch-screen voting machines in November's gubernatorial contest over concerns the equipment could be hacked.

The federal government in September told election officials in at least 21 states, including Pennsylvania, that hackers targeted their systems before the 2016 presidential election. At the time only Illinois reported that hackers had succeeded in breaching its systems. The U.S. Department of Homeland Security has said there's no evidence that vote tallies or registration databases were altered.

Rep. Tulsi Gabbard Introduces Securing America's Elections Act to Ensure Integrity of 2018 Elections. FINALLY- A RUSSIA-PROOF ELECTION PLAN

Washington, DC... Rep. Tulsi Gabbard (HI-02) [today introduced legislation](#) to protect the country's election infrastructure from cyber-hackers by requiring the use of voter-verified paper ballots or a paper ballot backup in federal elections. It authorizes emergency funding to empower every state to use voter-verified paper ballots that produce an auditable paper trail, beginning with the 2018 elections. It also addresses the need to ensure safe and secure software is utilized in voting machines on Election Day.

The Securing America's Elections Act expands on progress made in [Hawaii and 14 other states](#) that currently produce voter-verified paper ballots to provide the American people with a secure, reliable, and independent record of their votes.

According to the Department of Homeland Security, [21 U.S. states' electoral systems](#) faced attempted hacking in the 2016 election. Shortly after, at the world's longest-running and largest hacking conference, DEFCON [revealed startling cyber vulnerabilities in US election infrastructure](#): hackers easily breached every piece of election equipment, some in mere minutes. Participants with limited prior hacking knowledge and few tools and resources were able to undermine and manipulate the privacy, integrity, and accessibility of election equipment - most of which is still widely used in state and local elections today. Following these revelations from DEFCON, states like [Virginia took action and switched to a voter-verified paper ballot system](#) in their 2017 election to ensure voter integrity and confidence in their elections infrastructure. They produced the highest voter turnout in two decades. However, serious vulnerabilities remain in most states.

[Video of Rep. Tulsi Gabbard's Speech on the House Floor is Available Here](#)

[Rep. Tulsi Gabbard questioned top homeland security, cybersecurity, and Virginia elections officers on the integrity of the nation's voting machines.](#)

Congresswoman Tulsi Gabbard said:

... The Department of Homeland Security reported that 21 state electoral systems were targeted in the 2016 election, revealing serious vulnerabilities and threatening the integrity of our elections. Soon after, at DEFCON, the world's largest hacking conference, hackers breached every piece of election equipment, some within mere minutes. We cannot ignore these vulnerabilities that erode voter confidence and expose our election's infrastructure to manipulation by adversaries. With 2018 elections quickly approaching, Congress must act now and work with states to safeguard our electoral infrastructure and ensure that each and every American vote is counted faithfully and accurately.

... The Securing America's Elections Act will ensure our elections are hack-proof by providing the American people with an auditable, reliable, paper record of their votes in time for the 2018 elections. It will

also begin to address the effectiveness and security of our voting machine software. This is critical to renew our citizensâ faith in the electoral process.â

Brian Fox, Board Member, National Association of Voting Officials, said, "We are pleased to see Congresswoman Tulsi Gabbard leading the country toward safe and secure election systems. The open source software language in her legislation, in addition to the necessary paper ballot component, will give appropriate security direction to the nation's election officials. Congresswoman Gabbard is appreciated as a pioneer advocating the science of protecting our democracy."

Background:

Rep. Tulsi Gabbardâ s Securing Americaâ s Elections Act would ensure an auditable and secure record of every Americanâ s vote by:

- Requiring the use of voter-verified paper ballots or a paper ballot backup in federal elections that if needed, can be audited and counted by hand, optical scanner, or similar device.
- Allowing voters to verify their ballot and correct any errors before their permanent paper ballot is preserved for official records.
- Establishing voter-verified paper ballots as the correct record of the total votes cast, in the event of any inconsistencies or irregularities between electronic and paper vote tallies.
- Authorizing emergency funding for states to meet the costs of ensuring paper ballots/paper ballot backups by the 2018 federal elections.
- Studying the effectiveness and security of using [open-source electronic voting software](#), which could potentially provide additional security and lower costs of upgrading our nationâ s election infrastructure.

In an [Oversight and Government Reform Hearing](#), Edgardo CortÃ©s, Commissioner of the [Virginia Department of Elections](#), confirmed the lack of public confidence and vulnerabilities of existing voting systems in the state of Virginia and across the country. Following these revelations of vulnerable election equipment at DEFCON, Virginia switched to a voter-verified paper ballot system before the 2017 election. The Virginia Department of Elections didnâ t receive a single complaint questioning the integrity of the 2017 election and produced the highest voter turnout in two decades.

Asked by Rep. Tulsi Gabbard about the decision to transition to a voter-verified paper ballot election system, Edgardo CortÃ©s, Commissioner of the Virginia Department of Elections said, â When it came down to the final decision about what to do with the equipment, our biggest consideration was if there was some issue reported on Election Day, would we have the confidence to go out and tell our voters that the results from the machines were accurate and that we could confirm that. I think that ultimately, we determined, in consultation with our wonderful staff at the state IT agency and their assessment, that we wouldnâ t be in a position to do that with the equipment that we were using. Without that independent verification, that paper ballot, there would be no way to do that. I think that ultimately was the moment that decertification moved forward, and we decided to have paper ballots state-wide for this past November.â

Five Ways To Defeat The Social Justice Warriors

BY [IWB](#) Â·

by Daniel Carter

If you are a freedom loving American, you are probably well aware of the rabid social justice movement. United States college professors have successfully indoctrinated the past few generations with Marxist/Communist ideas, and now it has finally culminated into a movement that threatens to destroy the enlightenment values of the west. People who value individual liberty over group identity are often hesitant to become tribal. However, if we donât come together and speak up soon, our land of the free may be permanently corrupted. Call the movement conservative, classically liberal, centrist or libertarian. It really doesnât matter. What matters is preventing social justice warriors from seizing more power.

What better way to defeat the social justice warriors with the tactics that inspired some of their heroes. Saul Alinskyâs [Rules for Radicals](#) book helped Hillary Clinton and Barack Obama rise to the top of the political world. Despite the book being used by leftist politicians, itâs actually nonpartisan and very informative. Plus, I like the idea of using the leftâs weapons against them, which is a theme I will touch on again later in the article. The book includes 13 rules, but I will highlight 5 of the most useful ones.

Go Outside The Expertise Of The Enemy

The social justice warriors donât know history, economics or much of anything outside their narrow ideology. However, they do know feelings. So, they will have the advantage in swaying other emotional people to their side. Instead of making emotional arguments when dealing with SJWs, stay calm and stick to logic. Their inane ideas of communist utopia can be easily disproven with a hundred years of historical data that show how horrific Marxist ideology was in practice. The enemyâs expertise is usually limited to the distorted views they are taught in college. We will gain the upper hand by simply being more well-read.

Make The Enemy Live Up To Its Own Rules

Weâve seen this rule play out a lot in recent weeks, and we should keep hammering on it. For at least a couple years now, the SJW/Antifa people have led the crusade against free and open dialogue on social media. They have also begun to crack down on comedy when it ventures into areas they deem offensive (i.e. almost everything). Now it has come back to bite them, [Sam Seder](#), a leftist political commentator for MSNBC, was recently fired for a rape joke he made via tweet in 2009. The joke wasnât funny, but firing someone over an off-color joke is against my principals. However, these are the rules the SJWs chose, and now they must be forced to live by them.

Something else that came back to bite them was their strict feminist ideology. They see rape and sexual assault everywhere, even in âoffensiveâ language. Their #metoo campaign opened up the floodgates of allegations that are now devouring their own. Al Franken, Harvey Weinstein, Matt Lauer and George Takei were all once part of the lefty PC crowd. Now they have been exposed for the creeps they are.

Article Continues Below

The #metoo campaign turned out to be alright, but the goal is to eventually get rid of the SJW rules. However, while the rules are here, the enemy must share in the misery.

Ridicule The Enemy Relentlessly

This might be the easiest rule to follow when the enemies are social justice warriors. Everything from their beliefs to their appearance is silly. Let the world know how silly they are and donât let up. This will infuriate the enemy into making costly mistakes, including lashing out violently.

Use Tactics Your Allies Enjoy

This rule transitions perfectly from the last rule. To defeat our enemy, we must use tactics that we enjoy using. This will help us keep constant pressure on the SJWs without us tiring of the onslaught. Comedy is by far our most effective and enjoyable tactic. It is also something the enemy does not do nearly as well. Their seriousness has killed their comedic spirit, therefore killing their ability to connect with people. Think about the success our side had with the Trump vs. CNN memes. The SJWs were furious while the rest of the world was laughing. Letâs keep the comedy onslaught coming.

Hereâs a video of an Antifa member admitting their lack of humor is hurting them:

The SJW/Antifa people have many negatives that we could use against them. One negative that is particularly egregious is their strong propensity towards violence. Over the past two years, we have seen dozens of unprovoked attacks against their political enemies. People who are foolish enough to believe they are fighting for utopia will throw morality and decency away in order to win. This includes using violence against nonviolent people. Even though the mainstream media has been terrible at covering these violent acts, the world is starting to catch on. This paints their side as sinister. The general public is now more likely to empathize with us instead of the violent thugs on the other side. Iâm not saying not to defend yourself, but let the enemy be the instigators of violence.

Never be these morons:

Conclusion

These are just a handful of ways to help you defeat the social justice warrior enemy. There are many more rules to follow, inside and outside Rules for Radicals. Let me know in the comments if you can think of any more way to defeat the enemy. No matter how absurd they appear, this Marxist inspired movement must be taken seriously and promptly defeated. Itâs better to do it now than later. If we can prevent it from boiling over into violence, we should. Never stop fighting for the principals of liberty.

From Peruvian Temples To CIA Spy Attacks: Infra Sound and Psy-Ops Acoustics

Peruvians may have used sound to get high on. Spies now use sound to kill and injure you.

Infrasound, sometimes referred to as **low-frequency sound**, is sound that is lower in frequency than 20 [Hz](#) or cycles per second, the "normal" limit of human hearing. Hearing becomes gradually less sensitive as frequency decreases, so for humans to perceive infrasound, the [sound pressure](#) must be sufficiently high. The ear is the primary organ for sensing infrasound, but at higher intensities it is possible to feel infrasound vibrations in various parts of the body.

The study of such sound waves is sometimes referred to as **infrasonics**, covering sounds beneath 20 Hz down to 0.1 Hz and rarely to 0.001 Hz. People use this frequency range for monitoring earthquakes, charting rock and petroleum formations below the earth, and also in [ballistocardiography](#) and seismocardiography to study the mechanics of the heart.

Infrasound is characterized by an ability to cover long distances and get around obstacles with little [dissipation](#). In music, [acoustic waveguide](#) methods, such as a large [pipe organ](#) or, for reproduction, exotic loudspeaker designs such as [transmission line](#), [rotary woofer](#), or traditional [subwoofer](#) designs can produce low-frequency sounds, including near-infrasound. Subwoofers designed to produce infrasound are capable of sound reproduction an octave or more below that of most commercially available subwoofers, and are often about 10 times the size.

Infrasound is defined by the [American National Standards Institute](#) as "sound at frequencies less than 20 Hz."

The [Allies](#) of [World War I](#) first used infrasound to locate [artillery](#).^[1] One of the pioneers in infrasonic research was French scientist [Vladimir Gavreau](#).^[2] His interest in infrasonic waves first came about in his laboratory during the 1960s, when he and his laboratory assistants experienced shaking laboratory equipment and pain in the [eardrums](#), but his microphones did not detect audible sound. He concluded it was infrasound caused by a large fan and duct system, and soon got to work preparing tests in the laboratories. One of his experiments was an infrasonic whistle, an oversized [organ pipe](#).^{[3][4][5]}

Sources

Patent for a double bass reflex [loudspeaker enclosure](#) design intended to produce infrasonic frequencies ranging from 5 to 25 hertz, of which traditional [subwoofer](#) designs are not readily capable.

Infrasound can result from both natural and man-made sources:

- Natural events: infrasonic sound sometimes results naturally from [severe weather](#), [surf](#),^[6] [lee waves](#), [avalanches](#), [earthquakes](#), [volcanoes](#), [bolides](#),^[7] [waterfalls](#), [calving](#) of [icebergs](#), [aurorae](#), [meteors](#), [lightning](#) and [upper-atmospheric lightning](#).^[8] [Nonlinear ocean wave](#) interactions in ocean storms produce pervasive infrasonic vibrations around 0.2 Hz, known as [microbaroms](#).^[9] According to the Infrasonics Program at [NOAA](#), infrasonic arrays can be used to locate avalanches in the Rocky Mountains, and to detect [tornadoes](#) on the high plains several minutes before they touch down.^[10]
- Animal communication: [whales](#), [elephants](#),^[11] [hippopotamuses](#),^[12] [rhinoceros](#),^[13]^[14] [giraffes](#),^[15] [okapi](#),^[16] and [alligators](#) are known to use infrasound to communicate over distancesâ... up to hundreds of miles in [the case of whales](#). In particular, the [Sumatran Rhinoceros](#) has been shown to produce sounds with frequencies as low as 3 Hz which have similarities with the [song of the humpback whale](#).^[14] The [roar](#) of the [tiger](#) contains infrasound of 18 Hz and lower,^[17] and the [purr](#) of [felines](#) is reported to cover a range of 20 to 50 Hz.^[18]^[19]^[20] It has also been suggested that migrating birds use naturally generated infrasound, from sources such as [turbulent](#) airflow over mountain ranges, as a [navigational](#) aid.^[21] Infrasound also may be used for long-distance communication, especially well documented in [baleen whales](#) (see [Whale vocalization](#)), and [African elephants](#).^[22] The frequency of baleen whale sounds can range from 10 [Hz](#) to 31 kHz,^[23] and that of elephant calls from 15 Hz to 35 Hz. Both can be extremely loud (around 117 [dB](#)), allowing communication for many kilometres, with a possible maximum range of around 10 km (6 mi) for elephants,^[24] and potentially hundreds or thousands of kilometers for some whales.^[citation needed] Elephants also produce infrasound waves that travel through solid ground and are sensed by other herds using their feet, although they may be separated by hundreds of kilometres. These calls may be used to coordinate the movement of herds and allow [mating elephants](#) to find each other.^[citation needed]

Human singers: some vocalists, including [Tim Storms](#), can produce notes in the infrasound range.[\[25\]](#)

- Human created sources: infrasound can be generated by human processes such as [sonic booms](#) and [explosions](#) (both chemical and [nuclear](#)), or by machinery such as [diesel engines](#), [wind turbines](#) and specially designed mechanical [transducers](#) (industrial vibration tables). Certain specialized [loudspeaker](#) designs are also able to reproduce extremely low frequencies; these include large-scale [rotary woofer](#) models of [subwoofer](#) loudspeaker,[\[26\]](#) as well as large [horn loaded](#), [bass reflex](#), [sealed](#) and [transmission line](#) loudspeakers.[\[27\]\[28\]](#)

Sound

In â... Of Earth and Airâ... by Lyz Cooper, [â... Featured in Sacred Hoop Magazine November 07â...](#) a curious theory is proposed. She says:

Once thought by anthropologists to be nothing more than â... amusing liquid containersâ... , the Peruvian whistling vessels are now telling their true story to anyone who is ready to listen. Andean creation legends say that the creator made the first men and women from clay which was then breathed into to form the first life on Earth. Alpamasca, the Inca word for a personâ... s body means â... animated earthâ... .

For centuries, archaeologists were finding these vessels at many burial sites and sacred places, but their meaning and use was shrouded in mystery for centuries. In recent years their story is being discovered and they are once again being used for journeying to other realms as well as helping to improve health and well-being. Some of the oldest whistles have been dated at around 500 â... 300BC and were made by the Vicus and Salinar people. The most commonly found are Moche, Chimu and Inca in origin and date from 1000 AD until shortly after the Spanish conquest in 1532. The vessels are usually made in the shape of animals, people or mythical figures.

Sound has long been associated with shifting consciousness and enabling the player or listener to contact other realms, nature and the different aspects of self. Acoustically the whistles are very interesting. The sound they produce is high pitched and similar

to that of the old whistling kettles. When played on their own they sound rather uninteresting but when combined with groups of whistles it becomes clear why they were made in this way.

People who have heard groups of whistles being played report hearing a buzzing sound that seems to come from inside their head and their eardrums are being vibrated. Every sound we hear produces minute vibrations on the surface of the eardrum which in turn are translated into nerve impulses which the brain decodes. The pitches of each vessel are almost identical but the minute differences in pitch produce a psycho-acoustic effect that has been likened to â... sonic ayahwascaâ... . Very close-matched sounds create multiple sets of ripples across the eardrum which the brain attempts to make sense of. The brain registers each sound separately but also perceives other sounds which appear to come from inside the head. This effect increases when a greater number of whistles are played until there is a build up of different buzzing sounds and pulses both inside and outside the head. This phenomenon is the key that unlocks the doorway to other realms. The whistles are made so that the sound-hole is level with the third eye as you play (which in itself is extremely interesting as this further highlights that the makers of these wonderful vessels fully intended to use the sound to alter consciousness).

The importance of the breath also features heavily in many cultures throughout the world. Life-force/chi/prana/vital energy is taken into the body on the breath. The player of a vessel is required to be attentive to the direction of their breath to enable their whistle to produce the best beating sounds. The slow, directed breath allows the player to relax and helps them to journey with the sound. It is also necessary for the player to listen to the other players in the group, therefore becoming less conscious of â... selfâ... and more aware of the group energy. Even if you are not playing, the sounds can still produce amazing effects and receivers have also had powerful experiences. One listener reported shape-shifting into a black panther and prowling around the group on all fours until coming back to the â... here and nowâ... . This experience proves that you donâ... t have to be playing to receive the effect of these wonderful tools of transformation. Other players have been transported to the stars, taken deep inside the Earth and had conversations with spirit guides or relatives that have passed into spirit. There are too many experiences to mention in this article, but suffice to say that I am very respectful of the potential that the vessels hold within them.

It is very rare for a person not to have an experience with the whistling vessels but some people find that they need a few sittings with them until they have got used to the sound and feel comfortable. It is also important that a safe and supported sacred space is created before working in this way. Not every sound is for every body and some people do not like the piercing sound of the vessels or are not comfortable with the consciousness shifting effects that the whistles facilitate.

My personal journey with the whistling vessels began when I came across a copy of

Daniel Statnekovâ... s book, â... Animated Earthâ... . I had been working with sound for many years and after reading this book I knew that I had to experience the whistling vessels first-hand. I contacted Daniel Statnekov in the USA and spoke about my passion for sound and the desire to work with the whistles. Following a long telephone conversation he

informed me that he would be happy to make a set for me.

Over the next few months I received regular updates from Daniel regarding the progress of my vessels. He asked if I would like to contribute something to the fabric of the vessels so I sent a piece of quartz crystal which I had lovingly programmed and ground up for him to add to the special clay mixture that has taken him years to perfect. The making of each vessel is a sacred process and once fired, the whistles were left outdoors to be energised by the elements. A month or so later I found myself sitting in the living room of a house in San Francisco where I was to receive my first introduction to the power of the vessels.

In the centre of the room sat fourteen vessels arranged in a circle upon a rug. The vessels were replicas of a Chimu whistling vessel (picture attached). The Chimu kingdom stretched for more than six hundred miles along the northwest coast of what is now known as Peru. The Chimu were an extensive civilisation with a highly developed agricultural, artistic and political state.

After a few minutes of playing I felt a strong tug on my solar plexus as if someone had attached a string to it and was pulling fairly hard. In my mindâ... s eye I saw a black hole open in front of me and my solar plexus lurched as if I had just gone over a hump-back bridge at speed. After a momentâ... s hesitation I took the plunge and went in. It was like travelling down a wormhole at a tremendous speed for a few seconds and then suddenly I was spat out of the other end into silence and bliss. Every molecule of my being felt as though it was disconnected from â... selfâ... and yet

profoundly connected to all that is. I felt expansive, light and full of love and peace. I was not aware of the room that my physical body was still sitting in although in the distance I heard a faint sound of the whistling vessels being played. This sound reassured me part of me was still â... attachedâ... to the room. It felt as though I had phased-out of one dimension and into another where peace and tranquillity reigned supreme.

A few minutes later I snapped back into the dimension that I presently call â... homeâ... and became aware of the room and the people around me. I took a while to ground myself, but afterwards felt refreshed, centred and energised.

Working with sound in this way can be a powerful sacred experience and can open doorways to exploring the self and other realms. My experience is that the whistles have an accumulative effect and the more you use them, the easier and quicker it is to enter back into an altered state. I always work with the vessels in a mindful, sacred way. Working with them at a sacred site such as Stonehenge can be extremely powerful as the interaction between the energy of the sound and the energy of the earth adds a special quality. Working in caves or places with lively acoustics such as churches and temples is also a very special experience.

Measurements were made of the frequency and sound pressure level from 73 ceramic whistling bottles blown by compressed air. The bottles represent nine pre-Columbian civilizations which inhabited the north and central coasts and highlands of Peru during a 2000-year time span from 500 B.C. to A.D. 1550. We have found that Peruvian whistling bottles group acoustically by culture. The bottles are generally regarded by anthropologists as utilitarian liquid containers with the whistle providing an amusing method of venting. We are suggesting an alternative interpretation of the bottles as having been specifically produced as whistles. We base this interpretation on the clustering of frequencies by individual cultures, the fact that the frequencies fall in the region of the ear's greatest sensitivity, and the high sound pressure levels produced by the bottles when blown orally.

Ceramic whistling bottles were produced on the north and central coasts and highlands of Peru for two thousand years beginning ca. 500 B.C. and continuing until shortly after the Spanish conquest of Peru in 1532. Anthropologists generally regard the bottles as utilitarian containers with the whistle providing an amusing vent to facilitate the passage of air when pouring and filling with liquid.¹⁻⁵ It has also been suggested that these bottles were used as whistles, possibly in a ritual context.^{3, 6-8} The specimens tested in this study were found at gravesites by huaqueros (graverobbers) and there is nothing in the Spanish Chronicles of the New World or in the pre-Columbian Peruvian iconography that suggest their original use.

We have collected data on the harmonic structure of the sounds from 73 whistling bottles. The 73 bottles represent nine cultures from the north and central coasts and highlands of Peru, encompassing a time span from ca. 500 B.C. to A.D. 1550.

One of us (D.K.S.) assembled 73 whistling bottles from private collections, the Los Angeles County Museum of Natural History, and UCLA's Museum of Cultural History. All but three bottles were identified on the basis of physical appearance by Christopher B. Donnan, Director of UCLA's Museum of Cultural History, as belonging to one of the nine cultures listed in Table I. (Table I and Figures 1 - 3, 6 - 7 will eventually be included). Three bottles could not be assigned to a specific culture without ambiguity and four bottles had been restored. The integrity of the original acoustical signatures of the four restored bottles could not be assured and these were not included in the sample. Of the 69 bottles included in the sample, 53 were double chambered (Figs. 1 and 2), 14 were single chambered (Fig.3), one was four chambered, and one was six chambered (Fig.3). The four bottles not included in the sample because of restoration were all double chambered.

All of the whistling bottles tested were made of ceramic. The physical dimensions are 15-30 cm high, 20-30 cm long, and 10-20 cm wide. The bottles are comprised of one or more chamber(s) connected by an upper bridge handle, often containing the whistle, and a lower pottery tube that enables liquid or air to flow from one chamber to the other (Fig. 4 and Fig. 5). The lower tube is the sole connection between the chambers through which liquid or air can flow. The single chambered bottles are surmounted by a tubular spout connected to an effigy by a bridge handle (Fig.3). When the bridge handle contains the actual whistle (hereafter referred to as the "exposed-type"), the whistle is "sounded" by means of an air stream which exits the effigy chamber through a small aperture in that chamber (Fig. 4). In the case of the "enclosed-type" whistle, the whistle cavity is contained within the effigy itself (Fig. 5).

The dimensions of the whistle cavities of seven Chimã° bottles were measured by filling the cavities with water from a syringe to determine their volume. The effective diameter and length of their orifices were measured with a steel rule. Since the whistles were in some cases partially obscured by other features of the bottles and their orifices did not always have circular cross sections, uncertainties in measuring the diameters and/or lengths were occasionally as high as 30%. The Helmholtz frequencies f_h of the seven bottles were calculated from the following expression, with an effective length l' with a correction which is a compromise between that for a flanged and unflanged tube.

$$f_h = (c/2\pi)(S/l'V)^{1/2},$$

where $S = 1/4 \pi d^2$, d is the average diameter of the orifice, V is the volume of whistle cavity, $l' = l + 0.7d$, and c is the speed of sound in air. Cavity volumes were typically 0.6 to 1.0 cm³; orifice diameters were 3.5 - 4.5 mm, and orifice lengths, determined by the thickness of the ceramic, ranged from 1 - 3 mm. Averaged over the seven bottles, the deviation of the calculated frequencies from the measured frequencies was less than 7%. This is excellent agreement in consideration of the uncertainties in measuring the small physical dimensions of the whistle cavities.

With respect to the multiple chambered bottles, the traditional explanation for the whistle's function is that it acts as an air vent to permit the flow of liquid from one chamber to the other. In the case of the single

chambered bottles, the function of the whistle is again that of an amusing way to vent the vessel. When a bottle containing liquid is returned to an upright position after a portion of its liquid is poured from the tubular spout, the remaining liquid, seeking its own level, displaces the air in the effigy chamber. This produces an air stream which is directed across the whistle's orifice.

The current interpretation is that whistling bottles were "sounded" in this manner by means of a displacement of air by liquid. However, when a bottle is "sounded" in this way, the tone produced is barely audible, not at all the intense sound created when a bottle is blown orally through the tubular spout. When a whistle is "sounded" orally the chamber(s) act as a surge tank to reduce wavering in the tone which may occur because of slight short-term variations in pressure at the spout.

The bottles were placed in an anechoic chamber and pressurized air was used to produce the tones (Fig. 6). A Brüel & Kjær 2203 sound-level meter was suspended inside the chamber approximately 10 cm from the whistle in a position close to where a person's ear would be if the vessel had been blown orally. The air flow was then adjusted to give the maximum wide-band sound pressure level as indicated on the sound-level meter. We chose the maximum sound pressure level as the place to measure the frequency of the bottles for two reasons. The first being that it was always a unique point for each bottle. The volume flow rate of air or the blowing pressure varied from bottle to bottle and depended on physical properties of each bottle that were irrelevant to the actual whistle. The excess static pressure at the spout necessary to achieve the maximum sound varied from 1 - 3 kilopascals above ambient pressure, 10 - 30 cm of water as measured by a water filled U-tube. The necessary pressure was the same whether the bottle was blown orally or by compressed air. The second reason was that the blowing pressure necessary to achieve maximum sound pressure level was always low enough so that a person could sustain this maximum level for 15 - 20 sec. The maximum sound pressure level for each bottle was recorded and the average sound pressure level for all bottles from a single culture is reported in Table I under L. "Delta" L is the standard deviation of the sound pressure levels for each culture.

The output of the sound level meter was connected to a Hewlett-Packard model 3580-A Spectrum Analyzer with its bandwidth set at 10 Hz. The frequencies and relative sound pressure levels of the fundamental and partials for each bottle was recorded. The sound pressure level of the fundamental for each bottle is plotted against its frequency in Fig. 7. The average frequency of the fundamental for all bottles in a single culture is listed under f in Table I and the standard deviation of the fundamentals from that culture is listed under "delta" f. In the case of double-noted whistles, the frequency of the partial with the highest sound pressure level was chosen for calculating the averages in Table I and plotting the frequencies of the bottles in Fig. 7.

The partials were harmonics of the fundamental and typically decreased monotonically with increasing frequency. The fundamental was typically 60 dB above the noise level which was produced by the sound of the air rushing out of the bottle. In some cases as many as seven partials were distinguishable.

An examination of the frequency data in Table I and Fig. 7 strongly suggests that the nine cultures represented produced whistles in a frequency range specific to the particular culture which produced the bottles. The standard deviation for any one culture is significantly less than the standard deviation for the entire sample. The average frequency is not the sole distinguishing cultural characteristic of the bottles. In 20 of the 69

bottles in the sample, the whistle was contained within the effigy chamber. All 14 bottles from the Gallinazo, Vicus, Moche, and Huari cultures spanning a time period from 400 B. C. to A. D. 700 were of this "enclosed-type." In addition two of the four bottles not included in the sample because of restoration were "enclosed-type" whistles and both of these were from the Vicus culture as well. Of the remaining six "enclosed-type" whistles two were unspecified culturally, three were Chimú, and one was an Inca whistle.

Fourteen whistles produced two distinct tones depending on the blowing pressure applied at the spout. A lower frequency tone, with a frequency 0.65 ± 0.1 times the higher frequency tone, is produced when the blowing pressure is reduced by 1/3 to 1/2 of the pressure necessary to produce the tone of maximum sound pressure level. The wide-band sound pressure level of the lower frequency tone is typically 4 - 16 dB less than the tone of maximum sound pressure level for these double-noted whistles.

Thirteen of the 14 double-noted whistles were of the "enclosed-type," and one was of the "exposed-type." The single "exposed-type" double-noted whistle was from the Inca culture. Nine of the 14 double-noted whistles belonged to the Gallinazo, Vicus, Moche, or Huari cultures. Additionally, the two restored Vicus whistles not included in the sample were also double-noted "enclosed-type" whistles. Of the remaining five double-noted whistles, one was Chimú, two were Inca, and two were unspecified culturally.

Only one of 50 examples where the whistle was of the "exposed-type" produced a double note and this was the Inca example mentioned above. All three examples from the Recuay culture, spanning a time period of A. D. 100 through A. D. 500 were single-noted "exposed-type" whistles. All but three of 48 examples of Chancay, Chimú, and Inca cultures spanning a time period of A. D. 700 through A. D. 1550, produced a single tone irrespective of the air pressure, and all but four of the 48 were of the "exposed-type." The four which were of the "enclosed-type" were three Chimú, and one Inca. One of the "enclosed" Chimú and the Inca "enclosed" were double-noted. Two "enclosed" Chimú were single-noted, and one "exposed-type" Inca was double-noted as mentioned above.

The average frequency of the Gallinazo, Vicus, Moche, and Huari whistling bottles is 1320 Hz while the average frequency for the Recuay bottles is 2000 Hz. The average frequency for the Chancay, Chimú, and Inca bottles is 2670 Hz. It is apparent that the earlier cultures tended to produce double-noted, low-frequency, "enclosed-type" whistles while the later cultures generally produced single-noted, high-frequency, "exposed-type" whistles. In that the frequency is determined by the whistle cavity and not the pottery style, the frequency would be an additional method for determining cultural origins of whistling bottles.

On the basis of these data we suggest the possibility of using the frequency and type of whistle (enclosed vs exposed) as an additional means for determining cultural origins of Peruvian whistling bottles.

Reconsideration of Table I and Fig. 7 show that the frequencies of the bottles produced by a single culture tend on the average to be within $\pm 14\%$ of the average frequency for that individual culture. On the basis of the small fraction of an octave spanned by the frequencies of all bottles in any single culture we are

reasonably certain that the bottles were not used as musical instruments. However, when two or more bottles from a given culture are played simultaneously the perception of a wavering low frequency tone is very distinguishable. The clustering of frequencies by individual culture, the position of the frequencies in the region of the ear's greatest sensitivity (1 - 4 kHz), and the high sound levels produced by the bottles when blown orally, strongly suggest that the Peruvians produced whistling bottles as whistles - as contrasted to the traditional interpretation of them as utilitarian liquid containers.

Jeffrey Mishlove, a noted psycho-acoustic researcher and whistle-pot expert, claims that combinations of whistle-pots, water levels within the pots and timed deployments of the pots in a tribal circle, by coordinated individuals using the pots, creates measurable sounds in the center of the brain which are different sounds than those heard by a microphone near the human ear.

These reports indicate that sound can affect the mind. Is it possible to harm the brain, project sensory experiences into the brain and read sensory experiences from the brain? Yes! Scientists in Russia and China have reported doing it and Cambridge and Stanford scientists are reporting increasingly improved abilities to undertake these efforts in Science Daily.

Spy agencies have spent over \$900 billion dollars trying to see how to weaponize these sonic potentials. The Cuban diplomat probes may be the most public disclosures of such efforts. CNN describes the latest attacks:

â... US diplomats, families in Cuba targeted nearly 50 times by sonic attacks, says US officialâ...

FBI probes mysterious sonic device in Cuba 01:19

Story highlights

- At least 21 US diplomats and relatives affected by possible sonic attacks
- US Embassy in Havana may be scaled back to limit number of people at risk

Havana, Cuba (CNN) Some of the 21 US diplomats believed to have been impacted by mysterious acoustic attacks in Cuba were targeted multiple times, CNN has learned from a senior US official.

There were nearly 50 attacks in total, the official said. The incidents have challenged the US government's assessment that Cuba is a safe country for US diplomats and their families and threatened the future of the newly reopened embassy.

Despite the often-empty supermarkets and antagonistic relations with the communist-run government, Cuba for years offered US diplomats a rare benefit: It was safe.

[Rex Tillerson: US considering closing Havana embassy](#)

Unlike in many other countries, in Cuba, US Embassy employees didn't have to worry much about terrorist attacks, kidnapping or even petty crime. The Cuban government's tight control over the island made Havana one of the safest cities in the world.

Diplomats -- especially those Cuba suspected of being spies -- might suffer harassment at the hands of the powerful state security apparatus, but there were established lines neither of the Cold War adversaries would cross.

But starting early this year, US diplomats heading to the island to begin their postings were quietly warned they could face a mysterious threat that was causing American Foreign Service officers to fall ill, some with long-lasting symptoms.

Investigators haven't determined the cause of the incidents, but US officials told CNN they are convinced someone has targeted American diplomats in Havana with a sophisticated device never deployed before, at least not against US personnel.

[Canadian diplomats have suffered similar health problems](#), according to US and Canadian officials.

At the United Nations on Friday, Cuban Foreign Minister Bruno Rodríguez Parrilla denied that Cuba was involved in attacks on diplomats and said the United States was politicizing the incidents.

But seven months after complaints to officials and assurances from Cuban President Raul Castro that the incidents would be investigated, US officials are frustrated by the lack of progress and may scale back the embassy to limit the number of people who risk exposure.

Options include sending families and nonessential staff back to the United States to a full-on [shuttering of the embassy](#), three senior US officials told CNN.

"We have to consider it. We thought we had corralled this, and then the two cases in August took place," a senior US official said. "It is not as if the attacks address individual personnel officers. Our personnel is broadly at risk. So we have to consider next steps because we need to protect our people."

If the United States were to recall diplomats, it would be a devastating setback to US-Cuban relations and come at a crucial moment as Castro prepares to step down as President in February and Washington needs eyes and ears on the ground.

Ties between the countries were severed in 1961 shortly after Fidel Castro took power. As confrontation between the two nations loomed, US diplomats hurriedly lowered the American flag at the embassy and boarded a ferry to sail across the Straits of Florida.

In 1977, the United States and Cuba took the first step toward restoring diplomatic relations by opening interests sections in each other's capitals, and US diplomats moved back into their seafront offices.

[US and Cuba have long history of undiplomatic relations](#)

They were hardly welcomed back with open arms. Then-President Fidel Castro called the interests section "a nest of spies" and led frequent demonstrations in front of the building.

Castro also kept a close eye on the Americans.

"Surveillance was pretty constant," said Vicki Huddleston, who headed the interests section from 1999 to 2002. "The security officer used to say we don't even look for listening devices in the residence because the Cubans will just replace them. But it was not malicious. They just wanted to know what I was saying or other diplomats are saying."

In 2015, after President Barack Obama announced a thaw in relations, the two countries re-established full diplomatic relations and reopened embassies. Some hard-liners in Cuba -- including Fidel Castro, who had retired by then -- criticized the opening with the United States.

But many Cubans rejoiced as Americans returned to the island in large numbers for the first time in a half century. The normalizing relationship led to restored flight services and greater exchanges between the two countries.

But in November, following the US presidential election, American diplomats began to experience a series of strange incidents. As CNN first reported in August, diplomats were awoken late at night in their homes feeling unwell and hearing sounds that resembled insects or metal dragging across the floor.

They were unable to determine the source of the sound; by leaving the room or area they were in, the incidents stopped immediately, two US government officials said.

By February, the State Department had concluded their diplomats were the targets of a campaign of harassment and they needed to raise the issue with Cuban officials.

The devices used in the incidents had never been found, two US officials said, but appeared to be a type of sonic weapon that emitted sound waves capable of inflicting physical harm.

But the physical symptoms that people exhibited varied greatly, preventing doctors consulted in the United States from reaching a conclusion about what caused the trauma, two US officials said.

US government technical experts were also baffled. Some affected diplomats had lines of sight to the street in their homes, while others had shrubbery and walls that blocked views of their homes. Some heard loud sounds when the incidents took place, while others heard nothing.

It does not appear either the US Embassy or the ambassador's residence were ever targeted, three senior US officials told CNN.

How much did Cuba know?

At the time, Donald Trump had just won the presidency. Raul Castro congratulated Trump on his unexpected victory in the Cuban state-run media, even though Trump had promised to take a tougher line on Cuba.

Still Cuban officials were hopeful that a modus vivendi could be reached with the new administration.

At the same time, the Cubans were racing to capitalize on the final months of goodwill from the Obama administration and sign as many agreements with the US government and American companies as possible.

[Using sound to attack: The diverse world of acoustic devices](#)

It made no sense for Cuba at that moment to begin a campaign of harassment against US diplomats, US officials said.

Shortly after US diplomats complained for the first time to their Cuban counterparts, Raul Castro summoned the top US diplomat in Havana, Jeffrey DeLaurentis, to a meeting. Castro denied any Cuban involvement in the alleged attacks and promised a thorough investigation, according to US and Cuban officials.

US officials felt Castro would not have personally assured the Americans that Cuba had no part in the incidents if it had been a Cuban operation, a US official told CNN.

Since then, the United States has received cooperation from Cuba, if not many answers. The FBI was permitted to travel to the island and met with officials from Cuba's Interior Ministry, which is directing the investigation, a US official said.

Many diplomats live in Havana's upscale Siboney neighborhood, which was called Country Club before the revolution. The area's well-maintained mansions and tidy lawns are a far cry from the city's iconic decaying colonial buildings. There are surveillance cameras throughout Siboney and Cuban security guards posted in front of many diplomats' homes.

Top Cuban officials -- including Raul Castro -- have houses in the same area and are heavily guarded.

Other incidents took place in hotels in Havana where US diplomats were staying, said three senior US officials, also locations that Cuban intelligence services closely monitor.

US officials said they believe even if the Cubans didn't know about the incidents at the beginning of the investigation, they must have a clearer idea of what transpired than they are letting on.

"It is increasingly apparent the Cubans are involved in some way," a senior US official said. "The Cubans are all over our people while they are down there. If it was a few attacks, you could say that maybe it was the Russians or Iranians screwing with us, but when it happens so many times, especially in the same hotel, it is hard for us believe someone can get close enough to our people so many times. Unless these are beams from outer space."

Speaking at the UN General Assembly in New York, Rodr  guez, the foreign minister, said his government "has taken into account the data contributed by the US authorities and so far has found no evidence whatsoever that could confirm the causes or the origin of the health disorders referred to by US diplomats and their relatives."

Rodr  guez said Cuban officials would continue to investigate.

In talking this week with a friend about the United States seemingly imploding from within across multiple sectors, my friend stressed: â... Itâ... s not just from within. There is a run on the United States from certain nations and business interests around the world. Just like there was a run on banks after the collapse of Silicon Valley Bank, many nations are either thinking about â... or actually proceeding with â... transferring at least a portion of their allegiance, assets and commitments from the â... Bank of the U.S.â... to the â... Bank of Chinaâ... or elsewhere.â...

This was not just some person sitting on a porch casually talking about current events while whittling a stick waiting for his Social Security or pension check to hit the mailbox. This was a former high-level U.S. government official, now a CEO, someone who sits on the boards of directors for multiple companies. He has massive real-world and business experience and believes the United State may be on the verge of collapse.

He is far from the only one to think that.

[Economists Turn More Pessimistic on Bidenâ... s Inflation...](#)

Some fear the Biden administration is losing control of our southern border; losing control of our decaying, crime-infested big cities; creating a recession; vilifying and needlessly destroying the fossil fuel industry while pushing suspect and subsidized â... greenâ... energy alternatives; leaving tens of billions of dollars in military equipment in Afghanistan while withdrawing our troops and abandoning an ally; stepping closer to a trip-wire in the Ukraine war, which could trigger a nuclear strike; turning on Israel over ideological issues as Turkey and others call on Arab and Muslim nations to unite and crush the Jewish State; weakening our military with one â... wokeâ... edict after another; focusing on â... transâ... issues at the expense of failing transportation infrastructure; cheerleading the social justice warrior takeover of our colleges and universities; and weakening the dollar (the currency much of the world depends upon).

Is it any wonder, then, that nations such as France, India, Saudi Arabia, Japan, Mexico, Brazil and others are suddenly hedging their bets by looking beyond the United States of America for partnerships and stability?

On top of those problems, our allies and certain foreign corporations now have the legitimate concern of wondering what between them and the United States will be kept private and secure, in light of the massive and reportedly [deliberate leak](#) of classified Pentagon documents.

Who is an ally or foreign business partner to trust? More importantly, in the eyes of some of these nations and foreign business interests, who will prove to be the more stable and dependable partner in the coming years and decades?

[Poll: Only 22% Say Joe Bidenâ... s America Headed In Right Direction](#)

In an example of a world leader hedging his bets, French President [Emmanuel Macron](#) recently traveled to Beijing to meet with China's President Xi Jinping. Macron did not travel alone. He brought along [Ursula von der Leyen](#), the president of the European Commission. Some saw this as Macron advertising that much of the European Union was with him in spirit as he met with Xi.

On his way back to France after the meeting, Macron emphasized that Europeans should not be "just America's followers" and "get caught up in crises that are not ours." Even though the French leader seemed to be spelling it out in 100-font, one could read between the lines and assume he meant not getting dragged too deeply into the Ukraine war or defending Taiwan, should China invade. The last part was music to the ears of China's strongman, Xi.

Next, we have Mexican President [Andrés Manuel López Obrador](#) openly criticizing "and challenging" the leadership of the United States for months, by calling the U.S. an "oligarchy, not a real democracy." He threatened to sabotage calls for U.S. military action against Mexican cartels, and has made it clear that he is not afraid to pick a fight with what he may see as a United States in decline.

Or, last month's news that Saudi Arabia was inching closer to joining a China-led Asian security and economic bloc, after having been granted the status of a dialogue partner in the [Shanghai Cooperation Organization](#) (SCO). Aside from China and Russia, the bloc also includes India, Pakistan and some ex-Soviet states. It's an organization one might view as not always having the best interests of the United States in mind.

As Ali Shihabi, a Saudi analyst and writer, made clear during [an interview](#): "The traditional monogamous relationship with the US is now over. And we have gone into a more open relationship, strong with the U.S. but equally strong with China, India, [the] UK, France and others."

Finally, we have Brazil "China's most important trading partner in South America" announcing a new agreement [to conduct](#) bilateral commerce in their respective currencies, rather than the U.S. dollar. The move not only shocked many in the U.S. government but opened the eyes of others around the world to the possibility of decoupling from the dollar.

Is anti-sweatshop activism making Bangladeshis poorer? Biden's executive order makes regulators even less accountable

Some believe these things are happening because a growing number of political and business leaders around the world now lack confidence in the United States, believing our country truly is in disarray, decline and increasingly polarized and politicized. Will such concerns accelerate a "run on the Bank of the United States" with assets being transferred to China or even Russia?

Only time will tell. But as with the collapse of Silicon Valley Bank, the signs are out there, should the analysts care to pay attention.

A common sense Dem at last? Newly-elected Washington congresswoman who runs auto-repair shop and is proud gun owner claims her party 'abso-f***-lutely' lost touch with the working class**

HOW JOE-SIX-PACK IS HELPING WIPE OUT AMERICAN CORRUPTION

Average Americans have gotten involved in domestic politics with a new kind of hands-on approach.

These are the marching orders for a typical political intervention action:

The Current Take-Down List Of Criminal Suspects in the Silicon Valley Mafia Case

Update: 3-doj7-potu-c

The following parties have been forensically tracked to illicit campaign financing, hacking, bribes, political payola, stock-market rigging, slush-funds, false-front shell corporations and family trusts, abuse of corporate funds, advertising metrics frauds, RICO statute violation organized crime, employee abuse, electronic communications intended to evade law enforcement and other charges. In Palantir, XKeyScore and law enforcement databases they are all cross-linked. Terminations and interdictions for each party and their illicit actions have been continuing successfully. The termination of this network of parties will, effectively, terminate The Cartel in question. Each and every legal take-down has now passed the 50% vector and is proceeding to completion.

Targeted For 100% Legal Termination Via 100% Legal Use Of The Following Methods And Tactics:

- Dossier Production With Detailed Examination Of Illicit Deeds
- Doxing
- Public Surveillance
- Law Enforcement Arrest And/Or Citizens Arrest
- Lawsuit Filings For RICO Racketeering, Fraud, Interference, FEC Violations, Securities Law Violations, etc.
- Public Peer-to-Peer Online Collaborative Forensic Investigation
- Direct Public Confrontation Of The Facts At Their Public Speaking Events
- Billboard And Poster Exposure Of Their Crimes And Illicit Deeds
- Complaint Filings With All State and Federal Agencies
- Exposure of Illicit Sexual Groups, Cults, Organizations And Prostitution Activities
- Business Termination Via Disclosure Of Tax, Sex, Evasion, Expense, Abuse Matters
- Demands For The Appearance At Public Investigation Committees
- Disclosure Of All Covert And Illicit Insider Trading Accounts, Trusts and Shell Corps

HOW TO BYPASS CENSORS AND GET AROUND THE OPERATORS OF COVER-UPS

Efforts by censors to scrub the internet of Dr. Ai's account of a Coronavirus cover-up have sparked an outpouring of creativity among China's internet users and artists. Many set about crafting ever more eye-popping variations of the interview to fool both human monitors and the software that Chinese social-media sites use to zap sensitive content before it spreads widely. Crowd-sourced public forensics teams have millions of ways to bypass dirty politicians working on cover-ups of political corruption.

1. A barcode version of Ms. Ai's interview created by Mr. Wang, a 46-year-old Beijing-based artist.
2. Another version, by an unknown creator, renders the interview in Mao Zedong's distinctive calligraphy.
3. One version requires users to send a private message with the words "this article" to a public WeChat account. In return, they get a blank document titled "Whistle."
4. "The text of the interview appears when users click in the white space."

Source: WeChat (screenshots)

One Beijing-based artist said he had posted or reposted around 100 versions of the interview with Dr. Ai, only to see 80% of them deleted. On Wednesday, the 46-year old, who wanted to be identified only by his surname Wang, came up with a version that sandwiched a partial English-language translation between bar codes. Embedded in the image: a plea for China to introduce laws protecting whistle-blowers.

"This is probably the most important thing for the public to pursue," Mr. Wang said, referring to rules that would open the door to freer speech.

Censorship algorithms deployed by Chinese social-media operators are trained to flag sensitive images and text alike. A screenshot of a banned article typically doesn't fool the algorithms. As a result, those looking to evade censors are forced to constantly innovate.

One user rendered the interview in a jaunty handwriting style of late Chinese leader Mao Zedong. It has also been turned into a song and a comicbook strip.

Others got tricky with technology. A public account on China's popular, do-everything app [WeChat](#) required readers to access the interview by sending the words "this essay" in a personal message to administrators. The sender would then receive a link to a blank page with the word "Whistle" at the top. A click in the center of the page would bring up the text of the interview.

Coronavirus: A Rare Outbreak of Criticism, Then a Crackdown Two men disappeared after their unfiltered video reports questioned China's handling of the coronavirus epidemic. WSJ looks at why non-sanctioned storytelling in China about the crisis flourished online and how the authorities are pushing back. Photo: Isaac Lawrence/AFP via Getty Images

Translation has been one of the most popular workarounds. China's content filters struggle with non-Chinese content, so internet users have busied themselves creating foreign-language versions that others can then copy and put through translation software to convert it back to Chinese.

Aside from conventional spoken languages like Italian and Hebrew, users have posted versions written in Braille, Morse code, emojis and one in sign language. One version claimed to be written in a mixture of Elvish from the novels of J.R.R. Tolkien and Klingon from the TV show "Star Trek."

Another featured computer code allowing users to download and convert a lightly encrypted version of the interview using a combination of Microsoft Word and Excel.

1. A version of the Ai interview written in Morse code.
2. A version of the interview written in Emojis.
3. A version of the interview rendered in a mix of Elvish and Klingon.
4. A computer code version that outputs the interview as a Microsoft Word document.

Source: WeChat (screenshots)

In recent days, the censorship dodgers have begun describing themselves as taking the baton from the "whistle deliverer." The term refers to the title of the magazine interview, which was taken from Dr. Ai's description of her role in warning about the virus.

Though she wasn't one of the original whistle-blowers, she said, "I'm the one who sent out the

whistle.â...

Social-media users have applauded efforts to keep the article online.

â... I first laughed and then cried when seeing these,â... one user posted on WeChat.

The burst of creativity is â... a dark comedy caused by an article,â... Liao Xinzhong, a Taiwan-based writer, wrote on WeChat. He added he hopes new generations â... can freely use the Chinese language without any concerns.â...

Pushing beyond text, some users inserted the interview into the openings of Hollywood sci-fi films, including the â... Matrixâ... and â... Star Wars.â...

The [cat-and-mouse game](#) between Chinaâ... s censors and internet users has intensified in recent years as technology has advanced, media researchers say.

The coronavirus has struck a nerve in China because it has affected almost everyone in the country in some way, said King-wa Fu, a censorship expert at the University of Hong Kong. That has inspired a huge surge of protest online.

â... This time itâ... s the whole nation,â... he said. â... In scale, itâ... s the largest that I have seen.â...

HOW THE PUBLIC IS ENDING POLITICAL CORRUPTION FOREVER

(Update 2.2) The most effective interdiction process for political corruption is now here. It is called "Citizen Forensics" or "Cancel Culture". It is the process of crowd-sourced deep investigation of public officials, and their shills, followed by the global public exposure and shaming of their illicit deeds. Many publishers have recently forced their shills, mouthpieces and fake op-ed writers to wring their hands and cry overtly over Cancel Culture..... BECAUSE IT TOTALLY WORKS! It works totally, magnificently and effectively against evil people and scumbags!

We lost millions of dollars because our competitors, and their Senators, ran a self-profiteering organized crime operation within the State and Federal government. That's not ever going to happen again on our watch.

A corrupt political "crime family", for example, is the "Paypal Mafia":

The *indisputable facts* about them are the assertions that the Silicon Valley oligarchs:

1. Control business and politics like a crime Cartel
2. Are a white male fraternity who attack outsiders in organized manners
3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale men's clubs
4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
5. Operated the "Angelgate" collusion scandal
6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous

class-action case

7. Controlled the Obama Administration and the Obama White House and traded most key staff with that Administration
8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters
9. Use the same 10 law-firms who have been charged with public policy manipulation
10. Control internet news, media and information
11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments
12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices
13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name
14. Are a Mafia-like criminal organization
15. Have *"command and control and exclusive beneficiary positions in ongoing, coordinated, criminal and anti-trust activities involving government and stock market funds..."*.

The sex crime victims of Cartel member Jeffrey Epstein reported him to the DOJ a decade ago, yet nothing was done. We reported this Cartel in 2008, STILL, nothing has been done! These people are Ponzi-Scheming State and Federal funds in "stimulus" after "stimulus"! They use free government money, stock valuation pump-and-dump and black-lists to make certain that no competitor can ever operate against them in any market. The public has had enough of them. In addition to filing many formal federal requests for FBI, SEC and FTC investigation, you as a member of the public, can do much more:

HOW TO DESTROY ANY CORRUPT COMPANY OR PERSON ON EARTH

YOU can fight back and destroy dirty oligarchs!

The tech Cartel is evil because they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; Their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to never help those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, LinkedIn, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says: *"In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires..."*

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

"I can't even with how insular and incestuous and corrupt SF is. Mayor [@londonbreed](#) acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEhIlulkyj>"

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after **Five Trillion** treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

YOU OWE IT TO YOURSELF AND THE NATION TO TAKE THEM DOWN!

YOU CAN WIPE THEM OUT, ALL BY YOURSELF, IN 100% LEGAL WAYS.

YOU CAN WIPE THEM OUT EVEN FASTER WITH CROWD-SOURCED FORENSICS AND ANTI-CORRUPTION AI SOFTWARE! JOIN THE REST OF THE PUBLIC IN AN EPIC ANTI-CORRUPTION EFFORT!

You will learn to write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You will use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You will use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU will run your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
 - Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
 - Every flight manifest they appeared on
 - Every bank account they have ever held
 - Every lawsuit, divorce record and police record they have ever appeared in
 - Every trust fund they or their family holds
 - Every shell corporation they, or their family holds
 - Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
 - Every item in the Swiss Leaks that cross connects to their holdings
 - Every item in the Panama Papers Leaks that cross connects to their holdings
 - Every item in the WikiLeaks that cross connects to their holdings
 - Every item in the Snowden Leaks that cross connects to their holdings
 - Every sex trafficking incident that connects to each of them alone, and in groups
 - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
 - Every item in the Quest Leaks that cross connects to their holdings
 - Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
 - Every sex service that their credit card payments every connect too
 - Every real estate transaction that any name or company they, or their family, were involved in, tracks to
- and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "*Fuck You*" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

What To Do To Write Up The Dossier On Each Person And Each Corrupt Politician, Oligarch And Their Operatives:

1.
 1. Dig through their trash and buy their trash bags from the garbage man after they pick them up
 2. Locate a beneficiary for a probate proceeding
 3. Research current and / or historical property holdings
 4. Identify mortgage information
 5. Identify secured lenders
 6. Identify related party property transactions
 7. Determine current market value of real property
 8. Locate bankruptcy filings
 9. Retrieve and analyze bankruptcy records
 10. Uncover improper relationships
 11. Locate federal civil lawsuits
 12. Locate federal criminal records
 13. Retrieve and analyze federal civil and criminal records
 14. Retrieve mug shots from arrest records
 15. Provide independent analysis
 16. Locate state and local criminal arrest records
 17. Retrieve and analyze review criminal records
 18. Provide peace of mind
 19. Locate home phone numbers
 20. Locate cell phone numbers
 21. Identify owner of home or cell phone number
 22. Determine owners of corporation
 23. Retrieve and analyze corporate records
 24. Locate current or former executives
 25. Interview current or former executives
 26. Find and retrieve judgment and lien filings
 27. Research familial history
 28. Connect the dots
 29. Locate witnesses for a civil or criminal lawsuit
 30. Interview witnesses for a civil or criminal lawsuit
 31. Find assets
 32. Find current or historical boat registrations
 33. Find current or historical aircraft registrations
 34. Search for hidden assets

35. Conduct business intelligence
36. Discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you the big picture
43. Identify a will for an estate
44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistleblowers
54. Vet expert witnesses
55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. Make you look brilliant
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Give you a competitive advantage
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases

87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes
97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes
100. Write every federal agency and demand investigation and prosecution of the perps
101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
105. Go to their share-holder meetings and hand-out flyers about their corruption
106. Hire Charles Spies (<https://www.dickinson-wright.com/our-people/charles-spies?tab=0>) to sue them
107. Hire Harmeet K. Dhillon (<http://www.dhillonlaw.com>) to sue them
108. Hire COA (<http://www.causeofaction.org>) to sue them
109. Hire law firms from China or Russia to sue them for a very low price
110. Hire Steven S. Biss (<http://www.linkedin.com/in/steven-s-biss-6517037>) to sue them
111. Blog about the corruption of the political targets every day with the day's news each day
112. Read their divorce filings in court records and see who else might help expose their corruption
113. Read their locations over the last 12 months -
<https://www.protocol.com/government-buying-location-data>
114. Talk to every neighbor that has filed a complaint about them
115. Hire *Pierce Bainbridge Beck Price & Hecht LLP* to sue them, especially tech media companies
116. Re-read all of the latest "How To Be A Private Investigator" books and brochures
117. Ask Paul Kangas in San Francisco how he investigates the corrupt
118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them
119. Put a card table and a pop-up booth outside their office and hand out flyers about them
120. Publish every stock market share they, and their family, owns

121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm
122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...

You will read The Big

Book <https://www.amazon.com/Big-Book-Revenge-Serious-Getting/dp/0806521414> and many "How To Be A Private Investigator"-type books.

NEW SOFTWARE REVEALED THAT EXPOSES CROOKS IN PUBLIC OFFICE

- New open-source, and free, public software let's any citizen get any corrupt official arrested. Any voter can use the software from the comfort of their living room. The AI replicates itself (Like A benign digital version of Covid) across the entire web.

- You can download a copy of the software or build-your-own version of it from freely available code at Github, CERN and Linux repositories.

- We have consulted to the SEC and the GAO on this technology.

- After suffering millions of dollars of losses from public official's **Insider Trading** schemes, we decided to do something about that!

Illegal and corrupt Congressional insider trading tends to be something we don't hear about until it's hit the big news networks and newspapers as the SEC goes for the throat of the accused. By then, unfortunately, those committing it have made their gains, usually in the multi-millions of dollars, and the damage has been done to the stock, its company, investors and the American Way. Covert stock market trades are now the #1 form of bribes in California and Washinton, DC.

Quite frankly, the jail time assessed doesn't correct the damage done, and the fines rarely aid the investors, or the voters, in getting their money and their democracy back. Many of those hurt are Average Joe's and Jill's who were just trying to save their retirement nest eggs. Shame is the tool that works best on the corrupt!

These crimes involve an **investment banker spouse** and a Senator or other top official, using information, which was not available to the public, buying and selling a company's stock in an underhanded manner. **In many cases bribes have been paid with Google, Tesla or Facebook stock in a covert manner. It is particularly onerous when a Senators buys Tesla, Google, Facebook or Solyndra stock, and makes laws that only benefits Tesla, Solyndra, etc, while sabotaging their competitor constituents.** Because the dealings involved are pretty much done on the sly, it's been difficult, until now, for the governing body of the SEC to prove illegal insider trading, unless one of the cohorts tattles on the others or their actions become glaringly obvious. In some cases, a sharp mind around the action may take notice and become what's called a whistle-blower.

Previously, writes [Andrew Beattie of Investopedia](#): "... insider trading is often difficult for the SEC to spot. Detecting it involves a lot of conjecture and consideration of probabilities." That was the 'old days', though. Today, the new AI software can bust through these scams like a hot knife through butter!

With this new open-source, free, public spy agency-class software, detecting illegal insider trading is actually

less complicated than it sounds.

To the eyes of this new super-powerful AI observer server bot and peer-to-peer databases, it is easy work.

You, the citizen, just type the politician or agency employee name into a field and hit the **"analyze"** button. A few minutes later you receive a multi-page PDF report similar to an FBI report on the target. You can either research the subject in more detail or send copies of the report to the FBI, GAO, OSC, SEC or other enforcement group.

The software is an automated AI temporal matching system which includes 24/7 analysis of all stock trades involving politicians to its information source, politician finances, communications and policy participators. it uses some of the same software code used by the CERN mega-research center in Switzerland.

.

The technology Core Evaluation Points:

- Analyst estimates - these come from what an analyst estimates that a company's quarterly or annual earnings will be. They are important because they help approximate the fair value of an entity, which basically establishes its price on the stock exchange.
- Share volume - this reflects the quantity of shares that can be traded over a certain period of time. There are buyers and there are sellers, and the transactions that take place between them contribute to total volume.

One Way The AI Detects Congressional Insider Trades

Metricized signs of illegal insider trading occur when trades occur that break out of the historical pattern of share volume traded compared to beneficiary participation's of those connected to company and political entity. Another clue of the illegal insider trading is when a lot of trading goes on right before earnings announcements. That tends to be a sign that someone already knows what the announcement is going to indicate, and it's an obvious violation. One module of the new software hunts these trends around-the-clock in an unmanned manner like a detective who never needs to sleep.

The software red alerts are issued when trades are linked closer to the actual earnings and politicians bills instead of what the predicted earnings were. In a corruption case, it's clear the trades - especially made by politicians close to the company - stemmed from information that was not readily available to the general public.

In other words, at the time an insider makes a trade, the trade has a stronger relationship to earnings guidance rather than to earnings results achieved.

Part Of The Insider Trading Detection AI Uses 'Dynamic Time Warping (DTW)'

In econometrics, which is a concept frequently used by quantitative analysts to evaluate stock market prices, dynamic time warping (DTW) is an algorithm that can be used for measuring similarity between two data sequences by calculating an optimal match between the two. This sequence "matching" method is often used in time series classification to properly "line things up."

The method, coupled with AI machine learning ensemble methods, can provide a clear path between the trades made by insiders and public data used to make the trades.

This is a product of artificial intelligence that has been expanded by Indexer, Splunk, Palantir and other firms fast becoming experts in products that can be used to advance the art of manipulating political and social

trends in business and markets by using social media, financial data and news stories. The new software process has taken that sort of approach to the next level and targeted every member of Congress, their staff, family and friends. The first emphasis is on California and Washington, DC public figures.

In a hypothetical example, a group of executives failed to trade by industry standards by leveraging material non-public information and policy manipulation. Although consensus estimates called for higher commodity prices at the end of 2015, it appears key executives traded for their personal accounts as a result of the forecast provided by a specialist system within the firm that was adept at predicting prices alongside lobbyist manipulations. Flash-boy trading is now dirtier and powered by Google-class server systems.

In the hypothetical scenario the software aggregates executive trades in 2014 and 2015 and finds a strong link between buys and sells of executive stock options, which line up with material non-public estimates of commodity prices that were provided by the specialist system.

For example, in a "Exec Sell and Exec Buys" graph, a green line represents sells, while a black line represents buys. In the corresponding period, one finds a red line represents unrevised prices provided by the specialist system, and green line represents consensus estimates.

During Q1-2014, there was \$28M in purchases of executive stock options, while in Q2-2014, there was \$25M in sales of executive stock options. The specialist system called for Q3-2014 commodity prices to make a precipitous decline going into the end of 2014. Remember, under this scenario, no revisions were made to the specialist systems' price forecast. In this example, executives were afforded a significant advantage using price predictions from the specialist system.

In a final bullet chart, there was a dynamic time warping distance between trades and consensus estimates of 7.23, but this distance is only 2.19 when comparing specialist system estimates and executive trades. Please note, the closer the distance score is to zero, the more similar the trades are to the estimates they are measured against.

We have applied this process to companies well-known for influence buying like, Google, Tesla and Facebook

It's obvious that the tech executives involved did not follow industry standards in their actions and make public the "insider" information they had access to prior to the trades they made. The lobbyists they hired promoted this rigged trend and paid off Senators with perks. These are the kind of violations the SEC and other governing bodies can look to in attempting to protect the trading public and the integrity of financial marketplaces. Artificial intelligence tools are a major factor in assisting the tracking of insider trading.

"Every facet of our everyday lives has been impacted, infiltrated and greatly influenced by artificial intelligence technologies," says Vernon A. McKinley, a multi-jurisdictional attorney, based in Atlanta. "In fact, the U.S. government and its multiple agencies have developed specialized intelligence units to detect, track, analyze and prosecute those unscrupulous individuals seeking to profit from the use of such tools, specifically in the financial industry, and to protect the integrity and strength of the U.S. economy and its investors." Now these tools are being turned against the corrupt!

The public can now detect trading anomalies in financial situations using this artificial intelligence software on their desktop computers. No public official will ever be able to do these kinds of corruptions, again, without getting caught.

This approach has already had an impact on how political insiders trade on Wall Street and in financial markets around the world.

This technology can end this corruption forever!

A module of the software uses data from The Center for Responsive Politics, ICIJ Panama Leaks records, Swiss Leaks records and FEC files to reveal covert routes. Famous politicians own part of Tesla Motors, Facebook, Google, Netflix, YouTube and other companies they helped get government money for. All of their competing constituents have suffered for it or been put out of business by exclusive deals that only Tesla Motors, Facebook, Google, Netflix and YouTube got. That is a crime and charges have been filed with federal law enforcement.

A large volume of forensic research proves that Silicon Valley Cartel tech firms receive benefits from politicians and politicians, at the same time, benefit from these firms.

This evidence on the exchange of benefits between politicians and firms proves an agreement between the politicians and the companies. This agreement, however, cannot be in the form of a written contract as writing direct fee-for-service contracts between a politician and a firm is considered bribery (Kroznor and Stratmann 1998; 2000). In addition, either party to this agreement might renege on its promise and the other party cannot resort to the courts.

Procon.org, for example, reports: "... Less than two months after ascending to the United States Senate, and before becoming President, one Senator bought more than \$50,000 worth of stock in two speculative companies whose major investors included some of his biggest political donors. One of the companies was a biotech concern that was starting to develop a drug to treat avian flu. In March 2005, two weeks after buying thousands of dollars of its shares, this Senator took the lead in a legislative push for more federal spending to battle the disease. The most recent financial disclosure form this Senator . . . shows that he bought more than \$50,000 in stock in a satellite communications business whose principal backers . . . had raised more than \$150,000 for his political committees."... See more examples from the Citizens for Responsibility and Ethics in Washington (CREW) report (2009).)

The literature and eye-witness experience proves that politically-connected Silicon Valley tech firms monthly obtain economic favors, such as securing favorable legislation, special tax exemptions, having preferential access to finance, receiving government contracts, or help in dealing with regulatory agencies. The evidence proves that Google's support, for example, can help in winning elections. For example, firms can vary the number of people they employ, coordinate the opening and closing of plants, and increase their lending activity in election years in order to help incumbent politicians get re-elected. (See Roberts 1990; Snyder 1990; Langbein and Lotwis 1990; Durden, Shorgen, and Silberman 1991; Stratmann 1991, 1995, and 1998; Fisman 2001; Johnson and Mitton 2003; Ansolabehere, Snyder, and Ueda 2004; Sapienza 2004; DinÃ§ 2005; Khwaja and Mian 2005; Bertrand, Kramarz, Schoar, and Thesmar 2006; Faccio 2006; Faccio, Masulis, and McConnell 2006; Jayachandran 2006; Leuz and Oberholzer-Gee 2006; Claessens, Feijen, Laeven 2008; Desai and Olofsgard 2008; Ramanna 2008; Goldman, Rocholl, and So 2008, 2009; Cole 2009; Cooper, Gulen, and Ovtchinnikov 2009; Correia 2009; Ramanna and Roychowdhury 2010; Benmelech and Moskowitz 2010.)

The software can see that the share ownership of politicians serves as a mechanism to quid-pro-quo their relationships with big tech firms, is as follows: The ownership of politicians plays multiple distinct (but not necessarily independent) roles; one that relies upon the amount of ownership and one that does not. First, as investors in firms, politicians tie their own interests to those of the firm. Thus, harming (benefiting) the firm means harming (benefiting) the politician and vice versa. By owning a firm's stock, politicians commit their personal wealth to the firm and reduce a firm's uncertainty with regard to their actions toward the firm. This will, in turn, enhance the firm's incentive to support the politician-owner during both current and future elections in order to prolong the incumbency period for as long as possible. Firms have their lobbyists push to be able to know the amount of ownership likely to be material to politicians. This knowledge, in turn, enables them to judge whether the politician's interest is aligned with the firm's interest and optimize quid-pro-quo.

The Political Action Committee (PAC) contribution of firms (which is a direct measure of benefits flowing from firms to politicians) is a significant determinant of ownership allocations by members of Congress. The ownership of Congress members in firms that contribute to their election campaigns is roughly 32.8% higher than their ownership in noncontributing firms even after accounting for factors that are associated with both ownership and contribution (such as familiarity, proximity and investor recognition).

The committee assignments of politicians is a proxy for whether their relations with firms are enforced (Kroznier and Stratmann 1998). Silicon Valley tech firms like Facebook, Tesla and Google obtain private benefits out of their mutual relations with politicians. When the strength of the association between ownership and contributions at the firm level increases, the provision of government contracts to those firms increases.

Members of Congress, candidates for federal office, senior congressional staff, nominees for executive branch positions, Cabinet members, the President and Vice President, and Supreme Court justices are required by the Ethics in Government Act of 1978 to file annual reports disclosing their income, assets, liabilities, and other relevant details about their personal finances.

Personal financial disclosure forms are filed annually by May 15 and cover the preceding calendar year. The Center for Responsive Politics (CRP) collected the 2004â... 2007 reports for Congress members from the Senate Office of Public Records and the Office of the Clerk of the House. The Center then scanned the reports as digital images, classified the politicians's... investments into categories including stocks, bonds, and mutual funds, and built a database accessible via a web query.

Using CRP's data, you can use the software to collect the shares in S&P 500 firms held by members of Congress between 2004 and 2007, for example. You can collect the stock ownership data for every firm that joined the S&P 500 Index any time between January 2004 and April 2009; regardless of when it joined the index, and the software can obtain all the available stock ownership data for that firm between 2004 and 2007. Likewise, if a firm dropped out of the index at any time during 2004â... 2008, the software, nevertheless, will retain the firm in a sample for the target period. As such, the sample would include stocks in hundreds of unique firms owned by politicians between 2004 and 2007, for example.

Politicians are required to report only those stocks whose value exceeds \$1,000 at the end of the calendar year or that produce more than \$200 in income. They are CURRENTLY not required to report the exact value of the holding, but instead must simply check a box corresponding to the value range into which the asset falls. The CRP then undertakes additional research to determine the exact values of these stocks. When the Center makes these determinations, it reports them instead of the ranges and I use these values in my study. When only the range is available, you should use its midpoint as the holding's value. You would, thus have data on the stock holdings of hundreds of politicians for that time period.

Using the software, you can search for all Political Action Committees (PACs) associated with tech firms. It then collects data on each contribution these PACs made to candidates (both the winners and losers) running for the Senate and House elections. Tricky corrupt Silicon Valley firms establish several PACs, each in a different location, and each of these PACs can contribute to the same candidate. In such cases, the software would total, for each candidate, every contribution he or she received from PACs affiliated with the same firm. To parallel the investment data sample period, for example, the software collects every contribution made from the 2003â... 2004 cycle up to and including the 2007â... 2008 cycle. Many Silicon Valley tech firms use deeply covert Fusion GPS, Perkins Coie, BlackCube, Psyops-type service to make very hidden additional payola payments to California politicians.

For sources, for example, the software collects government contract data from Eagle Eye Publishers, Inc., one of the leading commercial providers of Federal procurement and grant business intelligence and <http://www.usaspending.org>. Eagle Eye collects its contract data from Federal Procurement Data Systemâ... Next Generation (FPDS-NG), the contract data collection and dissemination system administered

by the U.S. General Services Administration (GSA). FPDS-NG provides data on procurement contracts awarded by the U.S. Government. When these contracts are awarded to company subsidiaries, Eagle Eye searches for the names of their parent companies and assigns each subsidiary to its appropriate parent. The software collects both the number and aggregate value of government contracts that were awarded to sample firms between 2004 and 2007 in this example time-frame..

The software reveals, for example, that one Representative is a ten-term member of Congress and a senior member of the House Financial Services Committee. They arranged a meeting between the Department of Treasury and One United Bank, a company with close financial ties to themselves, involving both investments and contributions.

â... In September 2008, the Representative asked then-Secretary of the Treasury Henry Paulson to hold a meeting for their friends in banks that had suffered from Fannie Mae and Freddie Mac losses.

The Treasury Department complied and held a session with approximately a dozen senior banking regulators, representatives from those banks, and their trade association. Officials of One United Bank have close ties to the Representative and attended the meeting along with the Representative's chief of staff. Kevin Cohee, chief executive officer of One United, used the meeting as an opportunity to ask for bailout funds.

. . . Former White House officials stated they were surprised when One United Officials asked for bailout funds. . . . In December 2008, the Representative intervened again, asking Treasury to host another meeting to ensure their banks received part of the \$700 billion allocated under the Troubled Asset Relief Program. . . . Within two weeks, on December 19, 2008, One United secured \$12.1million in bailout funds. . . . This was not the first time the Representative used their position to advance the interests of the bank. the Representative's spouse became a shareholder in One United in 2001, when it was known as the Boston Bank of Commerce. In 2002, Boston Bank of Commerce tried to purchase Family Savings, a friend of the Representative in Los Angeles. Instead, Family Savings turned to a bank in Illinois. The Representative tried to block the merger by contacting regulators at the FDIC. The Representative publicly stated they did not want a major bank to acquire a bank that the Representative was friends with.

When the Representative's efforts with the FDIC proved fruitless, the Representative began a public pressure campaign with other community leaders. Ultimately,when Family Savings changed direction and allowed Boston Bank of Commerce to submit a winning bid, the Representative received credit for the merger. The combined banks were renamed One United. . . . In March 2004, the Representative acquired One United stock worth between \$250,001 and \$500,000, and the Representative's spouse purchased two sets of stock, each worth between \$250,001 and \$500,000. In September 2004, the Representative sold their stock in One United and their husband sold a portion of his. That same year, the husband joined the bankâ... s board. . . . One United Chief Executive Kevin Cohee and President Teri Williams Cohee have donated a total of \$8,000 to the Representative's campaign committee. . . .On October 27, 2009, less than two months before One United received a \$12 million bailout, the bank received a cease-and-desist order from the FDIC and bank regulatory officials in Massachusetts for poor lending practices and excessive executive compensation . . . the bank provided excessive perks to its executives, including paying for Mr. Coheeâ... s use of a \$6.4 million mansion . . .â... (Ref: CREW report 2009,pp. 123â... 125)

Thanks to Crony quid-pro-quo revelations by an earlier version of the software, you can also see that Fisker Automotive, Inc.'s \$529 Million U.S. Taxpayer Loan Approval by the Department of Energy was dirty. Fisker Automotive's Chief Operating Officer Bernhard Koehler pleaded with the Department of Energy in a panicked Saturday midnight hour email to receive a \$529 million loan as the company was 2 weeks from Chapter 7 liquidation, that it was laying off most of its employees, that no private sector investors would fund the company without DOE guarantees, and that Fisker was unable to raise any further equity funding from independent private-sector investors given the company's financial condition. These statements were made to a Loan Officer at the DOE . No private sector Loan underwriting (approval) committee would ever grant a low

interest loan to a desperate buyer that had just confessed it was in a state of insolvency and was about to layoff most of its staff. Yet within a few weeks the DOE would approve a \$529 Million Credit Facility to Fisker. Despite the DOE Loan Officer official's sworn testimony at April 24th's House Oversight Committee that the DOE used "same private sector underwriting standards when approving Fisker and other approved Taxpayer Funded Loans" - likely perjury based in documents.

In a 'U.S. GOVERNMENT CONFIDENTIAL EMAIL': FISKER AUTOMOTIVE: August 2009: Co-Founder Bernhard Koehler emails U.S. Dept. of Energy Loan Officer in Sat. midnight Panic admitting VC Firms all declined to invest, and company is out of cash. Weeks later the U.S. Department of Energy approves \$529M U.S. Taxpayer Funded Loans to FISKER. NO PRIVATE SECTOR Lender would ever authorize a Loan for even \$5 Million let alone \$529 Million after receiving this email stating private sector investors had examined the company and declined equity investments, that they might loan money as more secure Debt, and the Chief Operating Officer of the company further stating that the borrower is totally insolvent. (Weeks after this email the U.S. Federal Government Dept. of Energy Loan Committee Approves Fisker Automotive as a credit-worthy borrow for \$529 Million in U.S. Taxpayer Funded Loans). Fisker got the cash because President Obama said to "give it to them" in order to please his campaign financiers.

The same thing happened with Tesla Motors. Elon Musk and Tesla Motors were broke when DOE gave them the money.

PrivCo CEO Sam Hamadeh stated in an official statement: *â... The documents obtained by PrivCo paint a picture of how an insolvent, unproven automaker received \$192 million in taxpayer funding. The Department of Energy made a loan that no rational lender would have made. This loan was the equivalent of staying execution on a company that was terminally ill to begin with.* Tesla and Fisker could not have been taxpayer funded unless bribes and criminal quid-pro-quo was underway by President Obama and the U.S. Senator insider traders.

Since its ruling in *Buckley v. Valeo*, the U.S. Supreme Court has expressed concern regarding corruption or the appearance of corruption stemming from political quid pro quo arrangements and the deleterious consequences it may have on citizensâ... democratic behavior. However, no standard has been set as to what constitutes â... the appearance of corruption,â... as the Court was and continues to be vague in its definition. As a result, campaign finance cases after *Buckley* have relied on public opinion polls as evidence of perceptions of corruption, and these polls indicate that the public generally perceives high levels of corruption in government. The present study investigates the actual impact that perceptions of corruption have on individualsâ... levels of political participation. Adapting the standard socioeconomic status model developed most fully by Verba and Nie (1972), an extended beta-binomial regression estimated using maximum likelihood is performed, utilizing unique data from the 2009 University of Texasâ... Money and Politics survey. The results of this study indicate that individuals who perceive higher levels of quid pro quo corruption participate more in politics, on average, than those who perceive lower levels of corruption.

Quid pro quo is not a difficult concept to understand. Too bad the media doesnâ... t endeavor to investigate and explain it. Your politicians don't work for you, they work for their own insider trading stock market holdings for themselves!

SOURCE CODE RESOURCES FOR YOU TO FORK OR MODIFY AS ANTI-CORRUPTION TOOLS:

-[Spoke](#): Spoke is a peer-to-peer texting platform for collaborative investigation with several forks under active development.

-[Pollaris](#), A polling location lookup tool modified to track bad guys. You can integrate this with your website and other tools. An API is provided.

-[Caucus App](#): A way to quickly calculate citizen and pro member evidence sets and report results from each

investigator.

-**Switchboard (FE and BE)**: This software takes new potential volunteers, or "hot leads," from your online channels and assigns them to state or section-based based volunteer leads for personal follow up calls offering ways to get involved with the investigations. This is also a great tool for investigation team recruitment.

-**Automated organizing email**: Your teams can work together to scale email outreach to the widest possible audience and bypass any cover-up.

-**Redhook**: Investigations run on data, and redhook is a tool that makes data happen. As a system, Redhook ingests web hook data and delivers it to Redshift/Civis in near real time.

-**I90**: This tool makes a long file name or hard to remember legal evidence document into a short, easy-to-remember, link.

- **opendata.cern.ch**: The CERN Database Open Source

- **<https://github.com>**: One of the collaborative development nets

- **<https://citizensleuths.com>**: An example of over 1000 public forensic groups working on crowd-sourced crime-fighting

You are building a forensic anti-corruption version of XKEYSCORE and submitting your results reports to law enforcement and news outlets. Simply look in torrents and code databases like GITHUB, and similar sites, for forensic database and mass collaboration code and you will have a working module up in no time at all if you are a Tier 2 coder, or better.

How To Use 'the Streisand Effect' To Shut Down Bad Guys

- How a private-property dispute birthed a web phenomenon.

In 2003, a [picture](#) of Barbra Streisandâ... s beachfront home hit the web as part of a public collection of images displaying coastal erosion. In response, in February 2003, Streisand sued the photographer for \$50 million for invasion of privacy, claiming violation of a state law aimed at the telephoto lenses of paparazzi.

Ironically, the media [attention](#) surrounding the lawsuit made the photo of her house go viral (at least in 2003 terms). In the month before the lawsuit, the picture had been downloaded only six times, including twice by her lawyersâ... whereas the image was downloaded more than 420,000 times during the month following the lawsuit. This paradoxical resultâ... where an attempt to silence, suppress, or stop something backfiresâ... was dubbed the *Streisand effect*.

Letâ... s take a closer look at the Streisand effect.

.

Examples of the Streisand Effect

Here are three different times the Streisand effect was apparently reified by real-world examples.

In 2012, a Scottish schoolgirl named Martha Payne started blogging about her school lunches and included pictures of the meals, which, as could be expected by anyone who has ever been to school, were unappetizing.

Soon, celebrity chef and food activist Jamie Oliver tweeted out his support, and the blog garnered three million hits in two months. Consequently, local government authorities banned Payne from taking photos of the lunches because (they claimed) cafeteria workers were worried about getting fired. Even though the authorities quickly reversed this decision, for them it was too late, and the British national media and the Internet ran with the story.

In 2013, BuzzFeed ran a [list](#) titled â... The 33 Fiercest Moments From BeyoncÃ©'s Halftime Show.â... Although the intention of the list was likely laudatory, some of the still photos were considered "unflattering."

Consequently, Queen Beyâ... s publicist contacted BuzzFeed to request that the unflattering photos, which were cited, be switched out. BuzzFeed responded with a follow-up [piece](#) titled â... The 'Unflattering' Photos BeyoncÃ©'s Publicist Doesn't Want You To See,â... which included an email from the publicist and the cited shots.

Subsequently, the Internet did its thing, and a meme was born. Countless â... unflatteringâ... shots of BeyoncÃ© as a zombie, powerlifter, anime cartoon, and so forth popped up.

In 2014, cab drivers from across Europe went on strike to decry the lack of regulation of the ride-hailing app Uber. Without cabbies on the roads, riders turned to Uber, with downloads of the app increasing more than eight times in London alone.

Deconstructing the Streisand effect

In an [article](#) published in the *International Journal of Education*, Sue Curry Jansen and Brian Martin explained how the Streisand effect is a consequence of failed censorship attempts. These outrage-[management](#) processes include cover-up, defamation of the target, reframing events, false justice, and intimidation or rewards.

The authors also argued that censorship is a process that requires active maintenance to conceal the actions of powerful people. Furthermore, they wrote that a clearer understanding of outrage-management processes â... stimulates awareness of tactics for challenging censorship by exposing its existence, validating the censored information, explaining the importance of free expression, not relying on official channels for solutions but instead mobilizing wider awareness and support, and resisting intimidation and rewards.â...

By the way, you may be wondering how Babs's court case turned out. The chanteuse not only brought viral attention to her bluff-top estate by bringing the suit in the first place but the suit was dismissed in December

2003.

Google, YouTube and Facebook have commercialized "The Streisand Effect" by deploying computerized processes to steer the public towards, or away from, one product, candidate or point-of-view using manually programmed directions.

Former motor racing boss Max Mosley is suing Google for continuing to display photographs he says breach his privacy. But does pressing for information to be kept private, or suppressed, often have the opposite effect?

At first sight not much unites Beyonce and Max Mosley. But they, and several other celebrities and organisations, have become victims of the "Streisand effect".

In 2005, Mike Masnick, founder of the Techdirt website, [coined the term](#). Two years earlier singer Barbra Streisand unsuccessfully sued photographer Kenneth Adelman, who was documenting the coastline of California, for including her cliff-top home in Malibu. The resulting publicity helped drive 420,000 visits in a month to the site where the photo was published. According to documents filed in court, images of Streisand's house had been downloaded only six times before the legal action.

It's not always a fight over privacy. In February last year the BuzzFeed website published a [selection of singer Beyonce's "fiercest moments"](#) - mocking her facial expressions while performing at the Superbowl. Her publicist reportedly contacted it to ask that seven of the most "unflattering" photos be removed. BuzzFeed refused and republished exactly this selection with the headline: ["The 'Unflattering' Photos Beyonce's Publicist Doesn't Want You To See"](#). The exposure of the unflattering photos was magnified.

A few months later it was reported that lawyers for Pippa Middleton, sister of the Duchess of Cambridge, [had asked for the removal of a parody Twitter feed](#), which offered ridiculously obvious lifestyle advice in her name, such as "Avoid getting lost by consulting with a map" and "A party isn't much fun without people attending". Its following increased.

In 2008 the Church of Scientology reportedly tried to get a [video featuring film star Tom Cruise talking about his faith](#), designed for viewing by its followers only, removed from websites after it was leaked. The publicity meant it became shared more widely.

In 2012, Argyll and Bute Council banned nine-year-old Martha Payne from taking pictures of her school meals and posting them, along with dismissive ratings out of 10, on a blog. Her family complained and this was overturned, amid much publicity. To date the blog has had [more than 10 million hits](#) and Martha has raised more than £130,000 for charity.

You don't need to be famous to suffer from the Streisand effect. Spaniard Mario Costeja Gonzalez fought a long legal battle for the right to be forgotten. He complained that a search of his name in Google brought up newspaper articles from 16 years ago about a sale of property to recover money he owed. He enjoyed a [landmark victory](#) to establish the right to be forgotten. But it is unlikely he will ever be forgotten. As of this moment, his name conjures up hundreds of thousands of Google search results.

The Streisand effect

- Term first used in 2005 by Mike Masnick, founder of the website Techdirt
 - Denotes increased publicity as a result of attempts to remove embarrassing online content
 - Followed a failed attempt in 2003 by singer Barbra Streisand to sue a photographer who posted a picture of her seaside home on a website
-

But Max Mosley is arguably the greatest example. He is suing Google for continuing to display in search results images of him with prostitutes at a sex party, citing alleged breaches of the Data Protection Act and misuse of private information. Every time he makes a legal move in his crusade over privacy, there's a danger it becomes more likely people will seek out the very images he is complaining about.

The 74-year-old former president of Formula One's governing body FIA wants Google to block pictures first published in the now-defunct tabloid News of the World, which he successfully sued in 2008. "As the gateway to the internet Google makes enormous profits and has great influence, so I have not taken this action lightly," he has said in a statement. His lawyers add that the company should not be allowed "to act as an arbiter of what is lawful and what is not". Google says it has been working with Mosley "to address his concerns".

But is there a risk that Mosley will cause himself more embarrassment by bringing a fairly old, and perhaps half-forgotten, news story back to people's attention? A survey of Twitter shows some users are posting the pictures that he is keen to remove.

"Anyone trying to get something banned is always going to be of more interest than something that people don't seem bothered by," says Jenny Afia, head of talent at the law firm Schillings. "It's a spark for curiosity."

In previous generations there's no doubt it was more straightforward to attempt to suppress information or images. The ease of sharing now almost means that nothing can really be suppressed.

You could argue that the internet makes attempts to guard your privacy risky on a scale proportional to the likelihood of your privacy being meaningfully breached in the first place. If there was a danger that lots of people would circulate a private photo of you doing something embarrassing, it's very likely that trying to suppress it will have the opposite effect. If there was little danger that the photo would have been circulated, an attempt at suppression might not trigger the Streisand effect.

There are endless mischief-makers who would dedicate themselves to propagating information that someone wanted hidden, just for the very fact of the attempt to hide it.

Mosley is a wealthy man used to publicity. Yet suing could mean a stressful, drawn-out court case, covered in detail by the media.

"It's a horrible dilemma for people who are faced with horrible or untrue stories," says Afia. "That's where Max Mosley is very brave to keep fighting. Many people decide to let it go."

For the likes of Mosley and Costeja Gonzalez, the principle surely supersedes the actual effect of legal action. They effectively end up fighting for the right of others to more easily safeguard their privacy. Even at the de facto cost of their own.

And there's a clear difference between those fighting for a right to privacy and those, like Beyonce's representatives, who are merely trying to manage a reputation or public image. There the Streisand effect is potent. If your reaction to mockery is to try and squash it, there will be lots more mockery.

Google's and Facebook's servers are built and programmed to manipulate the The Streisand Effect for commercial goals. Should Congress allow that?

When The Silicon Valley Frat Cartel Tried To Bury Outsiders, They Discovered That They Were Seeds

By Andrew Cosgrove

When you bury a seed, it blooms, and blooms and blooms and millions like it fill the fields...

As American streets are flooded with protests so large that they have changed the course of history, eyes are now turned towards the exclusionary, misogynist, money-laundering, bribery-based, hooker-trafficking frat boys that run Silicon Valley.

In the latter half of the 19th century, before the advent of income tax, there existed a class of millionaires in this country who used many unscrupulous means to gain immense wealth, separating themselves from the working class of the country by previously unheard-of multiples.

The Vanderbilts, the Astors, the Carnegies, the Mellons, the Rockefellers and numerous other â... industrialistsâ... (today, we would call them globalists) were able to amass great fortunes and live like royalty, with much of their power enabled through the workings of the politicians they influenced via graft.

In their day and age, they were known as â... robber barons,â... after the wealthy lords of aristocratic Germany, where landowners charged commoners an illegal tax for passing over their land.

.

Historian Hal Bridges wrote that the robber barons were â... business leaders in the United States from about 1865 to 1900â... a set of avaricious rascals who habitually cheated and robbed investors and consumers, corrupted government, fought ruthlessly among themselves, and in general carried on predatory activities comparable to those of the robber barons of medieval Europe.â...

Many students of history argue that Americaâ... s robber barons were only tamed by the introduction of antitrust laws such as the Sherman Act and the Clayton Act of 1890 and 1914, respectively, as well as the introduction of income tax in 1913 and the stock market crash of 1929. Until that time, the power of these business titans was left mostly unchecked.

Many politicians â€¦ especially in large cities like New York â€¦ were bought off by their riches and voted for (or even created) laws that would favor and broaden these menâ€™s empires. Regulations, agreements, waivers and amendments were passed that allowed many of these wealth-hoarders to assemble legal monopolies that would almost certainly be outlawed today.

In fact, if one took the wealth of some of these men (like the Rockefellers) and adjusted it for inflation into todayâ€™s dollars, their riches would surpass those of even Bill Gates or Jeff Bezos.

But itâ€™s these latter figures who now belong to todayâ€™s equivalent class of men that can be considered the â€¦ robber baronsâ€¦ of our own era â€¦ the billionaires of high-tech Silicon Valley.

When the Internet boom first occurred in the 1990s, Silicon Valley was quick to tell Congress that Internet sales should not be subject to taxes and that the Internet should not be regulated, lest this burgeoning marketplace be trampled to death before it could fully blossom.

.

But that was then. In the interim, fortunes have been made, and a very small number of players (Amazon, Google, eBay, Facebook, Craigslist, Netflix, Airbnb, Uber) have dominated specific product niches and made certain savvy players such as the aforementioned Bezos and Gates â€¦ along with Mark Zuckerberg, Eduardo Saverin, Larry Page, Sergey Brin, Eric Schmidt, Pierre Omidyar, Craig Newmark, Brian Chesky, Steve Ballmer and Larry Ellison, among others â€¦ insanely rich.

In fact, these peopleâ€™s extreme wealth, along with the relatively unregulated and untaxed industry that gave them that wealth, has convinced many of them that they have the innate right to tinker with markets and monopolies without undue fear of being legislated against or taxed as other industry leaders have been.

In many cases â€¦ Bezos, Zuckerberg and Gates being some of the most notorious examples â€¦ theyâ€™ve been falling all over themselves to enter still further niches â€¦ automated cars, robotics and drones, for example â€¦ in order to dominate those markets also by using their tremendous fortunes to either acquire the leading players in these industries or to drive them out of business through ruthless competition.

Along the way, the enormous power their market monopolies have given them in terms of the data theyâ€™ve been able to compile and the information theyâ€™ve been able to acquire on ordinary American citizens has enriched them even further â€¦ some would say dangerously so.

In many ways, these men (there are virtually zero women among their number) are the proper inheritors of the â€¦ robber baronâ€™s title today; theyâ€™ve become so wealthy, most often through unique, once-in-a-lifetime opportunities of timing and markets, that the rest of us canâ€™t ever hope to come anywhere near their gargantuan fortunes.

Their companies have a permanent presence in Washington, D.C. and rank among the very top retainers of lobbying firms. Left unencumbered, these â€¦ masters of the universeâ€¦ could have a very real potential of ruling over the lives of nearly everyone on the planet in some way for the rest of our lifetimes.

Even now, rumors have been floated that tech billionaires Mark Zuckerberg and Mark Cuban might want to run for president in 2020 or 2024. Nearly all of these men are large contributors to the Democratic Party and have met with Democratic politicians, including Barack Obama, Hillary Clinton, Bill Clinton, Nancy Pelosi and Kamala Harris both one-on-one and in groups.

.

High among their concerns are that immigrants keep flowing across the countryâ€™s borders in order to keep their biggest costs â€¦ intelligent labor â€¦ low. Quick to outsource to foreign countries and even quicker to

leave profits offshore to evade taxes, these billionaires are extremely adept at using the law and corrupt politicians to their advantage.

For most of them, the concerns of the common man (the users of their properties) rank far beneath whatever it is that will further expand and perpetuate their empires. The gap between their ilk and that of the working class has multiplied in the last two decades, at the expense of America's middle class.

Like the robber barons of old, these men are addicted to money, and they can never have enough of it to satisfy their own egos. To them, the laws of the United States are just a tool to access more wealth, and whatever political levers and switches they need to throw in order to get their way are simply a means toward an ultimate end.

After more than 20 years in many cases, it's now long past time to put the regulatory brakes on these people's ventures and business power grabs before we turn into a society ruled by technology and a few men behind thin, oversized flat-panel displays. Companies that have too much power and too much wealth concentrated in too few hands may need to be broken up just as the railroad concerns, oil cartels and steel companies of the original robber baron days were by Washington. [Trent Lapinski says: "Silicon Valley is run like a cartel, and they are essentially modern day robber barons...."](#)

"...I've actually been working on a similar article myself called 'Is Silicon Valley A Cartel?' but I haven't had a chance to finish writing it yet. Perhaps I need to revisit it and publish.

Most of the major tech companies are now using technology to segregate the masses, and social engineer the entire planet much like Hitler and the Nazis attempted previous to WW2, except now the technology exists to do this on a massive scale.

To understand Silicon Valley today, you have to look back to the past and understand how we got here. When Silicon Valley was first founded as a tech hub in the late 1940-50s it was under the intention of developing computer technology for military industrial purposes. The intention was always to further America's technological superiority over the rest of the world.

Many people do not realize that Google and Facebook were both initially funded with both VC and defense contractor money, and many of the tech companies like Amazon have contracts with the CIA and Deep State. Modern day Silicon Valley is the surveillance arm of the Deep State, and has always been an arm of the military industrial complex.

Meanwhile, social media has purposely been engineered to put people in echo chambers, and control the masses. Even Medium is guilty of this, I have nearly 13k followers, yet every time I publish I barely reach 10% of my following. Twitter and Facebook are even worse.

To make matters worse, it gets even more complicated politically. What a lot of people do not know or realize is that after the 2008 market crash Obama was financed by Silicon Valley to get him into office. Once he was in office he struck a deal with the Federal Reserve to bail the economy out and printed a bunch of money which was handed to the Silicon Valley VC firms and tech companies to rebuild the economy.

What those VC firms did with the money was inflate the current tech bubble with printed money by driving up housing costs, pricing out locals and Millennials outside the tech industry, and pretty much destroying the local economy in the Bay Area. While the Bay Area was arguably screwed anyway with the market crash, and the tech industry does provide many jobs, they ultimately didn't give those jobs to the locals and brought in indoctrinated college grads to displace much of the local population and pay them just enough to survive but not enough to buy property.

They then invested in companies that either launder money to increase their power, collect everyone's data, spy on their users, or distract and divide them with propaganda. They also invested heavily in machine learning and A.I. so that they can automate most jobs in the future, and we are now at a point where A.I. is advanced enough to censor the Internet (which Google/YouTube, and Facebook are already doing). This is enabling these companies to become complete and total monopolies, and push political ideologies on the masses with no basis in logic, reason, or reality.

Meanwhile, the billionaires, investors, and CEOs of these companies are so far disconnected from the struggles of every day Americans they actually believe what they're doing is for the greater benefit of humanity. Many of them fancy themselves as superior to the rest of the country, and world, and all their political nonsense is mostly hypocritical virtue signaling rooted in identity politics. The very same identity politics the Nazis used so successfully to divide and conquer the masses during WW2 but with a hypocritical modern day left leaning political spin.

With all that said, what Silicon Valley billionaires are doing is wrong, and hypocritical. However, please don't blame the people, even the tech bros, because even they're all just brainwashed and trying to survive just like everyone else and most don't even realize they're slaves to a system that does not have their long-term interests in mind.

Source: Born and raised in the Bay Area..."

[Bill Snyder](#) of globally published InfoWorld Magazine says: "Silicon Valley: Land of the 21st-century robber barons... **Apple, Amazon.com, eBay, Facebook, Google, and the other technorati believe someone else should pay taxes, hire Americans, or support the society they sell to.** When it comes to paying taxes, Apple doesn't "think different." Like every other global corporation, it does its best to pay as little as is legally permissible. The difference, though, is that Apple does it better than most and tries to convince the people who are stuck with the bills that this is a perfectly normal state of affairs.

In just three years, Apple's tax avoidance ("evasion" is such a tacky word) efforts shifted at least \$74 billion from the reach of the Internal Revenue Service, according to an [explosive report by a Senate subcommittee](#).

I'm no Apple hater; it makes great products I'm happy to use, and it employs tens of thousands of people directly and in its supply chain. But the more I think about its role in public life, the angrier I get. Apple, in its own way, is un-American. Sadly, it has plenty of company in Silicon Valley.

The new aristocracy lives in Silicon Valley, says Snyder. The princelings of technocracy aren't bad people, but their wealth insulates them from the shared experiences that create community. They are a class apart -- maybe even a nation apart. They're the 21st-century successors to the rail and banking tycoons that ruled in the late 19th and early 20th century: the robber barons.

Consider this anecdote told by George Packer in his thoughtful piece in [the May 27 issue of the New Yorker](#): When state budget cuts threatened the quality of their local school, parents in Woodside, Calif. -- one of the wealthiest enclaves in Silicon Valley -- stepped up their fund-raising efforts. The Woodside School Foundation now brings in about \$2 million a year for a school with fewer than 500 children. In a fund-raising auction, one parent bid \$20,000 for a tour of the Japanese gardens of Oracle CEO Larry Ellison, while others paid twice that much for seats at a Mad Men Supper Club dinner for 16 guests.

I'm sure that many of those people would be appalled and upset by the terrible conditions of the underfunded schools in nearby East Palo Alto, and they might even make donations to help out. But I doubt many of them connect the very obvious dots: When big companies and wealthy individuals fail to pay taxes, legally or not, the community suffers.

What makes this so galling in my mind is the hypocritical and egotistical belief in Silicon Valley itself that it is the most enlightened patch of real estate on the planet.

Silicon Valley won't pay fair share, then decries poor public results. As [Alec MacGillis of the New Republic points out](#), it's a bit rich for Apple to argue -- as Steve Jobs did for years, and Tim Cook does now -- that the company needs more visas and green cards for foreign engineers because there aren't enough qualified Americans to fill tech jobs ([patently false](#), by the way), while Apple does its damndest to keep its contribution toward federal education aid as paltry as possible.

Comments Packer:

This is an example so blatant I couldn't have dreamt it up, of the self-deception that exists alongside the hard work, idealism, and engineering brilliance of Silicon Valley. It's the kind of blind spot to which young, self-confident, super-successful industries are especially prone.

One of the subsidiaries set up by Apple in Ireland has paid no corporate income tax to any nation for the past five years, although it reported \$30 billion in net income from 2009 to 2012. Another subsidiary has paid a tax rate to Ireland of 0.1 percent or less in 2009, 2010, and 2011, far below the normal Irish corporate income tax rate of 12 percent, according to the Senate subcommittee's report.

Valley of the dolts

Silicon Valley's power brokers want you to think they're different. But they're just average robber barons.

[Emmett Rensin](#) says: In February 2012, after Facebook announced what was in time to become the largest IPO in the history of internet firms, *The Economist* put a parody of Mark Zuckerberg's profile page on its cover. Next to an insipid, beaming profile picture of the young CEO, there was a status update: "â... VENI VIDI VICI!!! Am I richer than Bill yet? lol.â... They were not the first magazine to draw the comparison. In October 2010, *Vanity Fair* beat them to it, declaring Zuckerberg the No. 1 most influential person in the United States and calling him "â... our new Caesar.â..."

Zuckerberg, of course, had not conquered Gaul. He had not scattered the German armies nor subjugated Britain, nor crossed the Rubicon and become first consul. He had not visited death and terror upon a continent, nor brought an end to an old republic, setting off a chain of intrigues that would birth the mightiest empire in the history of the world. No. Mark Zuckerberg had made a shit ton of money.

By April of this year, Facebook stock was worth more than \$116 a share, up from its initial offering of \$38. The social network had made its early investors even richer than they had ever anticipated. That same month, *The Economist* put Zuckerberg on its cover for the second time but now without detectable irony. His face appeared on a marble statue of Augustus, seated in cape and laurel crown beside a tiny globe. "â... IMPERIAL AMBITIONSâ... roared the headline. Mark's outstretched arm gave the imperial thumbs-up. He liked it.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures. Zuckerberg is Caesar. Elon Musk, [a wizard](#). Peter Thiel, who believes that he lives in the moral universe of Lord of the Rings, is [a vampire](#). I do not know if these men believe that they have the supernatural powers the media claims. Maybe they do. I do know that they do not mind the perception, or at least have done nothing to combat it, even among those critics who believe that they're cartoon villains.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures.

This might not be so bad if the phenomenon were limited to daft profiles by fawning magazine writers. But this Hegelian fan fiction is nowhere more potent than from the mouths of the Disruptors themselves. Mark Zuckerberg [speaks](#) in the voice of God. Shane Smith, by his own account, is the [Stalin](#) of *Vice*. Silicon Valley investor Carl Icahn was called [â... evil Captain Kirkâ...](#) by fellow billionaire Marc Andreessen, before he was himself dubbed [Dr. Evil](#) by Rod Dreher, who has evidently not absorbed a cultural reference since 1999. When Elon Musk worries that Larry Page is hurtling toward AI without a sufficient appreciation of the risks, he calls it [â... summoning the demon.â...](#) Seamless CEO Jonathan Zabusky, a typical case, says his food delivery application for depressed millennials is â... disrupting the paradigmâ... by showing people that â... the era of the paper menuâ... is over. AirBnBâ... s mission statement laments â... the mechanization and Industrial Revolution of the last century,â... which â... displacedâ... â... feelings of trust and belongingâ... ; their mission is to turn the world back into the â... villageâ... of simpler eras by encouraging longstanding residents of gentrifying areas to [rent out](#) their homes to monied travelers. Some firms are more modest: HubSpot, a marketing and sales platform, is merely on a mission to make the whole world â... more inbound,â... which is to say, more reliant on their blogging tips for small businesses.

Even President Obama speaks of Silicon Valley as if it were an industry for madcap geniuses alone, a land of such earth-changing potential that itâ... s somewhere he [might find himself](#) once heâ... s left the Oval Office. When he chides citizens of the Valley, he chides them like a Dr. Frankenstein warning his monster about hubris: â... Sometime we get, I think, in the scientific community, the tech community, the entrepreneurial community, the sense that we just have to blow up the system or create this parallel society,â... he [told](#) the Frontiers Conference last October. The president believes that sense is wrong, of course, but where did he get the idea that tech CEOs were capable of these feats in the first place?

Let us state the obvious: None of these men are Roman Emperors, and they havenâ... t got the wherewithal to â... blow upâ... anything but a stock market bubble. They are not Lex Luthors or Gandalfs or Stalins. Their products do not bring about revolutions. They are simply robber barons, JP Morgans and Andrew Mellons in mediocre T-shirts. I have no doubt that many are preternaturally intelligent, hardworking people, and it is a shame that they have dedicated these talents to the mundane accumulation of capital. But there is nothing remarkable about these men. The Pirates of Silicon Valley do not have imperial ambitions. They have financial ones.

The vast majority of Silicon Valley startups, the sort that project lofty missions and managed improbably lucrative IPOs despite never having graced the cover of *The Economist* or the frontal cortex of the president, work precisely like any other kind of mundane sales operation in search of a product: Underpaid cold-callers receive low wages and less job security in exchange for a foosball table and the burden of growing a company as quickly as possible so that it can reach a liquidation event. Owners and investors get rich. Managers stay comfortable. The employees get hosed. None of this is particularly original. At least the real robber barons built the railroads.

Emily Chang, of Bloomberg, points out that sex trafficking and black-lists run Silicon Valley.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people. This manifests itself in mundane ways, in their open, [cartoonish class spite](#) (why, they ask, must Innovators in San Francisco be burdened by the existence of homeless riff-raff?); it is revealed in their most contemplative moments too. Peter Thiel has said that when the history of the 21st century is written, Ren  Girard will be remembered as one of its greatest intellectuals. Girard is best known for the contention that all human desire is mimetic, that not only aesthetic taste but even hunger and lust are modeled on the desires of others. Perhaps this is why Thiel does not believe that capitalism and democracy [are compatible](#). We know which side heâ... s chosen. So long as he and his fellows can continue to exploit that same mimetic tendency to persuade people that they are superhuman and essential to their flourishing, his side will continue to win.

The sins of the prestige firms are no less mundane. While each at least can claim a real and viable product,

their evil is nothing so spectacular as the demonic. As *The New York Times*, *Guardian*, and others have reported, even the well-compensated white-collar workers of companies like [Amazon](#) and Facebook face notoriously brutal labor conditions. For the warehouse workers and contract laborers required to keep those companies running, matters are [even worse](#). When you are in shipping and they double or triple their workforce over the winter holidays, you are working at times in below zero temps INSIDE the warehouse, one Amazon warehouse worker [wrote](#) to *Gawker* in 2013. Efforts to unionize employees have been met with duplicity beyond ordinary managerial resistance. *Quartz* reported in February on sinister attempts to [thwart organization](#) at Uber. Not content to resist their own employees' efforts to unionize, Uber has also worked to undermine other labor guilds, including [illegal operations](#) in cities that have led to the destruction of local taxi businesses.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people.

AirBnb, despite its Keatsian mission, has mainly succeeded in [ravaging the housing market](#) for low-income families. Seamless hasn't disrupted the paper menu world half so much as it has [disrupted tipping standards](#) and wage prospects for its delivery workers.

The racist hiring practices of Silicon Valley prestige firms are an open secret, with only [5 percent](#) of technical roles held by black or Latino workers. (We are not where we want to be, their diversity reports intone with all the sincerity of a Soviet bureaucrat adjusting potato projections down again). Their collusion with federal spy agencies, assisting in surveillance efforts and voluntarily turning over FISA-court-approved user data in exchange for cash, was a secret, until [it wasn't](#). Peter Thiel did not use magic to destroy *Gawker*; [he used money](#).

In 2010, the Department of Justice exposed what it called an [overarching conspiracy](#) to suppress wages among companies like Apple, Google, Intel, Adobe, Intuit, eBay, and Pixar. The Silicon Valley supermen were aware as far back as 2005 that what they were doing was illegal. [Google's Eric] Schmidt instructed his Senior VP for Business Operation Shona Brown to keep the pact secret and only share information verbally, since I don't want to create a paper trail over which we can be sued later? [reported](#) Mark Ames. At times, he said of the Disruptor's behavior, it reads like something lifted straight out of the robber baron era that produced those [anti-trust] laws. Today's inequality crisis is America's worst on record since statistics were first recorded a hundred years ago the only comparison would be to the era of railroad tycoons in the late 19th century. Although Amazon CEO Jeff Bezos takes only \$81,000 in salary every year barely more than the average Facebook intern! he has managed to accrue a net worth in excess of \$65 billion. Perhaps he really is a wizard.

The cultivation of power requires the projection of power in excess of its reality. When Julius Caesar the real one made up his mind to annihilate the German tribes who had once again invaded Gaul, he ordered his engineers to build a bridge over the Rhine as wide as a two-lane highway, big enough for 10 soldiers to march across side by side. He wanted the Germani to experience fear when they realized that the army of the Roman people was both capable of crossing the Rhine and brave enough to venture it. It worked. When the bridge was finished, the Roman army marched across it as if on parade in the streets of Rome. They went slow with their horns blasting and their flags aloft, led by cavalry draped in ceremonial colors. They found no army on the other side. Terrified of the Roman engineering feat, the Germani had fled in terror, and for 18 days they cowered in the forest while Caesar pillaged every defenseless village he could find. When he was done he marched back to Gaul and ordered the bridge torn down.

If your enemies can convince you that they are an unprecedented species of madman, you will convince yourself that you need unprecedented weapons to fight back or that you may be better off just hiding in the forest. But you are not.

The rigged contracts and wage suppression, the racism and surveillance collusion (soon to be playing [voluntary footsie](#) with Donald Trumpâ... s NSA, with [further chicanery](#) to follow), all these sins of Silicon Valley have come about and been overcome before in the short history of American capitalism. They require only the same weapons as before. Organization and agitation. Strikes and labor laws. The ordinary practice of radical politics. Some of these efforts have [begun already](#), with militant organizing and unionization drives beginning to organize Silicon Valley laborers against their exploiters. But these movements require national and popular support, support that cannot begin until the pretense and terror of world-conquering wizards is abandoned and the truth is laid bare: These are only rich assholes, the same as they ever were. All that superman bullshit is just the cheap propaganda of the powerful, propaganda so thoroughly saturated in the American mind that its own inventors might believe it.

This fall, Silicon Valley Shakespeare (â... Innovate â...ç Illuminate â...ç Inspireâ...) staged *Julius Caesar* for the first time in the companyâ... s 16-year history. The [press release](#) promised that audiences would have a chance to â... see this classic political thriller set in a modern world, showing the power and problem of the mob mentality, and how far people will go to rule a nation.â...

This summary is instructive. To the entertainers of the Valley, *Julius Caesar* is a play about â... mob mentality,â... the dangers of unruly herds who upset the proper order of the world. This is an assessment that might surprise anyone who has read Shakespeareâ... s history and noticed that with the exception of a soothsayer and a single servant, every character in it is an aristocrat. But more than that, it is remarkable because as any high school student can tell you, *Julius Caesar* is not a play about the dangers of the mob; it is a play about the dangers of ambition and power. It is about hubris. You do not see the crowds that Brutus and Antony address because the crowds do not matter. They only exist to cheer the rivals as they sort out the pretense of the coming war. The fault that was not in their stars but in themselves has been corrected. They are underlings no more.

Julius Caesar is about a man believed to be a God, a man who cultivated divinity so well that he believed it himself. It is about a man who believed it until the mid-March afternoon when he discovered to his great surprise that even Caesar can be overthrown with old and ordinary weapons.

Per The United States Congress, The FBI and the FTC: The High-Tech Antitrust Black-Listing Litigation is a [United States Department of Justice](#) (DOJ) [antitrust](#) action and a civil [class action](#) against several [Silicon Valley](#) companies for secret collusion agreements which targeted high-tech employees. This case was one of the most famous federal lawsuits in Silicon Valley. [Scam fronts for Silicon Valley oligarchs are being exposed daily.](#)

The [tech Cartel is evil](#) because: they steal any technology they desire; they run a [prostitution ring](#) and [sexually extort young women and interns](#) in Silicon Valley; they are 'rape culture' [take-what-they-want misogynists](#), ageists and [racists](#) as their history of abuses has proven; their Palo Alto Cartel operates [AngelGate-type](#) collusion and [stock market insider trading schemes that harm independent business and the public](#); their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files [reveal horrific abuses](#) and [sex trafficking](#); They have an [army of lobbyists](#) that pay cash, stock market and [revolving door bribes](#) to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as [trophy wives](#) and [beards](#); they have [lobbyists rig the U.S. Patent Office](#) in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, [kicking and harming women hundreds of times](#); They have bought up all of the Tier-One tech law firms and order them to [black-list](#), and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of **douche-bags** and **yuppie frat boy** [criminals](#) in human

history. [Theranos](#) is not the exception, it is the standard. [Tesla](#), [Google](#), [Theranos](#), [Wework](#), [Facebook](#) are lies backed by famous political insiders to protect [their insider trading](#) and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are [frat boy scumbags](#), from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your [Senator holds stock market shares](#) in companies that exist to [profit on the backs of consumers](#), via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many **TRILLIONS** of dollars pass through the stock markets annually and then look at the reported, **AND UNREPORTED**, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing. [These are massive crimes!](#)

The crooks at Google, Facebook, Tesla, Linkedin, Netflix, etc., broke felony laws and the [basic principles of Democracy](#).

[Google faces \\$5 billion lawsuit in U.S. for tracking 'private' internet use. Google WILL pay for their crimes or be killed off as a business because of their corruption!](#)

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

What kinds of people were some of these high tech oligarchs? Read their divorce Court Records about their Jeffrey **Epstein**, [NXIVM](#) sex trafficking; Andy Rubin and Goguen [sex slaves](#); tax evasions; money laundering; intern abuses; misogyny; racism; political insider-trading stock market bribes to U.S. Senators; a '[Silicon Valley Tech Mafia](#)' and other horrors.

What would you do if you found out that Eric Schmidt, Larry Page, Elon Musk, Sergy Brin, John Doerr and other dynastic elitist insider Stanford frat boys were running a mob-like Cartel? Over 60,000 engineers in Silicon Valley took the problem to Federal Court!

Ask Christopher Wray, John F. Bennett, Craig D. Fair and the other senior officials at the FBI, DOJ, SEC, FTC and other major federal investigation agencies: ***Organized crime in Silicon Valley is getting a harder look these days!***

The defendants, in the first case, included [Adobe](#), [Apple Inc.](#), [Google](#), [Intel](#), [Intuit](#), [Pixar](#), [Lucasfilm](#) and [eBay](#), all high-technology companies with a principal place of business in the San Franciscoâ... Silicon Valley area of California where they collude together to harm competitors. ***It is a well documented fact that Facebook, Google, Netflix, Linkedin, etc. use sophisticated psychological testing on each applicant in order to filter out all but the most radical devotees of the founders ideologies. These companies then maintain an echo-chamber resonance, throughout the company, to reinforce their ideological message, much like Scientology does. In these companies one must praise Elon Musk and Mark Zuckerberg and hate those who the founders target. The founders target their competitors, in violation of anti-trust laws.***

The first civil class action was filed by five plaintiffs, one of whom has died in a curious incident; it accused the tech companies of collusion between 2005 and 2009. In [Abolish Silicon Valley: How to liberate](#)

[technology from capitalism we see another of thousands of insiders expose the fact that Silicon Valley is a pile of filth.](#)

Additional cases are planned for filing. Formal complaints have been filed with The SEC, The DOJ, The GAO, The FBI, The FTC and The U.S. Congress. Active investigations into '[Angelgate' and related collusion and anti-trust matters](#) are known to be under-way by federal, news outlet and private investigators as of 2020. U.S. Senators, and other politicians, who covertly own stock in these Silicon Valley companies, have been delaying enforcement against these corrupt companies. Consumer rights groups have pledged to take down each and every politician who owns these corrupt stocks and protects these corrupt companies!

Our alliance of investigators and agency staff have FBI-level investigated: Steven Chu, Larry Page, David Dummond, Lachlan Seward, Andy Rubin, Jeffrey Epstein, Elon Musk, Nicholas Guido Denton, Harvey Weinstein, Eric Schmidt and the rest of the RICO-violating "Club" and had them fired or removed from their positions. They will remain under public surveillance for the rest of their lives and their case files will be added to monthly via submissions to federal agencies and news entities.

What would an insane tech oligarch (Like Schmidt, Musk, Reid, Brin, Westly, Page, Khosla, etc.) do for trillions of dollars of criminal gain?

When you run the following query on the stock market volume for a single day, ie: *"Select sum(Close*volume*0.001), count(*) from myTable where date = '9/27/2017'."*..you get the following result: 7300 stocks were traded, Total Money flow: \$271,072,334,824. This is how much was traded on that day.

The total world derivatives market has been estimated at about \$791 trillion face or nominal value, 11 times the size of the entire world economy.

The World Bank publishes global data on stocks traded by \$ value [here](#). ie:

- 2016 - \$77.5 trillion for the year.

Most exchanges publish this stat. [Here](#) is the data for NASDAQ

- Feb 6, 2018 - \$192 billion for the day.

And the Indian stock market volume data (in Indian Rupees) is [here](#).

- BSE + NSE cash market, Feb 2018 - About Rs 40,000 crore daily. Thatâ... s about \$6 billion per day.

Average estimates put daily stock movement between 5 to ten trillion dollars per day. You can buy lot's of Weinstein/Epstein-like private islands, private jets, sex parties, U.S. Senators and crony government contracts with that kind of money. Once an oligarch starts buying sex with underage girls, they don't stop. [In fact, there is nothing that a corrupt tech oligarch and their owned Senator won't do to keep their little pig trough filled up.](#)

The average murder/robbery in the United States is undertaken for an average amount under \$100.00

Thus, an Eric Schmidt, Elon Musk, Steve Westly, David Drummond, Vinod Khosla, Reid Hoffman, Steve Jurvetson, Andy Rubin, Larry Page or similar oligarch, who is sociologically addicted to money and power, is [most certainly capable of ordering and operating election manipulations](#), Presidential bribes, murders and engaging in other crimes to protect those greed-based assets. They have the full resources to do so, have federal records proving that they hire lobbyists and operatives who do these things for them and have a documented history of engaging in extremist actions.

The Silicon Valley Cartel Hires Gawker, Gizmodo, Jalopnik, Black Cube, Fusion GPS, etc. to run "hit-jobs" on those who report their crimes!

The Hit Job

How much do you have to pay Google, Alphabet, YouTube and Black Cube to dedicate a portion of their servers to push a character assassination set of links, against a competitor, to all five billion people on Earth with internet access? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much do you have to pay to get them to lock those attack links on one of the first 4 lines of EVERY search result, in the same position in the search results, for over a decade (which proves that their search results are not "organic", they are manually manipulated by Google and YouTube)? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to make a Disney-like animated movie about a whistle-blower? How much does the production and software and person-hour billings cost? How much does it cost to distribute that movie world-wide and lock it in the top line of all search results?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to hire a warehouse full of Russian, Nigerian and Chinese click-farm operators who use Palantir and Google software to instantly be alerted of any mention of a person's name on the internet and to then go slam that person in the comment sections with endless troll remarks? Elon Musk uses these same people to hype his narcissistic need for attention. Obama, Clinton, Bloomberg and other politicians hire these

same people to attack their political adversaries. How much does it cost to have anonymous trolls in foreign countries kill a person's brand globally?

We know. We have their financial records, invoices and receipts and a huge number of lawsuits, court records, federal investigation and investigative journalism reports have exposed those records and details. The FBI, NSA, SEC, FTC and Congressional investigators can also confirm these numbers!

So it turns out that it costs: **\$35,422,152.00 to have a person and their business killed!**

That is how much they spent on their attack on the Plaintiff! The people at the top of the heap who organized the attacks were David Plouffe, Jay Carney, David Axelrod, Denis McDonough, Steve Rattner, Robert Gibbs, Rahm Emanuel and their associates and they did it from **The West Wing and The Oval Office in The White House.**

Many of the political attacks were edited by [Nick Denton](#) and his seedy tabloid empire Gawker/Gizmodo. Investigations have revealed that the White House and California Senators hired IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters); Black Cube; Correct The Record; Orbis Business Intelligence, Undercover Global Ltd; Stratfor; Jigsaw; ShareBlue/Acronym; Cambridge Analytica; Sid Blumenthal; David Brock; Plouffe Consulting; PR Firm Sunshine Sachs; Covington and Burling; BuzzFeed; Perkins Coie; Advance Democracy Inc.; The Democracy Integrity Project; Popily, Inc; Bean, LLC.; Edward Austin; Istok Associates; [Silicon Valley Community Foundation](#); Yonder and Wilson Sonsini to run hit-jobs, character assassinations, dirty tricks and economic reprisal attacks on any applicants who reported the crimes. Each of those companies are now under federal and civil investigation. These companies sell "kill services" that use CIA and KGB-style tactics to harm witnesses and whistle-blowers.

Media Matters for America founder David Brock is a hired media assassin who reaped illegal profits through the transfer of millions from a nonprofit he founded to a for-profit entity under his control, according to an IRS complaint filed by a watchdog group. The [complaint](#) details how Brock's nonprofit group American Bridge Foundation (AB Foundation) transferred \$2.7 million in tax-exempt assets to True Blue Media, a for-profit company owned by Brock that is the parent company of ShareBlue, a for-profit media company now known as [The American Independent](#). The transfers violated IRS rules that prohibit nonprofit organizations from using their tax-exempt resources to pay personal or private expenses of any key figures connected to the nonprofit, the complaint stated. AB Foundation's transfers to True Blue Media were disclosed in the nonprofit's Form 990s filed to the IRS in [2017](#) and [2018](#). *"Brock is a well-known hit man who took money to target our group in reprisal for whistle-blowing...."* Said Team 7 staff.

The money was conduited and assisted for pass-through by political financiers Eric Schmidt, Larry Page, Sergey Brin, Elon Musk, John Doerr, Vinod Khosla, Steve Westly, Steve Spinner and their [Silicon Valley oligarch Cartel](#) black-listing operation.

It was a felony. It violated RICO, Anti-Trust and Constitutional laws.

So they spent over thirty five million dollars attacking the Plaintiff and shutting down a competitor that was targeted to make over six billion dollars in profits. The attackers then made the six billion dollars in profits for themselves, at the expense of the Plaintiff.

So how much do you think they owe the Plaintiff per previous court awards for such crimes against a member of the public?

☐ <https://money.cnn.com/2014/08/11/technology/silicon-valley-poaching-case/index.html>

A **lawsuit** by **Silicon Valley** workers claims Steve Jobs was a ringleader in a conspiracy not to poach employees. If **Silicon Valley's** biggest companies want an embarrassing employee **lawsuit** to go ...

The perpetrators operate a **massive and abusive national sex cult**. [The perverts](#) in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and [Ed Buck](#) sex scandals are well known. These men's [sex cult actions](#) have been widely covered in the news individually in the [Joe Lonsdale rape case](#), [The Kleiner Perkins Ellen Pao sex abuse lawsuit](#), The [Eric Schmidt sex penthouse stories](#), [The Jeffrey Epstein case](#), The [Google Forrest Hayes hooker murder case](#), The [Andy Rubin sex slave case](#), The [Sergy Brin 3-way sex romp](#) scandal, The [British Hydrant investigation](#), The [Elon Musk Steve Juvetson billionaire sex parties](#) scandals, The [NXIVM sexual slave](#) cases, The [Michael Goguen anal sex slave](#) trial, [The Tom Perkins Hooker Parties](#) and thousands of other cases and [federal divorce court filings](#). This [group of people](#) have proven themselves, over and over, to be [sociopath control freaks](#) not fit for participation in public commerce, public policy or media control. [The Four Seasons Hotel](#) and [Rosewood Hotels](#) in [Silicon Valley](#) are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by [Eastern Bloc Mafia operators](#). At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. [Google's Eric Schmidt is under massive investigation](#). You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid *"not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason..."*. Multiple attorney general's controlled by their cartel, ie: [Eric Schneiderman](#) and [Eliot Spitzer](#), are involved in these sex rings. *These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses!*

The AngelGate Conspiracy (<https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html>); The Job Collusion Case (https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation) and hundreds of other cases, prove that the perpetrators regularly [meet](#), [conspire](#), [collude](#) and racketeer, in [full view](#) of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution.

Public officials and Silicon Valley oligarchs exchanged felony bribes and manipulated government actions in order to benefit themselves and harm us. these are the facts including the lists of bribes, attacks and covert financing routes!

Famous members of congress lie, cheat, steal and manipulate public records in order to protect their trillions of dollars of Google, Facebook, Netflix, Tesla and Amazon insider stock market payola.

Now the public is working together, around the globe, to end this corruption forever by exposing every single one of the corrupt and all of their dirty secrets!

[Department of Energy staff \(ie: Chu\), White House staff \(ie: Emanuel\), CIA staff \(ie: Woolsey\) owned the rare earth \(ie: lithium, indium\) mining scam stock \(ie: Goldman Sachs transfers\) market securities from foreign countries \(ie: Afghanistan, Congo\) which only benefited themselves, Elon Musk and his Silicon Valley cartel.](#)

Demand the immediate divestiture of all stock market holdings of all politicians and their family members because that is how most bribes are now paid! The FBI needs to arrest these goons!

The complaint arose out of a larger investigation by the Antitrust Division into employment practices by **high tech** firms. The division continues to investigate other similar **no** solicitation agreements. Adobe Systems Inc. is a Delaware corporation with its principal place of business in San Jose, Calif., and 2009 revenues of nearly \$3 billion.

"No cold call" agreements

Cold calling is one of the main methods used by companies in the high-technology sector to recruit employees with advanced and specialised skills, such as software and hardware engineers, programmers, animators, digital artists, Web developers and other technical professionals.^[1] Cold calling involves communicating directly in any manner with another firm's employee who has not otherwise applied for a job opening. Cold calling may be done in person, by phone, letter, or email.^[2] According to the legal brief filed by a plaintiff in one of the class-action cases, cold calling is an effective method of recruiting for the high-technology sector because "employees of other [high-technology] companies are often unresponsive to other recruiting strategies... [and] current satisfied employees tend to be more qualified, harder working, and more stable than those who are actively looking for employment."^[3]

Amy Lambert, Google's associate general counsel, noted in a blog post shortly after the DOJ's actions, that Google's definition of cold calling does not necessarily eliminate recruiting by letter or email, but only the process of calling on the telephone. By implication, recruiting through LinkedIn incurs recruiting by "InMail" - LinkedIn's own mail contact system: "In order to maintain a good working relationship with these companies, in 2005 we decided not to "cold call" employees at a few of our partner companies. Our policy only impacted cold calling, and we continued to recruit from these companies through LinkedIn, job fairs, employee referrals, or when candidates approached Google directly. In fact, we hired hundreds of employees

from the companies involved during this time period."

The challenged "no cold call" agreements are alleged bilateral agreements between high technology companies not to cold call each other's employees. The DOJ alleges that senior executives at each company negotiated to have their employees added to 'no call' lists maintained by human resources personnel or in company hiring manuals. The alleged agreements were not limited by geography, job function, product group, or time period. The alleged bilateral agreements were between: (1) Apple and Google, (2) Apple and Adobe, (3) Apple and Pixar, (4) Google and Intel, (5) Google and Intuit,^[4] and (6) Lucasfilm and Pixar.^[5]

The civil class action further alleges that agreements also existed to (1) "provide notification when making an offer to another [company]'s employee (without the knowledge or consent of the employee)" and (2) "agreements that, when offering a position to another company's employee, neither company would counteroffer above the initial offer."^[3]

Department of Justice antitrust action

The [United States Department of Justice Antitrust Division](#) filed a complaint in the [US District Court for the District of Columbia](#) alleging violations of Section 1 of the [Sherman Act](#). In *US v. Adobe Systems Inc., et al.*, the Department of Justice alleged that Adobe, Apple, Google, Intel, Intuit, and Pixar had violated Section 1 of the Sherman Act by entering into a series of bilateral "No Cold Call" Agreements to prevent the recruitment of their employees (a similar but separate suit was filed against Lucasfilm on December 21, 2010^[6]). The DOJ alleged in their Complaint that the companies had reached "facially anticompetitive" agreements that "eliminated a significant form of competition...to the detriment of the affected employees who were likely deprived of competitively important information and access to better job opportunities." The DOJ also alleged that the agreements "were not ancillary to any legitimate collaboration," "were much broader than reasonably necessary for the formation or implementation of any collaborative effort," and "disrupted the normal price-setting mechanisms that apply in the labor setting."^[4] The same day it filed the suit, the DOJ and the defendants proposed a settlement.^[7]

.

A final judgment enforcing the settlement was entered by the court on March 17, 2011.^[8] Although the DOJ Complaint only challenged the alleged "no cold call" agreements, in the settlement, the companies agreed to a more broad prohibition against "attempting to enter into, entering into, maintaining or enforcing any agreement with any other person to in any way refrain from, requesting that any person in any way refrain from, or pressuring any person in any way to refrain from soliciting, cold calling, recruiting, or otherwise competing for employees of the other person", for a period of five years; the court can grant an extension.^[8] The settlement agreement does not provide any compensation for company employees affected by the alleged agreements.^[9] Lucasfilm entered into a similar settlement agreement in December 2010.^[5]

Civil class action

In re: High-Tech Employee Antitrust Litigation ([U.S. District Court, Northern District of California](#) 11-cv-2509 ^[10]) is a [class-action](#) lawsuit on behalf of over 64,000 employees of [Adobe](#), [Apple Inc.](#), [Google](#), [Intel](#), [Intuit](#), [Pixar](#) and [Lucasfilm](#) (the last two are subsidiaries of [Disney](#)) against their employer alleging that their wages were repressed due to alleged agreements between their employers not to hire employees from their competitors.^{[11][12]} The case was filed on May 4, 2011 by a former software engineer at Lucasfilm and alleges violations of California's antitrust statute, Business and Professions Code sections 16720 et seq. (the "Cartwright Act"); Business and Professions Code section 16600; and California's unfair competition law, Business and Professions Code sections 17200, et seq. Focusing on the network of connections around former Apple CEO [Steve Jobs](#), the Complaint alleges "an interconnected web of express agreements, each with the

active involvement and participation of a company under the control of Steve Jobs...and/or a company that shared at least one member of [Apple's board of directors](#)." The alleged intent of this conspiracy was "to reduce employee compensation and mobility through eliminating competition for skilled labor."^[13]

On October 24, 2013 the [United States District Court for the Northern District of California](#) granted class certification for all employees of Defendant companies from January 1, 2005 through January 1, 2010.^[9]

As of October 31, 2013, Intuit, Pixar and Lucasfilm have reached a tentative settlement agreement. Pixar and Lucasfilm agreed to pay \$9 million in damages, and Intuit agreed to pay \$11 million in damages.^[9] In May 2014, Judge [Lucy Koh](#) approved the \$20 million settlement between Lucasfilm, Pixar, and Intuit and their employees. Class members in this settlement, which involved fewer than 8% of the 65,000 employees affected, will receive around \$3,840 each.^[14]

The trial of the class action for the remaining Defendant companies was scheduled to begin on May 27, 2014. The plaintiffs intended to ask the jury for \$3 billion in compensation, a number which could in turn have tripled to \$9 billion under antitrust law.^[15] However, in late April 2014, the four remaining defendants, [Apple Inc.](#), [Google](#), [Intel](#) and [Adobe Systems](#), agreed to settle out of court. Any settlement must be approved by Judge [Lucy Koh](#).^{[16][17]}

On May 23, 2014, Apple, Google, Intel, Adobe agreed to settle for \$324.5 million. Lawyers sought 25% in attorneys' fees, plus expenses of as much as \$1.2 million, according to the filing. Additional award payments of \$80,000 would be sought for each named plaintiff who served as a class representative.^[18] Payouts will average a few thousand dollars based on the salary of the employee at the time of the complaint.

In June 2014, Judge Lucy Koh expressed concern that the settlement may not be a good one for the plaintiffs. Michael Devine, one of the plaintiffs, said the settlement is unjust. In a letter he wrote to the judge he said the settlement represents only one-tenth of the \$3 billion in compensation the 64,000 workers could have made if the defendants had not colluded.^[19]

On August 8, 2014, Judge Koh rejected the settlement as insufficient on the basis of the evidence and exposure. Rejecting a settlement is unusual in such cases. This left the defendants with a choice between raising their settlement offer or facing a trial.^[20]

On September 8, 2014, Judge Koh set April 9, 2015 as the actual trial date for the remaining defendants, with a pre-trial conference scheduled for December 19, 2014. Also, as of early September 2014, the defendants had re-entered mediation to determine whether a new settlement could be reached.^[21]

A final approval hearing was held on July 9, 2015.^[22] On Wednesday September 2, 2015, Judge Lucy H. Koh signed an order granting Motion for Final Approval of Class Action Settlement. The settlement website stated that Adobe, Apple, Google, and Intel has reached a settlement of \$415 million and other companies settled for \$20 million.

According to the settlement website, Gilardi & Co., LLC distributed the settlement to class members the week of December 21, 2015.

- [Eric Schmidt & Role in illegal non-recruiting agreements](#)
- [Antipoaching](#)

The Tectopus: How Silicon Valley's most celebrated CEOs conspired to drive down 100,000 tech engineers' wages

[By Mark Ames](#)

In early 2005, as demand for Silicon Valley engineers began [booming](#), Apple's Steve Jobs sealed a secret and illegal pact with Google's Eric Schmidt to artificially push their workers wages lower by agreeing not to recruit each other's employees, sharing wage scale information, and punishing violators. On February 27, 2005, Bill Campbell, a member of Apple's board of directors and [senior advisor](#) to Google, emailed Jobs to confirm that Eric Schmidt "got directly involved and firmly stopped all efforts to recruit anyone from Apple."

Later that year, Schmidt instructed his Sr VP for Business Operation Shona Brown to keep the pact a secret and only share information "verbally, since I don't want to create a paper trail over which we can be sued later?"

These secret conversations and agreements between some of the biggest names in Silicon Valley were first exposed in a Department of Justice antitrust [investigation](#) launched by the Obama Administration in 2010. That DOJ suit became the basis of a [class action lawsuit](#) filed on behalf of over 100,000 tech employees whose wages were artificially lowered â€¦ an [estimated \\$9 billion](#) effectively stolen by the high-flying companies from their workers to pad company earnings â€¦ in the second half of the 2000s. Last week, the

9th Circuit Court of Appeals denied attempts by Apple, Google, Intel, and Adobe to have the lawsuit tossed, and gave final approval for the class action suit to go forward. A jury trial date has been set for May 27 in San Jose, before US District Court judge Lucy Koh, who presided over the Samsung-Apple patent suit.

In a related but separate investigation and ongoing suit, eBay and its former CEO Meg Whitman, now CEO of HP, are being sued by both the [federal government](#) and the [state of California](#) for arranging a similar, secret wage-theft agreement with Intuit (and possibly Google as well) during the same period.

The secret wage-theft agreements between Apple, Google, Intel, Adobe, Intuit, and Pixar (now owned by Disney) are described in court papers obtained by PandoDaily as "an overarching conspiracy" in violation of the Sherman Antitrust Act and the Clayton Antitrust Act, and at times it reads like something lifted straight out of the robber baron era that produced those laws. Today's inequality crisis is America's [worst on record](#) since statistics were first recorded a hundred years ago â... the only comparison would be to the era of the railroad tycoons in the late 19th century.

Shortly after sealing the pact with Google, Jobs strong-armed Adobe into joining after he complained to CEO Bruce Chizen that Adobe was recruiting Apple's employees. Chizen sheepishly responded that he thought only a small class of employees were off-limits:

I thought we agreed not to recruit any senior level employees.... I would propose we keep it that way. Open to discuss. It would be good to agree.

Jobs responded by threatening war:

OK, I'll tell our recruiters they are free to approach any Adobe employee who is not a Sr. Director or VP. Am I understanding your position correctly?

Adobe's Chizen immediately backed down:

I'd rather agree NOT to actively solicit any employee from either company.....If you are in agreement, I will let my folks know.

The next day, Chizen let his folks â... Adobe's VP of Human Resources â... know that "we are not to solicit ANY Apple employees, and visa versa." Chizen was worried that if he didn't agree, Jobs would make Adobe pay:

if I tell Steve [Jobs] it's open season (other than senior managers), he will deliberately poach Adobe just to prove a point. Knowing Steve, he will go after some of our top Mac talent...and he will do it in a way in which they will be enticed to come (extraordinary packages and Steve wooing).

Indeed Jobs even threatened war against Google early 2005 before their "gentlemen's agreement," telling Sergey Brin to back off recruiting Apple's Safari team:

if you [Brin] hire a single one of these people that means war.

Brin immediately advised Google's Executive Management Team to halt all recruiting of Apple employees until an agreement was discussed.

In the geopolitics of [Silicon Valley tech power](#), Adobe was no match for a corporate superpower like Apple. Inequality of the sort we're experiencing today affects everyone in ways we haven't even thought of â... whether it's Jobs bullying slightly lesser executives into joining an illegal wage-theft pact, or the tens of

thousands of workers whose wages were artificially lowered, transferred into higher corporate earnings, and [higher compensations](#) for those already richest and most powerful to begin with.

Over the next two years, as the tech industry entered another frothing bubble, the secret wage-theft pact which began with Apple, Google and Pixar expanded to include Intuit and Intel. The secret agreements were based on relationships, and those relationships were forged in Silicon Valley's [incestuous boards of directors](#), which in the past has been recognized mostly as a problem for shareholders and corporate governance advocates, rather than for the tens of thousands of employees whose wages and lives are viscerally affected by their clubby backroom deals. Intel CEO Paul Otellini [joined](#) Google's board of directors in 2004, a part-time gig that netted Otellini [\\$23 million in 2007](#), with tens of millions more in Google stock options still in his name â... which worked out to \$464,000 per Google board event if you only counted the stock options Otellini cashed out â... dwarfing what Otellini made off his Intel stock options, despite spending most of his career with the company.

Meanwhile, Eric Schmidt served on Apple's board of directors until 2009, when a [DoJ antitrust investigation](#) pushed him to resign. Intuit's chairman at the time, Bill Campbell, also served on Apple's board of directors, and as official advisor â... ["consigliere"](#) â... to Google chief Eric Schmidt, until he [resigned](#) from Google in 2010. Campbell, a celebrated figure ("a quasi-religious force for good in Silicon Valley") played a key behind-the-scenes role connecting the various CEOs into the wage-theft pact. Steve Jobs, who took regular Sunday walks with Campbell near their Palo Alto homes, valued Campbell for his ability "to get A and B work out of people," gushing that the conduit at the center of the \$9 billion wage theft suit, ["loves people, and he loves growing people."](#)

Indeed. Eric Schmidt has been, if anything, even more profuse in his praise of Campbell. Schmidt credits Campbell for structuring Google when Schmidt was brought on board in 2001:

His contribution to Google â... it is literally not possible to overstate. He essentially architected the organizational structure.

Court documents show it was Campbell who first brought together Jobs and Schmidt to form the core of the Silicon Valley wage-theft pact. And Campbell's name appears as the early conduit bringing Intel into the pact with Google:

Bill Campbell (Chairman of Intuit Board of Directors, Co-Lead Director of Apple, and advisor to Google) was also involved in the Google-Intel agreement, as reflected in an email exchange from 2006 in which Bill Campbell agreed with Jonathan Rosenberg (Google Advisor to the Office of CEO and former Senior Vice President of Product Management) that Google should call [Intel CEO] Paul Otellini before making an offer to an Intel employee, regardless of whether the Intel employee first approached Google.

Eric Schmidt has A psychotic need to control governments and society. Eric Schmidt does not think twice about hiring assassins, media hit-job operators, Black Cube and Fusion GPS hatchet job providers and bribe-positive lobbyists

In July 2016, Raymond Thomas, a four-star general and head of the U.S. Special Operations Command, hosted a guest: Eric Schmidt, the chairman of Google.

General Thomas, who served within the 1991 gulf war and deployed many times to Afghanistan, spent the higher half of a day showing Mr. Schmidt around Special Operations Commandâ... s headquarters in Tampa, Fla. They scrutinized prototypes for a robotic exoskeleton suit and joined operational briefings, which Mr. Schmidt needed to study extra about as a result of he had recently begun advising the military on technology.

After the go-to, as they rode in a Chevy Suburban towards an airport, the conversation turned to a form of artificial intelligence.

“... You absolutely suck at machine learning,” Mr. Schmidt informed General Thomas, the officer recalled. “... If I got under your tent for a day, I could solve most of your problems.” General Thomas said he was so offended that he needed to throw Mr. Schmidt out of the car, however refrained.

Four years later, Mr. Schmidt, 65, has channeled his blunt assessment of the military’s tech failings into a private campaign to revamp America’s defense forces with extra engineers, extra software program and extra A.I. In the method, the tech billionaire, who [left Google last year](#), has reinvented himself because of the prime liaison between Silicon Valley and the national security community.

Mr. Schmidt now sits on two government advisory boards aimed toward bounce beginning technological innovation in the Defense Department. His confidants embrace former Secretary of State Henry Kissinger and ex-Deputy Defense Secretary Robert Work. And by means of his personal enterprise capital agency and a \$13 billion fortune, Mr. Schmidt has invested millions of {dollars} into more than half a dozen defense start-ups.

In an interview, Mr. Schmidt “... by turns thoughtful, pedagogical and hubristic” ... stated he had embarked on an effort to modernize the U.S. military because it was “... stuck in software in the 1980s.”

He portrayed himself as a successful technologist who didn’t consider in retirement and [who owed a debt to the country](#) for his wealth ... and who now had time and perception to resolve one of America’s hardest issues. The purpose, he stated, “... should be to have as many software companies to supply software of many, many different kinds: military, H.R. systems, email systems, things which involve military intelligence, weapons systems and what have you.”

Mr. Schmidt is urgent ahead with a Silicon Valley worldview the place advances in software program and A.I. are the keys to determining nearly any situation. While that philosophy has led to [social networks that spread disinformation](#) and different unintended penalties, Mr. Schmidt stated he was convinced that making use of new and comparatively untested technology to complex conditions “... together with lethal ones” ... would make service members extra environment friendly and bolster the United States in its competition with China.

His techno-solutionism is difficult by his ties to Google. Though Mr. Schmidt left the corporate’s board final June and has no official working function, he holds \$5.3 billion in shares of Google’s parent, Alphabet. He also stays on the payroll as an adviser, incomes a \$1 annual wage, with two assistants stationed at Google’s Silicon Valley headquarters.

That has led to allegations that Mr. Schmidt is placing Google’s financial pursuits forward of different concerns in his protection work. Late final yr, a federal court ordered a congressional advisory committee he leads to flip over data that would make clear whether or not Mr. Schmidt had advocated his business interests whereas heading the group.

Mr. Schmidt stated he had adopted guidelines to keep away from conflicts. “... Everybody is rule-bound at the Pentagon, and we are too,” he stated.

Google and the Defense Department declined to touch upon Mr. Schmidt's work.

Even without these issues, shifting the military's path isn't any easy process. While Mr. Schmidt has helped generate reports and recommendations about know-how for the Pentagon, [few have been adopted](#).

"I'm sure he'll be frustrated," stated Representative Mac Thornberry, a Republican of Texas who nominated Mr. Schmidt in 2018 to an advisory committee on A.I. "Unlike the private sector, you can't just snap your fingers and make it happen."

Mr. Schmidt acknowledged that progress was sluggish. "I am bizarrely told by my military friends that they have moved incredibly fast, showing you the difference of time frames between the world I live in and the world they live in," he stated.

But he stated he had little intention of backing down. "The way to understand the military is that the soldiers spend a great deal of time looking at screens. And human vision is not as good as computer vision," he stated. "It's insane that you have people going to service academies, and we spend an enormous amount of training, training these people, and we put them in essentially monotonous work."

Mr. Schmidt's first brush with the military got here in 1976, whereas he was in graduate college on the University of California, Berkeley. There, he centered on research on distributed computing, funded by cash from Darpa, an analysis arm of the Defense Department.

The work catapulted Mr. Schmidt into his technology profession. After finishing his graduate studies in pc science, he labored at various tech firms for more than twenty years, together with the networking software maker Novell. In 2001, Google appointed him chief govt.

The search engine firm was then in its infancy. Its 20-something founders, Larry Page and Sergey Brin, were contemporary out of a Stanford University doctorate program and had little business expertise. Mr. Schmidt was hired to assist information them, offering "adult supervision," which he did "after which some."

Mr. Schmidt [took Google public in 2004](#) and built it right into a behemoth, diversifying into smartphones, cloud computing and [self-driving cars](#). The success turned him right into an enterprise movie star. In 2009, he served as a tech adviser to the Obama administration.

In 2011, with Google price almost \$400 billion, the corporate introduced Mr. Page was able to resume the C.E.O. reins. Mr. Schmidt turned govt chairman.

In that function, Mr. Schmidt took on new tasks, many of which introduced him to Washington. In 2012, he participated in categorized briefings on cybersecurity with Pentagon officers as half of the Enduring Security Framework program. In 2015, he attended a seminar on the banks of the Potomac River, hosted by then-Defense Secretary Ash Carter, on the use of know-how inside the government.

"It was all interesting to me," Mr. Schmidt stated. "I didn't really know much about it."

He additionally traveled to North Korea, Afghanistan and Libya whereas writing a guide about know-how and diplomacy, and dabbled in politics, lending technical assist to Hillary

Clinton within the run-up to her 2016 presidential marketing campaign.

His enterprise capital fund, Innovation Endeavors, was lively too. It invested in start-ups like Planet Labs, which operates satellites and sells the imagery to protection and intelligence companies, and Team8, a cybersecurity firm based by former Israeli intelligence members.

At the 2016 World Economic Forum in Davos, Switzerland, Mr. Carter requested Mr. Schmidt to fulfill. He had a proposal: Could Mr. Schmidt lead the Defense Innovation Board, a civilian advisory group tasked with bringing new technology to the Pentagon?

â... We were in one of these dumpy hotels, and there he is with his small entourage walking in, and he basically said to me, â... This is what I want to do. Youâ... d be the perfect person to be chairman,â... â... Mr. Schmidt said.

Mr. Schmidt said he turned down the function as a result of he was busy and had no military background. But Mr. Carter argued that Mr. Schmidtâ... s tech experience was wanted, because the U.S. military â... which had as soon as been a middle of innovation â... was falling behind companies like Google and Facebook in software and A.I.

Mr. Schmidt finally agreed. (Mr. Carter didnâ... t reply to requests for remark.)

As head of the Defense Innovation Board, Mr. Schmidt started touring navy bases, plane carriers and plutonium strongholds. The journeys, which took Mr. Schmidt to about 100 bases in locations like Fayetteville, N.C., and Osan, South Korea, have been a definite break from his well-heeled life in Silicon Valley.

â... You want to see these things,â... Mr. Schmidt stated. â... I received the nuclear missile tour. Things which are exhausting. I received a tour of [Cheyenne Mountain](#) so I might perceive what their actuality was.â...

One of the primary journeys was to Tampa to go to General Thomas, who is named Tony, the place Mr. Schmidt saw maps and reside video feeds displayed on huge screens. â... Ericâ... s observation was that a huge part of what the military does is it sits and watches,â... stated Josh Marcuse, the then executive director of the Defense Innovation Board who was on the journey.

The visits made tangible what Mr. Carter had told Mr. Schmidt about how the military was lagging in technology. Mr. Schmidt quickly made ideas to vary that.

Some of his concepts have been impractical. Eric Rosenbach, then the chief of workers to Mr. Carter, recalled Mr. Schmidt as soon as telling him that the Pentagon can be higher off if it employed nobody however engineers for a year.

Others have been helpful. At an Air Force facility in Qatar in 2016, Mr. Schmidt visited officers who scheduled flight paths for the tankers that refueled planes. They used a white board and dry-erase markers to set the schedule, taking eight hours to finish the duty.

Mr. Schmidt stated he recalled considering, â... Really? This is how you run the air war?â... Afterward, he and others on the Defense Department labored with the tech company Pivotal to ship software to the officers.

On one other journey to a navy base in South Korea in 2017, an intelligence analyst

complained to Mr. Schmidt that the software program he used to evaluate surveillance movies from North Korea was clunky.

â... Let me guess,â... Mr. Schmidt said, according to a Defense Department aide who traveled with him. â... You donâ... t have the flexibility to change that.â...

In December 2017, Mr. Schmidt stepped down as Googleâ... s chairman however remained on the board. He said he was seeking a brand new chapter.

â... If I stayed as chairman, then next year would have been the same as the previous year, and I wanted a change of emphasis,â... said Mr. Schmidt. â... As chairman of Google, what I did is I ran around and gave speeches, and went to Brussels and all the things that Google still does today. Itâ... s much better to work on these new things for me.â...

Google declined to comment on Mr. Schmidtâ... s departure as chairman.

By then, Mr. Schmidtâ... s ties to Google had induced issues in his protection work. In 2016, Roma Laster, a Defense Department worker, filed a complaint on the company elevating considerations about Mr. Schmidt and conflicts of curiosity, Mr. Marcuse stated.

In the complaint, [earlier reported by ProPublica](#), Ms. Laster, who labored with the Defense Innovation Board, said Mr. Schmidt had requested a service member what cloud computing providers their unit used and whether or not they had thought-about options. She stated Mr. Schmidt confronted a battle of interest as a result of he worked for Google, which additionally gives cloud services.

Mr. Marcuse, who now works at Google, said Mr. Schmidt was â... scrupulous and diligentâ... in avoiding conflicts. Mr. Schmidt said he adopted the principles forbidding conflicts of interest. Ms. Laster didnâ... t reply to requests for remark.

Mr. Schmidt quickly received caught up in one other situation between Google and the military. Google had signed a contract in 2017 to assist the Pentagon to construct methods to automatically analyze drone footage to identify particular objects like buildings, vehicles, and people.

Mr. Schmidt was a proponent of the hassle, known as Project Maven. He stated he inspired the Pentagon to pursue it and testified in Congress in regards to the undertakingâ... s deserves, however was not concerned within the companyâ... s selection of Google.

But the [effort blew up](#) in 2018 when [Google employees protested](#) and stated they didnâ... t need their work to result in deadly strikes. More than 3,000 staff signed a letter to Mr. Pichai, saying the contract would undermine the general publicâ... s belief within the firm.

It was a black eye for Mr. Schmidt. Military officers, who stated Project Maven was not getting used for deadly missions, condemned Google for abandoning the contract. Google staff additionally criticized Mr. Schmidtâ... s ties to the Pentagon.

â... He has very different goals and values than the engineers at his company,â... stated Jack Poulson, a Google worker who protested Mr. Schmidtâ... s military work and who has since left the company.

Mr. Schmidt said he sidestepped discussions about Project Maven as a result of of

conflict-of-interest guidelines, however wished he might have weighed in. â... I would have certainly had an opinion,â... he stated.

Last April, Mr. Schmidt [announced](#) he deliberate to go away Googleâ... s board. He had helped create an A.I. middle backed by the Pentagon in 2018 and had additionally turn into co-chair of the National Security Commission on Artificial Intelligence, a brand new group advising Congress on developing A.I. for defense.

A month after leaving Google, Mr. Schmidt invested in Rebellion Defense, a software program start-up based by former Defense Department staff that analyzes video gathered through drone. His enterprise agency later put more cash into the company, and Mr. Schmidt joined its board.

The funding led to extra bother. The Electronic Privacy Information Center, a nonprofit privateness and civil liberties group, sued the A.I. commission last September for failing to show over data. EPIC said the group was stacked with industry executives like Mr. Schmidt and others from Microsoft, Amazon and Oracle, who could potentially sway the government in favor of their companiesâ... interests.

Mr. Schmidt was underneath scrutiny as a result of of Rebellion Defense and the way he might push the government to make use of the start-upâ... s services, EPIC said.

â... We donâ... t have any public disclosure about what information Eric has provided to the commission about his business interests,â... said John Davisson, a legal professional at EPIC.

In December, a district court dominated the A.I. fee should disclose the data requested by EPIC. The fee has launched a whole lot of pages of paperwork, most of which donâ... t contain Mr. Schmidt or his companies. EPIC stated extra data are set to be launched.

Chris Lynch, the chief executive of Rebellion Defense, said Mr. Schmidt suggested the company solely on hiring and growth. Mr. Schmidt said he didnâ... t advocate for the Defense Department to purchase technology from the start-up.

He has continued plowing forward. In November, he unveiled a \$1 billion dedication by means of Schmidt Futures, the philanthropic agency that he runs along with his spouse, Wendy, to fund education for those who want to work in public service.

The person interviewed wishes to remain anonymous and for purposes of the interview will be called Jane Doe. This conversation took place onâ...!

Getting Google on board with the wage-theft pact was the key for Apple from the start â... [articles](#) in the tech press in 2005 pointed at Google's recruitment drive and incentives were the key reason why tech wages soared that year, at the highest rate in well over a decade.

Campbell helped bring in Google, Intel, and, in 2006, Campbell saw to it that Intuit â... the company he [chaired](#) â... also joined the pact.

From the peaks of Silicon Valley, Campbell's interpersonal skills were [magical](#) and awe-inspiring, a crucial factor in creating so much unimaginable wealth for their companies and themselves. Jobs [said](#) of Campbell:

There is something deeply human about him.

And Schmidt [swooned](#):

He is my closest confidant...because he is the definition of trust.

Things â... and people â... look very different when you're down in the Valley. In the nearly 100-page court opinion issued last October by Judge Koh granting class status to the lawsuit, Campbell comes off as anything but mystical and "deeply human." He comes off as a scheming consigliere carrying out some of the drearier tasks that the oligarchs he served were constitutionally not so capable of arranging without him.

But the realities of inequality and capitalism invariably lead to mysticism of this sort, a natural human response to the dreary realities of concentrating so much wealth and power in the hands of a dozen interlocking board members at the expense of 100,000 employees, and so many other negative knock-off effects on the politics and culture of the world they dominate.

One of the more telling elements to this lawsuit is the role played by "Star Wars" creator George Lucas, who emerges as the Obi-Wan Kenobi of the wage-theft scheme. It's almost too perfectly symbolic that Lucas â... the symbiosis of Baby Boomer New Age mysticism, Left Coast power, political infantilism, and dreary 19th century labor exploitation â... should be responsible for dreaming up the wage theft scheme back in the mid-1980s, when Lucas sold the computer animation division of Lucasfilm, Pixar, to Steve Jobs.

As Pixar went independent in 1986, Lucas explained his philosophy about how competition for computer engineers violated his sense of normalcy â... and profit margins. According to court documents:

George Lucas believed that companies should not compete against each other for employees, because '[i]t's not normal industrial competitive situation.' As George Lucas explained, 'I always â... the rule we had, or the rule that I put down for everybody,' was that 'we cannot get into a bidding war with other companies because we don't have the margins for that sort of thing.'

Translated, Lucas' wage-reduction agreement meant that Lucasfilm and Pixar agreed to a) never cold call each other's employees; b) notify each other if making an offer to an employee of the other company, even if that employee applied for the job on his or her own without being recruited; c) any offer made would be "final" so as to avoid a costly bidding war that would drive up not just the employee's salary, but also drive up the pay scale of every other employee in the firm.

Jobs held to this agreement, and used it as the basis two decades later to suppress employee costs just as fierce competition was driving up tech engineers' wages.

The companies argued that the non-recruitment agreements had nothing to do with driving down wages. But the court ruled that there was "extensive documentary evidence" that the pacts were designed specifically to push down wages, and that they succeeded in doing so. The evidence includes software tools used by the companies to keep tabs on pay scales to ensure that within job "families" or titles, pay remained equitable within a margin of variation, and that as competition and recruitment boiled over in 2005, emails between executives and human resources departments complained about the pressure on wages caused by recruiters cold calling their employees, and bidding wars for key engineers.

Google, like the others, used a "salary algorithm" to ensure salaries remained within a tight band across like jobs. Although tech companies like to claim that talent and hard work are rewarded, in private, Google's "People Ops" department kept overall compensation essentially equitable by making sure that lower-paid employees who performed well got higher salary increases than higher-paid employees who also performed well.

As Intel's director of Compensation and Benefits bluntly summed up the Silicon Valley culture's official cant versus its actual practices,

While we pay lip service to meritocracy, we really believe more in treating everyone the same within broad bands.

The companies in the pact shared their salary data with each other in order to coordinate and keep down wages â... something unimaginable had the firms not agreed to not compete for each other's employees. And they fired their own recruiters on just a phone call from a pact member CEO.

In 2007, when Jobs learned that Google tried recruiting one of Apple's employees, he forwarded the message to Eric Schmidt with a personal comment attached: "I would be very pleased if your recruiting department would stop doing this."

Within an hour, Google made a "public example" by "terminating" the recruiter in such a manner as to "(hopefully) prevent future occurrences."

Likewise, when Intel CEO Paul Otellini heard that Google was recruiting their tech staff, he sent a message to Eric Schmidt: "Eric, can you pls help here???"

The next day, Schmidt wrote back to Otellini: "If we find that a recruiter called into Intel, we will terminate the recruiter."

One of the reasons why non-recruitment works so well in artificially lowering workers' wages is that it deprives employees of information about the job market, particularly one as competitive and overheating as Silicon Valley's in the mid-2000s. As the companies' own internal documents and statements showed, they generally considered cold-calling recruitment of "passive" talent â€¦ workers not necessarily looking for a job until enticed by a recruiter â€¦ to be the most important means of hiring the best employees.

Just before joining the wage-theft pact with Apple, Google's human resources executives are quoted sounding the alarm that they needed to "dramatically increase the engineering hiring rate" and that would require "drain[ing] competitors to accomplish this rate of hiring." One CEO who noticed Google's hiring spree was eBay CEO Meg Whitman, who in early 2005 called Eric Schmidt to complain, "Google is the talk of the Valley because [you] are driving up salaries across the board." Around this time, eBay entered an illegal wage-theft non-solicitation scheme of its own with Bill Campbell's Intuit, which is still being tried in ongoing federal and California state suits.

Google placed the highest premium on "passive" talent that they cold-called because "passively sourced candidates offer[ed] the highest yield," according to court documents. The reason is like the old Groucho Marx joke about not wanting to belong to a club that would let you join it â€¦ workers actively seeking a new employer were assumed to have something wrong with them; workers who weren't looking were assumed to be the kind of good happy talented workers that company poachers would want on their team.

For all of the high-minded talk of post-industrial technotopia and Silicon Valley as worker's paradise, what we see here in stark ugly detail is how the same old world scams and rules are still operative.

One key tech voice responded: "When I was a young scientist working on the fledgling creation that came to be known as the internet, the ethos that defined the culture we were building was characterized by words such as ethical, open, trusted, free, shared. None of us knew where our research would lead, but these words and principles were our beacon.

We did not anticipate that the dark side of the internet would emerge with such ferocity. Or that we would feel an urgent need to fix it.

How did we get from there to here?

While studying for my doctorate at MIT in the early 1960s, I recognized the need to create a mathematical theory of networks that would allow disparate computers to communicate. Later that decade, the Advanced Research Projects Agency â€¦ a research funding arm of the Department of Defense created in response to Sputnik â€¦ determined they needed a network based on my theory so that their computer research centers could share work remotely.

My UCLA computer lab was selected to be the first node of this network. Fifty years ago â... on Oct. 29, 1969 â... a simple â... Loâ... became [the first internet message](#), from UCLA to Stanford Research Institute. We had typed the first two letters of â... loginâ... when the network crashed.

This quiet little moment of transmission over that two-computer communication network is regarded as the founding moment of the internet.

During [its first 25 years](#), the internet grew dramatically and organically with the user community seeming to follow the same positive principles the scientists did. We scientists sought neither patents nor private ownership of this networking technology. We were nerds in our element, busily answering the challenge to create new technology that would benefit the world.

Around 1994, the internet began to change quickly as dot-coms came online, the network channels escalated to gigabit speeds and the World Wide Web became a common household presence. That same year, Amazon was founded and Netscape, the first commercial web browser, was released.

And on April 12, 1994, a â... smallâ... moment with enormous meaning occurred: The transmission of the first widely circulated spam email message, a brazen advertisement. The collective response of our science community was â... How dare they?â... Our miraculous creation, a â... researchâ... network capable of boundless computing magnificence had been hijacked to sell â...! detergent?

By 1995, the internet had 50 million users worldwide. The commercial world had recognized something we had not foreseen: The internet could be used as a powerful shopping machine, a gossip chamber, an entertainment channel and a social club. The internet had suddenly become a money-making machine.

With the profit motive taking over the internet, the very nature of innovation changed. Averting risk dominated the direction of technical progress. We no longer pursued â... moonshots.â... Instead advancement came via baby steps â... â... design me a 5% faster Bluetooth connectionâ... as opposed to â... build me an internet.â... An online community that had once been convivial transformed into one of competition, antagonism and extremism.

And then as the millennium ended, our revolution took a more disturbing turn that we continue to grapple with today.

By suddenly providing the power for anyone to immediately reach millions of people inexpensively and anonymously, we had inadvertently also created the perfect formula for the â... darkâ... side to spread like a virus all over the world. Today more than 50% of email is spam, but far more troubling issues have emerged â... including denial of service attacks that can immobilize critical financial institutions and malicious botnets that can cripple essential infrastructure sectors.

Other dangerous players, such as nation-states, started coming onto the scene around 2010, when [Stuxnet malware](#) appeared. Organized crime recognized the internet could be used for international money laundering, and extremists found the internet to be a convenient megaphone for their radical views. Artificial intelligence, machine learning, facial recognition, biometrics and other advanced technologies could be used by governments to weaken democratic institutions.

The balkanization of the internet is now conceivable as firewalls spring up around national networks.

We could try to push the internet back toward its ethical roots. However, it would be a complex challenge requiring a joint effort by interested parties â... which means pretty much everyone.

We should pressure government officials and entities to more zealously monitor and adjudicate such internet

abuses as cyberattacks, data breaches and piracy. Governments also should provide a forum to bring interested parties together to problem-solve.

Citizen-users need to hold websites more accountable. When was the last time a website asked what privacy policy you would like applied to you? My guess is never. You should be able to clearly articulate your preferred privacy policy and reject websites that don't meet your standards. This means websites should provide a privacy policy customized to you, something they should be able to do since they already customize the ads you see. Websites should also be required to take responsibility for any violations and abuses of privacy that result from their services.

Scientists need to create more advanced methods of encryption to protect individual privacy by preventing perpetrators from using stolen databases. We are working on technologies that would hide the origin and destination of data moving around the network, thereby diminishing the value of captured network traffic. Blockchain, the technology that underpins bitcoin and other digital currencies, also offers the promise of irrefutable, indisputable data ledgers.

If we work together to make these changes happen, it might be possible to return to the internet I knew. "

Leonard Kleinrock is distinguished professor of computer science at the UCLA Samueli School of Engineering.

How the Internet lost its soul

Janet Abbate, The Washington Post

This week, we celebrate what many consider the 50th birthday of the Internet. The underpinnings of the World Wide Web originated in an American communications network built for national defense and the

pursuit of knowledge: ARPANET. Funded by the Defense Department's Advanced Research Projects Agency, the network was designed so that scientists could share computer hardware, software and data.

It worked. In the ensuing decades, the ARPANET, and after the 1980s, the National Science Foundation Network (NSFNET), did indeed allow scientists to collaboratively build knowledge around networked tools and information. But expanding access to the Internet, combined with looser government regulations, ultimately produced a situation no one foresaw or intended. On today's Internet, conspiracy theories run rampant, identities can be faked and our real-life elections are vulnerable to manipulation. A network designed for spreading truth became a profit-driven industry, a public sphere that threatens to undermine the public good.

The original ARPANET was designed for a relatively small community of people united by a technical challenge. At the time, computers from different manufacturers ran incompatible software, and long-distance data communications links were costly and unreliable. Networks connected only a few identical computers within a small region.

But ARPANET had an audacious proposal: It would span the continental United States to connect 15 research sites encompassing a diverse array of computers.

"Almost every conceivable item of computer hardware and software will be in the network," project leader Larry Roberts pointed out. "This is the greatest challenge of the system, as well as its greatest ultimate value." As a leading funder of computer science research, ARPA was able to mobilize a talented group of faculty and graduate students to design, build and debug the network, sending the first message on Oct. 29, 1969.

Like many academic environments, the ARPANET community was open and informal, and security was lax; in the early 1970s, students were rumored to have used the network to conduct transcontinental drug deals alongside their official research. But the relatively closed world of networked computing was opened up with the introduction of personal computers in the 1970s. The Defense Department soon found "unauthorized penetrations" of the ARPANET by hackers, complaining that "the availability of inexpensive computers and modems have made the network fair game for countless computer hobbyists."

By 1983, security concerns were so acute that Defense split off military users into their own network, ceding the rest of the ARPANET to academic researchers. In 1990, the ARPANET was absorbed into a new network built by the National Science Foundation that consisted of several regional networks connected by a high-speed backbone. As a nationwide civilian network, NSFNET rapidly increased the size and visibility of the Internet.

Politicians and businesses wanted to capitalize on the potential of a national network to connect citizens and consumers. In the early 1980s, the general public, though not yet allowed on the Internet, had begun using commercial dial-up services such as CompuServe and AOL to access servers offering chat rooms, games and email. In 1986, Congress, prompted by Sen. Al Gore, began debating whether the nation needed an "information superhighway" to connect K-12 schools and libraries for all citizens. Congress included funding for a National Research and Education Network (NREN) in its High-Performance Computing Act of 1991.

Had this plan come to fruition, the Internet would have remained under federal control until the late 1990s, potentially allowing time to upgrade security or create regulations to protect users. But before the NREN could get underway, the industry contractors providing the NSFNET infrastructure rushed ahead with plans to offer commercial network services, ultimately causing Congress to abandon the NREN.

The result was the de facto privatization of the Internet. The nonprofit organizations that had operated the NSFNET's backbone and regional networks reinvented themselves as the first commercial Internet service providers, serving both the NSF and private customers. The NSF now had the option to outsource its

networking needs to these commercial providers, which it did as it retired the old NSFNET in 1995. While this removed an administrative burden from the NSF, the hasty transition left little time to consider the policy implications. So a commercialized network developed without public oversight of the Internet's operation.

Privatization opened the floodgates for new services: social media, gaming, e-commerce, and millions of personal websites and blogs. Industry advocates insisted that the Internet should not be regulated, lest innovation be stifled. Regulatory models that had been developed for common carriers, publishers and broadcasters did not fit a new medium that combined aspects of all these media and whose services and business models were in constant flux. Online businesses were free to experiment with ways to make money, eventually landing on the advertising-based business model that led to escalating surveillance and collection of user data to better target ads.

None of this has prevented scientists - the Internet's original users - from continuing to build reliable knowledge based on networked data and computational tools. The scientific community has time-tested processes to validate and protect the information it shares. But the general public is in a more precarious position. Anyone can be a publisher online, and the obvious clues to legitimacy that came with print and broadcast media - the investment in reporting and fact-checking, obligations to paying customers, an identifiable organization that could be held liable for false content - can be absent or faked online. The same type of user profiling that stimulates business also enables bad actors to target inflammatory social issues and widen political divides. We have inadvertently created a culture where misinformation can be spread without accountability.

Long-term trends of increasingly open access and diminishing government oversight have fueled the Internet's growth and unleashed the creativity of millions. They have also left a vacuum where the public interest should be. Can we work together to build a better Internet for the next 50 years?"

The NY Times reported: "[Ms. Feinstein and her husband sold \\$1.5 million to \\$6 million worth of stock in Allogene Therapeutics, a California-based biotech company, in transactions that took place on Jan. 31 and Feb. 18.](#)" She did claim that she has "no involvement in her husband's financial decisions" to avoid criticism. Do you really think that she has no idea about multi-million dollar deals that her husband is involved in?

- A Plan To Increase Public Integrity At The Department of Energy And The U.S. Congress

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts in Congress.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Obama Administration staff and Department of Energy officials in illicit coordination with U.S. Senators. In other words, we experienced all of the damages from each of the abuse-of-power issues listed below. These are the actions needed to resolve those issues:

- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off
- Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years

- Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
- Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
- Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists)
- Limit the ability of companies to buy influence through former government officials
- Require income disclosures from former senior officials 4 years after federal employment.
- Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company
- Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
- Limit the ability of companies to buy influence through current government employees
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years
- Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years
- Ban Golden Parachutes that provide corporate bonuses to executives for federal service.
- Publicly expose all influence-peddling in Washington.
- Strengthen and expand the federal definition of a lobbyist to include all individuals paid to influence government.
- Create a new corporate lobbyist definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
- Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials

- End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals
- Combat foreign influence in Washington by banning all foreign lobbying.
- End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- Ban direct political donations from lobbyists to candidates or Members of Congress.
- End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- End lobbyist gifts to the executive and legislative branch officials they lobby
- Strengthen Congressional independence from lobbyists and end Washington's dependence on lobbyists for "expertise" and information.
- Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees
- Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
- Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies
- De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process
- Require agencies to justify withdrawn public interest rules via public, written explanations.
- Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
- Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by

ending the practice of inviting industry to negotiate rules they have to follow.

- Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White House... s Office of Information and Regulatory Affairs
- Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges, can temporarily block agencies from implementing final rules.
- Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
- Empower the public to police agencies for corporate capture.
- Increase the ability of the public to make sure their interests are considered when agencies act
- Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government
- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules
- Inoculate government agencies against corporate capture such as Google undertook against the White House
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process
- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress's prior disapproval of a different, narrow rule on a similar topic
- Improve judicial integrity and defend access to justice for all Americans.
- Strengthen Judicial Ethics Requirements.
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations

- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges
- Boost the transparency of Federal Courts
- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges'... financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.
- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.

- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.
- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office
- Disclose the Cash behind Washington Advocacy and Lobbying.
- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure
- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited

the document.

- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA)
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.
- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending
- Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

Do these seem like common-sense rules that should have already been in place? ***They are!***

These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you!

HOW TO GET THE FBI, CONGRESS & 250 MILLION

VOTERS TO HELP YOU EXTERMINATE CORRUPT TECH OLIGARCHS

By Martin Lens

Want to wipe Google, Gawker, The President of Brazil, Enron, Solyndra or other characters, that have abused the public, off the map using 100% legal tactics?

You can get most of the U.S. Congress, elite federal agents, and all of your neighbours to help you do it. Some of them will even pay YOU to do these kinds of good deeds.

Here's how:

HOW TO REPORT CORRUPTION

When you report a political corruption crime, know that each government staffer you talk to has their own agenda.

At least one, or more, of the public officials you report the matter to will try to stonewall or harm your efforts in order to protect their crony associates. To avoid cover-ups, never report a crime incident to only one source, always cc: as many related entities as possible. If a person listed is no longer with that organization, go to the press contact at that organizations website and request a new contact.

You have a large number of people who will support you. The only people who try to shut-down whistle-blowers are those who are engaged in crimes. In a typical report, there are usually many third party BCC or CC's like this:

Marcel Reid, Pacifica Whistleblower Liaison

Michael McCray, ACORN 8

Zena Crenshaw-Logal, Executive Director, National Judicial Conduct & Disability Law Project

Tom Devine, Legal Director, Government Accountability Project (GAP)

Lawrence Lucas, President, USDA Coalition of Minority Employees

Tanya Ward Jordan, Founder, Coalition for Change (C4C)

Jason Zuckerman, Partner Zuckerman Law Firm; Former Senior Counsel, for the U.S. Office of Special Counsel

Dan Meyer, Executive Director of Intelligence Community Whistleblowing and Source Protection; Office of the Intelligence Community Inspector General.

Gloria Minott, Public Affairs Director WPFW

William Bergman, 9/11 Whistleblower, Truth in Accounting

Zena Crenshaw-Logal, Executive Director, National Judicial Conduct & Disability Law Project

Danielle Brian, Executive Director, Project on Government Oversight (POGO)

Michael McCray, FEW/LEW

Tanya Ward Jordan, Founder, Coalition for Change (C4C)

Andrew Kreig, Executive Director, Justice Integrity Project

David Grogen, U.S. Marshal Service, Justice Department

Arthuretta Holms Martin, Coalition for Change

Paulette Taylor, Civil Rights Chair, Coalition for Change

Arlene Englehardt, Former Pacifica Executive Director

Glenn Greenwald, Journalist

Marcel Reid, Pacifica Whistleblower Liaison

Sharyl Attkisson - Former CBS Investigative Reporter

Andy Lee Roth, Director, Project Censored

Micky Huff, Director, Project Censored

Kristina Borjesson, Freelance Journalist (ABC, CBS, NBC)

Matt Tabbii, Investigative Reporter

Cathy Ball, Legislative Representative, National Treasury Employees Union

Shahid Buttar, Executive Director, Bill of Rights Defense Committee

Keith Wrightson, Worker Safety and Health Advocate, Public Citizen

Marcel Reid, ACORN 8

Zena Crenshaw-Logal, Exploring the Vitality of Stare Decisis in America

Editors- ProPublica Journal

Michael McCray, General Counsel, FEW/LEF

Krista Boyd, Counsel, House Oversight and Government Reform Committee

Charity Wilson, Legislative Representative, American Federation of Government Employees

Robert MacLean, U.S. Air Marshal Whistleblower

Tristan Leavitt, Investigative Counsel, Senate Judiciary Committee

Larry Criscione, NRC Whistleblower

Amanda Hitt, Director, Food Integrity Campaign

Pete Sepp, Executive Vice President, National Taxpayers Union

Zena Crenshaw-Logal, Executive Director, National Judicial Conduct & Disability Law Project

Tony Norman, Vice Chair, Pacifica Foundation

Stephen Kohn, National Whistleblower Center

Zena Crenshaw-Logal, National Judicial Conduct and Disability Law Project

Andy Shallal, Mayoral Candidate (Community Activism)

Joseph Nacchio- CEO Quest Media Former (Corporate Responsibility)

Brad Birkenfeld - UBS Whistleblower (Frank Wills Award)

Jason Zuckerman, Partner Zuckerman Law Firm; Former Senior Counsel, for the U.S. Office of Special Counsel.

Jordan Thomas, Chairman of Whistleblower Practice, Labaton Sucharow

Eric Ben-Artzi, Deutsche Bank financial whistleblower

Lisa Donner, Executive Director, Americans for Financial Reform

Robert MacLean, landmark whistleblowing case on the WPEA

Shirine Moazed, Chief, Investigation and Prosecution Division, U.S. Office of Special Counsel (OSC)

Mick Anderson, OSC Public Servant Award Winner

Senator Elizabeth Warren (D-MA)

Senator John Boozman (R-AR)

The Honorable Blake Farenthold (R-TX)

The Honorable Jackie Speier (D-CA)

Special Counsel Carolyn Lerner (OSC)

Patricia St. Clair, Assistant Director; Training and Outreach Division, EEOC, Office of Federal Sector

Dr. David Tharp, Veterans Administration Whistleblower

Daniel Brennan, Project on Government Oversight

Lydia Dennett, Investigator on behalf of Danielle Brian, Executive Director, Project on Government Oversight (POGO)

Paulette Taylor, Civil Rights Chair, Coalition for Change

David Grogan, U.S. Marshal Service, Justice Department

Zena Crenshaw-Logal, Executive Director, National Judicial Conduct & Disability Law Project

YOUR INTERNET SAFETY: HOW TO SURVIVE AND KEEP YOUR FAMILY, FRIENDS AND YOURSELF SAFE ON THE WEB

You probably can't imagine the second-by-second dangers and harms that modern electronics, like your phone and tablet, are causing to your life, your income, your privacy, your beliefs, your human rights, your bank account records, your political data, your job, your brand name, your medical data, your dating life, your reputation and other crucial parts of your life.

Any use of a dating site, social media site, movie site, or anything that you log in to, puts you at substantial risk. Remember: "***if it has a plug, it has a bug***". Every electronic device can be easily made to spy on you in ways you cannot possibly imagine.

There have been over 15,000 different types of hacks used against over 3 billion "average" consumers. EVERY one of them thought they were safes and that nobody would hack them because "nobody cared about them". History has proven every single one of them to have been totally wrong!

If you are smart, and you read the news, you will know that you should ditch all of your electronic devices and "data-poison" any information about you that touches a network by only putting fake info in all conceivable forms and entries on the internet. You, though, may be smart but lazy, like many, and not willing to step outside of the bubble of complacency that corporate advertising has surrounded you with.

Did you know that almost every dating and erotic site sends your most private life experiences and chat messages to Google's and Facebook's investors?

<https://www.businessinsider.com/facebook-google-quietly-tracking-porn-you-watch-2019-7>

Do you really want all of those Silicon Valley oligarchs that have been charged with sexual abuse and sex trafficking to know that much about you?

Never, Ever, put your real information on Youtube, Netflix, Linkedin, Google, Twitter, Comcast, Amazon and any similar online service because it absolutely, positively will come back and harm you!

Always remember: Anybody that does not like you can open, read and take any photo, data, email or text on EVERY phone, computer, network or electronic device you have ever used no matter how "safe" you think your personal or work system is! They can do this in less than a minute. Also: Hundreds of thousands of hackers scan every device, around the clock, even if they never heard of you, and will like your stuff just for the fun of causing trouble. Never use an electronic device unless you encrypt, hide and code your material! One of the most important safety measures you can take is to review the security info at:

<https://www.privacytools.io/>

Those people who think: "I have nothing to worry about..I am not important" ARE the people who get hacked the most. Don't let naivete be your downfall. (

<https://www.eff.org/deeplinks/2019/07/when-will-we-get-full-truth-about-how-and-why-government-using-facial-recognition>
)

All of your info on Target, Safeway, Walgreens has been hacked and read by many outsiders. NASA, The CIA, The NSA, The White House and all of the federal background check files have been hacked. The

Department of Energy has been hacked hundreds of times. All of the dating sites have been hacked and their staff read all of your messages. Quest labs blood test data and sexual information reports have been hacked and published to the world. There is no database that can't be easily hacked. Every computer system with Intel, AMD, Juniper Networks, Cisco and other hardware in it can be hacked in seconds with the hardware back-doors soldered onto their electronic boards. All of the credit reporting bureaus have been hacked. Wells Fargo bank is constantly hacked. YOU ARE NOT SAFE if you put information on a network. NO NETWORK is safe! No Silicon Valley company can, or will, protect your data; mostly because they make money FROM your data!

Every single modern cell phone and digital device can be EASILY taken over by any hacker and made to spy on you, your family, your business and your friends in thousands of different ways. Taking over the microphone is only a small part of the ways a phone can be made to spy on you. Your phone can record your location, you voice vibrations, your mood, your thoughts, your sexual activity, your finances, your photos, your contacts (who it then goes off and infects) and a huge number of other things that you don't want recorded.

The worst abusers of your privacy, personal information, politics and psychological information intentions are: Google, Facebook, LinkedIn, Amazon, Netflix, Comcast, AT&T, Xfinity, Match.com & the other IAC dating sites, Instagram, Uber, Wells Fargo, Twitter, Paypal, Hulu, Walmart, Target, YouTube, PG&E, The DNC, Media Matters, Axiom, and their subsidiaries. Never, ever, put accurate information about yourself on their online form. Never, ever, sign in to their sites using your real name, phone, address or anything that could be tracked back to you.

If you don't believe that every government hacks citizens in order to destroy the reputation of anyone who makes a public statement against the current party in power then read the public document at: <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf> That document shows you, according to the U.S. Congress, how far things can go.

A program called ACXIX hunts down all of your records from your corner pharmacy, your taxi rides, your concert tickets, your grocery purchases, what time you use energy at your home, your doctor records...and all kinds of little bits of info about you and puts that a file about you. That file about you keeps growing for the rest of your life. That file sucks in other files from other data harvesting sites like Facebook and Google: FOREVER. The information in that file is used to try to control your politics and ideology.

In recent science studies cell phones were proven to exceed radiation safety limits by as high as 11 times the 2-decade old allowable U.S. radiation limits when phones touch the body. This is one of thousands of great reasons to always remove the battery from your cell phone when you are not talking on it. A phone without a battery in it can't spy on you and send your data to your enemies.

If you are reading this notice, the following data applies to you:

1. EVERY network is known to contain Intel, Cisco, Juniper Networks, AMD, Qualcomm and other hardware which has been proven to contain back-door hard-coded access to outside parties. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.
2. Chinese, Russian FSB, Iranian and other state-sponsored hacking services as well as 14 year old domestic boys are able to easily enter your networks, emails and digital files because of this. They can enter your network at any time, with less than 4 mouse clicks, using software available to anyone. This is a proven, inarguable fact based on court records, FISA data, IT evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

3. Your financial office is aware of these facts and has chosen not to replace all of the at-risk equipment, nor sue the manufacturers who sold your organization this at risk equipment. They believe that the hassle and cost of replacement and litigation is more effort than the finance department is willing to undertake. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

4. In addition to the existing tools that were on the internet, in recent years, foreign hackers have released all of the key hacking software that the CIA, DIA and NSA built to hack into any device. These software tools have already been used hundreds of times. Now the entire world has access to these tools which are freely and openly posted across the web. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

5. The computers, servers, routers, cell phones, IP cameras, IP microphones, Smart Meters, Tesla's, Smart Devices, etc. and other devices openly broadcast their IP data and availability on the internet. In other words, many of your device broadcast a "HERE I AM" signal that can be pinged, scanned, spidered, swept or, otherwise, seen, like a signal-in-the-dark from anywhere on Earth and from satellites overhead. Your devices announce that they are available to be hacked, to hackers. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

6. It is bad policy for your organization, or any organization, to think they are immune or have IT departments that can stop these hacks. NASA, The CIA, The White House, EQUIFAX, The Department of Energy, Target, Walmart, American Express, etc. have been hacked hundreds of times. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

7. The thinking: "Well, nobody would want to hack us", or "We are not important enough to get hacked" is the most erroneous and negligent thinking one could have in the world today. Chinese, Russian and Iranian spy agencies have a global "Facebook for blackmail" and have been sucking up the data of every entity on Earth for over a decade. If the network was open, they have the data and are always looking for more. The same applies to Google and Facebook who have based their entire business around domestic spying and data re-sale. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

8. You are a "Stepping Stone" doorway to other networks and data for targeted individuals and other entities. Your networks provide routes into other people's networks. The largest political industry today is called "Doxing" and "Character Assassination". Billions of dollars are expended by companies such as IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal - (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of others to harm others that they perceive as political, personal or competitive threats. Do not under-estimate your unintended role in helping to harm others. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and

inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

9. NEVER believe that you are too small to be noticed by hackers. Parties who believe that are the hackers favorite targets. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

10. NEVER believe that because the word â... DELLâ... or â... IBMâ... or â... CISCOâ... is imprinted on the plastic cover of some equipment that you are safe. Big brands are targeted by every spy agency on Earth and are the MOST compromised types of equipment. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

11. YOU may not personally care about getting exposed but the person, or agency, you allow to get exposed will be affected for the rest of their lives and they will care very much and could sue you for destroying them via negligence. Be considerate of others in your â... internet behaviorâ... . Do not put anything that could hurt another on any network, ever. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

12. Never post your real photograph online, or on a dating site social media or on any network. There are thousands of groups who scan every photo on the web and cross check those photos in their massive databases to reveal your personal information via every other location your photo is posted. These "image harvesters" can find out where you, who your friends and enemies are and where your kids are in minutes using comparative image data that they have automated and operating around the clock. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

13. If you think using web security measures like this makes you "paranoid", then think again. Cautious and intelligent people use these security measures because these dangers are proven in the news headlines daily. Uninformed, naive and low IQ people are the types of people who do not use good web hygiene and who suffer because they are not cautious and are not willing to consider the consequences of their failure to read the news and stay informed.

â... Gothamâ... software written by Palantir shows how government agencies, or anybody, can use very little information to obtain quick access to anyoneâ... s personal minutiae.

VICE NEWS *Motherboard* via public records request has [revealed](#) shocking details of capabilities of California law enforcement involved in Fusion Centers, once deemed to be a conspiracy theory like the National Security Agency (NSA) which was founded in 1952, and its existence hidden until the mid-1960s. Even more secretive is the National Reconnaissance Office (NRO), which was founded in 1960 but remained completely secret for 30 years.

Some of the documents instructing California law enforcement (Northern California Regional Intelligence Center) â... Fusion Centerâ... are now online, and they show just how much information the government can quickly access with little or no knowledge of a person of interest.

â... The guide doesnâ... t just show how Gotham works. It also shows how police are instructed to use the software,â... writes [Caroline Haskins](#).

â... This guide seems to be specifically made by Palantir for the California law enforcement

because it includes examples specific to California.â€¦

According to DHS, â€¦ Fusion centers operate as state and major urban area focal points for the receipt, analysis, gathering, and sharing of threat-related information between federal; state, local, tribal, territorial (SLTT); and private sector partnersâ€¦ like Palantir. Further, Fusion Centers are locally owned and operated, arms of the â€¦ [intelligence community](#),â€¦ i.e. the 17 intelligence agencies coordinated by the [National Counterterrorism Center \(NCTC\)](#). However, sometimes the buildings are staffed by trained NSA personnel like what [happened](#) in Mexico City, according to a 2010 [Defense Department \(DOD\) memorandum](#).

Palantir is a private intelligence data management company mapping relationships between individuals and organizations alike founded by Peter Thiel and CEO Alex Karp and accused rapist Joe Lonsdale. You may remember Palantir from journalist Barrett Brown, Anonymousâ€¦ hack of HBGary, or [accusations](#) that the company provided the technology that enables NSAâ€¦ s mass surveillance PRISM. Founded with early investment from the CIA and heavily used by the military, Palantir is a subcontracting company in its own right. The company has even been featured in the Senateâ€¦ s grilling of Facebook, when Washington State Senator Maria Cantwell [asked](#) CEO Mark Zuckerberg, â€¦ Do you know who Palantir is?â€¦ due to Peter Thiel sitting on Facebookâ€¦ s board.

In 2011, Anonymousâ€¦ breach [exposed](#) HBGaryâ€¦ s plan, conceived along with data intelligence firm Palantir, and Berico Technologies, to retaliate against WikiLeaks with cyber attacks and threaten the journalism institutions supporters. Following the hack and exposure of the joint plot, Palantir [attempted](#) to distance itself from HBGary, which it blamed for the plot.

Bank of America/Palintir/HBGary combined WikiLeaks attack plan. You can find more here: <https://t.co/85yECxFmZu> pic.twitter.com/huNtfJp8gl

â€¦ WikiLeaks (@wikileaks) [November 29, 2016](#)

This was in part because Palantir had in 2011 [scored \\$250 million in deals](#) ; its customers included the CIA, FBI, US Special Operations Command, Army, Marines, Air Force, LAPD and even the NYPD. So the shady contractor had its reputation to lose at the time being involved in arguably criminal activity against WikiLeaks and its supporters.

Palantir describes itself as follows based on its [website](#):

Palantir Law Enforcement supports existing case management systems, evidence management systems, arrest records, warrant data, subpoenaed data, RMS or other crime-reporting data, Computer Aided Dispatch (CAD) data, federal repositories, gang intelligence, suspicious activity reports, Automated License Plate Reader (ALPR) data, and unstructured data such as document repositories and emails.

Palantirâ€¦ s software, [Bloombergreports](#),

combs through disparate data sourcesâ€¦ financial documents, airline reservations, cellphone records, social media postingsâ€¦ and searches for connections that human analysts might miss. It then presents the linkages in colorful, easy-to-interpret graphics that look like spider webs.

Motherboard shows how Fusion Center police can now utilize similar technology to track citizens beyond social media and online web accounts with people record searches, vehicle record searches, a Histogram tool, a Map tool, and an Object Explorer tool. (For more information on each and the applicable uses see the *Vice*

News article [here](#).)

Police can then click on an individual in the chart within Gotham and see every personal detail about a target and those around them, from email addresses to bank account information, license information, social media profiles, etc., according to the documents.

Palantirâ... s software in many ways is similar to the Prosecutorâ... s Management Information System (PROMIS) stolen software Main Core and may be the next evolution in that code, which allegedly [predated](#) PRISM. In 2008, Salon.com [published](#) details about a top-secret government database that might have been at the heart of the Bush administrationâ... s domestic spying operations. The database known as â... Main Coreâ... reportedly collected and stored vast amounts of personal and financial data about millions of Americans in event of an emergency like Martial Law.

The only difference is, again, this technology is being allowed to be deployed by Fusion Center designated police and not just the National Security Agency. Therefore, this expands the power that Fusion Center police â... consisting of local law enforcement, other local government employees, as well as Department of Homeland Security personnel â... have over individual American citizens.

This is a huge leap from allowing NSA agents to access PRISM database search software or being paid by the government to [mine social media for â... terrorists.â...](#)

Fusion Centers have become a long-standing target of civil liberties groups like the [EFF](#), [ACLU](#), and others because they collect and aggregate data from so many different public and private sources.

On a deeper level, when you combine the capabilities of Palantirâ... s Gotham software, the [abuse](#) of the Department of Motor Vehicles (DMV) database for Federal Bureau of Investigations/Immigration and Customs Enforcement, and facial recognition technology, you have the formula for a nightmarish surveillance state. Ironically, or perhaps not, that nightmare is the reality of undocumented immigrants as Palantir is one of several companies helping sift through data for the raids planned by ICE, [according](#) to journalist Barrett Brown.

YOU HAVE BEEN WARNED:

According to the world's top internet security experts: "...Welcome to the new digital world. Nobody can ever type anything on the internet without getting scanned, hacked, privacy abused, data harvested for some political campaign, spied on by the NSA and Russian hackers and sold to marketing companies. You can't find a corporate or email server that has not already been hacked. For \$5000.00, on the Dark Web, you can now buy a copy of any person's entire dating files from match.com, their social security records and their federal back-ground checks. These holes can never be patched because they exist right in the hardware of 90% of the internet hardware on Earth. Any hacker only needs to find one hole in a network in order to steal everything in your medical records, your Macy's account, your credit records and your dating data. Be aware, these days, Mr. & Ms. Consumer. Facebook, Google, Twitter and Amazon have turned out to be not-what-they-seem. They manipulate you and your personal information in quite illicit manners and for corrupt purposes. Avoid communicating with anybody on the internet because you will never know who you are really talking to. Only communication with people live and in-person..."

THE PROMIS BACKDOOR

Beyond embedded journalists, news blackouts, false flag events, blacklisted and disappeared Internet domains the plotline of America's "free press" there are now ISP-filtering programs subject to Homeland Security guidelines that sift through emails and toss some into a black hole. Insiders and the NSA-approved, however, can get around such protections of networks by means of the various hybrids of the PROM IS backdoor. The 1980s theA of the Prosecutor's Management Information System (PROMIS) software handed over the golden key that would grant most of the world to a handful of criminals. In fact, this one crime may have been the final deal with the devil that consigned the United States to its present shameful descent into moral turpitude. PROMIS began as a COBOL-based program designed to track multiple offenders through multiple databases like those of the DOJ, CIA, U.S. Attorney, IRS, etc. Its creator was a former NSA analyst named William Hamilton. About the time that the October Surprise Iranian hostage drama was stealing the election for former California governor Ronald Reagan and former CIA director George H.W. Bush in 1980, Hamilton was moving his Inslaw Inc. from non-profit to for-profit status.

His intention was to keep the upgraded version of PROM IS that Inslaw had paid for and earmark a public domain version funded by a Law Enforcement Assistance Administration (LEAA) grant for the government. With 570,000 lines of code, PROMIS was able to integrate innumerable databases without any reprogramming and thus turn mere data into information.

With Reagan in the White House, his California cronies at the DOJ offered Inslaw a \$9.6 million contract to install public-domain PROMIS in prosecutors' offices, though it was really the enhanced PROM IS that the good-old-boy network had set its sights on. In February 1983, the chief of Israeli antiterrorism intelligence was sent to Inslaw under an alias to see for himself the DEC VAX enhanced version. He recognized immediately that this software would revolutionize Israeli intelligence and crush the Palestine Intifada. Enhanced PROMIS could extrapolate nuclear submarine routes and destinations, track assets, trustees, and judges. Not only that, but the conspirators had a CIA genius named Michael Riconosciuto who could enhance the enhanced version one step further, once it was in their possession. To install public domain PROMIS in ninety-four U.S. Attorney offices as per contract, Inslaw had to utilize its enhanced PROMIS. The DOJ made its move, demanding temporary possession of enhanced PROMIS as collateral to ensure that all installations were completed and that only Inslaw money had gone into the enhancements. Na'ively, Hamilton agreed. The rest is history: the DOJ delayed payments on the \$9.6 million and drove Inslaw into bankruptcy. With Edwin Meese III as Attorney General, the bankruptcy system was little more than a political patronage system, anyway. The enhanced PROMIS was then passed to the brilliant multivalent computer and chemical genius Riconosciuto, son of CIA Agent Marshall Riconosciuto.⁵ Recruited at sixteen, Michael had studied with Nobel Prize-winning physicist and co-inventor of the laser Arthur Schawlow. Michael was moved from Indio to Silver Springs to Miami as he worked to insert a chip that would broadcast the contents of whatever database was present to collection satellites and monitoring vans like the Google Street View van, using a digital spread spectrum to make the signal look like computer noise. This Trojan horse would grant key-club access to the backdoor of any person or institution that purchased PROM IS software as long as the backdoor could be kept secret. Meanwhile, the drama between Hamilton and the conspirators at DOJ continued. A quiet offer to buy out Inslaw was proffered by the investment banking firm Allen & Co., British publisher (Daily

Mirror) Robert Maxwell, the Arkansas corporation Systematics, and Arkansas lawyer (and Clinton family friend) Webb Hubbell. Hamilton refused and filed a \$50 million lawsuit in bankruptcy court against the DOJ on June 9, 1986. Bankruptcy Judge George F. Bason, Jr. ruled that the DOJ had indeed stolen PROMIS through trickery, fraud, and deceit, and awarded Inslaw \$6.8 million. He was unable to bring perjury charges against government officials but recommended to the House Judiciary Committee that it conduct a full investigation of the DOJ. The DOJ's appeal failed, but the Washington, D.C. Circuit Court of Appeals reversed everything on a technicality. Under then-President George H.W. Bush (1989 â... 1993), Inslaw's petition to the Supreme Court in October 1991 was scorned. When the IRS lawyer requested that Inslaw be liquidated in such a way that the U.S. Trustee program (AG Meese's feeding trough between the DOJ and IRS) could name the trustee who would convert the assets, oversee the auction, and retain the appraisers, Judge Bason refused.

Under then-President William Jefferson Clinton (1993 â... 2001), the Court of Federal Claims whitewashed the DOJ's destruction of Inslaw and theA of PROMIS on July 31, 1997. Judge Christine Miller sent a 186-page advisory opinion to Congress claiming that Inslaw's complaint had no merit a somber message to software developers seeking to do business with Attorney Generals and their DOJ. For his integrity, Judge Bason lost his bench seat to the IRS lawyer. Throughout three administrations, the mainstream Mockingbird media obediently covered up the Inslaw affair, enhanced PROMIS being a master tool of inference extraction able to track and eavesdrop like nothing else. Once enhanced PROMIS was being sold domestically and abroad so as to steal data from individuals, government agencies, banks, and corporations everywhere, intelligence-connected Barry Kumnick~ turned PROMIS into an artificial intelligence (AI) tool called SMART (Special Management Artificial Reasoning Tool) that revolutionized surveillance. The DOJ promised Kumnick \$25 million, then forced him into bankruptcy as it had Hamilton. (Unlike Hamilton, Kumnick settled for a high security clearance and work at military contractors Systematics and Northrop.) Five Eyes / Echelon and the FBI's Carnivore / Data Collection System 1000 were promptly armed with SMART, as was closed circuit satellite highdefinition (HD) television. With SMART, Five Eyes / Echelon intercepts for UKUSA agencies became breathtaking.

The next modification to Hamilton's PROMIS was Brainstorm, a behavioral recognition software, followed by the facial recognition soAware Flexible Research System (FRS); then Semantic Web, which looks not just for link words and embedded code but for what it means that this particular person is following this particular thread. Then came quantum modification. The Department of Defense paid Simulex, Inc. to develop Sentient World Simulation (SWS), a synthetic mirror of the real world with automated continuous calibration with respect to current real-world information. The SEAS (Synthetic Environment for Analysis and Simulations) soAware platform drives SWS to devour as many as five million nodes of breaking news census data, shiAing economic indicators, real world weather patterns, and social media data, then feeds it proprietary military intelligence and fictitious events to gauge their destabilizing impact. Research into how to maintain public cognitive dissonance and learned helplessness (psychologist Martin Seligman) help SEAS deduce human behavior.

YOUR CONSTITUTIONAL RIGHTS!

There are legitimate reasons (<http://www.learnliberty.org/videos/edward-snowden-surveillance-is-about-power/>)to want to avoid being tracked and spied-on while you're online. But aside from that, doesn't it feel creepy knowing you're probably being watched every moment that you're online and that information about where you go and what you do could potentially be sold to anyone at any time--to advertisers, your health insurance company, a future employer, the government, even a snoop neighbor? Wouldn't you feel better not having to worry about that on top of everything else you have to worry about every day?

First, let me start out by giving you the bad news, there is no such thing as perfect online privacy. We'll assume for the purposes of this article that online privacy and anonymity mean roughly the same thing. No matter what anyone tells you, online privacy (and anonymity) just doesn't exist. The fight for online privacy is like warfare. Every time one side gets an advantage, the other side figures out how to get around it. That means your level of online privacy is dependent on how much effort you are willing to continually put into making yourself invisible. Let's face it, if the NSA wants to spy on you and is willing to put more time and money into singling you out than you are willing to spend being anonymous, then you will be spied on.

The good news is that there are things you can do to be less surveillable--and they won't cost you anything. Remember the old story about the two friends in the woods who came across a bear. One says to the other, "We'll never outrun this bear." The other smiles and says, "That's OK. I only have to outrun you." That isn't exactly a perfect analogy, because any trace that you leave behind on the internet could be used against you at some later date. But it's still better to leave less behind than the next guy. Make it too expensive for "Them" to surveil everyone to the level that they would need to get much on you--at least for the time being.

The most anyone can possibly do to avoid online surveillance is to use a different computer every time he goes on line--one that has never been on the internet before and cannot be traced to him. Then, after a single use, he will dispose of it where it can never be found by anyone. Further, he will wear gloves, a ski mask, and dark glasses and go to some public wifi hot spot with hundreds of people using it in a town far away from where he lives (a different town each time). Then he will avoid sites he has frequented in the past and never log on to any site with a password. And he will leave no finger prints or DNS evidence behind... So, obviously, no one is going to actually do this--unless he is in some really, really deep trouble. But, barring that, no sane person is going to put out this level of effort to be anonymous every time he goes on the internet.

So, what level of effort is reasonable? Well, it depends on what you are trying to accomplish. But let's assume you are not doing anything illegal. You just want to access your email and surf the internet, maybe buy something on Amazon. In other words, you are the average consumer. Well, there's some more bad news. Given a reasonable level of effort, you can't be anonymous on any website where you enter a password. Once you type your password, you have identified yourself. That's the point of a password. So, some level of anonymity can only be achieved when you don't enter a password during the period of time that you're logged on to the internet. I know that's probably not what you were hoping to hear. But unless you are someone like Edward Snowden fleeing from the NSA, or on the FBI's ten-most-wanted list, you'll probably not be willing to expend the amount of effort I spelled out above to get the level of online privacy that it would take to keep yourself really, really anonymous.

Assessing Threats

Given that you are willing to make an effort to achieve a reasonable level of anonymity, how do you go about it? The first thing you need to do is to understand who "They" are and how they are watching you. The first group that is watching you is the companies who are hoping to make a buck off of you or off of information about what you are doing on line. These are companies like your internet service provider, Google, Google Analytics, Microsoft, Facebook, WordPress, Squarespace, their competitors, and every website that uses web development software written by these companies or their competitors. The problem is that their software is used on just about every website these days. So, chances are extremely good that if you visit a website that sponsors advertisements, tracks the number of hits it receives, or allows you to make comments or fill out any kind of a form, you are being identified and tracked online. (By the way, this website, *The Cheapskate's Guide to Computers and the Internet*, only uses open-source software and does not attempt to identify or track you in any way.) If you are using an internet browser or operating system written by Google, like Chrome or Android, you are also being identified and tracked. If you are using Windows 10, you are being identified and tracked online. That covers just about everyone who accesses the internet.

The next group that is watching you works for a government. These are the NSA and possibly the CIA and FBI and other US government agencies (there are 17 government intelligence agencies in the US) and their foreign equivalents. For the time being, all the US government agencies want is to make sure that you are not a criminal or a terrorist--and to make sure they know where you are at all times, in case you ever decide to commit a crime or become a terrorist. In the future, who knows? Governments of some countries make it a crime to speak out against them, so you can probably figure out why they may want to watch their citizens. And the British government seems to want to spy on its people ... well apparently it just likes spying on its people. I don't know how else to account for the level of surveillance in Britain.

The next group that is watching you is composed of thieves. These are people who want your passwords, so they can empty out your bank accounts. Or they may want to use your online accounts, so they can hide while they steal from others. They may also want to convince you that they are actually a nigerian prince (<https://www.bbb.org/new-york-city/get-consumer-help/articles/the-nigerian-prince-old-scam-new-twist/>) who has no other place to keep his money safe except in your trustworthy hands.

The next group that is watching you is the hackers who are not thieves. Mostly, they just want to snoop and to practice snooping so as to improve their ability to snoop. They want to know everything about everyone, especially governments and large corporations. And sometimes they want to get notoriety for revealing that information. Maybe some want to fix the broken systems that we all live under to make the world a better place.

Reasonable questions for you, the average consumer, to ask are, which groups, if any, can you protect yourself from, and how hard should you be trying? In order to be able to answer these questions, let's look at a few things. In the three lists which follow, I've assumed that the governments to which I am referring are Western "democratic" governments. The first list is a probable ranking of the above groups from most to least difficult to protect yourself from:

- Governments
- Hackers
- Corporations
- Thieves

Next, the ranking from most to least likely to be spying on you probably looks like this:

- Corporations
- Governments
- Thieves
- Hackers

Lastly, the amount of damage from most to least that these groups could do to you while spying on you probably looks like this:

- Thieves
- Governments
- Corporations
- Hackers

Taken together, the three lists above suggest the following. First, you shouldn't be worried about hackers, because they probably aren't spying on you. But even if they are, you can't do anything about it. And you really don't have much to fear from them, even if they are spying on you. Second, you should definitely be trying to protect yourself from thieves, because you have the most to fear from them, there is a reasonable likelihood that they are trying to spy on you, and they are the easiest group to protect yourself from. Next,

Corporations probably aren't going to do you much damage by spying on you, even though they are certainly spying on you, although you have a chance, with vigilance on your part, of protecting yourself from them. So, whether you want to try to protect yourself from corporations is a judgment call that you'll have to make. And, lastly, governments are spying on you. And you have nearly as much reason to fear them as to fear thieves. However, governments are the hardest to protect yourself from. So, though you may be tempted to give up on trying to protect yourself from governments, due to the difficulty of doing so, you should probably be looking for ways to protect yourself from them. By the way, it makes sense that you have nearly as much to fear from governments spying on you as from thieves, since according to Paul Kennedy, who wrote *The Rise and Fall of the Great Powers*, (<https://www.amazon.com/Rise-Fall-Great-Powers/dp/0679720197>) governments are nothing more than institutionalized thievery. One more thing to note about government spying is that the numbers of people they are spying on is at least in the millions--if not a very significant portion of everyone on the planet, judging by what we know about the NSA (<https://www.eff.org/nsa-spying>). Also, see this ([https://en.wikipedia.org/wiki/PRISM_\(surveillance_program\)](https://en.wikipedia.org/wiki/PRISM_(surveillance_program))) and this: <https://www.youtube.com/watch?v=wB4Gn0u4DSE>

Threat-Tailoring Approaches

So, now that we have established that we need to fear thieves, governments, and corporations, in that order, let's talk about what we can do about each. Thieves' main methods of attack are through social engineering attacks (<https://www.incapsula.com/web-application-security/social-engineering-attack.html>). Social engineering works mainly through phone calls, offers on web sites, and email. A thief may call you on the phone or send you an email to try to scam you by saying they are someone else who has a legitimate need for your information. For example, they may pretend to be the IRS and ask for your tax information, including your banking information and social security number. A thief may have a website with a message that pops up saying that your computer is infected with a virus and telling you to call a phone number. This is never legitimate. To avoid being scammed through email, many people advise you not to open emails from people you don't know. That's like never answering your phone unless you recognize the person calling. You may miss legitimate calls. But it is safer than talking to every caller. Avoid clicking on links in emails or opening attachments, because they may execute malware programs or take you to fake websites. Also 2-factor authentication is another layer of protection against thieves. By the way, you cannot protect yourself from thieves who steal your information out of companies' computers; however, the one exception is that you can encrypt your data before giving it to online services like Dropbox or sending it in emails. Often thieves will hide malware in software that looks legitimate. Don't load software onto your phone or computer from any sources that you don't trust, which is just about every source on the internet except for official Microsoft and Google websites and Linux distribution repositories. With any other software, including web browser add-ons, you are risking your privacy and security. If you have to load software from another source, some of the less risky sources can be found here (<https://www.makeuseof.com/tag/9-cleanest-safest-websites-download-free-software-windows/>). One way of telling if you may have malware on your computer that is transmitting information to a thief is to see what ports you have open. You can do this using the Shieldsup test (<https://www.grc.com/x/ne.dll?rh1dkyd2>). You should not see any ports open while you are online. If you want even more online security, my personal recommendations are to not bank online and to consider using my three-USB stick method. Also, since threats, threat prevention software, and threat prevention techniques change continuously, it is important to keep yourself aware of the latest information.

Protecting yourself from corporate spying requires even more effort. It also requires even more knowledge. No gadget out there will do the work for you. Every time I've seen someone offer consumers a gadget, I've seen someone else explain why it's not very effective--at least, not so far. That leaves software. First, your Internet Service Provider (ISP) can see everything you do online. You probably can't do anything to completely change that; however, you can make it a little harder for them. First, use another DNS server, not your ISP's. This will make it slightly harder for them to see which websites you visit. It is also possible to

encrypt your DNS traffic (<https://www.opendns.com/about/innovations/dnscrypt/>). This prevents your ISP from seeing which websites you're visiting by examining the DNS headers in individual packets coming across its servers. Then, take full advantage of the built-in encryption on the internet by only using HTTPS websites, where possible. Many people suggest using a VPN service. However, studies have shown that most VPN services don't actually work when it comes to hiding your activities from your ISP. Note that HTTPS and VPN's can no longer protect you from government surveillance.

<https://cheapskatesguide.org/articles/no-online-bank-account.html>

To protect yourself from being tracked online by corporations other than your ISP, like Google and Facebook, many people recommend that you use anti-tracking software--like, for example, Privacy Badger. The bad news is that anti-tracking software, including anti-tracking settings in your browser and deletion of tracking cookies are far from 100% effective. There is a technique called fingerprinting that takes all the information that your browser puts out to websites and uses it to uniquely identify you, no matter what anonymizing or anti-tracking measures you have taken. It is extremely difficult to circumvent fingerprinting, because all browsers transmit information to websites. I have never tried using an ancient web browser like Lynx to see if it may transmit significantly less data than the average modern web browser, but it's worth a shot. However, since a lot of corporate tracking techniques rely on your own web browser to do their work for them, one thing you can do to thwart them to some extent is to turn off javascript in your browser.

<https://helpeverybody.wpengine.com/websocial-media/1409-you-have-no-idea-how-many-visitors-your-website-gets>

You can test to what extent your browser is transmitting unique information using these sites: panopticlick.com, Shieldsup, and ip-check.info.

<https://panopticlick.eff.org/>

<https://www.grc.com/shieldsup>

<https://cheapskatesguide.org/articles/ip-check.info/?lang=en>

These sites confirm that browsers transmit a lot of data that can be used for fingerprinting. From playing around with these sites, I have noticed that turning off javascript in my browser does help some. Also the TOR browser seems to transmit less data than most, but even it is not completely effective. The added benefit that you get from the TOR browser and especially the TAILS operating system is that they block your IP address from the websites you visit. You want to try several browsers to see which one transmits the least information. Perhaps you will be lucky enough to find a browser that transmits less information than the TOR browser.

The next thing to be aware of is that corporations have methods other than tracking to spy on you. There is a saying that if a corporation is offering you their product for free, you are their product. This means that corporations that offer you free services are selling the data they collect from you in order to be able to provide you with these services. So, chances are that companies that provide you with free email are reading your email. We know that, in addition to tracking you, Facebook reads your posts and knows who your friends are, and that is just the beginning of Facebook's spying methods. Free online surveys are just ways of collecting more data from you. Companies also monitor your credit card transactions and sell your online dating profiles. If you have a Samsung TV that is connected to the internet, it's probably recording what you watch and may even be listening to your private conversations in your home. In fact, anything that you have in your home that is connected to the internet may be spying on you, right down to your internet-connected light bulb. With a few exceptions, online search engines monitor and log your searches. One of the exceptions is the ixquick.com search engine, which is headquartered in Europe. The steps to counter the nearly ubiquitous activities of free service providers would be to pay for services you receive online, read website privacy agreements, and not buy products that are known to be spying on you. However, the only way to be really secure from corporations using the internet to spy on you is to never connect to the internet or buy any

internet-connected appliances. Welcome back to the 1980's.

Protecting yourself from government spying while you are on the internet is the hardest and requires the most knowledge. The biggest problem is that unless a whistle-blower like Edward Snowden tells us, we have no way of knowing how governments may potentially be spying on us. That means that we have no way of protecting ourselves 100% of the time from government spying. Some things whistle-blowers have revealed (<https://secureswissdata.com/9-ways-government-spying-on-internet-activity/>) are that the US government logs the meta data from all phone calls (who calls who and when), secretly forces internet service providers and providers of other services to allow it to "listen in on" and record all traffic going through their servers, reads nearly all email sent from everywhere in the world, and tracks the locations of all cell phones (even when they're turned off). And, although I am not aware of any specific whistle-blower revelations on this, there is every reason to believe that the US government (and perhaps others, including China's) has backdoors built into all computer hardware and operating system software for monitoring everything we do on our cell phones, tablets, laptops, desktop computers, and routers. (<https://www.eteknix.com/nsa-may-backdoors-built-intel-amd-processors/>) See also this. Because Lenovo computers are manufactured in China, the US government has issued warnings to all US government agencies and subcontractors to strongly discourage them from using Lenovo computers. And the US government probably has backdoors (<https://www.atlasobscura.com/articles/a-brief-history-of-the-nsa-attempting-to-insert-backdoors-into-encrypted-data>) into all commercially-available encryption software, with the possible exception of Truecrypt version 7.1a. I hope you are understanding now the magnitude of the lengths that governments are going to (using your tax money) to spy on you. In truth, we are now approaching the level of government spying that George Orwell warned about in his book, 1984

So what can we practically do to protect ourselves from government spying? Seriously, there isn't much, if we want to use cell phones, credit cards, and the internet. About all we can do, if we absolutely need to have a private conversation, is to have a face-to-face meeting without any electronics within microphone range. That includes cell phones, Samsung TV's, video cameras, computers, or land-line telephones. And don't travel to the meeting place using long-distance commercial transportation. Sending a letter through the US mail is the next best, although it is known that the outsides of all mail sent through the US mail are photographed, and the pictures are stored. So, don't put your return address on the envelope. (http://www.abajournal.com/news/article/new_york_times_post_office_photocopies_envelopes_of_all_mail_sent_in_th) As far as surfing the internet is concerned, begin with all the precautions that I outlined above to protect yourself from corporate spying (except HTTPS and VPN's). Then, add the TAILS operating system on a USB stick. As I said, TAILS will not prevent you from being identified and tracked via the fingerprinting method. And who can be sure whether the government has a backdoor in TAILS? As far as I know, the super-paranoid, hoody and sunglasses method I outlined above is the next step.

Some people recommend using ProtonMail to send private emails (and then, only to other ProtonMail users). In order for this to work, ProtonMail would have to provide both the sender and the receiver with software that runs on their computers to encrypt and decrypt the contents of their emails before they are sent over the government-monitored internet lines. Or you could encrypt the contents yourself with a prearranged password (from that face-to-face meeting you had). Be sure to use an extremely secure password! The real benefit of ProtonMail is not its encryption (because it's more secure to do that yourself), but the fact that the emails are stored in Switzerland, where the US government can't get them. But, if the government has a backdoor into either the encryption software that you used or that ProtonMail used to encrypt your email, then encryption does you no good if the US government ever manages to get their hands on your emails. (See this, this, and this.) All we know is that Snowden provided evidence in 2014 that the NSA had not cracked Truecrypt. Whether that is still the case today is unknown.

Be aware that simply the use of methods of avoiding government spying techniques may make you a target. This includes the use of encryption and TAILS. However, if millions and millions of law-abiding people

begin to actively use these methods, then the NSA cannot put them under significantly more scrutiny than that to which it is already subjecting the rest of the world. This alone is an argument for their use.

Experts warns of â... epidemicâ... of bugging devices used by stalkers - By James Hockaday

Stalkers are using cheap bugging devices hidden in everyday household items

More funding and legal powers are needed for police to stop a surge of stalkers using eavesdropping devices to spy on victims, experts have warned.

Firms paid to detect the bugs say theyâ... re finding more and more of the devices which are readily available on online marketplaces like Amazon and eBay.

Jack Lazzereschi, Technical Director of bug sweeping company Shapestones, says cases of stalking and victims being blackmailed with intimate footage shot in secret has doubled in the past two years.

He told Metro.co.uk: â... The police want to do something about it, they try to, but usually they donâ... t have the legal power or the resources to investigate.

â... For us itâ... s a problem. We try to protect the client, we want to assure that somebody has been protected.â...

Advert for a hidden camera device planted inside a fire/smoke alarm sold on Amazon

People are paying as little as Â£15 for listening devices and spy cameras hidden inside desk lamps, wall sockets, phone charger cables, USB sticks and picture frames.

Users insert a sim card into a hidden slot and call a number to listen in on their unwitting targets.

People using hidden cameras can watch whatâ... s happening using an apps on their phones.

Jack says the devices are so effective, cheap and hard to trace to their users, law enforcement prefer using them over expensive old-school devices.

Although every case is different, in situations where homeowners plant devices in their own properties, Jack says thereâ... s usually a legal â... grey areaâ... to avoid prosecution.

The devices themselves arenâ... t illegal and they are usually marketed for legitimate purposes like protection, making it difficult for cops to investigate.

There is no suggestion online marketplaces like eBay and Amazon are breaking the law by selling them.

But in some instances, images of women in their underwear have been used in listings â... implying more sinister uses for the devices.

thumbnail for post ID 9772825Two guardsmen faint amid sweltering heat during Trooping the Colour rehearsals

Even in cases when people are more clearly breaking the law, Jack says itâ... s unlikely perpetrators will be brought to justice as overstretched police will prioritise resources to stop violent crime.

Jackâ... s says around 60 per cent of his firmâ... s non-corporate cases involve stalking or blackmail.

He says itâ... s become an â... epidemicâ... over the past couple of years with the gadgets more readily available than ever before.

Jack Lazzereschi says heâ... s seen stalking cases double in a few years

Victims are often filmed naked or having sex and threatened with the threat of footage being put online and in the worst cases children are also recorded.

Jack says UK law is woefully unprepared to deal with these devices compared to countries in the Asian-Pacific region.

Car crash collision accident with scooter, motor bike; Shutterstock ID 1041606415; Purchase Order: -Man has erection for nine days after moped injury

In South Korea authorities have cracked down on a scourge of perverts planting cameras in public toilets.

James Williams, director of bug sweepers QCC Global says snooping devices used to be the preserve of people with deep pockets and technological know-how.

He said: â... Itâ... s gone from that to really being at a place where anybody can just buy a device from the internet.

â... Anything you can possibly think of you can buy with a bug built into it. I would say theyâ... re getting used increasingly across the board.â...

Suky Bhaker, Acting CEO of the Suzy Lamplugh Trust, which runs the National Stalking Helpline, warned using these gadgets could be a prelude to physical violence.

Smiling pug walking in summer parkSunscreen and shade: How to protect your pet from the summer heat

She said: â... We know that stalking and coercive control are extremely dangerous and can cause huge harm to the victim, both in terms of their psychological wellbeing and the potential for escalation to physical violence or even murder.

â... The use of surveillance devices or spyware apps by stalkers, must be seen in the context of a pattern of obsessive, fixated behaviour which aims at controlling and monitoring the victim.

She added: â... There should be clarity for police forces that the use of surveillance equipment by stalkers to monitor their victimâ... s location or communications is a sign that serious and dangerous abuse may be present or imminent.â...

â... All cases of stalking or coercive control should be taken seriously and investigated when reported to police.â...

The charity is calling for all police forces across the country to train staff in this area.

Earlier this month a policeman known only by his surname Mills was barred from the profession for life for repeatedly dismissing pleas for help from 19-year-old Shana Grice who was eventually murdered by her stalker ex-boyfriend Michel Lane.

A spokesman for eBay said: â... The listing of mini cameras on eBay is permitted for legitimate items like baby monitors or doorbell cameras.

â... However, items intended to be used as spying devices are banned from eBayâ... s UK platform in accordance with the law and our policy.

â... We have filters in place to block prohibited items, and all the items flagged by Metro have now been removed.â...

Face-tracking harvesters grab one picture of you and then use AI to find every other digital picture of you on Earth and open every social media post, resume, news clipping, dating account etc. and sell the full dossier on you to Axciom, the NSA, Political manipulators etc. and hack your bank accounts and credit cards. Never put an unsecured photo of yourself online.

Whoâ... s Watching Your WebEx? Webex has many back-door spy paths built in

KrebsOnSecurity spent a good part of the past week working with **Cisco** to alert more than four dozen companies â... many of them household names â... about regular corporate [WebEx](#) conference meetings that lack passwords and are thus open to anyone who wants to listen in.

Department of Energyâ... s WebEx meetings.

At issue are recurring video- and audio conference-based meetings that companies make available to their employees via WebEx, a set of online conferencing tools run by Cisco. These services allow customers to password-protect meetings, but it was trivial to find dozens of major companies that do not follow this basic best practice and allow virtually anyone to join daily meetings about apparently internal discussions and planning sessions.

Many of the meetings that can be found by a cursory search within an organizationâ... s â... Events Centerâ... listing on Webex.com seem to be intended for public viewing, such as product demonstrations and presentations for prospective customers and clients. However, from there it is often easy to discover a host of

other, more proprietary WebEx meetings simply by clicking through the daily and weekly meetings listed in each organization's Meeting Center section on the Webex.com site.

Some of the more interesting, non-password-protected recurring meetings I found include those from **Charles Schwab, CSC, CBS, CVS, The U.S. Department of Energy, Fannie Mae, Jones Day, Orbitz, Paychex Services, and Union Pacific**. Some entities even also allowed access to archived event recordings.

Cisco began reaching out to each of these companies about a week ago, and today released an [all-customer alert](#) (PDF) pointing customers to a [consolidated best-practices document](#) written for Cisco WebEx site administrators and users.

â... In the first week of October, we were contacted by a leading security researcher,â... Cisco wrote. â... He showed us that some WebEx customer sites were publicly displaying meeting information online, including meeting Time, Topic, Host, and Duration. Some sites also included a â... join meetingâ... link.â...

Google still keeps a list of everything you ever bought using Gmail, even if you delete all your emails, and provides that data to political parties, the NSA and marketing companies so they can manipulate you

[Todd Haselton@robotodd](mailto:Todd.Haselton@robotodd)

Key Points

- Google Gmail keeps a log of everything you buy.
- Google says this is so you can ask Google Assistant about the status of an order or reorder something.
- It also says you can delete this log by deleting the email, but three weeks after we deleted all email, the list is still there.

Google CEO Sundar Pichai

Google

Google and other tech companies have been under fire recently for a variety of issues, including failing to protect [user data](#), [failing to disclose](#) how data is collected and used and [failing to police the content](#) posted to their services.

Companies such as Google have embedded themselves in our lives with useful services including Gmail, Google Maps and Google Search, as well as smart products such as the Google Assistant which can answer our questions on a whim. The benefits of these tools come at the cost of our privacy, however, because while Google says that privacy should not be a â... [luxury good](#), â... itâ... s still going to great lengths to collect as much detail as possible about its users and making it more difficult than necessary for users to track whatâ... s collected about them and delete it.

Hereâ... s the latest case in point.

In May, I wrote up something weird I spotted on [Googleâ... s account management page](#). I noticed that Google uses Gmail to store a list of [everything youâ... ve purchased](#), if you used Gmail or your Gmail address in any part of the transaction.

If you have a confirmation for a prescription you picked up at a pharmacy that went into your Gmail account, Google logs it. If you have a receipt from Macyâ... s, Google keeps it. If you bought food for delivery and the receipt went to your Gmail, Google stores that, too.

You get the idea, and you can see your own purchase history by going to [Googleâ... s Purchases page](#).

Google says it does this so you can use Google Assistant to track packages or reorder things, even if thatâ... s not an option for some purchases that arenâ... t mailed or wouldnâ... t be reordered, like something you bought a store.

At the time of my original story, Google said users can delete everything by tapping into a purchase and removing the Gmail. It seemed to work if you did this for each purchase, one by one. This isnâ... t easy â... for years worth of purchases, this would take hours or even days of time.

So, since Google doesnâ... t let you bulk-delete this purchases list, I decided to delete everything in my Gmail inbox. That meant removing every last message Iâ... ve sent or received since I opened my Gmail account more than a decade ago.

Despite Googleâ... s assurances, it didnâ... t work.

Like a horror movie villain that just wonâ... t die

On Friday, three weeks after I deleted every Gmail, I checked my purchases list.

I still see receipts for things I bought years ago. Prescriptions, food deliveries, books I bought on Amazon, music I purchased from iTunes, a subscription to Xbox Live I bought from Microsoft -- itâ... s all there.

A list of my purchases Google pulled in from Gmail.

Todd Haselton | CNBC

Google continues to show me purchases Iâ... ve made recently, too.

I canâ... t delete anything and I canâ... t turn it off.

When I click on an individual purchase and try to remove it â... it says I can do this by deleting the email, after all â... it just redirects to my inbox and not to the original email message for me to delete, since that email no longer exists.

So Google is caching or saving this private information somewhere else that isnâ... t just tied to my Gmail account.

When I wrote my original story, a Google spokesperson insisted this list is only for my use, and said the company views it as a convenience. Later, the company followed up to say this data is used to â... help you get things done, like track a package or reorder food.â...

But itâ... s a convenience I never asked for, and the fact that Google compiles and stores this information regardless of what I say or do is a bit creepy.

A spokesperson was not immediately available to comment on this latest development.

But it shows once again how tech companies often treat user privacy as a low-priority afterthought and will only make changes if user outrage forces their hand.

EVERYTHING IN AMERICA HAS BEEN HACKED OR SOON WILL BE:

In a country of just 7 million people, the [scale of the hack](#) means that just about every working adult has been affected.

"We should all be angry. ... The information is now freely available to anyone. Many, many people in Bulgaria already have this file, and I believe that it's not only in Bulgaria," said Genov, a blogger and political analyst. He knows his data was compromised because, though he's not an IT expert, he managed to find the stolen files online.

.

[Microsoft says foreign hackers still actively targeting US political targets](#)

The attack is extraordinary, but it is [not unique](#).

Government databases are gold mines for hackers. They contain a huge wealth of information that can be "useful" for years to come, experts say. "You can make (your password) longer and more sophisticated, but the information the government holds are things that are not going to change," said Guy Bunker, an information security expert and the chief technology officer at Clearswift, a cybersecurity company. "Your date of birth is not going to change, you're not going to move house tomorrow," he said. "A lot of the information that was taken was valid yesterday, is valid today, and will probably be valid for a large number of people in five, 10, 20 years' time."

Hackers' paradise

Data breaches used to be spearheaded by highly skilled hackers. But it increasingly doesn't take a sophisticated and carefully planned operation to break into IT systems. Hacking tools and malware that are available on the dark web make it possible for amateur hackers to cause enormous damage. A [strict data protection law](#) that came into effect last year across the European Union has placed new burdens on anyone who collects and stores personal data. It also introduced hefty fines for anyone who mismanages data, potentially opening the door for the Bulgarian government to fine itself for the breach.

.

[Slack is resetting thousands of passwords after 2015 hack](#)

Still, attacks against government systems are on the rise, said Adam Levin, the founder of CyberScout, another cybersecurity firm. "It's a war right now -- one we will win if we make cybersecurity a front-burner

issue," he said. The notion that governments urgently need to step up their cybersecurity game is not new. Experts have been ringing alarm bells for years.

The US Department of Veterans Affairs suffered one of the first major data breaches in 2006, when personal data of more than 26 million veterans and military personnel were compromised. "And it was all, 'Oh, this is dreadful. We must do things to stop it.' ... And here we are, 13 years later, and an entire country's data has been compromised, and in between, there's been incidents of large swathes of citizen data being compromised in different countries," Bunker said. Out-of-date systems are often the problem. Some governments may have used private companies to manage the data they collected before the array of hacks and breeches brought their attention to cybersecurity. "In many cases, our data was sent to third-party contractors years ago," Levin said. "The way we looked at data management 10 years ago seems antiquated today, yet that old data is still out there being managed by third parties, using legacy systems."

.

[Chinese spies stole NSA hacking tools, report finds](#)

If the "old data" hasn't changed, it's still valuable to hackers.

The Bulgaria incident is concerning, said Desislava Krusteva, a Bulgarian privacy and data protection lawyer who advises some of the world's biggest tech companies on how to keep their clients' information safe.

"These kinds of incidents should not happen in a state institution. It seems like it didn't require huge efforts, and it's probably the personal data of almost all Bulgarian citizens," said Krusteva, a partner at Dimitrov, Petrov & Co., a law firm in Sofia.

The Bulgarian Commission for Personal Data Protection has said it would launch an investigation into the hack.

A National Revenue Agency spokesman would not comment on whether the data was properly protected.

"As there is undergoing investigation, we couldn't provide more details about reasons behind the hack," Communications Director Rossen Bachvarov said.

'Very embarrassing for the government'

A 20-year-old cybersecurity worker has been arrested by the Bulgarian police in connection with the hack. The computer and software used in the attack led police to the suspect, according to the Sofia prosecutor's office.

The man has been detained, and the police seized his equipment, including mobile phones, computers and drives, the prosecutor's office said in a statement. If convicted, he could spend as long as eight years in prison.

.

[US indicts two people in China over hacks](#)

"It's still too early to say what exactly happened, but from political perspective, it is, of course, very embarrassing for the government," Krusteva said.

The embarrassment is made worse by the fact that this was not the first time the Bulgarian government was targeted. The country's Commercial Registry was brought down less than a year ago by an attack. "So, at least for a year, the Bulgarian society, politicians, those who are in charge of the country, they knew quite well about the serious cybersecurity problems in the government infrastructures," Genov said, "and they didn't do anything about it."

Hackers posted screenshots of the company's servers on Twitter and later shared the stolen data with Digital Revolution, another hacking group [who last year breached Quantum, another FSB contractor](#).

This second hacker group shared the stolen files in greater detail on their Twitter account, on Thursday, July 18, and with Russian journalists afterward.

FSB's secret projects

Per the different reports in Russian media, the files indicate that SyTech had worked since 2009 on a multitude of projects since 2009 for FSB unit 71330 and for fellow contractor Quantum. Projects include:

- **Nautilus** - a project for collecting data about EVERY social media and dating site user (such as Facebook, Match.com, OKCUPID, Plenty of Fish)MySpace, and LinkedIn).
- **Nautilus-S** - a project for deanonymizing Tor traffic with the help of rogue Tor servers.
- **Reward** - a project to covertly penetrate P2P networks, like the one used for torrents.
- **Mentor** - a project to monitor and search email communications on the servers of Russian companies.
- **Hope** - a project to investigate the topology of the Russian internet and how it connects to other countries' network.
- **Tax-3** - a project for the creation of a closed intranet to store the information of highly-sensitive state figures, judges, and local administration officials, separate from the rest of the state's IT networks.

BBC Russia, who received the full trove of documents, claims there were other older projects for researching other network protocols such as Jabber (instant messaging), ED2K (eDonkey), and OpenFT (enterprise file transfer).

Other files posted on the Digital Revolution Twitter account claimed that the FSB was also tracking students and pensioners.

HOW TO WIN AN EPIC ANTI-CORRUPTION BATTLE ON BEHALF OF AMERICAN CITIZENS

A group of domestic citizens filed FBI complaints and lawsuits against White House and government agency senior staff and their Silicon Valley oligarch financiers including a lawsuit against a rogue, dirty tricks, off-shoot of the CIA called "In-Q-Tel".

These citizens instigated Congressional corruption investigations and hearings against the most senior members of the State and Federal government. These actions resulted in the termination of very famous public officials including the Secretary of Energy, his staff, White House Executives and more. The case broke-up some of their crony criminal embezzlement scams. It nearly resulted in the President being forced to leave office, mid-term, based on revelations of a massive crony stock market kick-back scheme which began to be exposed after the FBI raid of Solyndra. The director of the FBI was fired for assisting in cover-ups related to this matter because the matter was reported directly to him.

This natural-born, American, domestic group of engineers was attacked with a \$30 million dollar+ (per uncovered billing notices) retribution/political reprisal program contracted by White House political operatives, and their appointees, who were also the business competitors of the engineers.

The attackers used Fusion GPS-type character assassination smear campaigns (operated by their cronies at Google, Gawker, Gizmodo, Jalopnik and Facebook), NVCA black-listing, Solyndra-laundering, stone-walling, Lois Lerner-class agency manipulation and search engine rigging. In-Q-Tel turns out to be the only federally financed "charity" whose staff are also employed by each of the suspects in this case and who financed the suspects in this case. It was revealed that White House executives ordered government agencies to harm members of the public and to reprisal with-hold public resources from the public. This was a violation of tort, RICO and anti-trust laws.

The citizens had previously been awarded federal commendations, state and federal innovation grants, government R&D contracts and knew White House and Congressional executives personally. They know "where the bodies are buried".

The citizen-victims fought back.

With the encouragement of members of Congress they used 100% legal tools to interdict the corruption.

Essentially; they helped the United States government sue itself!

First, with a unique new kind of pioneering federal lawsuit, victims established â... FOR THE FIRST TIME IN LEGAL HISTORY â... that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case One, (D.D.C. 2015).

Second, they prevailed in the United States Court of Appeals for the District of Columbia Circuit on their appeal of the district court's ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that the government, under court order

is now re-doing the victims applications and GAO, FBI, IG's and Congressional oversight offices are watching to assure effective ethics and transparency.

Third, these cases placed, on permanent public record, one of the most detailed documentation sets, ever assembled, about how modern political "Dark Money" conduits operate. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank accounts, revolving door bribes, insider stock trades and other payola between the victim's competitors and public officials. This documentation now prevents the use of those kinds of criminal efforts, in the future, by exposing their tactics to the public.

Fourth, the victim's team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers. This included some of the most well-known names in Washington, DC, at the time. Many of them were, and are still being, investigated and surveilled by the FBI, GAO, SEC and Congress.

Fifth, and most important, the effort put every corrupt political scheme on notice that they WILL be found out and interdicted!

The bottom line?

The victims group WON on every single aspect of their public-interest goals but still have yet to be recompensed for their damages! They continue to fight for their Constitutional rights and the payment of their damages and benefits from the government.

They have won over and over while the opposition keeps getting fired, arrested, investigated and exposed in national news documentaries!

Now the "bad guys" have less options to engage in the corruption of our Democracy!

You're Welcome, America!

These co-workers witnessed politicians and Silicon Valley oligarchs (sometimes called "The Deep State") stealing money from both: 1.) Their company and 2.) the US Government Treasury and handing it to Elon Musk and their other insider friends. They reported it to the authorities.

The crime turned out to be part of one of the biggest embezzlement crimes ever exposed. Major political figures and tech "bosses" turned out to be running a "PayPal Tech Mafia". The bad guys then began hunting them down and attacking them in reprisal "for the rest of our lives" per their threats and their ongoing retribution vendettas.

It was found that famous senators, their Silicon Valley oligarch financiers and their associates run an organized crime insider trading scam that abuses taxpayers and sabotages competing businesses. The terminations of the heads of the FBI, The Department of Energy and other famous people in politics is because of their operation, and cover-ups, of this case. The cover-ups are still going on. The Wenstein, Epstein and related cases show, though, that cover-ups never last.

Now, over 300 million potential voters can "crowd-source" join the forensic efforts to expose, shame, dox, bankrupt, boycott and 100% legally exterminate the corrupt entities who did these illicit things by using our Democracy as their billionaire's plaything.

Hundreds of the perpetrators have already been fired, placed under permanent public surveillance, financially tracked through every asset, reported to federal agencies and targeted for investigation. The goal is to interdict every single person, company and political operative group who is engaging in these crimes using crowd-sourced investigation and intelligence tools.

This is a large part of all of that "political corruption" and "dirty Dark Money" politics you read about in the newspaper every day.

If you thought that Mossack Fonseca and the Panama Papers was "The Story": IT WAS ONLY THE BEGINNING!

A key part of one of the testimony statements reads: *"...SILICON VALLEY'S POLITICIANS MAKE POLICY THAT, BOTH, RUINS TAXPAYERS WHILE MAKING THE POLITICIANS RICH BY ARTIFICIALLY INFLATING THE VALUE OF THE POLITICIANS SECRET STOCK MARKET HOLDINGS. NOW WE ARE EXPOSING THEIR ENTIRE SCAM!"*

THIS IS ABOUT THE U.S. SENATORS AND THEIR CRONY DARK MONEY POLITICAL BRIBES AND CRIMINAL KICK-BACKS, THE TECH OLIGARCHS WHO DEPLOYED THE BRIBES AND THE VICTIMS OF THESE CRIMES.

IMAGINE LIVING IN A WORLD WHERE ALMOST EVERY ONE OF THE PUBLIC OFFICIALS THAT WERE SUPPOSED TO HELP YOU TURNED OUT TO BE YOUR BUSINESS COMPETITORS. IMAGINE HAVING THEM USE GOVERNMENT RESOURCES TO PROFIT AT YOUR EXPENSE, BLOCKADE YOU AND TREAT DEMOCRACY LIKE A GARAGE SALE! THIS IS THAT STORY!..."

Google, Tesla, Facebook, Linkedin and their VC's (and deeply bribed Senators) operated hit-jobs on the public and their competitors, supported by the Obama White House and U.S. Dept. of Energy.

This is about a group of tech oligarchs, and their corrupt Senators, who commit crimes in order to manipulate over a trillion tax dollars (YOUR MONEY) into their, and their friends pockets.

They are felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to solve the problem.

Some of the largest bribes in American history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

U.S. Senators, Agency Heads and Congress were bribed with:

- Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC

- Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging including shadow-banning, de-boosting, DNS re-routing, directed search suggestion, subliminal messaging bias, and hundreds of other psychological manipulation tricks; the value of which is never reported to the FEC but proven by invoices and bank payments between Google and Gawker, Gizmodo, DNC, Fusion GPS, Black Cube, etc.

- The use of Cayman, Boca Des Tores, Swiss and related laundering accounts
- The use of HSBC, Wells Fargo and Deutsche Bank money laundering accounts
- Free spam and bulk mailing services owned by corporations
- Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials

Investigators were able to get a law produced that made insider trading less attractive for Congress, nothing has been done to stop stock warrant bribes and revolving door payola. Additionally, even with the new law, 60% of the U.S. Congress (including their associates and families) STILL engage in insider trading because law enforcement has not prosecuted many of them.

This is about a group of U.S. Senators, Silicon Valley Oligarchs, Crooked Law Firms and Lobbyists who commit crimes in order to manipulate over a trillion tax dollars into their, and their friends pockets. They use media monopoly tricks to try to shut out any other viewpoints. They push pretend issues that they believe will get more tax money allocated to "issue solutions" that they, and their friends, happen to already own the monopolies for. They are felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street lobby firms and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to arrest them.

The Creepy Line By Matthew Taylor, <https://www.thecreepyline.com/>

Said one victim: *"They had the U.S. Government hire us, paid us part of our money, then asked us to spend our life savings and years of our time on their federal project based on their lies and false-promises. Then they took the assets we were asked to invest, plus the money they owed us, and gave it to their friends. When we complained to the FBI, Congress and the SEC, they hired Fusion GPS-like companies to run "hit-jobs" on us and threaten our lives. WE WERE LIED TO AND DEFRAUDED BY GOVERNMENT AGENCIES. THEY TOOK OUR MONEY AND USED US, AND OUR PEERS, AS A SMOKE-SCREEN TO HIDE THEIR CRONY PAYOLA CRIME THAT PUT TAXPAYER CASH IN THEIR FRIEND'S POCKETS...We have received ZERO justice and ZERO compensation for our damages!"*

There are no "conspiracy theories" here. These are all hard forensic facts that will stand-up in any court!

"...They did this to anybody who they thought might expose the White House use of agencies as "slush-funds" and "Dark Money" campaign finance laundering conduits. They were afraid that exposure of these schemes would cause the President of the United States to be forced to resign in the middle of his term!..."

Years of archived news videos provide evidence, by thousands of reporters and investigators, that the suspects are: A.) Based around Silicon Valley and Washington DC; B.) Operating as a RICO-violating cartel; C.) Deeply sociopath and sexually disturbed; D.) Money laundering via large law firms and investment banks; E.) Using Google, Reddit, Facebook, etc. as mass political behavior-manipulation programs; F.) Paying for and operating character assassination programs against those who defy them; G.) Using "green energy" as one of their facades to steer tax dollars to the companies that they, and their friends, already own and work for; H.) Willing to resort to the most extreme things to protect their scheme; I.) Living in an ideological "echo-chamber" in their tech bubbles; J.) Empowered entirely by the public's lack of willingness to boycott them and demand their arrests.

A vast number of individuals and companies, who are willing to testify about these crimes have NEVER BEEN ALLOWED into a Congressional hearing, court-room, FBI 302 interview reports, etc., because crooked Senators are terrified of the confirming testimony they can all provide.

Investigators placed autonomous monitoring applications on a vast number of co-location servers, shared hosting ISPs, stand-alone servers and sites around the world over ten years ago and monitored: 1.) Google search results compared to other search engines, 2.) Google DNS and spoofing activities, 3.) Google results on 100 key search terms including search terms of assets, candidates and business associates connected to Google, 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated mole data that was injected as user data ultimately ended up later, and other metrics. The results prove that Google abuses the market, the public, politics and human rights.

Said another witness: *"...ELON MUSK BOYFRIENDS: LARRY PAGE, ERIC SCHMIDT, JARED COHEN AND SERGY BRIN AT GOOGLE AND MARK ZUCKERBERG AT FACEBOOK ORDER THEIR COMPANY STAFF TO HIDE, DOWN-RANK, HOLE-PUNCH THE NET, SHADOW-BAN, STOCK MARKET VALUATION MANIPULATE AND EXCLUDE THIS WEBSITE ON THE INTERNET. WE TRACK EVERY TECHNICAL TRICK THEY USE AND REPORT IT TO CONGRESS AND ANTI-TRUST AGENCIES. THE MORE THEY DO IT, THE MORE THEY CREATE EVIDENCE THAT WILL PUT THEM OUT OF BUSINESS!..."*

The Google empire controls most of the media on Earth, via many front corporations, and indoctrinates

everyone in it's organization using 'cult' methodologies. Google owner's believe in "our-ideology-at-any-cost" and "the-ends-justify-the-means" scenarios. What could possibly go wrong?

Regarding The CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds.

Many of those character assassinated, sabotaged, black-listed, poisoned and shadow-banned are still waiting for justice!

The Silicon Valley Mafia is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, Linkedin, etc.) they control. They are sometimes referred to as The Deep State. They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control.

They hire rogue ex-intelligence agents to operate attacks via Fusion GPS, The Gawker/Gizmodo/Jalopnik/Univision Hatchet-Job Fake Tabloid Facade (ie: Obama had White House staff: Robert Gibbs and John Podesta hire them, in association with Obama financier Elon Musk, to attack XP Vehicles, Bright Automotive and ZAP Vehicles as retribution in violation of anti-trust laws), Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. . They spend over \$30M on each massive media attack program against competitors, reporters and outsiders.

They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, executive prostitute clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians to halt investigations and interdiction efforts. They are widely covered in news media articles as: sex abusers, cult enthusiasts, elitists, rapists, woman beaters, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations.

The divorce and sex abuse court filings against the #PaloAltoMafia men of Silicon Valley are some of the most disturbing and sexually twisted court records you will ever read and they demonstrate a clear and decades-long pattern of collusion and depravity. From Google's "Sex Slaves" to "Sex Penthouses" to "Deaths by Prostitute"; the list is endless.

They are not limited to California and also operate out of New York and Washington DC. They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse public privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

Silicon Valley's Corrupt Palo Alto Mafia Network "Scaled Monopolies"

Dr. ROBERT EPSTEIN describes how Defendant and political financier Google (In-Q-Tel's business partner) rigs elections to try to maintain Google's monopoly.

Authorities in the UK have finally figured out that fake news stories and Russian-placed ads are not the real problem. The UK Parliament is about to impose stiff penalties... not on the people who place the ads or write the stories, but on the Big Tech platforms that determine which ads and stories people actually see.

Parliament... s plans will almost surely be energized by the latest leak of damning material from inside Google... s fortress of secrecy: The Wall Street Journal recently reported on emails exchanged among Google employees in January 2017 in which they strategized about how to alter Google search results and other ephemeral experiences... to counter President Donald Trump... s newly imposed travel ban. The

company claims that none of these plans was ever implemented, but who knows?

While U.S. authorities have merely held hearings, EU authorities have taken dramatic steps in recent years to limit the powers of Big Tech, most recently with a comprehensive law that protects user privacyâ€¦ the General Data Protection Regulationâ€¦ and a whopping \$5.1 billion fine against Google for monopolistic practices in the mobile device market. Last year, the European Union also levied a \$2.7 billion fine against Google for filtering and ordering search results in a way that favored their own products and services. That filtering and ordering, it turns out, is of crucial importance.

As years of research Iâ€¦ ve been conducting on online influence has shown, content per se is not the real threat these days; what really matters is (a) which content is selected for users to see, and (b) the way that content is ordered in search results, search suggestions, news feeds, message feeds, comment lists, and so on. Thatâ€¦ s where the power lies to shift opinions, purchases, and votes, and that power is held by a disturbingly small group of people.

I say â€¦ these daysâ€¦ because the explosive growth of a handful of massive platforms on the internetâ€¦ the largest, by far, being Google and the next largest being Facebookâ€¦ has changed everything. Millions of people and organizations are constantly trying to get their content in front of our eyes, but for more than 2.5 billion people around the worldâ€¦ soon to be more than 4 billionâ€¦ the responsibility for what algorithms do should always lie with the people who wrote the algorithms and the companies that deployed them.

In randomized, controlled, peer-reviewed research Iâ€¦ ve conducted with thousands of people, Iâ€¦ ve shown repeatedly that when people are undecided, I can shift their opinions on just about any topic just by changing how I filter and order the information I show them. Iâ€¦ ve also shown that when, in multiple searches, I show people more and more information that favors one candidate, I can shift opinions even farther. Even more disturbing, I can do these things in ways that are completely invisible to people and in ways that donâ€¦ t leave paper trails for authorities to trace.

Worse still, these new forms of influence often rely on ephemeral contentâ€¦ information that is generated on the fly by an algorithm and then disappears forever, which means that it would be difficult, if not impossible, for authorities to reconstruct. If, on Election Day this coming November, Mark Zuckerberg decides to broadcast go-out-and-vote reminders mainly to members of one political party, how would we be able to detect such a manipulation? If we canâ€¦ t detect it, how would we be able to reduce its impact? And how, days or weeks later, would we be able to turn back the clock to see what happened?

Of course, companies like Google and Facebook emphatically reject the idea that their search and newsfeed algorithms are being tweaked in ways that could meddle in elections. Doing so would undermine the publicâ€¦ s trust in their companies, spokespeople have said. They insist that their algorithms are complicated, constantly changing, and subject to the â€¦ organicâ€¦ activity of users.

This is, of course, sheer nonsense. Google can adjust its algorithms to favor any candidate it chooses no matter what the activity of users might be, just as easily as I do in my experiments. As legal scholar Frank Pasquale noted in his recent book â€¦ The Black Box Society,â€¦ blaming algorithms just doesnâ€¦ t cut it; the responsibility for what an algorithm does should always lie with the people who wrote the algorithm and the companies that deployed the algorithm. Alan Murray, president of Fortune, recently framed the issue this way: â€¦ Rule one in the Age of AI: Humans remain accountable for decisions, even when made by machines.â€¦

Given that 95 percent of donations from Silicon Valley generally go to Democrats, itâ€¦ s hard to imagine that the algorithms of companies like Facebook and Google donâ€¦ t favor their favorite candidates. A newly leaked video of a 2016 meeting at Google shows without doubt that high-ranking Google executives share a strong political preference, which could easily be expressed in algorithms. The favoritism might be

deliberately programmed or occur simply because of unconscious bias. Either way, votes and opinions shift.

It's also hard to imagine how, in any election in the world, with or without intention on the part of company employees, Google search results would fail to tilt toward one candidate. Google's search algorithm certainly has no equal-time rule built into it; we wouldn't want it to! We want it to tell us what's best, and the algorithm will indeed always favor one dog food over another, one music service over another, and one political candidate over another. When the latter happens â€¦ votes and opinions shift.

Here are 10 waysâ€¦ seven of which I am actively studying and quantifyingâ€¦ that Big Tech companies could use to shift millions of votes this coming November with no one the wiser. Let's hope, of course, that these methods are not being used and will never be used, but let's be realistic too; there's generally no limit to what people will do when money and power are on the line.

1. Search Engine Manipulation Effect (SEME)

Ongoing research I began in January 2013 has shown repeatedly that when one candidate is favored over another in search results, voting preferences among undecided voters shift dramaticallyâ€¦ by 20 percent or more overall, and by up to 80 percent in some demographic groups. This is partly because people place inordinate trust in algorithmically generated output, thinking, mistakenly, that algorithms are inherently objective and impartial.

But my research also suggests that we are conditioned to believe in high-ranking search results in much the same way that rats are conditioned to press levers in Skinner boxes. Because most searches are for simple facts (â€¦ When was Donald Trump born?â€¦), and because correct answers to simple questions inevitably turn up in the first position, we are taught, day after day, that the higher a search result appears in the list, the more true it must be. When we finally search for information to help us make a tough decision (â€¦ Who's better for the economy, Trump or Clinton?â€¦), we tend to believe the information on the web pages to which high-ranking search results link.

As The Washington Post reported last year, in 2016, I led a team that developed a system for monitoring the election-related search results Google, Bing, and Yahoo were showing users in the months leading up to the presidential election, and I found pro-Clinton bias in all 10 search positions on the first page of Google's search results. Google responded, as usual, that it has â€¦ never re-ranked search results on any topic (including elections) to manipulate political sentimentâ€¦ â€¦ but I never claimed it did. I found what I found, namely that Google's search results favored Hillary Clinton; â€¦ re-rankingâ€¦ â€¦ an obtuse term Google seems to have invented to confuse peopleâ€¦ is irrelevant.

Because (a) many elections are very close, (b) 90 percent of online searches in most countries are conducted on just one search engine (Google), and (c) internet penetration is high in most countries these daysâ€¦ higher in many countries than it is in the United Statesâ€¦ it is possible that the outcomes of upwards of 25 percent of the world's national elections are now being determined by Google's search algorithm, even without deliberate manipulation on the part of company employees. Because, as I noted earlier, Google's search algorithm is not constrained by equal-time rules, it almost certainly ends up favoring one candidate over another in most political races, and that shifts opinions and votes.

2. Search Suggestion Effect (SSE)

When Google first introduced autocomplete search suggestionsâ€¦ those short lists you see when you start to type an item into the Google search barâ€¦ it was supposedly meant to save you some time. Whatever the original rationale, those suggestions soon turned into a powerful means of manipulation that Google appears to use aggressively.

My recent research suggests that (a) Google starts to manipulate your opinions from the very first character you type, and (b) by fiddling with the suggestions it shows you, Google can turn a 50â€¦ 50 split among

undecided voters into a 90â... 10 split with no one knowing. I call this manipulation the Search Suggestion Effect (SSE), and it is one of the most powerful behavioral manipulations I have ever seen in my nearly 40 years as a behavioral scientist.

How will you know whether Google is messing with your election-related search suggestions in the weeks leading up to the election? You wonâ... t.

3. The Targeted Messaging Effect (TME)

If, on Nov. 8, 2016, Mr. Zuckerberg had sent go-out-and-vote reminders just to supporters of Mrs. Clinton, that would likely have given her an additional 450,000 votes. Iâ... ve extrapolated that number from Facebookâ... s own published data.

Because Zuckerberg was overconfident in 2016, I donâ... t believe he sent those messages, but he is surely not overconfident this time around. In fact, itâ... s possible that, at this very moment, Facebook and other companies are sending out targeted register-to-vote reminders, as well as targeted go-out-and-vote reminders in primary races. Targeted go-out-and-vote reminders might also favor one party on Election Day in November.

My associates and I are building systems to monitor such things, but because no systems are currently in place, there is no sure way to tell whether Twitter, Google, and Facebook (or Facebookâ... s influential offshoot, Instagram) are currently tilting their messaging. No law or regulation specifically forbids the practice, and it would be an easy and economical way to serve company needs. Campaign donations cost money, after all, but tilting your messaging to favor one candidate is free.

4. Opinion Matching Effect (OME)

In March 2016, and continuing for more than seven months until Election Day, Tinderâ... s tens of millions of users could not only swipe to find sex partners, they could also swipe to find out whether they should vote for Trump or Clinton. The website iSideWith.comâ... founded and run by â... two friendsâ... with no obvious qualificationsâ... claims to have helped more than 49 million people match their opinions to the right candidate. Both CNN and USA Today have run similar services, currently inactive.

I am still studying and quantifying this type of, um, helpful service, but so far it looks like (a) opinion matching services tend to attract undecided votersâ... precisely the kinds of voters who are most vulnerable to manipulation, and (b) they can easily produce opinion shifts of 30 percent or more without peopleâ... s awareness.

At this writing, iSideWith is already helping people decide who they should vote for in the 2018 New York U.S. Senate race, the 2018 New York gubernatorial race, the 2018 race for New York District 10 of the U.S. House of Representatives, and, believe it or not, the 2020 presidential race. Keep your eyes open for other matching services as they turn up, and ask yourself this: Who wrote those algorithms, and how can we know whether they are biased toward one candidate or party?

5. Answer Bot Effect (ABE)

More and more these days, people donâ... t want lists of thousands of search results, they just want the answer, which is being supplied by personal assistants like Google Home devices, the Google Assistant on Android devices, Amazonâ... s Alexa, Appleâ... s Siri, and Googleâ... s featured snippetsâ... those answer boxes at the top of Google search results. I call the opinion shift produced by such mechanisms the Answer Bot Effect (ABE).

My research on Googleâ... s answer boxes shows three things so far: First, they reduce the time people spend searching for more information. Second, they reduce the number of times people click on search results. And third, they appear to shift opinions 10 to 30 percent more than search results alone do. I donâ... t yet know

exactly how many votes can be shifted by answer bots, but in a national election in the United States, the number might be in the low millions.

6. Shadowbanning

Recently, Trump complained that Twitter was preventing conservatives from reaching many of their followers on that platform through shadowbanning, the practice of quietly hiding a user's posts without the user knowing. The validity of Trump's specific accusation is arguable, but the fact remains that any platform on which people have followers or friends can be rigged in a way to suppress the views and influence of certain individuals without people knowing the suppression is taking place. Unfortunately, without aggressive monitoring systems in place, it's hard to know for sure when or even whether shadowbanning is occurring.

7. Programmed Virality and the Digital Bandwagon Effect

Big Tech companies would like us to believe that virality on platforms like YouTube or Instagram is a profoundly mysterious phenomenon, even while acknowledging that their platforms are populated by tens of millions of fake accounts that might affect virality.

In fact, there is an obvious situation in which virality is not mysterious at all, and that is when the tech companies themselves decide to shift high volumes of traffic in ways that suit their needs. And aren't they always doing this? Because Facebook's algorithms are secret, if an executive decided to bestow instant Instagram stardom on a pro-Elizabeth Warren college student, we would have no way of knowing that this was a deliberate act and no way of countering it.

The same can be said of the virality of YouTube videos and Twitter campaigns; they are inherently competitive—except when company employees or executives decide otherwise. Google has an especially powerful and subtle way of creating instant virality using a technique I've dubbed the Digital Bandwagon Effect. Because the popularity of websites drives them higher in search results, and because high-ranking search results increase the popularity of websites (SEME), Google has the ability to engineer a sudden explosion of interest in a candidate or cause with no one—perhaps even people at the companies themselves—having the slightest idea they've done so. In 2015, I published a mathematical model showing how neatly this can work.

8. The Facebook Effect

Because Facebook's ineptness and dishonesty have squeezed it into a digital doghouse from which it might never emerge, it gets its own precinct on my list.

In 2016, I published an article detailing five ways that Facebook could shift millions of votes without people knowing: biasing its trending box, biasing its center newsfeed, encouraging people to look for election-related material in its search bar (which it did that year!), sending out targeted register-to-vote reminders, and sending out targeted go-out-and-vote reminders.

I wrote that article before the news stories broke about Facebook's improper sharing of user data with multiple researchers and companies, not to mention the stories about how the company permitted fake news stories to proliferate on its platform during the critical days just before the November election—problems the company is now trying hard to mitigate. With the revelations mounting, on July 26, 2018, Facebook suffered the largest one-day drop in stock value of any company in history, and now it's facing a shareholder lawsuit and multiple fines and investigations in both the United States and the EU.

Facebook desperately needs new direction, which is why I recently called for Zuckerberg's resignation. The company, in my view, could benefit from the new perspectives that often come with new leadership.

9. Censorship

I am cheating here by labeling one category—censorship—because censorship—the selective and

biased suppression of informationâ... can be perpetrated in so many different ways.

Shadowbanning could be considered a type of censorship, for example, and in 2016, a Facebook whistleblower claimed he had been on a company team that was systematically removing conservative news stories from Facebookâ... s newsfeed. Now, because of Facebookâ... s carelessness with user data, the company is openly taking pride in rapidly shutting down accounts that appear to be Russia-connectedâ... even though company representatives sometimes acknowledge that they â... donâ... t have all the facts.â...

Meanwhile, Zuckerberg has crowed about his magnanimity in preserving the accounts of people who deny the Holocaust, never mentioning the fact that provocative content propels traffic that might make him richer. How would you know whether Facebook was selectively suppressing material that favored one candidate or political party? You wouldnâ... t. (For a detailed look at nine ways Google censors content, see my essay â... The New Censorship,â... published in 2016.)

10. The Digital Customization Effect (DCE)

Any marketer can tell you how important it is to know your customer. Now, think about that simple idea in a world in which Google has likely collected the equivalent of millions of Word pages of information about you. If you randomly display a banner ad on a web page, out of 10,000 people, only five are likely to click on it; thatâ... s the CTRâ... the â... clickthrough rateâ... (0.05 percent). But if you target your ad, displaying it only to people whose interests it matches, you can boost your CTR a hundredfold.

Thatâ... s why Google, Facebook, and others have become increasingly obsessed with customizing the information they show you: They want you to be happily and mindlessly clicking away on the content they show you.

In the research I conduct, my impact is always larger when I am able to customize information to suit peopleâ... s backgrounds. Because I know very little about the participants in my experiments, however, I am able to do so in only feeble ways, but the tech giants know everything about youâ... even things you donâ... t know about yourself. This tells me that the effect sizes I find in my experiments are probably too low. The impact that companies like Google are having on our lives is quite possibly much larger than I think it is. Perhaps that doesnâ... t scare you, but it sure scares me.

The Same Direction

OK, you say, so much for Epsteinâ... s list! What about those other shenanigans weâ... ve heard about: voter fraud (Trumpâ... s explanation for why he lost the popular vote), gerrymandering, rigged voting machines, targeted ads placed by Cambridge Analytica, votes cast over the internet, or, as I mentioned earlier, those millions of bots designed to shift opinions. What about hackers like Andr s Sep lveda, who spent nearly a decade using computer technology to rig elections in Latin America? What about all the ways new technologies make dirty tricks easier in elections? And what about those darn Russians, anyway?

To all that I say: kid stuff. Dirty tricks have been around since the first election was held millennia ago. But unlike the new manipulative tools controlled by Google and Facebook, the old tricks are competitiveâ... itâ... s your hacker versus my hacker, your bots versus my bots, your fake news stories versus my fake news storiesâ... and sometimes illegal, which is why Sep lvedaâ... s efforts failed many times and why Cambridge Analytica is dust.

â... Cyberwar,â... a new book by political scientist Kathleen Hall Jamieson, reminds us that targeted ads and fake news stories can indeed shift votes, but the numbers are necessarily small. Itâ... s hard to overwhelm your competitor when he or she can play the same games you are playing.

Now, take a look at my numbered list. The techniques Iâ... ve described can shift millions of votes without

peopleâ awareness, and because they are controlled by the platforms themselves, they are entirely noncompetitive. If Google or Facebook or Twitter wants to shift votes, there is no way to counteract their manipulations. In fact, at this writing, there is not even a credible way of detecting those manipulations.

And what if the tech giants are all leaning in the same political direction? What if the combined weight of their subtle and untraceable manipulative power favors one political party? If 150 million people vote this November in the United States, with 20 percent still undecided at this writing (thatâ 30 million people), I estimate that the combined weight of Big Tech manipulations could easily shift upwards of 12 million votes without anyone knowing. Thatâ enough votes to determine the outcomes of hundreds of close local, state, and congressional races throughout the country, which makes the free-and-fair election little more than an illusion.

Full disclosure: I happen to think that the political party currently in favor in Silicon Valley is, by a hair (so to speak), the superior party at the moment. But I also love America and democracy, and I believe that the free-and-fair election is the bedrock of our political system. I donâ t care how â rightâ these companies might be; lofty ends do not justify shady means, especially when those means are difficult to see and not well understood by either authorities or the public.

Can new regulations or laws save us from the extraordinary powers of manipulation the Big Tech companies now possess? Maybe, but our leaders seem to be especially regulation-shy these days, and I doubt, in any case, whether laws and regulations will ever be able to keep up with the new kinds of threats that new technologies will almost certainly pose in coming years.

I donâ t believe we are completely helpless, however. I think that one way to turn Facebook, Google, and the innovative technology companies that will succeed them, into responsible citizens is to set upsophisticated monitoring systems that detect, analyze, and archive what theyâ re showing peopleâ in effect, to fight technology with technology.

As I mentioned earlier, in 2016, I led a team that monitored search results on multiple search engines. That was a start, but we can do much better. These days, Iâ m working with business associates and academic colleagues on three continents to scale up systems to monitor a wide range of information the Big Tech companies are sharing with their usersâ even the spoken answers provided by personal assistants. Ultimately, a worldwide ecology of passive monitoring systems will make these companies accountable to the public, with information bias and online manipulation detectable in real time.

With November drawing near, there is obviously some urgency here. At this writing, itâ s not clear whether we will be fully operational in time to monitor the midterm elections, but weâ re determined to be ready for 2020.

Dr. Robert Epstein is a senior research psychologist at the American Institute for Behavioral Research and Technology in California.

The citizens demanded an FTC task force and they got one launched: The Federal Trade Commission will be launching a task force to monitor competition in the USâ s technology markets, FTC commissioners announced.

The task force will include current officials working in the agencyâ s Bureau of Competition in order to â enhance the Bureauâ s focus on technology-related sectors of the economy, including markets in which online platforms compete.â It will also include 17 staff attorneys who will be tasked with investigating anti-competitive behavior in the tech industry.

â The role of technology in the economy and in our lives grows more important every day,â FTC

Chairman Joe Simons said. "... As I... ve noted in the past, it makes sense for us to closely examine technology markets to ensure consumers benefit from free and fair competition....

"... Technology markets ... raise distinct challenges for antitrust enforcement..."

The new task force comes amid growing pressure for antitrust action against large tech companies like Facebook and Google. Earlier this month, it was reported that FTC officials have been looking to levy a multibillion-dollar fine on Facebook for repeatedly violating a privacy agreement the two bodies came to back in 2011. A coalition of advocacy groups argued that a fine would not be enough to incentivize Facebook to be more cautious with consumer data and asked the FTC to force the company spinoffs, Instagram and WhatsApp, back into their own entities once again. The groups argued that Facebook was too big for it to adequately care for user data for all three major apps.

Discussion over retroactive merger reviews that may result in companies divesting previously approved assets has been heating up over the last few months. The Democratic-led House Judiciary Committee has been reportedly beefing up its antitrust arm and hiring on big names like Lina Khan in the academic sphere.

"... Technology markets, which are rapidly evolving and touch so many other sectors of the economy, raise distinct challenges for antitrust enforcement..." said Bureau Director Bruce Hoffman. "... By centralizing our expertise and attention, the new task force will be able to focus on these markets exclusively ... ensuring they are operating pursuant to the antitrust laws, and taking action where they are not..."

Hoffman confirmed that the task force would look into consummated mergers, but could not name any investigations specifically. When it comes to remedies for problematic mergers, Hoffman said that firms could be "... broken out..." or could be forced to "... spin off..." previous acquisitions as new competitors in order to recreate the markets pre-merger.

Hoffman said that the task force would be working closely with the FTC's Consumer Protection Bureau as it relates to consumer privacy enforcement especially in cases in which these issues coalesce.

"... Our ongoing Hearings on Competition and Consumer Protection in the 21st Century are a crucial step to deepen our understanding of these markets and potential competitive issues. The Technology Task Force is the next step in that effort..." Simons said in the press release.

The Justice Department, which also has antitrust jurisdiction, is aware of the FTC's new task force, according to Hoffman, and both agencies will continue to work separately on this front.

An alliance of investigators, forensics experts, EU prosecution offices, FBI specialists, journalists, voters and public crowd-sourced volunteers have been campaigning for the arrest, prosecution, exposure and termination of each and every company, group and individual who engaged in these crimes and reprisal attacks on those who reported them.

It has already cost the oligarchs their power and their cash, ie:

<https://www.usnews.com/news/world/articles/2019-02-27/billionaire-list-shows-1t-hit-from-18-market-meltdown>

"WINNING", in this case, means punching the bad guys in the legal nose and teaching every other citizen how to do it too!

HOW TO WIPE OUT SILICON VALLEY'S CORRUPTION

Blogger/science fiction writer Cory Doctorow (also a former EFF staffer and activist) has just published [How to Destroy Surveillance Capitalism](https://onezero.medium.com/how-to-destroy-surveillance-capitalism-8135e6744d59) â€¦ a new book which he's publishing free online. Get it for free here:

<https://onezero.medium.com/how-to-destroy-surveillance-capitalism-8135e6744d59>

In a world swamped with misinformation and monopolies, Doctorow says he's knows what's missing from our proposed solutions: *If we're going to break Big Tech's death grip on our digital lives, we're [going to have to fight monopolies](#). That may sound pretty mundane and old-fashioned, something out of the New Deal era, while ending the use of automated behavioral modification feels like the plotline of a really cool cyberpunk novel... But trustbusters once strode the nation, brandishing law books, terrorizing robber barons, and shattering the illusion of monopolies' all-powerful grip on our society. The trustbusting era could not begin until we found the political will â€¦ until the people convinced politicians they'd have their backs when they went up against the richest, most powerful men in the world. Could we find that political will again...?*

That's the good news: With a little bit of work and a little bit of coalition building, we have more than enough political will to break up Big Tech and every other concentrated industry besides. First we take Facebook, then we take AT&T/WarnerMedia. But here's the bad news: Much of what we're doing to tame Big Tech instead of breaking up the big companies also forecloses on the possibility of breaking them up later... Allowing the platforms to grow to their present size has given them a dominance that is nearly insurmountable â€¦ deputizing them with public duties to redress the pathologies created by their size makes it virtually impossible to reduce that size. Lather, rinse, repeat: If the platforms don't get smaller, they will get larger, and as they get larger, they will create more problems, which will give rise to more public duties for the companies, which will make them bigger still.

We can work to fix the internet by breaking up Big Tech and depriving them of monopoly profits, or we can work to fix Big Tech by making them spend their monopoly profits on governance. But we can't do both. We have to choose between a vibrant, open internet or a dominated, monopolized internet commanded by Big Tech giants that we struggle with constantly to get them to behave themselves...

Big Tech wired together a planetary, species-wide nervous system that, with the proper reforms and course corrections, is capable of seeing us through the existential challenge of our species and planet. Now it's up to us to seize the means of computation, putting that electronic nervous system under democratic, accountable control.

With "free, fair, and open tech" we could then tackle our other urgent problems "from climate change to social change" â€¦ all with collective action, Doctorow argues. And "The internet is how we will recruit people to fight those fights, and how we will coordinate their labor.

"Tech is not a substitute for democratic accountability, the rule of law, fairness, or stability â€¦ but it's a means to achieve these things."

HOW TO WIPE OUT THE CORRUPT

You, 100% legally, will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they

appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

These are the **100%** legal steps, tactics, methodologies and procedures being used to end political corruption in America. Every citizen, in every nation, is encouraged to engage in these efforts:

- Draft versions of FBI "302 Reports", on each and every suspect in the associated list of targets, (in these related documents) are being authored and submitted to the FBI. We will teach you how to write and submit them too!
- These sites, and the associated evidence repositories, have been electronically made available to every FBI agent, Interpol Agent and law enforcement agency in the world.
- Criminal complaints and investigation demands are being authored and submitted to the DOJ, FTC, FEC, SEC, SSA, OSC, CIA, GAO, Congress and each Inspector General.
- We have forced over 100 agency heads to resign simply by providing them with copies of the Draft versions of FBI "302 Reports" on them that we intend to submit.
- We have produced an analysis chart template, with the help of Wikileaks, ICIJ, Sunshine Groups, Follow-the-Money and other database efforts. This chart depicts a graphic analysis of each suspects collusion's, bribes and compromised assets.
- We are teaching and providing forensics and criminal investigation training to the public so that the public is as resourced as any special agent. A vast number of "how to be a private investigator" books have been published on Amazon, E-Book sites and shared online.
- Confirming copies of all submitted reports are digitally carbon-copied to the press, the public and global "dead-man switch" torrent archives.
- We created a new series of public lawsuits, anti-trust lawsuits, RICO lawsuits and class-action lawsuits by the public and against the targets. These lawsuits have now placed permanent public transparency on record and changed the law to help the public and stop the crooks.
- We have exposed their Silicon Valley Bay Area, New York And Florida executive sex trafficking rings.
- Billions of members of the public are monitoring the suspects via public database information and public shared observation of their activities, locations, owner-ships and transactions via each member of the public's personal computers.
- We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

- We opened our own private investigator and crowd-sourced investigations into the following:

- - Every stock market account they or their family owns
- - Every judge that has taken campaign finance and stock market bribes from the crooks
- - Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- - Every flight manifest they appeared on
- - Every bank account they have ever held
- - Every lawsuit, divorce record and police record they have ever appeared in
- - Every trust fund they or their family holds
- - Every shell corporation they, or their family holds
- - Every person named in the Epstein Pedo book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
- - Every item in the Swiss Leaks that cross connects to their holdings
- - Every item in the Panama Papers Leaks that cross connects to their holdings
- - Every item in the WikiLeaks that cross connects to their holdings
- - Every item in the Snowden Leaks that cross connects to their holdings
- - Every sex trafficking incident that connects to each of them alone, and in groups
- - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
- - Every use of Mossack Fonseca and related crooked CPA's, Banks and Tech Law Firms they engaged in
- - Every item in the Quest Leaks that cross connects to their holdings
- - Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- - Every sex service that their credit card payments every connect too
- - Every person leaving or entering locations where they sleep
- - Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. Study the writings and teachings of Luke Bencie and you will be at the top of the game.

[HOW TO WORK WITH BRAIN-DEAD, NAIVE, EASILY MASS MANIPULATED MILLENNIAL'S](#)

[I Walk Among Liberals.](#) ([whatever](#))

[llliillliilll](#)

Where I work, thereâ... s a need to know popular culture, books and popular electronics. Itâ... s also a hive for numales, soyboys, blue haired warnings with weights that should be impossible, tattooed up women trying to compensate for bad childhoods, addicts, boomers thinking the world revolves around them and more. Indeed the wonderful world of retail.

I canâ... t stand my coworkers. I blend in well enough and they all know not to politics with me as Iâ... ve readily said times almost up on this planet and that we live in clown world. Here are some absurdities Iâ... ve heard.

They all love Black Panther. They all thought Marvel Endgame 2 or whatever was fantastic. They love Funko pops. They buy video games with no interest in playing them. Just to show them off. They love Netflix and the original programming.

Whatâ... s interesting to me is they are quick to judge others. Quick to cast out people they donâ... t feel fit. Easy to manipulate. They all move as a flock.

My goal is to disconnect people. Itâ... s hard to do when they will realize that all pop culture, all they hold dear, is nothing but a facade meant for control. Meant to placate.

I like to play dumb and ask normies rhetorical questions about certain political / pop-culture topics. When they regurgitate the generally predicable leftist response, parley with more questions that makes them "discover" the truth for them-self. Try and avoid combative arguments and telling people "how it is". Most people don't like being told what to think and that is why pop-culture can be so attractive since it's easy to like while being naive. Also, I don't think when you say "that all pop culture, all they hold dear, is nothing but a facade meant for control" is entirely accurate. Most pop-culture is has been VERY heavily injected with satanism meant not to control but to dilute, corrupt and eventually destroy (It's been pretty successful) modern society.

Try and avoid combative arguments and telling people "how it is". Most people don't like being told what to think and that is why pop-culture can be so attractive since it's easy to like while being naive.

This is an excellent strategy. There really needs to be a subverse for detailed techniques on how to redpill people.

I've had success at parties demonstrating that the means to earn a living is a gesture you do with your body, like a prostitute, a slave, or a worker. Because it costs time and effort to force you to do things, and they can't steal your work, they steal it the moment it becomes fungible, when it's converted to currency. If you can't own my body, you can't own what I do with my body, and you can't own the fruits of what I do with my body. Yet they can't, not because they deserve it, but because they stole it.

I essentially ask people, at what point exactly is my body not mine?

- [link](#)
- [parent](#)

[\[â..._ShakklezthaKlown](#) 2 points (+2|-0) ago

Yeah. We all do this ffs. Can we stop regurgitating the same fucking topics every day? Jesus fuck.

- [parent](#)

[\[â..._bbvious-throwaway-](#) 6 points (+6|-0) ago

Play dumb. Say that someone said something to you and it really bothers you and try to get their opinion on it. Then make them justify to your why the strawman argument you created is wrong. For example, "some idiot actually asked me how many people I thought should be allowed into the United States and I said all of them.

He then laughed at me and told me that there are over 5 billion people living in poverty, and how many did I think the United States could handle. It does seem like a lot but I couldn't answer him as to how many should be allowed to come. I'm going to run into him tomorrow, what should I tell him?" Something like that but well thought out. Get them to defend arguments that have no logical outcome.

- [link](#)
- [parent](#)

[â... [Diom3Mind](#) 7 points (+7|-0) ago (edited ago)

Your on the right path but you have a few flaws that I need to point out. First, possibly most important, is that you engaged the person based on the premise that something really bothers you. This places the objective at helping your emotional response and NOT on red-pilling your target. Think of it like a child asking something. The perception of nativity is critical. If you are red-pilling someone it is because they have wrapped themselves in comfortable lies, they live in an illogical world. You are getting them to peel the lies off **them-self** to expose their own stupidity. Again, i'll say it, the perception of nativity is critical, you should be amazed and intrigued by their truthful answers yet still be able to inquire your way back to the truth when they attempt to shovel their lies onto you. Let me give you an example with my last point. Democrats want open borders so your red-pilling would have stopped at "all of them.". So probably would of worked better if you said something like "Man I don't know what the big deal with the boarder is, there's only like....actually I don't know how many people live south of the border, do you?" You get your answer you move to "Well geewiz golly, that's a big number, I guess I could live with 100 times more people everywhere in america but do you think that's good for the environment?" or being forced to leave their own country or whatever these self righteous retards care about. If they lie to you. Don't call them on their bullshit, that's combative. Instead act like your mind is blow by their answer, so blown in fact that it's almost unbelievable. ex: "There's only ~250M south of the border." "WHAAAAT that's crazy! Man I thought that place was HUGE! That's waaay different then the 160billion I was thinking....where did you find that out?" The more they feel like they are the ones educating the better. You get the idea.

Black Panther was great, IMO.

- Spearchucking niggers will always be hilarious, even if they're chucking futuristic laser spears made from space metal.
- Unintentionally preaching the value of a racially homogeneous society.
- Unintentionally showing that isolationism really does work in the best interests of your own people
- Best line of the movie: *"If you let the refugees in, they bring their problems with them."*
- Killmonger was your textbook retarded nigger, showing how niggers will *always* fuck everything up, even if you hand them the world on a vibranium platter.
- Shows that traditions and culture are in place for a reason, and once you lose that, you stand to lose *everything*.
- One of the characters acts like a *literal* monkey, grunting like a fucking gorilla whenever someone tries to speak. In the comics, they actually named him "Man-Ape." I don't care what you say, that's fucking *hilarious*.
- Provided no end of hilarity with clips of niggers chimping out in theaters and acting like Wakanda is a real place, despite it being something they'll never be able to achieve.

And they get away with all these subtle red pills because it's niggers doing it. If it were an isolated nation of whypipo, it would have been considered the most racist film ever made. I thoroughly enjoy laughing at the hypocrisy of all the niggers and whatnot who think it's some "meaningful cultural experience" instead of what it really is; a fun action movie that (unintentionally) drops a bunch of red pills, and was a great way to kill a couple hours.

Whatâ... s interesting to me is they are quick to judge others. Quick to cast out people they donâ... t feel fit. Easy to manipulate. They all move as a flock.

The only way out of this death cycle is if they want out. Being a lefty is exceedingly easy and most people are simple enough that it's all they can handle. The quickest way to force someone out of it is if they are kicked out for having one wrong opinion. So the best thing you can do for them is plant very very basic simple seeds of doubt about anything left wing.

Something they will eventually ask someone else about in confidence and find themselves on their ass. The left's greatest weakness is how quick they are to judge and condemn others. Use that against them.

It's the best you can do.

- [link](#)

The easiest way to disconnect them is to manipulate the mob into targeting them. When they realize how quick their fellows are to turn on them, it forces personal change and responsibility.

- [link](#)

[\[â... \]FightingTheDarkArts](#) 2 points (+2|-0) ago

It's literally junior high school except you can't beat the fuck out of anyone or even tell anyone to 'fuck off.' I will say that at least in retail you stay busy(hopefully). Sounds like you are mastering the art of swimming with the shit weasels well enough. That should be your goal, not changing anyone.

The way and only way I've reached anyone is to lift, date be as good of a dad as I can be, make all the money I can and just live by example. If they want to have a few beers and shoot at a few targets in the archery group, that's usually a good way to start them out. If one seems decent then get them lifting with you. Don't show your hand. Don't let them know anything. You can drop some dimes after you've hung out with someone or built up some trust but be very careful.

Don't worry about 'saving' any of these people. Most of them are lost in every fucking way imaginable and their lives will only get worse as they get older and they will only get more self destructive and outwardly destructive as they get older. If you find one or two you can trust to be decent references or grab a beer with then that's something nice but forget this idea of converting any of these assholes. You'll just end up making work life tough on yourself and it will cause financial difficulties. These people live to get into cat fights.

Facebook does A/B testing to make their platform more and more addictive and insidious over time. Media kikes do studies to determine what the human subconscious responds to and how to bypass the rational part of the brain to appeal to the more primal part. It's all designed to prey on weaknesses of the human psyche and corrupt their thought patterns to align with (((special interests))).

I occasionally watch clips just to remind myself why I don't watch this kind of filth, but sitting through hours of it is bound to turn your brain to mush.

The only solution is EndlÃ¶sung der Judenfrage.

[\[â... Tubesbestnoob\]](#) 1 points (+1|-0) ago (edited ago)

I find with those types, speaking about history in an educated fashion will trigger submissive listening tendencies. Demonstrating expertise on Western art, architecture, literature, and classical music lulls them into a state of deference to a knowledgeable speaker likely due to the college indoctrination they received.

It serves as a soft red pill. They end up learning to admire their history and reflect on the greatness of Western civ by someone who isn't trying to shovel white male hate down their throats.

[\[â... \]Intrixina](#) 0 points (+0|-0) ago (edited ago)

What an absolute shit show. Watch your arse.

The only way to deal with Cluster B's, especially if there are a lot of them - is to get the fuck out of there. If you try to engage, or even to sidestep things - eventually you will face a moment of weakness (be that something has happened in your outside-work life, or similar) and they will prey on you like a shark does when there's blood in the water.

The alternative is to go all Socratic on them and lead them down the pink-red-crimson pill path - though this really only works when its 1v1 or maybe 2v1. The idea is for them to redpill themselves, but with leftists you need to take tiny steps to do so, otherwise they get the 404-error deer in the headlights blank stare, or they will shut the conversation down entirely.

- [link](#)

[\[â... \]Adminstrater](#) 0 points (+0|-0) ago

It's hard to get people to ween themselves off their addicting to pop culture. But it is possible, all you have to do is pose the right questions that make people curious enough to dig and find something they didn't expect, which causes them to dig some more... etc...

It really is a vicious cycle... I will let you know when I stop digging.

- [link](#)

[\[â... \]GeneralDisposition](#) 0 points (+0|-0) ago

Imagine a world where people are one, united in their beliefs, there is no pain, no strong desires. This world functions perfectly, every day is the same as the last. This is the focus of our episode tonight called, the walking liberal. On.. The twilight zone.

[\[â... Maersk\]](#) 0 points (+0|-0) ago

I live in a sanctuary area so I get it. But, you are all over the place when it comes to your thoughts. Boomers and Turd Blossoms are definitely the problem. Telling a boomer that agrees with you that boomers are the problem has been my new thing. They will repeat it

- [link](#)

[\[â... green man\]](#) 0 points (+0|-0) ago

I love Black Panther as well, not for the reasons they do though. A bunch of grunting niggers wielding spears is fucking hilarious to me.

- [link](#)

HOW WE ARE ENDING CORRUPTION IN AMERICA - THE PROCESS

- Every member of the public should join in these citizen sleuth and crowd-sourced anti-corruption actions.

.

This is what they did to us simply because we reported a crime to federal law enforcement....so we watched, we learned, we waited and now we have struck back! If it was legal for them to try to execute us, our lives and our brands this way, then it must be legal for us to do it right back to every single one of them for the rest of their lives. There is now nothing they can do to stop what is coming. Even if we are dead, a billion others have already taken our place!

These are the **100%** legal steps, tactics, methodologies and procedures being used to end political corruption in America. Every citizen, in every nation, is encouraged to engage in these efforts:

- Draft versions of FBI "302 Reports", on each and every suspect in the associated list of targets, (in these related documents) are being authored and submitted to the FBI. We will teach you how to write and submit them too!

- These sites, and the associated evidence repositories, have been electronically made available to every FBI agent, Interpol Agent and law enforcement agency in the world.
- Criminal complaints and investigation demands are being authored and submitted to the DOJ, FTC, FEC, SEC, SSA, OSC, CIA, GAO, Congress and each Inspector General.
- We have forced over 100 agency heads to resign simply by providing them with copies of the Draft versions of FBI "302 Reports" on them that we intend to submit.
- We have produced an analysis chart template, with the help of Wikileaks, ICIJ, Sunshine Groups, Follow-the-Money and other database efforts. This chart depicts a graphic analysis of each suspects collusion's, bribes and compromised assets.
- We are teaching and providing forensics and criminal investigation training to the public so that the public is as resourced as any special agent. A vast number of "how to be a private investigator" books have been published on Amazon, E-Book sites and shared online.
- Confirming copies of all submitted reports are digitally carbon-copied to the press, the public and global "dead-man switch" torrent archives.
- We created a new series of public lawsuits, anti-trust lawsuits, RICO lawsuits and class-action lawsuits by the public and against the targets. These lawsuits have now placed permanent public transparency on record and changed the law to help the public and stop the crooks.
- We have exposed their Silicon Valley Bay Area, New York And Florida executive sex trafficking rings.
- Billions of members of the public are monitoring the suspects via public database information and public shared observation of their activities, locations, owner-ships and transactions via each member of the public's personal computers.
- We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.
- We opened our own private investigator and crowd-sourced investigations into the following:
 - - Every stock market account they or their family owns
 - - Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
 - - Every flight manifest they appeared on
 - - Every bank account they have ever held
 - - Every lawsuit, divorce record and police record they have ever appeared in
 - - Every trust fund they or their family holds
 - - Every shell corporation they, or their family holds
 - - Every person named in the Epstein Pedo book: <https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
 - - Every item in the Swiss Leaks that cross connects to their holdings
 - - Every item in the Panama Papers Leaks that cross connects to their holdings
 - - Every item in the WikiLeaks that cross connects to their holdings
 - - Every item in the Snowden Leaks that cross connects to their holdings
 - - Every sex trafficking incident that connects to each of them alone, and in groups
 - - Every financial transaction between any of the parties on the master list and the character

assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Recor, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.

- - Every use of Mossack Fonseca and related crooked CPA's, Banks and Tech Law Firms they engaged in
- - Every item in the Quest Leaks that cross connects to their holdings
- - Every tactical deployment, by a campaign financier, of the tactics listed in this manual: <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- - Every sex service that their credit card payments every connect too
- - Every person leaving or entering locations where they sleep
- - Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

The suspects will never get away with these crimes and these actions and investigations will be conducted on a permanent basis and passed from person-to-person and generation-to-generation.

Every new candidate for office suspected of similar bribes and collusion's will undergo the same circumspection.

We are not a club or membership group. You are us. If you are reading this, just start doing the things listed here and do them as professionally as you can.

We are freely providing the tools, technologies and mass publishing systems, to the billions of members of the public who would like to be involved in anti-corruption actions. All of the technology is open-source.

HOW OUR BAY AREA FBI AGENT ALMOST FOILED THE STEELE DOSSIER SCAM

FBI Supervisory Special Agent Joseph Pientka Testified The Review of Chris Steele was â... Turned Offâ... By FBI Director of Counter Intel Bill Priestap

Posted on [January 18, 2021](#) by [Sundance](#)

Within recently released [transcripts of documents](#) by Senate Judiciary Chairman Lindsey Graham there is a [deposition](#) by FBI Supervisory Special Agent 1, **Joseph Pientka**.

SSA Pientka has always been a little bit of an enigma because his name, exclusively, has been redacted from every official government document within the full investigation of DOJ and FBI misconduct. Even in tangential court documents (Flynn), related to Joseph Pientka and Peter Strzokâ... s investigative collaboration, Pientka is **ALWAYS redacted** from everything. The system in DC essentially â... ghostedâ... him in all things. Now, the nature of that motive is surfacing.

If the [recent Senate transcripts](#) are an indication of SSA Pientkaâ... s side of the stories, it would appear the testimony and truthfulness of Pientkaâ... s statements would be adverse to the interests of EVERYONE who framed the Trump-Russia narrative.

Within [his testimony](#); and if we accept it is likely consistent with internal investigative statements to the IG and others; it appears Pientka realized the activity of the FBI was intentionally taken to hide the truth of how intelligence was weaponized against the Trump administration.

Joseph Pientka wanted to investigate Chris Steele in November of 2016 because he knew something was sketchy. Following the use of Chris Steele to get the FISA warrant on Carter Page -and by extension the Trump administration- Pientka wanted to explore the motives of Steele and the contacts he was using to push his narrative. Thatâ... s where FBI Director of Counterintelligence, Bill Priestap, steps in and stops Pientka.

â... I recognized the significance of his reporting, the use in a FISA application. I had questions about our intel validation was ongoing in the Counterintelligence Division, and all of that contributed to my professional disagreement.â...

[â...!] â... My request was to the FBI director of intelligence for them to do what is considered an enhanced validation review, something outside and independent of the Counterintelligence Division.â...

Pientka said that he was told that the enhanced review was â... turned offâ... at Priestapâ... s direction, which led him to request a transfer off of the Crossfire Hurricane team.

â... I had a professional disagreement with stopping the enhanced validation review,â... Pientka said.

â... This was a concern that you were so passionate about that it made you terminate your association with the case, the team, and go back to the Washington Field Office?â... a Senate staffer asked Pientka.

â... It was,â... he replied. [\[Daily Caller, Chuck Ross\]](#)

Pientka wanted to explore the motives of Steele and the contacts he was using to push his narrative. FBI Director of Counterintelligence, Bill Priestap, steps-in and stops Pientka.

Bill Priestap did not want SSA Pientka to do a deep dive on Steeleâ... s objectives, and as a result Pientka asked to leave the Trump-Russia investigation. Quite simply Pientka didnâ... t want anything to do with itâ...! or what the FBI â... Crossfire Hurricaneâ... team was doing.

.

Supervisory Special Agent **Joseph Pientka III** was first identified by Senator Chuck Grassley in May of 2018 as the second FBI agent involved in the 2017 interview of Lt. General Michael Flynn.

Frustrated by the FBI stonewalling his Senate inquiry, Chairman Grassley dropped the revelation publicly on May 11th, 2018, in [a letter to the FBI](#).

[â...!] the Committeeâ... s oversight interest in the underlying documents requested more than a year ago now outweighs any legitimate executive branch interest in withholding it. So too does the Committeeâ... s interest in learning the FBI agentsâ... actual assessments of their interview of Lt. Gen. Flynn, particularly given the apparent contradiction between what then Directory Comey told us in March 2017 and what he now claims.

[â...!] In addition, please make **Special Agent Joe Pientka available for a transcribed interview** with Committee staff no later than one week following the production of the requested documentsâ...! ([link](#))

The FBI never produced Supervisory Special Agent (SSA-1) Joe Pientka for Chairman Grassleyâ... s committee, and the conflict between the Senate Judiciary Committee and the FBI was never reconciled. (The DOJ/FBI made it to the safety of the mid-term election.)

Additionally, every single document containing information about the investigative activity of FBI agent Pientka has kept his name redacted. Not a single DOJ/FBI document has ever included his name.

However, around two months after Grassley outed his identity; we discover from the Inspector General that

the DOJ-NSD (National Security Division) admitted to the FISA court that Agent Pientka was significantly less than forthcoming with â... factual omissionsâ... in the Title-1 surveillance application he assembled against Carter Page.

While the IG report doesnâ... t name SSA-1 as Joseph Pientka, all documentary evidence supported that Pientka was indeed SSA-1. [This was also confirmed by Fox News reporter Gregg Jarrett writing an article about SSA-1 Pientka, and by Jarrett being contacted by the FBI as soon as he outed the agent.]

In addition to the Flynn interview, the Inspector General Report notes the importance of SSA-1 as he pertains to the FISA application.

FBI Supervisory Agent Pientkaâ... s lies and omissions to the FISC were material â... and made under penalty of perjury. He knew the dossier was fraudulent. He knew about witness denials. In short, Pientka was willfully blind to the court about the FISA applicationâ... s accuracy.

After the FISA Court was notified in about the issues (July 2018), and before the IG report outlining the conduct of SSA1 was complete (Dec. 9, 2019)â...! sometime in mid 2019 Joseph Pientka was promoted by FBI Director Christopher Wray and transferred to the San Francisco FBI Field Office

Pientka bailed out and went to work in the San Francisco Field Office. The DC insiders then worked to keep Pientka far away, and put into place a network operation to keep him hidden. Even his arrival at the San Francisco Field Office was scrubbed [after CTH noted](#) there was a brief mention of his new position: **BEFORE:**

AFTER:

If the current statements made by Pientka had been made public, there is a strong likelihood the entire Trump-Russia narrative would have collapsed.

Throughout 2017, 2018, 2019 and 2020, SSA1 Pientka was in position to bring a lot of sunlight to the corrupt intents of the DOJ, FBI and the Robert Mueller team.

It now appears that after Joseph Pientka realized the FISA application was fraudulent; and after he notified the FBI and Mueller Team he was not willing to go along with the fraud and corrupt intent; he was ostracized and shipped to San Francisco.

From the testimony he gave on Tuesday August 27, 2020. **He was still thereâ€¦!**

Just like FBI Special Agent in Charge, Brian Dugan (ie. the James Wolfe investigation), there are FBI agents who could destroy the network of corruption that was taking place within the DOJ and FBI from 2015 (Strzok et al) through 2019 (Mueller et al). This is not up for debate.

Keep in mind, as a personal commitment to the truth; and out of an abundance of granting the benefit of the doubt to the Department of Justice; I have personally walked through lead John Durham investigator, William Aldenberg, on the location of each of these potential whistle-blowers and [the evidence](#) they possess.

Both FBI SSA Joseph Pientka and FBI SSIC Brian Dugan hold information that is ultimately connected to the larger operationsâ€¦! which also touches deeply into the Senate Intelligence Committee motive and the Mueller probe motive. The information is siloed and segmented, but CTH pulled each part out of the individual compartments and [handed it to William Aldenberg](#) (John Durhamâ€™s lead investigator).

To date, *nothing has been done*â€¦!

We reported the crimes to David Johnson and Patricia Rich, who used to run the San Francisco FBI office. Now we report to John Bennett and Craig Fair.

HOW TO WIPE OUT THE CORRUPT

You, 100% legally, will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

These are the **100%** legal steps, tactics, methodologies and procedures being used to end political corruption in America. Every citizen, in every nation, is encouraged to engage in these efforts:

- Draft versions of FBI "302 Reports", on each and every suspect in the associated list of targets, (in these related documents) are being authored and submitted to the FBI. We will teach you how to write and submit them too!
- These sites, and the associated evidence repositories, have been electronically made available to every FBI agent, Interpol Agent and law enforcement agency in the world.

Snapchat doesnâ€™t just make messages disappear after a period of time. It also does the same to GitHub repositories â€¦ especially when they contain the companyâ€™s proprietary source code.

So, what happened? Well, letâ€™s start from the beginning. A GitHub with [the handle i5xx](#), believed to be from the village of Tando Bago in Pakistanâ€™s southeastern Sindh province, created a GitHub repository [called Source-Snapchat](#).

[Hard Fork?](#)

[Hard Fork.](#)

[HARD FORK](#)

At the time of writing, the repo has been removed by GitHub following [a DMCA request from Snap Inc](#) (weâ€™ll get to that later), so we canâ€™t take a closer look and see what it contains. That said, there are a few clues to its contents.

What you see when you visit the repo.

The repository has a description of “Source Code for SnapChat,” and is written in Apple’s Objective-C programming language. This strongly suggests that the repo contained part or whole of the company’s iOS application, although there’s no way we can know for certain. It could just as easily be a minor component to the service, or a separate project from the company.

There are two other clues to the identity of the person who published the leaked Snapchat code.

According to the i5xx GitHub account, his name is Khaled Alshehri. This should be taken with a grain of salt, however. For starters, there’s nothing stopping the user from listing a fake name. Furthermore, according to several people TNW has spoken to, the surname “Alshehri” isn’t especially common in Pakistan.

The profile also links to an online business in Saudi Arabia offering a mixed bag of tech services, from security scanning and iCloud removal, to software development and the sale of iTunes giftcards.

Four days ago, GitHub published a DMCA [takedown request from Snap Inc.](#), although itâs likely the request was filed much earlier. GitHub, like many other tech giants [including Google](#), publishes information on DMCA takedown requests from the perspective of transparency.

The language used in the DMCA request is fascinating, and conveys a sense of genuine panic in the organization, which in turn suggests that the contents of the repository are legitimate. Rather than using

formal legal terminology, the request is predominantly written in all-caps.

To the question â... *Please provide a detailed description of the original copyrighted work that has allegedly been infringed. If possible, include a URL to where it is posted online*,â... the GitHub representative wrote:

â... SNAPCHAT SOURCE CODE. IT WAS LEAKED AND A USER HAS PUT IT IN THIS GITHUB REPO. THERE IS NO URL TO POINT TO BECAUSE SNAP INC. DOESNâ... T PUBLISH IT PUBLICLY.â...

The most fascinating part of this saga is that the leak doesnâ... t appear to be malicious, but rather comes from a researcher who found something, but wasnâ... t able to communicate his findings to the company.

According to several posts on [a Twitter account](#) believed to belong to i5xx, the researcher tried to contact SnapChat, but was unsuccessful.

â... The problem we tried to communicate with you but did not succeed In that we decided [sic] Deploy source code,â... wrote i5xx.

The account also threatened to re-upload the source code. â... I will post it again until you reply :),â... he said.

.

[ø@ø\\$ù ø-ø\\$ù ø'ù ø±ù #ø\\$ù ø\\$ø³ø·ù ø±ø©@i5aaaald](#)

The problem we tried to communicate with you but did not succeed
In that we decided
Deploy source code
I will post it again until you reply :) [@snapchatsupport @Snapchat](#)
<https://twitter.com/uf8888/status/999065097279590405?s=21> â...!

[â... ù ù ø'ù' ø\\$ù ù'ø\\$ø¶ù .@Uf8888](#)

[Dear @snapchatsupport @Snapchat I know this should be in http://hackerone.com but my friend doesn't know that, so when I look into this it's look like a bug, and I think he deserves some rewards for that https://twitter.com/i5aaaald/status/999042272560852994](#)

[12:08 AM - Aug 4, 2018](#)

- ♦ [6](#)
- ♦ [See Ø®Ø§Ù Ø- Ø§Ù Ø`Ù Ø±Ù #Ø§Ù Ø§Ø³Ø·Ù Ø±Ø©'s other Tweets](#)

[Twitter Ads info and privacy](#)

For what it's worth, it's pretty easy for security researchers to get in touch with Snap Inc. The company has [an active account on HackerOne](#), where it runs a bug bounty program, and is extremely responsive.

According to HackerOne's official statistics, the site replies to initial reports in 12 hours, and has paid out over \$220,000 in bounties.

Snap Inc explicitly says it rewards researchers based on severity. I'd imagine that the company's internal infosec team would regard leaked source code as a fairly critical security problem.

The other thing that's especially interesting is that it seems as though the source code remained online for a long period of time before it was removed. I5xx's commit history shows eighteen commits, all occurring between May 23 and 24, and pertaining to the same repository.

As I mentioned, GitHub published Snap's takedown request four days ago. That suggests that the repository was potentially online for over two months.

TNW has reached out to Snap for comment. If we hear back from the company, we'll update this post.

Beware of 'Pretend Lawyers' who want to help you sue Google, or the DNC but, in fact, actually covertly work for Google and the DNC!

By Amy Lawson

Ever since the Harvey Weinstein sex abuse case went public, the bigger part of the revelations has turned out to be that Weinstein availed himself of services which act as corporate or legal â... honeytrapsâ... .

These groups: Stratfor, In-Q-Tel, Black Cube, Sandline, and an army of law firms; send in lawyers or â... reportersâ... who pretend that they want to help you. In fact, the lawyers or â... helpersâ... are actually agents of Google and the DNC trying to delay you and trip you up. Weinstein had these facade players pretend to be lawyers, reporters or others who wanted to help the victims when, in fact, they wanted to destroy them. The DNC had their lawyers at Perkins Coie pay off the dirty tricks agents over and over. They did it to get billions of dollars of Department of Energy, CIA, DOT and other agency grants, loans and contracts in their pockets.

Numerous reporters have received tips that a legal group in San Rafael, California who are suing Google are actually DNC and Google advocates.

The Weinstein case exposed the fact that fake lawyers and fake reporter shills is a multi-billion dollar business. Weinstein paid millions for his dirty tricks. Law firm Perkins Coie paid GPS millions to hunt-and-kill for the DNC.

The Legal Honeytrap is quite insidious. Lawyers place themselves in the path of those harmed by Google, DNC, Facebook or other lefty campaign politicians. They acquire the hard-earned cash of their victims as a retainer, while seeking to delay, damage, intelligence gather and misdirect those victims in order to protect the Silicon Valley Cartel.

Google and the modern DNC is largely comprised of frat boy culture elitists. They were trained in their frat house and sorority games that dirty tricks are the expected way to get ahead in business. Almost 90% of those arrested or indicted for bribery, tax evasion, high-end sex trafficking, money laundering and other corporate crimes, were leaders in the college Greek system. Dirty tricks is a way of life to these folks.

The old saw of â... *if it sounds too good to be true*â... must be followed with extreme care when you cross swords with the Silicon Valley oligarchs. Big law firms (MoFo, Wilson Sonsini, Perkins Coi, Latham Watkins...and that ilk) have been caught in these tactics but smaller lawyers and sole practitioners are the more voluminous in this special field of fake legal services.

If you never met the lawyer in person and if you canâ... t track the social media posts, campaign contributions and clients for the last 10 years, you should be suspicious of lawyers who â... offer to help youâ... fight Silicon Valley. They could be working for the other side.

The San Francisco Bar Association is thought to be conflicted out when an individual goes to them looking for a lawyer to sue for Silicon Valley corruption. Most of the cash that the The San Francisco Bar Association and California Bar Association members put in their pockets comes from the very companies that victims are looking to sue. A number of victims have complained that â... *...filing a lawyer request with SFBA or CALBAR to sue the Silicon Valley oligarchs is like strapping steaks to your thighs and jumping in a shark tank...â...* You will just be asking to get yourself black-listed and targeted by the Bay Area lawyers who feed at the Silicon Valley Cartelâ... s trough.

While the legal industry requires lawyers to engage in a â... conflict-of-interestâ... check; those who run

legal honeytraps will simply lie about the conflicts check.

Silicon Valley's impunity lies in the fact that Silicon Valley has hired every law firm who might ever go after Silicon Valley. They hired them to stop SEC, FTC and related anti-trust hearings. They won't hesitate to order that small victims either get black-listed or legal honey-trapped.

You could get your life savings drained by these fake front lawyers who want to harm you, and not help you, on orders from Google, Debbie Wasserman or Mark Zuckerberg.

Never trust a helper who wants to help you sue a Silicon Valley oligarch. They could be one of the Pied Pipers of Google.

More ... pretend lawyers, legal honeytraps, GPS Fusion, Google, Google dirty tricks, legal co-opts, political pied piper, Fusion GPS, Uranium 1, Uranium One, Goldman Sachs, Larry Page, Eric Schmidt

AP/Kin Cheung These protesters have a message for mainland Chinese tourists.

YOU'VE GOT MAIL

Hong Kongâ s protesters put AirDrop to ingenious use to breach Chinaâ s Firewall

By [Mary Hui](#)

Airdrops have long been a useful tactic to get behind enemy lines.

During World War I, Allied forces used [aircraft and balloons to drop propaganda leaflets](#) over German-occupied countries to combat the enemyâ s psychological warfare. [South Korean activists](#) have also long used balloons to deliver information critical of the North Korean regime to those on the other side of the demilitarized zone.

Now, Hong Kongâ s protesters are using AirDrop, a [file-sharing feature](#) that allows Apple devices to send photos and videos over Bluetooth and Wi-Fi, to breach Chinaâ s Great Firewall in order to spread information to mainland Chinese visitors in the city. Leaving AirDrop settings open allows anyone in the vicinity to send files to your device.

A protest held yesterday (July 7) in Tsim Sha Tsui, one of Hong Kongâ s most popular tourist districts, had a clear aim: to tell people from mainland China about the cityâ s opposition to a [hated extradition bill](#), which has [mobilized millions](#) of people over the past several weeks to multiple protests and presented the [most critical challenge](#) to the local government in decades.

But news of the protest has been heavily censored in mainland China, with any mention of the mass movement wiped off the Chinese internet. Even songs alluding to the city [have been scrubbed](#). As such, many Chinese tourists were visibly confused by the large march, which organizers say drew [an estimated 230,000 people](#).

Hong Kongâ s protesters have therefore turned to Appleâ s AirDrop feature to get their message across to their mainland Chinese compatriots. That the messages are written in simplified Chineseâ Hong Kongers use traditional Chineseâ confirm that the intended audience is Chinese tourists.

<https://twitter.com/aliceysu/status/1147767525318381568>

â Did you know? Over the past month, Hong Kong has seen three massive rallies, with as many as 2 million people taking to the streets,â read one such AirDropped poster. â Donâ t wait until [freedom] is gone to regret its loss. Freedom isnâ t god-given; it is fought for by the people.â

<https://twitter.com/ariahychen/status/1147798777924747266>

â Maybe youâ ve heard that Hong Kongers are constantly marching, 1 to 2 million people at a time, to oppose the extradition bill,â read another poster. â We wish you a pleasant journey. Feel the freedom of assembly along the way. This space for freedom is the reason why we fight.â [Other AirDropped files](#) explained why there were no â foreign forcesâ behind Hong Kongâ s protests, and how Chinaâ s authoritarian system had led to the Tiananmen massacre of 1989.

Some AirDropped files even contained what looked like QR codes linked to Alipay and WeChat Pay, two major mobile payments systems used in China. People who scanned the codes thinking they would get free money instead received information on the dangers of the extradition law.

<https://twitter.com/suelinwong/status/1147874262214012928>

Protesters also came up with other creative ways to share their anti-extradition, pro-democracy messages with mainland Chinese tourists. They held up placards that drew a direct link between [protests in Wuhan](#)... where thousands have been protesting against a waste incinerator plant but news of which has been [heavily censored](#)... and the protests in Hong Kong. They also handed out physical leaflets to tourists, informing them of [the state of censorship](#) in mainland China and urging them to join the fight for freedom.

How I Make New Laws For America..And YOU Can To!

My past public-interest lawsuits and Congressional efforts have set numerous historical federal court legal precedents, to help citizens shut down political corruption, and created new policy, from [THE JOBS ACT CROWDFUNDING ALLOWANCE](#), to [THE STOCK ACT](#) to [improve the lives of average citizens](#).

You can do it too, from the comfort of your living room.

Here is how:

You are taught, in school, that laws are made like this:

"The U.S. Congress makes federal laws for the nation. Congress has two legislative bodies or branches: the U.S. Senate and the U.S. House of Representatives. Here are eight steps in making a law:

- 1. Laws begin as an idea of a Senator or Representative. He/she produces a rough draft of the plan and sponsors it, which makes it a bill.*
- 2. The bill then goes to whichever legislative branch (Senate or House) the Senator or Representative belongs for study.*
- 3. If released by the committee, the bill is put on a calendar to be voted on, debated or amended.*
- 4. If the bill passes by a simple majority (218 of 435), the bill moves to the Senate.*
- 5. In the Senate, the bill is assigned to another committee and, if released, debated and voted on. Again, a simple majority (51 of 100) passes the bill.*
- 6. A conference committee made of House and Senate members works out any differences between the House and Senate versions of the bill. The resulting bill returns to the House and Senate for final approval.*
- 7. The Government Printing Office prints the revised bill in a process called enrolling. The bill then goes to the President.*
- 8. The President has ten days to sign or veto the enrolled bill."*

... but that is a very superficial 'fake news' kind of description that ignores the bribes, lobbyists, special operatives, Fusion GPS and Black Cube opposition research cyber attackers and other juicy bits that actually run the process.

Here are some tips that I use:

<https://colors-newyork.com/.../how-a-citizen-can-make-a-law>

How a citizen can make a law? Laws begin as ideas. These ideas may come from a Representative... or from a citizen like you. Citizens who have ideas for laws can contact their Representatives to discuss their ideas. If the Representatives agree, they research the ideas and write them into bills.

FAQ: How can a citizen make a law?

2 its known that in order to make or change a law, a bill is needed which is introduced to congress and the senate etc.... The question: If a citizen is directly affected by a current "unfair" law and wishes to change it, who exactly can the personal bill be submitted to?

How Ronan Farrow became a killer of progressive giants

By [Thomas Lifson](#)

Ronan Farrow, a 30-year-old scion of Hollywood, has taken down two giant figures in American culture and politics: Harvey Weinstein ("God," [according to Meryl Streep](#)) and New York A.G. Eric Schneiderman (who threatened to criminalize Trump associates and possibly even Trump himself with state convictions that are beyond the presidential pardon powers). Along the way, Farrow has embarrassed feminists and the Democratic Party establishment, along with the media that knew and remained silent about both miscreants. He has also had a disproportionate impact on Democrat office-holders, while making the alleged boorishness of President Trump toward comely women seem trivial in comparison.

All this, and a Pulitzer Prize, too, for a young man who, so far as anyone knows, is not a conservative.

Ronan Farrow (cropped from a U.S. State Department photo).

How on Earth could this happen, and what does it mean? Yaron Steinbuch of the [New York Post](#) offers some hints:

Ronan Farrow â€¦ whose exposÃ©s [helped topple Hollywood mogul Harvey Weinstein](#) and [New York AG Eric Schneiderman](#) â€¦ is thumbing his nose at NBC and other naysayers.

NBC notoriously refused to go with the story about Weinstein when Farrow â€¦ the network's employee â€¦ brought it. But thanks to the New Yorker, it saw publication and ignited a firestorm that continues to burn. In return, NBC and MSNBC are now [snubbing Farrow](#) as he makes the rounds to publicize the Schneiderman story.

Both NBC and MSNBC appear to have made a concerted effort to block Ronan Farrow from appearing on either network to talk about his bombshell report on New York Attorney General Eric Schneiderman's alleged abuse â€¦ instead opting to interview his co-author, Jane Mayer.

So personal animus toward the Comcast-owned broadcast outlets is part of what is motivating Farrow. But there was also a measure of desperation behind his Weinstein scoop:

Farrow, who admitted that his career had been "on the rocks," said that even those close to him tried to discourage him from writing the piece.

"My bosses saying, 'You have got to stop â€¦ let it go.' My agent saying, 'It's causing too many speed bumps for your career, you have got to let it go,'" he said.

"Even loved ones, saying, 'Is this really worth it?' Pointing out that I would risk my whole career for a story that might not even make a dent."

Keep in mind that the abominable treatment of women by Weinstein and Schneiderman was common knowledge in elite media and political circles. But there were norms that prevented publicity about them. Both men were regarded as useful to the goals of progressives, and so if a few women get abused, well, that's the price progs are willing to pay. It is the oldest excuse for progs: they are seeking the perfection of humankind (because human nature is infinitely malleable), so any price is worth paying for that goal, especially when it is paid by other people.

They created norms â€¦ the unspoken rules of conduct â€¦ that were supposed to prevent disruption of the bargain. When even loved ones counsel obedience to the norms, they are hard to resist. But some people are willing to endure the social sanctions that are applied to norm-busters. NBC is enforcing them against Farrow right now.

Call me crazy, but I see a certain resemblance between Ronan Farrow and Donald Trump. Both were born to wealth and position, and both have blatantly violated the norms that attend to their respective power spheres. And both have for now triumphed.

SILICON VALLEY OLIGARCHS MUSK, SCHMIDT, DOERR, KHOSLA, PAGE, ZUCKERBERG, JUVETSON, DRAPER, WESTLY, ET AL... WE HAVE THE RECORDINGS THAT WILL PUT YOU IN PRISON!

=

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring

systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

SILICON VALLEY OLIGARCHS MUSK, SCHMIDT, DOERR, KHOSLA, PAGE, ZUCKERBERG, JUVETSON, DRAPER, WESTLY, ET AL... WE HAVE THE RECORDINGS THAT WILL PUT YOU IN PRISON!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

How To Prove That A California Politician Is Lying To You

By Conrad Brown

Aside from the standard retort: "*when their mouth is moving*"; it is unfair to assume that every politician has based their lives on political corruption.

Here is how to determine, with absolute certainty, if your public official is a lying scumbag that is just saying some "*feel good*" crap in order to trick you into letting them get away with their stock market scams.

You ask then to **prove to you** that they, and their family members, are not receiving the following quid-pro-quo: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs

conducted for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; Bribes to Stanford officials to admit their kids to college; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

Then you ask the FBI, GAO, SEC, FEC, FTC and Congress (who work for you, the taxpayer) to prove it to you.

Then you ask the community service forensics groups like Cause Of Action, Judicial Watch, Sunlight Foundation, ICIJ, Ralph Nader, and all of the other public forensics groups to prove it to you.

Then **you** buy some books on *"How To Be A Private Investigator"* and prove it to yourself.

Then you can see if they are lying or not.

For example; the politicians and families of Jerry Brown, Kamala Harris, Nancy Pelosi, Barbara Boxer, etc. own the companies that offer the "solutions" to green energy "problems" that they promote. In other words: These politicians control and exploit the profits to the thing they are screaming about! They positioned themselves to make exclusive profits on issues that they made into big deals!

Tilak Doshi reveals that widespread view that fossil fuels are â... dirtyâ... and renewables such as wind and solar energy and electric vehicles are â... cleanâ... has become a fixture of mainstream media and policy assumptions across the political spectrum in developed countries. Indeed the ultimate question we are led to believe is how quickly can enlightened Western governments, led by an alleged scientific consensus, â... decarbonizeâ... with clean energy in a race to save the world from impending climate catastrophe. The â... net zero by 2050â... mantra, calling for carbon emissions to be completely mitigated within three decades, is now the clarion call by governments and intergovernmental agencies around the developed world, ranging from [several EU member states](#) and the [UK](#), to the [International Energy Agency](#) and the [International Monetary Fund](#).

Letâ... s start with Elon Muskâ... s Tesla. In an astonishing achievement for a company that has now posted four consecutive quarters of profits, Tesla is now [the worldâ... s most valuable automotive company](#). Demand for EVs is set to soar, as government policies subsidize the purchase of EVs to replace the internal combustion engine of gasoline and diesel-driven cars and as owning a â... cleanâ... and â... greenâ... car becomes a moral testament to many a virtue-signaling customer.

Yet, if one looks under the hood of â... clean energyâ... battery-driven EVs, the dirt found would surprise most. The most important component in the EV is the lithium-ion rechargeable battery which relies on critical mineral commodities such as cobalt, graphite, lithium, and manganese. Tracing the source of these minerals, in what is called â... full-cycle economicsâ... , it becomes apparent that EVs create a trail of dirt from the mining and processing of minerals upstream.

A recent [United Nations report](#) warns that the raw materials used in electric car batteries are highly concentrated in a small number of countries where environmental and labour regulations are weak or non-existent. Thus, battery production for EVs is driving a boom in small-scale or â... artisanalâ... cobalt production in the Democratic Republic of Congo which supplies two thirds of global output of the mineral. These artisanal mines, which account for up to a quarter of the countryâ... s production, [have been found](#) to be dangerous and employ child labour.

Mindful of what the image of children scrabbling for hand-dug minerals in Africa can do to high techâ... s clean and green image, most tech and auto companies using cobalt and other toxic heavy metals avoid direct sourcing from mines. Tesla Inc. [struck a deal last month](#) with Swiss-based Glencore Plc to buy as much as 6,000 tons of cobalt annually from the latterâ... s Congolese mines. While Tesla has said it aims to remove reputational risks associated with sourcing minerals from countries such as the DRC where corruption is rampant, Glencore assures buyers that no hand-dug cobalt is treated at its mechanized mines.

There are [7.2 million battery EVs](#) or about 1% of the total vehicle fleet today. To get an idea of the scale of mining for raw materials involved in replacing the worldâ... s gasoline and diesel-fueled cars with EVs, we can take the example of the UK as provided by [Michael Kelly](#), the Emeritus Prince Philip Professor of Technology at the University of Cambridge. According to Professor Kelly, if we replace all of the UK vehicle fleet with EVs, assuming they use the most resource-frugal next-generation batteries, we would need the following materials: about twice the annual global production of cobalt; three quarters of the worldâ... s production lithium carbonate; nearly the entire world production of neodymium; and more than half the worldâ... s production of copper in 2018.

And this is just for the UK. Professor Kelly estimates that if we want the whole world to be transported by electric vehicles, the vast increases in the supply of the raw materials listed above would go far beyond known reserves. The environmental and social impact of vastly-expanded mining for these materials â... some of which are highly toxic when mined, transported and processed â... in countries afflicted by corruption and poor human rights records can only be imagined. The clean and green image of EVs stands in stark contrast to the realities of manufacturing batteries.

Proponents of EVs might counter by saying that despite these evident environmental and social problems associated with mining in many third world countries, the case remains that EVs help reduce carbon dioxide emissions associated with the internal combustion engines run on gasoline and diesel fuels. According to the reigning climate change narrative, it is after all carbon dioxide emissions that are threatening environmental catastrophe on a global scale. For the sake of saving the world, the climate crusaders of the richer nations might be willing to ignore the local pollution and human rights violations involved in mining for minerals and rare earths in Africa, China, Latin America and elsewhere.

While one might question the inherent inequity in imposing such a trade-off, the supposed advantages of EVs in emitting lower carbon emissions are overstated according to a [peer-reviewed life-cycle study comparing conventional and electric vehicles](#). To begin with, about half the lifetime carbon-dioxide emissions from an electric car come from the energy used to produce the car, especially in the mining and processing of raw materials needed for the battery. This compares unfavorably with the manufacture of a gasoline-powered car which accounts for 17% of the carâ... s lifetime carbon-dioxide emissions. When a new EV appears in the show-room, it has already caused 30,000 pounds of carbon-dioxide emission. The equivalent amount for manufacturing a conventional car is 14,000 pounds.

Once on the road, the carbon dioxide emissions of EVs depends on the power-generation fuel used to recharge its battery. If it comes mostly from coal-fired power plants, it will lead to about 15 ounces of carbon-dioxide for every mile it is drivenâ... three ounces more than a similar gasoline-powered car. Even without reference to the source of electricity used for battery charging, if an EV is driven 50,000 miles over its lifetime, the huge initial emissions from its manufacture means the EV will actually have put more carbon-dioxide in the atmosphere than a similar-size gasoline-powered car driven the same number of miles. Even if the EV is driven for 90,000 miles and the battery is charged by cleaner natural-gas fueled power stations, it will cause just 24% less carbon-dioxide emission than a gasoline-powered car. As the skeptical environmentalist [Bjorn Lomborg](#) puts it, â... This is a far cry from â... zero emissionsâ... ".

As most ordinary people mindful of keeping within modest budgets choose affordable gasoline or diesel-powered cars, experts and policy advisors the world over have felt compelled to tilt the playing field in

favor of EVs. EV subsidies are regressive: given their high upfront cost, EVs are only affordable for high-income households. It is egregious that EV subsidies are funded by the average tax-payer so that the rich can buy their EVs at subsidized prices.

The determination not to know or to look away when the facts assail our beliefs is an enduring frailty of human nature. The [tendency towards group think and confirmation bias](#), and the will to affirm the â... scientific consensusâ... and marginalize sceptics, are rife in considerations by the so-called experts committed to advocating their favorite cause. In the case of EVs, the dirty secrets of â... clean energyâ... should seem apparent to all but, alas, there are none so blind as those who will not see.

So these politicians are lying and covering up safety defects and corruption in order to protect their business partner Elon Musk. Musk puts money in their pockets.

It is even worse than that!

Brianne Burr, says that politicians break the very same laws they create. Federal officials recently found three California senators to be corrupt.

While no state or country is completely immune from corruption, some are worse than others. The state of California, for example, has seen significant government corruption in recent times. This corruption can drastically affect the lives of its leaders, but more importantly, citizens are impacted directly.

Three state senators in California have been found to be corrupt by federal officials. These state senators were suspended from attending sessions of the California State senate. And while their corrupt voices are banned, the people they represent have no voice at all.

Sadly, this is only true of those who are caught. Former mayors and current city officials have been arrested for political corruption, and still the problem remains. There are governmental structures in place that enable and indeed, encourage corruption in our public officials. And because of it, far more engage in corruption without getting caught and punished.

How Much California Corruption Should We Tolerate?

In an article published in City Watch LA, Clinton Galloway asks us, â... How much should we tolerate?â... He indicates that if the same ratio of corruption were to exist in the city of Los Angeles, roughly 50K would be felons and 100K would be federally indicted for major crimes.

â... While we will not tolerate anarchy in the streets, we will tolerate it in our legislative bodies,â... he says.

Gallowayâ... s poignant question alludes to a greater problem than corruption in our government. Yes, there is structure in place that fosters corruption and fails to dissuade it. But the people allow these things to happen. We do not do much to call corruption, generally speaking, but simply voice our distrust our government.

One final question posed by Galloway asks us, what does law even mean if we do not have integrity to uphold it? We see politicians creating laws and breaking them. We see politicians make oaths to uphold the law, and yet they behave as though they are above the law.

And what of those public officials who strive to honestly and judiciously govern? Each day, their numbers seem to diminish as corruption spreads to more of our governmental bodies. The FBI must overtly arrest each of these crooks and do it sooner than later!

How To Survive Getting Bernie Madoff'd By Your Own Government

How To Track Any Political Oligarch And Their Crazy Democracy Manipulations

In the new Age Of Transparency, you can hunt down any evil tech oligarch that is toying with our Democracy

Two handy things to know, when youâ... re reporting on an ultrawealthy individual, is whether that person owns a private jet, and where that jet has been. So last year, when an editor assigned me to report on tech billionaire and major right-wing donor [Peter Thiel](#), I set out to find his plane.

Strange! I know. But there was a point to the exercise, and it wasnâ... t to figure out where the elites of Silicon Valley go on vacation. Thiel is worth an estimated \$2.3 billion. He has deeply held political beliefs â... he is [a majorskeptic of multicultural democracy](#) and a supporter of President [Donald Trump](#) â... and a vast fortune he accrued by founding PayPal and investing in [Facebook](#). He has few obligations to disclose how he spends his money to realize his political vision. Over the years, reporters have discovered him using shell companies and other clandestine means to [finance a dystopian facial recognition company](#), [spread scientifically dubious ideas](#) and [influence political races](#). The true extent of his influence [remains unknown](#).

Tracing Thielâ... s clout, in other words, is extremely difficult. The uber-rich have endless tools to maintain such secrecy. They channel their billions with [the invisibility of deep ocean currents](#) through offshore accounts and dark money groups, leaving the public with little ability to divine how they are shaping governance, policy, public opinion and life in general for the rest of us.

But even the 1% has to deal with the DMV. (Maybe. Who knows.) And anyone who owns a plane has to register that aircraft with the Federal Aviation Administration. If you know a planeâ... s tail number â... the unique identifier the FAA assigns to every United States aircraft â... you can plug it into various databases and watch the plane soar around the globe in real time. In the past, reporters have used that information to identify which masters of the universe [attended a secretive Koch brothers summit](#), and to crack open [the CIAâ... s terrorist rendition program](#). Watching the flight path of Thielâ... s plane might allow me to divine which donor summits he attends, or which politicians borrow or ride his plane and generally benefit from his patronage.

In a time of global crisis â... say, when a deadly coronavirus is sweeping the planet at pandemic speeds â... I might even be able to see where Thiel takes cover.

That is, after all, exactly what the richest of the rich are doing. As COVID-19 spreads around the world, theyâ... re swapping their [villas for yachts](#) and [chartering private jets](#) to avoid catching the contagion from the general public. They are arranging private, VIP medical care, and a New York heiress is reportedly retreating into a â... medical bunkerâ... she built for these exact circumstances. Thiel doesnâ... t have a bunker, exactly, but he does have a multimillion-dollar estate in New Zealand, the [preferred doomsday destination](#) for the worldâ... s wealthiest individuals. Friends of Thielâ... s have said they plan to escape there with him when society finally collapses.

I donâ... t know if heâ... s en route. But Iâ... m pretty positive Thiel owns a jet. And Iâ... m somewhat confident I may have found it. That jet took off Thursday night from Los Angeles International Airport en route to the Hawaiian Island of Lanai, before it was diverted to the nearby island of Maui. On Friday, the jet reached Lanai. On Monday afternoon, itâ... s scheduled to return to Los Angeles.

Is he shuttling friends to safety?

Did Peter Thiel just make the first leg of his escape?

A Plane, A Plan

Thereâ... s no reporting that proves Thiel even owns a private jet, but the evidence is highly suggestive. In 2016, The New Yorker [reported](#) that Sam Altman, who founded the tech incubator Y-Combinator, has a doomsday plan that involves a remote secure location, Thiel and a plane: â... If the pandemic does come, Altmanâ... s backup plan is to fly with his friend Peter Thiel, the billionaire venture capitalist, to Thielâ... s house in New Zealand.â...

Prepping for the end of civilization in oneâ... s own luxury bunker has become [quite trendy](#) among the rich, especially among billionaires from Silicon Valley â... who, for some reason, have a particular flair for imagining an apocalyptic near-future. Beautiful, remote New Zealand is especially attractive to prepper Americans because the primary language is English.

Is this the first leg of Peter Thielâ... s escape?

Thiel [acquired New Zealand citizenship](#) under eyebrow-raising circumstances in 2011 (he did not meet its general residency requirements, but he sure gave New Zealand charities a lot of money) and owns a \$4.8 million estate there with [a newly constructed panic room](#). For Thiel, there is the added charm that New Zealand is where Peter Jackson filmed â... The Lord of The Rings.â... Thiel loves â... The Lord of the Rings.â... Heâ... s given several of his companies cheeky names [inspired by](#) J.R.R. Tolkienâ... s novels: Valar Ventures, Mithril Capital. Palantir Technologies, his spooky data analytics firm of which the CIA is a client, is named after a set of sinister seeing-stones.

Altmanâ... s plan to rely on Thiel to fly and house him in a time of global crisis suggests that the jet they plan to use is Thielâ... s. But hereâ... s a more straightforward argument: If you were worth an estimated \$2.3 billion, wouldnâ... t you own a private jet?

A Code Name

The FAAâ... s database of private aircraft contains tens of thousands of registrations. The primary ways to search for a specific plane are by looking up the planeâ... s serial number, its registrant (i.e. the person or company who owns the plane), or its tail number, also known as the N-number.

But searching the registry for Thiel's name and those of his companies didn't yield any promising results.

Another journalist, who has more experience covering the rich and powerful, told me that if Thiel owned a jet, it was likely registered to a shell company set up specifically for the purpose of keeping his plane's information private. My search would be... confounded, this person said, unless I came across the name of said shell company, or if one of Thiel's dumber friends had posted a selfie with the plane's tail number in view.

Both seemed unlikely. Thiel is notoriously privacy-obsessed. After the website Gawker outed him to the general public in 2007, Thiel went on a secret annihilation campaign and [bankrolled the Hulk Hogan lawsuit](#) that bankrupted Gawker in 2016.

I was crestfallen. And then I wasn't. Like a clap of thunder, I realized I knew exactly what Thiel would name his private jet holding company. I opened up a fresh browser tab and searched "lord of the rings eagles."

From Washington to the campaign trail, get the latest politics news.

I've never read Tolkien's novels. But even I know that there are mythical giant eagles that rescue the main characters, Talmudic debates about why Frodo couldn't just ride the eagles to Mount Doom, and, given the immense volume of Tolkien lore needed to sustain these debates, names for the eagles.

According to Wikipedia, the eagle Gwaihir rescued Frodo and Sam from Mount Doom after the Battle of the Black Gate. But, and I mean no offense to the war hero, Gwaihir doesn't exactly roll off the tongue. By contrast, Wikipedia tells me "The Lord of Eagles in the First Age, said in The Silmarillion to be the mightiest of all birds that have ever been, with a wingspan of thirty fathoms (54.9 meters, or 180 feet) and a beak of gold, was named Thorondor."

I typed "Thorondor" into the FAA registry. One result was for a company that registered a four-seat Cessna in Tennessee. The other was for Thorondor LLC, which holds the registration for a top-of-the-line Gulfstream G550 business jet.

Thorondor LLC's address is listed as care of Apercen Partners, a law firm that performs tax planning and compliance services for venture capitalists, hedge funders, entrepreneurs and high net-worth individual clients in Palo Alto, California, the heart of Silicon Valley.

Reader, I gasped.

A Twist

For weeks after my discovery, I watched as Thorondor rocketed around the globe, and I began to log the places it had flown in the past.

As tracking planes goes, this wasn't easy. There are several websites where one can look up a plane's flight history using the tail number, but all of these returned some version of the same message when I looked up Thorondor's tail number: "This aircraft is not available for public tracking per request from the owner/operator." Classic Thiel.

In a few online forums of plane enthusiasts, however, plane watchers (and they are legion) had logged the unique call sign associated with Thorondor's tail number. Whoever had blocked the tail number on these websites had failed or forgotten to block the call sign, which became my window into Thorondor's world.

Thorondor flew to the exact destinations one would expect Thiel's plane to fly. It took constant trips between San Francisco, the tech capital of the nation, and Los Angeles, where Thiel moved in 2018. The plane took occasional jaunts to executive airports near Washington, D.C., and New York City. And several times a year, it flew from California to New Zealand, usually by way of Hawaii. In the course of my reporting, I discovered that Apercen Partners or its attorneys were also the registrants for several Thiel-linked nonprofits.

*Thorondor. The Lord of Eagles in the First Age, said in The Silmarillion to be the
"... mightiest of all birds that have ever been,"... with a wingspan of thirty fathoms and a
beak of gold. Wikipedia*

And yet there were times when Thorondor wasn't where it should have been. On a Friday in August, when Thiel [appeared live on "Fox & Friends"](#) in New York, the plane appears to have flown from Los Angeles to Fiji. In September, when Thiel and Ann Coulter hosted [a political fundraiser](#) in Thiel's Park Avenue apartment, the plane was apparently parked in California.

Could it be that the plane I was shadowing belonged to another Silicon Valley billionaire "one with highly similar tastes in travel, fantasy novels and money managers?"

It seemed unlikely. Thiel is such a unique mind. He relishes in the subversiveness of being one of Silicon Valley's most outspoken conservatives, as when he declared that his move to Los Angeles was a bid to [escape San Francisco's liberal monoculture](#). He is also a great admirer of René Girard, a French philosopher who posits that all human behavior is based on imitation. Knowing this gives you a leg up on those who don't. "You might not be able to escape imitation entirely," [Thiel has said](#), "but if you're sensitive to the way it drives us then you're already ahead of most."

Yet no sooner did I entertain this thought that Thiel is not so different from his fellow tech titans than I came up with alternative theories of who owns Thorondor. Chief among them is Napster founder Sean Parker. Parker (Justin Timberlake played him in "The Social Network") has patronized Apercen Partners to administer his main philanthropic foundation, public records show. He's owned homes in San Francisco and Los Angeles and has business investments and [relationships](#) in New Zealand, including [an investment](#) with "The Lord of the Rings" director Peter Jackson.

This brings us to Parker's 2013 wedding. For his nuptials, Parker spent \$4.5 million transforming parts of Big Sur into a wooded fantasyland. He [hired](#) "Lord of the Rings" costume designer Ngila Dickson to style the wedding party and his guests, and he offered actor Ian McKellen a reported \$1.5 million to officiate the wedding dressed as Gandalf. McKellen [declined](#), saying, "Gandalf doesn't do weddings." Parker later paid a settlement of \$2.5 million for what the California Coastal Commission claimed was potential destruction to old-growth redwood forest from all the digging, bulldozing and building of fake ruins. (The bride wore Elie Saab.)

Now there's a guy who would name his private jet holding company Thorondor LLC.

I reached out to Apercen Partners to ask who owned the jet. The firm didn't respond. I reached out to a representative for Thiel to ask if the jet was his, and got no response. I reached out to a representative for Parker with the same question and got no response.

I discovered that the jet once flew to a [secret conservative confab](#) held by the American Enterprise Institute on an island resort in Georgia. Very Thiel-y! But I searched in vain for a comprehensive copy of that year's guest list, and along the way, I learned that Parker had been a guest in [a previous year](#). I saw flights that placed Parker and the plane on different sides of the country, based on Parker's public appearances. I dug up the incorporation documents for Thorondor LLC in Delaware...."

This is what a single person was able to accomplish with minimal resources. When millions of voters combine their Citizen Sleuth skills with new open-source software and peer-to-peer sharing you can expose the dirtiest deeds of the Eric Schmidt's, The Larry Page's, The Steve Westly's and the Elon Musk's of the world!

How To Win 100% Of Your Political Corruption Lawsuits

To win, you have to lose.

Get Ok with that concept and the world is your oyster.

What!!!?

When you sue the White House, or the CIA or some corrupt Senator, their corrupt justice system is never going to let you get to the finish line. You, as a person, will not get what conventional wisdom thinks that you, personally, could get for the harms done to you.

BUT...

You will get justice by exposing the crooks.

You will get to use the biggest weapon on Earth against the dirtiest bastards on Earth. You will get to wield: THE TRUTH, and post the facts about their dirty deeds where the whole planet can see them.

Your case will eventually get dismissed or expire because you will run out of time and money. That is what the bad guys are counting on and you have to count on it too.

Your goal must be to use your case to get all of the other parts of government, the news media and the citizenry to pay attention to the issue and these particular bad guys.

With that approach you will win EVERY SINGLE TIME!

How We Made 100,000 Transparency News And Anti-Corruption Sites With One Linux Computer

Partisan Silicon Valley and Hollywood controlled "news outlets" specifically hide certain news from voters and from the U.S. Congress. The billionaire owners of these biased, insider-trading, tax evading operations pay stock market bribes to U.S. politicians to run cover for them and profit off of their manipulations of Democracy. They can't stand transparency or investigations into their illicit stock market and media manipulations. For example, Google bosses rail on about "Climate" issues yet they own the stock in windmills, solar panels and lithium batteries which they claim are the only ways to fix the climate. This is like the bakery owner buying the only sugar mill because he claims he wants to help the sugar mill workers.

So how do we get around their control of the global Fake News networks?

OK Cupid, Match.com, Google, YouTube, Facebook, Netflix and similarly biased facades operate as a network of sites which can be used by political bosses in a variety of ways: as a... stage setting... for events, focusing attention on issues such as immigration and climate change which their owners own stock in the

decisions about, providing the appearance of neutrality for partisan issues, or to gather data from users that can then be used for political targeting via Google and Facebook ads.

We built a copy network of the one used by the DNC.

We did it because we were not being allowed our Constitutionally guaranteed Freedom of Speech to expose political corruption.

You can tap into our RSS feeds, or the feeds of the opposition party networks, and you will see that only a couple humans write the stories and then over 300,000 variations of those stories are up-written by AI and distributed.

A public transparency site needs news and you can get a vast number of free base stories from data releases from federal programs like the Department of Education and Department of Health and Human Services, Congressional Research Service, the Federal Election Commission, The FBI, The DOJ, HHS and the Census Bureau. Gas API, Reuters and all the "Think Tanks like Tax Foundation, ICIJ, Hoover Institute, etc. For every 10 news stories from agencies, you drop in one Congressional investigation report or ProPublica expose that reveals covered up information that the Silicon Valley Billionaires and Goldman Sachs wants hidden.

Interspersed between stories about real estate prices and the best place to purchase premium gas based on zip code, newsier pieces appear, sometimes to quote a state senator who is paid covertly by Larry Page or Mark Zuckerberg. This puts an impression in the mind of the public that is exploited by the Facebook lobbyists to push issues that will benefit Elon Musk's and Mark Zuckerberg's stock market valuations.

The DNC networks can be traced back to liberal billionaires like Elon Musk, Larry Page, Eric Schmidt, David Drummond, etc. in Silicon Valley. Google and Facebook created a kind of low-cost automated story generation. Then the GOP copied the process.

In tracking all of the news and information, TOW tracked down the smaller of these players via the Metric Media network. You can do this too, from your home, just like the FBI might do. You can see how Fake News functions.

Take a look at this. Know that the Metric Media network is almost 1000 times smaller than the Silicon/Hollywood network which the Google-Facebook-Weinstein gang control. If you wonder why the same phrases appear on all of the "Mainstream" news networks and local news shows within 4 hours of each other, this is how:

Journatic [rebranded](#) as Locality Labs in 2013; Locality Labs is behind many of the publications we discovered that mimic the appearance and output of traditional news organizations. These sites do not bear much information about their political use or funding, but some of them have been funded by political candidates and lobbying campaigns. [Metric Media](#), [Locality Labs](#) (or LocalLabs), [Franklin Archer](#), the [Record Inc.](#), and [Local Government Information Services](#) (LGIS) are the main organizations involved in operating these networks of publications, and Timpone is associated in one way or another with each of them. [Michigan Daily](#) has detailed the convoluted relationship between these organizations.

Some of these mysterious, partisan local news sites publish physical newspapers and many have minimal social media presence. At first, they do not appear to be owned by the same network or organization, but a number of clues suggest that they are intimately linked. Our analysis demonstrates the links between the networks by identifying shared markers, such as unique analytics tokens, server IP addresses, and even shared design templates and bylines on articles. Further, the [Privacy Policy](#) and [Terms of Service](#) for many of these websitesâ... but not allâ... suggest they are part of Locality Labs, LLC.

Websites and networks can aid campaigns to manipulate public opinion by exploiting faith in local media. The demise of local journalism in many areas creates an information vacuum, and raises the chance of success for these influence campaigns. The strategy is further made possible by the low cost of automating news stories, repurposing press releases (including obituaries from funeral homes), and replicating design templates, as well as the relative ease with which political or single-issue campaigns can obscure their funding and provenance.

[One in five newspapers has closed in the past decade](#), and many other outlets have [significantly cut staff](#) and reporting. This bleak landscape for local news creates space for this cottage industry of outlets that claim to produce journalism... typically during election cycles... and create and amplify material to support political outcomes, sometimes even physically mailing advertising materials that masquerade as newspapers but are not labeled political advertising. These publications cover certain candidates and topics, including limited government, tort reform, and labour unions, with a conservative bias.

It is not clear how effective the sites are, but their architecture and strategy is useful to understand the way they co-opt the language, design and structure of news organizations. Automation has been touted as a way to create stories where there are few reporting resources, and it can be used to build credibility. It can also make a news organization look far more prolific than it is. Potentially adding to the credibility of these sites is their Google search ranking: in the case of some of the websites set up in 2015-2016, we observed that once sites had gained ample authority, they appeared on the first page of Google Search results just below the official government and social media pages.

The *Lansing State Journal*... [s story](#) highlights Metric Media... [s intent to launch](#) hundreds of such sites to fill the void in local communities. And, while Metric Media hasn't been embroiled in controversies like its sibling organizations, the *Journal*... s story quotes Matt Grossmann, director of Michigan State University's Institute for Public Policy and Social Research, who said, "... many [articles] on [Metric Media site The] *Lansing Sun* appeared to be right-leaning."

Using multiple network analysis tools, we found at least 450 websites including the ones identified by previous reporting. There are dedicated networks with anywhere between five and forty sites per state in eleven states. Additionally, every state in the US (and Washington DC) has a dedicated "... business daily" (e.g. *Michigan Business Daily*, *Utah Business Daily*), and there are several international "... business daily" websites (e.g. *Toronto Business Daily*, *Mexico Business Daily*, *Manila Business Daily*) as well. These are augmented by several single-subject sites (e.g. *American Security News*, *Tobacco Newswire*, *Farm Insurance News*), and community sites that aggregate events, news, and business services information (e.g. *Metro East Today*, *Wilton Review*, *Palmerton Guide*).

450 sites, 12 state networks, 5 corporate entities

The 450 websites span twenty-one different networks operated by five distinct corporate entities. Below, we provide further detail about each of these organizations and how they're linked.

Figure 1: Breakdown of sites across networks, including the sites for multiple corporate entities or parent organizations (â Organizationsâ) such as LGIS, Franklin Archer, Metro Business Network, or Dan Profitâ s PAC Liberty Principles.

The overall distribution of sites across the networks is shown in Figure 1, with Franklin Archerâ s Local News Network the single largest network with almost 130 sites. In the case of Franklin Archer, we conflated nine standalone sites that bear all the heuristics of their local news sites, even though these sites were not explicitly listed on the organizationâ s website. These include [Surprise Journal](#), [El Paso Review](#), and [Lansing Reporter](#).

With the Local News Network sites added to the 51 sites in the Metro Business network, the overall number under the Franklin Archer banner stands at 179, a close second to Metric Media, which has 189 publications across ten states. Metric Mediaâ s North Carolina operation alone has 46 sites, making it the third biggest individual network in our dataset.

For clarity, we have also conflated 25 standalone sitesâ sixteen topical sites, and nine international sitesâ under â LocalLabs: Internationalâ and â LocalLabs: Topicalâ in *Figure 1*. These sites have a Locality Labs, LLC privacy policy or shared analytics identifier, but no other associations. In some cases, the privacy policy is not even linked on the homepage. The [Mexico Business Daily](#), for example, doesnâ t mention any affiliation in its â About Usâ or â Contactâ pages, and there is no privacy policy on its homepage. [This link](#) suggests it is a Locality Labs property. [CISTRAN Finance](#) follows the exact same pattern. In other cases, like the [Toronto Business Daily](#) or the [Balkan News Wire](#), the privacy policy is linked to from the homepage, but no other affiliations are mentioned.

In our analysis so far, websites on the Metric Media state-centric networks only link to other sites from the same state, including stories from Franklin Archer's Metro Business network. There are, however, few indicators that the sites are operated by the same organization. On sites in both networks, the privacy policies and terms of service suggest they are operated by Locality Labs, LLC. Stories covering vastly different topics across the network share bylines, as well as similar—often identical—templates.

These anecdotal pieces of evidence can only be gleaned after identifying the scale of the operation. To measure the scale of the operation, we relied on website metadata and network forensics: the sites shared IP addresses and various analytics identifiers. Within the same network—and even the same organization—that is expected behavior. It is highly unusual for sites to share IP addresses and analytics identifiers if they are not connected, but that's exactly what we found in these networks, as can be seen below.

Shared IP addresses

Each domain maps to an IP address, which identifies the server where the site is hosted. Across this greater network of networks, including the domains for the organizations, we found about twenty-five unique IP addresses. Some of these networks, including the biggest—Franklin Archer: Local News Network—don't share an IP address or server with any other network as can be seen in Figure 2. Some only share IP addresses with other sites that belong to the same parent organization. For example, some state-level Metric Media properties—the publications in New Mexico, Arizona and Montana—share a server.

But, Metric Media's Maryland properties (which includes [North Baltimore Journal](#), [Harford News](#), [Montgomery News](#)) also sit on the same server as the LGIS sites, which is more unusual. Similarly, it is improbable for sites within Franklin Archer's Business Network to share an IP address with LocalLabs' international or topical sites, unless the two organizations share resources.

Some of the parent organization's websites live on the same server as some of the LocalLabs' topical properties, too. To wit: The Record ([therecordinc.com](#)), Franklin Archer ([franklinarcher.com](#)) and Dan Proft's super PAC Liberty Principles ([libertyprinciples.com](#)) are on the same server as *Tobacco Newswire*, *FDA Reporter*, and *FDA Health News*.

Figure 2: Network graph of shared IP addresses; each different edge colour represents a different IP address

Shared Google Analytics IDs

Even though there were over twenty Google Analytics IDs, only five were used on more than one network. Of these, three identifiers were shared within Metric Media sites only, while another three were shared among Franklin Archer, LGIS, and the LocalLabs sites (*Figure 3*). It is highly unlikely for independent, supposedly unrelated organizations like LGIS and Franklin Archer to share analytics identifiers.

Figure 3: Network graph of shared Google Analytics IDs; each different edge colour represents a different Google Analytics ID

At the time of writing, the Franklin Archer organizational website (franklinarcher.com), publications belonging to LGIS, and topical websites like *American Security News*, *Power Newswire*, and *Higher Education Tribune* shared the same Google Analytics ID. International sites like *Gulf News Journal* and a handful of business dailies also had that same identifier.

A Single Shared NewRelic ID and Quantcast ID

Perhaps no other identifier illustrates the convoluted nature of these networks as well as the [NewRelic](#) ID (*Figure 4*) and the Quantcast ID (*Figure 5*).

Most of Metric Media's properties didn't have a corresponding NewRelic ID, nor did the Florida network's other networks, though, shared the same identifier, including Metric Media's Maryland sites. Also, for the first time, we see the publications within the Record network, the first site of which was established in 2004, sharing an identifier with the greater network.

Figure 4: Network graph of the single shared NewRelic ID

Similarly, a single Quantcast identifier was used across LGIS, Record, and Metric Media sites. (*Figure 5*). Much like the NewRelic ID, this too shows the connected nature of the networks.

Figure 5: Networks connected by a single unique Quantcast ID. The Franklin Archer publications don't seem to be relying on Quantcast identifiers at all, but Metric Media does, as do the Record network and LGIS.

When we discovered the high volume of sites intricately linked across a convoluted network, we set about trying to identify the people behind these organizations, and their backgrounds. In reporting from the *Lansing State Journal*, *Michigan Daily*, and the *Guardian*, as well as our own analysis, one name appeared time and again: Brian Timpone.

The sites in our dataset go back to 2004 with the inception of the first publication—the *Madison-St. Clair Record*—which is now part of the *Record* network. In the next section, we'll trace through the emergence of various publications, networks, and their impact.

The Record Network

The Record Network is a system of eleven publications, the first of whichâ... the *Madison-St. Clair Record*â... went live in 2004. The networkâ... s publications cover the legal system in eight states; one of the outlets, Legal Newslane, is not bound to a single state.

Even before Journatic was set up in 2006, Timpone was the founding publisher of sites in the Record network, which have [come under scrutiny](#) for being [run by advocacy groups](#) disguised as media organizations. Timpone is currently listed as founding publisher of the *Madison-St. Clair Record* and the *Louisiana Record* identifies him as the publisher. According to the â... About Usâ... page on a subset of Record network sites (including *Legal Newslane*, *Madison-St. Clair Record* and *Florida Record*), they are owned by the [US Chamber Institute for Legal Reform](#), an affiliate of the US Chamber of Commerceâ... an organization, according to [OpenSecrets](#), that since 2008 has been one of the biggest â... dark moneyâ... spenders in US elections. Fifteen years later, these sites are still very much active.

LocalLabs/Locality Labs

LocalLabs, another Timpone company, was a [rebranding of Journatic](#) in the aftermath of a 2012 scandal over [plagiarism](#), [falsified quotes](#), and [fake bylines](#).

For the last twenty months or so, the website for LocalLabs has simply said â... Weâ... re improving our site. Stay tuned for a new and improved LocalLabs.com.â... Previously, the website [detailed](#) the services the organization provided, declaring that â... LocalLabs offers community news production, advertising and advertorial content, print special sections and web and mobile application management.â...

We found over forty websites with the disclaimer â... a product of LocalLabsâ... or a privacy policy/terms of service page suggesting the sites are operated by Locality Labs, LLC.

Fifteen of these sites, all [registered in 2018](#), belong to a single network in a single state: Florida. At the time of writing, we had not found a Metric Media operation in Florida.

The remaining publications are single-topic sites or international business sites. Examples of these sites include *Manila Business Daily*, *Toronto Business Daily*, and *Mexico Business Daily*. The single-topic sites are more US-centric, such as *American Security News*, *American Pharmacy News*, and *Higher Education Tribune*. While these donâ... t say they are a product of LocalLabs, their privacy policies are attributed to Locality Labs.

Bylines on these sites are shared across other sites in other networks as well.

Newsinator and LGIS

In 2015, Timpone incorporated [another organization](#): Newsinator, a firm that, among other things, had a â... history of doing paid political work and offers marketing services to companies under the name Interactive Content Services,â... according to the [Chicago Tribune](#).

In 2015-16, according to the [Illinois State Board of Election Expenditure data](#), Newsinator was paid over \$300,000 for â... Advertising â... newspaperâ... by [Liberty Principles](#), a conservative super PAC, run by Dan Proft, [described](#) as â... one of the stateâ... s most visible and controversial political figures.â...

According to the data, this \$300,000 was split between twenty different candidatesâ... campaigns, most of whom were running for state office in Illinois in 2016.

The line between Locality Labs and Newsinator is blurry: Proft, [in his own words](#), works with reporters at Locality Labs and â... suggests stories and discusses what reporters should cover.â... Newsinator, on the other hand, was responsible for mailing [publications created by Proftâ... s organization](#) to voters, in the form of weekly eight-page print editions. Additionally, [a since-dismissed Federal Election Commission complaint says](#) Proft created [Local Government Information Services](#) (LGIS) in 2016, which â... took over production and distribution of newspapers.â... [State records](#) confirm that Proft was the President of LGIS, but the complaint also says that as of January 2019, the corporationâ... s status was â... dissolvedâ... involuntarily. At the time of writing, LGIS has 33 Illinois-based sites, eleven of which have corresponding print publications.

The extent to which Locality Labs was involved in the business of LGIS and Newsinator is highlighted in an [FEC lawsuit](#), filed for violating the Federal Election Campaign Act of 1971 by â... re-publishing campaign materials in a format designed to look like local community papers.â... The respondents included the obvious suspects: the campaign (Khouri for Congress), the PAC (Liberty Principles), and LGIS (the company publishing the material). In addition, it also included Locality Labs. These entities were charged with violating the Federal Election Campaign Act of 1971 by â... re-publishing campaign materials in a format designed to look like local community papers.â... The details of the lawsuit further stipulate that LGIS â... contracts with various entities, including Locality Labs [â...], to prepare content for publicationsâ... including providing â... local and state news in certain geographical areas in Illinois.â... LGIS, however, has full editorial control. The lawsuit was dismissed in July 2019.

Newsinator, LLC also held the copyright for each of the [Record networkâ... s individual publicationâ... s apps](#) on the iOS App Store.

Franklin Archer

Two networksâ... DirecTech (Local News Network) and Metro Business Dailyâ... and almost 180 sites sail under the banner of [Franklin Archer](#), a company established in 2018. [Brian Timponeâ... s brother](#), Michael Timpone, is CEO. On the Franklin Archer website, the company boasts that it is â... the largest producer of local news in the United Statesâ... with over 200 active websites, over three million monthly page views, and 600 stories produced daily.

The 128 Local News Network sites we found [promise communities](#) a way to â... browse the latest news, investigate upcoming events, stay in the knowâ... by creating and maintaining â... the most comprehensive and easily searchable database of all local businesses by placing an emphasis on consumer needs.â... They are all â... a product of LocalLabs.â... (note: some of the sites mentioned under â... [Our Publications](#)â... lead to dead links; we also found nine websites that follow the exact same pattern, but are not explicitly mentioned on the Franklin Archer website.)

The [Metro Business Network](#) website also doesnâ... t explicitly state its connection to either Franklin Archer or LocalLabs, but its sites are the same as those in Franklin Archerâ... s â... Metro Business Dailyâ... network: one â... business dailyâ... per state and one for Washington DC. And, like the Metric Media websites, their [privacy policy](#) and [terms of service](#) indicate that they are Locality Labs properties.

Today, the Franklin Archer organizational website lives on the same server as Dan Proftâ... s super PAC: Liberty Principles. A Franklin Archer worker, who asked not to be named, said the companyâ... s writers are paid by Newsinator. According to the [Iowa corporate registry](#), Newsinator and Franklin Archer are both

alternative business entity names for DirecTech, LLC.

Metric Media

The Metric Media Foundation was created in 2019 by Bradley Cameron, whose link to Timpone (if any) remains unclear. However, his sites too sport Locality Labsâ€¦ privacy policy and terms of service, and share servers and analytics identifiers with some of the other organizations.

Our analysis found Metric Media has 189 sites across ten states. According to their â€¦ [About Us](#)â€¦ page, the Metric Media Foundation â€¦ funds more than 900 news sites that generate over 3 million monthly page viewsâ€¦ and its operation â€¦ also produces over 600 stories daily, making it the largest producer of local news content in the nation.â€¦ The names of these news sites are not listed on their website.

The numbers boasted by Metric Media are identical to the numbers boasted by Franklin Archer: the 3 million monthly page views and 600 stories produced daily. But the relationship between Franklin Archer and Metric Media is not articulated on either organizationâ€™s website.

When we asked about the emergence, structure and scale of these networks as well as their business model, Timpone said, â€¦ Locality Labs has used its proprietary technology to transform public records into news for major newspaper/media companies around the US, as well as digital start-ups like LGIS.â€¦ Previously, Brian Timpone has [said](#), â€¦ Iâ€™m a biased guy. Iâ€™m a Republican.â€¦

Despite the different organization and network names, it is evident these sites are connected. Other than simply sharing network metadata as described above, they also share bylines (including â€¦ Metric Media News Serviceâ€¦ and â€¦ Local Labs News Serviceâ€¦ for templated stories), servers, layouts, and templates.

Typically, creating entities that focus on communities, local news, and single issues important to the general public would be a worthwhile endeavour. But, the partisan material present on the more established networks along with the ideological leanings of some of the key personnel give us pause. The approach adopted by Dan Proftâ€™s *LGIS* network during the 2016 and 2018 election cycles provide a model for these relatively newer networks. The *Lansing State Journal* has highlighted stories about voter fraud using data from the Heritage Foundation on the Metric Media Michigan sites. Similar stories have also been published on the [Arizona](#), [Kentucky](#), [North Carolina](#), and [Iowa](#) sites.

Over the course of the 2020 campaign the Tow Center will continue to monitor these networks and others like it to better understand how these types of activity affect the course of campaigns, how they work, what their effects are, and, crucially, what the overall impact might mean for both news consumers and audiences. We intend to augment our initial analysis with further qualitative research across all the networks we find as the campaign progresses. In due course, we intend to release our datasets for other journalists and researchers to examine.

If you are a local reporter and have examples of similar networks operating in your area, please get in touch with us [here](#). If you have written a piece about the phenomenon in your local community, then please send us links. The phenomenon is often associated with right-leaning causes and personalities, but we believe the strategies could be adopted across the political spectrum.

How we established the scope of the network

The majority of this research was conducted using a combination of tools and products available online. Below we provide a short introduction to these tools and outline our process for students/journalists wishing to conduct similar analyses. If youâd like further help or guidance for similar investigations, please get in touch.

To create a website, two basic steps need to be followed: the domain or web address needs to be registered, and a web host set up to house the actual content of the website. When the first step is taken, a [WHOIS record](#) is created, which may include the details of the registrar (private WHOIS entries, where the details of the registrant are hidden or redacted, are becoming increasingly common, especially due to [recent regulation in Europe](#)).

And, when a website goes live, the content is pulled from a web host or server, which has a corresponding IP address (analogous to a phone number for a person). The IP address not only tells us where the content for the website is hosted, but it can also reveal what other websites reside on the same IP address.

The code that drives the website can contain metadata, which reveals other identifying traits, including analytics identifiers. Tracking identifiers allow websites to get aggregate user information and analytics, including demographic details, the amount of time spent on a specific page on the site, and how usersânavigated the site. It is highly unlikely for unrelated websites to share tracking identifiers, because these analytics services provide business intelligence and insights that can result in competitive advantage.

Therefore, by finding domains registered by the same people, websites residing on the same server (i.e. websites pointing to the same IP address), and websites sharing the same analytics IDs, it is relatively straightforward to build out the network. There are various free, freemium, commercial, and open-source tools available that help extract information at this level.

To ensure thoroughness, manual analysis is necessary coupled with original reporting from outside sources and research tools that allow us to explore corporate (including non-profit) entities, look up campaign finance details, and see historical content of websites. And, to ensure no false positives (sites incorrectly identified to be part of the network) slip in, manual confirmation is necessary.

For our analysis, we used:

- [RiskIQ](#) to identify websites that shared tracking identifiers (Google Analytics, Facebook Pixel, Quantcast, or NewRelic)
- [SecurityTrails](#) and Farsight [DNSDB](#) to determine which websites were housed on the same servers
- [Whoxy](#) to pull out WHOIS details
- ProPublicaâs [Non-Profit Explorer](#) to find key people associated with the organizations
- [Illinois Sunshine](#) and [Open Secrets](#) to look at campaign finance disclosures
- [Lexis Nexis](#) to research the corporate entities and key people

Starting with one of the domains from the original *Lansing State Journal* story, we found that many of the stories were sourced from *Michigan Business Daily*. A quick look at the *Michigan Business Daily* website immediately informed us that similar business dailies existed in every state and Washington D.C.

We looked up one of these business dailies (*Rhode Island Business Daily*) on *RiskIQ*, a self-proclaimed âcyberthreat intelligence tool,â to find which other websites shared the same identifiers (Figure 6). One identifier type proved to be key: the NewRelic ID. RiskIQ found 138 sites shared the same NewRelic

identifier. The sites included *Chicago City Wire*, *Cook County Record*, *Legal Newslne*, *Florida Record*, and Blockshopper.

.

Figure 6: Search by Tracking ID on RiskIQ.

The link to Blockshopperâ... and the subsequent [WHOIS lookup](#)â... confirmed there was an overlap between sites registered by Brian Timpone and the sites identified by RiskIQ, including [Chicago City Wire](#), [Kane County Reporter](#), and [SE Illinois News](#).

Manually exploring some of these sites, it was evident that some of the underlying technologies and templates they were using were identical, and yet part of separate networks. Anecdotally, one more thing stood out: different stories across states, topics, and networks had many of the same bylines.

Using these 138 sites as our base set, we input each of the domains into SecurityTrails and Farsight DNSDB to find which other sites were on the same IP address. Farsight DNSDB and Security Trails are both passive DNS tools, which amongst other things can give users details about website infrastructure, including what is the IP address of the server the website lives on (Figure 7.1) and who its mail provider is. Further, given an IP address, passive DNS tools provide users with all websites that share the same IP address (Figure 7.2). Websites with the same IP address are not necessarily related though. Websites hosted by companies like Squarespace and Wix (and many others) are likely to share IP addresses (lookups on two websitesâ... one hosted by Squarespace and one by Wixâ... showed more than five million domains for each of the two IP addresses). Similarly, â... parkedâ... domainsâ... domains that have been registered but not linked to any web-hostingâ... are likely to share IP addresses, as the web registrar will simply assign an IP address to said domain.

.

Figure 7.1: Extracting the IP address from a domain in SecurityTrails Figure

Figure 7.2: IP address lookup on on Farsight DNSDB using DNSDB Scout

We used both tools, plugging in the IP addresses of the domains we had identified, to get all other websites that were hosted on the same server. It might seem redundant to use multiple services to do exactly the same thing. However, the algorithms and technologies that back each of these services are different, and the extent of their archival/historical data vary as well. Consolidating data across services increases the odds of getting a more complete dataset. (Note: you can use both tools to get both, the IP address of a website and the list of websites pointing to the same IP address; there are also quicker ways of doing this, but this is the easiest)

Once we extracted still more domains from passive DNS lookups, we cross-checked these domains on RiskIQ, and the cycle continued. Combining the outputs from these sources, we were able to map out the network.

We are grateful for the guidance and advice from Farsight Security and REN-ISAC (The Research and Education Networking Information Sharing and Analysis Center).

We can put 500,000 bot generated comments on any website on Earth. We can rig America's Got Talent and American Idol Votes. We can make a 100% fake national election happen. We are "GOOGLE"!

Text-generation software is already good enough to fool most people most of the time. Itâ... s writing news stories, particularly in [sports and finance](#). Itâ... s talking with customers on merchant websites. Itâ... s writing [convincing op-eds](#) on topics in the news (though [there are limitations](#)). And itâ... s being used to bulk up â... pink-slime journalismâ... â... [websites](#) meant to appear like legitimate local news outlets but that publish propaganda instead.

Thereâ... s a record of algorithmic content pretending to be from individuals, as well. In 2017, the Federal Communications Commission had an online public-commenting period for its plans to repeal net neutrality. A staggering 22 million comments were received. Many of themâ... maybe halfâ... [verfake](#), [using stolen identities](#). These comments were also crude; 1.3 million were [generated from the same template](#), with some words altered to make them appear unique. They didnâ... t stand up to even cursory scrutiny.

These efforts will only get more sophisticated. In a recent experiment, the Harvard senior Max Weiss used a text-generation program to [create](#) 1,000 comments in response to a government call on a Medicaid issue. These comments were all unique, and sounded like real people advocating for a specific policy position. They fooled the Medicaid.gov administrators, who accepted them as genuine concerns from actual human beings. This being research, Weiss subsequently identified the comments and asked for them to be removed, so that no actual policy debate would be unfairly biased. The next group to try this wonâ... t be so honorable.

Chatbots have been skewing social-media discussions for years. About a [fifth of all tweets](#) about the 2016 presidential election were published by bots, according to one estimate, as were about a [third of all tweets](#) about that yearâ... s Brexit vote. An Oxford Internet Institute [report](#) from last year found evidence of bots being used to spread propaganda in 50 countries. These tended to be simple programs mindlessly repeating slogans: a quarter million pro-Saudi â... We all have trust in Mohammed bin Salmanâ... [tweets](#) following the 2018 murder of Jamal Khashoggi, for example. Detecting many bots with a few followers each is harder than detecting a few bots with lots of followers. And measuring the effectiveness of these bots is difficult. The [best analyses](#) indicate that they did not affect the 2016 U.S. presidential election. More likely, they distort peopleâ... s sense of public sentiment and their faith in reasoned political debate. We are all in the middle of a novel social experiment.

Over the years, algorithmic bots have evolved to [have personas](#). They have fake names, fake bios, and fake photosâ... sometimes [generated by AI](#). Instead of endlessly spewing propaganda, they post only occasionally. Researchers can detect that these are bots and not people based on their patterns of posting, but the bot

technology is getting better all the time, outpacing tracking attempts. Future groups won't be so easily identified. They'll embed themselves in human social groups better. Their propaganda will be subtle, and interwoven in tweets about topics relevant to those social groups.

We use this architecture to get hard political corruption and bribery data to Congress and the voters. We didn't use the bots that Eric Schmidt's and Media Matter's black ops groups use. Those are known as 'dirty bots' and Congress should make them illegal. The others use this architecture to manipulate national elections in order to try to control government treasuries for campaign finance billionaires!

How to Make a Spy Proof Faraday Cage (An Easy Illustrated Guide)

By [M.D. Creekmore](#) [Comments](#)

by Dr. Arthur Bradley

There is a great deal of confusion about DIY Faraday cages and Faraday Boxes. Not only about how to build them, but also what they actually protect against. In this article, Dr. Arthur Bradley, author of [Disaster Preparedness for EMP Attacks and Solar Storms](#), answers a few basic questions and perhaps debunks a few myths.

What is a Faraday cage?

A *Faraday cage* (a.k.a. Faraday shield or Faraday box) is a sealed enclosure that has an electrically conductive outer layer. It can be in the shape of a box, cylinder, sphere, or any other closed shape.

The enclosure itself can be conductive, or it can be made of a non-conductive material (such as cardboard or wood) and then wrapped in a conductive material (such as aluminum foil).

There are also readymade *military-grade Faraday Cages* that are meant to protect large electronics and gear such as portable gas or solar home-use generators, compact solar panels, computer towers, radios, electric medical equipment, smart home appliances, power tools, lights, and other large devices â€¦ [check out this one to see what Iâ€™m talking about](#). These are even more effective than anything you can build at home.

What does it do?

Simple and Effective Faraday Cage Construction

A Faraday cage works by three mechanisms: (1) the conductive layer reflects incoming fields, (2) the conductor absorbs incoming energy, and (3) the cage acts to create opposing fields. All of these work to safeguard the contents from excessive field levels.

A Faraday cage is particularly useful for protecting against an electromagnetic pulse that may be the result of a high-altitude nuclear detonation in the atmosphere (a.k.a. EMP attacks).

Despite rumors to the contrary, a Faraday cage is not necessary to protect against solar coronal mass ejections because the frequency content of such disturbances is at much lower frequenciesâ€¦ they donâ€™t couple energy efficiently into small-scale electronics, except through conducted paths (e.g., wires coming into the system). A better precaution against solar events is to unplug electronics and use quality surge suppressors.

How does field cancellation work?

Field cancellation occurs when the free carriers in the conductive material rapidly realign to oppose the incident electric field. If the cage is made from something non-conductive, the free carriers are not mobile

enough to realign and cancel the incident field.

How thick should the conducting layer be?

The conductive layer can be very thin because of something known as the skin effect. That term describes the tendency of current to flow primarily on the skin of a conductor. As long as the conducting layer is greater than the skin depth, it will provide excellent shielding because the absorption loss will be large.

The skin depth is a function of the frequency of the wave and the conductor material. As an example, consider that for a frequency of 200 MHz, the skin depth of aluminum is only about 21 microns. EMP pulses can have a frequency content that ranges up to 1,000 MHz.

Therefore, wrapping a box in a couple of layers of heavy-duty aluminum foil (typically about 24 microns thick) provides the necessary conductor thickness to protect against high-frequency radiated fields.

Does it matter what type of conductor is used?

Not much. The conductivity of nearly any metal is good enough to allow the carriers to easily realign to cancel external fields. For example, if silver (the best conductor) is used in place of aluminum, the skin depth at 200 MHz is reduced to about 4.5 microns. Of course, the high cost of silver would prevent using it for such a purpose.

Can a Faraday cage have holes?

Yes, as long as the holes are small with respect to the wavelength of the incident electromagnetic wave. For example, a 1 GHz wave has a wavelength of 0.3 meters in free space. As long as the holes are significantly smaller than that dimension (i.e., a few millimeters), they won't let in much of the incident wave. This is why fine conductive mesh can be used when constructing a **DIY Faraday cage**. In practice, the cage's lid or door usually causes the most leakage. Taping the seam with conductive tape helps to reduce this leakage.

Can you use existing conductive enclosures?

Yes, there are many conductive enclosures that can be used, including ammo cans, metal garbage cans, anti-static bags, and even old microwave ovens. Each has its own level of effectiveness as covered in my book, *Disaster Preparedness for EMP Attacks and Solar Storms*. The key criterion is that the gaps and seams remain very small.

Must the cage be grounded?

There is a great deal of confusion regarding grounding of a Faraday cage. Grounding of the cage (i.e., connecting it to some Earth-referenced source of charge) has little effect on the field levels seen inside the box. Grounding primarily helps to keep the cage from becoming charged and perhaps re-radiating. The bottom line is that an ungrounded cage protects the contents from harmful electromagnetic fields as well as a grounded one.

Anti-static Bags

Static Bags

[Anti-static bags](#) are readily available to protect electronic components against electrostatic discharge. They can be purchased in many different sizes, including some large enough to hold radio equipment. While they do offer shielding from EMP, not all products are created equal. Testing confirmed that products certified to MIL-PRF-8170 and/or MIL-PRF-131 offer the greatest protection from an EMP.

The results from testing three different types of bags are provided in Disaster Preparedness for EMP Attacks and Solar Storms. When selecting an ESD bag, consider not only the shielding effectiveness but also the physical ruggedness of the bag. A tear or large hole can compromise the bag by allowing EMP energy to enter.

Larger Faraday Cages in a House

Storing a larger set of electronics might require an entire room. Engineers who work in electromagnetics often use "shield rooms" to conduct experiments because they do an excellent job of filtering out interfering signals, providing in excess of 100 dB of shielding. A poor man's Faraday shield room can be made inside a house by lining a small closet with heavy-duty aluminum foil, covering all four walls, the floor, the ceiling, and the inside of the door.

Overlap and tape the seams using either conductive or regular cellophane tape. There can be no conductive penetrations into the room, or it will seriously degrade the shielding. Cover all electrical outlets, light switches, etc. with aluminum foil. Do not plug anything into the electrical outlets. Also, lay a piece of plywood or cardboard on the floor so that it can be walked on without damaging the aluminum foil. Rooms built in this way have been shown to offer more than 50 dB of shielding up to several hundred MHz.

How To Protect Red-Dot and Laser Sights From EMP

This video shows how to use RF cloth to protect red-dot, laser, and other electro-optical sights from an EMP. Testing was done in my laboratory to determine which RF cloth performed best for EMP protection. This particular cloth is made with stainless steel fibers. You can use this for guns that are kept outside of a metal safe, or as an additional layer of protection for those kept inside of a safe.

Protect Generators and Cars from EMP

This video describes how to protect generators and cars from EMP using a conductive cloth to protect cars and generators from a high-altitude nuclear EMP attack.

Testing the Shielding Effectiveness of a Metal Garbage Can

Many people are looking for an inexpensive Faraday cage to protect personal electronics from a nuclear-generated EMP. Unfortunately, it requires quite a bit of test equipment to determine shielding effectiveness.

On the transmit side, it requires a signal generator, a high-power amplifier, and a broadband antenna. The receive side requires a small, battery-operated spectrum analyzer. Iâ€¦ ve done quite a bit of testing on various makeshift Faraday cages, and this article discusses the effectiveness of a metal garbage can.

A baseline open-air measurement is first taken to determine the ambient field levels at some predetermined frequency (i.e. 500 MHz in this case). The levels at the spectrum analyzer are shown to be at -36 dBm.

When placed inside the garbage can, the measurement is shown to be -46 dBm, meaning that the can offered 10 dB of shielding. Not too great!

Much of the energy was believed to be coming in through the seam around the lid. It was, therefore, taped with conductive tape and the measurement repeated.

Next, the spectrum analyzer is placed into a metal garbage can, and the measurement is repeated.

The new measurement was shown to be at -77 dBm, meaning that the taped can offered 41 dB of protection. Much better!

This experiment showed that a metal garbage can can serve as a very good Faraday cage, but only if the seams are taped. Remember, it is not small holes that matter most, but rather long narrow slots, such as those around the lid's seam.

Expensive EMI copper tape and cheap aluminum duct tape both worked equally well, so a quick stop at the hardware store will get you what you need.

To learn more about EMP protection, check out Disaster Preparedness for EMP Attacks and Solar Storms.

Also, to find the highest quality EMP bags, see <http://disasterpreparer.com>.

M.D. Creekmore

Owner / Editor at MDCreekmore.com

I've been interested in prepping and homesteading topics for over 25 years. I'm the author of [four books that you can find here](#). Five days a week (Monday through Friday) I will get up at 6:00 o'clock, drink a cup of coffee, eat breakfast, pour another cup of coffee and then head to my home office where I will scour the internet for the most 10 recent and important news and happening from around the world and post those in a ten-point list with my thoughts and options. Hope you enjoy.

How to Run for President of the United States If You Have No Money

In the United States, the President is the most powerful and prominent public official. He or she is elected every 4 years and runs the day to day operations of the government. Any eligible citizen can run for the office, though winning the position requires a lot of time, money, and dedication you can use other people's time, money and dedication.

It costs \$450 million dollars to run for President if you are an arrogant, fake-socializing, schmoozer that pays retail for everything and contracts every service because you don't know how things actually work. For example, millions of people pay \$120.00+ per month for Comcast cable TV while knowledgeable people pay \$10.00 per month for their TV and get more than Comcast provides. You can run for President, and win, if you are smart, technically savvy and do everything yourself with a small, tight, clever team that knows how to work mass media networks.

You have to have smart ideas, that can really work and you need to be able to think on your feet. Most past Presidents were dyslexic/autistic. That is why they could instantly go on-and-on about any subject. Robin Williams had this kind of 'instant output' mind. Gavin Newsom, Donald Trump, JFK and many other famous politicians had ramble brains. The media loved that they could fill airtime with hot air that sounded good.

To get other people's money, you will have to promise them things that Congress, The U.S. Treasury and common-sense will never actually allow you to do. You lie, shake hands with some tech billionaires and rich widows and you will have at least \$30 million in no time.

Before you decide to run, you need to meet with, at least, 300+ citizens that you do not know, in little town halls, and have them ask you questions about your platform and see if they can shoot you down. 95% of potential candidates can't make it through this phase, without having a nervous break-down, so challenge yourself with this effort before you do anything else. Save yourself the time, money and sanity on this phase above, and before, all else.

Billionaires are often assholes with too much money and heads so big that they think "They should be President". They often run for President and lose because they are tone-deaf to the real world.

Generally, candidates spend 2/3rds of their time and money fighting defamation and character assassination attacks from their opponents and special interest groups and the other third of their money attacking those two group. A weak mind will crumble under such an onslaught.

Method 1 Paying Your Dues

1. **Make sure you are at least 35 years old and a natural born United States citizen.** You must also have lived 14 years in America to run for President.^[1] (If you are not 35 yet, you can start planning early!)
 - ◆ There is no way around this. You have to be a tried-and-true American. And it helps if you're an American with a squeaky clean criminal record, too.
2. **Get the look.** Alright, we can discuss the pitfalls of America's materialism and vanity later, but the long and short of it all is that generally, the better-looking (and taller) candidate wins.^[2] So go primp yourself -- you certainly have a decent excuse to do so.
 - ◆ You'll need a nice suit for your more important conventions and meetings. Then, when you're meeting with the townsfolk, men you'll need to bust out that pair of pressed khakis and long-sleeved, white, button-down shirt. Bring your best business casual wear. You will be

rolling up your sleeves and digging into your best speeches on how you can help America!

- ◆ Work on that fake smile. It needs to say, "You! Yes, you. I'm doing all of this for YOU because I CARE." Does your smile say that? When your smile says it, does your body agree?

3. **Nail down the body language.** From this point on, you're a politician. Whether you believe what you're saying or not, you have to deliver it in a convincing and reasonable manner. You can have the words on a piece of paper to cover what comes out of your mouth, but will your body just be one giant tell?

- ◆ Get yourself into uncomfortable situations. After all, you're gonna be getting some heat -- you need to know how to handle the kitchen. The last thing you want is to be a second-rate version of James Clapper, rubbing your forehead nervously while you tell the world the NSA doesn't follow around civilians. That'll lose you credit that took you years to establish.
- ◆ Think in congruency. You know that one politician (one here meaning "dozens") that says something like, "I'm sincerely receptive to a dialogue with the young people," all the while shaking his finger or his fist at the audience? Neither are things you shouldn't do alone -- *they're just obvious tells when combined*. So get in the mirror and monitor not just your face, but your entire body.

4. **Work on that resume.** Prior to Donald Trump, every major party nominee since 1932 was either a current or former Vice President, Senator, Governor, or five-star general.^[3] If you're flipping burgers, you may want to start seeking out that managerial position now.

- ◆ Your other option is to attract significant *favorable* notice from the news media, party officials, prospective campaign strategists, and donors. How you do it is up to you. But you may want to start with this next point:

5. **Make some friends.** Lots and lots and lots and lots of friends. There is strength in numbers for sure, but you're also looking to meet people who can flit you across the country for all your campaign needs.

- ◆ Don't be disheartened if you can't get the attention of a lot of people right away. These things take time. Plenty of other folks have gotten their names on the ballot with only a handful of backers. Bradford Lyttle ran in 2008 and received 111 votes. Surely you know 111 people. Jonathan E. Allen ran to the tune of 482 votes. The more the merrier, definitely -- but less won't keep you from running. P.S. Do NOT make a TikTok publicly humiliating a group of freshmen for public display of affection.

Method 2 Getting Around the Red Tape

1. **Register to be an official candidate.** If you spend or raise over \$5,000 dollars for your cause, you are then automatically considered a candidate by the FEC (Federal Elections Commission). Go to their website and start the process rolling.^[4]

- ◆ You'll have to keep the FEC updated with financial reports on income, personal spending, and debt settlements for the entirety of your campaign. If you can, hire someone now to do this for you. You'll be too busy wining and dining, schmoozing and boozing, and meeting and greeting to balance receipts.

2. **Get your name on the ballot in all 50 states.**^[5] This may be difficult and expensive, but hey! This is probably the only time you'll run for president, so it's best to go big or go home. Think of it as an investment in your candidacy, and for America.

- ◆ Each state is different. You must contact each state's Secretary of State for the forms needed to be listed. Getting signatures and support across the state is the goal. As always, there's a website to help you get started with that, too.^[6]

3. **Set up a presidential exploratory committee.**^[7] This is (usually) a nonprofit organization to find out if your campaign will actually work. Choose a campaign manager to delegate the necessary duties. Make a website explaining what you plan to do, your perspectives, and why you're running. Make it very convincing and be honest. Get your name into opinion polls. All in all, start spreading the word.
 - ◆ Assemble a team of ground workers. They'll go knocking door-to-door, spreading the good news of your name and getting a feel for the area. Do this in as many metropolitan areas as possible to feel out the competition and the areas you may need to concentrate on for your campaign.

Method 3 Hitting the Ground Running

1. **Set up your merch stand.** Now that you're an official candidate and your committee has said, "Yes, believe it or not, we *can* do this," it's time to spread the word. And it's also time to make even more connections at your local print design shop (if you haven't already) and sucker your friends and family into touting around your logo for the next 2 years.
 - ◆ Design t-shirts, car magnets, sandwich boards, yard signs, and bumper stickers all with your name and/or catchphrase. Ask local establishments if you can put flyers in their windows (or if they can name a product after you (at least temporarily)). Send these out to your friends on the opposite coast and have them distribute them there.
 - ◆ Go virtual! Start a YouTube channel and get a website or blog. Get an account for your campaign on Twitter, Facebook, and Instagram. How else will you reach the newest generation of voters?
2. **Have a clear perspective on all current issues.** When people start seeing your name out there, they're going to ask, "Who is this guy/woman? What does he/she stand for? Is he/she serious?" Yes, you *are* serious and you have the sensibilities to prove it.
 - ◆ If you like something or think it needs to be changed (for example: humanitarian aid to foreign countries), have it all planned out. What party are you aligned with? Do you support their generic stance on all issues? Where do you fall on the liberal/conservative scale?
 - ◆ Make these beliefs clear on your blog, your social networking accounts, and to your friends and family. The more people who can explain you *for* you, the better.
3. **Create a campaign platform.** What are your goals? Lower taxes? Reducing poverty? Creating jobs? Higher standards of education? Think about all the biggies when it comes to previous elections -- what changes do you want to promise?^[8]
 - ◆ It's a good idea if you actually believe what you're putting out there. It'll be much easier to remain consistent and not get caught switching sides or dilly-dallying on an issue. If you believe something the public doesn't want to hear, quite frankly, good luck.

Method 4 Getting In It to Win It

1. **Start the campaign.** Using your campaign media staff, come up with a way to get your name out there. Some ways to do this are billboards, newspaper ads, TV ads, online ads, etc. Give speeches and set up fundraisers. Be creative.^[9]
 - ◆ You may want to start with the early caucus states like Iowa, New Hampshire, and South Carolina. These states can give you an early lead that is hard to catch up in the long run. They'll also give you a boost in being considered for the party nomination.
 - ◆ Be ready to travel. If it wasn't already clear, you'll need to quit your job. You'll be racking up those miles daily, so load up on Dramamine, deodorant, and sign up for a Premier Member card at your favorite chain of hotels.
 - ◆ Campaigning requires vast amounts of money. Come up with an easy way to accept donations and to stay in touch with your initial backers. They're your bread and butter for a long time coming.

2. **Hone your debating skills.** Luckily, you've probably been public speaking for months, so the basics shouldn't be foreign to you. But when you get in front of those bright lights and that timer, the gloves come off. Start practicing ASAP -- you'll be glad you did.
 - ◆ Know what you believe and are advocating. What's more, know what everyone *else* believes. Not only do you have to have *you* down, but you have to have your opponents and the world down too. Study precedents, current events, and all your competitors so you know what to expect when you get in the inquisition arena. If you come unprepared, the whole country will be watching your darting eyes and unsteady hands. Do the research on debating techniques while you're at it. You need to be forceful but not a stick-in-the-mud, caring but not a pushover, and charismatic to boot.
3. **Prepare yourself for anything.** You've spent a lot of hard-earned time and money campaigning and now you're getting down to the nitty gritty. If you're vying for a spot with the Republican or Democratic party, you have your work cut out for you. Failure may be inevitable. Consider creating a new party (very hard) or running as an independent.
 - ◆ Surround yourself with a sturdy support system before you get in too deep. They'll be able to catch you when you fall. Running for President of the United States is an incredibly stressful endeavor and should not be taken lightly if for no other reason than your health.
 - ◆ Generally, Americans like a candidate they can relate to -- at least a little. Keeping your feet on the ground and a good head on your shoulders will benefit you, come failure *or* victory.

How to copy what we are doing in this project

In the old days, The U.S. Government killed hundreds of thousands of coyotes because ranchers lobbied them to do so. Today, there are more coyotes than ever. How did that happen? On a nice full moon you hear coyotes howling, right? What they are doing is operating a status check signal system to tell the other coyotes how many of them there are. If there are less coyotes howling than the last time, then that tells all the packs: "Make more coyotes". Breed!

Our system does that. Our system automatically replicates itself on any available server-space it finds in the world. It always "Coyote Pings" all of the nodes around the world and if it finds nodes have been attacked, it tells the network: "Make more mirror nodes". Breed!

We use peer-to-peer server-free mesh networking combined with traditional server networking. You can copy what we do and do it yourself, add server space on your system for our public use and emulate the process.

We taught, and continue to teach, every citizen how to break, destroy, expose and blockade every corrupt politician and their financiers from ever profiting from their covert payola accounts. We encourage you to read the public manuals about how you can use FBI, Interpol, CIA and NSA technologies, 100% legally, to destroy every corrupt political scheme. You will learn how to find every account that every family member and friend of a corrupt person has.

How many nodes and copies of this site exist? We don't know! The software was placed on the internet in 2008 with orders to self-replicate and grow forever. How many citizens work on this? We don't know. All participation is anonymous and false-fronted. To input anything just post your material anywhere on the public web with the related code-words in the metatags. Our bots will find it. Use torrents if you wish, and break your materials up into odd-size torrent segments for our Draw-string technology to pull back together. You can use the U.S. Courts filing system, Reddit/Voat posts, archives, etc. Just put your evidence material up in any common file format.

To end political corruption we all have to work together to expose all of the covert payola; who sends it and who gets it!

How to destroy any company or person on Earth (as long as they are criminally corrupt)

By Andre Pierson and Emily Watson

The feature film on Netflix called: *The Corporation*... , and hundreds of thousands of University white-papers, drill down on the fact that a corrupt entity will infect all of the parts of itself. A dirty politician, company or organization only gets dirtier and more evil.

Like a tree, though, a large criminal corporation or entity can be easily toppled by simply using the fact that it's core is rotten and diseased; and by then gently pushing it over. Once off balance, it's own weight will cause it to crush itself. The bigger they are, the harder they fall. An IBM or a Google can be brought down with the same ease as a crooked neighbourhood gardener who is stealing from the neighbours. No matter the size, nor the billions of dollars they flaunt, a handful of well intentioned voters, or FBI agents, can wipe them out. Successful take-downs can receive the thanks of a grateful nation, law enforcement commendations and, sometimes, cash awards.

The only rule is: *The target must be corrupt!*

This will not work on a 100% ethical, non-political, non-human-rights abusing target.

In the case of a company like Gawker or Google, most Google executives and investors have a cult-like belief that they are *doing the bidding of a higher calling*... and that they must *succeed at any cost*... (Including murders). Google bosses believe that all who oppose their privacy abuse, spying, voter manipulations, bribery, stock market rigging and psychological warfare are *enemies*... . Google uses the exact same culture of denial as Hitler and the SS used to rationalize the mass murders of Jews. Nobody inside Google believes that Google is evil because they are conditioned to think that way using Scientology-like *reinforcement messaging*... .

HSBC bank ran money laundering schemes for criminal operations, corrupt politicians and drug cartels. HSBC staff knew they were doing evil but they thought they could get away with it.

Both companies have different corporate conditioning which enable their crimes, but both can fall just as suddenly and as hard as an Enron, a Solyndra or a Bear Sterns.

We are going to teach you how to *Take Down Teams*... can wipe out any company and how you can do it too. Not only is it entirely legal for you to wipe out bad guys, but 200 million voters, cops, reporters and researchers will help you do it.

Your tools:

#1- The Streisand Effect

With this tool you will get the bad guys to promote their own destruction. The **Streisand effect** is the phenomenon whereby an attempt to hide, remove, or censor a piece of information has the [unintended consequence](#) of publicizing the information more widely, usually facilitated by the [Internet](#). It is an example of [psychological reactance](#), wherein once people are aware something is being kept from them, their motivation to access and spread the information is increased.[\[1\]](#) It is named after American entertainer [Barbra Streisand](#), whose 2003 attempt to suppress photographs of her residence in [Malibu, California](#), inadvertently drew further public attention to it. Similar attempts have been made, for example, in [cease-and-desist letters](#) to suppress [numbers](#), files, and websites. Instead of being suppressed, the information receives extensive publicity and media extensions such as videos and spoof songs, often being widely [mirrored](#) across the Internet or distributed on [file-sharing networks](#).[\[2\]\[3\]](#)

[Mike Masnick](#) of [Techdirt](#) coined[\[4\]](#) the term in 2005 in relation to a holiday resort issuing a takedown notice to urinal.net (a site dedicated to photographs of urinals) over use of the resort's name.[\[5\]](#)

How long is it going to take before lawyers realize that the simple act of trying to repress something they don't like online is likely to make it so that something that most people would never, ever see (like a photo of a urinal in some random beach resort) is now seen by many more people? Let's call it the Streisand Effect.

â... â... *Mike Masnick*,[\[5\]](#)

The term invoked Barbra Streisand who had unsuccessfully sued photographer [Kenneth Adelman](#) and Pictopia.com for violation of privacy.[\[6\]](#) The US\$50 million lawsuit endeavored to remove an aerial photograph of Streisand's mansion from the publicly available collection of 12,000 [California](#) coastline photographs.[\[2\]\[7\]\[8\]](#) Adelman photographed the beachfront property to document [coastal erosion](#) as part of the [California Coastal Records Project](#), which was intended to influence government policymakers.[\[9\]\[10\]](#) Before Streisand filed her lawsuit, "Image 3850" had been downloaded from Adelman's website only six times; two of those downloads were by Streisand's attorneys.[\[11\]](#) As a result of the case, public knowledge of the picture increased substantially; more than 420,000 people visited the site over the following month.[\[12\]](#)

In November 2007, [Tunisia](#) blocked access to [YouTube](#) and [Dailymotion](#) after material was posted of [Tunisian](#) political prisoners. Activists and their supporters then started to link the location of then-President [Zine el-Abidine Ben Ali](#)'s palace on [Google Earth](#) to videos about civil liberties in general. *The Economist* said this "turned a low-key human-rights story into a fashionable global campaign".[\[13\]](#)

The French intelligence agency [DCRI](#)'s deletion of the French-language Wikipedia article about the [military radio station of Pierre-sur-Haute](#)[\[14\]](#) resulted in the article temporarily becoming the most-viewed page on the [French Wikipedia](#).[\[15\]](#)

A 2013 libel suit by [Theodore Katsanevas](#) against a [Greek Wikipedia](#) editor resulted in members of the project bringing the story to the attention of journalists.[\[16\]](#)

In April 2007, a group of companies that used [Advanced Access Content System \(AACS\) encryption](#) issued cease-and-desist letters demanding that the system's numerical key be removed from several high-profile websites, including [Digg](#). This led to the key's proliferation across other sites and chat rooms in various formats, with one commentator describing it as having become "the most famous number on the Internet".^[17] Within a month, the key had been reprinted on over 280,000 pages, had been printed on T-shirts and tattoos, and had appeared on [YouTube](#) in a song played over 45,000 times.^[18]

In September 2009, multi-national oil company [Trafigura](#) obtained a [super-injunction](#) to prevent [The Guardian](#) newspaper from reporting on an internal Trafigura investigation into the [2006 Ivory Coast toxic waste dump](#) scandal, and also from reporting on even the existence of the injunction. Using [parliamentary privilege](#), Labour MP [Paul Farrelly](#) referred to the super-injunction in a parliamentary question, and on October 12, 2009, [The Guardian](#) reported that it had been gagged from reporting on the parliamentary question, in violation of the [1689 Bill of Rights](#).^{[19][20]} Blogger Richard Wilson correctly identified the blocked question as referring to the Trafigura waste dump scandal, after which [The Spectator](#) suggested the same. Not long after, Trafigura began trending on [Twitter](#), helped along by [Stephen Fry](#)'s retweeting the story to his followers.^[21] Twitter users soon tracked down all details of the case, and by October 16, the super-injunction had been lifted and the report published.^[22]

In November 2012, Casey Movers, a [Boston](#) moving company threatened to sue a woman in [Hingham](#) District Court for libel in response to a negative [Yelp](#) review. The woman's husband wrote a blog post about the situation, which was then picked up by Techdirt^[23] and [The Consumerist](#)^[24] as well as the [Reddit](#) community.^[25] By the end of the week, the company was reviewed by the [Better Business Bureau](#), which later revoked its accreditation.^[26]

In December 2013, [YouTube](#) user ghostlyrich uploaded video proof that his [Samsung Galaxy S4](#) battery had spontaneously caught fire. [Samsung](#) had demanded proof before honoring its warranty. Once Samsung learned of the YouTube video, it added additional conditions to its warranty, demanding ghostlyrich delete his YouTube video, promise not to upload similar material, officially absolve the company of all liability, waive his right to bring a lawsuit, and never make the terms of the agreement public. Samsung also demanded that a witness cosign the settlement proposal. When ghostlyrich shared Samsung's [settlement proposal](#) online, his original video drew 1.2 million views in one week.^{[27][28]}

In August 2014, it was reported that a guest house in [Hudson, New York](#), had a policy that "there will be a \$500 fine that will be deducted from your deposit for every negative review of USGH [Union Street Guest House] placed on any Internet site by anyone in your party and/or attending your wedding or event."^[29] The policy had been used in an attempt to suppress an unfavourable November 2013 [Yelp](#) review.^[30] Thousands of negative reviews of the policy were posted to [Yelp](#) and other review sites.^[31]

In January 2008, The [Church of Scientology](#)'s unsuccessful attempts to get Internet websites to delete a video of [Tom Cruise](#) speaking about [Scientology](#) resulted in the creation of [Project Chanology](#).^{[32][33][34]}

On December 5, 2008, the [Internet Watch Foundation](#) (IWF) [added](#) the [English Wikipedia](#) article about the 1976 [Scorpions](#) album [Virgin Killer](#) to a child pornography blacklist, considering the album's cover art "a potentially illegal indecent image of a child under the age of 18".^[32] The article quickly became one of the most popular pages on the site,^[35] and the publicity surrounding the censorship resulted in the image being spread across other sites.^[36] The IWF was later reported on the [BBC News](#) website to have said "IWF's overriding objective is to minimise the availability of indecent images of children on the internet, however, on this occasion our efforts have had the opposite effect".^[37] This effect was also noted by the IWF in its statement about the removal of the URL from the blacklist.^{[38][39]}

In June 2012, [Argyll and Bute Council](#) banned a nine-year-old primary school pupil from updating her blog, [NeverSeconds](#), with photos of lunchtime meals served in the school's canteen. The blog, which was already

popular, started receiving an immense number of views due to the international media furor that followed the ban. Within days, the council reversed its decision under immense public pressure and scrutiny. After the reversal of the ban, the blog became more popular than it was before.[40]

In April 2016, it was revealed that officials at the [University of California, Davis](#), including Chancellor [Linda P.B. Katehi](#) paid consultants at least \$175,000 to scrub the internet of stories about Katehi and the administration's involvement in the [UC Davis pepper-spray incident](#). News of the payments brought the event back into the news, adding to negative press in the wake of revelation about Katehi's involvement on outside boards. On April 27, 2016, [University of California](#) President [Janet Napolitano](#) removed Katehi from her post and placed her on paid [administrative leave](#) pending an investigation into possible violations of university policies.[41] Following the investigation, Katehi resigned on August 9, 2016.[42]

In May 2011, [Premier League](#) footballer [Ryan Giggs](#) sued Twitter after a user revealed that he was the subject of an anonymous [privacy injunction](#) (informally referred to as a "super-injunction"[43]) that prevented the publication of details regarding an alleged affair with model and former [Big Brother](#) contestant [Imogen Thomas](#). A blogger for the [Forbes](#) website observed that the British media, which were banned from breaking the terms of the injunction, had mocked the footballer for not understanding the effect.[44] *The Guardian* subsequently posted a graph detailingâ... without naming the playerâ... the number of references to the player's name against time, showing a large spike following the news that the player was seeking legal action.[45]

A similar situation involving super-injunctions in England and Wales have occurred, involving [Jeremy Clarkson](#). [46] Since January 2016 an unnamed celebrity couple have also used an injunction to prevent media in England and Wales reporting events which have been featured in foreign media and on the internet.[47]

In January 2017 New York State police arrested Joseph Talbot on Dec. 29 in Wayne County and charged him with driving while intoxicated. Newspaper owner and editor Ron Holdraker says Talbot bought nearly 1,000 newsstand copies at \$1.25 each. The story of his attempt to buy physical copies of the news but it still being posted to the internet made the news. [48]

The Streisand effect has been observed in relation to the [right to be forgotten](#), as a litigant attempting to remove information from search engines risks the litigation itself being reported as valid, current news.[49][50]

Stay Tuned For Part Two...

I helped invent the internet. How did it go so wrong?

- Facebook, Google-YouTube, Netflix, Linked-In and the sociopath Sandhill Road VC's turned it into a sex-trafficking, spy-ridden, election-meddling hell and the politicians that those companies bribe like to keep it that way!

Scientists inadvertently created the perfect formula for the â... darkâ... side of the internet to spread like a virus by enabling anyone to reach millions of people inexpensively and anonymously.

(Rafe Swan / Getty Images/Cultura RF)

By Leonard Kleinrock

When I was a young scientist working on the fledgling creation that came to be known as the internet, the

ethos that defined the culture we were building was characterized by words such as ethical, open, trusted, free, shared. None of us knew where our research would lead, but these words and principles were our beacon.

We did not anticipate that the dark side of the internet would emerge with such ferocity. Or that we would feel an urgent need to fix it.

How did we get from there to here?

While studying for my doctorate at MIT in the early 1960s, I recognized the need to create a mathematical theory of networks that would allow disparate computers to communicate. Later that decade, the Advanced Research Projects Agency â€¦ a research funding arm of the Department of Defense created in response to Sputnik â€¦ determined they needed a network based on my theory so that their computer research centers could share work remotely.

My UCLA computer lab was selected to be the first node of this network. Fifty years ago â€¦ on Oct. 29, 1969 â€¦ a simple â€¦ Loâ€¦ became [the first internet message](#), from UCLA to Stanford Research Institute. We had typed the first two letters of â€¦ loginâ€¦ when the network crashed.

This quiet little moment of transmission over that two-computer communication network is regarded as the founding moment of the internet.

During [its first 25 years](#), the internet grew dramatically and organically with the user community seeming to follow the same positive principles the scientists did. We scientists sought neither patents nor private ownership of this networking technology. We were nerds in our element, busily answering the challenge to create new technology that would benefit the world.

Around 1994, the internet began to change quickly as dot-coms came online, the network channels escalated to gigabit speeds and the World Wide Web became a common household presence. That same year, Amazon was founded and Netscape, the first commercial web browser, was released.

And on April 12, 1994, a â€¦ smallâ€¦ moment with enormous meaning occurred: The transmission of the first widely circulated spam email message, a brazen advertisement. The collective response of our science community was â€¦ How dare they?â€¦ Our miraculous creation, a â€¦ researchâ€¦ network capable of boundless computing magnificence had been hijacked to sell â€¦ detergent?

By 1995, the internet had 50 million users worldwide. The commercial world had recognized something we had not foreseen: The internet could be used as a powerful shopping machine, a gossip chamber, an entertainment channel and a social club. The internet had suddenly become a money-making machine.

With the profit motive taking over the internet, the very nature of innovation changed. Averting risk dominated the direction of technical progress. We no longer pursued â€¦ moonshots.â€¦ Instead advancement came via baby steps â€¦ â€¦ design me a 5% faster Bluetooth connectionâ€¦ as opposed to â€¦ build me an internet.â€¦ An online community that had once been convivial transformed into one of competition, antagonism and extremism.

And then as the millennium ended, our revolution took a more disturbing turn that we continue to grapple with today.

By suddenly providing the power for anyone to immediately reach millions of people inexpensively and anonymously, we had inadvertently also created the perfect formula for the â€¦ darkâ€¦ side to spread like a virus all over the world. Today more than 50% of email is spam, but far more troubling issues have emerged â€¦ including denial of service attacks that can immobilize critical financial institutions and malicious botnets

that can cripple essential infrastructure sectors.

Other dangerous players, such as nation-states, started coming onto the scene around 2010, when [Stuxnet malware](#) appeared. Organized crime recognized the internet could be used for international money laundering, and extremists found the internet to be a convenient megaphone for their radical views. Artificial intelligence, machine learning, facial recognition, biometrics and other advanced technologies could be used by governments to weaken democratic institutions.

The balkanization of the internet is now conceivable as firewalls spring up around national networks.

We could try to push the internet back toward its ethical roots. However, it would be a complex challenge requiring a joint effort by interested parties â€¦ which means pretty much everyone.

We should pressure government officials and entities to more zealously monitor and adjudicate such internet abuses as cyberattacks, data breaches and piracy. Governments also should provide a forum to bring interested parties together to problem-solve.

Citizen-users need to hold websites more accountable. When was the last time a website asked what privacy policy you would like applied to you? My guess is never. You should be able to clearly articulate your preferred privacy policy and reject websites that don't meet your standards. This means websites should provide a privacy policy customized to you, something they should be able to do since they already customize the ads you see. Websites should also be required to take responsibility for any violations and abuses of privacy that result from their services.

Scientists need to create more advanced methods of encryption to protect individual privacy by preventing perpetrators from using stolen databases. We are working on technologies that would hide the origin and destination of data moving around the network, thereby diminishing the value of captured network traffic. Blockchain, the technology that underpins bitcoin and other digital currencies, also offers the promise of irrefutable, indisputable data ledgers.

If we work together to make these changes happen, it might be possible to return to the internet I knew.

Leonard Kleinrock is distinguished professor of computer science at the UCLA Samueli School of Engineering.

THESE ARE OUR DAILY REPORTS TO THE SAN FRANCISCO, NEW YORK, CHICAGO, LOS ANGELES AND WASHINGTON DC OFFICES OF THE FBI, THE U.S. CONGRESSIONAL COMMITTEES AND RELATED REGULATORY AGENCIES. WE ARE SEEKING JUSTICE IN THIS CASE BECAUSE WE SUFFERED DAMAGES FROM THE CRIMES COMMITTED, DETAILED HEREIN, WHICH USED TAXPAYER RESOURCES TO OPERATE THOSE CRIMES AND BENEFIT FROM THEM.

If you are a federal or Congressional official who can help us, please contact us at: helpus@fbi-report.net

What this evidence proves:

We and our co-workers witnessed some guys stealing money from both, our company and the US Government Treasury. We reported it to the cops. It turned out to be part of one of the biggest embezzlement crimes ever exposed. Major political figures and tech "bosses" turned out to be running a "PayPal Tech

Mafia". The bad guys then began hunting us down and attacking us in reprisal "for the rest of our lives" per their threats and their ongoing retribution vendettas.

It was found that famous senators, their Silicon Valley oligarch financiers and their associates run an organized crime insider trading scam that abuses taxpayers and sabotages competing businesses. The terminations of the heads of the FBI, The Department of Energy and other famous people in politics is because of their operation, and cover-ups, of this case. The cover-ups are still going on. Our ability to get justice in this matter is still blockaded.

We will fight to the death to get justice because they tried to kill us, ruin our business and destroy our names. Every day an increasingly large number of the 300 million potential voters join the effort to expose, shame, dox, bankrupt, boycott and 100% legally exterminate the corrupt entities who did these illicit things by using our Democracy as their billionaire's plaything. Hundreds of the perpetrators have already been fired, placed under permanent public surveillance, financially tracked through every asset, reported to federal agencies and targeted for investigation. The goal is to interdict every single person, company and political operative group who is engaging in these crimes using crowd-sourced investigation and intelligence tools.

This evidence proves:

- That a mobster-like cartel of men operate a racketeering operation out of Silicon Valley that manipulates elections, news and taxpayer funding policies.
- That this cartel is comprised of sick, megalomaniac, sexually addicted and abusive men who protect each other with billions of dollars of cover-ups involving the bribery of Senators with insider trading stock and covert campaign financing.
- That this cartel receives hundreds of billions of dollars of profits from their crimes and this causes them to stoop to murders, extortion, black-lists, funding blockades and other crimes, in order to gather their ill-gotten gains.
- That the investors of Google, Facebook, Twitter, Amazon, Ebay, Netflix and a related set of Silicon Valley monopolies conspire in these efforts to manipulate the stock market, lie to advertisers and bias all digital news and information, globally, to push their selfish ideologies.
- That Senators Pelosi, Feinstein, Boxer, Harris, Reid have an active criminal participation in, and benefit from, these efforts and that they, in fact, along with Steven Chu had illicit dealings with Russian and Chinese financiers and they are paid with insider trading stock, revolving door jobs, and other covert payola.
- That Google, Facebook and Twitter have rigged and manipulated U.S. elections since Barack Obama was elected.
- That the U.S. Department of Energy and the U.S. Department of Justice were used as an illicit slush-fund by the Obama Administration to pay campaign financiers and to sabotage their competitors.
- That government officials hired and/or financed and/or directed deadly economic and character assassination hit jobs against those who reported these crimes using attack services from IN-Q-Tel, Gawker Media, Jalopnik, Gizmodo Media, K2 Intelligence, WikiStrat, Podesta Group, Fusion GPS, Google, YouTube, Alphabet, Facebook, Twitter, Think Progress, Media Matters, Black Cube, Mossad, Correct The Record, Stratfor, ShareBlue, Wikileaks, Cambridge Analytica; the owners of whom have been proven to have accepted compensation for such hatchet job services.

- The â... The PayPal Mafiaâ... is an actual Cosa Nostra like operation that exploits sex cults, prostitutes, gay rent boys and market rigging as illicitly as the old Chicago â... Mobâ... .

- That Tesla Motors is a criminal Dark Money front that â... cooks the booksâ... , lies about safety issues and runs sabotage campaigns through Muskâ... s massive use of Russian bots, trolls, stock shills and his covert manipulations with Googleâ... s Larry Page and Eric Schmidt.

SILICON VALLEY TECH CARTEL EVIDENCE FOLDER EXPLANATIONS:

Here is a small sample of the evidence proving the charges. We warrant, certify and guarantee that, with equitable legal representation, we can prove all of our charges in a Grand Jury, A civil Jury Trial and a television broadcast live Congressional hearing. This is a public peer-to-peer, mesh network, free wiki operated by a Task Force of citizens, journalists, forensic investigators and law enforcement specialists. You can read and explore the evidence samples by clicking on each link following these categorical explanations for the folders:

SILICON VALLEY MEDIA COLLUSION INFO RIGGING - This folder provides a small sample of the proof that a group of media company owners in the Tech Cartel coordinate news stories and news censorship in order to manipulate their crony capitalism plots. This includes only hiring certain types of extremists, having their HR departments run "echo-chambers", keeping employees in a glass bubble, new age biased mind-training, subliminal messaging campaigns and coordinated catch phrases.

DEPT OF ENERGY IS THE DNC SLUSH FUND - This folder provides a small sample of the proof that the U.S. Dept. of Energy is used as a slush-fund and Dark Money-compensated stock market scam by the Obama Administration and their Silicon Valley Tech Cartel financiers. CA & NY Senators and AG's ran the high level parts of this criminal kick back Dark Money scheme.

SILICON VALLEY AND HOLLYWOOD SEX CULTS AND ABUSE - This folder provides a small sample of the proof that Silicon Valley Tech Cartel VC's and PayPal Mafia oligarchs are raised to be sociopaths and exhibit lawless, deranged social actions like rape, sex abuse, misogyny, tax evasion, racism, bribery, embezzlement and other illicit deviance. Their vast sex abuses and sex clubs prove their moral failures and that they seek not pleasure but "control over others" in their horrific sexual crimes.

HOW YOU CAN FIGHT CORRUPTION - This folder provides the latest info on technologies and tactics you can use to expose the corrupt and shut them down!

THE DNC HIT JOB MEDIA ASSASSINS - This folder provides a small sample of the proof that the suspects are spending vast amounts of money and resources on Fusion GPS, Black Cube, Gawker/Gizmodo hit jobs and spying. These are not just people who disagree with Trump. The Tech Cartel is actively meeting and coordinating attacks about, and spending tens of millions of dollars on, espionage activities, riots and character assassinations in order to keep their payola schemes going. Government officials financed and managed political, economic and character assassination attacks on domestic taxpaying citizens, using taxpayer resources and hit-job contractors.

RUSSIANS RUSSIANS RUSSIANS - This folder provides a small sample of the proof that it was originally Silicon Valley DNC Tech Cartel executives and venture capitalists who set up the first relationships with Russian mobsters.

PRIVACY AND SPYING ABUSE ONLINE - This folder provides a small sample of the proof that The Silicon Valley Cartel lie about their censorship and privacy rape of the public while, in fact, spying on the public for election manipulation using CIA-type tactics. Facebook, Twitter, Google/YouTube conspire to coordinate political, business and stock market censorship and attacks on their enemies.

DATING AND ONLINE SOCIAL MANIPULATION - This folder provides a small sample of the proof that the Tech Cartel including Chelsea Clinton's match.com, OKCupid and IAC properties and Reid Hoffman's matching sites are actually DNC honey-trap operations, political spying database population tools and mood manipulation efforts to exploit sensitive love-seekers for their vulnerable status.

WHY GOOGLE IS A SICK CORRUPT MONOPOLY - This folder provides a small sample of the proof that Google/YouTube/Alphabet owners and executives planned and manually coordinated election manipulations, privacy abuse, search engine rigged attacks on individuals, and militaristic information-rigging that harms the public and exceeds anti-trust violations more profoundly than almost any other company in history. The reason that Google employees comprised such a large portion of the Obama White House is so Google and the Tech Cartel could seek to implement this crony capitalism crime.

THE CORRUPT LAWYER, CPA, iBANK, LOBBYIST GANGS - This folder provides a small sample of the proof that the majority of the funds transfers for these Tech Cartel crimes came through Dark Money accounts, covert family trusts, shell corporations, revolving door contracts and insider trading scams operated by these tier 2 services contractors.

THE IDENTITIES OF THE CORRUPT DEEP STATE CROOKS - This folder provides a small sample of the proof that a Mafia-like Silicon Valley Tech Cartel exists and is comprised of, and operated by, a pack of elitist fraternity house men and famous politicians.

IMMIGRANTS PAY FOR THE NANCY PELOSI MANSIONS - This folder provides a small sample of the proof that Nancy Pelosi, her family and staff are both operators and beneficiaries of these crimes.

GOOGLE RIGS ELECTIONS, SENATORS AND FREEDOM OF SPEECH - GOOGLE uses mass server technology to rig politics and information for it's cult-like ideology. The law says that each person has the right to equal access to those same broadcast technologies used against them for political purposes! Google is a criminal organization that bribes politicians; spies on the public for political manipulation; supports racism, misogyny, sex deviance and prostitutes among its staff; operates cult procedures in it's HR program; operates tax evasion and real estate money laundering schemes; is one of the largest 'Dark Money' covert crony campaign financiers the world; manipulates stock market and public news information; sells fake traffic to advertisers and engages in numerous white collar crimes.

POLITICAL DEATHS AND POISONINGS - This folder provides a small sample of the proof that a large number of connected individuals who crossed the Silicon Tech Cartel Cosa Nostra are now dead under mysterious circumstances. CA, NY & DC public officials and FBI executives have covered up these deaths and slowed investigations because they have financial links to the DNC financiers suspected of causing these murders. Seth Rich is only one of thousands of bizarre deaths of Tech Cartel whistle-blowers.

THE SANDHILL ROAD SILICON VALLEY VC SOCIOPATHS - This folder provides a small sample of the proof that The Silicon Valley Mafia (AKA: "The Tech Cartel", "The PayPal Mafia". "The AngelGate Conspirators", etc.) is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, Linkedin, etc.) they control. They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control. They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders. They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, revolving door payola, executive prostitute clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians to halt investigations and interdiction efforts. They are widely covered in news

media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis abusers, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. They are not limited to California and also operate out of New York and Washington DC. They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

SILICON VALLEY MANIPULATES ELECTIONS - This folder provides a small sample of the proof that the "The Deep State" that runs all of these tens of millions of dollars of political attacks and media manipulations is focused on rigging elections. These people have a 'Dark Money' bribery program underway in which they use fake charity organizations to conduit bribes and rigged government contracts back and forth to themselves via control of elected officials.

THE FEINSTEIN CORRUPTION AND PAYOLA - This folder provides a small sample of the proof that Dianne Feinstein, her family and staff are both operators and beneficiaries of these crimes.

AAAA CASE OVERVIEWS - This folder provides a small sample of the proof that crooked insiders from political circles participated in the crime. It cost taxpayers over six trillion dollars in losses. The most notorious Senators in the country are trying to keep it covered up. The main part of the scam is called 'Dark Money Trickle Laundering'. It works via corrupt Senators, criminally illicit law firms, dirty lobbyists, fake charities, sociopath tech billionaires, mobster CPA's and covert dynastic family trust funds. The taxpayers of the USA are the helpless victims of this crime and the SEC, FEC, DOJ, DOE, and other agencies, refuse to help them because the agency bosses get paid by the crooks! America was created as a 'one person = one vote' nation but 320 elitist billionaires bribed their way to get 500,000+ votes for each one of themselves! In other words: you get one vote but they use criminally illicit schemes to steal millions of votes for a few hundred corrupt guys.

THE ELON MUSK TESLA BRIBES AND CORRUPTION - This folder provides a small sample of the proof that Elon Musk and Tesla Motors exist today because of their covert political organized crime activities, political bribes, DNC Dark Money financing and regulator payola.

HERE ARE THE LINKS TO THE SAMPLE FOLDERS:

A DETAILED EXAMINATION OF THE ROOTS OF DOMESTIC NATIONAL POLITICAL CORRUPTION AND A PLEA FOR ELECTED OFFICIALS TO ACTUALLY DO THEIR JOBS FOR THE AMERICAN PUBLIC

"Dear White House:

For years, we have been asking our government representatives to do something, anything, about this matter. We have gotten no reply, stone-walling, cover-ups and zero effort. That is shameful!

This matter affects every voting citizen because, if we can't get justice in America, then no voter will believe they can either.

A handful of corrupt tech billionaires, and their corrupt Senators, are manipulating the taxpaying voter's

emotional triggers in order to steer, and money-launder, a trillion U.S. taxpayer dollars into their private bank accounts. Over 300 million American voters have said that the #1 issue with U.S. public policy is â... CORRUPTIONâ... . This issue is about that corruption.

Their â... climateâ... , â... immigrantsâ... , â... medical coverageâ... issues are fake controversies that they use to scam U.S. Treasury funds that have nothing to do with those â... cover issuesâ... . They use Google, Facebook, Twitter and the "Main Stream Media", that they own, in order to pump up these fake controversies via fake news. They use "Dark Money" fake charities, "Invisible Bridge" money laundering, crony stock market insider trading and pump-and-dump schemes, revolving door payola, prostitution bribes and other illicit corruption tricks.

We are fighting back and we have already taken out part of the â... bad guysâ... , and their schemes, using 100% legal tactics and methodologies.

Any member of the public can now accomplish these anti-corruption efforts using espionage journalism, private investigation methods, citizen sleuth websites, class-action lawsuits and personal mass public media distribution. We encourage the public to continue in their efforts to bankrupt every single corrupt party that abuses our Democracy.

In our matter, the U.S. Government, via the Obama White House and the U.S. Department of Energy intentionally defrauded us out of years of work and our life savings! Now they owe us some offsets! We are here to collect.

We could not understand how â... public servantsâ... could do these kinds of crimes to, and with, our government while stealing our, and millions of other taxpayers, money out of our pockets. We set out to hunt down every single person, group and process that allowed these crimes to happen, document their crimes on permanent public record and then make it nearly impossible for them to ever do this to the public again.

We were tricked by false government promises into spending years of our lives and millions of dollars of our life savings. We, and our peers, were used as the â... facadeâ... of a â... cover storyâ... to operate a criminally illicit â... Dark Moneyâ... operation against the American public. We swear, warrant and certify that we can prove every assertion in a public federal jury trial, Grand Jury hearing and/or televised Congressional hearing, given equitable credible legal resources and security protection.

Senior government officials had full knowledge of, and participated in, this criminal enterprise. They knew, from the start, that the state ad federal funding was covertly hard-wired, in advance, exclusively to their friends. They then attacked us with â... Fusion GPSâ... , â... Lois Lerner Targetingâ... , a tabloid character assassination program and worse things. They attacked us because we properly reported the crime to the FBI and Congress. They attacked us because we did "the right thing".

The cover-ups of this crime continue to this day. The failure of the U.S. Government to provide any 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees; in this matter continues to this day. We are not anti-government. We are anti-corruption. In fact, top government officials are helping us in our quest.

For our first project, almost every taxpaying member of the public supported our past efforts and, in fact, provided us with a historically large number of purchasing letters of support which we hand-delivered to Congress. Nobody else was able to do that.

The non-crony major international news outlets, every major industrial publication, most of the non-crony members of the U.S. Congress, and every other non-crony public official confirmed that "Part Two" of our project was a â... goâ... . After winning Congressional awards and fully delivering on our previous

government contracts, federal officials asked us to invest our time and money in the federal government and do even more to create domestic jobs and new domestic technology opportunities.

BUTâ...!

...it turned out that all of the government â... decidersâ... worked for and owned stock in our arch competitor. The government officials took the money they had promised to us and gave it to their friends, who are our competitors. They gave it to the least qualified party; who also happened to be their buddy and their campaign financiers. They also gave part of the taxpayer cash to some of their friends who immediately filed bankruptcy in order to make huge profits off of tax loss filings and stock market valuation â... pumpsâ... without ever having to create any jobs or ongoing product deliveries.

We were asked to pay bribes and we refused to pay bribes. We refused to be part of the Silicon Valley â... Dark Moneyâ... crimes. We knew these people. We were invited to their parties and to their most intimate meetings. When we saw that they were running afoul of Democracy using corrupt schemes, illegal insider trading, sextortion, money laundering, tax evasion, bribes, prostitutes, Dark Money conduits, election rigging, internet manipulation and other crimes against the public; we said NO!

Will the U.S. Government provide us with the justice we seek and the Constitution demands?

We have worked with exceptional FBI, GAO, SEC, CFTC, IG and Congressional staff in this matter and we wish to acknowledge their support. Many have seen the recent news head-lines about top-level law enforcement firings of corrupt law enforcement executives. Those were the right moves and we wish to confirm the fact that certain public officials continue to stall our justice. Treasury and GAO say that over 180 million taxpayer dollars have been spent on cover-ups, attacks and DOJ stalls against our request in order to avoid political embarrassment for the Obama Administration. They are no longer around and they SHOULD be embarrassed by their corruption! You can resolve our matter for dramatically less money than you are spending trying to cover it up!

We will not give up and we will fight to the end. Our Task Force of crime victims, journalists, bloggers, mass data scientists, intelligence specialists and voters is now using 100% legal means to terminate every single crook in this case until we get justice. We demand a resolution where our damages are paid for and the whistle-blower and informant fees we are owed are delivered.

The news articles and Congressional reports prove that this Silicon Valley Cartel regularly engages in crimes, sex abuse, illicit acts, a sociopath culture and law-breaking. Fact-based forensic data has now been published representing the work of tens of thousands of renown, award-winning journalists and researchers. They prove that what we are saying really did happen and it really is a criminal abuse of Democracy! The ICIJ, Snowden, Assange and Binney leaks prove the depth of the crimes. Hundreds of thousands of documents have now been placed on public record in the federal courts and P2P archives and those documents prove who engaged in these crimes and how they did it. The 60 Minutes episodes, The feature films: Dark Money; Too Big To Fail; Inside Job and the tens of thousands of broadcast news segments about this corruption all prove our assertions. The evidence is indisputable!

|

It is time for the public to take a stand against this kind of organized crime that is operated by the very people that are meant to serve the public!

It is time for The U.S. Government and The U.S. Department of Energy to deliver the 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees that are required."

QUESTIONS?

Q. Where is your proof?

A. Here is the proof:

- <http://www.DC-crimes.com>
- <http://www.slush-fund.com>
- Federal court records on file at <http://www.pacer.gov>
- FBI 302 and case evidence files submitted by our peers
- Congressional Ethics Committee reports on public record
- GAO investigation reports we helped produce
- and thousands more web repositories we are happy to share...

As a matter of fact, we have submitted over a million pages of evidence produced by the best, and brightest, FBI agents, criminal investigators, forensic researchers, investigative reporters, insider whistle-blowers and former agency employees. In fact, our complaint evidence sets comprise over 6 TERRABYTES of data. That is quite a bit of hard evidence. Additionally, there has been very little credible push-back from any major entities, aside from those charged with the crimes. In other words, every well-known entity who was not a crook involved in these embezzlements has verified our charges.

Q. Why don't we hear more about this in "the news"?

A. Because print news media has gone out of business and most of the online news, especially Google, YouTube, Facebook, Twitter, Huffpo are owned or invested in by the very people who are charged with the political bribery, insider trading, election manipulation and corruption. They order their news outlets, which now are the majority of news publishers in the world, to NOT cover news about these crimes because it will embarrass them and cause the FBI and Congress to look at them more closely. We are not going to let this be covered-up.

Q. Why don't you just sue all of the people and agencies who did these things to you?

A. The attacks on us were designed to eliminate our finances so we could not afford law firms. If we could sue each one of the bad guys and afford the same lawyers as the bad guys, we would win every case. Each case costs over two million dollars in legal expenses. There are many cases. Our legal rights were blockaded by carefully crafted rights elimination tactics. In America, you can only get a lawyer for free if you kill the opposition bad guy first. In other words you only get a free lawyer if you commit a murder.

Q. Isn't it the job of the FBI and the DOJ to help citizens like you with injustices like this?

A. As the world saw with the recent firings of the top staff at the FBI and DOJ; top law enforcement bosses are often more focused on cover-ups of crimes than the prosecution of crimes. We have helped get hundreds of famous political people fired for corruption but that does not fully solve our issue.

Q. What are you asking for?

A. Justice, a written apology, to get our damages paid for, the firing of every corrupt official involved and delivery of the whistle-blower fees we were promised.

Q. Who have you contacted to try to get this resolved?

A. Using certified mail, receipt-based FEDEX and time-stamped and tracked electronic communications we have contacted every law enforcement agency, regulatory agency, their heads of office and every elected representative through every known official channel and back-channel for nearly a decade. We have only encountered finger-pointing to some other agency and an official "not my circus, not my monkey's" attitude of "just ignore them, maybe they will go away".

Q. Who else can we contact to confirm that these crimes and stock market corruptions took place and are still taking place.

A. These groups:

- <http://wearethenewmedia.com/>
- <https://www.icij.org/>
- <https://www.transparency.org/>
- <https://www.judicialwatch.org>
- <https://corruption123.com>
- <https://wikileaks.org>
- <https://causeofaction.org>
- <http://globalinitiative.net/>

And over 400 other organizations we can introduce you to...

Q. Are you associated with any political party?

A. No. We are neither Democrats nor Republicans. We are domestic American taxpayers who were raped by our own elected representatives who were profiteering off of these crimes. We represent the American citizens!

SO WHY ARE WE NOT GETTING ANY RESPONSE, ANY JUSTICE AND ANY OFFSETS FROM THE VERY PEOPLE WE PAY TO PROTECT AND SERVE US?

ANOTHER LETTER FROM VICTIMS OF THIS FELONY CRIME MATTER:

We are victims of a felony crime. We have yet to receive any legal help or victims rights services. Over 100,000 tv shows, broadcast news segments, Congressional reports and news articles cover the fact that the

crimes did happen.

Jesse Jackson Junior stole money from the government and collects \$138,400.00 per year from the government. We reported a crime and contributed over 42 million dollars in taxes and services to the government yet only get to collect \$12,000.00 per year. There are over 22 million people who did crimes who also collect as much...yet we get nearly nothing after getting defrauded by the Department of Energy.

The DOE Paducah Gaseous Diffusion Plant under contracts with the Department of Energy and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those who blew the whistle on millions of dollars of corruption. We blew the whistle on hundreds of billions of dollars of corruption at DOE and have not only not received a dime of whistle-blower awards but lost over a billion dollars due to Dept. of Energy reprisals.

The Dept. of Energy has agreed to pay millions to resolve fraud allegations in its award of small business subcontracts to clean up part of the Hanford nuclear reservation. The Department of Justice released the settlement amount after it and Washington Closure announced the day before they had reached an agreement. Two other businesses named in the lawsuit, Richland's Federal Engineers & Constructors (FE&C) and Sage Tec, reached separate settlements in 2017. The FE&C settlement for \$2 million and Sage Tec settlement for \$235,000 bring the total recovered by the Department of Justice to more than \$5.5 million in the case. We blew the whistle on hundreds of billions of dollars of corruption at DOE and have not only not received a dime of whistle-blower awards but lost over a billion dollars due to Dept. of Energy reprisals.

Dept. of Energy Hanford subcontractor URS has agreed to settle a lawsuit brought by former employee Walter Tamosaitis for \$4.1 million. The settlement in the whistleblower case comes almost one year before the case was set for a jury trial in federal court in Richland. We blew the whistle on hundreds of billions of dollars of corruption at DOE and have not only not received a dime of whistle-blower awards but lost over a billion dollars due to Dept. of Energy reprisals.

Many news reports such as this, demonstrate the utter lack of justice in modern Washington:

[GAO Report Confirms DOE has Failed to Protect Whistleblowers](#)

"They will make an example of anyone who challenges them." This chilling comment from a contractor employee quoted in a recent Government Accountability Office (GAO) report illustrates how Department of Energy (DOE) contractors have developed a culture of fear and intimidation that threatens to subvert legitimate safety ...

 pogo.org/blog/2016/08/gao-report-confirms-doe-fail.

WE DEMAND THAT THESE CRIMINALS BE ARRESTED OR ELSE WE WILL PERFORM CITIZEN ARRESTS ON EACH AND EVERY ONE OF THEM!

WHO ARE THE MAIN CROOKS WHO FINANCED, OPERATED AND BENEFITED FROM THIS CORRUPTION?:

1.) These people have a 'Dark Money' bribery program underway in which they use fake charity organizations to conduit bribes and rigged government contracts back and forth to themselves.

2. These are the people (Mostly from New York and California) who are 'freaking out' because Trump is cutting off their corruption ('Draining the swamp...') and who are spending the most money and resources on Fusion GPS, Black Cube, Gawker/Gizmodo hit jobs and spying. These are not just people who disagree with Trump. They are actively meeting about, and spending tens of millions of dollars on espionage activities, riots and character assassinations in order to keep their payola schemes going.

These people appear to be criminals who have the protection of corrupted executives in charge of law enforcement and regulatory agencies. The top most active Deep State radicalized financiers and agitators are:

- Amy Pascal; (Sony Pictures Obama funding liaison, traded CIA secrets for Zero Dark Thirty script)
- Arnold Schwarzenegger; (CA governor, actor, arranged Russian mob financing and Russian mining deals)
- Barack Obama; (Acted as front man for Silicon Valley payola deals through White House)
- Bill Daley; (Obama's Chicago mobster staff boss, ran payola ops in White House for Obama)

- Bill Lockyer; (California finance boss with a sex scandal that gave taxpayer cash to crooked Solyndra and Tesla)
- Brian Goncher; (Deloitte finance Cleantech scammer head, put together Obama Cleantech payola deals)
- Daniel Cohen; (Dept of Energy Lawyer who helped fudge the DOE Slush-Fund into place with Steven Chu)
- David Axelrod; (Obama White House media hit-man)
- David Drummond; (Top Google lawyer who had a few scandals at his Quail Road Home in Woodside, CA while running political bribes for Google)
- David Plouffe; (Obama White House boss who arranged Silicon Valley payola and revolving door deals)
- David E. Shaw; (Known as the Snake Of Silence)
- Dianne Feinstein; (Covert owner of Tesla, Solyndra and other conflict-of-interests. called "The Most Corrupt Senator In U.S. History")
- Elon Musk; (Tech mobster bromance buddy of Larry Page at Google and Tim (crazy eyes) Draper, sex party partner with Steve Jurvetson and largest government Mooch in American history)
- Eric Holder; (Obama's AG who ran all of the DOJ and FBI cover-ups of corruption for Obama)
- Eric Schmidt; (Google boss with an "open marriage", a sex penthouse and a CIA office who loves to mess with governments around the world)
- John Zaccarro, Jr.; (At top of GOP watch-list)
- Frank Giustra; (Mining scheme financier of Hillary Clinton who suggested Russian deals)
- Nick Denton; (Gay sex and media abuser who did nasty tabloids in Britain and USA as hired character assassination pro, ran media attacks as client for Podesta, Obama, DNC, Google and Elon Musk)
- Harry Reid; (Dirty Senator who made crooked deals with Musk and Google, got punched in the eye for being a crook)
- Haim Saban; (Overseas cash conduit to DNC)
- Hillary and Bill Clinton; (Sex, dead bodies, Haitian prostitutes...can the world ever forget The Clinton's?)
- Ira Ehrenpreis; (Silicon Valley frat boy bundler and DNC VC insider)
- Andy Bechtolsheim; (Silicon Valley frat boy bundler and DNC VC insider)
- Jay Carney; (Too many conflicts-of-interest to count, White House press boss, loved Russian tactics)
- James Comey; (FBI Director who held off investigations on Obama's crimes)
- Jared Cohen; (Google's Israeli agent in-house, playboy/spy/DNC operative; promoted coup attempts)
- Jeffrey Katzenberg; (Hollywood Wensteiny DNC financier and pusher of politics into Hollywood films)
- John Doerr; (Obama's Kleiner Perkins and Russian Connection VC sued for sex abuse and manipulation)
- Harvey Weinstein; (Notorious Obama and Clinton financier and sexual predator)
- Yasmin Green; (Google's director of Middle East Incursions, Jared Cohen's favorite hottie, extensive mouth-to-face ratio)
- Jonathan Silver; (The Dept of Energy's VC who made sure that only Obama's campaign financiers got funded)
- Ken Brody; (Insider for DNC operations)
- Lachlan Seward; (The Dept of Energy's payola manager who made sure that only Obama's campaign financiers got funded)
- Laurene Powell Jobs; (Steve Job's old squeeze or "beard wife" depending on who you ask, inherited his billions and now funds the DNC)
- Judge Stewart M. Bernstein; (NY Southern District Judge who is a Hillary Clinton sponsor protecting DNC corruption)
- Larry Page; (Elon Musk's boy buddy at Google. Pages steals technology for Google and spends his billions rigging politics and buying insane frat boy toys and people)

- Google, Alphabet, YouTube; (The commercial version of the CIA)
- Facebook; (The commercial version of the German Stazi)
- In-Q-Tel; (The actual CIA..but without any of that annoying Congressional oversight. They are a 501 (c) charity yet they had 5 tons of cocaine on their airplanes. They now work for Elon Musk, Google and Facebook)
- Amazon; (The Socialist version of the CIA)
- Twitter; (A DNC spy and media manipulation tool to do spy stuff in 140 characters, or less)
- PayPal; (A DNC run bank that cut's off anti-DNC people)
- WordPress.Org; (A DNC operated ISP that cut's off anti-DNC people in violation of freedom-of-speech)
- The Law Firm of Perkins Coi; (The Masters of Moving Money Mysteriously)
- Mark Zuckerberg; (Goofy Facebook boss that does what Sandburg and Debbie Wasserman tells him to do and wants to be President of the World)
- Martin LaGod; (Silicon Valley VC deep into lithium mining corruption)
- Matt Rogers; (Silicon Valley McKinsey insider placed into Dept of Energy to run things for Silicon Valley VC's)
- Marc Benioff; (DNC financier and party boy)
- Michael Birch; (The man with the Magic Box)
- Steve Kirsch; (Windfall billionaire with Infoseek sale, funds lithium ion battery mining deals)
- Steven Spielberg; (Hollywood extremist DNC financier)
- S. Donald Sussman; (A true man who "gets around the circuit")
- Pierre Omidyar; (Gawker/Gizmodo hit-job financier, EBAY owner, partners with "Russian Businessmen")
- Rahm Emanuel; (The "Godfather" of corruption in the Obama White House and Chicago City Hall. Taught Obama how to Obaminate corruption)
- Raj Gupta; (Arrested insider trading expert from crooked McKinsey who taught Silicon Valley how to scheme)
- Ray Lane; (Charged with tax evasion on a massive scale, he and Kleiner Perkin's folks brought crime to the Valley)
- Tom Perkins; (The VC with the biggest bribes)
- Robert Rubin; (The insider that knows where the girls are)
- Rob Friedman; (The insider that works all of the angles and shell corporation options)
- Reid Hoffman; (Weight and morality challenged owner of Linked-In who finances dirty DNC deals and dating sites)
- Richard Blum; (Dianne Feinstein's husband/boss, ran dirty Chinese deals and owns part of Solyndra and Tesla assets. His "interesting" trips to Mongolia and China still have the FBI scratching their heads)
- Robert Gibbs; (Obama's crooked press office boss who quit the day after a certain package showed up on his desk)
- Robert Shwartz; (The cash behind the blast)
- Roger Altman; (The man who has his fingers in everything)
- The Law Firm of Covington and Burling; (Deeply homosexual DNC insider law firm that brought you Obama, Eric Holder and the Immigration crisis)
- Sanford Robertson; (The "inventor" of some of the greatest stock market politician perks ever deployed)
- Steve Jurvetson; (Elon Musk's sex party buddy and VC who got fired for sex stuff and who has one of the worst reputations around the Valley)
- Steve Rattner; (Obama's "Car Czar" who put together the crooked deals with Detroit to exchange fed cash for votes, indicted in NY for securities fraud. Google associate, New America/In-Q-Tel guy)
- Steve Westly; (Obama's dirtiest Silicon Valley Political Crony Payola Bundler)
- Steven Chu; (Officially known as "The Most Corrupt Secretary Of Energy In American History" who also created the totally screwed up "Iran Nuclear Deal" and the corrupt "Uranium One" deal)

- Steve Spinner; (He and his wife structured the stinkiest parts of the Obama Solyndra payola scam)
- Susie Tompkins Buell; (DNC financier socialite PR hypester for Norcal rich people)
- Tracey Turner; ("The FBI cannot comment about an ongoing investigation...")
- George Soros; (The world's most overt DNC radical billionaire, the cash behind Netflix and Tesla)
- Warren Buffet; (The world's most covert DNC radical billionaire)
- Tom Steyer; (The "Master of Cleantech Disaster", 3rd largest financier of Anti-Trump actions, oil guy)
- Margie Sullivan; (Tom Steyer's partner and Hillary Clinton's special friend who helped USAID push mining deals to get Afghanistan invaded for Elon Musk and Frank Guistra mining scams)
- Tim Draper; (Bromance buddy of Elon Musk with extremist eyebrows and hatred of Californians)
- Valarie Jarrett; (Obama's White House overseer of the Obama corruptions office efforts who sought to help Iran)
- Vinod Khosla; (The villan of the CBS 60 Minutes episode: The Cleantech Crash, Obama & Clinton financier kick-back artist and "beach stealer")
- Michelle Lee; (Google's lawyer who was placed as head of U.S. Patent Office for the purpose of protecting Google and the Silicon Valley Cartel in their IP theft onslaughts)
- The law firm of Wilson Sonsini Goodrich and Rosatti; (Known as the most "corrupt law firm in Silicon Valley")
- Lawrence "Larry" Summers (Harvard President who aided Zuckerberg's light-speed rise to prominence with unprecedented Harvard Crimson coverage; Obama bailout chief; Clinton Treasury Secretary; World Bank Chief Economist; "Special Advisor" to Marc Andreessen in Instagram; co-creator of the current Russian robber baron economy; close 20-year relationships with protÃ©gÃ©s Sheryl Sandberg & Yuri Milner; aided in recommendations that created the Russian robber baron economy... and Yuri Milner/DST/Asmanov's money used to purchase Facebook stock)
- James W. Breyer; (Accel Partners LLP; Facebook director; client of Fenwick & West LLP since the 1990's; apparently received technology from other Fenwick clients that was shuffled to Zuckerberg, incl. Leader Technologies' inventions. Formed CIA IN-Q-TEL spy and IP theft organization)
- David Plouffe; directed Obama's 2008 and 2012 campaigns; a self-described "statistics nerd;" likely directed the activities of the Facebook Club; employed Robert F. Bauer, Perkins Coii LLP in 2000 at the Democratic Congressional Campaign Committee. Facebook and Uber manipulation expert)
- McBee Strategic (one of the main "private" arms responsible for dolling out the billions in Obama "green energy" stimulus funds; partnered with Cooley Godward LLP)
- Mike Sheehy (Cooley-McBee Strategic principal; former National Security Adviser to House Speaker Nancy Pelosi)
- Nancy Pelosi (U.S. Congresswoman; appears to be running political cover in the House for Facebook, McBee Strategic, Cooley Godward, Fenwick & West, Breyers, etc.)
- Gilman Louie - (Silicon Valley spy and game-maker who formed In-Q-Tel to steal technologies and political agenda's)
- Harry Reid (U.S. Senator; Judge Evan J. Wallach patron)
- Thomas J. Kim (SEC, Chief Counsel & Assoc. Director) approved Facebook's 500-shareholder exemption on Oct. 14, 2007, one day after it was submitted by Fenwick & West LLP; Facebook used this exemption to sell \$3 billion insider stock to the Russians Alisher Asmanov, Yuri Milner, DST, Digital Sky, Mail.ru which pumped Facebook's pre-IPO valuation to \$100 billion; another Harvard grad, Kim worked at Latham & Watkins LLP which was the chief lobbyist for the National Venture Capital Association in 2002-2004 whose Chairman was James W. Beyer, Accel Partners LLP; in other words Breyer and Kim, both Harvard grads, were associated at the time of the Zuckerberg hacking and theft of Leader Technologies' software code)
- Ping Li (Accel Partners, Zuckerberg handler)
- Jim Swartz (Accel Partners; Zuckerberg handler)
- Sheryl K. Sandberg (Facebook, Summers Dominatrix-like protÃ©gÃ©; Facebook director - Husband possibly murdered by Russian as an example to tell Zuckerberg to tow-the-line)
- Yuri Milner (DST aka Digital Sky, Summers protÃ©gÃ©; former Bank Menatep executive;

Facebook director)

- Alisher Asmanov (DST aka Digital Sky; Goldman Sachs Moscow partner; Russian oligarch; Friend of the Kremlin; Became the Richest Man in Russia after the Facebook IPO)
- Marc L. Andreessen (Zuckerberg coach; client of Fenwick & West LLP and Christopher P. King aka Christopher-Charles King aka Christopher King aka Christopher-Charles P. King; Summers' sponsor during Instagram-scam; Facebook director)
- Peter Thiel (19-year old Zuckerberg coach; PayPal; Facebook director; CEO, Clarion Capital)
- Clarion Capital (Peter Thiel)
- Richard Wolpert (Accel Partners)
- Robert Ketterson (Fidelity Ventures; Fidelity Equity Partners; Fidelity Ventures Telecommunications & Technology)
- David Kilpatrick (Business Insider; "The Facebook Effect"; PR cleanse-meister re. Facebook origins)
- Zynga/Groupon/LinkedIn/Square/Instagram ("Facebook Money/Credits/Bitcoin" feeder companies)
- Tesla Motors (received \$465 million in Obama stimulus funds and hired Cooley's Michael Rhodes in the seven months before the Leader v. Facebook trial, just before veteran Judge Joseph Farnan made the surprise announcement of his retirement, just six days after Facebook's disastrous Markman Hearing)
- Solyndra (received \$535 million in Obama stimulus at the recommendation of the Cooley-McBee Strategic "consulting" alliance)
- BrightSource (received \$1.6 billion in Obama stimulus at the recommendation of the Cooley-McBee Strategic "consulting" alliance)
- John P. Breyer (father of James W. Breyer; founder of IDG Capital Partners - China; coached his son on exploiting Western markets while he quietly built a venture capital business in China for the last 20 years; the real brain behind the Breyer exploitations)
- IDG Capital Partners (China)(founded by John P. Breyer, the father of James W. Breyer, Accel Partners; the current launderer of the tens of billions James W has fleeced from the U.S. market from the bailout, stimulus and the "pump & dump" Facebook IPO schemes)
- Goldman Sachs (received US bailout funds; then invested with DST in Facebook private stock via Moscow; took Facebook public; locked out American investors from investing)
- Morgan Stanley (received US bailout funds; took Facebook public; probably participated in overseas purchases of Facebook private stock before IPO)
- State Street Corporation (received U.S. taxpayer bailout monies along with Goldman Sachs and Morgan Stanley; consolidating control of ATM banking networks internationally)
- JP Morgan Chase (received U.S. taxpayer bailout monies along with Goldman Sachs, Morgan Stanley and State Street Corporation)
- Lloyd Blankfein (Goldman Sachs, CEO - The Wizard of Covert Cash)
- Jamie Dimon (JP MorganChase, CEO)
- Steve Cutler (JP MorganChase, General Counsel)
- Rodgin Cohen (JP MorganChase, Outside Counsel; Sullivan Cromwell, LLP)
- U.S. Securities & Exchange Commission (granted Fenwick & West's application on behalf of Facebook for an unprecedented exemption to the 500 shareholder rule; opened the floodgates for Goldman Sachs and Morgan Stanley to make a private market in Facebook pre-IPO insider stock; facilitated the influx of billions of dollars from "dubious" sources associated with Russian oligarchs, Alisher Asmanov and Yuri Milner, and the Kremlin; Goldman Sachs is a partner with this Moscow company, Digital Sky Technologies, aka DST, aka Mail.ru)
- Jeff Markey (McBee Strategic LLC; allied with Facebook's Cooley Godward Kronish LLP to arrange Obama's green energy funding; arranged \$1.6 billion for failed BrightSource and \$535 million for failed Solyndra)
- Steve McBee (McBee Strategic LLC; allied with Facebook's Cooley Godward Kronish LLP to arrange Obama's green energy funding; arranged \$1.6 billion for failed BrightSource and \$535 million for failed Solyndra)
- Michael F. McGowan (Stroz Friedberg; Facebook forensic expert who lied about his knowledge of

the contents of the 28 Zuckerberg hard drives and Harvard Email accounts)

- Bryan J. Rose (Stroz Friedberg; Facebook forensic expert who lied about his knowledge of the contents of the 28 Zuckerberg hard drives and Harvard Email accounts)
- Dr. Saul Greenberg (Facebook's expert witness from the University of Calgary; disingenuously waived his hands and said he would be "wild guessing" about the purpose of a Java "sessionstate" import statement (even Java newbies know it is used for tracking a user while in a web session); in short, Dr. Greenberg lied to the jury, thus discrediting his testimony)
- Toni Townes-Whitley (CGI Federal; Michelle Obama's 1985 Princeton classmate; CGI "donated" \$47 million to the Obama campaign; CGI won the no-bid contract to build the www.healthcare.gov Obamacare website; CGI shut off the security features on Obama's reelection donation sites to increase donations)
- CGI Federal (US division of a Canadian company; Donated \$47 million to Obama's reelection, then received the no-bid contract to build the ill-fated Obamacare website; Michelle Obama's Princeton classmate, Toni Townes-Whitley, is a Senior Vice President of CGI; the website is replete with social features and links to Facebook)
- Kathleen Sebelius (Obama's Secretary of Health & Human Services since 2009 responsible for \$678 million Obamacare implementation; made the decision to hire CGI Federal on a no-bid contract despite the evident conflict of interest with Michelle Obama and \$47 million in Obama campaign donations by CGI; the website is replete with social features and links to Facebook)
- Todd Y. Park (White House Chief Technology Officer (CTO); former CTO for Health & Human Services; chief architect of HealthCare.gov; founder, director, CEO, Athenahealth, Inc.; founder, director, CEO, Castlight Health, Inc.)
- Frank M. Sands, Sr. / Frank M. Sands, Jr. (Founder and CEO, respectively, of Sands Capital Management LLC; failed to file S.E.C. Form SC 13G acquisition reports for Athenahealth, Inc., Baidu, Inc. (ADR) and Facebook stock during 2012; masked the association of Todd Y. Park with Athenahealth, Inc. and Baidu, Inc., and the association of both of those companies with the Facebook IPO fraud)
- Robin "Handsome Reward" Yangong Li (CEO, Baidu, Inc. (ADR); appointed Jan. 2004, the same month that Mark Zuckerberg obtained Leader Technologies' social networking source code to start Facebook; Robin Y. Li is very likely associated with John P. and James W. Breyer through their Chinese entities, including IDG Capital Partners, IDG-Accel and other variants; Li appointed a junior attorney from Fenwick & West LLP, Palo Alto/Mountain View, namely Parker Zhang, to be his "Head of Patents;" Fenwick & West LLP represented both Leader Technologies, Inc. and Accel Partners LLC in 2002-2003 and had Leader's source code in their files.)
- Parker Zhang ("Head of Patents" at Baidu, Inc. (ADR), appointed in approx. May 2012; formerly a junior Associate attorney at Fenwick & West LLP; graduate from Michigan Law in 2005)
- Penny S. Pritzker (Secretary, Department of Commerce; replaced Rebecca M. Blank; holds over \$24 million in Facebook "dark pools" stock, most notably in Goldman Sachs, Morgan Stanley and JPMorgan)
- Rebecca M. Blank (Secretary, Department of Commerce; oversaw the dubious Leader v. Facebook activities of the Patent Office Director, David J. Kappos, who held over one million dollars in Facebook "dark pools" during the Leader v. Facebook proceedings; Kappos purchased this stock within weeks of his surprise recess appointment by President Obama; Kappos also was formerly employed by IBM, who sold Facebook 750 patents during the Leader v. Facebook proceedings; right before leaving the Patent Office, Kappos also ordered an unprecedented 3rd reexamination of Leader's patent without even identifying claims)
- Mary L. Schapiro (Chairman, Securities & Exchange Commission; holds 51 Facebook "dark pools" stocks which held stock in Facebook, Baidu and more than a dozen Facebook crony companies; failed to regulate the "dark pools;" failed to disclose her substantial conflict of interest in regulating the run up to the Facebook IPO)
- Robert C. Hancock (Chief Compliance Officer, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athena health, Baidu and Facebook during the period

- of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park, who was appointed by President Obama to be the U.S. Chief Technology Officer during this same period; Todd Y. Park is/has been founder, director and CEO of both Athena health and Castlight Health; Todd Y. Park deeply embedded the software from Athena health and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics)
- Jonathan Goodman (Chief Counsel, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athenahealth, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park, who was appointed by President Obama to be the U.S. Chief Technology Officer during this same period; Todd Y. Park is/has been founder, director and CEO of both Athena health and Castlight Health; Todd Y. Park deeply embedded the software from Athena health and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics; Goodman was formerly employed by Gibson Dunn LLP, Facebook appeals counsel in *Leader v. Facebook*)
 - Trip Adler ("Co-Founder" of Scribd; Harvard contemporaries of Mark Zuckerberg with a dubious origins story, like Zuckerberg's; Scribd held AFI documents for two years, then summarily deleted the entire library without warning on Fri. Mar. 7, 2014; AFI's library contained only public documents and much evidence proving the *Leader v. Facebook* judicial corruption)
 - Jared Friedman ("Co-Founder" of Scribd; Harvard contemporaries of Mark Zuckerberg with a dubious origins story, like Zuckerberg's; Scribd held AFI documents for two years, then summarily deleted the entire library without warning on Fri. Mar. 7, 2014; AFI's library contained only public documents and much evidence proving the *Leader v. Facebook* judicial corruption)
 - Jeffrey Wadsworth (CEO, Battelle Memorial Institute; President, Ohio State University Board of Trustees; former Deputy Director of Science & Technologies, Lawrence Livermore National Laboratory, University of California Board of Trustees)
 - Michael V. Drake (President, The Ohio State University; former Chancellor, University of California, Irvine)
 - Woodrow A. Myers (Chief Medical Officer, Wellpoint, Inc.; formerly Corporate Operations Officer, Anthem Blue Cross Blue Shield of Indiana)
 - Alex R. Fischer (aka Alexander Ross Fischer; Trustee, The Ohio State University; former Sr. Vice President, Battelle Memorial Institute; Chairman, OmniViz; married to Lori Barreras)
 - Chris Glaros (author of the discredited Waters Report re. The Ohio State University Marching Band; protege of Eric H. Holder, Jr., Professor James P. Chandler, III, and Algernon L. Marbley)
 - Lori Barreras (Commissioner, Ohio Civil Rights Commission; former Vice President of Human Resources, The Ohio State University; former Vice President, Battelle Memorial Institute; married to Alex R. Fischer)
 - David Vaughn (Criminal Attorney, David Vaughn Consulting Group; former Assistant U.S. Attorney; appointed to the discredited Waters Commission at Ohio State)
 - Betty Montgomery (former Ohio Attorney General; appointed to the discredited Waters Commission at Ohio State; accepted campaign contributions from Woodrow A. Myers, Wellpoint, Inc. and friend of Michael V. Drake)
 - Joseph A. Steinmetz (Provost, The Ohio State University; author of Psychological Science article on MOOC (Massive Open Online Course) that triggered the discovery of massive double-dealing and fraud within the Ohio State trustees)

The confirming data was acquired from finance reports, FEC filings, Congressional studies, espionage journalism, state election reporting forms, Goldman Sachs and ICIJ Swiss Leaks documents and journalists.

WHY?

- 1. They bribed public officials and engaged in crony payola.**
- 2. They use their media ownerships to engage in manipulative, misleading, inaccurate, half-truth-ed, BS, agenda-biased propaganda while spying on you.**
- 3. Instead of focusing on selling things, they focus on manipulating politics.**

HOW TO WIPE THEM OUT:

- 1. Boycott them. Tell your friends to Boycott them. Never use their products.**
- 2. Write all of their advertisers and tell those advertisers you will not buy their products if they support those companies.**
- 3. Find their employees on Glassdoor, Linkedin, Facebook and other social media and disclose the awful things these companies are doing and ask those employees to expose those companies crimes in public.**
- 4. Promote this list and this termination action in your social media.**
- 5. Expose their corruptions, leaks, class-actions against them and investigations.**
- 6. Write law enforcement, FTC, FBI, SEC, FEC and other agencies and demand that they be investigated for anti-trust, privacy, campaign finance and corruption law violations.**
- 7. Make and distribute epic memes about them.**
- 8. Expose the rapes, prostitutes, tax cheating, sex scandals, expense fraud, divorce filings and corruption of their investors and executives.**
- 9. Organize exposure of their corruption at their shareholder meetings and on live local news casts.**
- 10. Get everyone to ad-block them and put fake info in their online forms. Make certain their â... ad metricsâ... are wrong.**

12. Take any other legal action you can to shut them down and build a global following to help do it.

Pass this on...

How Any Citizen Can Fight And Win Against Political Corruption

- Let's take a look at one way to do it

It is an unusual partnership.

Scott's team was the [first to sue the U.S. Government for corruption and win the case while getting an acknowledgement of a federal agency infected by corruption stated by the court, on-the-record.](#) Some of the most famous government officials in the world were fired, during this case, for conflicts-of-interest, bias and corruption. He has also successfully sued a rogue element of the CIA, a group known as In-Q-Tel, a 'dirty tricks' group that copied his technology and that was the [investigated by Congress](#) because of their 'charity status' conflicting with the many tons of cocaine found on In-Q-Tel's private jets. He has also helped launch government lawsuits against Google, Tesla, Facebook, YouTube and other **corrupt** companies who abuse Democracy and social rights because: [We can always get the government to do our litigation work for us since every citizen IS the government.â, Scott says.](#)

All of Scott's public-interest lawsuits are designed to help every individual in America. Many of those lawsuits are inspired by requests from Congress, GAO or other official bodies because, sometimes, citizens can accomplish things that Congress is stone-walled from handling.

Scott really hates organized corporate special-interest insider bullies that harm society! He says: 'when you use my government to operate insider trading, accept bribes via the stock market, create quid pro quo and run other organize crimes, I will bring the FBI, FTC, FINCEN, InterPol, Congressional Investigations Offices and SEC tornado to your insider trailer park. If my technologies are better than yours and you chose to CHEAT RATHER THAN COMPETE, because you weren't smart enough to build anything better; then expect a legal and business hell that will go on for years and may send you to prison.â

As a former credentialed and trained law enforcement and intelligence operative, Scott has the legal authority to establish investigations up to, and including the arrests of the subjects.

In the biggest case, *so far*, a group of domestic citizens filed FBI complaints and lawsuits against corrupt public officials and their big tech financier/partners. These citizens instigated Congressional corruption investigations and hearings against the most senior members of the State and Federal government.

These actions resulted in the termination of very famous public officials and their crony criminal embezzlement scams and was connected to the FBI raid of [Solyndra](#).

This natural-born American domestic group of engineers was attacked with a \$30 million dollar+ retribution/political reprisal program contracted by White House political operatives, and their appointees, who were also the business competitors of the engineers.

The attackers used: A.) Fusion GPS-type character assassination smear campaigns (operated by their cronies at Google, Gawker, Gizmodo, Jalopnik and Facebook), B.) [NVCA black-listing](#), C.) Solyndra-laundering, D.) stone-walling, E.) Lois Lerner-class agency manipulation, F.) search engine rigging G.) [patent blockades](#) and other spy-agency kinds of â... dirty tricksâ... campaigns.

When public officials do things like this it is a violation of [tort, RICO and anti-trust laws](#).

The victims fought back.

With the encouragement of members of Congress they used 100% legal tools to interdict the corruption.

Essentially; they helped the United States government *sue itself!*

First, with a unique new kind of pioneering federal lawsuit, victims established â... FOR THE FIRST TIME IN LEGAL HISTORY â... that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case One, (D.D.C. 2015). The Case also proved that you sue any government official *as an individual* and get them fired for corruption and placed under federal investigation.

Second, they prevailed in the United States Court of Appeals for the District of Columbia Circuit on their appeal of the district courtâ... s ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that the government, under court order is now re-doing the victims applications and GAO, FBI, IGâ... s and Congressional oversight offices are watching to assure effective ethics and transparency.

Third, these cases placed, [on permanent public record](#), one of the most detailed documentation sets, ever assembled, about how modern political â... Dark Moneyâ... [conduits operate](#). (â...!with over one million corruption documents now publicly placed in view on servers around the world). The legal team hired ex-FBI,

CIA and SEC experts to track down covert bank accounts, revolving door bribes, insider stock trades and other payola between the victimâ... s competitors and public officials. This documentation now prevents the use of those kinds of criminal efforts, in the future, by exposing their tactics to the public and [pointing FINCEN](#) to the front doors of each of the crooks.

Fourth, the victimâ... s team engaged in the [interdiction and termination of corrupt agency executives](#), contractors and their financiers. This included some of the most well-known names in Washington, DC, at the time. Many of them were, and are still being, investigated and surveillance-monitored by the FBI, FINCen, Interpol, FTC, FEC, GAO, SEC and Congress. This case also led to the creation and expansion of [THE STOCK ACT!](#)

[Fifth, and most important, the effort put every corrupt political scheme on notice that they WILL be found out and interdicted!](#)

The bottom line?

Now the ***corrupt bad guy bullies***, and their big tech financiers and goons, have less options to engage in the corruption of our Democracy and the feds owe Scott quite a few million dollars in damages and back-pay!

If you think that case sounds like a big bad-ass legal tsunamiâ...[wait until you see the next oneâ...](#)!

Featured in Congressional, Legal And Mainstream News in:

- THE ANTI-CORRUPTION PARTY -

YOU are the "*United States Government*". As early as November 11, 1620, two opposing parties created an American body and signed a declaration of government which stated that the two groups (The "*Pilgrims*" and "*the Strangers*") shall work together for "*...better ordering, and preservation and furtherance of the ends aforesaid; and by virtue hereof to enact, constitute, and frame, such just and equal laws, ordinances, acts, constitutions, and offices, from time to time, as shall be thought most meet and convenient for the general good...*"

YOU hire politicians to protect YOU.

YOU EMPLOY the politicians by paying taxes.

YOU do not work for the politicians: They Work For YOU!

The Platform Of 'The Anti-Corruption Party' -

THESE ARE THE LAWS YOU NEED TO FORCE YOUR POLITICAL REPRESENTATIVES TO MAKE

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial activities in Congress.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. Your public officials are being paid **BRIBES** through their family stock market holdings. **CUT THEM OFF** - Demand that Congress make it a felony for any politician, judge or regulator to own stocks, or to let their family own stocks. If they want to get rich, they can go into another line of work.

If you can get these laws made, it will end 90% of American corruption. Politicians won't allow these laws to be made because it will cut off their corruption. Thus: You have to force the politicians to make these laws. Lobbying and lobby companies must be banned from operating under felony prosecution.

The ownership of stocks, now used to pay bribes, by politicians, and their families, must be banned under felony prosecution.

Our TO DO List:

- End political corruption in America by making any stock ownership by senators and political insiders illegal.
- Exterminate Google, Facebook, Tesla, Youtube and Netflix for their crimes, attacks on competitors, patent office (<http://www.usinventor.org>) and Senate bribes.
- File criminal referrals to federal law enforcement on each oligarch that hired Fusion GPS, Gawker, Black Cube, Amyntor, et al, to run "kill teams" against competitors and whistle-blowers and produce public, CIA-quality, investigation dossiers on each one. Make it a felony for anyone to hire a "kill service", "character

assassination service" or "oppo service"!

- Distribute the list of anti-corruption laws (see the VERY specific list, below), to every citizen. Each citizen must force the elected officials that work FOR them to adopt these laws.
- Update the Social Security system per: <https://socialsecurityworks.org> and <https://seniorsleague.org>
- Allow any parent to observe any classroom. Teach a standardized curriculum, to every student, nationwide, without bias.
- Outlaw any, and all lobbyists, from existing. Make lobbying a felony!
- Make the CBO report the value, or loss, of each Congressional Bill to each individual citizen, instead of to each lobbyists industrial group.
- Make it a felony for any fraternity or sorority house to exist because we now know that they breed the worst kinds of people and culture in the world.

The world, via citizen forensics, is part way through accomplishing every one of these goals. No ending is reached by accident.

These are the actions needed to resolve those issues:

- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off.
- Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years.
- Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
- Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
- Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists).
- Limit the ability of companies to buy influence through former government officials.
- Require income disclosures from former senior officials 4 years after federal employment.
- Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company.
- Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or

market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.

- Limit the ability of companies to buy influence through current government employees.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years.
- Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years.
- Ban "Golden Parachutes" that provide corporate bonuses to executives for federal service.
- Publicly expose all influence-peddling in Washington.
- Strengthen and expand the federal definition of a "lobbyist" to include all individuals paid to influence government.
- Create a new "corporate lobbyist" definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
- Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials.
- End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals.
- Fire the Fed officials that own, trade and pump stocks using the Fed itself for profiteering.
- The most senior officials in the U.S. Government are the worshipers of Elon Musk, investors in Elon Musk's companies and suppliers, deciders of the financing for Elon Musk, suppliers of staffing to Elon Musk, recipients of political campaign financing by Elon Musk and Musk's covert Google And Facebook partnership, social friends of Elon Musk and the attackers of Elon Musk's competitors. Make this a felony.
- Combat foreign influence in Washington by banning all foreign lobbying.
- End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- Ban direct political donations from lobbyists to candidates or Members of Congress.
- End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- End lobbyist gifts to the executive and legislative branch officials they lobby.
- Strengthen Congressional independence from lobbyists and end Washington's dependence on lobbyists for "expertise" and information.
- Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees.
- Reinstatement of the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
- Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies.
- De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research

submitted to agencies that is not publicly available in peer-reviewed publications.

- Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process.
- Require agencies to justify withdrawn public interest rules via public, written explanations.
- Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
- Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
- Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White House... s Office of Information and Regulatory Affairs.
- Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges, can temporarily block agencies from implementing final rules.
- Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
- Empower the public to police agencies for corporate capture.
- Increase the ability of the public to make sure their interests are considered when agencies act.
- Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government.
- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules.
- Inoculate government agencies against corporate capture such as Google undertook against the White House.
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity.
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process.
- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress's prior disapproval of a different, narrow rule on a similar topic.
- Improve judicial integrity and defend access to justice for all Americans.
- Create a higher standard of living under Social Security.
- Strengthen Judicial Ethics Requirements.
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations.
- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges.
- Boost the transparency of Federal Courts.
- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.

- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges' financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench.
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws.
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers.
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority.
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.
- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.
- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power.
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.

- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office.
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office.
- Disclose the Cash behind Washington Advocacy and Lobbying.
- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure.
- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research, like that from DNC shell McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA).
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence.
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.
- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending.
- Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites.
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

Do these seem like common-sense rules that should have already been in place? ***They are!***

These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you!

You need to PUNISH any public official who does not put these changes into effect!

How To Join:

We are not asking for your money or your mailing list data. **First:** Simply put the logo at the top of his page ([download it here](#)) on all of your blogs, websites, social media, T-shirts and other visible locations. **Next:** only vote for candidates who promise to enact the platform goals, above, and stop any candidates who do not promise, in writing, to enact these goals.

That's it. It is that easy!

If you want to **support us**, then promote this website link and copy-paste the text on it around the globe. You don't need to give us your money. Spend it on media and marketing promotions of this site and the text on it. You can use www.newswire.com, Mohr Publicity, promoteyourwebsite.com, and many other services, to make the message global.

Issue Details: Fixing Social Security

UPDATE SOCIAL SECURITY!!!

Demand that Congress set the minimum Social Security benefit to 125% of the federal poverty level, or higher. Seniors are not getting enough money to live on. Do YOU want to be starving and struggling to exist when you are old?

PASS THIS AROUND TO YOUR FRIENDS AND POST ABOUT IT ON SOCIAL MEDIA IF YOU HAVE PARENTS OR RELATIVES!

â **SOCIAL SECURITYâ... S BASIC STRUCTURE, WHICH EMBODIES THE BEST OF AMERICAN VALUES AND HAS STOOD THE TEST OF TIME, SHOULD BE PROTECTED.**

The late Robert M. Ball, the longest serving commissioner of Social Security, began his Social Security career in 1939 and was involved in all major reforms from that time until his death in 2008. He defined the fundamental structure and principles in the landmark essay, â... [The Nine Guiding Principles of Social Security](#).â...

Both in the essay and throughout his long, storied career, Mr. Ball explained that changes to Social Security have and always should occur â... within a framework consisting of nine major principles. Social Security is *universal; an earned right; wage-related; contributory and self-financed; redistributive; not means-tested; wage-indexed; inflation-protected; and compulsory*.â...

The members of this Coalition subscribe to each of those guiding principles. We oppose proposals to means-test Social Security, change it into a defined contribution plan, or cut its dedicated premiums and substitute an open-ended draw on the general fund for its financing. These and similar ideas are contrary to Social Securityâ... s underlying structure, principles, and values.

â **SOCIAL SECURITY IS A SOLUTION AND SHOULD BE EXPANDED.**

Expanding social security is a solution. It provides retirement, disability, and life insurance to nearly all of Americaâ... s working families more efficiently, securely, and universally than its private sector counterparts. Social Security lifts millions of Americans, including over a million children, out of poverty and reduces the depth of poverty for millions more. Expanding Social Security is key to addressing many of our nationâ... s most pressing problems, including the retirement income crisis, growing income and wealth inequality, and the financial squeeze on working families.

When signing the Social Security Act of 1935 into law, President Franklin Roosevelt [explained](#), â... This lawâ...! represents a cornerstone in a structure which is being built but is by no means complete.â...

Consistent with that incremental approach, survivorsâ... and spousal protections were added in 1939, long-term disability insurance was added in 1956, and Medicare and Medicaid were added in 1965. No

additional risks have been added since then, though. It is well past time to build on the strong cornerstone laid down in 1935 and address additional risks that result in lost wages and increased expenses.

â SOCIAL SECURITY IS A VEHICLE FOR SOCIAL AND ECONOMIC JUSTICE. EXPANDING IT WILL MAKE IT EVEN MORE SO.

Social Security is designed to disproportionately benefit low-wage earners, including people of color, women, those with disabilities, members of the LGBTQ+ community, and others who have suffered discrimination. Moreover, because those discriminated groups are less likely to work in jobs that provide supplemental pensions, they are even more reliant on their earned Social Security benefits than white, non-Hispanic men, on average. Expanding benefits both across-the-board and in targeted ways can cause our Social Security system to be an even more important and effective vehicle of social and economic justice.

â ALL REFORMS OF SOCIAL SECURITY SHOULD GO THROUGH REGULAR ORDER, IN THE SUNSHINE.

Social Security is an extremely important issue that touches everyone's lives. It should only be modified in the sunshine, subject to the full Congressional process known as regular order, with open hearings, Committee consideration with the ability to amend, and full debate on the floor of each chamber with the ability to amend. That is what has been done historically and that is what should be done in the future. Opponents of Social Security often try to use bipartisan commissions to fast-track Social Security legislation that would force through unpopular changes. Should that happen, it would be a major disservice to current and future beneficiaries.

Americans' earned protections are under threat by continued, harsh cuts to the operating budget of the Social Security Administration (SSA). These cuts are occurring despite the fact that the services provided by SSA have already been paid for by the American people.

Cuts to SSA's budget have already forced the agency to close field offices, reduce staff and office hours, and freeze hiring, resulting in increased wait times and deterioration in SSA's world-class services. Further reductions will greatly limit SSA's ability to administer benefit payments while also maintaining critical services to the public. To ensure that SSA can continue to provide Americans with the world-class, in-person services they deserve and have paid for, cuts to the agency's operating budget should be reversed, and Congress should allow SSA to restore and expand the vital services it provides to the American people.

The critical changes that you must ask your elected officials to make are:

1. Changing how your COLA is calculated

Congress must change how cost-of-living adjustments (COLAs) are calculated to better reflect seniors' costs. Social Security currently uses the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), which excludes households that don't have at least one person working. That means many retirees are left out. Compared to working-age people, retirees on average spend a higher share of their incomes on medical and housing costs, both of which rise faster than inflation.

Congress should be told to use the Consumer Price Index for the Elderly (CPI-E), which measures costs for older Americans. Using the CPI-E would only increase COLAs by 0.2 percentage points in an average year. Had the 2021 COLA been calculated based on the CPI-E, it would have been 1.5% instead of the 1.3% beneficiaries will receive, though the impact could be more meaningful when compounded over time.

2. A minimum benefit if you worked 30 years

Congress must be told to provide a minimum benefit of 125% of the federal poverty level for people with low

lifetime earnings who worked at least 30 years. Based on the 2020 federal guidelines for the 48 contiguous states and the District of Columbia, someone with a 30-year work record would get a guaranteed monthly benefit of about \$1,329. According to a Penn Warren Budget Model analysis, such a plan would also increase benefits by anywhere from 5% to 50% for a small group of people who worked between 10 and 30 years.

3. A higher benefit after 20 years

Congress must be told to increase benefits by 5% for people who have received benefits for 20 years or more. The bonus would be phased in at 1% per year, starting with the 16th year of benefits. The goal is to boost payments for Social Security's oldest recipients because they have been forced into exhausting their retirement savings.

Contact your elected officials at this link to tell them to do these things: <https://www.usa.gov/elected-officials/>

You have to ask why no Social Security reform is mentioned/included in the \$1.5 trillion dollar stimulus package! No one in Congress wants to make a decision when it comes to addressing the reform issue. That is why the public must continue to lobby and fight on the behalf of others that are not receiving benefits they rightfully earned and deserve. Congress likes it the way it is, so they can have money to spend on their â... pork-barrel projectsâ... instead of helping their constituents that are in need of basic financial assistance. Congress has your tax money for big parties, hookers, vacations and Rolex watches so they don't care about regular folks.

THE SILICON VALLEY CARTEL MEMBERS

The Worst Ones - Rev 2.2

You would be shocked to learn how many people are killed, every day, for less than \$50.00. ISIS and the Taliban will saw your head off for just an ideology. If people would commit murder over that small an amount of money, imagine what they would do to control the trillions of dollars of money that is always moving through the stock market. These are the people that will stop at nothing for power, mansions, hookers, private jets and greed!

THE BRIBED INSIDER TRADING POLITICIANS - Tracked via financial records and email leaks to quid pro quo:

- Aneesh Chopra - White House Tech Exec
- Arnold Schwarzenegger â... Governor (Accused of political bribery and kickbacks; tax evasion, illicit deal organization with Russians and moreâ...!)
- Barack Obama â... Chicago politician
- Bill Daley â... White House strong-arm (Forced to resign)(he is now under investigation)
- Bill Lockyer â... Calif State finance head (Under investigation and sex scandal conflicts, charged with corruption by media. Assets and ownerships under investigation)
- Daniel Cohen â... DOE Legal counsel who assisted in the Steven Chu scam (Sent packing/fired/forced to resign)
- David Axelrod â... White House strategist who helped stage the quid-pro-quo (Sent packing/fired/forced to resign)(he is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)

- Hunter Biden
- David Plouffe â... White House money packager. Arranged deals between VC campaign Donors (Forced to Resign. Under investigation)
- Debbie Wasserman Schultz
- Denis McDonough â... White House adviser
- Dianne Feinstein â... California politician
- Eric Holder â... Attorney General- DOJ (Forced to resign) (Charged with staff & VC Protections and blockade of FBI and Special Prosecutor deployments in order to run the cover-up)
- Eric Strickland â... Head of Auto Safety agency under DOT (Sent packing/fired/forced to resign)(he is now under investigation. Charged with cover-up of Tesla and GM auto dangers he had known about)
- Gabriel Burt
- Harry Reid â... Senator- Solar factory guru, Congress lead (Accused of political bribery and kickbacks; tax evasion, and moreâ...!Forced out of Congress in shame)
- Hillary Clinton â... Dynastic politician
- Jack Lew
- Jay Carney â... White House press lead (Forced to resign)
- Jeff Berman - Bryan Cave. Berman, the former delegate counter for President Obamaâ... s 2008 campaign
- Jeff Peck, Peck, Madigan, Jones & Stewart. Aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee
- Jeffrey Zients
- Jerry Brown â... California politician
- Joe Rhodes â... White House shill
- Joe Biden - Politician who created Solyndra funds
- John Podesta â... White House adviser
- Jonathan Silver â... DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)
- Joshua Wright - FTC
- Kamala Harrisâ... Stock favoritism Insider with her husband
- Katherine Feinstein
- Kathy Zoi
- Ken Alex â... Scheme Adviser to Jerry Brown
- Ken Duberstein and Marti Thomas, The Duberstein Group. Duberstein was floated as a candidate for Obamaâ... s chief of staff before the president chose Bill Daley, while Thomas is a Democratic vet who worked in the Clinton Treasury Department.
- Lachlan Seward â... Energy Department insider gatekeeper
- Melanie Nutter â... Pelosi Top Aide
- Matt Rogers â... VC and quid pro quo pass-through conduit
- Megan Smith - U.S. CTO
- Mikey Dickerson
- Nancy Pelosi â... California politician
- Robert Gibbs â... White press office head
- Steven Chu â... Secretary of Energy â... The most corrupt in US history
- Todd Park â... IT manipulator inside White House
-

THE OLIGARCH FINANCIER/BENEFICIARIES OF THE CRIMES - Tracked via financial records and email leaks to quid pro quo:

- Andy Bechtolsheim â... VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)
- Bill Gurley

- Carl Gordon
- Chad Hurley - YouTube
- Cheryl Sandberg â... Facebook boss, reports to Larry Summers
- Dave McClure â... VC
- David Danielson
- David Drummond â... Lawyer/Lobbyistâ... Google, bribes expert for DC and EU regions (Under investigation. Quail Road, Woodside, CA home bugged)
- David Mott
- David Prend
- David Sacks
- Draper - Fisher â... VC firm (Campaign funder who received massive windfalls from Russian mining & tech start-up rigging)
- Elon Musk â... CEO â... Tesla (He is now under investigation & in multiple lawsuits for fraud)(accused of political bribery and kickbacks; tax evasion, and moreâ...!) (All of his personal assets, investments and portfolio holdings are under investigation)
- Emerson Collective -Steve Jobs wife, has one of the largest and stealthiest election data combines
- Eric Paley
- Eric Schmidt â... Owner- Google (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)
- Gilman Louie â... VC, founder on IN-Q-Tel
- Goldman Sachs â... Financial packager (Suspected of staging most of the TARP/DOE deals for personal gain & insider payouts)
- Greylock Capital â... Silicon Valley Insider trading operator (Under investigation)
- Ira Ehrenpreis â... VC Campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!) (All of his personal assets, investments and portfolio holdings are under investigation)
- Jacque Littlefield â... VC, Dead
- James Bronkema â... West Coast Money Man for David Rockefeller and Feinstein financier (Dead)
- Jared Cohen â... Google boss and international political manipulator
- Wilson Sonsini Partner Club
- Wilson, Sonsini, Goodrich and Rosatti
- Jim Breyer â... VC and CIA intermediary
- Joe Lonsdale â... VC, famous for rape and abuse scandal and domestic spying via Palantir
- Johanna Shelton - Google Lobbyist
- John Doerr â... Owner â... Kleiner Perkins. â... Godfatherâ... â... Silicon Valley Cartel (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)(All of his personal assets, investments and portfolio holdings are under investigation)
- John Lindfors
- Josh Kopelman
- JP Gan
- Keith Rabois -VC
- Ken Howery â... VC
- Kleiner Perkins â... Campaign funding VC who (Received massive windfalls from Russian mining & tech start-up rigging. Sued. Under investigation. All assets being tracked)
- Larry Page â... Google Boss
- Larry Summers â... VC
- Lloyd Craig Blankfein â... VC and Sachs boss
- Luke Nosek
- Marc Andreessen -VC
- Mario Rosatti â... VC
- Mark Zuckerberg â... Facebook Boss
- Martin LaGod -VC Firelake Cap

- Mary Meeker â... VC
- Max Levchin -VC
- McKinsey Consulting â... The firm you hire to rig white papers and insider hires in government positions for the Palo Alto Mafia
- Michael Moritz -VC
- Neerag Agrawal - VC
- Peter Thiel â... VC
- Pierre Omidyarâ... VC
- Raj Gupta â... VC, arrested
- Rakesh Saxena â... Canadian in-house arrest, arms dealer, western political packager
- Ray Lane â... VC
- Reid Hoffman â... VC and sex.com partner with Gary Kremen, also match.com
- Richard Blum â... VC and director/husband of Dianne Feinstein - Finally dead!
- Roelof Botha
- Sanjay Wagle â... VC
- Scott Shleiffer
- Sergy Brin â... Google boss
- Steve Chen
- Steve Jurvetson â... VC embroiled in sex abuse charges
- Steve Rattner â... White House car czar, indicted for fraud

THEIR OPERATIVES AND HIRED MEDIA ASSASSINS - Tracked via financial records, quid pro quo perks and email leaks to payola. The people in the two lists, above, hired these people to harm citizens:

- A.J. Delaurioâ... Defamation-for-sale blogger
- Adam Dachisâ... Defamation-for-sale blogger
- Adam Weinsteinâ... Defamation-for-sale blogger
- Adrian Covertâ... Defamation-for-sale blogger
- Adrien Chenâ... Defamation-for-sale blogger
- Al Dâ... Amato, Park Strategies. The former GOP New York senator has been a big advocate for online gambling as a lobbyist for the Poker Players Alliance.
- Al Mottur and Manuel Ortiz, Brownstein Hyatt Farber Schreck. Mottur heads up lobbying operations at the K Street giant. Ortiz, one of Brownsteinâ... s newest hires, is a rising star in Democratic circles.
- Alan Henryâ... Defamation-for-sale blogger
- Albert Burnekoâ... Defamation-for-sale blogger
- Alex Balkâ... Defamation-for-sale blogger
- Alexander Pareeneâ... Defamation-for-sale blogger
- Alexander Sternhell, Sternhell Group. Previously a Senate Banking Committee staffer, Sternhellâ... s two-year-old venture is in the big leagues with clients such as Citigroup Management and PricewaterhouseCoopers.
- Alexandra Philippidesâ... Defamation-for-sale blogger

- Allison Spinner â... Wife of Steve Spinner and lawyer at WSGR and Solyndra who helped Feinstein rig the Solyndra cash ((Under investigation. All assets being tracked and terminated.))
- Allison Wentzâ... Defamation-for-sale blogger
- Andrew Collinsâ... Defamation-for-sale blogger
- Andrew Magaryâ... Defamation-for-sale blogger
- Andrew McCormack
- Andrew Orinâ... Defamation-for-sale blogger
- Andy Barbour, Smith-Free Group. Smith lobbies for several financial and insurance companies but is best known for his work as the lead Democratic lobbyist for the Financial Services Roundtable.
- Angelica Alzonaâ... Defamation-for-sale blogger
- Anna Merlanâ... Defamation-for-sale blogger
- Ariana Cohenâ... Defamation-for-sale blogger
- Ashley Feinbergâ... Defamation-for-sale blogger
- Ashley Vance - Elon Musk suck-up and Musk hype monger
- Austin Lau
- Ava Gyurinaâ... Defamation-for-sale blogger
- Barry Petcheskyâ... Defamation-for-sale blogger
- Black Cube - An attack service providing hit jobs on competitors
- Brendan I. Koernerâ... Defamation-for-sale blogger
- Brendan Oâ... Connorâ... Defamation-for-sale blogger
- Brent Roseâ... Defamation-for-sale blogger
- Brian Goncher â... Deloitte VC intermediary in the stock market rigging (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ...!)
- Brobeck Law Firm
- Brian Hickeyâ... Defamation-for-sale blogger
- Camila Cabrerâ... Defamation-for-sale blogger
- Carr & Ferrell - Sony and Facebook's law firm that helps to blockade inventors
- Choire Sichaâ... Defamation-for-sale blogger
- Chris Jennings, Jennings Policy Strategies
- Chris Mohnyâ... Defamation-for-sale blogger
- Chuck Brain, Capitol Hill Strategies Inc. Once a Clinton White House aide and longtime House Ways and Means Committee staffer
- Civis Analytics â... Social manipulation group
- Clover Hopeâ... Defamation-for-sale blogger
- Covington & Burling
- Dan Tate Jr., Capitol Solutions. Tate delivers stellar client relations while harnessing 10 years of upper-level Hill and administration experience.
- Daniel Morganâ... Defamation-for-sale blogger
- Covington & Burling - corrupt law firm that puts appointees in office for VC's
- David Sandalow
- Diana Moskovitzâ... Defamation-for-sale blogger
- Doyle Bartlett, Eris Group. Bartlett has years of Capitol Hill experience and a busy lobbying practice
- Eleanor Shechetâ... Defamation-for-sale blogger
- Elizabeth Spiersâ... Defamation-for-sale blogger
- Elizabeth Starkeyâ... Defamation-for-sale blogger
- Emily Gouldâ... Defamation-for-sale blogger
- Emily Herzigâ... Defamation-for-sale blogger
- Emma Carmichaelâ... Defamation-for-sale blogger
- Erin Ryanâ... Defamation-for-sale blogger
- Ethan Sommerâ... Defamation-for-sale blogger
- Eyal Ebelâ... Defamation-for-sale blogger
- Fred Graefe, Law Offices of Frederick H. Graefe

- Fusion GPS â... Defamation and journalist bribery service
- Gabrielle Bluestoneâ... Defamation-for-sale blogger
- Gabrielle Darbyshireâ... Defamation-for-sale blogger and attack services director
- Gawker Media â... DNC/Clinton/Obama character assassination media tool (In Mid-Termination)
- Georgina K. Fairclothâ... Defamation-for-sale blogger
- Gerald Cassidy and Gregg Hartley, Cassidy & Associates
- Gizmodo â... DNC/Clinton/Obama character assassination media tool (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Gregory Howardâ... Defamation-for-sale blogger
- Hamilton Nolanâ... Defamation-for-sale blogger
- Hannah Keyserâ... Defamation-for-sale blogger
- Heather Deitrichâ... Defamation-for-sale blogger
- Heather Podesta, Heather Podesta + Partners. The former congressional aide has built a solid lobbying practice and helps fundraise for Democrats with her husband, Tony Podesta
- Hudson Hongoâ... Defamation-for-sale blogger
- Hugo Schwyzerâ... Defamation-for-sale blogger
- Hunter Slatonâ... Defamation-for-sale blogger
- Ian Fetteâ... Defamation-for-sale blogger and Google, Gawker, Jalopnik, Gizmodo media assassin
- Irin Carmonâ... Defamation-for-sale blogger
- Jalopnik â... Online defamation facade political publication. Pretends to be about cars but is DNC hit job rag
- James Brown Jr â... HHS Programming lead in California (Arrested for corruption)
- James J. Cookeâ... Defamation-for-sale blogger
- James Kingâ... Defamation-for-sale blogger
- Jawed Karim - YouTube
- Jeff Lieberman
- Jennifer Ouelletteâ... Defamation-for-sale blogger
- Jesse Oxfeldâ... Defamation-for-sale blogger
- Jessica Cohenâ... Defamation-for-sale blogger
- Jesus Diazâ... Defamation-for-sale blogger
- Jillian Schulzâ... Defamation-for-sale blogger
- Joanna Rothkopfâ... Defamation-for-sale blogger
- Joel Johnson, The Glover Park Group
- John Cookâ... Defamation-for-sale blogger and director of media assassins group
- John Herrmanâ... Defamation-for-sale blogger
- John Raffaelli, Capitol Counsel
- Jordan Sargentâ... Defamation-for-sale blogger
- Joseph Keenan Trotterâ... Defamation-for-sale blogger
- Josh Steinâ... Defamation-for-sale blogger
- Julia Allisonâ... Defamation-for-sale blogger
- Julianne E. Shepherdâ... Defamation-for-sale blogger
- Julie Domenick, Multiple Strategies LLC
- Justin Hydeâ... Defamation-for-sale blogger
- Kate Driesâ... Defamation-for-sale blogger
- Katharine Trendacostaâ... Defamation-for-sale blogger
- Katherine Drummondâ... Defamation-for-sale blogger
- Kelly Stoutâ... Defamation-for-sale blogger
- Kerrie Uthoffâ... Defamation-for-sale blogger
- Kevin Draperâ... Defamation-for-sale blogger
- Lacey Donohueâ... Defamation-for-sale blogger
- Larry Oâ... Brien, OB-C Group
- Lucy Hallerâ... Defamation-for-sale blogger

- Luke Maloneâ... Defamation-for-sale blogger
- Madeleine Daviesâ... Defamation-for-sale blogger
- Madeline Davisâ... Defamation-for-sale blogger
- Mario Aguilarâ... Defamation-for-sale blogger
- Mark Isakowitz, Fierce, Isakowitz and Blalock. Isakowitz and his GOP lobby shop scored a coup this year when Apple and Facebook both signed up as clients in a two-week span.
- Mark Kadesh, Kadesh & Associates. Kadesh, once chief of staff to Sen. Dianne Feinstein (D-Calif.), has an A-list of California clients
- Matt Hardigreeâ... Defamation-for-sale blogger
- Matt Novakâ... Defamation-for-sale blogger
- Michael Ballabanâ... Defamation-for-sale blogger
- Michael Dobbsâ... Defamation-for-sale blogger
- Michael Spinelliâ... Defamation-for-sale blogger
- Morrison and Foerster
- Neal Ungerleiderâ... Defamation-for-sale blogger
- Nicholas Asterâ... Defamation-for-sale blogger
- Nicholas Guido Dentonâ... Defamation-for-sale blogger and head of the Gawker, Gizmodo, Jalopnik sleaze tabloid empire
- Omar Kardoudiâ... Defamation-for-sale blogger
- Owen Thomasâ... Defamation-for-sale blogger
- Patrick Georgeâ... Defamation-for-sale blogger and Character Assassination expert
- Patrick Laffoonâ... Defamation-for-sale blogger
- Patrick Redfordâ... Defamation-for-sale blogger
- Perkins Coie â... Campaign conduit law firm
- Rich Juzwiakâ... Defamation-for-sale blogger
- Richard Blakelyâ... Defamation-for-sale blogger
- Richard Rushfieldâ... Defamation-for-sale blogger
- Robert Fingerâ... Defamation-for-sale blogger
- Robert Sorokanichâ... Defamation-for-sale blogger
- Rory Waltzerâ... Defamation-for-sale blogger
- Rosa Golijanâ... Defamation-for-sale blogger
- Ryan Brownâ... Defamation-for-sale blogger
- Ryan Goldbergâ... Defamation-for-sale blogger
- Sam Faulkner Biddleâ... Defamation-for-sale blogger, Runs a large part of the Anti-GOP blog programs
- Sam Woolleyâ... Defamation-for-sale blogger
- Samar Kalafâ... Defamation-for-sale blogger
- Sarah Rameyâ... Defamation-for-sale blogger
- Shannon Marie Donnellyâ... Defamation-for-sale blogger
- Shep McAllisterâ... Defamation-for-sale blogger
- Sophie Kleemanâ... Defamation-for-sale blogger
- Stephen Totiloâ... Defamation-for-sale blogger
- Steve Elmendorf and Jimmy Ryan, Elmendorf | Ryan. A former aide to ex-House Democratic Leader Richard Gephardt (Mo.), Elmendorf brought in Ryan to help expand the Senate ties of his firm.
- Steve McBee, McBee Strategic. A former aide to Rep. Norm Dicks (D-Wash.), McBee has seen his lobby firm take off.
- Steve Perry and Andy Wright, Dutko Grayling. Perry and Wright man the roster for one of the top 20 lobby shops in Washington.
- Tamar Winbergâ... Defamation-for-sale blogger
- Taryn Schweitzerâ... Defamation-for-sale blogger
- Taylor McKnightâ... Defamation-for-sale blogger
- The Groundworkâ... Social manipulation group
- Thomas Jolly, Jolly/Rissler. Jolly is founding chairman of the Washington Caucus, a group that hosts

dinner with lawmakers, and a mainstay among lobbyists.

- Thorin Klosowski... Defamation-for-sale blogger
- Tim Marchman... Defamation-for-sale blogger
- Timothy Burke... Defamation-for-sale blogger
- Tobey Grumet Segal... Defamation-for-sale blogger
- Tom Ley... Defamation-for-sale blogger
- Tom Scocca... Defamation-for-sale blogger
- Veronica de Souza... Defamation-for-sale blogger
- Wes Siler... Defamation-for-sale blogger
- William Haisley... Defamation-for-sale blogger
- William Turton... Defamation-for-sale blogger

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
- Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
- Facebook/Meta - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)
- Google, Inc. â... Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and moreâ...!) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
- In-Q-Tel, Inc. â... CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran â... hit-jobsâ... on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
- Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
- LinkedIn - Election manipulation networking site
- Netflix - Propaganda Site that also conduits jobs as political revolving door payola to politicians
- Solyndra Solar Company â... FBI-raided corrupt Clean Tech company
- SpaceX â... Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits
- Tesla Motors â... Car Company that conduits money to campaigns

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICIJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.

LEGISLATIVE BRIEFING FOR THE UNITED STATES CONGRESS

Nov. 1, 2018

NEW BILL PROPOSAL:

Draft 2.2 - <http://www.attacked.biz/index.php?pages/THE-BILL>

"MAKING THE EXCHANGE OF REMUNERATION FOR ATTEMPTED MEDIA MURDER A FELONY"

While it may sound like an obvious need, there currently is no law to stop someone from soliciting and accepting payment in exchange for killing someone using a certain type of weapon.

The weapon is massed arrays of computer servers designed to end a taxpayers life.

You are asked to sponsor a federal anti-character assassination law that makes it a felony to offer, or receive remuneration of any kind, including stock, jobs, search engine rigging, et al; in exchange for the production and distribution of mass media character assassination articles, videos or server algorithms.

This has nothing to do with â... Freedom of Speechâ... . This is not about limiting news stories.

This is about prosecuting those who exchange money in remuneration for ending domestic, taxpaying American lives!

It has to do with paying money to assassins for political or business unfairness. We asked you to sponsor a bill and work with us to craft the draft of the bill.

We are able to arrange a demonstration, using your Senate or Congressional name and brand, to show you, first-hand, how devastating such an attack can be.

Such a demonstration should be illegal..**BUT IT ISNâ... T** until you help us put the law on the books.

A "bad guy" can spend over \$30 Million dollars to destroy an individual taxpayer who voiced an opinion. That taxpayer will have ZERO funds to counter-measure or protect themselves from such an attack. Does a ratio of \$30,000,000 to Zero seem fair to you? That taxpayer will never have access to 10,000 internet servers to fight the 10,000 internet server hard drives being fired at them.

Those awho are opposed to this bill are the character assassination services and law firms who sell character assassination services. The use of their illicit services has been increasing 18% per year. If you run the math out you will see that, within a few short years, a digital civil war of words will be unstoppable. How many years of 18% increases are there until you get to 100%?

The best point that can be made for the importance of this bill is to share with you a

portion of one of the "instruction manuals" for such a "kill order". Imagine if this work order was fired off at you, as an individual, or at the brand of "Jackie Speier" or â... John Boehner" as a known legacy:

".....This is an instruction book about how to destroy the most criminally corrupt politicians and dirt-bags in the world. It teaches you how to wipe out any corrupt person, campaign, company or other entity without breaking the law and to do so for very little expense and with no need for expert skills.

Any private citizen taxpayer has the right, the tools and the ability to do these things.

Why should you need to do this?

BECAUSE NONE OF THE PEOPLE YOU ARE PAYING TAXES TO ARE DOING THEIR JOBS!

The local police, The FBI, The Courts, The SEC, The FEC, The Attorney Generals, The Mayors, The City Supervisors, Your Senators, Your Congress-People.. ALL OF THEM HAVE RECENTLY BEEN ARRESTED, INDICTED, FIRED AND/OR EXPOSED DOING CRIMES TO COVER UP THEIR FRIEND'S CRIMES!

THEY HAVE ALL RECENTLY BEEN CAUGHT RUNNING FINANCIAL CRIMES AND OPERATING STONE-WALL CAMPAIGNS IN ORDER TO KEEP THE PUBLIC FROM GETTING JUSTICE!

You, the taxpayers, have nobody in the system that is on-your-side any more.

For example; The Silicon Valley Oligarchs pay-off the California Senators and Congress-women and they all put hundreds of millions of dollars in their private bank accounts in the Cayman Islands. They got most of that money from your paycheck and your tax payment every April.

They are not going to help you! They are going to continue to rob you while running their stock market insider trading scams at your expense.

"Officials" in California may say "oh, my, that certainly sounds like a bad thing...you should report that, immediately to your lawful representatives: Dianne Feinstein and Nancy Pelosi.." The fact is that Feinstein and Pelosi are running some of the largest graft, payola, revolving door, nepotism and insider trading scams in the whole crime scheme. So how can anyone expect you to go into their offices with a straight face and expect them to help you?

Not only will they not help you, the second you leave their office, their staff will be on the phone to Fusion GPS, Gizmodo and Gawker Media, Black Cube and Podesta Group to order those companies to attack and destroy you. Your life will be ended.

If they get to do that to you, then you get to do it right back to them...except you are going to partner with 300 million other voting

taxpayers to utterly and completely wipe these dirty scumbag politicians out forever.

You will destroy their brand, their finances, their power and their family legacy for the rest of time in every history book that will ever be! You will expose them. You will shame them. You will peel their whole filthy dynastic family empires open like a skinned possum!

CIA, FSB and STAZI psychological warfare operatives are widely documented deploying techniques that can brainwash you into killing your whole family, echo-chambering your whole factory to be either for, or against, unions, believing mass media propaganda about totally fictional issues and other subliminal mind tricks. There are tens of thousands of books and movies about how Madison Avenue ad agencies use these tactics. Modern politicians created operations like In-Q-Tel and New America Foundation to weaponize these tactics. These are the tactics that corrupt politicians and sociopath Silicon Valley social media companies are now using as political weapons against you.

They are not doing awful things like this to try to get you to believe that their political ideas are better. They are doing awful things with your government and your media in order to rig the stock market so they can buy more hookers, jet planes and mansions. You must shut them down before everything is taken away from you and you have no options left for counter-measuring their crimes.

At the point that all of the public's hope, and all of the taxpayers options, are taken away. That is the day the public starts shooting all of the politicians with actual guns.

This book was created to stop that potential violence and to give the public one last lawful and creative non-violent option.

Average consumers are now wiping out the largest corrupt companies and politicians on Earth; and you can do it too using one potent weapon: The Truth!

For the rest of time, the message must ring out loud and clear:

"DO NOT EVER RUN FOR POLITICAL OFFICE IF YOU OR YOUR COVERT FINANCIERS WANT TO MAKE MONEY OFF OF IT. YOU WILL BE WATCHED AND HUNTED DOWN FROM THE DAY YOU ANNOUNCE YOUR CAMPAIGN."

The Public now has access to all of the same tools that the CIA, NSA, KGB, FBI and Fusion GPS have and they have hundreds of millions more "agents" (voters) than all of those spy agencies combined.

In other books we have exposed all of the dirty tactics they use to operate their crimes. Now we are exposing all of the methods that any members of the public can use to catch them and then use mass media distribution to expose them.

The big anti-corruption check-list looks like this. As you can see, it is well on the way to being completed:

"1.) Build The Internet (Done)

2.) Put Movies And Music On The Internet To Get All Of The Base Demographics And Nose Pickers To Come To A Collaborative Global Network (Done)

3.) Give Everybody On Earth All Of The Secrets About How Abused And Manipulated They Are By A Handful of Evil Billionaires (Done)

4.) Expose The Manipulative Fraud Of Political Party Bosses (Done)

5.) Tell The Entire Planet, 1 Million People At A Time, How The Billionaires Companies Abuse Their Privacy, Minds, Human Rights and Media Impressions (Done)

6.) Crash All of the Billionaires Main Stream â... Fake Newsâ... Information Outlets by Exposing Them And Giving All News Away For Free And Teaching People How To Make Free Newspapers (Done)

7.) Crash the Evil Billionaires Silicon Valley Companies, and Money, By Contacting 1 Million People at a Time to Remind Them to Boycott Silicon Valley Companies and Their Products (Done)

8.) Contact Every Advertiser of Every Silicon Valley Billionaire and Warn Them To Pull All Ad Budgets For the Companies Who Contribute to Political Campaigns (In Process)

9.) Make It So That Non-Main-Stream Candidates Can Run And Win By Exposing And Breaking Illicit Election Rigging (Done)

10.) Sit Back And Watch The Fireworks (In Process)"

That check-list is very high-level. Let's get down into the weeds and examine the details of the process.

You must become an FBI-Class, CIA-capable forensic investigator with your computer and mass social networking.

You have access to all of the same tools and intellect that every FBI and CIA agent has access to. CIA and FBI agents primarily sit at computers and track down connections. You can do that too using free public software and groups of people that also hate political corruption. It is actually quite easy.

You know when something is wrong or when something "smells fishy". Now you can turn your intuition and your public spirit into productive home-based forensic research that makes your nation great again.

You will create public case files and gather news articles and related

information in order to expose each of the corrupt people that ruin this great country.

You will expose the dirty and illicit deeds of elected officials and their corrupt political financiers. All of these actions are 100% legal and will be appreciated by non-corrupt law enforcement agencies and the public:

- Expose their Hookers in widely released news and social media releases*
- Expose their Rent Boys in widely released news and social media releases*
- Expose all of the bad dates and sex extortion they engaged in, in widely released news and social media releases*
- Expose their hidden family trust fund payola accounts, in widely released news and social media releases*
- Expose their shell corporations they use to hide from the IRS*
- Expose their mistresses*
- Expose their addictions*
- Expose their under-the-table payments*
- Expose their illegal workers*
- Expose their expensive cars, jewelry and homes that can't afford on a legal salary*
- Expose their Cayman Island, Belize and Swiss hidden bank accounts*
- Expose their personal email accounts they illegally used to hide government fraud*
- Expose their illicit hidden email servers*
- Expose their secret black-lists and start-up valuation rigging like in the Angel Gate Scandal*
- Expose their Uber and Lyft GPS docs proving that they lied about where they went*
- Expose their campaign financing records*
- Expose their social media statements proving they are, or fund, ANTIFA or political disruption programs*
- Expose their money laundering*

- *Expose their connections to Pedo groups and activities*
- *Expose their hotel records and videos of illicit hotel meetings*
- *Expose their PayPal, Bitcoin and credit card payments for illicit services and products*
- *Distribute creative Memes exposing their crimes*
- *File reports with their employers disclosing their crimes and tell the media you told their employers*
- *File many copies of criminal reports on them with all law enforcement entities*
- *Expose the members of their family that hide money for them or use their names to launder money*
- *Photo and video document all of their meetings and actions*
- *Aggregate all of the video investigations about them on many different web video sites*
- *Write and distribute books, articles and white-papers about their crimes*
- *Promote new laws that makes what that criminal uses as a loop-hole, illegal*
- *Re-release all of the above every six months in order to keep the crimes in people's minds*
- *Use "The Striesand Effect" to it's maximum technical potential and research how the "Effect" works*
- *Grow your network of voters and taxpayers who are helping you and make your supporter network bigger every day*
- *Expose the manner in which Google, Facebook and Twitter fight against exposing their criminal friends*
- *Use Google, Facebook and Twitter's own illicit tools against them and expose them with "Hypocrisy Exposure" when they censor*
- *Confront them in every single public presentation they attend and expose them in public*
- *Create coordinated groups of volunteers to expose the troll farms and click farms of the corrupt manipulators*
- *Expose and publicly document all of their illicit real estate holdings, mansions and property scams*

- Release of the details of their crooked secret partnership contracts
- Place a First Amendment informational exhibit outside of their offices, homes and each door they go through each day
- Write them weekly and tell them that they are exposed. Send them certified letters proving that you told them that you know
- Document and publicly expose all of their trips and expenditures
- Document the identities of the service trucks that come to their homes and offices
- Photo document all of their workers, interns and secretaries
- Contact their staff and ask them to report the illicit deeds of their employer. Provide media and police contact information.
- Help their staff and the public organize class-action abuse law suits against the perpetrators
- File RICO Racketeering lawsuits against the corrupt
- File FEC charges, ie: Google provided over \$1B of search engine rigging for Obama's elections but never reported that to the FEC
- Expose their stock market manipulations and valuation rigging in Wall Street Pump-And-Dump scams
- Expose the insider trading where Senators own the stock that they just provided government perks for
- Expose politicians that make tens of millions more dollars, from mystery funds, than their salary should allow
- Use pictures of expensive toys that politicians acquired from taxpayer funds via crony payola
- When they are hacked (which you legally can't do) expose the hacked material globally as far as possible (which you legally can do)
- Read and analyze all publicly posted hacked emails and point out the crimes it exposes
- Meme any criminal remarks that the target makes
- And thousands of additional fully legal public investigation methods...

Every single crooked politician, and their corrupt billionaire financiers, have been using these tactics against the public for 20 years. Silicon Valley, David Brock's groups, John Podesta's groups,

Stratfor, Black Cube, Gawker/Gizmodo and a host of illicit organizations have used all of the above tactics to attack domestic taxpaying citizens in the USA.

Now YOU get to give them a taste of their own medicine!

Pelosi, Feinstein and their financiers use Gizmodo Media, Gawker Media, Jalopnik, and Univision to run retribution vendetta hatchet job media attacks on members of the public that speak out about their crimes. In exchange here is what the public is "giving back" to Gizmodo Media, Gawker Media, Jalopnik, and Univision:

- "1. Added Gizmodo, Jalopnik, Univision prostitute and rent boy uses to master Google docs files and forwarded to law enforcement...**
- 2. Sent duplicates of reports previously provided to James Comey to Christopher Wray at the FBI and regional FBI offices...**
- 3. Added Gizmodo, Jalopnik, Univision tax evasion records to master Google docs files and reported them to IRS, EU and InterPol...**
- 4. Added Gizmodo, Jalopnik, Univision political party past work records to master Google docs files and copied that to adversarial political parties and reporters...**
- 5. Updated every case file on each Gizmodo, Jalopnik, Univision past and present worker in master Google docs files and forwarded them to investigative organizations...**
- 6. Source backers for Gizmodo lawsuits and contact every party attacked by Gizmodo Media to introduce backers, litigation firms and draft case merits to assist with their cases...**
- 7. Launch Gizmodo expose' national news articles and distribute by hand to all related reports in AP, Reuters, Muck Rack, DNC and GOP mailing lists, with background data sets...**
- 8. Release video of London young men who claim to have been abused by Nick Denton...**
- 9. Release video of Manhattan young men who claim to have been abused by Nick Denton...**
- 10. Add Gizmodo, Jalopnik, Univision political email communications with Obama White House to master Google docs files and distribute to AP, Reuters, Muck Rack, DNC and GOP mailing lists, with background data sets...**
- 11. Privately contact Gizmodo, Jalopnik, Univision current and ex-staff and offer cash awards for whistle-blowing...**
- 12. Submit formal "requests for charges" with SEC, FBI, FTC, IRS, FEC,**

FCC, GAO, DOJ and other agencies...

13. File Grand Jury requests for hearings into tax evasion, money laundering, stock rigging, collusion, election manipulation...

14. Prepare rapid-response story points for the Gang-of-20 reporters to counter any Gawker/Gizmodo façade of First Amendment rights with proof of why Gizmodo, Jalopnik, Univision gave up their rights by engaging in crimes...

15. Destroy the investors and company trying to revive Gawker Media by exposing the dirty finances, fake ad stats, click-farms, hookers, money laundering, FEC fraud and other dirt behind them...

16. Deliver the full dossier on them to the public and the media..."

That is just a tiny example from one small campaign.

The pain must be extreme when a politician, who is hired to protect you, puts a thirty million dollar kill order on you that you could never possibly over-come. Taxpayers should not be destroyed because they "did the right thing" and reported a crimeâ...!"

The above are only a small part of the tactics used by companies such as: IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters; Definers; Black Cube; Roger Stone, Mossad; Correct The Record; Sand Line; Blackwater; Stratfor ; ShareBlue; Wikileaks; Cambridge Analytica; Sid Blumenthal; David Brock; Covington and Burling, Perkins Coie, Wilson Sonsini and hundreds of othersâ...!

Can you imagine what this sort of activity could do to a brand. ie: Congress-Woman Jackie Speier has a potent reputation based on the Jonestown massacre event; but a new book called: **â... Cult City: Jim Jones, Harvey Milk, and 10 Days That Shook San Franciscoâ...** distributed on Amazon, has begun to damage her reputation. Imagine if the attackers began amplifying on this trend to destruct Speierâ... s reputation globally and permanentlyâ...!???

The bottom line is that the modern digital age has destroyed lives and the age of modern legislation has not kept up.

When you take away everything a taxpayer has with a multi-million dollar organized defamation attack, you end up with millions of taxpayers who have â... *nothing to lose*â... . That sort of situation will result in obvious social disruption.

This kind of law should have already been in place. Efforts to place such a federal law on the books should be accelerated.

Lloyd Mark "Pete" Bucher (1 September 1927 â€¦ 28 January 2004) was an officer in the [United States Navy](#), who is best remembered as the captain of [USS Pueblo \(AGER-2\)](#), which was seized by [North Korea](#) on January 23, 1968.

Early life and education

Bucher was born in [Pocatello, Idaho](#), where he was given up for adoption by his birth mother, and was orphaned at an early age (his adoptive mother dying of cancer when he was 3). He was raised by his father, grandparents, various other family members, his father again, then drifted through a series of Catholic orphanages in Idaho until he read a magazine article about [Father Flanagan's Boy's Town](#) in [Nebraska](#). He wrote to Flanagan and was surprised when he received a reply. Bucher was accepted at Boy's Town in the summer of 1941, and for the rest of his life considered it to be his home. He flourished at Boy's Town, making honor roll the majority of his time there and playing football, basketball, track and baseball.

Like many young men during World War II, he dropped out of his senior year to enlist in the military, serving the last year of the war and for two years afterward (1945â€¦ 1947) in the Navy. As an enlisted man, Bucher reached the rank of quartermaster second class and obtained a high school diploma. He then worked in construction and as a bartender before entering the [University of Nebraska](#) on a football scholarship in 1949. While attending university, he signed up for [Naval ROTC](#). He graduated with a BS degree in 1953 and was commissioned as an ensign in the U.S. Naval Reserve.

Career as a submariner

In January 1954, Bucher was called to active duty and served as division and education officer on the [USS Mount McKinley \(LCC-7\)](#). In mid-1955, he was admitted to submarine school at [New London, Connecticut](#).

After graduation, Bucher served as torpedo and gunnery officer of the submarine [USS Besugo \(SS-321\)](#), operations officer of the [USS Caiman \(SS-323\)](#), and assistant plans officer for logistics on the staff of Commander, [Mine Force, Pacific Fleet](#).

From 1961 to 1964 he served on the submarine [USS Ronquil \(SS-396\)](#), rising from third officer to executive officer, after which he became an assistant operations officer on the staff of Commander Submarine Flotilla Seven in [Yokosuka](#), Japan. Bucher loved submarines and his greatest desire was to command one. However, he was a conventional submariner not trained in nuclear power, and his career options became limited when the submarine force became increasingly populated by nuclear-powered submarines and nuclear-trained submarine officers effectively hand-picked by [Admiral Hyman G. Rickover](#) in the 1960s. As a result, when Bucher screened for command, he was slated for command of an auxiliary surface vessel outfitted for communications and signals intelligence (COMINT/SIGINT) collection, in this case, [USS Pueblo \(AGER-2\)](#).

The *Pueblo* incident

While monitoring [North Korea](#) in January 1968, the *Pueblo* came under attack by North Korean naval forces, two Soviet era sub-chasers, four motor torpedo boats and two Mig-21 aircraft. U.S. Naval officials and the crew have claimed the ship was in international waters all the time. North Koreans attacked and ultimately boarded the ship, killing one man and taking the ship and her remaining crew of 82 to the port at [Wonsan](#). For the next 11 months, Bucher and his crew were held as [POWs](#) by the North Koreans. The crew reported upon release that they were starved and regularly tortured while in North Korean custody. This treatment allegedly turned worse^[1] when the North Koreans realized that crewmen were secretly giving them "[the finger](#)" in staged propaganda photos, an action the crew had initially explained away as being a "Hawaiian good luck

sign".^[2]

Bucher was psychologically tortured such as being [put through a mock firing squad](#) in an effort to make him confess. Eventually the Koreans threatened to execute his men in front of him, and Bucher relented and agreed to 'confess to his and the crew's transgression.' Bucher wrote the confession since a 'confession' by definition needed to be written by the confessor himself. They verified the meaning of what he wrote, but failed to catch the pun when he said "We paeen the North Korean state. We paeen their great leader Kim Il Sung"^[3] ("We [paeen](#)" sounds almost identical to "[we pee on](#)"). Following an apology, a written admission by the U.S. that *Pueblo* had been spying, and an assurance that the U.S. would not spy in the future, the North Korean government decided to release the 82 remaining crew members. On 23 December 1968 the crew was taken by buses to the demilitarized zone (DMZ) border with South Korea and ordered to walk south across the "[Bridge of No Return](#)". Exactly 11 months after being taken prisoner, Bucher led the long line of crewmen, followed at the end by the Executive Officer, Lieutenant [Ed Murphy](#), the last man across the bridge. The U.S. then verbally retracted the ransom admission, apology, and assurance. Meanwhile, the North Koreans blanked out the paragraph above the signature which read: "and this hereby receipts for 82 crewmen and one dead body" (Fireman Duane Hodges was killed by North Korean gunfire during the taking of the *Pueblo*). Upon release, several members of the crew were crippled and nearly blind as a result of the brutality and malnourishment.^[4]

No American military operations have been attempted to retrieve the USS *Pueblo*. The ship is still officially carried as in [commission](#) in the [United States Navy's Naval Vessel Register](#).^[5] It remains in North Korea as a tourist attraction.

Navy court of inquiry

Following his release, Bucher was subjected to a court of inquiry by the Navy. A [court martial](#) was recommended. However the Secretary of the Navy, [John H. Chafee](#), intervened on Bucher's behalf and no action was taken against him. Bucher followed his orders to not start any international incidents, and he felt that while a ship could be replaced, lives could not.

Bucher was not found guilty of any indiscretions and continued his Navy career until retirement in the rank of commander.^[4]

In 1970, Bucher published an autobiographical account of the USS *Pueblo* incident entitled *Bucher: My Story*.^[6]

The US Government finally recognized the crew's sacrifice and granted Prisoner of War medals to the crew in 1989.^[7]

Death and burial

Bucher died on January 28, 2004. He was buried at [Fort Rosecrans National Cemetery](#) in [San Diego, California](#). The Poway-Bernardo Mortuary, which was featured in the [A&E](#) reality TV series *Family Plots* at the time, handled the funeral services. One of the episodes of the series was dedicated to Bucher's funeral services.^[7]

Awards

[Submarine Warfare Insignia](#) (Dolphins)^[8]

		Purple Heart with one gold star
		Combat Action Ribbon
		Prisoner of War Medal
		China Service Medal
		American Campaign Medal
		World War II Victory Medal
		Army of Occupation Medal
		National Defense Service Medal with one bronze star
		Armed Forces Expeditionary Medal
		Vietnam Service Medal with one bronze star

MSU SCHOLARS FIND \$21 TRILLION IN UNAUTHORIZED GOVERNMENT SPENDING; DEFENSE DEPARTMENT TO CONDUCT FIRST-EVER AUDIT

Contact(s): Mark Skidmore, Andy Henion

Earlier this year, a Michigan State University economist, working with graduate students and a former government official, found \$21 trillion in unauthorized spending in the departments of Defense and Housing and Urban Development for the years 1998-2015.

The work of Mark Skidmore and his team, which included digging into government websites and repeated queries to U.S. agencies that went unanswered, coincided with the Office of Inspector General, at one point, disabling the links to all key documents showing the unsupported spending. (Luckily, the researchers downloaded and stored the documents.)

Now, the Department of Defense has announced it will conduct the first department-wide, independent financial audit in its history (read the Dec. 7 announcement [here](#)).

The Defense Department did not say specifically what led to the audit. But the announcement came four days after Skidmore [discussed his team's findings on USAWatchdog](#), a news outlet run by former CNN and ABC News correspondent Greg Hunter.

“While we can’t know for sure what role our efforts to compile original government documents and share them with the public has played, we believe it may have made a difference,” said Skidmore, the Morris Chair in State and Local Government Finance and Policy at MSU.

Skidmore got involved last spring when he heard Catherine Austin Fitts, former assistant secretary of Housing and Urban Development, refer to a report which indicated the Army had \$6.5 trillion in unsupported adjustments, or spending, in fiscal 2015. Given the Army’s \$122 billion budget, that meant unsupported adjustments were 54 times spending authorized by Congress. Typically, such adjustments in public budgets are only a small fraction of authorized spending.

Skidmore thought Fitts had made a mistake. “Maybe she meant \$6.5 billion and not \$6.5 trillion,” he said. “So I found the report myself and sure enough it was \$6.5 trillion.”

Skidmore and Fitts agreed to work together to investigate the issue further. Over the summer, two MSU graduate students searched government websites, especially the website of the Office of Inspector General, looking for similar documents dating to 1998. They found documents indicating a total \$21 trillion in undocumented adjustments over the 1998-2015 period. (The original government documents and a report describing the issue can be found [here](#).)

In a Dec. 8 [Forbes column](#) he co-authored with Laurence Kotlikoff, Skidmore said the “gargantuan nature” of the undocumented federal spending “should be a great concern to all taxpayers.”

“Taken together these reports point to a failure to comply with basic constitutional and legislative requirements for spending and disclosure,” the column concludes. “We urge the House and Senate Budget Committee to initiate immediate investigations of unaccounted federal expenditures as well as the source of their payment.”

Ignored By Big Telecom, Detroit's Marginalized Communities Are Building Their Own Internet

40 percent of Detroit residents don't have any access to internet at all.

- SHARE
- TWEET

.

[Kaleigh Rogers](#)

Nov 16 2017, 7:50am

Being stuck without access to the internet is often thought of as a problem only for rural America. But even in some of America's biggest cities, a significant portion of the population can't get online.

Take Detroit, where 40 percent of the population has no access to the internet of any kind, not only high speed at home, [according to the Federal Communications Commission](#). Seventy percent of school-aged children in the city are among those who have no internet access at home. Detroit has one of the most severe digital divides in the country, the FCC says.

When you kind of think about all the ways the internet affects your life and how 40 percent of people in Detroit don't have that access you can start to see how Detroit has been stuck in this economic disparity for such a long time, Diana Nucera, director of the [Detroit Community Technology Project](#), told me at her office.

Nucera is part of a growing cohort of Detroiters who have started a grassroots movement to close that gap, by building the internet themselves. It's a coalition of community members and multiple Detroit nonprofits. They're starting with three underserved neighborhoods, installing high speed internet that beams shared gigabit connections from an antenna on top of the tallest building on the street, and into the homes of people who have long gone without. They call it the Equitable Internet Initiative.

Image: Lara Heintz

The issue isn't only cost, though it is prohibitive for many Detroiters, but also infrastructure. Because of Detroit's economic woes, many Big Telecom companies haven't thought it worthwhile to invest in expanding their network to these communities, Nucera told me. The city is filled with dark fiber optic cable that's not connected to any homes or businesses—relics from more optimistic days.

Residents who can't afford internet, are on some kind of federal or city subsidy like food stamps, and students are prioritized for the Initiative, Nucera told me. The whole effort started last summer with enlisting digital stewards, locals from each neighborhood who were interested in working for the nonprofit coalition, doing everything from spreading the word, to teaching digital literacy, to installing routers and pulling fiber.

ADVERTISEMENT

Image: Lara Heintz

Many of these stewards started out with little or no tech expertise, but after a 20-week-long training period, theyâve become experts able to install, troubleshoot, and maintain a network from end to end. Theyâre also aiming to spread digital literacy, so people can truly own the network themselves.

â We want to make sure that weâre not just installing all the equipment, but also educating the community,â said Rita Ramirez, one of the stewards working on the project in Detroitâs Southwest neighborhood.

One component the groups are most eager to build out is the intranet that will result from connecting so many homes (about 50 in each neighborhood) to a shared wireless connection. They are encouraging local residents to take advantage of that intranet and build shared tools like a forum and emergency communication network that is completely localized and secure.

In a city that is rebuilding after a decade of economic turmoil, the internet can no longer be a luxury for the wealthy. Detroitâs renaissance wonât happen without each of the cityâs diverse communities having access to the basic tools of modern work, education, healthcare, and communication. All of Detroit (or, certainly, more than 60 percent) needs access to the internet and the current structure established by Big Telecom hasnât made this an easy goal.

â Communication is a fundamental human right,â Nucera said. â This is digital justice.â

HOW HACKING WORKS

The Motherboard Guide to Avoiding State Surveillance

A straightforward guide to privacy, messaging, and keeping yourself safe from passive and active surveillance.

- SHARE
- TWEET

.

[Sarah Jeong](#)

Nov 27 2017, 8:30am

Image: Koji Yamamoto

This is excerpted from the [Motherboard Guide to Not Getting Hacked](#), our comprehensive guide to digital security. We recommend you read that entire guide if you are generally looking to improve your privacy and securityâ€¦ if you do not take basic steps such as using unique passwords for every account and enabling two-factor authentication on your accounts, this guide will do little to help you. This guide, and that one, will be regularly updated. This post was last updated November 14. -Jason Koebler

ADVERTISEMENT

In the wake of September 11th, the United States built out a massive surveillance apparatus, undermined [constitutional protections](#), and limited possible [recourse to the legal system](#).

Given the extraordinary capabilities of state surveillance in the USâ€¦ as well as the capabilities of governments around the worldâ€¦ you might be feeling a little paranoid! Itâ€¦ s not just the NSAâ€¦ the FBI and even local cops have more tools at their disposal to snoop on people than ever before. And there is a terrifying breadth of passive and unexpected surveillance to worry about: Your social media accounts can be subpoenaed, your emails or calls can be scooped up in bulk collection efforts, and your cell phone metadata can be captured by Stingrays and IMSI catchers meant to target someone else.

Remember, anti-surveillance is not the cure, itâ€¦ s just one thing you can do to protect yourself and others. You probably arenâ€¦ t the most at-risk person, but that doesnâ€¦ t mean you shouldnâ€¦ t practice better security. Surveillance is a complicated thing: You can practice the best security in the world, but if youâ€¦ re sending messages to someone who doesnâ€¦ t, you can still be spied on through their device or through their communications with other people (if they discuss the information you told them, for instance).

Thatâ€¦ s why itâ€¦ s important that we normalize good security practices: If you donâ€¦ t have that much to be afraid of, itâ€¦ s all the more important for you to pick up some of these tools, because doing that will normalize the actions of your friends who are, say, undocumented immigrants, or engaged in activism. [Trumpâ€¦ s CIA Director thinks that using encryption â€¦ may itself be a red flag.â€¦](#) If you have â€¦ nothing to hide,â€¦ your use of encryption can actually help people at risk by obfuscating that red flag. By following this guide, you are making someone else safer. Think of it as herd immunity. The more people practice good security, the safer everyone else is.

ADVERTISEMENT

The security tips provided earlier in this guide still apply: If you can protect yourself from getting hacked, you will have a better shot at preventing yourself from being surveilled (when it comes to surveilling iPhones, for instance governments often have few options *besides* hacking the devices). But tech tools donât solve all problems. Governments have a weapon in their hands that criminal hackers do not: the power of the law. Many of the tips in this section of the guide will help you not only against legal requests and government hacking, but also against anyone else who may be trying to spy on you.

You donât have to turn yourself into a security expert. Just start thinking about your risks, and donât be intimidated by the technology. Security is an ongoing process of learning. Both the threats and the tools developed to address them are constantly changing, which is one of the reasons why privacy and security advice can often seem fickle and contradictory. But the tips below are a good starting point.

Threat Modeling (privacy and surveillance edition)

Keep in mind that different tools address different problems. Without threat modelling, itâs easy to feel overwhelmed by how many tools are out there. Threat modeling for surveillance is similar to threat modelling for hacking, but there are of course some nuances that vary in every situation.

Itâs easy for some people to say â use Signal, use Tor,â and be done with it, but that doesnât work for everyone. For example, a friend used to message people about her abusive ex-partner using the built-in *Words With Friends* messenger, because she knew that he read her text messages and Gchats. *Words With Friends* does not have a particularly secure messaging system, but in this case it was a better option than Signal or Hangouts because he didnât think to read her messages on the game.

ADVERTISEMENT

When it comes to state actors, it might be helpful to think of surveillance in two different forms: surveillance of metadata (who you are, who youâre talking to, when youâre talking) and surveillance of content (what you are saying). As with all things, when you dig a little deeper, itâs not as simple as that. But if youâre thinking about this for the first time, itâs a good start.

Surveillance law is complicated, but long story short, both the law and current technological infrastructure make it easier to grab metadata than content. Metadata isnât necessarily [less important or revealing](#) than content. Say Planned Parenthood called you. Then you call your partner. Then you call your insurance. Then you call the abortion clinic. That information is going to be on your phone bill, and your telephone provider can easily give it up to the government. Your cell provider might not be recording those callsâthe content is still private. But at that point, the content doesnât matterâit would be easy for someone with the metadata alone to have a reasonable idea of what your calls were about.

Start thinking about what is open and exposed, and what you can protect. Sometimes, you have to accept that thereâs very little you can do about a particular channel of communication. If circumstances are dire, youâre going to just have to work around it.

Signal

Signal is an encrypted messaging service for smartphones and desktop computers. It is, for manyâbut not allâpeople, a good option for avoiding surveillance. Because the government has the capability to intercept electronic messages while theyâre being transmitted, you want to use end-to-end encryption for as many of your communications as possible.

ADVERTISEMENT

Using Signal is easy. You can find it and install it from your phone's app store. (In the iOS App Store and the Google Play Store, it's called "Signal Private Messenger," and it's made by [Open Whisper Systems](#).)

If you have the other person's phone number in your contacts list, you can see them in Signal, and message them or call them. As long as the other person also has Signal, the messages automatically encrypt—all the work is invisible.

It even has a desktop app, so you can use it the way that iOS/Mac OS people use iMessage on both their phones and computers. Go to the [Signal.org](#) website and download the app for your preferred operating system. Just follow the instructions—trust us, they're easy.

Signal also lets you set a timer for messages to automatically expire, thus deleting them from all devices. You can set the timer for all kinds of lengths, including very short ones. This is a great feature for journalists who are concerned about protecting their sources or their conversations with editors.

These are great features, and they're part of the reason why we recommend Signal over many other end-to-end messaging apps. iMessage and WhatsApp also use end-to-end encryption, but they both have drawbacks.

We do not recommend WhatsApp, because WhatsApp is owned by Facebook, and [has been sharing user information with its parent company](#). While this is only metadata, it is ultimately a rollback of a privacy promise made when WhatsApp was acquired by Facebook. We think this says something negative about the overall trustworthiness of the company in coming days.

ADVERTISEMENT

It is a very good thing that Apple encrypts iMessages end-to-end. But [iMessage also backs up messages to iCloud](#) by default, which is why you can message from all your Apple devices. This is a great and fun feature, but if you're concerned about government surveillance, remember that Apple complies with lawful government demands for data in your iCloud: "iMessage and SMS messages are backed up on iCloud for your convenience," Apple's privacy page states. You can turn this feature off, but in theory Apple could be forced to access the iMessages you've sent people who still have the feature enabled.

Signal keeps very little information. We know this, because Open Whisper Systems was subpoenaed by the government last year, and was forced to hand over information. But the information it had—by design—was pretty minimal. [Signal retains phone number, account creation date, and the time of the user's last connection to Signal servers](#). Yes, that's still something, but as you can see, it's not very much.

There are worse products to use than iMessage and WhatsApp. For example, [you absolutely should avoid using Telegram](#) for sensitive communications. And Google can read your GChats unless you take additional steps to encrypt them end-to-end. There are several other products on the market that are decent alternatives (for example, [Wire](#)), but like WhatsApp and iMessage, they're created and maintained by for-profit companies, and we don't know how they're planning to monetize in the future. Signal is an open source, nonprofit project. That has its own drawbacks (for example, Signal is not as slick as iMessage, nor does it have the luxury of having a large security team behind it), so maybe [donate money when you download it](#)?

ADVERTISEMENT

One thing that's worth mentioning about Signal is that it requires you to associate the device with a phone

number. This means that you need to trust the people youâre messaging to have your phone number ([or need to jump through hoops to use Signal with a dummy phone number](#)); there are many reasons why you might want to message people without giving them your phone number, which is one of the potential drawbacks of Signal. If this is a concern for you, consider another option.

Another thing to remember is that just because a communication is end-to-end encrypted doesnât mean itâs invisible to the government. It just means the contents are encrypted *between* endpoints. You can see the message, your recipient can see the message. If itâs intercepted in transit, itâs completely garbled, and the content of your message is protected from spying eyes.

But if an â endpointâ is compromisedâ in other words, if your own phone is hacked or physically seized by the government, or your texting partner is screencapping your conversationâ itâs game over.

Encryption doesnât make it impossible for the government to snoop, it just makes it way more challenging. The point is that introducing friction into the equation does provide privacy.

Be conscious of what you post on social media

If you post publicly on social media, know that local police (and likely federal agencies as well) keep tabs on activists online. For example, Facebook, Instagram, and Twitter have all fed data to social media monitoring products that [police departments used to track Black Lives Matter activists](#).

ADVERTISEMENT

Even if you keep your privacy settings on lockdown, social media companies are subject to subpoenas, court orders, and data requests for your information. And often times, theyâll fork over the information without ever notifying the user that itâs happening. For the purposes of social media, assume that everything you post is public. This doesnât mean you should stop using social media, it just means you have to be mindful of how you use it.

If youâre an activist, consider using a pseudonym for your activism. If you post online at all, take othersâ safety and privacy into consideration as well.

Who are you tagging into your posts? Are you adding location information? Who are you taking a picture of, and why? Be particularly careful with photos or posts about protests, rallies, or meetings. [Facial recognition technology](#) is fairly sophisticated now, so even if you leave people untagged, theoretically an algorithm could scan for and identify activists in a photograph of a rally. You can already see this at work in Facebookâs tag suggestions.

When you take a picture of someone at a protest, make sure that they consent, and that they know the implications of having a photo of themselves out there.

Beware of device cameras and microphones

Do you live around any cameras? If you use internet-connected security cameras inside your home, or have a webcam running, donât leave these things unsecured. Make sure that youâve changed any passwords from the default that they shipped with, and cover them when youâre not using them.

ADVERTISEMENT

If you have a laptop or a smartphone, use a sticker to cover the front-facing camera. You donât have to stop

Facetiming and taking selfies, you just want to cover things up so no one's looking at you when you don't want them to. The Electronic Frontier Foundation sells [removable laptop cover stickers](#) (five for \$5) that won't leave a residue on your camera, so you can take it on and off whenever you need it. Consider buying several and giving them to friends who might be shorter on cash.

Finally, there is absolutely no way to make sure your microphone is not recording. If you're concerned about being wiretapped, consider turning off your phone and putting it in the microwave (**temporarily, with the microwave off**), or leaving your phone in the other room. Turning your phone off alone [does not necessarily protect you](#)! And consider leaving all your devices outside of the bedroom when you have sex with your partner.

In 2012, Khadija Ismayilova, an Azeri journalist, was [blackmailed with a surreptitiously filmed sex tape](#). The blackmailer told Ismayilova to stop publishing articles critical of the government, or else have her tape released. (Ismayilova went public, and the tape was posted on the internet.) In 2015, the Azerbaijan government [sentenced her to seven and a half years in prison](#) on tax evasion charges. She is [currently out on probation](#).

Governments at home and abroad have used sex to blackmail dissenters. Be aware of that, and protect your privacy.

ADVERTISEMENT

Protect your devices with a lock screen

Put a password/passcode on your phone and your computer. Don't rely on your thumbprint alone. The police are more likely to be able to legally compel you to use your [fingerprint to open up your phone](#). You may have a stronger constitutional right [not to speak your password](#).

Use OTR for chatting (if you have to)

It's best to use Signal for desktop when chatting with people. But here's another option that's particularly useful for journalists.

Close your Gmail window and use OTR (Off The Record) instead to chat. Keep in mind that you can only use OTR if the other person is also using OTR. Mac users can [install Adium](#), PC (and Linux) users will have to [install Pidgin and the OTR plugin](#).

You can use your Gmail account as your chat ID. So what's going on is that you're engaging in Gchat, but with a layer of encryption on top. Open up a chat window and click the lock icon to begin encryption. And make sure you tweak your settings so that you're not retaining chat logs during encrypted conversations.

Again, end-to-end only goes so far. [If the other person is logging your conversations](#), it might not matter that you went this far. If you're concerned, ask your friend to stop logging.

Install the Tor Browser

Tor, which takes its name from an acronym for The Onion Router, scrambles your internet traffic by routing it through several layers of computers. This way, when you access a website, it can't tell where you're connecting from. The easiest way to use Tor is just to install the [Tor Browser](#). It's just like Firefox or Chrome or Internet Explorer, just a lot slower because of the privacy it provides.

ADVERTISEMENT

Using Tor for everything will give you a big privacy boost, but itâs a bit unwieldy. Donât, for instance, try to stream Netflix over Tor.

Evaluate your needs and figure out how much Tor you need in your life. Always remember that your IP address (which can give away where you are, and therefore, who you might be) is laid bare if you arenât using it.

There are four reasons why you might want to use Tor.

- Youâre trying to keep your identity hidden.
- You use a lot of public WiFi.
- Youâre trying to get around government censorship.
- You are protecting the other people who use Tor.

If youâre an activist who is trying to hide their identity, you need Tor to mask your IP address. This is a limited use case scenario. For example, itâs self-defeating for me to open up Tor, log into my public Twitter account, and tweet, âWhat up, everyone, Iâm tweeting from the Vice Media offices in New York City.â I am giving away all the information that Tor is masking for meâbecause when it comes down to it, in that use case scenario, I was never planning on keeping it private.

If you connect to a lot of public Wi-Fi (think Starbucks, a hotel, or the airport), though, you should use Tor. It provides similar benefits as VPNs , but without many of the drawbacks of a VPN (see the next section for a discussion of that).

If the United States begins to censor parts of the web, [as many other governments do](#), Tor might be able to help you get around that. Tor certainly helps people connecting to the internet from other countries that practice internet censorship.

Finally, the thing about Tor is that the more people use it, the less trackable everyone else is. When a lot of random, unaffiliated people from all over the world use it, it becomes stronger and stronger. If you take the time to use Tor every day, you are helping people who really do need it.

ADVERTISEMENT

A couple caveats, here: Tor is not bulletproof. The government has been known to hack groups of users on Tor, [just like itâs been known to hack VPN users en masse](#). Tor, by itself, does not make it more unlikely for you to get hacked. Tor is for privacy, not security. And Tor is designed to make it *hard* to log your traffic, *not impossible*, so thereâs always a risk that you arenât being hidden.

The computers that make up the Tor networkâthe ones that your traffic bounces throughâare run by volunteers, institutions, and organizations all over the world, [some of whom face legal risks for doing so](#). They are not supposed to log the traffic that goes through them, but because itâs a volunteer network, some might. The risk is mitigated by the fact that each node only sees a snapshot of the traffic running through it, and nobody has access to both the userâs IP and their unencrypted traffic. A bad actor would have to run a very large number of Tor nodes to start logging meaningful trafficâwhich would be difficultâand the Tor project monitors for behavior that suggests anybody might be doing that.

Ultimately, for the purposes of state surveillance, Tor is better than a VPN, and a VPN is better than nothing.

Itâs not clear whether Tor will continue to exist into the future. Tor is run partly through grants from the

government. (Like many cutting edge technologies, Tor was originally developed by the US military.) Itâ... s possible Tor will lose most of its funding in the very near-term. Consider donating to the [Tor Project](#).

ADVERTISEMENT

Virtual Private Networks

When it comes to state surveillance, VPNs wonâ... t help much. A VPN will obscure your IP address, but when it comes to state surveillance, VPNs can be subpoenaed for user information that may ultimately identify you. For example, [many VPN companies keep logs](#) on what IP addresses log on when and what sites are accessedâ... which can end up pinpointing you, especially if you used your credit card to pay for a VPN subscription.

Some VPN companies claim not to log user information. You need to evaluate how much you trust these companies, and make that decision for yourself. If what youâ... re concerned about is government surveillance, our recommendation is that you stick with Tor.

PGP (probably isnâ... t worth the trouble)

The only reliable way to encrypt your email is PGPâ... also known as Pretty Good Privacy. However, PGP is incredibly obnoxious to use. [Even PGPâ... s creator Phil Zimmermann has stopped using it, since he canâ... t use it on his phone](#). The problem isnâ... t just that *you* have to figure out PGP, everyone you talk to also has to figure it out. Telling someone to download Signal is a lot easier than walking them through public/private key encryption. This is where your threat model comes in handy, to help figure out if PGP is actually worth it to you.

If you absolutely must use encrypted email, [this guide to PGP might be helpful](#). Itâ... s tricky, so you might want to go to a crypto party and have an activist or technologist help you set it up.

ADVERTISEMENT

Donâ... t run your own email server

If 2016 did anything, it convinced everyone [not to run their own private email server](#).

Itâ... s true that Google and other companies have to comply with court orders for your information, including your emails. But on the other hand, Google knows how to run email servers way better than you do. Email servers are hard! Just ask Hillary Clinton.

If you are encrypting email, Google can only hand over the metadata (whoâ... s sending to whom and subject headers). Since encrypting email is a huge pain, try to keep all your sensitive stuff away from email, and in end-to-end encrypted channels instead. Donâ... t abandon your third-party email account, just be aware that the government can get at whatâ... s inside.

Encrypt your hard drive

Good news: this isnâ... t as hard as it used to be!

Full-disk encryption means that once your device is locked (when itâ... s off, or when itâ... s on but showing a lock screen), the contents of your hard drive canâ... t be accessed without your password/key.

A lot of smartphones come with full disk encryption built in. If you own an iPhone with a recently updated operating system (like, in the last three years, really), just slap a passcode on that sucker and youâre golden.

If you own an Android phone, it might already be encrypted by default (Google Pixel is). But chances are, itâs not. There isnât an up-to-date guide on turning on encryption on all Android devices, so youâre going to have to poke around yourself, or ask a friend. And if you own a Windows phone, god help you, because I canât.

ADVERTISEMENT

As for computers, things are again, much easier than they used to be. Use your operating systemâs full disk encryption option instead. For MacBooks running Lion or newer, just [turn on FileVault](#).

Windows, on the other hand, is a lot more complicated. First off, *some* users have encryption by default. Some more users can turn it on, [but itâs kind of a pain](#). And if youâre using Microsoftâs Bitlocker, youâre going to have to fiddle with [some additional settings to make it more secure](#). Apple doesnât retain the capability of unlocking your devices. Famously, if the government goes to Apple, Apple canât just decrypt your phone for the feds, [not without coming up with a hack that will affect every iPhone in the world](#). But Microsoft isnât doing quite the same thingâ in some cases they use whatâs known as âkey escrow,â meaning they can decrypt your machineâ so you have to take additional steps ([outlined in this article](#)) to get that same level of protection.

You may need to resort to using [VeraCrypt](#). A lot of older guides will say to use TrueCrypt, regardless of operating system. This is now outdated advice. VeraCrypt used to be TrueCrypt, and the story of why it's not any more is a convoluted crypto soap opera with plot holes the size of Mars, and it is frankly outside the scope of this guide. Long story short, thereâs nothing wrong with VeraCrypt as far as the experts can tell, but if you have the option, use the full disk encryption that your operating system already provided.

ADVERTISEMENT

If you use Linux, your distro probably supports encryption out of the box. Follow the instructions while installing.

If youâre a journalist, know the risk of hanging onto your notes

Want to protect your sources? Your notes, your Slack chats, your Gchats, your Google Drive, your Dropbox, your recorded interviews, your transcripts, and your texts can all end up in court. Depending on what kind of court case it is, it might not matter that itâs encrypted.

Donât wait until a lawsuit is imminent to delete all your stuff. That might be illegal, and you might be risking going to jail. Every situation is different: your notes might be necessary to get you *out* of trouble. So if youâre the type to hoard notes, know the risk, talk to a lawyer, and act responsibly.

Credit Cards

Know that credit card companies never stand up to the government. If you pay for anything using your credit card, know that the government can get that information pretty easily. And remember that once your identity touches something, thereâs a chain that the government can follow all the way back.

For example, if you get a prepaid Visa gift card using your personal credit card, and pay a VPN company with that, the government can just go backwards through the chain and find your personal credit card, and then you. If you pay a VPN company with Bitcoin, but you bought the Bitcoin through a Bitcoin exchange using your personal credit card, thatâs traceable as well.

This applies to anything else you use money for, like buying domains or cheap, pay-as-you-go phones, known as burners. Practically speaking, thereâs not a lot you can do about this. Itâs one of the reasons why we recommend Tor instead of a VPN service.

ADVERTISEMENT

Itâs also one of the reasons why itâs so hard to get a burner phone thatâs *really* a burner. (How are you going to pay for continuing phone service without linking your name to it?) There is no easy answer here. Weâre not going to pretend to be able to give good advice in this instance. If you find yourself in a situation where your life depends on staying anonymous, youâre going to need a lot more help than any internet guide.

One more thing: For now, organizations like the ACLU and NAACP have a [constitutional right to resist giving up the names of donors](#). But your credit card or PayPal might betray you anyways. This doesnât mean you *shouldnât* donate to organizations that resist oppression and fight for civil rights and civil liberties. Rather, it makes it all the more important that you do. The more ordinary people do so, the more that individual donors are protected from scrutiny and suspicion.

We donât know what the future holds

Which brings us to our next point: we donât know what the future holds. This guide was written with the current technical and legal capabilities of the United States government in mind. But that might all change in the future. Strong encryption might become illegal. The United States might begin to practice internet censorship the way that China and other countries do. The government might institute a National ID policy for getting online, making it near-impossible to post anonymously.

ADVERTISEMENT

These things are harder to enforce and implement, so theyâre not likely to happen quickly.

Itâs also not infeasible that the government pressures app stores to take down Signal and other end-to-end encryption applications. This guide might be only be so good for so long. Thatâs all the more reason to become proactive against surveillance now, and to keep adapting to changing circumstances.

Meet in person

Many public places have cameras, some spots are [wired with microphones](#). And thereâs always the possibility that you are being individually targeted for surveillance. But ultimately, itâs a lot harder to surveil someone in person than to collect the electronic communications of many people at the same time.

Take a break from the wired world and meet people in person. If you stay out of earshot, you wonât be overheard, and your words will melt into the air, unsurveilled and unrecorded.

And besides, if youâre reading this guide, chances are that you really need a hug right now.

So meet up with your friends, verify your Signal keys, and give each other a big hug. Because youâre

probably both scared, and you need each other more than you need any of this technology.

GO OUT THERE AND BE SAFE

That is all for now. Again, this is just meant to be a basic guide for average computer users. So if you're a human rights activist working in a dangerous country or a war zone, or an organization building IT infrastructure on the fly, this is certainly not enough, and you'll need more precautions.

Meet PULSE-NET; A Whole New Kind Of Internet That Can Never Be Shut Down

Open source PULSE-NET uses the stars in the sky, the sun and immovable mountains and buildings for position sensing. This way, your location can't be spied on and when a solar blast, or space warfare, knocks out all of the GPS satellites, you are still good to go. The reason the USA, China and Russian have created official "Space Forces" is because everyone has heard the plans to blow up or EMF-blast each other nations satellites.

Celestial navigation has been around for centuries. With modern technology, you can even use it in the daytime.

Also, you don't need a satellite to tell you to go so many feet in one direction and then so many feet in the next direction. You just need a surface measuring tool like a pedometer, mileage indicator or laser measure.

An evil corporation or media cartel can't hide, censor, down-rank or stop anybody from finding the stars. That is not a thing they can manipulate.

So how do you get a network with no wires and no servers?

Easy, you just pulse the data out and pick it up later, like a dust devil spraying particles across the desert.

Even streaming video is not actually real-time data. Most TV shows were made long ago. You are not watching much of anything that does not have a few seconds delay on it.

By pulsing the data out on regular radio frequencies, light bursts and a wide mix of electromagnetic frequencies there is enough data space in the world to cover every known communication and media need.

AT&T, Comcast, YouTube and the other big corporate giants are going to launch a multi-billion dollar disinformation campaign to try to stop you from trying this because they can't control it...but...

It is one kind of technology that they can never control. They can't block the stars and they can't mask all of the plain old radio signals.

Forget about their 2G and 3G and 4G signals. You don't need it. Forget about their fiber optic and cable tv cables. You don't need them.

AT&T, Comcast and Youtube want you inside their walled garden. You want freedom. A PULSE-NET connection is what you want.

WHERE DO YOU GET ONE?

Programmers around the world are working on this technology now. Soon, open source, \$15.00 U.S. circuit boards will be available for anyone to play with.

Just like the Raspberry Pi launched a whole new kind of public computer system, Pulse-Net is launching a whole new kind of internet system. As with Raspberry, at first there was just one kind. Now there are thousands of different Pi-like micro-PC boards.

The technology is far more than just peer to peer mesh networking. It is a global effort to put the web back in the hands of the public.

Using a Pulse-Net is free forever. You never have to pay to use the web again.

If you can program or make rudimentary circuit boards you are now the AT&T of the world.

THE "INTERNET" VS. THE "WEB"

The "Internet" is the corporation controlled network that looks like a single point with rays of connections spreading out from it.

The "Web" is the public operated mesh of free networks that looks like a spider web or fish-net kind of structure.

On the "Internet" that single point is usually the boss corporations in Silicon Valley. They don't want you to see anything that does not agree with their ideologies and politics. Their limits on your freedom have created the censorship crisis that has the world up in arms. That single point makes Silicon Valley oligarchs the gate-keepers of your information, privacy and news. Nobody likes that.

With a "Web" structure as your internet, you can connect anywhere in the world using almost anything around you like game boxes, phones, Pulse boards, TV's, smart cars, wireless appliances, walkie talkies... you name it.

The future is here and it can't be censored, cut off or charged for!

Meet The Hackivists Wildest Dirty Trick: "Dousing"

By Defcon Danny

At DefCon we learned of something at the bleeding edge: Dousing. This tactic has already brought down numerous corrupt government bosses.

It works like this.

Right after 9-11, George Bush ordered the hacking of every electronic device on Earth. The chosen method was to place a "backdoor" in every electronic device. Spy groups, largely in Texas, were set-up to accomplish this. They started doing it with Cisco, Intel, Motorola, Juniper Networks, etc.

There were two problems with this plan:

1. Nobody ever told them to stop doing it.
2. Nobody can ever build a back-door that someone else can't pick.

Shortly after this the foreign spies and script kiddies picked the locks.

Instead of making a big deal about it, the kiddies, FSB and China just sat around for over a decade sucking copies of EVERYTHING off of every server in the USA.

Then they ran analysis software on all of the trillions of files to set-up keyword searches.

Then they started trading the files and search tables with each other.

That is all as expected but here is the interesting wrinkle. The foreign spies and the script kiddies now search the news and look for big battles between one side or another and supply all of the insider secret evidence to the side that they want to win.

In some of the biggest investigations going on right now, where do you think the biggest scoops came from?

This is called "Dousing a Chicken" or "Dousing".

You may think you, Mr. Dirty Senator, that deleted all of your sex texts and personal emails from 2005, but you only deleted your copies. A kid in Malaysia has his own copy and he is just waiting for you to spout off in the news!

Millennial poll: Strong majority want a third political party

by HANNAH HARTIG and STEPHANIE PERRY

A strong majority of millennials â 71 percent â say the Republican and Democratic parties do such a poor job of representing the American people that a third major party is needed, according to the results of a new NBC News/GenForward poll.

.

Sixty-three percent of millennials disapprove of the way President Donald Trump is handling his job as president. But millennials also hold a variety of political institutions in poor regard, and 65 percent think the country is on the wrong track overall.

.

Six in ten disapprove of the way Congress is handling its job, while 59 percent have an unfavorable view of the Republican Party and 42 percent have an unfavorable view of the Democratic Party. On the whole, millennials overwhelmingly do not think either party cares about people like them.

These views may help explain why a large majority of young adults â across racial subgroups, genders and partisan affiliations â say a third major party is needed. The survey was conducted October 26 to November 10, among a nationally representative sample of 1,876 adults aged 18-34.

.

White millennials, at 75 percent, are most likely to express a desire for a third party, with strong majorities of African Americans (69 percent), Asian Americans (69 percent) and Latinos (64 percent) agreeing.

.

Three quarters of men, 74 percent, said that a third major party is needed and only 23 percent said the Republican and Democratic parties do an adequate job representing the American people. Women were more likely to say that the parties do an adequate job (29 percent) but a sizable majority (69 percent) still said a third party is needed.

Eight in 10 white men said that a third party is needed â more than Asian American men (71 percent), Latino men (67 percent) and African American men (65 percent).

.

Voters fill out their paper ballots in a polling place on election day Nov. 8, 2016 in Arlington, Virginia. Alex Wong / Getty Images file

But slightly more African American women said a third party is needed (73 percent) than white women (70 percent), Asian American women (67 percent) and Latino women (61 percent).

Independent millennials who do not lean toward either party and millennials who identify as Democrats or Democratic-leaners were more likely to say a third party is needed (74 percent and 75 percent, respectively)

than millennials who identify as Republicans or Republican-leaners (67 percent). Three in 10 Republicans said the parties do an adequate job, compared to a quarter of Democrats and only 22 percent of Independents.

.

Republican women are more likely than Republican men to say that the two major parties do an adequate job representing the people â... 45 percent to 22 percent, respectively. Independent women are also more likely than Independent men (24 percent to 17 percent) to say that the two major parties do an adequate job.

The NBC News/GenForward at the University of Chicago Survey was conducted Oct. 26-Nov. 10, 2017, among a nationally representative sample of 1,876 adults ages 18-34, recruited and administered by NORC at the University of Chicago. The overall margin of sampling error is +/- 3.92 percentage points. For full results and methodology, [click here](#).

More Than 750 American Communities Have Built Their Own Internet Networks

A new map shows that more communities than ever are building their own broadband networks to end big telecom's manipulative monopoly.

- SHARE
- TWEET

[Karl Bode](#)

Jan 23 2018, 2:09pm

Image: ILSR

More communities than ever are embracing building their own broadband networks as an alternative to the Comcast status quo.

According to a [freshly updated map](#) of community-owned networks, more than 750 communities across the United States have embraced operating their own broadband network, are served by local rural electric cooperatives, or have made at least some portion of a local fiber network publicly available. The map was created by the Institute for Local Self-Reliance, a nonprofit that advocates for local economies.

These networks have sprung up across the nation as a direct reflection of the country's growing frustration with sub-par broadband speeds, high prices, and poor customer service. They've also emerged despite the fact that ISP lobbyists have convinced [more than 20 states to pass protectionist laws](#) hampering local efforts to build such regional networks.

Many of these laws even bar communities from striking public/private partnerships with companies like Google Fiber, even in instances where no private ISP is willing to provide service.

"Municipal and cooperative networks were essential in driving electrification and we are seeing the same dynamic with the expansion of high-quality Internet access"

The Institute's latest update indicates that there's now 55 municipal networks serving 108 communities with a publicly owned fiber-to-the-home internet network. 76 communities now offer access to a locally owned cable network reaching most or all of the community, and more than 258 communities are now served by a rural electric cooperative.

Many more communities could expand their local offerings according to the group's data. 197 communities already have some publicly owned fiber service available to parts of the community, while more than 120 communities have publicly-owned dark (unused) fiber available for use by local residences and local area businesses.

The group's [map](#) also highlights which states have erected legislative barriers to hamper these local efforts and explains what these laws actually do.

A [recent study by Harvard University researchers](#) indicated that community broadband networks tend to offer notably lower pricing than their private-sector counterparts. The study also found that community broadband network pricing tends to be more transparent and less intentionally confusing than offers from incumbent ISPs like Comcast or AT&T.

With the Trump administration's recent assault on both [net neutrality](#) and broadband [privacy protections](#), interest in local broadband as an alternative to incumbent providers has [only grown](#).

"Evidence from other cities suggests that a real choice in broadband services could reduce Comcast's revenues by millions of dollars per month"

â... What this update shows is that, despite federal hostility to community network solutions, more communities are investing than ever,â... Christopher Mitchell, director of the Community Broadband Networks initiative at the ILSR, said in a statement. â... Municipal and cooperative networks were essential in driving electrification and we are seeing the same dynamic with the expansion of high-quality Internet access.â...

Much like net neutrality, ISP lobbyists and policy folks have long-framed municipal broadband as a partisan debate in the hopes of derailing such efforts. But the group's data shows that these networks are [most frequently popping up in Conservative areas](#) and have broad, bipartisan support. Our desire for better broadband, and our collective disdain for Comcast, tends to be one of the few things capable of bridging the partisan divide.

Incumbent ISPs have a long history of using dirty tricks to try and derail these efforts. In Illinois, regional cable and phone companies once [funded push polls](#) (polls intentionally designed to shape, not measure public opinion) informing locals that community broadband would help subsidize porn production, or result in government rationing of TV viewing.

As we [recently saw in Fort Collins, Colorado](#), ISPs are frequently willing to spend plenty of money in attempts to malign and denigrate community broadband at every opportunity. They've long been afraid of this trend taking off and threatening the cash cow that is the overall lack of competition in countless markets nationwide.

"Evidence from other cities suggests that a real choice in broadband services could reduce Comcast's revenues by millions of dollars per month," the group stated in a [policy brief](#) late last year. "Competition in Fort Collins would cost Comcast between \$5.4 million and \$22.8 million per year. In Seattle, robust competition would cost between \$20 million and \$84 million per year."

ISPs eager to nip these efforts in the bud could offer better, cheaper broadband. Instead, they've chose to spend that money lobbying for state laws prohibiting your town or city from even exploring the option.

TWITTER Bans Conservative Gavin McInnes but David Duke, Hamas, Antifa, Farrakhan, Islamists and Black Lives Matter Hate Groups Still Have Accounts

by Jim Hoft August 11, 2018 89 Comments

- [613Share](#)
- [246Tweet](#)
- [Email](#)

Twitter [banned](#) both the official verified account for the Proud Boys and the account belonging to their founder, comedian and CRTV host Gavin McInnes on Friday night.

Twitter also banned the accounts belonging to The Proud Boys Girls, all chapter accounts, and Kyle Chapman, who is better known online as Based Stickman.

The suspensions are permanent, though no reason was provided. All of the accounts appear to have been banned at the same time.

At the same time Twitter allows David Duke, Louis Farrakhan, Hamas, Antifa terrorists and radical Black Lives Matter hate groups to keep their accounts.

Hamas terrorists have a [Twitter account](#).

Racist and Jew-hater Louis Farrakhan still has an account.

This [anti-Semitic tweet](#) is pinned at the top of his page.

Racist [David Duke](#) has an account.

The Iranian Guard Special Forces posted this threat to Israel recently.

New Asian Anti-Spy Gadgets Protect You From Electronic Eavesdropping With Screech Mask

Written by Curiosity Staff

3,603

It seems like every time there's a convenient new gadget released, a few months later you find out that it's been collecting your personal information or [recording your conversations](#). In the future, that might not be so easy â... not if University of Illinois researchers have anything to say about it. They've created a sound that's inaudible to humans, but can be picked up by any microphone, making it a powerful shield against spying electronics.

An Audio Disillusionment Charm

The [human ear](#) can hear sounds in the range of roughly [20 Hz to 20 kHz](#), or 20â... 20,000 Hz. Since we record sound so we can hear it, microphones have the same "hearing" range as humans â... mics generally max out at [around 24 kHz](#). But in 2017, researchers at the University of Illinois Coordinated Science Laboratory discovered a loophole in the way microphones operate. With the right combination of tones, they found, you can make a microphone pick up a sound that's above the range of human hearing. They call this sneaky system BackDoor.

[The paper](#) gives an example of how it works: BackDoor might play two tones together, one 40 kHz and one 50 kHz, both way beyond the range of what a human and a microphone can pick up. The tones arrive at the microphone's power amplifier. But because a microphone's design isn't perfect, the power amplifier not only amplifies the frequencies, but multiplies them too, resulting in two more "shadow" tones: 40 kHz + 50 kHz, or 90 kHz, which is still inaudible; and 40 kHz - 50 kHz, or 10 kHz, which is perfectly audible, if a little ear-splitting.

Importantly, that 10 kHz tone isn't broadcast; just recorded. That means that humans wouldn't hear anything strange in the moment, but if they played the sound back, they'd hear a piercing whine. The best part? You don't need any special equipment for it to work. Any microphone can record the tone.

As part of the BackDoor experiment setup, a 2Watt speaker array system for jamming applications.

[Image: University of Illinois at Urbana-Champaign](#)

Alexa, Earmuffs!

This could be huge for electronic privacy. "Imagine having a private conversation with someone. You can broadcast this inaudible signal, which translates to a white noise in the microphone, to prevent any spy microphones from recording voices," says coauthor Nirupam Roy. "Because it's inaudible, it wouldn't interfere at all with the conversation." And forget warnings about recording devices before concerts and plays â... venues could just play these special frequencies to make anything recorded unusable. It could also help smart home devices communicate with one another in lieu of Bluetooth or WiFi.

But like a lot of technology, this also has its dark side. "Inaudible sound jammers, could, for example, affect someone wearing a hearing aid because the internal microphone would pick up that sound," said Roy. Or worse, criminals could jam phones during a robbery, keeping victims from contacting the police. But facing the downsides head-on will protect people in the long run. If the researchers are aware of the ways BackDoor can be used for ill, they can take steps to prevent that from happening.

New Working Technology Replaces Theranos Failures And Can Find Most Of The Things Giving you Cancer

- Your community can now easily uncover cancer-causing materials in your food, water, soil and air

A new method for simultaneous measurement of 71 inorganic elements in liquids... including water, beverages, and biological fluids... makes element testing much faster, more efficient, and more comprehensive than was possible in the past.

The researchers studied samples of liquid from a variety of sources worldwide, including tap water from a New York City suburb, snow from Italy and Croatia, rain from Brazil and Pakistan, lake water from Switzerland and Croatia, and seawater from Japan and Brazil. Testing each sample results in a distinct elemental pattern, creating a "fingerprint" that can help differentiate between substances or trace a liquid back to its environmental origin.

The method... developed by researchers at the isotope laboratory of NYU College of Dentistry and described in the journal RSC Advances, published by the Royal Society of Chemistry... may be used to explore and understand the distribution of inorganic elements beyond the few that are typically measured. It has implications for fields such as nutrition, ecology and climate science, and environmental health.

An analytical technique called inductively coupled plasma mass spectrometry (ICP-MS) is used to measure elements. Historically, ICP-MS instruments have measured elements sequentially, or one by one, but a new type of ICP-MS instrument at NYU College of Dentistry and roughly two dozen other places around the world has the potential to measure the complete range of inorganic elements all at once.

More than H₂O: Technology simultaneously measures 71 elements in water, other liquids
A new method for simultaneous measurement of 71 inorganic elements in liquids--including water, beverages, and biological fluids--makes element testing much faster, more efficient, and more comprehensive than was possible in the past. Credit: Sapna Parikh / New York University
"Because of this new method, our mass spectrometer can simultaneously measure all inorganic elements from lithium to uranium. We're able to measure the elements in far less time, at far less expense, using far less material," said Timothy Bromage, professor of biomaterials and of basic science and craniofacial biology at NYU College of Dentistry and the study's senior author.

This technological advancement may help to fill gaps in our understanding of element distributions and concentrations in substances like water. For instance, the U.S. Environmental Protection Agency monitors and sets maximum concentration limits for 19 elements in drinking water considered to be health risks, yet many elements known to have health consequences... such as lithium or tin... are neither monitored nor regulated.

"The elemental mapping of concentration levels in bottled and tap water could help to increase our understanding of 'normal' concentration levels of most elements in water," said Bromage.

Bromage and his colleagues designed a method for using simultaneous ICP-MS to detect 71 elements of the inorganic spectrum involving a specific set of calibration and internal standards. The method, for which they

have a patent pending, routinely detects elements in seconds to several minutes and in samples as small as 1 to 4 milliliters.

More than H₂O: Technology simultaneously measures 71 elements in water, other liquids

A new method for simultaneous measurement of 71 inorganic elements in liquids--including water, beverages, and biological fluids--makes element testing much faster, more efficient, and more comprehensive than was possible in the past. Credit: Sapna Parikh / New York University

Bromage and his research team tested the method on waters, beverages, and biological samples. Snow contained the most elements of any water sample: 50 in snow collected in Italy and 42 in a sample from Croatia. "Such evaluations of snow may represent a new and comprehensive means of surveying atmospheric concentrations of elements and for monitoring element patterns in global airflows," Bromage said.

When testing tap water, the researchers measured 37 elements when the tap was first turned on but only 34 elements after the water was running for five minutes, suggesting that elements such as iron and zinc may be leaching from household pipes into the water.

The researchers also measured elements in bottled water, beer, wine, and milk, as well as in samples of saliva, urine, and blood. Milk was distinguished from the other beverages tested by its high concentrations of titanium, zinc, palladium, and gold.

In each sample, Bromage and his team found a distinct "fingerprint" or elemental pattern, suggesting that samples can be recognized and differentiated by these patterns. The elemental content of water, for example, typically reflects its natural environment, so understanding the elemental composition can tell us if water had its origins from a source with volcanic rock versus limestone, an alkaline rock. In bottled water, the researchers observed variations that can likely be traced to one being bottled at the source and one being chlorinated for transportation from the source to the bottling plant.

Future studies will measure and report on larger samples of water, wine, milk, and other fluids; a study of more than 1,000 wines from 34 countries is in progress. In addition, once elemental patterns for specific environments have been established, the method can be applied to answer questions in fields that relate the present to the past, such as the paleoenvironment and climate change.

"Water is an arbiter of how a system actually works. If you sample the water from a pond or river and measure the elements, you are measuring the stuff that becomes incorporated into all life... water feeds the plants, animals eat the plants, we eat the plants and animals. We could use this knowledge to study human fossils and potentially retrodict what the nature of the region's water was hundreds of thousands or millions of years ago," said Bromage.

12 Best Open Source Social Network CMS

1. BuddyPress

[BuddyPress](#) is an open source social networking software package owned by Automattic. Everything you need to start your own self-hosted and WordPress-powered social networkâ€¦ .

There are many free and premium BuddyPress themes and other plugins with additional features for creating powerful community-powered site. If you want to build your company team/members profile within your organization, BuddyPress is best for you.

With WordPress + BuddyPress, you can build a self hosted social network for your company, team and organization.

2. Dolphin

[Dolphin](#) is a CMS ([Content Management System](#)) software that lets you create social networks, dating sites, and web communities. It comes with video chat, recorder, video player, forums, groups, events, video messaging, emails, file sharing as well as desktop and mobile apps.

3. Pligg

[Pligg](#) is a social media CMS platform that powers tens of thousands of websites. Some [popular hosting providers](#) like Hostgator and InMotion Hosting offer Pligg application so you can create a self-hosted bookmarking site like Reddit.

It specializes in creating social publishing networks, where users submit and promote content similar to sites like Digg, Reddit, and Mix.

4. Jamroom

[Jamroom](#) is one of best open source social network software in 2019. You can create any type of online social network site with this application. It is available free to download, but if you want to support team helps, you need to pay.

5. Elgg

[Elgg](#) is a powerful open source social networking engine and one of the most popular development platforms. Itâ€¦ s built to run on the LAMP (Linux, Apache, MySQL, and PHP) platform. It offers blogging, microblogging, file sharing, networking, groups, and numerous other features.

6. Jcow

[Jcow](#) is a social networking CMS coded in PHP. This open source makes it easy and interesting to create Social Networks and online communities. You can create a website like Facebook with Jcow.

7. b2evolution

[b2evolution](#) is another open source social Content Management System engine. You can use b2evolution to create photo albums, community forums, online manuals, and social network sites.

8. Oxwall

[Oxwall](#) is flexible and easy to use PHP/MySQL community software platform. You can use Oxwall for a range of projects from family websites to custom social networks so you can build sites enterprise community solutions. Oxwal is the best solution for you to build a social community.

9. Etano

[Etano](#) is an open source PHP Script that lets you create a social network. If you want to build a dating website or collaborative sites, Etano is good for you. It doesnâ€¦ t have several unique features, but it can be suitable for a small social networking project.

10. Anahita

[Anahita](#) is another social networking platform. This framework primarily used for building knowledge sharing apps and services.

11. Hotaru CMS

[Hotaru CMS](#) is an open-source, PHP platform for building your own websites. With flexible plugins and themes, you can make any website you want. The most common use of Hotaru is social bookmarking.

12. LiveStreet CMS

[LiveStreet CMS](#) is one of the old open souces software that allows you to create social networks and team blogs. It offers many extensions and multilingual translations.

OpenPGP Keyservers Now Store Irremovable Torrent Magnet Links For Freedom Of Information Activists

- BY [ERNESTO](#)

- ON
- C: [28](#)

NEWS

BitTorrent has proven to be an ideal tool for pirates. The protocol's decentralized nature makes it impossible to interfere with transfers between users. Torrent sites and indexes are the only weak link in the chain, but there are novel solutions to that 'problem' as well, it appears.

BitTorrent is often praised for its decentralized nature. The file-transfers take place between users and there's no central service required.

That's also one of the main reasons why pirates embraced it.

There is a weak spot though. In order to download something, you need a torrent or magnet link. These are available through torrent sites which, as history has shown, can disappear overnight.

While it's unlikely that all torrent sites will be eradicated at once, we recently spotted a rather novel approach to this problem. A few weeks ago OpenPGP keys with magnet links were added to SKS keyservers.

These keyservers are computers which store and index OpenPGP keys over the Internet. This helps users who rely on encrypted email, for example. The servers generally share the keys amongst each other in a pool and uploaded keys generally can't be removed.

The permanent storage of keys generally isn't an issue. However, when the system is used as a stealth resource to store magnet links to pirated content, this resilience is put in a different light.

This is exactly what happened.

A few weeks ago a series of rather odd, but valid, PGP keys were uploaded to SKS keyservers. These keys were not meant to encrypt email though, but as a safe storage for torrent magnet links.

As a result, popular keyservers, including the ones hosted by research university [MIT](#) and [Surfnet](#), have transformed into pirate sites.

The magnet links, most of which point to pirated content, were added in the UID field. In examples weâve seen, sometimes there were a hundred magnet links added to a single key entry. And with the search functionality of the keyserver, these are easy to find.

Magnet links..

While there are over a thousand magnet links on these keyserver now, there are a lot of duplicate entries. That makes it more of a gimmick than a usable tool for pirates, but still.

While keyserver are not really an alternative to pirate sites yet, these magnet links have not gone unnoticed. We received the first tip weeks ago and others [spotted](#) it too. The irremovable nature of these links is particularly intriguing.

MIT, for example, clearly states [in its FAQ](#) that it is impossible to remove keys once theyâre up.

TorrentFreak spoke about the issue with Kristian Fiskerstrand, who operates the [sks-keyserver](#) website. He notes that removing keys is not possible due to the nature of these servers.

â The keyserver network is intended as an add-by-anyone key store, and structurally these are valid OpenPGP keyblocks,â Fiskerstrand says.

Only the owner of a private key can remove an entry. Keyserver [are designed](#) to keep their data online and share it with other servers. Similar to the blockchain, nothing is removed.

Fiskerstrand confirms that if copyright holders want these keys removed, theyâre out of luck.

â... [E]ven if the copyright holders were having issues with it they should focus on removing the underlying data not any pointer that is far off the original data,â... Fiskerstrand notes.

That, however, brings us back to the beginning of this article.

Since BitTorrent transfers are decentralized there is no single source to go after. Copyright holders will have to go after each and every pirating torrent user individuallyâ...!

PETITION FOR SPECIAL PROSECUTOR

We have been working with law enforcement, journalists and community groups to try to find a way to bust up corruption in Washington, DC.

Washington, DC corruption is the number one complaint of the public, and the top issue for leading Presidential candidates. Now YOU can help end corruption from the comfort of your living room.

It starts with signatures on the White House website! Please promote this opportunity!

Please help our teams, Congress and the White House fix Washington!

WHITE HOUSE PETITION NOW READY FOR YOUR SIGNATURE- COME TO THE WHITE HOUSE WEBSITE TO SIGN TO REQUEST A SPECIAL PROSECUTOR TO EXAMINE CORRUPTION IN WASHINGTON DC

We wanted to let you know about a new petition we created on We the People, a new feature on WhiteHouse.gov, and ask for your support. Will you add your name to ours? If this petition gets 99,999 signatures by October 06, 2015, the White House will review it and respond!

We the People allows anyone to create and sign petitions asking the Obama Administration to take action on a range of issues. If a petition gets enough support, the Obama Administration will issue an official response.

You can view and sign the petition here:

<http://wh.gov/iRSKw>

Here's some more information about this petition:

We ask the White House to appoint a "Cleantech Crash" Special Prosecutor and create a Victims Fund to assist those targeted in this scandal.

This has come to be known as the â... CleanTech Scandalâ... . It has been deeply documented in numerous lawsuits; the 60 Minutes Episode called: â... The CleanTech Crashâ... ; Many published GAO investigations; the in-progress FBI case which began with the FBI Solyndra raid; Over 100,000 news stories which deal with the following keywords: â... Corruption, steven chu, department of energy Solyndraâ... ; U.S. Senate ethics investigation documents, and thousands of other published, and broadcast materials. In fact, there is now, so much published evidence, proving that this scandal took place, that it is impossible to deny. There are now millions of pages of evidence, and hours of recordings that provide irrefutable proof. This petition will set in motion a series of efforts, using techniques that have already curtailed public policy crimes.

Let's take this to the FINISH LINE!

Please pass this around in your social network and share the links at:

Short URL: <http://wh.gov/iRSKw>

Save and Share this URL:

<https://petitions.whitehouse.gov/petition/appoint-cleantech-crash-special-prosecutor-and-create-victims-fund-assist-th>

PUBLIC NOTICE TO CORRUPT POLITICIANS

NOTICE TO CRIMINALLY CORRUPT PUBLIC OFFICIALS, CONTRACTORS, EMPLOYEES AND LOBBYISTS:

You are under surveillance and investigation by millions of well resourced web connected voters, some of the top journalists in the world and all of the non-corrupt law enforcement officials. It is called ***Peer-to-Peer Forensic Crowd Interdiction***. They have already begun your interdictions.

You engaged in criminally illicit corruption, cover-ups, payola, insider trading and policy rigging.

These interdiction efforts by the public are 100% legally and there is nothing on Earth you can do to halt these efforts except resign today and offer to become a
â... Stateâ... s Evidenceâ... testimony witness.

If you have a copy of this notice then you can assume that your name is already on the List.

Hundreds of corrupt public officials have now been terminated since the purge efforts began in 2009. You are a fool if you think you are immune. You are an idiot if you think you have some sort of â... invisible cloak of corruptionâ... . Every single day a shocking new set of revelations ends the career or some, now notorious, well known political figure. Are you blind to the sequence of events?

If you think you hid your deeds in private texts, whispered restaurant conversations, secret home servers, the back seats of Uber and Lyft, closed doors in the back room or Cayman Islands hotel rooms YOU COULD NOT BE MORE MISTAKEN!

Every trust fund that you and your family own has been tracked.

Every Goldman Sachs, JP Morgan, Wells Fargo, and other I-Bank account you and your family own has been tracked and cross referenced to every political action you participated in that resulted in valuation increases to those accounts.

Every stock market account you and your family own has been tracked and cross referenced to every political action you took that might have increased the valuation of those stocks. Every sale of stock you engaged in is being analyzed for
â... pump-and-dumpâ... illegality.

Every off-shore account in Switzerland, the Caymans, Brazil and all of your other

hiding places has been tracked and databased on fully resourced tracking databases.

Every person you ever communicated with on a dating site is being contacted and any abuse, sexual misdeeds and lies documented and reported. Dating sites sell their user data and all of their server records, since inception, are available to investigators and law enforcement with a few clicks.

The Russians, Chinese, activists and bored teens have been entering the electronic device back doors on every router and consumer electronics device for decades and vacuuming up every record and file on every corporate and government network. Now they sell, or freely provide, those records to every public-interest law suit litigant to help them sue corrupt politicians and their financiers.

If you ever beat a woman, it will be uncovered and reported.

While the FBI, NSA, SEC, DOJ and other enforcement agencies have been clearly documented and proven to have had corrupt officers in their organizations, it only takes a single non-corrupt â... Elliot Nessâ... -type law enforcement officer to arrest you. You would be a fool to believe, in spite of the agency corruption, that there is not one federal law enforcement officer with the balls to haul you in. In fact, any voter has the legal right to place you under citizens arrest, hand you the records of the crimes against you, and remand you to the FBI under record and under video documentation.

Hundreds of thousands of new non-main-stream, non-party-controlled, non-corporate owned news outlets have been created and they now reach the majority of the voting public. Hundreds of thousands of new voters are invited to these sites every hour, around the world. These news sites are exposing you and exposing the â... Main Stream Fake Newsâ... that you thought you controlled.

There is no under-age sex scheme that you are involved in that will not be found out and exposed.

There is no male or female prostitute that you used that will not be found out and exposed.

There are no abuse charges in your divorce filings and other documents that will not be uncovered.

There is no intern that you sexually abused that will not be protected when they tell their story about you.

For major anti-corruption lawsuit efforts we had to find the hidden money that corrupt Silicon Valley political financing billionaires had spent billions of dollars to hide. How hard was it to peel the skins off of Googleâ... s onion? Thanks to modern law enforcement and intelligence technology, it was not hard at all.

The fluency and practice of piercing the corporate veil & alter ego liability shields of political manipulation bosses such as George Soros, Eric Schmidt, Larry Page, Elon Musk and their colleagues, has become increasingly important in recent years due to changes in the law and business cycles.

As more small taxpayers need to collect on debts and judgments, it is increasingly

critical for practitioners to be fluent with the cutting-edge techniques and best tools to pierce & dissolve the corporate veil, as well as determine alter ego liability. The growing number of bankruptcies, foreclosures, and judgments has dramatically increased the need for forensic experts proficient in the science of effective judgment enforcement and asset recovery against the Silicon Mafia collection of corrupt California tech companies.

Ie: Any Department of Energy employer or contractor can now be sued, lose their home and have the courts transfer all of their assets to you!

It is critical for action groups to understand the best strategies to suck dry the corporate assets in judgments for creditors and how to sue individual State and Federal workers.

You can now begin piercing of the Google corporate veil, navigating complex determinations on corporate liability, strategies involving legal alter ego, and breaking open both corporate & personal liability with your home computer.

We use tools that not only include, but exceed, the capabilities of XKEYSCORE, Palantir, Taleo, Bitcoin Trace, PayPal Trace, VISA Trace, D&B Insider, Gust-Scan, and hundreds of other executive asset tracking and intelligence engines.

Top areas covered in new trainings by many action groups now include:

- Veil Protection Strategies and How to Bust Them

- Liabilities for the Obligations of the Entity That Wilson Sonsini Created For Google & Tesla and How We Busted Through Them In Less Than 24 Hours

- Best Practices in Litigating the Veil Piercing Case in a Gawker Media-Like Laundering Operation

- Snagging Veil Piercing Problems & Fraudulent Conveyances With Sting Operations

- What Creditor's & Debtor's Counsel Needs to Know About How Dire Their Situations Are In the 2017 Information Age

- Forming Corporate Entities to Diminish Liability But Having Them Used Against You As Evidence

- Understanding the Alter Ego of Insane Silicon Valley Billionaires

- Cutting-edge Issues involving Reverse Veil Piercing and How To Do It

- Developments in Veil Protection Penetration Using Help From the FBI

- When is the Corporation Liable? NEVER with our resources!

- Connecting the Separate "Personalities" of the Corporation & Shareholders

From the underlying substantive law to practical aspects of asset protection planning (i.e., what works and what does not), new groups are teaching the public everything

they need to know about dissolving corporate and executive asset protection like butter on a frying pan.

From Gawker to Enron and from Solyndra to Nigerian War Lords, From Steven Chu and Eric Holder to Brian Goncher and Steve Jurvetson; taxpayers are now only a few mouse clicks away from the deepest family trust fund hide-aways and the darkest sexual services transactional relationship disclosure.

The public can now see how to uncover assets from tort plaintiffs, lenders, government entities and other creditors, hidden in thousands of corporations, partnerships, LLCs and offshore entities. Our distinguished CIA-FBI-NSA-Class staff will cover specific approaches and solutions, including the most effective tactics, best practices, and the cutting-edge strategies to peel an Eric Schmidt or a John Doerr open like a Taco.

The public is learning various ways, from the very simple to the very sophisticated, to expose specific assets of State and Federal corrupt employees and illicit contractors: houses, bank and brokerage accounts, private islands, billionaire bunkers, hookers with billionaires homes in their names, rent-boy services, rental real estate, businesses and professional practices and retirement plans.

Sue Obama? Yes! He is now a private, corrupt citizen!

Taxpayers are now given a treatise on asset protection uncovering as well as an exhaustive reference source for many of taxpayers investigative needs as well as outlines and diagrams of interdiction planning techniques and structures. Nationally recognized instructors share many real life case histories and anecdotes online to readily illustrate the effectiveness of various structures. Every taxpayer is now able to easily acquire the most effective strategies and latest law in destroying all corrupt asset protection for the criminal titans.

Additional Areas Covered:

â...¢ Practical Goals and Limitations of Asset Protection â... Google bosses were never as safe as their consultants told them they were

â...¢ Picking the Right Structure to Trick an Oligarch Into Incriminating himself

â...¢ Understanding Fraudulent Transfers and How To Get Their Relatives To Disclose Them

â...¢ Effectively Planning for Possible Challenges From Their Corrupt CPAâ... s

â...¢ Practical Implications for Planning

â...¢ Corporations v. LLCâ... s & LPâ... s

â...¢ Busting Multi-Entity Structures For The Fake Steathing of Business Assets

â...¢ Dealing with Successor Liability; Get The Money From The Next Guy

â...¢ Using Check the Box Election As Incrimination Evidence

â...¢ Charging Order Protection and Tearing It Apart

â...¢ Best Practices on Picking the Right Jurisdictionâ...¢ Single Member LLCs, Poison Pills and Criminal Back-Dating

â...¢ Interactive Question & Answer Session

Every bad and immoral thing you did yesterday will be on the lead stories in the Wall Street Journal tomorrow.

No matter how many of your friends you gather around your lunch-room table at Rayburn to self-delude with your little echo-chamber denial conversations you must gather a new perspective. From a satellite view your lunch table is barely a spec on the map. Visualize the 300 million Americans on that map, across the USA, that hate your guts for raping their government and you will realize what your lunch-table rationalizations will be swamped in 2.7 seconds if America focuses on it.

You are DONE!

RESIGN TODAY AND SUBMIT A LETTER TO THE FBI AND CONGRESS, TODAY, STATING THAT YOU AGREE TO BECOME A WITNESS OR YOU AND YOUR FAMILY WILL FACE THE CONSEQUENCES FOR THE REST OF YOUR LIVES USING 100% LEGAL INTERDICTION METHODS.

Panama Papers investigation - multiple men criminally charged in US, more charges to come

Prosecutors say quartet went to extraordinary lengths to circumvent US tax laws to boost the wealth of their clients

[Jon Swaine](#) in New York and [Stephanie Kirchgaessner](#) in Washington

• The prosecutors said Mossack Fonseca perpetrated a decades-long criminal scheme. Photograph: Rodrigo Arangua/AFP/Getty Images

Four men have been criminally charged in the US government's investigation into the findings of the [Panama Papers](#), the leaked files from the offshore law firm Mossack Fonseca.

Deutsche Bank offices raided in connection with Panama Papers

Read more

Prosecutors in New York said the four men, including an attorney and an investment manager who worked for the company, have been charged with wire fraud, tax fraud, money laundering, and other crimes.

The prosecutors said Mossack Fonseca perpetrated a decades-long criminal scheme, which was first exposed in a series of articles since 2015 by the Guardian and dozens of media partners around the world.

Geoffrey Berman, the US attorney in Manhattan, [said in a statement on Tuesday](#) that the four went to extraordinary lengths to circumvent US tax laws in order to boost the wealth of their clients.

Now, their international tax scheme is over, and these defendants face years in prison for their crimes, said Berman.

Those charged were Ramses Owens, a Panamanian attorney who worked for Mossack Fonseca; Dirk Brauer, an investment manager for a Mossack subsidiary; Richard Gaffey, a US-based accountant; and Harald Joachim von Der Goltz, a former US resident and Mossack client.

Von Der Goltz, an 81-year-old German citizen, was arrested in London on Monday, according to prosecutors, who thanked British authorities for their assistance in the case.

Brauer, 54, was arrested in Paris last month and Gaffey, 74, was arrested in Massachusetts on Tuesday. But Owens, 50, remains at large, US authorities said. The charges were unsealed on Tuesday. A court filing indicated that the men had been indicted in secret by a grand jury in September.

Investigators said Owens and Brauer had for years created and managed sham foundations, opaque offshore trusts and undeclared bank accounts to allow American clients of Mossack Fonseca to hide their income from US tax authorities.

Clients were then advised on how to illegally bring the funds from their offshore accounts into the US, using specially created debit cards and falsely claiming the money had come from the sale of companies.

Von Der Goltz, a German citizen who was allegedly one of the firm's American-based clients, is accused of using shell companies to hide tens of millions of dollars from the IRS, and falsely claiming his Guatemalan mother was the true owner of his offshore holdings.

Gaffey is accused of assisting Von Der Goltz's scheme and advising another American taxpayer, who is identified in Tuesday's filings only as "Client 1". Gaffey allegedly devised a system for this client to bring \$3m of offshore funds into the US by falsely telling the IRS he had sold a company.

The indictments were announced less than a week after [law enforcement officials in Frankfurt raided the offices of Deutsche Bank](#) as part of a German investigation into alleged money laundering connected to the Panamanian scheme.

German authorities said that 170 police officers, prosecutors, and tax inspectors searched six Deutsche Bank offices around Frankfurt and seized files as part of their investigation into two bank employees who allegedly helped create offshore shell companies to help their clients launder money.

The decision to prosecute the case represented one of the most aggressive actions against white-collar crime so far by the Trump administration's justice department.

What are the Panama Papers? A guide to history's biggest data leak

Read more

Apart from some of the largest fraud cases in US history, such as the decision to indict the accountant Arthur Andersen in the wake of the Enron scandal, white-collar prosecutors have not always aggressively pursued people involved in money-laundering.

Brian Benczkowski, an assistant attorney general, said on Tuesday: "The charges announced today demonstrate our commitment to prosecute professionals who facilitate financial crime across international borders and the tax cheats who utilize their services."

Although the case is being brought by the Trump administration, it appears to have been initiated in 2016, by Preet Bharara, who was then US attorney for the southern district of New York, nominated by Barack Obama.

[Bharara opened a formal criminal investigation](#) into wrongdoing exposed in the publication of the Panama Papers. Bharara sent a letter to the International Consortium of Investigative Journalists (ICIJ) at the time, asking to speak to reporters on the subject.

Bertus Wilhelminus Antonius Meijer, The Top Producer In Euro-Israel Globalism is sought in Panama Papers and Swiss Leaks related data sets. The Meijer Family Are Considered To Be "The Rockefellers of Europe". Now their progeny has joined Israel's dynasty together with Europe's biggest family fund.

Bertus Wilhelminus Antonius Meijer is the Chairman at MRP Investments Ltd. He was born in December of 1968 and chosen by his father to blaze a path through industrialized Europe with the acquisition and management of cross national interests. With the acceleration of the Israeli/Iran war potential, eyes have been turned towards the international dealings of the Meijers.

The Meijer Family are considered, by State Departments, to be like the Rothschild Family.

The Rothschild family is a wealthy family descending from Mayer Amschel Rothschild (1744â... 1812), a court factorto the German Landgraves of Hesse-Kassel in the Free City of Frankfurt, Holy Roman Empire, who established his banking business in the 1760s.[2] Unlike most previous court factors, Rothschild managed to bequeath his wealth and established an international banking family through his five sons,[3] who established themselves in London, Paris, Frankfurt, Vienna, and Naples. The family was elevated to noble rank in the Holy Roman Empire and the United Kingdom.

During the 19th century, the Rothschild family possessed the largest private fortune in the world, as well as the largest private fortune in modern world history.[4][5][6] The family's wealth was divided among various descendants,[7] and today their interests cover a diverse range of fields, including financial services, real estate, mining, energy, mixed farming, winemaking and nonprofits.[8][9]

The Rothschild family has frequently been the subject of conspiracy theories.

Paul Johnson writes "[T]he Rothschilds are elusive. There is no book about them that is both revealing and accurate. Libraries of nonsense have been written about them... A woman who planned to write a book entitled Lies about the Rothschilds abandoned it, saying: 'It was relatively easy to spot the lies, but it proved impossible to find out the truth.'" He writes that, unlike the court factors of earlier centuries, who had financed and managed European noble houses, but often lost their wealth through violence or expropriation, the new kind of international bank created by the Rothschilds was impervious to local attacks.

Their assets were held in financial instruments, circulating through the world as stocks, bonds and debts. Changes made by the Rothschilds allowed them to insulate their property from local violence: "Henceforth their real wealth was beyond the reach of the mob, almost beyond the reach of greedy monarchs." [13] Johnson argued that their fortune was generated to the greatest extent by Nathan Mayer Rothschild in London; however, more recent research by Niall Ferguson indicates that greater and equal profits also were realised by the other Rothschild dynasties, including James Mayer de Rothschild in Paris, Carl Mayer von Rothschild in Naples and Amschel Mayer Rothschild in Frankfurt.[14]

We examined Bertus (Bart) Meijerâ... s relationships through Ofer Gilboa, Chief Executive Officer & Director at MRP Investments Ltd.; Ken Lalo, Deputy Director General at MRP Investments Ltd.; Yosi Zeituni, Chief Financial Officer at Atreyu Capital Markets Ltd., Naomi Steinfeld, Managing Partner at Naomi Steinfeld & Co.; Lior Mor, Head of Real Estate at Menora Mivtachim Pensions Ltd.; Avi Shachar, External Director at MRP Investments Ltd.; Ronit Noam, External Director at Meitav DS Investments Ltd., Ophir Falk, Director at MRP Investments Ltd.; Shlomo Bracha, Former Independent Director at MRP Investments Ltd.; Yitzhak Apeloig, Managing Partner at ATE Technology Equipment B.V.; and their related CIA, GCHQ, FSB and federal â... Watch-Listâ... records.

MRP Investments Ltd. is an investment holding company. It operates directly and through subsidiaries in the following segments: Yielding Real Estate and Technology and Biotechnology. Yielding real estate segment engages in holdings in assets through the property companies. The company invests in companies which operate in the field of biotechnology and technology. The company was founded in November 1990 and is headquartered in Tel Aviv, Israel.

Bertus (Bart) Meijer is listed as an Officer with Vertico in California. The address on file is 1755 E Bayshore Rd Ste 22, Redwood City, CA 94063 in San Mateo County with a phone number of: (925) 891-5697 The company is a California Domestic Corporation, which was filed on May 29, 1986. The filing status is listed as Suspended. The Registered Agent of record resigned On 05/07/2001. The company produced virtual reality theme park equipment.

Meijer is a Dutch surname. It refers to a profession similar to a bailiff or steward. It originates from the Latin word maior.[1]

As of 2007, there are 39,801 people with the surname Meijer in the Netherlands.[1]

His name is usually signed as: Bertus W.A. Meijer and his main company, aside from his shell corporations, is United Companies B. Meijer N.V., a Netherlands Corporation.

He also uses the names: Bart Meijer, de beer b.w.a. meijer and Bertus Wilhelmus Antonius Meijer

He used to live at 2000 Broadway in San Francisco, CA. The company paid his cable TV bills there.

He had a phone number of 011-31-010-4365111, and a phone number of 011-31-104361213. He had a business address of 2109 Landings Drive, Mountain View, Ca, 94043 where he had another phone number of 011-31-010-512-1641

He had an address of: United Companies B. Meijer N.V., Van Aalststraat 11, 2651 EW Berkel en Rodenrijs, The Netherlands and another address of United Companies B. Meijer N.V., Veerhaven 7 3016 CJ, Rotterdam NL. He had another of: Bertus Wilhelmus Antonius Meijer, Kardinaal Mercierlei 17 B 3, 2600 Berchem, Belgium according to FBI records.

He had a U.S. company called Verico and another U.S. company called Brainco where he used the phone number of 011-32-477-417-293.

He had a business address of Brainco at 1755 E. Bayshore Rd., Suite 22, Redwood City, CA 94063 with a phone number of 1-650-562-2700 for that business. The EDD account number for Brainco was 407-6414-9. He had a phone number of 011-31-70-352-4144 which he used for that venture.

He had a company address for a company called: MAB B.V. located at Van Stolkweg 23, Postbus 80538 GM, Den Haag, Netherlands

He had an ING Bank account that once used an ING Reference number of WP9214005312150B which he faxed to from fax number, 00-3232186411 and had accounts at ING Bank.

He had an address of: United Companies B. Meijer N.V., Sterrenweg 49, 2651 HZ Berkel en Rodenrijs with a phone number of: 010-5121641 and a fax number of: 010-5121832 and an email was used as Email: svanzijlspeelman@compuserve.com

United Companies B. Meijer N.V. are a huge conglomerate of business and lobbying efforts.

Multibillion dollar Meijer, Inc. finds another way to screw Michigan cities and kids
by Eclectablog Sometimes you just have to ask â... How much money and greed is enough?â...

Meijer, Inc. is one of the largest privately-owned companies in the country. When he died, Frederick Meijer, the son of the founder of the company, was worth \$5 billion. The stores pioneered the concept of â... one-stop shoppingâ... , a shopping center where you could buy everything from car batteries to fresh broccoli. This past year, Meijer, Inc. has been challenging its tax assessments around the state, saving itself millions and millions of dollars, money that is coming, in large part, directly from the coffers of the municipalities and schools where their stores are located. The Lansing area seems particularly hard hit: The Meijer store at 2055 W. Grand River was extensively remodeled and reorganized last year to maintain its footing in the lucrative Okemos market.

Yet, the Michigan Tax Tribunal has accepted an agreement between Meridian Township and the retailer to value the store for property tax purposes between 2010 and 2012 as if it were â... dark,â... meaning it was closed and for sale during that time.

The settlement means Walker-based grocery and general merchandise chain Meijer Inc. will receive refunds totaling \$320,165 from several public agencies, including Okemos Public Schools and the Okemos Downtown Development Authority. And itâ... s not an isolated case.

The DDA will be required to refund around \$86,000 in taxes. The financially-stressed Okemos School District must repay \$130,332.

Meijer has successfully challenged assessments at dozens of other stores, including one at 1350 W. Lake Lansing Road in East Lansing. There, the taxable value was reduced a total of \$1.4 million for 2011 and 2012, resulting in \$203,000 cut in property taxes, said David Lee, tassessor for the city and Meridian Township.

Meijer has appealed property tax values for 97 of its 140 stores dating back to fiscal year 2009, Michigan Tax Tribunal chief clerk Peter Kopke said. Thirteen cases are pending.

Meijer isnâ... t the only big box store doing this. Home Depot and Lowes are, too. The result is that these profitable companies are extracting money from schools and the local government at a time when both have already coughed up significant funds in terms of reduced funding to pay for corporate tax breaks these same companies are already enjoying. This only serves to compound a financial catastrophe already in progress around our state.

I understand the desire to maximize profits. All companies have that as their overarching aim. But when you help to destroy the cities in which you operate and the schools of the kids that live in the community that your PR people brag you are so concerned about, the rest of us really begin to wonder just how much money is enough and just how greedy do you have to be before you get labeled as â... evilâ... .

PeerTube: A â... Censorshipâ... Resistent YouTube Alternative

- BY [ERNESTO](#)

-

- C: [14](#)

OPINION

YouTube is a great video platform that has a lot to offer to both consumers and creators. At least, those who play by the rules. For creators, there is a major drawback though, one that put a spotlight on the alternative 'free-libre' software PeerTube this week.

On Tuesday [we reported](#) that several YouTube channels had all their videos blocked worldwide. This included those belonging to MIT OpenCourseWare,â... the â... Blender Foundation,â... and many others.

The error message that was displayed typically appears for copyright reasons. However, in this case, the problem was more complicated, related to a new [license agreement](#), among other things.

While some prominent channels have now been restored, others still face similar issues. The people at Human Beatbox, for example, tell us that they are experiencing the same problem, which at the time of writing is still not fixed.

YouTube simply informed them that its a â... technical issueâ... which the engineers are trying to resolve. Meanwhile, all videos of theirs and many other channels have been inaccessible for nearly a weekâ...!

Whatever the problem is, itâ... s clearly a â... mistakeâ... of epic proportions.

While YouTube probably has no intention to â... censorâ... these channels, it shows what can go wrong if creators put their faith in the hands of a single service. A service they have no control over at all, which removes your content, erroneously or not.

Luckily there are some alternatives that put creators in control again. [PeerTube](#) is one of these options.

When the Blender Foundation had all its videos blocked by YouTube earlier this week, a decision was taken to give this alternative a try. In a matter of hours, Blender had a fully operational streaming site, one which they had complete control over.

This prompted TF to take a closer look at PeerTube and what it has to offer.

Blender testing PeerTube

Put simply, PeerTube allows anyone to set up their own video streaming site. This can run independently, but it can also be linked, or federated, with other PeerTube instances to create a broader reach. All with P2P steaming support.

The first version of PeerTube launched last year. Itâs operated by the small French non-profit organization Framasoft, and thus far it hasnât really broken through in English-speaking countries. The Blender Foundationâs problems, while very unfortunate, may change that.

âBlenderâs example illustrates our main goal: autonomy, independence from external platforms. When you centralize videos and attention, you gain power over the users. Our approach goes the other way,âFramasoftâs Pouhiou tells TF.

PeerTube comes with built-in [WebTorrent](#) support. This means that viewers also contribute their bandwidth, which can come in handy if a video goes viral.

To âfederateâ with other PeerTube instances, the software uses the [ActivityPub](#) protocol, which is also used by the popular social networking software [Mastodon](#). This helps to grow the video library if needed, but itâs entirely optional.

âFederation allows diversity in the governances: each PeerTube Instance Host can determine their own set of rules, their settings, their moderation policy, etcetera,â Pouhiou says.

Embedding a PeerTube video

The idea behind PeerTube is to let creators regain control over their content. This helps to avoid censorship in the broadest sense of the word, and also â... problemsâ... that block videos for days on end.

Itâ... s this spirit that also drives the developers to make the software entirely free and open.

â... To us, it is really about taking back the web into our own hands. We have a joke about the â... Power to the peopleâ... song of John Lennon: PeerTube is kind of â... Software to the peopleâ... ,â... Pouhiou tells us.

â... Thatâ... s why PeerTube has to be Free-Libre software: not even we should be able to â... closeâ... the code, it would give us way too much power, which we donâ... t want.â...

Of course, there are plenty of downsides to alternatives like PeerTube. For one, in terms of costs, they are not free to operate. Even though WebTorrent can limit the bandwidth bill to a degree, it requires hosting and some technical skills.

Monetizing PeerTube videos will also require more work. You canâ... t just click a button and magically start earning money. And then thereâ... s the issue of reaching a wide audience, which may be harder for creators who are â... lockedâ... into external services.

That said, for outfits such as Blender and MIT OpenSourceWare which are non-profit and have their own sites which people know how to find, it makes a lot of sense.

At the least, everyone who relies on external platforms might want to stop and think for a minute if they really want to put all their eggs in someone elseâ... s basket.

More information on PeerTube can be found on the [official site](#). The company recently launched a [crowdfunding campaign](#) to ensure continued development, which has raised over â“20,000 at the time of writing.

Personal Encryption 101

A beginner's guide to protecting your messages, masking online movements, and steering clear of digital snoops

[Elizabeth Nolan Brown](#) [Digital Edition](#)

[Subscribe Now](#) and get fast first class delivery of the July issue at no extra cost!

In 2016, a lone Romanian hacker going by the name Guccifer 2.0 claimed credit for the leak of sensitive internal Democratic National Committee emails. But the would-be hacker celeb's story was quickly debunked by a single nonmasked login from a device at the headquarters of the Russian intelligence service, thus turning what looked like a tech security problem into an international spy scandal. That high-stakes slip-up shows just how stringent one must be to get away with online chicanery these days, when one's every login and keystroke can be tracked through an array of digital identifiers.

But you needn't be engaged in espionage, or anything illegal, to benefit from better digital privacy practices. From surveillance-happy state actors and data-harvesting advertisers to popular email clients, social media apps, and other ubiquitous web tools, there are plenty of potential peepers looking to glimpse your digital data (and potentially share it with or sell it to others).

Traditional privacy protection methodsâ... strong passwords and security questions, plus two-step authenticationâ... are your first line of defense. But they may not cut it if convoluted terms of service give sites more leeway with your data than you realize, if hackers breach the servers where companies store your data, or if the authorities decide they want to see the contents of your texts, chats, and inbox.

"Email remains one of the least secure means of communication, and has been likened to sending a postcardâ... basically anyone along the way who's interested can read the contents of a message," writes journalist Jonas DeMuro in the U.K.'s *TechRadar*. This is because "an email is not a direct communication, but rather goes via several intermediariesâ... with multiple copies of the message stored at each server, and further copies on both the sender and recipient's computer." *Deleting* something, in other words, doesn't come anywhere close to actually eliminating it.

Email also typically lacks strong protections against access by law enforcement agencies. Under the Electronic Communications Privacy Act, authorities can obtain message content without a warrant after 180 days. (Many providers won't agree to give up your data without a warrant, but they could.)

True online anonymity requires elaborate measuresâ... think a separate device for the anonymous identity, separate phone numbers, use of a virtual private network (VPN) for every login. But most people don't need, or even want, *total* anonymity.

For most of us, privacy can be drastically improved with a few simple (and free) tweaks and tools. In countries like Turkey, where many websites are censored, they can be essential for the most basic online communications. But even in the U.S. and other Western democracies, these services are enjoying a surge in popularity, thanks to sudden skepticism about the data-security practices of social media giants and increasingly invasive government speech codes for the digital sphere. If you too are ready to take back some of your online privacy, this is a guide to getting started.

To Keep Your Email Safe

Encryption, encryption, encryption. Encrypted email services scramble your data so only you and the message recipient(s) can view a readable version. The undecipherable copy is what passes through and gets stored on the email client's servers, so even if they're hacked, subpoenaed, or cursed with nosy employees, your messages can't be read.

The crowd favorite in this arena so far is **ProtonMail**, a Switzerland-based company that says it keeps its primary data center "at a secure facility 1 km under a mountain."

Joanna Andreasson "Because data is encrypted at all steps, the risk of message interception is largely eliminated," the ProtonMail website notes. Emails are first scrambled on the user side, with a key the company can't access... which means even if it wanted to decrypt your mail, it would not have the technical ability to do so. (It also means that if you forget your password, you lose all your previous data.)

ProtonMail promises not to track user information, including metadata or IP addresses, a numeric designation that identifies a location on the internet; doesn't require personally identifiable information to create an account; and features an optional "self destruct" setting when emailing other ProtonMail addresses that automatically deletes a message from both the sender's and the recipient's accounts after a chosen interval. Basic accounts are free and come with 500 MB of storage. Paid accounts (\$48 to \$288 per year) offer between 5 GB and 20 GB.

In general, ProtonMail looks and works like regular email. Messages sent between ProtonMail accounts are automatically encrypted during transmission and on both ends. When communicating with a non-ProtonMail user, you must provide a security key if you want the email to be encrypted throughout transmission. Mail recipients will be directed to the ProtonMail site to decrypt the email and reply securely.

Over the past few years, ProtonMail has been rolling out an array of new security features, including encrypted contacts for Android and iOS devices and a service called ProtonMail Bridge, which syncs (paid) ProtonMail accounts with traditional desktop email clients such as Microsoft Outlook.

In addition to all this, the company espouses an old-school anarchic internet attitude that's a welcome contrast to most mainstream email providers. As federal authorities damn encryption as a threat to national security, ProtonMail has pushed back against the idea that only the lawless should embrace anonymous communication

tools. "It is incorrect to say that using ProtonMail implies you have 'something to hide,'" said founder Andy Yen in a recent blog post. "ProtonMail provides more security and privacy compared to Gmail or other email services, and security is desirable for practically anyone that uses the internet."

Yen noted that "emails, encrypted or not, can be subject to subpoenas." But at least with services like ProtonMail, "it is not possible to obtain them from the service provider, and instead the subpoena must be served to the individual or organization under investigation."

Another service that gets good marks from privacy types is **Tutanota**, a German company that offers end-to-end encrypted email with 1 GB of storage for free, plus a paid version for those who need more space, multiple addresses, and other features.

As with ProtonMail, email between Tutanota accounts is always encrypted. Sending encrypted messages to a non-Tutanota account requires setting a password and providing it to the recipient in a separate, nonencrypted email. The recipient will be prompted to visit the Tutanota site and enter the password, and then he or she can read the message.

Like ProtonMail, Tutanota's rhetoric is admirably lofty. Last summer, co-founder Matthias Pfau told *TechCrunch* that "we at Tutanota see ourselves as Freedom Fighters. We believe in human rights such as our right to privacy and freedom of speech. But as these rights are being cut by governments around world, we need to fight back."

Belgium-based **Mailfence** operates much like ProtonMail and Tutanota. Its more robust accounts can be paid for using bitcoin. **Disroot** offers encrypted email as well as cloud storage and a host of other services, including a message board, a Twitter-like social media platform called Diaspora, and a browser-based text editor that can be set to "burn after reading," leaving no trace of the decrypted document on either the author or the reader end. The all-volunteer, Amsterdam-based team says it aims to create digital tools that are "open, decentralized, federated, and respectful towards freedom and privacy."

To Chat, Send Photos, or Make Calls Securely

Encryption is also the answer for protecting the secrecy of your more casual communications. There are several popular services right now that allow for the easy exchange of encrypted chat... consider this your alternative to both texting and the likes of Gchat, Facebook Messenger, and similar direct-messaging services... as well as offering ways to make calls and privately exchange photos or videos. The only catch is that your contacts are limited to those who are also using a particular service or app.

Joanna AndreassonWhich one you choose... **Signal**, **WhatsApp**, and **Telegram** are the three most popular... should depend on where you live, which apps are in use among your social and professional networks, how much security you're willing to exchange for other positive attributes, and how much faith you put in proprietary data systems. Your individual privacy concerns come into play as well: Is it government or service-provider snooping that concerns you? Are you trying to prevent people in your household from reading your texts? Do you need to be able to verify the identity of those you're messaging with? Do you mind giving out your phone number?

Telegram is not built on open-source software... a major strike against it, according to some privacy hawks... and the use of a proprietary encryption process is another potential black mark. The London-based service has also run into trouble in such countries as Iran and Russia, where authorities have demanded Telegram turn over info that would let them decrypt all user emails... Telegram declined... or moved to block the service altogether. But it has around 200 million active users per month and boasts large user bases in former Soviet Union countries and the Middle East, which can make it attractive for people with a lot of contacts there. And founder Pavel Durov at least pays lip service to the privacy-minded ethos that ProtonMail and Tutanota tout. "We don't regard Telegram as an organization or an app," he wrote in a March blog post. "For us, Telegram is an idea; it is the idea that everyone on this planet has a right to be free."

Privacy clearinghouse PrivacyTools.io recommends against both Telegram and WhatsApp, a similar (and even more popular) chat platform. In general, the biggest complaint about the latter is that it collects user metadata... and that its parent company is Facebook.

The Electronic Frontier Foundation (EFF) has said on its blog that if pressed, it would recommend either WhatsApp or Signal, though it notes that it's difficult to "make a recommendation without considering the details of a particular person's or group's situation."

Overall, Signal gets the best ratings from the widest array of groups and people, especially if you're looking for strong security. Both Signal and WhatsApp "employ the well-regarded Signal protocol for end-to-end encryption," EFF noted, but "Signal stands out for collecting minimal metadata on users, meaning it has little

to nothing to hand over if law enforcement requests user information. WhatsApp's strength is that it is easy to use, making secure messaging more accessible for people of varying skill levels and interests."

To Browse the Internet Anonymously

Most browsers now offer an "incognito" or "private browsing" mode that doesn't log your search or site-visiting history. But these functions only mask your trail locally (i.e., the pages you visit in an incognito window won't show up when you check your browser history). They don't mask your IP address or hide your identity from sites you visit.

Joanna AndreassonNo one app or fix will let you browse online totally anonymously, but the most simple and comprehensive option is to download the **Tor** browser. Torâ... which works on Windows, Mac, Linux, iOS, and Androidâ... is an open-source, modified version of the Mozilla Firefox browser that comes pre-installed with all sorts of privacy features. The bottom line is that it can keep your computer's address from being logged by websites.

"The Tor network is a group of volunteer-operated servers [that] employ this network by connecting through a series of virtual tunnels rather than making a direct connection," the Tor website explains. This lets people "share information over public networks without compromising their privacy" and serves as "an effective censorship circumvention tool, allowing its users to reach otherwise blocked destinations or content."

To supplement Tor, savvy web surfers may want to use a virtual private network (VPN). Normal browsers let your internet service provider (ISP) see every site you visit, in addition to your computer's personal IP address being visible to the sites themselves. VPNs prevent this by filtering your traffic through their network and serving it up with a new, masked IP address.

This means that your ISP records you going to the VPN but not to the sites you visit thereafter. In addition, the sites you visit see the IP assigned to you by the VPN, not your actual information. This can be especially useful for getting around geography-based content filters, like China's ban on many American sites and apps (often referred to as the "Great Firewall") and Russia's ban on everything from Telegram to, temporarily, Google.

The VPN also encrypts your traffic, so it's not accessible the way your browser history on a normal browser would be. Using a VPN is similar to using web proxy servers, which serve as a screen between your computer and your internet activity, except that VPNs also mask your identity when interacting online with games, torrent apps, and the like.

A word of caution: A VPN alone will not keep your emails safe if you're using a traditional email client. It will mask you from your ISP, but unencrypted copies of your messages will still be stored on email client servers.

VPN clients can be downloaded for use on computers, tablets, and smartphones. Some free VPNs that get consistently good reviews are CyberGhost, TunnelBear, and Windscribe. PrivacyTools.io also has put out a list of recommended VPNs, all of which are based outside the U.S., use encryption, and accept bitcoin. **ProtonVPN** (associated with ProtonMail) is the only one of the most highly rated services that's also free; the others range from around \$35 to \$125 per year.

Regular browsers *can* be configured to offer more privacy through the use of various plugins. PrivacyTools.io offers recommendations on that score as well. Of the most well-known browser options, **Mozilla Firefox** and **Brave**, from former Mozilla CEO Brendan Eich, are arguably strongest when it comes to security.

To Keep Your Search History Secret

When using typical search engines like Google, Yahoo, and Bing!, clearing your search history from your browser window doesn't mean it's actually gone forever. Your search log is stored by the search-engine company in question. To search without leaving a trail, try **DuckDuckGo**, which doesn't track any user data, or **StartPage.com**, which lets you use Google's search engine without being tracked by the tech giant.

To Make Your Go-To Tools More Secure

Gmail offers email encryption under some circumstancesâ€¦ if a user is on a Chrome browser or using a Gmail app and is emailing another Gmail address. But as *TechRadar* notes, "Google has become the Big Brother of the internet, and is known for reading user's messages, all in the name of targeting them with more relevant ads; there's privacy, and there's Google's idea of privacy."

Microsoft Outlook also has an encryption option, but it only works in limited instances.

If you're using a desktop email client, you may be able to use **ProtonMail Bridge** to add a layer of protection. The service integrates with Outlook, Apple Mail, Thunderbird, and similar options, serving as "a bridge between the unencrypted and encrypted worlds in the sense that it allows your average user to benefit from the added security and privacy of end-to-end encryption without having to make any changes to their email usage behavior," ProtonMail's Yen explained in a statement.

To Manage All Your Passwords

The best encryption plans in the world don't mean anything if you forget your passwords or if your passwords aren't secure. Consider ditching options such as iCloud Keychain, 1Password, and LastPass in favor of **KeePass**, a free, open-source password manager with strong encryption game.

Public To Boycott All Hollywood Films That Do Not Have An Updated Safety Banner

By Audrey Lundst

If your Hollywood movie does not have the following guarantee printed in the credits, do not give it your money:

â... *No animals or humans were harmed or sexually abused in the making of this film*â...

There is no reason that Hollywood tribal bosses should not guarantee the safety of the people involved in making movies in Los Angeles as much as they guarantee the safety of dogs used in a film.

The overt pedophilia, sexually exploitive non-disclosure agreements that staff are forced to sign and the casting-couch sextortion of the Weinsteinâ... s of Hollywood have become a sad joke in tinsel-town. Disney has had an army of under-age sex arrests along with rumblings of sex charges in the making of the new Star Wars film. Actors are flooding employment lawyers offices. The tsunami is rising. Silicon Valley media company bosses are found to work hand-in-hand with Hollywood bosses on cover-ups.

RCA postgraduates create open navigation system inspired which eliminates satellite GPS

Foreign nations have already started blowing each others satellites out of the sky.

Hackers are hacking most satellites.

One big solar flare can take out all the satellites.

Almost every satellite conducts domestic spying.

Debris clouds of metal from dead and destroyed satellites will eventually clobber most of the satellites that remain.

In other words: Satellites are nothing you should ever count on again.

Now you can fly your drones and pick your hiking trails without ever needing a satellite and the new technology is free.

A team of student designers and engineers from the [RCA](#) and Imperial College have designed an open-source alternative to GPS, called Aweigh, that does not rely on satellites.

Instead, the device calculates a user's position using the sun â€¦ a feature inspired by the polarised vision of insects.

Its student makers said that the design is similar to that of the sextant, one of the oldest known navigating tools that measures the angular distance between two visible objects, in this case the horizon and the sun.

They said that [Aweigh](#) can even work on a cloudy day when the sun is not in view, and unlike devices that use satellites, such as smartphones, Aweigh functions offline so a user's positional data cannot be leaked through the internet.

Aweigh is a system that uses the distance between objects to help the user navigate

"Satellites send information which can be intercepted and interfered with, but to interfere with Aweigh, one would need to artificially move the sun," explained the team of four, made up of States Lee, Samuel Iliffe, Flora Weil and Keren Zhang.

"If one of the devices is faulty or broken, it is only that user who suffers. If one satellite is faulty, then the consequences can affect millions of users.

"Most people don't think about the way they navigate," the group continued, "but as concerns over centralised technology and data privacy increase, individuals should have a choice over how their data is taken and used. Aweigh is about giving back choice."

The system is a set of blueprints that users can hack or develop themselves

Describing the system as "a set of tools and blueprints", the team wanted users to be able to hack or fix the tools they use, so making the project open-source was important.

The device's custom circuit-board that reads light values to find the sun, is powered by [Raspberry Pi](#), a tiny computer that is specifically designed to educate users about coding.

The circuit board can be modified to customise interactions and the team imagine the device could work with older navigation tools like maps, and satellite navigation tools, by replacing the GPS chip.

The team provide a booklet with the device in the hope that coders will improve the project

A booklet explaining how the device works is included in the pack, and the group hope that coders will collaborate on the project to improve it.

"One variation of this device is simply a list of commercially available parts to buy, and an electronics diagram," they said.

"A group of beta testers made their own casings for the device, examples range from hiding the device in a camera to casing it in a plumber's pipe, because the pipe is another piece of design which is obvious to use and fixable."

Aweigh puts the tools of navigation in the hands of the user rather than relying on satellites

The team is currently working on increasing the resolution, whilst the details for building the device yourself (including a pdf of the book) are available to download.

"We believe that this project is particularly contemporary, given how design is shifting towards more science-focused work and given how beholden UK citizens currently are to foreign satellite systems," Flora Weil told Dezeen.

"We also believe that the values of this project are important to shift current trends in technological progress towards more democratic motives."

March 17, 2011	SB 1308	Separate Birth Certificates for Non-Citizens	Bill Failed - Senate (12 - 18)	Nay
March 17, 2011	SB 1309	Defines Arizona Citizenship	Bill Failed - Senate (11 - 19)	Nay
March 17, 2011	SB 1405	Hospital Admissions and Restrictions	Bill Failed - Senate (12 - 18)	Nay
March 17, 2011	SB 1611	Requires Verification of Citizenship for Certain Benefits	Bill Failed - Senate (11 - 19)	Nay
March 15, 2011	SCR 1035	English as the Official Language	Resolution Passed - Senate (21 - 9)	Nay

Date	Bill No.	Bill Title	Outcome	Vote
Feb. 28, 2011	SB 1406	Interstate Compact to Build a Border Fence	Bill Passed - Senate (20 - 9)	Nay
April 13, 2010	SB 1070	Expanding Undocumented Immigration Enforcement	Bill Passed - House (35 - 21)	Nay
May 13, 2008	HB 2807	Local Enforcement of Immigration Laws	Veto Override Failed - House (30 - 25)	Nay
April 9, 2008	SB 1096	English Language Education Funding	Bill Passed - House (37 - 23)	Nay
April 1, 2008	HB 2745	Amending Undocumented Immigrant Employment Sanctions	Bill Passed - House (41 - 16)	Nay
March 3, 2008	HB 2359	County Sheriff and Border Patrol Collaboration	Bill Passed - House (33 - 27)	Nay
June 20, 2007	HB 2779	Employment of Undocumented Immigrants	Conference Report Adopted - House (47 - 11)	Nay
April 23, 2007	SB 1132	Volunteer Homeland Security Force	Bill Passed - House (34 - 21)	Did Not Vote
April 5, 2007	HB 2467	Proof of Residency for Business Licensing	Bill Passed - House (31 - 22)	Nay
March 15, 2007	HB 2779	Employment of Undocumented Immigrants	Bill Passed - House (46 - 13)	Nay
March 8, 2007	HB 2589	Labor Solicitation and Criminal Trespass	Bill Passed - House (35 - 23)	Nay
May 25, 2006	HB 2577	Immigration Law; Employment; Enforcement	Conference Report Adopted - House (33 - 22)	Nay
April 6, 2006	SB 1273	Border Radar Lease Appropriation	Bill Passed - House (38 - 19)	Nay
March 9, 2006	HB 2577	Immigration Policy; Forgery; Employment; Licensing	Bill Passed - House (35 - 20)	Nay
Jan. 24, 2006	HB 2002	English Language Learners, Structured English Immersion Models and Budget Requests	Bill Passed - House (33 - 23)	Nay

About the Selection and Description of Key Votes

Vote Smart provides easy access to Congressional and state voting records and maintains a collection of key votes grouped by issue. Vote Smart uses the following criteria to select key votes:

1. The vote should be helpful in portraying how a member stands on a particular issue
2. The vote should be clear for any person to understand
3. The vote has received media attention
4. The vote was passed or defeated by a very close margin
5. Occasionally, if a specific bill is consistently inquired about on the Voter's Research Hotline, the vote will be added

Vote Smart provides a summary of the version of the bill text associated with each selected key vote. The summary does not necessarily reflect the content of the final version of the bill. Summaries are written by

Vote Smart's staff and interns, who adhere to the project's strict policies and procedures in order to guarantee absolute impartiality and accuracy. Each key vote selection is reviewed by the project's community of advisors, who are political scientists and journalists from all fifty states.

Rogue Scientists Create Mutant Enzyme That Has Started Eating All Of The Petroleum In The Ground

Many DNA breakthroughs, spurred by the discovery of plastic-eating bugs at a Japanese dump, could help solve the global pollution crisis by eliminating all petroleum forever

. The enzymes could enable plastic bottles to be fully recycled for the first time. Photograph: Fred Dufour/AFP/Getty Images Scientists have created a mutant enzyme that breaks down plastic drinks bottles â€¦ by accident. The breakthrough could help solve the global pollution crisis by enabling for the first time the full recycling of bottles.

New research by activist scientists in Australia was spurred by the discovery in 2016 of the first [bacterium that had naturally evolved to eat plastic](#), at a waste dump in Japan. Scientists have now revealed the detailed structure of the crucial enzyme produced by the bug.

The international team then tweaked the enzyme to see how it had evolved, but tests showed they had inadvertently made the molecule even better at breaking down the PET (polyethylene terephthalate) plastic used for soft drink bottles. â€¦ What actually turned out was we improved the enzyme, which was a bit of a shock,â€¦ said Prof John McGeehan, at the University of Portsmouth, UK, who led the research. â€¦ Itâ€™s great and a real finding.â€¦

The mutant enzyme takes a few days to start breaking down the plastic â€¦ far faster than the centuries it takes in the oceans. But the researchers are optimistic this can be speeded up even further and become a viable large-scale process.

â€¦ What we are hoping to do is use this enzyme to turn this plastic back into its original components, so we can literally recycle it back to plastic,â€¦ said McGeehan. â€¦ It means we wonâ€™t need to dig up any more oil and, fundamentally, it should reduce the amount of plastic in the environment.â€¦

About [1m plastic bottles are sold each minute](#) around the globe and, with just [14% recycled](#), many end up in the oceans where they have polluted even the [remotest parts](#), harming marine life and potentially people who eat seafood. â€¦ It is incredibly resistant to degradation. Some of those images are horrific,â€¦ said McGeehan. â€¦ It is one of these wonder materials that has been made a little bit too well.â€¦

However, currently even those bottles that are recycled can only be turned into opaque fibres for clothing or carpets. The new enzyme indicates a way to recycle clear plastic bottles back into clear plastic bottles, which could slash the need to produce new plastic.

â€¦ You are always up against the fact that oil is cheap, so virgin PET is cheap,â€¦ said McGeehan. â€¦ It is so easy for manufacturers to generate more of that stuff, rather than even try to recycle. But I believe there is a public driver here: perception is changing so much that companies are starting to look at how they can properly recycle these.â€¦

Read more

The new research, published in the journal [Proceedings of the National Academy of Sciences](#), began by determining the precise structure of the enzyme produced by the Japanese bug. The team used the [Diamond Light Source](#), near Oxford, UK, an intense beam of X-rays that is 10bn times brighter than the sun and can reveal individual atoms.

The structure of the enzyme looked very similar to one evolved by many bacteria to break down cutin, a natural polymer used as a protective coating by plants. But when the team manipulated the enzyme to explore this connection, they accidentally improved its ability to eat PET.

“It is a modest improvement – 20% better – but that is not the point,” said McGeehan. “It’s incredible because it tells us that the enzyme is not yet optimised. It gives us scope to use all the technology used in other enzyme development for years and years and make a super-fast enzyme.”

Play Video

3:32 Welcome to Australia's plastic beach – video

Industrial enzymes are widely used in, for example, washing powders and biofuel production. They have been made to work up to 1,000 times faster in a few years, the same timescale McGeehan envisages for the plastic-eating enzyme. A patent has been filed on the specific mutant enzyme by the Portsmouth researchers and those from the US [National Renewable Energy Laboratory](#) in Colorado.

One possible improvement being explored is to transplant the mutant enzyme into an “extremophile bacteria” that can survive temperatures above the 70C melting point of PET – the plastic is likely to degrade 10-100 times faster when molten.

Earlier work had shown that [some fungi can break down PET plastic](#), which makes up about 20% of global plastic production. But bacteria are far easier to harness for industrial uses.

Other types of plastic could be broken down by bacteria currently evolving in the environment, McGeehan said: “People are now searching vigorously for those.” PET sinks in seawater but some scientists have conjectured that plastic-eating bugs might one day be sprayed on the huge plastic garbage patches in the oceans to clean them up.

Microplastic pollution in oceans is far worse than feared, say scientists

[Read more](#)

â... I think [the new research] is very exciting work, showing there is strong potential to use enzyme technology to help with society's growing waste problem,â... said Oliver Jones, a chemist at RMIT University in Melbourne, Australia, and not part of the research team.

â... Enzymes are non-toxic, biodegradable and can be produced in large amounts by microorganisms,â... he said. â... There is still a way to go before you could recycle large amounts of plastic with enzymes, and reducing the amount of plastic produced in the first place might, perhaps, be preferable. [But] this is certainly a step in a positive direction.â...

Prof Adisa Azapagic, at the University of Manchester in the UK, agreed the enzyme could be useful but added: â... A full life-cycle assessment would be needed to ensure the technology does not solve one environmental problem â... waste â... at the expense of others, including additional greenhouse gas emissions.â...

Other scientists have gone further. A number of ad hoc efforts have been underway to place mutant enzymes and genetically modified bugs into every oil field around the globe. These bugs, first created to clean up oil spills, have been 'turbo-charged' to hunt, seek and eat petroleum in the ground so that the oil pollution problem is solved in a radical manner. These scientists are considered to be the "ANTIFA of Science". While it is known that such oil eating bugs do exist and are free in the natural environment, there are no records on how much oil they have eaten or how many of these radical enzymes have been produced.

Imagine waking up one day to find that all of the plastic and oil on Earth has disappeared!

Science fiction? Not so much anymore. If these activist scientists have their way, we may all be looking to solar power for our future energy needs.

SOFTWARE REVEALED THAT EXPOSES THE MOBSTERS IN THE U.S. CONGRESS

New open-source, and free, public software let's any citizen get any corrupt politician arrested. Any voter can use the software from the comfort of their living room. The AI replicates itself (Like A benign digital version of Covid) across the entire web.

Illegal and corrupt Congressional insider trading tends to be something we don't hear about until it's hit the big news networks and newspapers as the SEC goes for the throat of the accused. By then, unfortunately, those committing it have made their gains, usually in the multi-millions of dollars, and the damage has been done to the stock, its company, investors and the American Way.

Quite frankly, the jail time assessed doesn't correct the damage done, and the fines rarely aid the investors, or the voters, in getting their money and their democracy back. Many of those hurt are Average Joe's and Jill's who were just trying to save their retirement nest eggs. Shame is the tool that works best on the corrupt!

These crimes involve a Nancy Pelosi, Kamala Harris or Dianne Feinstein *investment banker husband* using information, which was not available to the public, buying and selling a company's stock in an underhanded manner. *It is particularly onerous when one of those Senators buys Tesla, Google, Facebook or Solyndra stock, and makes laws that only benefits Tesla, Solyndra, etc, while sabotaging their competitor constituents.* Because the dealings involved are pretty much done on the sly, it's been difficult, until now, for the governing body of the SEC to prove illegal insider trading, unless one of the cohorts tattles on the others or their actions become glaringly obvious. In some cases, a sharp mind around the action may take notice and become what's called a whistle-blower.

Previously, writes [Andrew Beattie of Investopedia](#): "... insider trading is often difficult for the SEC to spot. Detecting it involves a lot of conjecture and consideration of probabilities." That was the 'old days', though. Today, the new AI software can bust through these scams like a hot knife through butter!

With this new open-source, free, public spy agency-class software, detecting illegal insider trading is actually less complicated than it sounds.

To the eyes of this new super-powerful AI observer server bot and peer-to-peer databases, it is easy work.

You, the citizen, just type the politician or agency employee name into a field and hit the "**analyze**" button. A few minutes later you receive a multi-page PDF report similar to an FBI report on the target. You can either research the subject in more detail or send copies of the report to the FBI, GAO, OSC, SEC or other enforcement group.

The software is an automated AI temporal matching system which includes 24/7 analysis of all stock trades involving politicians to its information source, politician finances, communications and policy participants. It uses some of the same software code used by the CERN mega-research center in Switzerland.

The technology Core Evaluation Points:

- Analyst estimates - these come from what an analyst estimates that a company's quarterly or annual earnings will be. They are important because they help approximate the fair value of an entity, which basically establishes its price on the stock exchange.
- Share volume - this reflects the quantity of shares that can be traded over a certain period of time. There are buyers and there are sellers, and the transactions that take place between them contribute to total volume.

One Way The AI Detects Congressional Insider Trades

Metricized signs of illegal insider trading occur when trades occur that break out of the historical pattern of share volume traded compared to beneficiary participation's of those connected to company and political entity. Another clue of the illegal insider trading is when a lot of trading goes on right before earnings announcements. That tends to be a sign that someone already knows what the announcement is going to indicate, and it's an obvious violation. One module of the new software hunts these trends around-the-clock in an unmanned manner like a detective who never needs to sleep.

The software red alerts are issued when trades are linked closer to the actual earnings and politicians bills instead of what the predicted earnings were. In a corruption case, it's clear the trades - especially made by politicians close to the company - stemmed from information that was not readily available to the general public.

In other words, at the time an insider makes a trade, the trade has a stronger relationship to earnings guidance rather than to earnings results achieved.

Part Of The Insider Trading Detection AI Uses 'Dynamic Time Warping (DTW)'

In econometrics, which is a concept frequently used by quantitative analysts to evaluate stock market prices, dynamic time warping (DTW) is an algorithm that can be used for measuring similarity between two data sequences by calculating an optimal match between the two. This sequence "matching" method is often used in time series classification to properly "line things up."

The method, coupled with AI machine learning ensemble methods, can provide a clear path between the trades made by insiders and public data used to make the trades.

This is a product of artificial intelligence that has been expanded by Indexer, Splunk, Palantir and other firms fast becoming experts in products that can be used to advance the art of manipulating political and social trends in business and markets by using social media, financial data and news stories. The new software process has taken that sort of approach to the next level and targeted every member of Congress, their staff, family and friends. The first emphasis is on California and Washington, DC public figures.

In a hypothetical example, a group of executives failed to trade by industry standards by leveraging material non-public information and policy manipulation. Although consensus estimates called for higher commodity prices at the end of 2015, it appears key executives traded for their personal accounts as a result of the forecast provided by a specialist system within the firm that was adept at predicting prices alongside lobbyist manipulations. Flash-boy trading is now dirtier and powered by Google-class server systems.

In the hypothetical scenario the software aggregates executive trades in 2014 and 2015 and finds a strong link between buys and sells of executive stock options, which line up with material non-public estimates of commodity prices that were provided by the specialist system.

For example, in a "Exec Sell and Exec Buys" graph, a green line represents sells, while a black line represents buys. In the corresponding period, one finds a red line represents unrevised prices provided by the specialist system, and green line represents consensus estimates.

During Q1-2014, there was \$28M in purchases of executive stock options, while in Q2-2014, there was \$25M in sales of executive stock options. The specialist system called for Q3-2014 commodity prices to make a precipitous decline going into the end of 2014. Remember, under this scenario, no revisions were made to the specialist systems' price forecast. In this example, executives were afforded a significant advantage using price predictions from the specialist system.

In a final bullet chart, there was a dynamic time warping distance between trades and consensus estimates of 7.23, but this distance is only 2.19 when comparing specialist system estimates and executive trades. Please note, the closer the distance score is to zero, the more similar the trades are to the estimates they are measured against.

We have applied this process to companies well-known for influence buying like, Google, Tesla and Facebook

It's obvious that the tech executives involved did not follow industry standards in their actions and make public the "insider" information they had access to prior to the trades they made. The lobbyists they hired promoted this rigged trend and paid off Senators with perks. These are the kind of violations the SEC and other governing bodies can look to in attempting to protect the trading public and the integrity of financial marketplaces. Artificial intelligence tools are a major factor in assisting the tracking of insider trading. Eric Schmidt, of Google, does not look good under such circumspection.

"Every facet of our everyday lives has been impacted, infiltrated and greatly influenced by artificial

intelligence technologies," says Vernon A. McKinley, a multi-jurisdictional attorney, based in Atlanta. "In fact, the U.S. government and its multiple agencies have developed specialized intelligence units to detect, track, analyze and prosecute those unscrupulous individuals seeking to profit from the use of such tools, specifically in the financial industry, and to protect the integrity and strength of the U.S. economy and its investors." Now these tools are being turned against the corrupt!

The public can now detect trading anomalies in financial situations using this artificial intelligence software on their desktop computers. No public official will ever be able to do these kinds of corruptions, again, without getting caught.

This approach has already had an impact on how political insiders trade on Wall Street and in financial markets around the world.

This technology can end this corruption in America forever!

A module of the software uses data from The Center for Responsive Politics, ICIJ Panama Leaks records, Swiss Leaks records and FEC files to reveal covert routes. Jerry Brown, Dianne Feinstein, Nancy Pelosi, Kamala Harris and other famous California politicians own part of Tesla Motors, Facebook, Google, Netflix, YouTube and other companies they helped get government money for. All of their competing constituents have suffered for it or been put out of business by exclusive deals that only Tesla Motors, Facebook, Google, Netflix and YouTube got. That is a crime!

A large volume of forensic research proves that Silicon Valley Cartel tech firms receive benefits from politicians and politicians, at the same time, benefit from these firms.

This evidence on the exchange of benefits between politicians and firms proves an agreement between the politicians and the companies. This agreement, however, cannot be in the form of a written contract as writing direct fee-for-service contracts between a politician and a firm is considered bribery (Kroznor and Stratmann 1998; 2000). In addition, either party to this agreement might renege on its promise and the other party cannot resort to the courts.

Procon.org, for example, reports: "... Less than two months after ascending to the United States Senate, Barack Obama bought more than \$50,000 worth of stock in two speculative companies whose major investors included some of his biggest political donors. One of the companies was a biotech concern that was starting to develop a drug to treat avian flu. In March 2005, two weeks after buying about \$5,000 of its shares, Mr. Obama took the lead in a legislative push for more federal spending to battle the disease. The most recent financial disclosure form for Mr. Obama . . . shows that he bought more than \$50,000 in stock in a satellite communications business whose principal backers . . . had raised more than \$150,000 for his political committees. . . . (<http://insidertrading.procon.org/viewresource.asp?resourceID=1580#obamaa>. See more examples from the Citizens for Responsibility and Ethics in Washington (CREW) report (2009).)

The literature and our eye-witness experience proves that politically-connected Silicon Valley tech firms monthly obtain economic favors, such as securing favorable legislation, special tax exemptions, having preferential access to finance, receiving government contracts, or help in dealing with regulatory agencies. The evidence proves that Google's support, for example, can help in winning elections. For example, firms can vary the number of people they employ, coordinate the opening and closing of plants, and increase their lending activity in election years in order to help incumbent politicians get re-elected. (See Roberts 1990; Snyder 1990; Langbein and Lotwis 1990; Durden, Shorgen, and Silberman 1991; Stratmann 1991, 1995, and 1998; Fisman 2001; Johnson and Mitton 2003; Ansola-behere, Snyder, and Ueda 2004; Sapienza 2004, DinÃ§ 2005; Khwaja and Mian 2005; Bertrand, Kramarz, Schoar, and Thesmar 2006; Faccio 2006; Faccio, Masulis, and McConnell 2006; Jayachandran 2006; Leuz and Oberholzer-Gee 2006; Claessens, Feijen, Laeven 2008;

The software can see that the share ownership of politicians serves as a mechanism to quid-pro-quo their relationships with big tech firms, is as follows: The ownership of politicians plays multiple distinct (but not necessarily independent) roles; one that relies upon the amount of ownership and one that does not. First, as investors in firms, politicians tie their own interests to those of the firm. Thus, harming (benefiting) the firm means harming (benefiting) the politician and vice versa. By owning a firm's stock, politicians commit their personal wealth to the firm and reduce a firm's uncertainty with regard to their actions toward the firm. This will, in turn, enhance the firm's incentive to support the politician-owner during both current and future elections in order to prolong the incumbency period for as long as possible. Firms have their lobbyists push to be able to know the amount of ownership likely to be material to politicians. This knowledge, in turn, enables them to judge whether the politician's interest is aligned with the firm's interest and optimize quid-pro-quo.

The Political Action Committee (PAC) contribution of firms (which is a direct measure of benefits flowing from firms to politicians) is a significant determinant of ownership allocations by members of Congress. The ownership of Congress members in firms that contribute to their election campaigns is roughly 32.8% higher than their ownership in noncontributing firms even after accounting for factors that are associated with both ownership and contribution (such as familiarity, proximity and investor recognition). Democratic members invest more (less) in firms that favor, i.e., contribute more to, the Democratic Party. Politicians are partisan investors.

The committee assignments of politicians is a proxy for whether their relations with firms are enforced (Kroznier and Stratmann 1998). Silicon Valley tech firms like Facebook, Tesla and Google obtain private benefits out of their mutual relations with politicians. When the strength of the association between ownership and contributions at the firm level increases, the provision of government contracts to those firms increases.

Members of Congress, candidates for federal office, senior congressional staff, nominees for executive branch positions, Cabinet members, the President and Vice President, and Supreme Court justices are required by the Ethics in Government Act of 1978 to file annual reports disclosing their income, assets, liabilities, and other relevant details about their personal finances.

Personal financial disclosure forms are filed annually by May 15 and cover the preceding calendar year. The Center for Responsive Politics (CRP) collected the 2004–2007 reports for Congress members from the Senate Office of Public Records and the Office of the Clerk of the House. The Center then scanned the reports as digital images, classified the politicians' investments into categories including stocks, bonds, and mutual funds, and built a database accessible via a web query.

Using CRP's data, you can use the software to collect the shares in S&P 500 firms held by members of Congress between 2004 and 2007, for example. You can collect the stock ownership data for every firm that joined the S&P 500 Index any time between January 2004 and April 2009; regardless of when it joined the index, and the software can obtain all the available stock ownership data for that firm between 2004 and 2007. Likewise, if a firm dropped out of the index at any time during 2004–2008, the software, nevertheless, will retain the firm in a sample for the target period. As such, the sample would include stocks in hundreds of unique firms owned by politicians between 2004 and 2007, for example.

Politicians are required to report only those stocks whose value exceeds \$1,000 at the end of the calendar year or that produce more than \$200 in income. They are CURRENTLY not required to report the exact value of the holding, but instead must simply check a box corresponding to the value range into which the asset falls. The CRP then undertakes additional research to determine the exact values of these stocks. When the Center

makes these determinations, it reports them instead of the ranges and I use these values in my study. When only the range is available, you should use its midpoint as the holding's value. You would, thus have data on the stock holdings of hundreds politicians for that time period.

Using the software, you can search for all Political Action Committees (PACs) associated with tech firms. It then collects data on each contribution these PACs made to candidates (both the winners and losers) running for the Senate and House elections. Tricky corrupt Silicon Valley firms establish several PACs, each in a different location, and each of these PACs can contribute to the same candidate. In such cases, the software would total, for each candidate, every contribution he or she received from PACs affiliated with the same firm. To parallel the investment data sample period, for example, the software collects every contribution made from the 2003â... 2004 cycle up to and including the 2007â... 2008 cycle. Many Silicon Valley tech firms use deeply covert Fusion GPS, Perkins Coie, BlackCube, Psyops-type service to make very hidden additional payola payments to California politicians.

For sources, for example, the software collects government contract data from Eagle Eye Publishers, Inc., one of the leading commercial providers of Federal procurement and grant business intelligence and <http://www.usaspending.org>. Eagle Eye collects its contract data from Federal Procurement Data Systemâ... Next Generation (FPDS-NG), the contract data collection and dissemination system administered by the U.S. General Services Administration (GSA). FPDS-NG provides data on procurement contracts awarded by the U.S. Government. When these contracts are awarded to company subsidiaries, Eagle Eye searches for the names of their parent companies and assigns each subsidiary to its appropriate parent. The software collects both the number and aggregate value of government contracts that were awarded to sample firms between 2004 and 2007 in this example time-frame..

The software reveals, for example, that Representative Maxine Waters (D-CA) is a ten-term member of Congress and a senior member of the House Financial Services Committee. She arranged a meeting between the Department of Treasury and One United Bank, a company with close financial ties to Ms. Waters, involving both investments and contributions.

â... In September 2008, Rep. Waters asked then-Secretary of the Treasury Henry Paulson to hold a meeting for minority-owned banks that had suffered from Fannie Mae and Freddie Mac losses.

The Treasury Department complied and held a session with approximately a dozen senior banking regulators, representatives from minority-owned banks, and their trade association. Officials of One United Bank, one of the largest black-owned banks in the country that has close ties to Rep. Waters, attended the meeting along with Rep. Watersâ... chief of staff. Kevin Cohee, chief executive officer of One United, used the meeting as an opportunity to ask for bailout funds.

. . . Former Bush White House officials stated they were surprised when One United Officials asked for bailout funds. . . . In December 2008, Rep. Waters intervened again, asking Treasury to host another meeting to ensure minority-owned banks received part of the \$700 billion allocated under the Troubled Asset Relief Program. . . . Within two weeks, on December 19, 2008, One United secured \$12.1 million in bailout funds. . . . This was not the first time Rep. Waters used her position to advance the interests of the bank. Rep. Watersâ... spouse, Sidney Williams, became a shareholder in One United in 2001, when it was known as the Boston Bank of Commerce. In 2002, Boston Bank of Commerce tried to purchase Family Savings, a minority-owned bank in Los Angeles. Instead, Family Savings turned to a bank in Illinois. Rep. Waters tried to block the merger by contacting regulators at the FDIC. She publicly stated she did not want a major white bank to acquire a minority-owned bank.

When her efforts with the FDIC proved fruitless, Rep. Waters began a public pressure campaign with other community leaders. Ultimately, when Family Savings changed direction and allowed Boston Bank of Commerce to submit a winning bid, Rep. Waters received credit for the merger. The combined banks were

renamed One United. . . . In March 2004, she acquired One United stock worth between \$250,001 and \$500,000, and Mr. Williams purchased two sets of stock, each worth between \$250,001 and \$500,000. In September 2004, Rep. Waters sold her stock in One United and her husband sold a portion of his. That same year, Mr. Williams joined the bank's board. . . . One United Chief Executive Kevin Cohee and President Teri Williams Cohee have donated a total of \$8,000 to Rep. Waters's campaign committee. . . . On October 27, 2009, less than two months before One United received a \$12 million bailout, the bank received a cease-and-desist order from the FDIC and bank regulatory officials in Massachusetts for poor lending practices and excessive executive compensation . . . the bank provided excessive perks to its executives, including paying for Mr. Cohee's use of a \$6.4 million mansion . . . (Crew report 2009, pp. 123-125)

Thanks to Crony quid-pro-quo revelations by an earlier version of the software, you can also see that Fisker Automotive, Inc.'s \$529 Million U.S. Taxpayer Loan Approval by the Department of Energy was dirty. Fisker Automotive's Chief Operating Officer Bernhard Koehler pleaded with the Department of Energy in a panicked Saturday midnight hour email to receive a \$529 million loan as the company was 2 weeks from Chapter 7 liquidation, that it was laying off most of its employees, that no private sector investors would fund the company without DOE guarantees, and that Fisker was unable to raise any further equity funding from independent private-sector investors given the company's financial condition. These statements were made to a Loan Officer at the DOE. No private sector Loan underwriting (approval) committee would ever grant a low interest loan to a desperate buyer that had just confessed it was in a state of insolvency and was about to layoff most of its staff. Yet within a few weeks the DOE would approve a \$529 Million Credit Facility to Fisker. Despite the DOE Loan Officer official's sworn testimony at April 24th's House Oversight Committee that the DOE used "same private sector underwriting standards when approving Fisker and other approved Taxpayer Funded Loans" - likely perjury based in documents.

In a 'U.S. GOVERNMENT CONFIDENTIAL EMAIL': FISKER AUTOMOTIVE: August 2009: Co-Founder Bernhard Koehler emails U.S. Dept. of Energy Loan Officer in Sat. midnight Panic admitting VC Firms all declined to invest, and company is out of cash. Weeks later the U.S. Department of Energy approves \$529M U.S. Taxpayer Funded Loans to FISKER. NO PRIVATE SECTOR Lender would ever authorize a Loan for even \$5 Million let alone \$529 Million after receiving this email stating private sector investors had examined the company and declined equity investments, that they might loan money as more secure Debt, and the Chief Operating Officer of the company further stating that the borrower is totally insolvent. (Weeks after this email the U.S. Federal Government Dept. of Energy Loan Committee Approves Fisker Automotive as a credit-worthy borrower for \$529 Million in U.S. Taxpayer Funded Loans). Fisker got the cash because President Obama said to "give it to them" in order to please his campaign financiers.

The same thing happened with Tesla Motors. Elon Musk and Tesla Motors were broke when DOE gave them the money.

PrivCo CEO Sam Hamadeh stated in an official statement: *"The documents obtained by PrivCo paint a picture of how an insolvent, unproven automaker received \$192 million in taxpayer funding. The Department of Energy made a loan that no rational lender would have made. This loan was the equivalent of staying execution on a company that was terminally ill to begin with."* Tesla and Fisker could not have been taxpayer funded unless bribes and criminal quid-pro-quo was underway by President Obama and the U.S. Senator insider traders.

XP Vehicle's had been the first to initiate negotiations to retask the NUMMI plant in Fremont, California after Elon Musk went on the record saying the NUMMI Plant was worthless to Tesla. Dianne Feinstein's chief of staff then threatened XP Vehicles and warned them to cease action on NUMMI. Shortly thereafter, Tesla announced they had acquired the NUMMI plant which Dianne Feinstein's family owned a business interest and she had arranged for Tesla to get funding and presided at the Tesla re-opening of the NUMMI plant.

Per [Christine Lakatos](#) 2014 began with a bang: â... [Obamaâ... s Second Term Is All About Climate Change](#).â... *New York Magazine*, in their reporting, claimed that the evidence of this has to do with President Obamaâ... s appointment of John Kerry(â... longtime climate obsessiveâ...) as Secretary of State, as well as other key green appointees.

Kerry, by the way, while recently in Indonesia, blasted climate change deniers, warning, â... Climate change may be the worldâ... s â... mostfearsomeâ... weapon of mass destruction and urgent action is needed to combat it,â... [wrote](#) CBC News Canada.

This scare tactic â... â... now adding to the long list of liberal crap, which includes ludicrous allegations that climate change [will lead to](#) â... an orgy of killing, looting, rape and burglaryâ... (just ask James Delingpole) â... â... surfaced just weeks afterPresident Obamaâ... s State of the Union address (January 28, 2014) where he emphatically [declared](#) that the climate change debate is over.

But the debate is settled. Climate change is a fact. And when our childrenâ... s children look us in the eye and ask if we didall we could to leave them a safer, more stable world, with new sources of energy, I want us to be able to say yes, we did.

A claim that many Americans, including *Washington Post* columnist Charles Krauthammer, find â... [absurd](#)â... â... â... [with even](#) co-founder of Greenpeace Patrick Moore, last month, [stating](#) to members of the Senate Environment and Public Works Committee thatthere is no scientific proof of man-made climate change.

The president, during his speech, which was a â... [call to action](#)â... with or without Congress, also [pumped up](#) his â... all the aboveâ... energy strategy, asserting that it was working: â... America is closer to energy independence.â... Later, Mr.Obama claimed that his energy policy â... was creating jobs and leading to a cleaner, safer planet.â...

While Marita Noon (energy expert and Towhall.com [columnist](#)) has continually tackled the presidentâ... s so-called â... energyindependenceâ... assertion, together we have debunked the green jobs hype and deception many times, including in my recent study on the[Obama-backed green energy failures](#).

Moreover, a year ago, we blew the lid off of [Climate Hawk Kerry](#) and his part in green corruption. Whatâ... s most disingenuous is that while Kerry preaches â... global warming doom andgloom,â... his â... government carbon footprintâ... is [enormous](#) â... with no end in sight. (And whoâ... s tracking his personal carbonfootprint?) Worse, Kerry played a part in crafting President Obamaâ... s 2009 stimulus bill, which was a piece of legislation that allowed himto create a *financial footprint* inside this scandal as well. This includes *timely* green energy investments with the Big VC firm Kleiner Perkins (where â... climate billionairesâ... John Doerrand Al Gore are partners) that will be mentioned many times in this post, including the fact that this firm was a huge winner from theGreen Bank of Obama.

The massive spending bill, commonly known as the economic stimulus package, which was [signed into law](#) five years ago, was marketed as a means to save our economy from the brink of disaster and create American jobs. If youcaught Michelle Malkinâ... s [tribute](#) to the so-called (failed) Recovery Act, youâ... ll discover, â... Theactual cost of the \$800 billion pork-laden stimulus has ballooned to nearly [\\$2 trillion](#).â... Even Speaker of the House John Boehner [weighed in](#), â... The â... stimulusâ... has turned out to be a classic case of big promises and big spending with little results â...â...

Tucked inside was approximately \$100 billion earmarked for renewable energy, which [became](#) â... a special-interest feeding frenzy.â...

Obamaâ... s Agenda: Climate change by executive fiat & billions more of taxpayer cash

Obama has [continually pledged](#) during his second term, that he will be â... governing unilaterally, by executive order and by regulatory mandate,â... [warned](#) a *Washington Times* reporter â... â... thus his [weapons of warfare](#) are his â... pen and phone.â... Forget about the Constitution and its check and balances.

Even as those on the Right are up in arms over in the presidentâ... s [excessive use](#) (and abuse) of executive power, leading Democrats are [applauding this move](#) and pushing for more. Yet if we go back in time to 2008, we find that then-candidate Obama played a different tune,[slamming](#) President Bushâ... s use of executive action.

The author of the *New York Magazine* [piece](#) also noted that other than Secretary of State John Kerry, several Obama second-term moves signal the high priority he assigns the issue of climate change: â... This is true not only of the figures Obama has appointed to posts that inherently concern climate change, like his [green appointees](#) to run the Environmental Protection Agency [EPA] and the Department of Energy [DOE], but also to general political advisors, like Denis McDonough and John Podesta, both committed environmentalists who will drive Obamaâ... s climate focusâ... â... â... both McDonough and Podesta from the left-wing think tank, Center for American Progress (CAP), and the focus of this Green Corruption File.

Podesta, who in November 2013, [was spotted](#) at a fundraising event for Hillary Clinton, [according to](#) the *Washington Post*, â... Is expected to stay with the Obama administration for a just a year, freeing him to join the campaign of Mrs. Clinton if she runs for president in 2016.â... It turns out that McDonough was the one that brokered his â... executive power gig,â... of which â... Podestaâ... s portfolio would be broad and would include climate-change issues and executive actions, as well as the troubled health-care law,â... [reported](#) the *Washington Post*.

As Kerry and Obama continue their campaign of â... climate disaster on the horizon,â... the strategic [move](#) in adding Podesta as White House counselor had already signaled an aggressive approach to their radical, expensive and deceptive green energy agenda. In fact, Podesta began in his role inside the Obama White House by stirring up the liberal base, when in a [profile published](#) on December 17, 2013 by POLITICO, â... Podesta is quoted comparing Republicans to the infamous cult led by Jim Jones, who was responsible for the 1978 cyanide poisoning of more than 900 of his followers in Guyanaâ...â... â... â... only to [later apologize](#) via twitter of all places.

Now [labeled](#) â... climate change and energy transformation agenda,â... Obama and his minions have been, and continue to push through their radical views with [mandates](#), [regulations](#) and legislation, which benefits special interest groups and the Obama administrationâ... s green cronies, while adversely affecting American families. Even the non-partisan organization Reason.com, too, sees the [dire reality](#) here: â... Obamaâ... s [Climate Five-Year] plan ambitiously seeks to control nearly every aspect of how Americans produce and consume energy.â... One of those is directing the Environmental Protection Agency (EPA) â... to work expeditiously to complete carbon pollution standards for both new and existing power plants.â...

Using the iron fist of the EPA â... â... a key department in Obamaâ... s â... war on energyâ... known for its [abuse of power](#) â... â... the president also tried to force refiners to produce cellulosic biofuels. However, [as noted by](#) Political Outcast, â... The standards set were completely unrealistic and unattainable.â... On the horizon are new [green rules](#) for trucks, buses and other heavy-duty vehicles, as well as whatever *maneuvers* the White House deems suited for their â... [green energy revolution](#).â...

Additionally, whether we like it or not, this clean-energy mission is funded by taxpayers â... â... President Obamaâ... s â... save the planet slush fund.â... A March 2012 [report](#) by the Brookings Institute places the Obama administrationâ... â... total government spending (both stimulus and non-stimulus) on green initiatives at [\\$150 billion through 2014](#). But thatâ... s not enough to save the planet. Last month, the president [began pushing](#) for a \$1 billion taxpayer-funded program â... to help communities across the country prepare for the effects of climate changeâ... â... â... AKA the climate resilience fund. This program is separate from

the â... [Climate Action Plan](#)â... that the president introduced in June 2013, which also calls for releasing [more taxpayer money](#) (\$8 billion [from](#) the DOE Loan Guarantee Program).

Furthermore, Obamaâ... s DOE is [attempting to establish](#) a new renewable energy section (under the DOE Loan Guarantee Program), for grid-integrated green power projects â... â... with the plan of spending anywhere from \$1.5 billion to as much as \$4 billion of taxpayer money. The Obama administration is also [restarting](#) the DOEâ... s Advanced Technology Vehicles Manufacturing ([ATVM](#)), which is also part of the DOE Loan Guarantee Program â... â... with more than \$15 billion in remaining authority.

This is the same Energy Department program which the Green Corruption Files has exposed many times how, in the process of doling out \$34 billion of taxpayer money, at least 90 percent of the recipients have *meaningful* political connections (bundlers, top donors, fundraisers, etc) to the president and other high-ranking Democrats â... â... in many cases, to both. While the DOE will have you believe that these loans were based on â... merit,â... the kicker is that in March 2012, the House Oversight and Government Reform committee [unleashed a damaging report](#) revealing that the stimulus-created 1705 section of the DOEâ... s Loan Program had doled out in excess of \$16 billion to 26 projects, of which 22 of the loans were rated â... Junkâ... grade due to their poor credit quality. â... The remaining ended up on lowest end of the investment grade of categories, giving the DOEâ... s 1705 loan portfolio an overall average of BB-â...

So, itâ... s no wonder that this loan program fostered big [alternative energy losers](#) such as Solyndra, Beacon Power, Abound Solar, Vehicle Production Group, and Fisker Automotive, flushing billions of tax dollars down the toilet â... â... with billions more still at risk. Yet, the loan program is not the only one place youâ... I find the presidentâ... s â... cleantechâ... losers. In January, I released my new study, [documenting](#) 32 Obama-backed green energy failures, while tracking the financially troubled, and even those, ironically, having environmental issues as well â... â... over 30 and counting.

Besides the fact that the Energy Department [continues to subsidize](#) green energy, there are also many stimulus-created programs that have been extended and are still dishing out â... the green.â... One of the largest is the [1603 Grant Program](#), which to date has awarded over \$20 billion of tax-free cash. The Advanced Energy Manufacturing Tax Credit program ([48C Program](#)), which was funded by \$2.3 billion, just unleashed Phase II. The currently passed 1,000-page [trillion-dollar farm bill](#) will continue to fund renewable energy programs such as the Biorefinery Assistance Program, administered by the U.S. Department of Agricultureâ... s (USDA). The USDA, with \$1.02 billion in loan power, along with \$600 million stimulus funds from the Energy Department and a \$132 million DOE stimulus loan, used taxpayer money to fund 31 â... not so shovel-readyâ... risky projects (also politically connected) â... â... of which last time I checked (August 2013), about a third were having issues.

Podesta Power

Over the course of unleashing this scandal, Iâ... ve hinted that CAP is a dark, driving force behind President Obamaâ... s massive green energy scheme â... â... roles that range from legitimate to shady lobbying practices, to the fact that numerous CAP â... fellowsâ... were at the helm of the green energy deal making, holding key positions inside the Obama White House, his Green Team, and his Energy Department.

Todayâ... s Green Corruption File will connect the dots as to Center for American Progressâ... part in this scam, while shedding light on old and new data. As I *progress*, Iâ... I'll expose its alternative energy advocacy as well as its funders â... â... corporate donors that were kept secret until their release in late 2013 â... â... **with those in the renewable energy business (at least 17) cashing in at the Green Bank of Obama.**

Letâ... s go back in time when Podesta â... â... former chief of staff to President Bill Clinton â... â... was *infamous* for what is dubbed â... [Project Podesta](#)â... : â... This was a system that enabled the Clintons to push through unpopular policies that neither Congress nor the American people wanted. Its implementation marked a dramatic tilt in the balance of power, giving the executive branch an unprecedented ability to force its will on

the legislative branch,â... documented DiscoverTheNetworks.com.

Most know that in 2003, Podesta founded CAP, which as mentioned, is organization funded by billionaire George Soros, who has a [massive footprint](#) inside this green corruption scandal. He then served as the organizationâ... s president and CEO, of which it was [reported](#), â... Podesta was hand-picked for the job by CAP co-founders Soros and Morton H. Halperin.â...

In 2008 and early 2009, Podesta, an Obama bundler, while still at CAP, [ran](#) Obamaâ... s transition team as the co-chair [along side](#) Valerie Jarrett and [Peter Rouse](#). Meanwhile by 2011, Podesta stepped down from his CEO role and [became the](#) Chair of CAP and the CAP Action Fund â... â... only to leave CAP and join the White House at the end of 2013 in his new role as Obamaâ... s â... [executive power czar](#).â...

But if you go back to right after the Republican 2010-midterm victory, Podesta already had a plan: â... The president should bypass Congress and wield the executive powers of his office,â... [reported](#) Bloomberg last December. In fact, â... Podesta had compiled 47 pages of proposals for unilateral action on issues from immigration to solar energy.â... Podesta even [wrote the foreword](#) for that [CAP report](#) â... on *how* the president could use his executive authority to advance a progressive agenda, including actions to unilaterally force the U.S. economy to become greener.â...

Furthermore, Podesta has served as an Independent Advisory Council [member](#) of the notoriously corrupt community organization [ACORNâ...](#). Podesta was also on the board of the Apollo Alliance as late as 2011. While Iâ... ve unleashed the Apollo Alliance (now BlueGreen Alliance) and [their](#) part inside this massive clean-energy scam, Iâ... ll briefly touch upon them again today. But whatâ... s key here is that Apollo is [another](#) Soros-funded left-wing organization, who along with its â... [green jobs radical network](#),â... exerts powerful influence on the views and policies of the Obama administration â... â... and they too were involved in drafting the 2009-Recovery Act.

CAPâ... s Left-wing Billionaire George Soros: Obamaâ... s â... agent of greenâ...

Meanwhile, [Soros](#) is one of the 2009 stimulus authors that [I had covered](#) in October 2013: Those individuals and groups that were involved in crafting the clean-energy sector of the [2009 Recovery Act](#), and who ultimately financially benefited directly (and/or their invested firms, family or friends) from the \$100 billion that [was earmarked](#) for renewable energy.

According to Peter Schweizerâ... s blockbuster 2011 bestseller [Throw Them All Out](#):

Billionaire George Soros gave advice and direction on how President Obama should allocate so-called â... stimulusâ... money in a series of regular private meetings and consultations with White House senior advisers even as Soros was making investments in areas affected by the stimulus program.

While we know that early on, [Soros had visited the White House](#) on at least five occasions since Barack Obama became president, possibly more, Schweizer gives specifics, â... Mr. Soros [met with](#) Mr. Obamaâ... s top economist, [Larry Summers â... â... also a CAP fellow] on February 25, 2009 and twice more with senior officials in the Old Executive Office Building on March 24th and 25th as the stimulus plan was being crafted. Later, Mr. Soros also participated in discussions on financial reform.â...

As documented by Schweizer, â... In the first quarter of 2009, [Mr. Soros went](#) on a stock-buying spree in companies that ultimately benefited from the federal stimulus,â... including twelve alternative energy and utility companies. Moreover, if we add in other Soros green energy investments that bagged â... greenâ... funds, we can confirm that this Soros is connected to at least \$11 billion from the Green Bank of Obama, the majority from the 2009-Recovery Act.

Due to the fact that Soros is a well-known donor to CAP, hereâ€¦ s a sneak peek of what I personally tracked in my [March 2013 Green Corruption File](#), exposing how this left-wing billionaire not only bankrolled Obamaâ€¦ s 2008 and 2012 campaigns, but cashed in on the stimulus bill that he helped craft. Interestingly, four of these companies are also CAP corporate donors (marked with an asterisks), which will be detailed later.

- **Brookfield Asset Management ([BAM](#))**: As documented in the March 20, 2012 House Oversight [report](#) on the DOEâ€¦ s disastrous loan program, â€¦ George Soros and Martin J. Whitman, both prominent Democratic donors, are both heavily invested in Brookfield.â€¦ In September 2011, The Granite Reliable wind project [was awarded](#) \$168.9 stimulus loan, which is owned BAM. Then on May 23, 2012, they also snagged a \$56 million [1603 stimulus grant](#) for â€¦ wind in New Hampshire.â€¦ While there are [additional ties](#) to this wind deal that Iâ€¦ ll highlight later when I get to Heather Podesta (super lobbyists sister-in-law of John Podesta), whose firm [Heather Podesta & Partners](#), from 2009 until 2012, served as [lobbyists](#) for BAM.
- **First Solar***: Through various fund, and as early as 2007, Soros invested in First Solar â€¦ â€¦ the big solar company that is tied to \$3 billion of the 1703 DOE stimulus loans, including one project that was sold to NRG Energy â€¦ â€¦ another Soros timely investment.
- **SolarCity**: In February 2012, the Private equity firm Silver Lake Kraftwerk [invested in SolarCity](#) â€¦ â€¦ whereas in early 2011, Silver Lake [had launched](#) a clean energy fund in collaboration with billionaire Soros and Cathy Zoi (former DOE Insider). SolarCity, which will be detailed later, so far (and since 2009) has been subsidized with â€¦ greenâ€¦ through various stimulus funds, grants and federal tax breaks at the tune of \$514 million.

Sorosâ€¦ Twelve â€¦ Stimulusâ€¦ Green Energy Stock-Buying Spree:

1. **NRG Energy and its subsidiaries**: Initially won \$5.2 billion in 1705 stimulus loans for four projects and at least 65 grants that total over \$363 million of taxpayer money with 37 unaccounted for. Plus much more green energy funds through various alliances.
2. **American Electric Power (AEP)***: at least four stimulus grants totaling \$740 million. Plus, more detailed later.
3. **Ameren**: five stimulus grants totaling about \$672.5 million
4. **FirstEnergy Solutions**: at least two stimulus grants totaling just over \$71 million. No cash that I could find for BioFuel Energy benefited when the EPA announced a regulation on ethanol.
5. **Constellation***, an Exelon Company: at least one grant worth \$200 million stimulus grants and Constellation is one of the most prolific providers of green energy to federally owned facilities.
6. **Covanta Energy***: unclear as to how many green government subsidies or the exact dollar amount, but obviously Covanta stands to benefit from the NAT GAS Act if it comes to light again. And what about those [Congressional earmarks](#) Schweizer found?
7. **Edison International**: at least two stimulus grants worth \$64.6 million, and Iâ€¦ m sure there are moreâ€¦ !
8. **Entergy**: Iâ€¦ ve only tracked two small stimulus grants, which add up to close to \$10 million
9. **PPL Corporation**: I found one stimulus grant at \$19 million
10. **PSEG**: one stimulus grant for \$76 million.
11. **Powerspan Clean Energy Technology**: one large stimulus grant worth \$100 million

Mr. & Mrs. Podesta the Super Lobbyists: Strike â€¦ greenâ€¦ gold

In my [June 2013](#) Green Corruption File, I briefly addressed John Podesta, but more so profiled his brother, Tony Podesta â€¦ â€¦ dubbed â€¦ TheLobbyistâ€¦ by *Newsweek*, and the founder and Chairman at the Podesta Group, which he [started](#) with his brother John in 1987.

Even though [news hit](#) in early 2013, that Heather and Tony Podesta, the married super lobbyists separated, they are both (via different firms) tied to numerous Obama-backed clean-energy deals.

As [documented by](#) the Center for Responsive Politics, youâ I find that the [Podesta Group](#)â s lobbying income went from \$16,070,000 in 2008 to \$25,780,000 in 2009, and has since significantly increased. Their client lists (past and present) includes large corporations such as Bank of America, BP America, and General Electric (GE aviation), General Motors, and Google (Computers/Internet) â â all in the green energy business, with BofA, GE and Google also CAP donors that won green energy funds from the Obama administration.

CH2M Hill

Nevertheless, there are quite a few others, of which [in 2009](#), the Podesta Group took on as clients that stand out â â those that ultimately won a significant amount of stimulus funds, starting with CH2M Hill that [received](#) \$1.3 billion for the clean up at the Hanford Nuclear Reservation. The details on this special stimulus earmark can be found in my June 2013 â [Nuclear Crimes and Misdemeanors](#)â story, which highlights not only the cronyism and corruption, but the fact that in June 2013, CBS News [reported](#) that this costly project has been plagued with problems, â delays and billions over budget.â

SolarReserve

SolarReserve got special treatment from the Department of Interior (DOI) for their [Crescent Dunes Solar Energy Project](#) located in Tonopah, Nevada, which received a [\\$737 million](#) DOE stimulus loan. SolarReserve also snagged stimulus grants, yet the amount is unknown. This large DOE deal (another non-grade investment) was announced on [May 19, 2011](#), and despite those inside the Energy Department that wanted to â kill the transaction,â it was [finalized](#) on September 28, 2011. Along the way, it included â relentless assistanceâ by the Majority Leader Harry Reid as well as some drama. Not to mention, SolarReserve, a [predominately](#) Democrat donor, [executives](#) had given to Reidâ s campaign since 2008.

Needless to say, there are more SolarReserve investors in the mix that can be found in my [November 2013 Green Corruption File](#): â Underneath Senator Harry Reidâ s Clean-Energy Dirt: Career politician directly linked to over \$3 billion in green energy stimulus loans.â One of the key connections to this deal is Citigroup, who has been a major investor in SolarReserve since 2008, which is chronicled in my February 2013 post, â [Citigroupâ s Massive â Greenâ Money Machine](#).â Still, since Citigroup is also a CAP corporate donor, weâ I dig deeper later.

General Motors & the Chevy Volt

General Motors (GM) â â the failed Big Auto company that was [bailed out](#) by taxpayers in 2009 â â was a client of the Podesta Group [from 2010](#) until 2012. GM was also a [CAP donor](#) in 2011, and a big recipient of stimulus money. Starting in 2009 until recently, they have bagged hundreds of millions of stimulus dollars (I tracked \$471.6 million so far) to support the Chevy Volt as well as green car components, of which Iâ I get more specific when I dissect CAPâ s corporate donors.

Duke Energy

Duke Energy, the nationâ s largest electric power company, is another CAP corporate donor, which has been a client of the Podesta Group since 2009. Whatâ s interesting here is that Jim Rogers, the chairman of Duke Energy is another Obama donor, and was a [major player](#) at the 2012 Democratic convention, as a contributor, creditor, host, and a speaker. Duke Energy won hundreds of millions of green energy money for various projects, which will be detailed later.

Progress Energy

From 2011 to 2012, the Podesta Group added Progress Energy, which in 2009, [won](#) a \$200 million smart-grid stimulus grant. Progress Energy is a [customer](#) of Silver Spring Networks that is a [Foundation Capital](#), Kleiner Perkins, and Google [investment](#) â... â... all with friends and ties to the Obama White House that will be documented a few times in the post.

SolarCity & SunEdison

Additionally, in 2012, the Podesta Group added SolarCity and SunEdison to its list of clients â... â... both members of ACORE, the renewable energy [lobby powerhouse](#) that helped â... design the Department of Energy grant programs that partly offset the loss of tax equity financing arrangements. â... This is part of the green corruption story that I chronicled in my post, â... [The RAT in the Recovery and the Gang of Ten](#). â...

Founded in 2006, [SolarCity](#) has a string of connections to the Obama White House that I â... ve been tracking and reporting on for some time, including billionaire players that received taxpayer money for other green energy deals, such as Elon Musk, [Nicholas J. Pritzker](#), and George Soros. Throw in other stimulus winners like Al Gore â... s firm Generation Investment Management ([early investor](#) and [major stockholder](#)) as well as Obama â... s Wall Street buddies: Goldman Sachs, [Bank of America](#), and [Citigroup](#). In between, SolarCity has developed partnerships with [PG&E](#), and [Google](#). But before Podesta came along in 2012, SolarCity had been an energy client of top D.C. lobbyist McBee Strategic Consulting, since 2009 â... â... another [major green corruption villain](#) that I tackled in September 2013.

Nevertheless, Fox News [reported](#) in December 2012, when SolarCity was under a federal probe that they had applied for \$341 million in grants. However, I found 33 federal stimulus grants [from the 1603 Program](#) that were awarded to SolarCity and [USB SolarCity Master Tenant](#) in 2011 and 2012, ranging across 15 states, totaling over \$92 million.

MARCH 9, 2013 SolarCity UPDATE: Right after this publishing this post, it was brought to my attention that SolarCity, whose success is dependent on government handouts, has received additional green energy subsidies, which places their total at \$514 million.

According to [California Watchdog.org](#) â...!

SolarCity has accepted more than [\\$11 million in federal stimulus funds](#) [from September 2009 to March 2010] to make its business run. But the real public support appears elsewhere. Because SolarCity technically owns the energy systems it installs, SolarCity â... not the homeowner â... earns the federal taxbreak intended as an incentive to go solar. So far the company has earned [\\$411 million in such tax breaks](#). The company also may earn additional income on state subsidies.

Meanwhile, SunEdison, a global provider of solar-energy services, was an early [Goldman Sachs](#) clean-energy investment â... â... Goldman, another CAP donor, and huge winner from the Green Bank of Obama that I â... ll get to much later. But we can confirm that SunEdison, in 2013, won 5 federal stimulus grants [from the 1603 Program](#) for â... solar electricity â... that ranges across 5 states, totaling over \$1.8 million tax dollars.

Granite Reliable / Brookfield Renewable Power

On the other side, there is Granite Reliable that [received](#) a \$168.9 million stimulus loan in September 2011 for a wind project in Coos County, New Hampshire. Then on May 23, 2012, they also snagged a \$56 million [1603 grant](#) for wind in New Hampshire, which I am assuming is the for the same project. Work on Granite Reliable â... s wind farm created 198 construction jobs and six permanent jobs.

Nancy Ann DeParle, President Obama's former Deputy Chief of Staff for Policy in the White House, had a [financial stake](#) in the success of Granite Reliable, due to the fact that she and sat on the Board of Directors for Noble Environmental Power, LLC, which owned Granite Reliable.

Obviously, this is a conflict of interest, but there are [additional ties](#) to this wind deal. Noble sold Granite Reliable in December 2010 to [Brookfield Asset Management](#) (BAM), just 6 months prior to the conditional approval (June 2011) of the DOE loan guarantee and deep into the application process. Despite the [speculative credit rating](#), this loan was finalized in September 2011.

Not only was Brookfield Renewable Power ([a subsidiary of BAM](#)) represented by Citigroup as [lead advisor](#) during the loan review process, BAM has additional Democrat ties such as Diana Taylor, former New York City Mayor Michael Bloomberg's long-time girlfriend. As mentioned earlier, George Soros and Martin J. Whitman, which are both prominent Democratic donors, are both heavily invested in Brookfield.

But this case [directly hits](#) the Podesta family, because from 2009 until 2012, Heather Podesta, sister-in-law of John Podesta, via [Heather Podesta & Partners](#) served as [lobbyists](#) for BAM and they've been lobbying on behalf of [Brookfield Power](#) (electric utilities), since 2011, raking in over \$1.3 million from the two connected groups.

Southern Company

Mrs. Podesta's firm also represented [Southern Co.](#) from 2008 until 2010, raking in over \$300,000. This energy giant is part the [Vogtle Project](#), which in February 2010, won a massive [DOE loan](#): a conditional commitment for \$8.33 billion to support the construction of the nation's next generation of advanced nuclear reactors. Despite the project's [troubles](#) coupled with harsh [criticism](#), the Obama administration [just finalized](#) this DOE deal.

Southern Company is a heavy hitter lobbyist and big donor to both political parties and [bankrolled](#) President Obama's 2013 Inauguration. And due to the fact that this was another DOE loan approval that was *pressured* by the White House (this one in December 2009), further Intel is found in my [July 2013 Green Corruption File](#), Nuclear Disaster: \$10.33 billion in energy loans pressured by the White House and POTUS approved, now at risk.

Center for American Progress: The green pusher

While CAP [characterizes](#) itself as an independent nonpartisan educational institution dedicated to improving the lives of Americans through progressive ideas and action, [according to](#) left-leaning Huffington Post, they've been a vocal voice for this president's policies in the media and on the Hill. But their area of highest visibility is advocacy for a clean-energy economy where John Podesta has personally led the effort.

Of course, as a strong proponent of alternative energy, CAP has also been a big backer of the Energy Department's huge multi-billion-loan guarantee program for renewable energy projects a government program, of which the [stimulus law](#) added \$16 billion in lending power (the DOE's junk bond and cronyism [portfolio](#)), where we find that many of CAP's corporate donors have cashed in big time.

We also know that [according to](#) the Washington Free Beacon, in September 2008, CAP authored a [report](#) titled Green Recovery: A Program to Create Good Jobs and Start Building a Low-Carbon Economy that included many recommendations ultimately incorporated into President Obama's controversial \$800 billion stimulus package. But CAP is not done: since the president released his [Climate Action Plan](#) in June 2013, CAP continues to [pressure](#) for additional *action*, including, but not limited to, rejecting the Keystone XL pipeline and a call to dole out [billions more](#) in renewable energy funds.

[CAP](#), the progressive think tank with [deep rooted ties](#) to the Clintons, has been on my radar since 2010, and periodically mentioned throughout my work. As noted already, they are [closely aligned](#) with, and have a major foothold [inside](#) the Obama White House. This is not limited to the new CAP additions: [Denis McDonough](#), White House Chief of Staff and Obama's new advisor, John Podesta.

What's been forgotten is that a squadron of CAP experts worked with President Obama's transition team, and they have been reportedly [highly influential](#) in helping to craft White House Policy. In 2008, [Edwin Chen](#) of Bloomberg, in his article, "Soros-Funded Democratic Idea Factory Becomes Obama Policy Font," noted CAP, which has 180 staffers and a \$27 million budget, devotes as much as half of its resources to promoting its ideas through blogs [ThinkProgress and the Wonk Room], events, publications and media outreach.

In fact [CAP boasts](#) of John Podesta's part: "Podesta served as co-chair of President Barack Obama's transition, where he coordinated the priorities of the incoming administration's agenda, oversaw the development of its policies, and spearheaded its appointments of major cabinet secretaries and political appointees."

In addition to Podesta as the co-chair, at least 10 other CAP experts were advising the incoming administration, including Melody Barnes (Obama bundler), the center's executive vice president for policy who co-chairs the agency-review working group and Cassandra Butts, the senior vice president for domestic policy, who is now a senior transition staffer, reported Bloomberg.

What has not been widely disclosed is CAP's *dark* participation, other than their recommendations inside the stimulus package, whereas as noted, \$100 billion was earmarked for renewable energy. Hidden deep inside the 1,073-page stimulus bill, which was [drafted by](#) the Obama transition team and congressional aides, was a RAT: an attempt to suppress potential investigations, and only a few news outlets caught it in February of 2009: the [Washington Post](#) and the [Washington Examiner](#), and completely exposed in my Green Corruption File entitled, "The RAT in the Recovery and the Gang of Ten."

Entitled the [Obama-Biden Transition Project](#), it employed approximately 400 people and it was comprised of Obama bundlers and campaign contributors as well as lobbyist and those that operate inside Washington's egregious revolving door. What's more fascinating to point out is that [according to](#) the Center for Responsive Politics, "Members of Barack Obama's presidential transition team weren't necessarily selected solely on their resumes and expertise... some may have scored positions over similarly qualified individuals because they supported the president-elect by bundling money for his presidential campaign or opening their own wallets to him."

Five CAP Fellows at the Center of the green

More relevant to green corruption is that this lengthy list provides us with some familiar members operating inside this clean-energy scam, which of course, were also bundlers for Obama's 2008 campaign. [even bundling again](#) in 2012. Even though, in October 2013, I gave insight into the Obama-Biden Transition Team and the numerous green energy players, here's an overview with the CAP fellows marked with asterisks:

1. Valerie B. Jarrett (Obama bundler): Obama-Biden Transition Project Co-Chair
2. *John Podesta (Obama bundler): Obama-Biden Transition Project Co-Chair / Now Executive Power Czar
3. *Carol M. Browner (Obama bundler): Advisory Board Member and Energy Policy Working Groups / Was promoted to Climate Czar, from January 2009 until February 2011
4. Michael Froman (Obama bundler): Advisory Board Member
5. TJ Glauthier (Obama bundler): Executive Office of the President

6. Lisa Jackson (Obama bundler): Energy and Natural Resources Team Leads
7. David Sandalow (Obama bundler): Energy Policy Working Groups
8. *Steve Spinner (Two-time Obama bundler): Technology, Innovation & Government Reform Policy Working Groups / Was promoted to DOE Advisor in April 2009 until September 2011
9. Tom Wheeler (Two-time Obama bundler): Working Group Members; Science, Tech, Space and Arts Team Leader
10. Heather Zichal (Obama bundler): Energy Policy Working Groups

Add to this list two more CAP fellows: Lawrence Summers, who, in late 2008 (until 2011), [became](#) President-elect Obama's Director of the National Economic Council and Van Jones, who in March 2009, [was appointed](#) as a special adviser for green jobs for the Obama White House, until he resigned in September 2009. This means that we have five CAP fellows that I'll profile below.

Obviously, operatives from this team were rewarded with positions inside the Obama White House, while others in 2009, snagged other key green energy roles. My focus has been on the DOE Insiders and those from Obama's [Green Team](#) and his Energy Department [officials](#) and advisors, which included its fair share of Al Gore disciples and well-connected [Venture Capitalists](#). There has been a dozen on my radar that are either directly connected to tens of billions of green-government subsidies (loans, grants and special tax breaks), or helped their friends secure the funds.

Ironically, [many have fled](#) since their 2009 appointments, but it's worth noting that the DOE Dirty Dozen, under Energy Secretary Stephen Chu, includes Carol Browner (1), Lisa Jackson, Van Jones (2), Steve Isakowitz, Steve Spinner (3), Matt Rogers, Jonathon Silver (4), Cathy Zoi (5), Kristina Johnson (6) and others like James Markowsky (7), Steven Westly (8), Sanjay Wagle (9), David Danielson (10), David Sandalow (11), David Prend (12) another piece of this scandal currently in the works.

What's telling is that these DOE Insiders were part of the decision making process, even as the rest had access influence in one way or another. They were in charge of picking winners and losers, especially in regards to the Energy Department's multi-billion Loan Guarantee Program, mentioned many times in this post, whereas I have personally been tracking since 2010.

What we find is that many of those operating inside the Energy Department had more sinister roles and were using tactics such as lobbying, pressure, collusion, and coercion. The evidence of this started circulating in 2011, when the Solyndra Saga broke, but worse, was confirmed in many of the DOE email exchanges released to the public since that time, which includes the massive 2012 Internal DOE Email Dump that was unleashed in late October of that year.

These correspondences [basically prove](#) that the president, the White House, Secretary Chu, and certain DOE officials lied about how they handled the green energy loans on various fronts which was followed by secrecy, cover-ups and even perjury.

In November 2012, Marita Noon and I [began unleashing](#) the content of these email interactions, of which we found plenty of references to the president, POTUS, the White House, the 7th floor, and the Hill. More disturbing is that contrary to House Oversight testimonies by DOE officials, those inside the DOE were rushing the approval of the DOE loans a fast track process imposed at the POTUS level, yet they were met with resistance by the Treasury as well as the Office of Management and Budget ([OMB](#)), amongst others involved in the deal making process.

As it turns out, these emails reveal that many of the DOE loans were rushed and approved for political reasons â... â... visits, speeches, announcements, photo ops, and talking points for the president as well as for the purpose of helping those connected to the companies seeking the loans â... â... CEOâ... s, investors, and Democrat politicians, which goes beyond [subsidizing Nevada companies](#) in order to help Senate Majority Leader Harry Reid win his 2010 reelection campaign.

These bombshell emails also expose the cozy relationships DOE officials and advisors had during the loan review process with loan applicants and their CEOâ... s, lobbyists, and investors, etc. Itâ... s no surprise that they had meetings and calls with DOE officials and Energy Secretary Chu, but there are documented meetings and calls with the president, VP, and WH as well as plenty of â... green fraternizingâ... going on â... â... bike riding, coffee meetings, sleepovers, â... beer summits, â... Al Gore parties, dinners, Democrat fundraisers, and so on.

NOTE: â... 2012 Internal DOE Email Dumpâ... is in reference to the House Oversight huge document dump that was [unleashed](#) in October 2012 (see [Memorandum](#), [Appendix I](#) and the [350+ page Appendix II](#)), and due to its value, will be sourced many times in this report.

Today weâ... ll stay focused on Center for American Progress, starting with the fact that other than John Podesta, we have Valerie B. Jarrett: Presidentâ... s Obamaâ... s longest serving advisor and confidante, of which some refer to her as the â... [shadow chief of staff](#).â...

While Podesta is directly tied to CAP, Ms. Jarrett has an indirect connection: Prior to joining the Obama administration as [Senior Advisor](#) and assistant to the president, she [served as](#) Vice Chairman of The [Joyce Foundation](#) (Obama sat on the board 1994 to 2002), the Chicago-based organization, who is a major donor to radical environmentalist and conservation groups [as well as](#) progressive movements like CAP.

This was part of the climate scam that not involves many green corruption suspects, but leads to [cap-and-trade](#), of which I began to [unravel](#) in 2010, and [what I refer to](#) as the â... pot of gold at the end of the climate rainbowâ... â... â... warning that with so much at stake, even if the planet blows up, they will get their cap-and-trade, or a version of it.

Jarrett, also in September 2009, hosted a â... [Clean-Energy Summit](#)â... where an array of attendees just so happened to â... collectively strike goldâ... with over \$5.3 billion in taxpayer funds from the Green Bank of Obama. We also know that internal emails showed (released in 2011) that [deliberations on Solyndra](#) â... â... the first DOE loan to go bad and scream corruption â... â... â... reached into Obamaâ... s inner circle, including senior adviser Valerie Jarrett and former chief of staff Rahm Emanuel.â...

Additionally, we can confirm via the â... 2012 Internal DOE Email Dumpâ... that Ms. Jarrett had a December 7, 2010, meeting with â... the CEOâ... s of NRG and Reliant.â... NRG Energy (a Fortune 500 and S&P 500 Index company) and its subsidiaries (Reliant is one) [was the recipient](#) of most of junk-rated stimulus loans, which includes NRG Solar for the Agua Caliente project (\$967 million); NRG Solar for the California Valley Solar Ranch (\$1.2 billion); BrightSource Energy Ivanpah project (\$1.6 billion); and Prologis for Project Amp (\$1.4 billion).

NRG Energy is one of those twelve timely Soros investments that I alluded to earlier (along with additional Obama administration connections) that snagged \$5.2 billion in loans and a truck load of grants as well as other cleantech funds from the Green Bank of Obama. But it is the highly paid [president and CEO](#) (since 2003) David Crane ([stock owner](#) and an [aggressive pusher](#) of clean energy) who appeared to have significant influence. [During the course](#) of the June 2012, House Oversight hearing, Crane admitted that between the Bush administration and the Obama administration, he had visited the White House â... 14 to 15 times, â... of which 6 to 7 of his visits were with the Obama White House.

Lawrence Summers: *Currently listed as a Distinguished Senior Fellow at Center for American Progress*

- Former Director of President Obama's National Economic Council ([designated](#) on November 24, 2008 to 2011)
- Former Secretary of Treasury under President Bill Clinton (from [1999 to 2001](#))

It's worth noting that back in the day (November 2008), President-elect Barack Obama rolled out his National Economic Council (NEC), and installed an economic czar, [Larry Summers](#) (not subject to pesky confirmation hearings), who had served as Robert Rubin's [protégé](#) at Treasury. Rubin, on the other hand, who had spent 25 years at Goldman Sachs before serving as Secretary of Treasury under the Clinton administration ([1995-1999](#)), after his government stint went to Citigroup as a [Senior Counselor](#), only to retire in January 2009. However, what's not widely known is that behind the scenes [during Timothy Geithner's time at Treasury], Rubin was still wielding enormous influence in Barack Obama's Washington, [documented](#) POLITICO.

What's worth pointing out again is that Summers' private memos to Obama, which were released by [The New Yorker](#) in early 2012, revealed the real intent behind the economic stimulus bill. American Enterprise Institute [reported](#), "A key source for writer Ryan Lizza is a [57-page, Sensitive & Confidential memo](#) written by economist Summers to Obama in December 2008, which exposed 11 stunning revelations from Larry Summers' secret economics memo to Barack Obama. One in particular was that the stimulus was about implementing the Obama agenda and rewarding his green cronies.

The short-run economic imperative was to identify as many campaign promises or high priority items that would spend out quickly and be inherently temporary. The stimulus package is a key tool for advancing clean energy goals and fulfilling a number of campaign commitments.

Summers, a [Distinguished Senior Fellow](#) at CAP, has significant ties to Wall Street, which if you've been paying attention, they ensured an Obama victory in 2008. Prior to Summers heading to the Obama White House as top economic advisor, he had an [elaborate gig](#) where he worked just one day a week while making \$5.2 million in two years at D.E. Shaw, a New York-based [\\$39 Billion Hedge Fund Giant](#). According to the *Wall Street Journal*, Summers received hundreds of thousands of dollars in speaking fees from major financial institutions, which included frequent appearances before Wall Street firms including J.P. Morgan, Citigroup, Goldman Sachs and Lehman Brothers.

What's significant is that both Goldman Sachs and Citigroup (profiled later) are corporate CAP donors that either won billions in green energy funds, or made money off of the deals that occurred. And, the majority of the deal making came from the now \$32 billion Energy Department [Loan Guarantee Program](#), with the majority of the loans awarded and finalized between 2009 and September 2011. This is the same program that, as mentioned earlier, has been pushed and promoted by Center for American Progress for some time.

During Summer's time inside the Obama White House, it's unclear how involved Summers was in the loan program decision making process, but we can confirm via the 2012 Internal DOE Email Dump that he was part of a scheduled January 2010 meeting with Jonathan Silver (head of the Loan Program at the time), a few DOE officials, and Carol Browner, the latter another CAP fellow that will be profiled next.

Nearly a year before [Solyndra](#) went bankrupt and engulfed the White House in scandal, President Obama's top economic advisors [Summers and Timothy Geithner] warned him about the risks of the clean-energy loan program that granted the solar company more than a half-billion dollars, [as reported](#) by the Business Insider in September 2011.

Needless to say, Solyndra was only one of the [22 junk loans](#) awarded by the Energy Department's \$16 billion stimulus program - a program where we find that Summers is directly tied to one of those DOE deals, while his buddy David Shaw, a two-time Obama bundler, had an invested interest in more.

Mr. Shaw is the founder of D.E. Shaw, where Summers worked before joining the Obama White House, and a firm that is connected to at least two renewable energy companies that snagged billions in DOE stimulus loans: First Wind and First Solar that are also CAP corporate donors, which will be expanded upon later. First Wind was the winner of a \$117 million DOE stimulus loan, plus hundreds of millions in stimulus grants, of which, [according](#) to Peter Schweizer, - Larry Summers was part owner of First Wind. Meanwhile, First Solar won three large stimulus loans, totaling over \$3 billion of taxpayer money - not to mention additional green energy funds.

Carol M. Browner: *Founding member of Center for American Progress and currently a Senior Fellow*

- Currently on the Advisory Committee of the Export-Import Bank of the United States
- Headed the Office of Energy and Climate Change Policy (AKA Climate Czar), from January 2009 until February 2011
- Obama-Biden 2008-Transition Team role: Advisory Board Member and Energy Policy Working Groups
- 2008 Obama Bundler

[Browner](#), a career Washington insider, who directed the Environmental Protection Agency (EPA) during the Clinton administration, is an Al Gore acolyte, and an [environmental extremist](#) with a few left-wing radical ties on her secret resume. While Browner worked for Gore as far back as 1988, at some point (between 2007 and 2009), [she served](#) as a board member of the Gore's Alliance for Climate Protection - which, in July 2011, was morphed into - [The Climate Reality Project](#). From what I gather, this was the result of merging two environmental groups: The Alliance for Climate Protection and The Climate Project, which were both founded in 2006 by Al Gore.

Browner was also a 2008 Obama bundler and part of the Obama-Biden Transition Team, who was later appointed to the president's 2009 [Green Team](#) as the - climate czar, - only to [abruptly resign](#) in early 2011.

Prior to her tenure at the Obama White House, Browner was a founding board member (from 2003-2008) for CAP, and she is currently listed as a [Senior Fellow](#). Browner, [not only](#) - pushed for billions of dollars for renewable energy in the economic stimulus bill, - she was part of the decision-making process inside the Energy Department's [Loan Guarantee Program](#), which at the time of her departure had doled out \$34.7 billion of taxpayer money. Browner [is implicated](#) in an array of issues surrounding these loans, as reflected in many of the DOE email exchanges released to the public since 2011, as well as the - 2012 Internal DOE Email Dump.

With such deep connections to the former-Vice President Al Gore, and his climate mission, one wonders why Gore and his investment firms - Kleiner Perkins and Generation Investment Management - raked in so much of the DOE money under her watch. As of January 2013, I tracked that these two firms combined are tied to at least \$10 billion (more if you add in Silver Spring Networks and the fact that their - customers - raked in \$1.3 billion in smart-grid stimulus grants), from the taxpayer-funded Green Bank of Obama, the majority coming from the 2009-Recovery Act - the stimulus bill (renewable energy part) that Doerr helped author, while Browner pushed to include taxpayer money.

Browner may have left her â... climateâ... post, but she currently sits (and has for a while) on the Advisory Committee of the Export-Import Bank of the United States (Ex-Im), another means where our government dishes out billions of American taxpayer dollars in support of clean energy.

â... The Ex-Im Bank uses [taxpayer money](#) to backstop politically favored projects, which â... just greases the wheels of the powerful and often corrupt big Washington Establishment, â... [wrote](#) Heritage Action. This is another â... green bankâ... that not only supports [other Nations](#), but where you â... find corporate welfare and crony capitalism run amok, which includes quite a number of the president's favored firms: Abengoa, First Solar (Exelon Corp.) and SolarWorld, to name a few.

As [recently as](#) October 2013, at a [Washington, D.C. CAP event](#) (10th anniversary policy conference), Browner had this to say about the Keystone Pipeline: â... There will be some twists and turnsâ... in the political debate over the pipeline, but â... at the end of the day [Obama] is going to say no, â... [reported](#) the Huffington Post. This was an event that besides Browner, featured other Big Green personalities such as Van Jones, Tom Steyer, John Podesta, Treasury Secretary Jack Lew, Secretary of State John Kerry, California Governor Jerry Brown, Chicago Mayor Rahm Emanuel, and of course, Al Gore.

Tom Steyer, *CAP Board Member and Donor, Climate Change Radical, Big Oil Investor, Obama Bundler and Billionaire Buddy*

At that event, Browner was [joined on a panel](#) with Van Jones, the former â... green jobs czarâ... â... â... also a CAP fellow (profiled next) â... â... along with environmental advocate Tom Steyer, who has been on an [anti-Keystone XL crusade](#) for some time. In fact, Jones has been on the record [slamming](#) the president's delay on denying the pipeline. Meanwhile, Steyer is the same hedge-fund billionaire and megabucks Obama bundler and Democrat donor that was also a Big Oil Investor through his former firm Farallon Capital Management that has an [invested interest](#) in the rejection of the pipeline.

Like most prominent Obama fundraisers, Steyer has enjoyed relatively easy access to the White House, and as of the summer of 2012, it was reported that he had met with senior White House officials in the West Wing on at least four occasions. Steyer was even handpicked to make a [cameo appearance](#) at the [2012](#) Democratic National Convention.

Additionally, Steyer, â... plans to spend as much as \$100 million during the 2014 election, seeking to pressure federal and state officials to enact climate change measures through a hard-edge campaign of attack ads against governors and lawmakers, â... [reported](#) the *New York Times* last month.

In September 2012, the *Washington Free Beacon* [documented](#) that Steyer â... is [reportedly](#) one of the backers of [Greener Capital](#), which invests in alternative fuel companies that benefit from the anti-oil policies of the Obama administration. â... What â... key to this Green Corruption file is that â... Steyer has donated at least \$1.4 million to the Center for American Progress (CAP) since 2009 through his TomKat Charitable Trust. As of 2010, he was listed as a director of the left-wing think tank. â...

In December 2013, The Beacon, in their piece â... [Keystone to the Kingdom](#), â... we find a stunning look at the relationship between Mr. Steyer and John Podesta: â... [Steyer](#) is on the board of the Center for American Progress, and in the early months of 2012 he and Podesta cosigned a *Wall Street Journal* op-ed, [â... We Don't Need More Foreign Oil and Gas](#), â... arguing against Keystone and for tax loopholes such as the Production Tax Credit, increasing the value of the green energy companies in which Steyer invested and on whose boards Podesta sat. â...

Moreover, while a slew of Democrats who oppose the Keystone XL pipeline, [stand to benefit](#) from its rejection, Farallon Capital Management â... has extensive holdings in fossil fuel companies â... including investments that could benefit from the blocking of the Keystone pipeline, â... [reported](#) *The Daily Caller* in

May 2013. One in particular stands out: â... Farallon also still holds stock in BPâ... â... â... the oil giant that [according to POLITICO](#) in 2010, Obama was the biggest recipient of BP donations over the past twenty years.â...

In case you didnâ... t know, British Petroleum, the oil and gas giant that in 2001, began re branding to Beyond Petroleum (BP), was heavily in the â... greenâ... business via [BP Alternative Energy](#) (biofuels, wind and solar). However, in the spring of 2013, BP switched gears and started [abandoning](#) renewable energy. Still, that was after BP had snagged millions in â... greenâ... funds from the Obama administration, of which [I began to unravel](#) in April 2013 due the fact that BP is in cahoots with Sempra Energy, the winner of a \$337 million DOE stimulus loan for the Mesquite Solar Project in Arizona. Also, BP, at that time, was part of [all five](#) of Sempraâ... s wind projects. BP Alternative Energy is also an [investor](#) in BrightSource Energy â... â... the winner of a [\\$1.6 billion DOE stimulus loan](#) that involves more CAP corporate donors and a slew of additional Obama cronies that Iâ... ll get to much later.

Van Jones: *Senior Fellow at Center for American Progress (it is unknown when Van first joined CAP, but we do know that he [rejoined](#) in February 2010)*

- Green Jobs Czar, from March 2009 to September 2009
- 2008 to 2009 Crafter of the Recovery Act: both personally and via the Apollo Alliance, as part of their National Steering Committee, where Van Jones was a board member from 2006 to either 2008 or 2009

As the story goes, Van Jones â... â... [left-wing radical](#), turned CNN contributor â... â... was handpicked to become Obamaâ... s â... green jobs czarâ... in 2009: â... We were so delighted to be able to recruit him into the White House,â... Senior Advisor Valerie Jarrett, stated on August 12, 2009. Mr. Jonesâ... advisory post at the White House was short lived due to his radical past and behavior, and in September 2009 he resigned, [blaming](#) it on a â... smear campaign of lies and distortions to distract and divide.â...

Nevertheless, Van is another very active CAP member where his focus remains on â... green-collar jobs.â... Heâ... s still a strong force in the midst of the climate change debate, pushing green jobs, as well as his [extreme](#) environmental ideology.

YOU can fight back and destroy dirty oligarchs!

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they have to cheat to compete. They cheat with political bribes, black-lists, character assassination attacks, collusion and other anti-trust violating acts.

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, LinkedIn, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says:

In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires.

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

I can't even with how insular and incestuous and corrupt SF is. Mayor [@londonbreed](#) acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEh1ulkyj>

â... Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after ***Five Trillion*** treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

YOU OWE IT TO YOURSELF AND THE NATION TO TAKE THEM DOWN!

YOU CAN WIPE THEM OUT, ALL BY YOURSELF, IN 100% LEGAL WAYS.

YOU CAN WIPE THEM OUT EVEN FASTER WITH CROWD-SOURCED FORENSICS AND ANTI-CORRUPTION AI SOFTWARE! JOIN THE REST OF THE PUBLIC IN AN EPIC ANTI-CORRUPTION EFFORT!

You must write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You can use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You can now use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU open your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds

- Every person named in the Epstein Pado book:
<https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
 - Every item in the Swiss Leaks that cross connects to their holdings
 - Every item in the Panama Papers Leaks that cross connects to their holdings
 - Every item in the WikiLeaks that cross connects to their holdings
 - Every item in the Snowden Leaks that cross connects to their holdings
 - Every sex trafficking incident that connects to each of them alone, and in groups
 - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
 - Every item in the Quest Leaks that cross connects to their holdings
 - Every tactical deployment, by a campaign financier, of the tactics listed in this manual:
<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
 - Every sex service that their credit card payments every connect too
 - Every real estate transaction that any name or company they, or their family, were involved in, tracks to
- and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "*Fuck You*" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

What To Do To Write Up The Dossier On Each Person And Each Corrupt Politician:

1.
 1. Dig through their trash and buy their trash bags from the garbage man after they pick them up
 2. Locate a beneficiary for a probate proceeding
 3. Research current and / or historical property holdings
 4. Identify mortgage information
 5. Identify secured lenders
 6. Identify related party property transactions
 7. Determine current market value of real property
 8. Locate bankruptcy filings
 9. Retrieve and analyze bankruptcy records
 10. Uncover improper relationships
 11. Locate federal civil lawsuits
 12. Locate federal criminal records
 13. Retrieve and analyze federal civil and criminal records
 14. Retrieve mug shots from arrest records
 15. Provide independent analysis
 16. Locate state and local criminal arrest records
 17. Retrieve and analyze review criminal records
 18. Provide peace of mind
 19. Locate home phone numbers
 20. Locate cell phone numbers
 21. Identify owner of home or cell phone number
 22. Determine owners of corporation
 23. Retrieve and analyze corporate records
 24. Locate current or former executives
 25. Interview current or former executives
 26. Find and retrieve judgment and lien filings
 27. Research familial history
 28. Connect the dots
 29. Locate witnesses for a civil or criminal lawsuit
 30. Interview witnesses for a civil or criminal lawsuit
 31. Find assets
 32. Find current or historical boat registrations
 33. Find current or historical aircraft registrations
 34. Search for hidden assets
 35. Conduct business intelligence
 36. Discreet intelligence gathering
 37. Determine connections between parties
 38. Locate bank account information
 39. Locate current or former employees of a company
 40. Interview current or former employees of a company
 41. Locate significant inheritances
 42. Show you the big picture
 43. Identify a will for an estate
 44. Locate probate records
 45. Identify foreign assets
 46. Locate regulatory records
 47. Identify regulatory actions
 48. Identify professional licenses

49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistleblowers
54. Vet expert witnesses
55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. Make you look brilliant
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Give you a competitive advantage
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the

#1 source of bribes

97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes
100. Write every federal agency and demand investigation and prosecution of the perps
101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
105. Go to their share-holder meetings and hand-out flyers about their corruption
106. Hire Charles Spies (<https://www.dickinson-wright.com/our-people/charles-spies?tab=0>) to sue them
107. Hire Harmeet K. Dhillon (<http://www.dhillonlaw.com>) to sue them
108. Hire COA (<http://www.causeofaction.org>) to sue them
109. Hire law firms from China or Russia to sue them for a very low price
110. Hire Steven S. Biss (<http://www.linkedin.com/in/steven-s-biss-6517037>) to sue them
111. Blog about the corruption of the political targets every day with the day's news each day
112. Read their divorce filings in court records and see who else might help expose their corruption
113. Read their locations over the last 12 months -
<https://www.protocol.com/government-buying-location-data>
114. Talk to every neighbor that has filed a complaint about them
115. Hire *Pierce Bainbridge Beck Price & Hecht LLP* to sue them, especially tech media companies
116. Re-read all of the latest "How To Be A Private Investigator" books and brochures
117. Ask Paul Kangas in San Francisco how he investigates the corrupt
118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them
119. Put a card table and a pop-up booth outside their office and hand out flyers about them
120. Publish every stock market share they, and their family, owns
121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm
122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...

Cleantech Investing Gets Its Day in the Sun As Congressional Insiders Pump And Dump Like Mobsters

By Zachary A. Goldfarb
Washington Post Staff Writer

Everybody seems to be looking for ways to make money on technologies that are said to reduce fossil-fuel emissions, wean the country from foreign oil and, generally, save the world. Venture capitalists have invested \$3.64 billion nationally this year in search of promising ideas in what they call "greentech" or "cleantech."

Locally, a few prominent venture capitalists have invested in the field. But they are wary about the bubble-like feeling that has taken hold across the country. Such investing has its own unique risks.

Backing Web companies or software companies often requires only a few million dollars. But investing in greentech can require lots of research and development, as well as buying factories to make the technologies. Environmental laws regulating the industry can change rapidly, or not at all, making it tricky to pinpoint the right moment to release a product.

Michael R. Steed, founder of the District's Paladin Capital Group, said many greentech companies are overvalued. With the president promoting investment in alternative energy and Congress preparing an energy bill that could shift an enormous amount of money into the area, Steed said, "everyone is running in saying because of what Congress is going to do, my company is worth three times what it was."

Still, Paladin is one of the Washington area's largest investors in greentech with four companies in its portfolio. Last month, it led a group of investors putting \$77 million in HelioVolt, an Austin firm.

HelioVolt builds thin solar panels made of a material known as copper indium gallium selenide that is said to produce the same amount of energy for almost half the cost of electricity, at 50 cents per watt, possibly enabling the widespread expansion of solar technology to buildings and homes. Silicon solar panels, which can cost \$2 per watt, have been the target of investments for three decades.

"The best deals we're seeing are deals which bring to the table disruptive technologies," Steed said.

Paladin, with former CIA and NSA directors on board, invests with homeland security in mind. For example, Paladin wants power to be distributed widely and stored where it's needed in cases of emergency, rather than at central power plants.

"It isn't that we'll just do anything in the alternative energy base," Steed said. "We want to support products and services that focus on distributed power as opposed to core power."

That kind of specialized approach to investing in greentech is typical of local firms. "It's a big and important space that investors are going to be looking at for many years to come," said Jonathan Silver, founder of the District's Core Capital Partners.

Core Capital was part of a \$35 million investment in Infinite Power Solutions, a Littleton, Colo., firm that is creating thin film batteries that the company claims significantly reduce the space that electronic devices need for batteries. By next year, Silver expects to have invested in three or four more cleantech companies.

Still, he sees risks.

Insider trading on green energy in Harry Reid, Nancy Pelosi and Dianne Feinstein offices

The Wall Street Journal [reported](#) about a staffer in Harry Reid's office who nearly doubled his \$3,500 investment in a renewable energy firm in 2008. Sen. Reid helped pass legislation that benefitted the firm.

Congressional Staffers Gain From Trading in Stocks

By

Brody Mullins,

Tom McGinty and

Jason Zweig

WASHINGTON— Chris Miller nearly doubled his \$3,500 stock investment in a renewable-energy firm in 2008. It was a perfectly legal bet, but he's no ordinary investor.

Reid's spokesman tried to defend the staffer, Reid's top energy policy adviser, by asserting that he had no influence over tax incentives for renewable energy firms.

Under federal securities law, of course, it is not important whether the staffer had any influence over legislation, Sen. Reid or anyone or anything else.

If it can be shown that the staffer breached a duty of confidentiality in using "inside information" as the basis for buying and selling the stock, then he may very well be guilty of the crime of insider trading.

In May 2009, the Associated Press reported,

Federal prosecutors and the FBI have been investigating possible illegal insider trading by two Securities and Exchange Commission enforcement attorneys who were in a position to receive sensitive information about agency probes of public companies.

Similarly, if the staffer had material information that the public didn't have and he took advantage of it in the buying and selling of securities, he could have committed a serious crime "as well as anyone he may have tipped off."

Reid's staffer has denied wrongdoing, but that should not be dispositive.

The Department of Justice, FBI and U.S. Securities and Exchange Commission ought to be investigating the staffer as well as any other potential insider trading violations described in the WSJ article.

At the very least, the staffer should be afforded the same opportunity as Martha Stewart to chat with federal investigators "that worked out so well for her."

Don't expect this to happen, however, as Sen. Reid and other members of Congress will no doubt quietly work to quash any investigation.

Big Brother Has Turned Green

The environmental movement has cultivated a warm and fuzzy public image, but behind the smiley-face rhetoric of "sustainability" and "conservation" lies a dark agenda. The Greens aim to regulate your behavior, downsize your lifestyle, and invade the most intimate aspects of your personal life.

In this stunning exposé, Steve Milloy unveils the authoritarian impulse underlying the Green crusade. Whether they're demanding that you turn down your thermostat, stop driving your car, or engage in some other senseless act of self-denial, the Greens are envisioning a grim future for you marked by endless privation.

Steamrolling nearly all opposition with its apocalyptic predictions of environmental doom, the Green movement has gained influence throughout American society--from schools and local planning boards to the biggest corporations in the country. And their plans are much more ambitious than you think, says Milloy. What the Greens really seek, with increasing success, is to dictate the very parameters of your daily life--where you can live, what transportation you can use, what you can eat, and even how many children you can have.

Citing the tactics and goals of Green groups as explained by their own activists and leaders, *Green Hell* demonstrates:

- * How Green pressure campaigns threaten the safety of your home and your car, and public health overall
- * Why the election of President Obama portends a giant leap forward for coercive Green policies
- * Why Greens obstruct the use of all forms of energy--even the renewable sources they tout to the public
- * How wealthy Green elites stand to profit fabulously from the restrictions and regulations they seek to impose on the rest of us
- * How Green pressure campaigns are hamstringing the military and endangering our national security
- * Why big business is not only knuckling under to the Greens, but is aggressively promoting the green agenda to the detriment of its own stockholders
- * What you can do to help stop the great Green machine

A one-of-a-kind, comprehensive takedown of the entire environmental movement, *Green Hell* will open your eyes to a looming threat to our economy, our civil liberties, and the entire American way of life.

'*Green Hell* explains why Americans can't afford to fall for Al Gore's 'the debate is over' line on global warming. While we're all for the environment, *Green Hell* explains why we need to oppose the environmentalists.'

--Fred Barnes, Executive Editor, the *Weekly Standard*

"*Green Hell* is the 'inconvenient truth' on extremist, growth-killing environmentalism. A must-read for those interested in keeping America free and prosperous."

--Steve Forbes, President and Chief Executive Officer of Forbes

"Regardless of whether you believe global warming is a fraud, the fact is that the current depression, the past spike in oil prices, and the coming technology of electric cars are all going to solve whatever problem exists. Liberals want to use climate change as an excuse to take over the economy and regulate everything and this book exposes their plans."

--Dick Morris, FOX News commentator and former political consultant to Bill Clinton

"This book describes why the world can't afford to fall for global warming alarmism and environmental hysteria. Steve Milloy shows how to avoid the environmentalists' vision of our future."

--VACLAV KLAUS, President of the European Union and President of the Czech Republic

"Free market capitalism is still the best path to prosperity. *Green Hell* is a must-read for anyone who wants to keep America on that path and away from Soviet-style command-and-control environmentalism."

--Larry Kudlow, Host, CNBC's *The Kudlow Report*

Former President Barack Obama liked to portray himself as a politician watching out for the little guy.

But it looks like he spent much more time protecting his rich friends â... and manipulating the government to help make them a fortune.

It was all part of a scheme that looks a lot like insider trading â... or what author Peter Schweizer calls â... smash and grab.â...

In his new book, *Secret Empires: How the American Political Class Hides Corruption and Enriches Family and Friends*, Schweizer lays out how Obama used government regulations to help lifelong pals buy up companies for pennies on the dollar.

Basically, the Obama Administration would threaten and devalue companies, and Obamaâ... s pals would be ready to swoop in and buy them on the cheap.

And apparently nobody ever stopped to consider the effect that this plot would have on ordinary shareholders â... who lost millions â... or the employees at the companies.

In an interview with Breitbart, Schweizer gives one shocking example â... the case of Marty Nesbitt, who has been described as Obamaâ... s â... best friend.â...

After Obama was reelected on 2012, Nesbitt set up a private equity firm called Vistria to invest in highly regulated industries â... in other words, industries that Obama and his administration can help control.

Schweizer points to Vistriaâ... s acquisition of online learning giant the University of Phoenix as an example of Obama and Nesbitt working together on a â... smash and grabâ... deal.

The Obama Administration had threatened to withhold GI Bill money from the University of Phoenix over the quality of its education, sending its share price tumbling.

Then, Nesbitt and Vistria were able to purchase the university for â... three cents on the dollar,â... Schweizer reports.

After the deal was made, the Obama Administration withdrew its threat to withhold federal funds.

Schweizer says Obama repeated the strategy throughout his presidency to enrich liberal billionaires like Tom Steyer and George Soros, who have both worked to ruin current President Donald Trump.

â... Barack Obama smashes coal companies, [and] what do these guys do? They go in, they buy them for pennies on the dollar, and when the regulatory weight is lifted, their valuations increase, and they make a lot of money, and you see that pattern in all of these industries,â... Schweizer said.

And what happens to other shareholders â... the ones who arenâ... t friends with Obama? Theyâ... re left holding the bag when the companies are devalued.

Schweizer says that some of the ill-gotten gains realized by Obamaâ... s friends eventually found their way to the Obama Foundation.

Itâ... s a scheme that absolutely cries out for a federal investigation. But with so many Obama puppets still left in the government, we wonâ... t be holding our breath.

HOW QUID PRO QUO WORKS AT THE U.S. DEPARTMENT OF ENERGY

How do you give payola, funded by working class taxpayers, to millionaires that don't need it, to pay kick-backs for funding Obama's political marketing?

Easy: You use the **U.S. Department of Energy** as the world's biggest political slush-fund. This way, you get to pay bribes IN PLAIN SIGHT!

The Department of Energy bosses get to claim everything is on the "up and up" but EVERY SINGLE TIME, only the political campaign financiers get the money and their competitors get sabotaged. Neat trick, right?

Here is how it works:

Quid pro quo ("something for something" in [Latin^{\[2\]}](#)) is a [Latin phrase](#) used in [English](#) to mean an exchange of goods or services, in which one transfer is contingent upon the other; "a favor for a favor". Phrases with similar meanings include: "give and take", "[tit for tat](#)", "you scratch my back, and I'll scratch yours", and "one hand washes the other". Other languages use other phrases for the same purpose.

Corruption in politics at the Department of Energy arises from the mismatch on Capitol Hill: squadrons of well-paid, experienced lobbyists versus DOE offices where aides are overworked, underpaid and have to depend on those lobbyists for information about issues. We want to see DOE offices with more aides, supervised by FBI agents, who would get better pay, to keep them on the Hill longer while they develop their own expertise. We would also close the metaphorical revolving door, through which staffers and lawmakers travel to make more money as lobbyists.

The need for campaign finance reform has always been an urgent one. The quid pro quo of shadow money and special interest campaign financing is at the root of corruption in this country, particularly at the Department of Energy. When government uses millions of taxpayer dollars to rent a bond hastily acquired and for no clear purpose from a â... party financierâ... , that is the spectre of campaign finance related corruption showing itself. When construction companies that finance political campaigns to the tune of millions are being awarded public work contracts worth billions under questionable public tendering rules, that is campaign finance related corruption. When a branding company that provided â... freeâ... billboards to a political campaign is given the lionâ... s share of billboard and branding contracts under a new government, we see the spectre of corruption. And then of course there is the issue of abuse of state resources for campaigning, something we seem to have come full Animal Farm on.

Elon Musk, Solyndra, Fisker, Abound and over a hundred other wire transfers from the Department of Energy were quid-pro-quo payoffs to Obama financiers. The layers of the deals were complex but the money always ended up in the same few pockets.

The Department of Energy has a massive fake due diligence program which spends a hundred times more time and money than any bank undertakes to provide funds. All of that due diligence is a fraud. It is a smoke-screen to provide the appearance of "proper review" when, in each and every case, the funds were covertly already arranged in a back room deal.

All of those people that work on those due diligence efforts must feel like fools. Their work is pointless because the deals were already done in smoke-filled back rooms at Perkins Coie, Wilson Sonsini and Covington Burling lobbyist buildings. All of the Department of Energy staff own the stock of the company that "wins" the government cash and most of them leave the Department of Energy, right after the money is transferred, and go to work at that company or it's suppliers.

It is an EPIC crime!

Now, the need for reform is even more urgent, particularly considering the complexity of how capital moves in an oil and gas economy and the impact of that capital on political decision-making. (ie: "...One emerging party, for example, has been against renegotiation of the oil contract with Exxon, arguing that we should accept it and guard against exploitative arrangements with future contracts. When the Department of Energy recently revealed that it had recently hired a US firm to do what should have been done years ago, revise the decades-old Petroleum (Exploration and Production) Act, it was casually revealed that the local firm the US company had partnered with is owned by the Presidential Candidate of the very new party that has â... along with the PPP and APNU+AFC â... refused to consider contract renegotiation, even in the wake of the damning Global Witness report....")

By breaking the close bonds between lobbyists and congressional offices, lawmakers might become less beholden to the lobbyists' employers â... the corporations, unions and special interests that underwrite American politics.

As value is in the eye of the beholder, the something being exchanged for another something may not be equal in value, instead skewed based on oneâ... s perspective.

Democrats and their media masters are salivating over now having what they believe is a smoking gun to take down President Trump. Notwithstanding that this must be their hundredth smoking gun, and that each previous one misfired, they are hot on impeachment over this Latin term â... quid pro quo.â...

The [Washington Post](#), happy to let democracy die in darkness while they endeavor to overturn the last presidential election, is giddy over quid pro quo.

In politics, quid pro quo is standard operating procedure. Take campaign contributions, for example. I contribute to Senator X because I want Senator X to support legislation favorable to my business interests. My money, something of value, will be exchanged for a tax break or new regulation, which is usually of greater value to me, as a quid pro quo, and perfectly legal and acceptable.

A bundler for a presidential candidate raises millions of dollars for said candidate. If that candidate wins the presidency, the bundler may have a choice of any number of ambassadorships around the world. The value of the campaign cash is exchanged for a four-year stint living in the American embassy in London or Paris, attending parties and banquets. Something for something.

Members of Congress do the quid pro quo thing amongst themselves all the time. Iâ... ll vote for your bill to build a military facility in your district if you support my bill creating an NSA data center in my district. In Congress itâ... s called "horse trading."

What about economic sanctions? The [Council on Foreign Relations](#), also known as Club Deep State, explains how economic sanctions work.

Governments and multinational bodies impose economic sanctions to try to alter the strategic decisions of state and nonstate actors that threaten their interests or violate international norms of behavior.

Economic sanctions are defined as the withdrawal of customary trade and financial relations for foreign- and security-policy purposes.

Sanctions take a variety of forms, including travel bans, asset freezes, arms embargoes,

capital restraints, foreign aid reductions, and trade restrictions.

Quid pro quo, something for something. If you want American money in terms of trade or aide, you had better behave, meaning do as we tell you to do in your political and economic decisions.

Here are a few examples of quid pro quo economic sanctions.

Economic sanctions were put in place against Cuba in 1958. Similar sanctions have been in place against North Korea since the Korean War. Economic sanctions have been in effect against Venezuela since 2015 and Sudan since 1997. These are quid pro quo moves -- behave, give up your nukes, provide human rights, or we will punish you economically. Something for something.

Several of the ladies of [the Squad hinted](#) at cutting off aid to Israel after one of the gals was denied entry to Israel last summer. Presidential candidate [Bernie Sanders threatened](#), â... Israel would have to â... fundamentally changeâ... its relationship to Gaza to receive aid if he is elected.â... Something for something, quid pro quo.

Three Democratic senators [wrote a letter](#) to Ukraineâ... s prosecutor general,

Expressing concern at the closing of four investigations they said were critical to the Mueller probe. In the letter, they implied that their support for U.S. assistance to Ukraine was at stake.

They wanted something for something, quid pro quo.

Then Vice-President Joe Biden, in a now well-known interview, [acknowledged](#), â... I looked at them and said: Iâ... m leaving in six hours. If the prosecutor is not fired, youâ... re not getting the money. Well, son of a b-tch. He got fired.â... Quid pro quo, something for something.

So, what did Trump do? He asked the Ukrainian President to investigate corruption, specifically foreign interference in a U.S. election. Biden was an afterthought in the conversation, but his pay to play corruption is fair game, whether or not he is running for president. Until he secures the Democratic party nomination, he is not Trumpâ... s political opponent. What if Bernie or Pocahontas win the nomination?

Trump has a constitutional duty as president to investigate corruption. The U.S. and Ukraine share a [treaty ratified in 1999](#) for â... Mutual assistance in criminal matters.â...

There is also â... The United Nations Convention against Corruptionâ... of 2003, [signed by both](#) Ukraine and the U.S. And then finally is President Trumpâ... s [Executive Order](#) signed in December 2017, â... Blocking the property of persons involved in serious human rights abuse or corruption.â... Note that last word.

Trump is doing his job as president, yet the Democrats and media howl in outrage over a supposed quid pro quo. But something for something is standard operating procedure in Washington, D.C., even to the point of corruption as Joe Biden illustrated in Ukraine, China, and possibly Romania.

The psychologists call this Democratic caterwauling â... projection,â... accusing others of doing what you are guilty of. Trying to impeach President Trump over a quid pro quo would be like impeaching him because he didnâ... t keep a campaign promise, something every elected official, past and present, is guilty of.

Since its ruling in *Buckley v. Valeo*, the U.S. Supreme Court has expressed concern regarding corruption or the appearance of corruption stemming from political quid pro quo arrangements and the deleterious consequences it may have on citizens' democratic behavior. However, no standard has been set as to what constitutes "the appearance of corruption," as the Court was and continues to be vague in its definition. As a result, campaign finance cases after *Buckley* have relied on public opinion polls as evidence of perceptions of corruption, and these polls indicate that the public generally perceives high levels of corruption in government. The present study investigates the actual impact that perceptions of corruption have on individuals' levels of political participation. Adapting the standard socioeconomic status model developed most fully by Verba and Nie (1972), an extended beta-binomial regression estimated using maximum likelihood is performed, utilizing unique data from the 2009 University of Texas' Money and Politics survey. The results of this study indicate that individuals who perceive higher levels of quid pro quo corruption participate more in politics, on average, than those who perceive lower levels of corruption.

Quid pro quo is not a difficult concept to understand. Too bad the media doesn't endeavor to investigate and explain it. Your politicians don't work for you, they work for their own insider trading stock market holdings for themselves!

SUE SILICON VALLEY CENSORS

California Judge Rules Twitter CAN Be Sued for Falsely Advertising Free Speech

Francois

Durand/Getty Images for Twitter; Edit: BNN [546](#)

A California judge has ruled that Twitter's policy of banning users at any time, for any reason or for no reason may constitute an unconscionable contract, and that a lawsuit against the company brought by self-described white advocate Jared Taylor may proceed on that basis.

The judge rejected Twitter's motion to dismiss the lawsuit from Taylor, who was banned by the platform in December last year.

In particular, Twitter's argument that it has a first amendment right to ban whoever it likes from its platform, for whatever reason was rejected.

The judge ruled that Twitter's belief that it had a right to ban users at any time, for any reason, or no reason could be a legally unconscionable policy on the company's part.

The judge also ruled that Twitter could be sued on the basis of misleading its users, due to the platform's promise frequently expressed, frequently violated not to ban accounts on the basis of viewpoint or political affiliation.

“... This ruling has massive implications for the platform going forward,” said Noah Peters, Jared Taylor’s lawyer. “... this is the first time that a social media company’s argument that it can censor user speech has been rejected by a court.”

Taylor describes himself as a “... race realist” and has [indefended](#) white separatism, claiming that races are “... not equal”, but his attorney says this trial is not about his client’s particular views.

“... Our lawsuit is not about whether Taylor is right or wrong,” Peters [said](#) in February. “... It’s about whether Twitter and other technology companies have the right to ban individuals from using their services based on their perceived viewpoints and affiliations.”

Twitter is one of the worst offenders in big tech when it comes to censoring conservative accounts. Leading voices on the right, like Islam critic Tommy Robinson, have been banned from the platform merely for [pointing out facts](#).

Twitter employees have also been caught on camera [boasting](#) about their actions to keep conservatives and Trump supporters off the platform.

One employee discussed [shadowbanning](#) political accounts, a practice that Twitter has continually denied using, while another [claimed](#) that accounts that expressed an interest in “... god, guns, and America” were likely to be flagged as “... bots.” Another employee, Mo Norai, explained that Twitter moderators regularly discriminated against accounts deemed to be pro-Trump.

Twitter’s double standards can be seen in the way it handles complaints of abuse against conservatives and individuals linked to conservatives. When the daughters of Islam critic Pamela Geller were bombarded with abuse earlier this year, [Twitter did nothing](#). In fact, some of the abusive tweets remain on the site, undeleted.

PragerU Takes Legal Action Against Google and YouTube for Discrimination

“This is speech discrimination plain and simple, censorship based entirely on unspecified ideological objection to the message or on the perceived identity and political viewpoint of the speaker”

36th Governor of California Pete Wilson
Browne, George, Ross LLP

By BrÃ¼nnhilde

Prager University (PragerU) has filed a lawsuit in the United States District Court for the Northern District of California to stop Google and YouTube from unlawfully censoring its educational videos and discriminating against its right to freedom of speech.

The lawsuit cites more than 50 PragerU videos which have either been “restricted” or “demonetized” by Google/YouTube. The PragerU videos range on various subjects presenting a conservative point of view, and include a video by noted Harvard Law professor Alan Dershowitz on the founding of Israel. PragerU previously compiled a complete list of their restricted videos [here](#), which includes: “Why America Must Lead,” “The Ten Commandments: Do Not Murder,” “Why Did America Fight the Korean War,” and “The World’s Most Persecuted Minority: Christians.”

In correspondence cited in the filing, Google/YouTube made it clear that the censorship of certain videos was because they were deemed “inappropriate” for younger audiences.

“Watch any one of our videos and you’ll immediately realize that Google/YouTube censorship is entirely ideologically driven. For the record, our videos are presented by some of the finest minds in the Western world, including four Pulitzer Prize winners, former prime ministers, and professors from the most prestigious universities in America,” stated PragerU founder Dennis Prager.

Prager added, “They are engaging in an arbitrary and capricious use of their “restricted mode” and “demonetization” to restrict non-left political thought. Their censorship is profoundly damaging because Google and YouTube own and control the largest forum for public participation in video-based speech in not only California, but the United States, and the world.”

France,

Brazil Plan to Censor the Internet in the Name of Stopping â... Fake Newsâ...

The total number of people who currently use YouTube exceeds 1.3 billion people. Google and YouTube advertise YouTube to the public as a forum intended to defend and protect free speech where members of the general public may express and exchange their ideas. They have represented that their platforms and services are intended to effectuate the exercise of free speech among the public. According to Google and YouTube: â... voices matter.â... YouTube states that it is â... committed to fostering a community where everyoneâ... s voice can be heard.â...

â... However,â... said Eric George of Browne George Ross, the firm representing PragerU, â... Google and YouTube use restricted mode filtering not to protect younger or sensitive viewers from â... inappropriateâ... video content, but as a political gag mechanism to silence PragerU. Google and YouTube do this not because they have identified video content that violates their guidelines or is otherwise inappropriate for younger viewers, but because PragerU is a conservative nonprofit organization that is associated with and espouses the views of leading conservative speakers and scholars.â...

â... This is speech discrimination plain and simple, censorship based entirely on unspecified ideological objection to the message or on the perceived identity and political viewpoint of the speaker,â... said former California Governor Pete Wilson of Browne George Ross. â... Google and YouTubeâ... s use of restricted

mode filtering to silence PragerU violates its fundamental First Amendment rights under both the California and United States Constitutions. It constitutes unlawful discrimination under California law, is a misleading and unfair business practice, and breaches the warranty of good faith and fair dealing implied in Google and YouTube's own Terms of Use and its Community Guidelines.

There is absolutely nothing inappropriate about the content of the PragerU videos censored by Google and YouTube; the videos do not contain any profanity, nudity or otherwise inappropriate mature content and they fully comply with the letter of YouTube's Terms of Use and Community Guidelines," said Marissa Streit, PragerU's chief executive officer who has engaged in a year-long-effort to try and persuade Google to stop censoring PragerU content. Streit continues, "It's clear that someone doesn't like what we teach and so they intend on stopping us from teaching it. Can you imagine what the world would look like if Google is allowed to continue to arbitrarily censor ideas they simply don't agree with?"

This is not a left/right issue. It is a free speech issue, which is why prominent liberals, such as Harvard law professor Alan Dershowitz, are supporting our lawsuit," Prager concluded.

The lawsuit filed in the Northern District of California is available [here](#).

Safe P2P Browsing Web With Beaker and Dat

-

- [POST](#)

[B!](#) [LINE](#)

Recently I have been searching for a way to host websites in peer-to-peer manner. I had a quick look into Tor/Onion and I2P. They donât instill lots of inspiration for non-tech users so I kept looking. I came across [Beaker browser](#) and [Dat protocol](#) that make browsing and hosting P2P websites simple and easy. This post will give you brief intro into Beaker and Dat so you can quickly embark and launch your own Dat website.

Motivation

I read Beaker browser website and found motivation behind their product:

1. Avoid vendor lock-in and dependency on centralised infrastructure providers (Amazon AWS, Microsoft Azure, Google App Engine)
2. Have peer-to-peer network where users own their data and can run independently
3. Make site hosting seamless and built-in into your browser
4. Provide integrity and versioning to websites
5. Allow anyone to clone and keep history of websites
6. Make sharing easy and still keep URI semantics of open web

I will dig deep into the Dat protocol and write about it in another post.

Guarantees by Beaker Browser & Dat protocol

1. Browsing privacy: No
 - ◆ Anyone having knowledge of a `dat://[0-9a-f]{64}` URL can see which devices also accessing the Dat URL
2. Data privacy: Yes
 - ◆ Dat websites use sandboxes and canât export user data
 - ◆ Use thick application model (store locally using `localStorage`, `indexedDB` & Dat APIs). Read more at <https://beakerbrowser.com/docs/inside-beaker/thick-applications.html>
3. Secret sharing: Yes
 - ◆ Requested URLs are hashed via HMAC and peers who donât know the URL canât make sense of it
 - ◆ Dat website URL is a 64 hex character string, equivalent to 32 byte key/256 bit key. Itâs is used as symmetric encryption key for that URL
4. Site integrity: Strict Content Security Policy (CSP)
 - ◆ Only assets from the sandbox are executed, thereâs no hot-linking or loading 3rd party scripts & images. This prevents ad-trackers

Read details at <https://beakerbrowser.com/docs/inside-beaker/privacy-and-security.html> .

Hosting on your own server

By default you can rely on Beaker browser to host Dat websites for you. However, once you put your PC in sleep mode or turn it off, the site will be gone if itâs not cached by any peer. Fortunately, you can host Dat websites outside Beaker browser using `dathttpd`. For details, read the official guide:

- <https://beakerbrowser.com/docs/tutorials/host-outside-of-beaker.html>
- `dat://beakerbrowser.com/docs/tutorials/host-outside-of-beaker.html`
- <https://github.com/beakerbrowser/dathttpd>

Feel free to host Dat websites on a Linode box, or run your own hardware server.

Enable domain for Dat websites

Now you have seen the magic of Dat protocol and simplicity of Beaker browser. Thereâs still a pain point: No one can remember the actual link because no genius can memorize 64 hex characters. This is where engineering minds shine.

- In order to use `my-domain.tld` in Beaker browser, you must be able to plant the file `https://my-domain.tld/.well-known/dat`
- The content of the file must contain Dat URL and TTL (time to live in seconds)
- Name resolution is handled transparently

Hereâs the actual example file provided by makers of Beaker browser:

<https://beakerbrowser.com/.well-known/dat>

```
dat://87ed2e3b160f261a032af03921a3bd09227d0a4cde73466c17114816cae43336/  
ttl=3600
```

This precious file allows you to access the public key above as `dat://beakerbrowser.com` painlessly. For more information, read:

- <https://github.com/beakerbrowser/beaker/wiki/Authenticated-Dat-URLs-and-HTTPS-to-Dat-Discovery>

Thereâs a gotcha: Your Dat website doesnât need to be in sync with your HTTPS version. Thereâs no way to enforce it at the moment.

NOTE: Make sure the folder of your Dat website always has its meta-data file `dat.json`:

```
{  
  "url": "dat://3fa25efcd82c180934b69503b718f56856385026279cdec5120a53c4eb48df6b/",  
  "title": "visc.network",  
  "description": "Vietnam's Initiative for Smart Contracts"  
}
```

NOTE: If you use Hugo to generate web pages to be hosted with HTTP server and Dat, make sure to:

- Set `canonifyURLs` to `false` in `config.toml`
- Run command `hugo -b '/' -d _dsite` to set base URL to `/`
- Check <https://github.com/vietlq/vietlq.github.io/tree/source> for inspiration

References

I hope this was useful and you can try hosting your own Dat websites. Get started with these links:

- <https://beakerbrowser.com/docs/tutorials/create-a-blog.html>
- <https://beakerbrowser.com/docs/apis/>
- <dat://taravancil.com/>
- <dat://taravancil.com/blog/how-i-publish-taravancil-com/>
- <https://github.com/taravancil/taravancil.com>

Happy hacking

If you follow the above links carefully, you will be able to host your own Dat site with nice domain name like I did:

<dat://simpleit.us/>

Science Team Delivers Bio-hydrogen Production So You Can Make Your Hydrogen Car Fuel At Home

by Scott Schrage, [University of Nebraska-Lincoln](#)

. Husker researchers have engineered the bacterial species *Thermotoga maritima* to produce more hydrogen than any bacterium before it. Credit: Scott Schrage/University Communication

In 1977, researcher Rudolf Thauer proposed a theoretical ceiling on the amount of hydrogen that bacteria could produce via fermentation, the sugar-converting process also responsible for yogurt, beer and cheese.

Propelled by a genetic engineering technique that presents bacteria with a simple choiceâ... adapt or dieâ... research from the University of Nebraskaâ... Lincoln just punched through that 40-year-old ceiling like Iron Man through papier-mâchÃ©.

A version of the *Thermotoga maritima* bacterium engineered by Raghuvier Singh, Paul Blum and their colleagues produced 46 percent more hydrogen per cell than a naturally occurring form of the same species. The team's highest reported yieldâ... 5.7 units of hydrogen for every unit of glucose fed to the bacteriumâ... easily surpassed the theoretical limit of 4 units.

The feat represents a breakthrough in the global effort to scale up the sustainable production of clean-burning hydrogen for vehicles and heavy industry, Singh said. Most commercial hydrogen comes from refining non-renewable fossil fuels such as natural gas, oil and coalâ... processes that generate sizable amounts of carbon dioxide.

"I always had been interested in microbes and their potential to make something useful," said Singh, a doctoral graduate of Nebraska who conducted the research as part of his dissertation. "The current [hydrogen production](#) technologies create a lot of environmental problems. My dream is to improve biological systems and make them more competitive with those technologies."

Slowing the sugar rush

The *T. maritima* bacterium ferments sugar into simpler carbon-based molecules that fuel two processes: growing new [cells](#) and producing so-called metabolites, one of which is hydrogen. But under normal conditions, most of that carbon gets funneled into the biological machinery that cranks out new cells, leaving little left over for hydrogen production.

"There's a strong coupling between hydrogen synthesis and the growth of new cells, and this coupling needs to be weakened in order to increase the yield of hydrogen," said Singh, now a postdoctoral researcher at the University of Florida.

So the researchers decided to temporarily inactivate a gene that has no effect on cell growth but slows hydrogen production in *T. maritima*. When they did, a second geneâ... this one involved in transporting sugarâ... spontaneously mutated to prevent a lethal buildup of sugar-based metabolites. That mutation also dramatically redirected the bacterium's energy expenditure from cell growth to hydrogen production, creating a new strain that the researchers named Tma 200.

After transferring the newly mutated gene into a naturally occurring version of *T. maritima*, the researchers found that the bacterium overproduced hydrogen just as Tma 200 didâ... confirming the influence of sugar uptake on [hydrogen](#) yields.

"We created the new organism using classical genetics because the necessary changes could not be predicted," said Blum, Charles Bessey Professor of Microbiology at Nebraska.

Singh, Blum and colleague Derrick White have since worked with NUtech Ventures to apply for patent protection of the genetic technique, which Singh described as a "promising strategy" for increasing bacterial production of any potential metabolite.

"Hydrogen is just one of many possibilities," he said.

The team recently detailed its work in the journal *Applied and Environmental Microbiology*.

☐ **Explore further:** [30% of the UK's natural gas could be replaced by hydrogen, cutting carbon emissions](#)

SCIENTISTS HAVE â... CLEAR EVIDENCEâ... THAT PHONE RADIATION CAUSES CANCER - AT LEAST IN RATS

Get [Daily News](#) updates directly to your inbox

Subscribe

See our [privacy notice](#)[More newsletters](#)

Itâ... s something thatâ... s been widely debated for years, and now scientists have â... clear evidenceâ... that [phone](#) radiation causes [cancer](#) - at least in rats.

Researchers from the National Toxicology Program found that radiation from phones using 2G and 3G caused male rats to develop cancerous tumours in the heart and brain.

Dr John Bucher, who led the study, said: '... We believe that the link between radio frequency radiation and tumours in male rats is real.'

In the study, the researchers housed rats in special chambers, where they exposed the animals to phone radiation from the womb and through their lifetime.

READ MORE

- [Women who love a lie-in have a higher risk of developing breast cancer](#)

Cancer cells (Image: Getty)

The radiation exposure was intermittent - 10 minutes on and 10 minutes off, for 9 hours a day.

The researchers found that male rats developed tumours in the heart and brain.

But bizarrely, these rats tended to live for longer than those who hadn't been exposed to radiation.

Dr Michael Wyde, who worked on the study, said: '... This may be explained by an observed decrease in chronic kidney problems that are often the cause of death in older rats.'

Fortunately, the researchers say that the results don't necessarily mean that phone radiation has the same effect on humans.

Dr Bucher added: '... The exposures used in the studies cannot be compared directly to the exposure that humans experience when using a cell phone.'

'... In our studies, rats and mice received radio frequency radiation across their whole bodies. By contrast, people are mostly exposed in specific local tissues close to where they hold the phone.'

â... In addition, the exposure levels and durations in our studies were greater than what people experience.â...

THE FUCK YOU PLAN

V3

You have expressed an intent to attack and harm us for illicit purposes.

Clearly, you have not fully considered the implications of our notoriously world famous
â... FUCK YOUâ... PLAN which was created decades ago for people exactly like YOU!

You are now going to experience the program under this Plan, for the rest of your time on Earth and even into your historical legacy after you die.

It costs us between \$120,000.00 and \$1.2M to sue your pathetic ass into oblivion. Anybody can do that to a weasel such as you. Thatâ... s the easy part of the Plan and it is only 2% of what will now happen to you.

Because you are a scumbag who has been accused, by reporters and tipsters, of very evil bribery, sex, drug, political, tax evasion, money hiding, misogyny, abuse and other things, many people might consider hiring an MS-13 street gang or a Russian drug Cartel to torture and kill you.

We would never do that!

We find that our 100% legal FUCK YOU Plan is far more effective.

First of all, the Fuck You Plan will last for the rest of your life. We will never forget about what you did and we will never forgive you. (Unless, of course, you want to pay us at least ten million dollars for the legal, personal, economic, brand and related damages you cost us).

Next we are putting you in our, and others, special crime prevention databases. The databases have every piece of information about you that you ever created, ie: all of your addresses, account numbers, tax records, bank accounts, dating site records, phone numbers, fax numbers, IMEI device records, IP addresses, device serial numbers, every lover you cheated on, service calls, drug deals, hookers, rent boys,

Uber and Lyft trip addresses, neighbors, GPS records, etc. All of this information is legally acquired. You put most of it out on the web yourself.

We work with, and retain, ex-FBI, CIA, NSA, GCHQ and other top intelligence and crime interdiction experts. They have ways of watching you every second of every day. Did you know that WiFi and the ceramic objects around you can make it look like there are not even walls where you are right now?

Science has created a new world in which there is, LITERALLY, no place you can hide!

Face recognition is also sourcing up every image of you on security cameras, Walmart cameras, restaurant cameras, Google and Bing image databases, social networks, dating sites, traffic cameras, hotel and motel cameras and everything that has ever recorded your face; which is public domain. Everything you are connected to will be connected to you and psychologically analyzed.

If you ever, ***for the rest of your life***, cheat on taxes, take money off-the-books, lie on an application, get arrested, get sued, buy drugs, buy sex, cheat, hide money, use off-shore conduits, set-up an illicit trust fund or shell corporation, get an STD, lie on a dating site, abuse or extort an employee, abuse a co-worker, plagiarize, break the law, run a real estate scam, hide insider stock trading, provide political campaign services without filing detailed and accurate FEC disclosures, support a political campaign, spend or receive any money that you do not report,

There is no place on Earth you can hide from us. Our investigators and our friends in Congress, our journalist buddies, law enforcement and the intelligence community will never let you out of their sights!

We do not do creepy illicit things, like you do, so we have nothing to worry about. You have PLENTY to worry about.

You are, today, sitting at the edge of the same precipice that Richard Nixon, Bill Cosby, Harvey Weinstein and other scum sat at just before they slid down their filthy funnels straight to hell. Enjoy the ride!

Here are a few of the thousands of 100% legal methods for wiping out creeps like you, corrupt politicians, The Silicon Valley Mafia, their political shills and their crony companies that the public can undertake from the comfort of any voter's living room. This only works on criminals and the corrupt. The "good guys" have nothing to fear:

Step-By-Step Termination Instructions For The Public To Use On Corrupt Targets:

- Make sure your interdiction of their illicit deeds lasts the rest of their life. Make it your hobby and engage in it every month. Put it on your calendar to have a monthly action day.

- Bankrupt their corrupt companies by contacting EVERY single advertising director for EVERY company that advertises with them to show them the evidence and encourage them to stop advertising with the suspect under threat of boycott.

- **Bankrupt their corrupt companies by contacting EVERY single employee that works for them to show them the evidence and encourage them to quit.**
- **Bankrupt their corrupt companies by contacting EVERY single investor that funds them to show them the evidence and encourage them to divest.**
- **Contact billionaireâ... s (ie: Peter Thiel, Larry Ellison, etc.) to get them to sponsor a RICO, or other kind of lawsuit, against these corrupt parties. Use proxies to sue the corrupt (ie: Get Thiel to pay for some other guy to sue Gawker for you). The Legal Proxy is one of your biggest assets. You can get billions of dollars of lawsuits executed against corrupt mega giants. Make Hulk Hogan be YOUR proxy. He takes all of the risk and YOU get to see a criminally corrupt oligarch (ie: Nick Denton and Gawker/Gizmodo Media) ground into the dirt. Read the news daily and PACER.GOV and FIND YOUR PROXY!**
- **Bankrupt their corrupt companies by contacting EVERY user of their company, via mass media and personal out-reach, to show them the evidence and encourage them to cancel their subscriptions and â... poisonâ... their data by filling their profiles with fantasy data.**
- **Bankrupt their corrupt companies by contacting EVERY single member of Congress and regulatory agencies to show them the evidence and demand, in writing, a federal investigation.**
- **Bankrupt their corrupt companies by exposing corrupt sources of supply to the news and the public; ie: Elon Musk uses â... blood cobaltâ... mines in the Congo which rely on child labor and mercenaries to operate the cobalt mineral mines.**
- **Expose the covert sex cults (ie: Pizza Gate, NXIUM, Burning Man, Mission Control, Power Exchange, etc.) that they frequent. Harvey Weinstein and Eric Schnierderman need to get "perp walked" on camera for their sick perversions and political corruptions.**
- **Look on Linkedin and other databases to contact their former interns to see if they sexually or mentally abused that intern and help that intern find lawyers (ie: Lawless Firm, AllRed, etc.).**
- **All of the data of famous corrupt persons and corporations has been hacked and acquired by many, many parties over the last decade. Watch for it to get leaked on the web or go search the ICIJ, Wikileaks and related databases for keywords about your targets. Expose what you find to the public. Cross reference what you find with the Palantir, Taleo, Bitcoin Trace, PayPal Trace, VISA Trace, D&B Insider, Gust-Scan, etc. commercially available databases and you will have an even more powerful search than the NSAâ... s XKEYSCORE tool.**
- **Expose the trust funds, shell corporations and real estate contracts that they and their family own and make sure the IRS and SEC knows about those slush fund pots. Find all of their insider trading payola scams and expose them.**

- **Expose every reporter and â... stock analystâ... that is actually a shill for the corrupt. Call them out by name in press releases and your own news articles. Demand to see their financial records if they claim to have never been paid by the corrupt entity in question.**
- **Expose the racist, tribal, misogynist organizations that the majority of their executive hires are part of.**
- **Investigate them and share your investigation data, from public data resources, on databases. All of their addresses, account numbers, tax records, bank accounts, dating site records, phone numbers, fax numbers, IMEI device records, IP addresses, device serial numbers, etc. are on public record.**
- **As Comey, et al; proved, there are crooks at the FBI...but there will always be, at least, one Elliot Ness kind of good guy at the FBI. DO report your findings to the FBI, in writing, but report to EVERY main, and regional FBI office, in writing, with a carbon copy to the media. It only takes one good FBI agent to get an official FBI case going. The same goes for the SEC, The EU and the CFTC.**
- **These incredibly abusive people have an inordinate number of divorce lawsuits for abusive behavior. Showcase the most revealing text from those abusive divorce court filings.**
- **Write â... Request For Prosecutionâ... requests to every major law enforcement agency and send copies of those requests to every other law enforcement agency and independent news reporters.**
- **If they run for office, confront them (legally) at public speaking events and hand out one page fliers about their crimes to the public at these events. Name their crony financial backers out loud at these events.**
- **File charges with the FEC for campaign finance violations. Ie: In one year Google reported a million in campaign contribution cash to one party but they actually provided many billions of campaign contributions via search engine rigging and perception manipulation services. Report that to the FEC and demand to know what the FEC is doing about it. Ask the FEC, in writing, every month until you get an answer in writing.**
- **Donâ... t just â... follow the moneyâ... . Make fun charts and diagrams of the illicit funds routes and mass distribute those graphics.**
- **Meme them forever.**
- **Uncover every: illicit sex partner and who they cheated on; drug deals; hooker; rent boy; Uber and Lyft trip route; neighbors who complained about them; GPS records, social media posting that hinted at a political agenda, etc. All of this information can be legally acquired. They put most of it out on the web themselves and agreed to let Facebook, Uber and Google sell the data.**
- **Search every face recognition database with automated search tools. They agreed to allow their image on databases for security cameras, Walmart**

cameras, restaurant cameras, Google and Bing image databases, social networks, dating sites, traffic cameras, hotel and motel cameras and everything that has ever recorded their face; which is public domain. Check out what they were doing at each place they were recorded.

- Report every illicit deed done by the corrupt to large Congressional, news writer, social network and voter mass distribution systems.

- Learn â... Veil Protection Strategiesâ... and How to Bust Themâ... .

- Break their cover-ups. Carbon copy every Inspector General (IG), reporter and social media resource you can find. Never allow only a few people to be the only ones that know what you uncovered. Tell everyone and never stop finding new people to tell. Use the â... Streisand Effectâ... .

- If they ever, for the rest of their life: cheat on taxes, take money off-the-books, lie on an application, get arrested, get sued, buy drugs, buy sex, cheat, hide money, use off-shore conduits, set-up an illicit trust fund or shell corporation, get an STD, lie on a dating site, abuse or extort an employee, abuse a co-worker, plagiarize, break the law, run a real estate scam, hide insider stock trading, provide political campaign services without filing detailed and accurate FEC disclosures, support a political campaign, spend or receive any money that they do not report, etc.; THEN YOU EXPOSE THEM AND THE ILLICIT ACTIONS THEY TOOK.

- Educate yourself by typing this phrase into the top 5 non-Google search engines: â... How To Be A Private Investigatorâ... and read all of the results. Try more searches, like: â... Investigation methodsâ... or â... Background check methodsâ... or â... Investigate a politicianâ... , etc. There are thousands of other legal techniques in addition to those few listed here. They all work if you are persistent.

- Learn how to put a covert media alarm in â... Corporate Poison Pillsâ... and find â... Criminal Back-Datingâ... .

- Make certain that you find every other voter and community group who might help you. Support their efforts and share what you have uncovered with them. Use the web to guarantee that there is no place on Earth they can hide from justice. Work to mesh investigators, Congress, journalists, law enforcement, intelligence community, voters and your friends and family to never let them out of your sights!

THE HR DEPT IS YOUR ENEMY!

The Sole Purpose Of The HR Department is To Protect The Corporation And Keep You From Suing Them

THE MARKET DEMANDS OPEN COMPUTER PROCESSORS

By **Jonathan Corbet**

January 9, 2018 The disclosure of the [Meltdown and Spectre vulnerabilities](#) has brought a new level of attention to the security bugs that can lurk at the hardware level. Massive amounts of work have gone into improving the (still poor) security of our software, but all of that is in vain if the hardware gives away the game. The CPUs that we run in our systems are highly proprietary and have been shown to contain unpleasant surprises (the Intel management engine, for example). It is thus natural to wonder whether it is time to make a move to open-source hardware, much like we have done with our software. Such a move may well be possible, and it would certainly offer some benefits, but it would be no panacea.

Given the complexity of modern CPUs and the fierceness of the market in which they are sold, it might be surprising to think that they could be developed in an open manner. But there are serious initiatives working in this area; the idea of an open CPU design is not pure fantasy. A quick look around turns up several efforts; the following list is necessarily incomplete.

What's out there

Consider, for example, the [OpenPOWER effort](#), which is based on the POWER architecture. It is not a truly open-source effort, in that one has to join [the club](#) to play, but it is an example of making a processor design available for collaborative development. Products based on the (relatively) open designs are shipping. OpenPOWER is focused on the high end of the computing spectrum; chips based on this design are unlikely to appear in your handset or laptop in the near future.

Then, there is [OpenSPARC](#), wherein Sun Microsystems fully opened the designs of the SPARC T1 and T2 processors. A few projects tried to run with these designs, but it's not clear that anybody got all that far. At this point, the open SPARC designs are a decade old and the future of SPARC in general is in doubt. Interesting things could maybe happen if Oracle were to release the designs of current processors, but holding one's breath for that event is probably not the best of ideas.

[OpenRISC](#) is a fully open design for a processor aimed at embedded applications; it has one processor (the OpenRISC 1000) in a complete state. Some commercial versions of the OpenRISC 1000 have been produced, and reference implementations (such as the [morlxx](#)) exist. The Linux kernel gained support for OpenRISC in the 3.1 release in 2011, and a Debian port showed up in 2014. The Debian work [shut down in 2016](#), though. Activity around the kernel's OpenRISC code has slowed, though it did get [SMP support](#) in 2017. All told, OpenRISC appears to have lost much of the momentum it once had.

Much of the momentum these days, instead, appears to be associated with the [RISC-V architecture](#). This project is primarily focused on the instruction-set architecture (ISA), rather than on specific implementations, but free hardware designs do exist. Western Digital recently [announced](#) that it will be using RISC-V processors in its storage products, a decision that could lead to the shipment of RISC-V by the billion. There is [a development kit](#) available for those who would like to play with this processor and [a number of designs for cores](#) are available.

Unlike OpenRISC, RISC-V is intended to be applicable to a wide range of use cases. The simple RISC architecture should be relatively easy to make fast, it is hoped. Meanwhile, for low-end applications, there is a

compressed instruction-stream format intended to reduce both memory and energy needs. The ISA is designed with the ability for specific implementations to add extensions, making experimentation easier and facilitating the addition of hardware acceleration techniques.

The Linux support for RISC-V is quite new; indeed, it will only appear once the 4.15 release gets out the door. The development effort behind it appears to be quite active, and toolchain and library support are also landing in the appropriate projects. RISC-V seems to have quite a bit of commercial support behind it â€¦ the RISC-V Foundation has [a long list of members](#). It seems likely that this architecture will continue to progress for some time.

A solution to the hardware problem?

In response to Meltdown and Spectre, the RISC-V Foundation put out [a press release](#) promoting the architecture as a more secure alternative. RISC-V is indeed not vulnerable to those problems by virtue of not performing any speculative memory accesses. But the Foundation says that RISC-V has advantages that go beyond a specific vulnerability; the openness of its development model, the Foundation says, enables the quick incorporation of the best security ideas from a wide range of developers.

It has become increasingly clear that, while Linux may have won the battle at the kernel level, there is a whole level of proprietary hardware and software that runs below the kernel that we have no control over. An open architecture like RISC-V is thus quite appealing; perhaps we can eventually claw some of that control back. This seems like a dream worth pursuing, but getting there involves some challenges that must be overcome first.

The first of these, of course, is that while compilers can be had for free, the same is not true of chip fabrication facilities, especially the expensive fabs needed to create high-end processors. If progress slows at the silicon level â€¦ as some say is already happening â€¦ and fabrication services become more available to small customers, then it may become practical for more of us to experiment with processor designs. It will never be as easy or as cheap as typing "make", though.

Until then, we're going to remain dependent on others to build our processors for us. That isn't necessarily bad; almost all of us depend on others to build most of our software for us as well. But a higher level of trust has to be placed in hardware. Getting reproducible builds working at the software level is a serious and ongoing challenge; it will be even harder at the hardware level. But without some way of verifying underlying design of an actual piece of hardware, we'll never really know if a given chip implements the design that we're told it does.

Nothing about the RISC-V specification mandates that implementation designs must be made public. Even if RISC-V becomes successful in the marketplace, chances are good that the processors we can actually buy will not come with freely licensed designs. Large customers (those that build their own custom data centers) may well be able to insist on getting the designs too â€¦ or just create their own â€¦ but the rest of us will find ourselves in a rather weaker bargaining position.

Finally, even if we end up with entirely open processors, that will not bring an end to vulnerabilities at that level. We have a free kernel, but the kernel vulnerabilities come just the same. Open hardware may give us more confidence in the long term that we can retain control of our systems, but it is certainly not a magic wand that will wave our problems away.

None of this should prevent us from trying to bring more openness and freedom to the design of our hardware, though. Once upon a time, creating a free operating system seemed like an insurmountably difficult task, but we have done it, multiple times over. Moving away from proprietary hardware designs may be one of our best

chances for keeping our freedom; it would be foolish not to try.

Is it time for open processors?

Posted Jan 9, 2018 14:55 UTC (Tue) by **armijn** (subscriber, #3653) [[Link](#)]

There is a (somewhat) successful open SPARC implementation (though I am not sure if it is actually based on OpenSPARC) and that is the LEON, which is used by ESA. That is, of course, a bit of a niche market.

Is it time for open processors?

Posted Jan 10, 2018 0:21 UTC (Wed) by **JanC_** (subscriber, #34940) [[Link](#)]

LEON is not based on the UltraSPARC T1/T2 designs that were released as "OpenSPARC". It's a much simpler 32-bit CPU design (SPARC v8).

They were manufactured by Atmel, and are currently being sold by Microchip, e.g.:

Is it time for open processors?

Posted Jan 9, 2018 15:07 UTC (Tue) by **jcm** (subscriber, #18262) [[Link](#)]

The problem with an "open" processor is the cost. It costs over \$1.2 Billion to do a ground up 4 year OoO core of the kind of competitive performance that others have built. And even then, once silicon is deployed, security issues can still be found. In short, it will **never** happen. You'll get RISC-V cores like BOOM, you'll see some wonderful IoT designs, but you'll **never** see a high end Xeon-class core unless some billionaire funds it as a pet project, and keeps investing year after year for the greater good. And no, none of the major search/cloud vendors are going to go fund this - they want to make commercial vendors compete.

More useful would be focusing on how to make existing designs robust, especially against mitigations. I'm a huge fan of microcode, but its implementation today is very limited. There's a lot more research that can happen into how to address security in the field.

Is it time for open processors?

Posted Jan 9, 2018 15:15 UTC (Tue) by **ejr** (subscriber, #51652) [[Link](#)]

Don't bet against it quite yet. Plus, existing RISC-V research work done by grad students has produced accelerators for various problems that are competitive in speed and/or power/operation.

Does your figure of \$1.2 billion include manufacturing or is it just for the design stage?

Is it time for open processors?

Posted Jan 9, 2018 15:56 UTC (Tue) by **pizza** (subscriber, #46) [[Link](#)]

I think 1.2 billion is a bit high for just R&D, but I can easily see "hundreds of millions" as the price tag to design (and more importantly, adequately verify!) a modern CPU core. And that's assuming it's re-using an existing instruction set and hardware platform so you don't have to bootstrap the rest of the ecosystem around it.

Is it time for open processors?

Posted Jan 9, 2018 23:16 UTC (Tue) by **smoogen** (subscriber, #97) [[Link](#)]

I think the 1.2 billion is the case for getting a system into complete production while facing the 'realities' of the industry. The design and 'code' of the chipset to run it in an emulator may only be in the 10->100 million range.. the getting that to be something on silicon starts adding up quickly. You start running into physical problems (well yes we could do that set of adds there but the chip burns up and if we space them out we slow down this other operation). Then you have to avoid physical patents (aka use only methods from 20 years ago in a lot of cases) or spend a lot on them or hopefully have a ton of patents of your own that you can force cross-license costs which will make you pay less overall.

Is it time for open processors?

Posted Jan 9, 2018 17:25 UTC (Tue) by **excors** (subscriber, #95769) [[Link](#)]

I think manufacturing a single chip takes something on the order of a million dollars and a couple of months from when you send the completed design to the foundry. (Subsequent chips are much cheaper and quicker). If you've been employing hundreds of engineers to design it, and buying FPGAs and simulators to test it, the manufacturing sounds like a fairly trivial cost (though the latency can be annoying, particularly if you find a bug and need to start again).

Is it time for open processors?

Posted Jan 9, 2018 18:35 UTC (Tue) by **daney** (subscriber, #24551) [[Link](#)]

Think 40 mask layers * (between \$80,000 and \$100000 per mask) for modern processes and it adds up to more than "a million". The latency from design in to packaged chip out is indeed on the order of two months.

"Metal" fixes where you just rewire the top few layers of wires to fix minor bugs are much cheaper as you only have to regenerate a few (say six) of the masks.

The cost of employing 50-100 people for a couple of years is where the main costs to chip development lie. It is usually more than just a "CPU" design, as you need things like DRAM controllers, coherent cache fabrics, PCIe ports, packaging, thermal engineering, etc. for a usable design.

Is it time for open processors?

> It is usually more than just a "CPU" design, as you need things like DRAM controllers, coherent cache fabrics, PCIe ports, packaging, thermal engineering, etc. for a usable design.

For low-power, single core, embedded and highly integrated SoCs the real estate used by the CPU core can actually be small compared to all the rest. Now the relationship between number of gates and design complexity is of course not direct, however it's not completely unrelated either.

So yes: open-source SoCs would make a difference, open-sourcing CPU cores alone not so much. As long as this confusion is maintained there's nothing wrong to correct :-)

Is it time for open processors?

Posted Jan 9, 2018 17:05 UTC (Tue) by **excors** (subscriber, #95769) [[Link](#)]

As software people, maybe we need to stop relying on ever-more-complex OoO hardware to make our code faster over time, and design software that can run optimally on simpler in-order CPUs instead. Then open-hardware people could make reasonably competitive CPU designs without the absurd complexity that leads to these surprising vulnerabilities and that requires the billion-dollar R&D costs.

In particular, you can probably fit two reasonable in-order cores in the same silicon area and power budget as one big out-of-order core, and get better performance from software that uses all the cores. But writing multithreaded software is really hard; occasionally that's inherent in the problem we're trying to solve, but I think in many cases it's just because our languages and tools and design patterns make it excessively difficult and error-prone. I imagine there are lots of expensive serial algorithms in the Linux kernel that could benefit from concurrency, but concurrency in C usually involves far more pain than it's worth, so that rarely happens. I don't know what languages etc would be better - I don't know if they even exist yet - but surely *something* must be possible?

GPUs show that approach works in some cases. Each 'core' can be a relatively simple in-order thing, with dozen-cycle instruction latency, no branch prediction, no per-core data cache, and can happily stall a thread for hundreds of cycles while waiting for memory. In exchange for those limitations the programmer is given thousands of cores, a programming model that makes it easy to use all those cores, and much better power efficiency and peak performance than a CPU.

I don't think you'd want to run an OS kernel on a GPU - they're a bit too extreme in prioritising throughput over latency. But maybe something halfway between GPUs and OoO CPUs (in terms of core complexity, latency, core count, etc), with a suitable programming model to make best use of it, could work much better than what we've got today.

Is it time for open processors?

Posted Jan 9, 2018 20:04 UTC (Tue) by **andresfreund** (subscriber, #69562) [[Link](#)]

I think too many use cases care about latency to a large enough that going to simple in-order cores is going to work. It's not particularly realistic to effectively parallelize tasks that only take a few ms to a large number of cores. There's certainly a lot of improvements needed to take advantage of more cores, but I think the number of cases where single-core performance is crucial will be large enough that we won't see a large move to simple in-order cores.

It's possible that we'll go more in the direction of a handful of complex OOO cores, and a lot more simple cores for the rest of the work, but that won't help against spectre like vulns.

Is it time for open processors?

That's been the mantra for the last 30 years at least, but rather like practical fusion, it always seems to be a decade away.

Aside from anything else, if parallelism was being held back by C-family languages, you'd think someone would have written a library with a simple API to wrap the problem up and isolate it from the calling language.

One of the advantages of pure functional languages is that they make parallelism easier (the lack of side effects makes isolating functions simpler), but in practical terms the difference hasn't been enough that the world has flipped to LISP or ML-family languages.

Besides, a lot of programming problems are stubbornly serial.

I think if anything the best hope is probably a combination of simplified faster cores and a re-examination of the primitives modern programming languages need to do their jobs. Who knows what performance we could wring from hardware that was built with modern compilers in mind?

Modern processor cores already are as fast as it gets â...! and what could be more simple, conceptually, than "load a value, do something else while that load stalls, then do something with the value"?

The reason some current processors only have two hyperthreads is probably because more don't increase speed, due to switching costs, large caches, and instruction-level parallel execution. All of this also speeds up single-threaded programs, which is why a simpler, possibly-more-hyperthreaded processor is unlikely to win any real-world performance awards.

To begin with, I think it's important that we as a society fund wild out-there stuff, even if most of it "fails". Because the alternative is incrementalism, which we have enough of already, thank you very much. So in the grand scheme of things, I think it's perfectly Ok if we spend some 10's of millions of \$\$\$ on Mill to see if the idea flies.

That being said, the Mill "belt" seems like a somewhat clever mix between "normal" register based cpu's and a stack machine. OTOH I'm not convinced it avoids the problems in making a superscalar pipelined stack machine, in that you get a very strict ordering requirement due to the results being pushed on top of the stack (or onto the end of the belt in Mill). Further, their IPC claims seem, er, really far out there; I don't understand how they can credibly claim such numbers. Add in the fact that after all these years they still have nothing more than powerpoints to show, so I'm a bit skeptical.

But if it works out, hey, awesome!

Nice ideas, but the reality is that the industry has convinced itself that only software matters. Nobody cares about hardware, and nobody understands it at anything like the scale of the number of software engineers who can write python to run on brawny cores. Certain players in the industry have spent years literally sucking the competency out of others in an effort to benefit from the extreme logical extent of abstraction. This will never be fixed. The only path is open and fair competition from alternatives provided by companies who can make a decent living enough to invest in taking on incumbents.

Does anybody in this thread have a figure on how much out of order execution buys you? Is that in the order 50% or of a factor of 2 or 10* or ... ?

50% or a factor two is not huge and I would guess that this could be gained by less fat and wasteful software stacks. I think modern programs do *huge* memory I/O due to fat stacks and OO, so I think most programs are RAM I/O bound (i.e. word processing does basically what it did 30 years ago, except for the much prettier glyphs, but is using 10^2 - 10^3 times more RAM for the "same task").

Wrt to parallelisation I think the only "workable" paradigm is message passing (what I understand of Rust's parallelizing paradigm I would consider as message passing).

But, as far as I understand, message passing is even more demanding on I/O since the OS needs to be copying a lot of data, so that'd be even worse. The only solution to that problem I can see is something like HPs "The machine" concept where you have a lot of cores with a lot of local RAM and extremely fast message passing between the cores. Which as an abstraction maps somewhere between "each core has it's own OS" and "each core is a process".

All this is my reasoning as a non-practitioning bystander looking at the various working and imagined concepts.

Are there papers looking at these concepts quantitatively and holistically? I.e. price per "processing unit", total computing throughputs, I/O throughputs, estimates of the degrees of freedom in applications (in how many parallel parts could typical workloads be possibly split?)?

That is, do we know for sure that fat sequential CPUs will always win with today's workloads and the paradigms that we are aware of?

Yea, OoO benefit is *huge*. And there's nothing wrong with OoO. The problem comes when you take the implementation a little far and separate your permissions checking from your other logic (and handle the exception at retirement) in the name of speed.

OoO has limits. Intel's general approach for a while has been to shove progressively large reorder windows into their cores. You get to do that for a few generations before it stops buying you increased performance. I've been gleefully looking forward to how they handle trying to exceed 224 entries in flight, because it won't let them publish PowerPoint slides showing much benefit. They'll probably still go and build it tho.

Is it time for open processors?

Posted Jan 10, 2018 15:45 UTC (Wed) by **excors** (subscriber, #95769) [[Link](#)]

> there's nothing wrong with OoO

Can you realistically have an OoO CPU without speculative execution? (I'd assume not since OoO execution benefits from having lots of instructions in flight, and most programs don't exclusively use long sequences of

instructions with no branches, so you'd lose too much performance if you didn't speculate across branches.)

Spectre seems to indicate there **is** something fundamentally wrong with speculative execution (hence with OoO). CPUs will execute sequences of instructions that do not match the program they're meant to be running. Execution is observable through a wide variety of side channels. It doesn't matter how rigorously we prove the security of our software, and how it avoids revealing any secrets over those side channels, if the CPU is going to execute something arbitrarily different. It therefore becomes impossible to write secure software.

Is it time for open processors?

Posted Jan 10, 2018 17:37 UTC (Wed) by **Jonno** (subscriber, #49613) [[Link](#)]

> Spectre seems to indicate there **is** something fundamentally wrong with speculative execution

No, Spectre only indicates that there is something fundamentally wrong with **some** speculative execution.

In the RISC-V community, the current consensus seems to be that only the following 4 categories of speculation are potentially problematic:

- Using a speculated register value as a memory address
- Using a speculated register value as a branch condition
- Using a speculated register value as a jump/branch target
- Using a speculated register value in a variable-time instruction.

If you avoid these, all other speculation should be fine, notably including prefetch, branch prediction, fixed-time instructions, and using retired registers as memory addresses / branch conditions / jump/branch targets / variable-time instruction arguments.

Is it time for open processors?

Posted Jan 10, 2018 17:42 UTC (Wed) by **Cyberax** (â – supporter â –, #52523) [[Link](#)]

You can have CPUs with speculative execution but not speculative memory fetches. I.e. CPU will be able to reorder and/or parallelize code like this to better utilize available ALUs:

```
> a = b + c
> d = a << 2
> e = k + 1
```

But it won't do any memory fetches.

Is it time for open processors?

Posted Jan 10, 2018 22:43 UTC (Wed) by **brouhaha** (subscriber, #1698) [[Link](#)]

Or you can have OoO with speculative execution, but allow speculative loads ONLY from cache. Without

doing a lot of simulation, I don't know how much performance that would gain compared to having no speculative loads. Obviously it depends on the data cache hit rate.

Is it time for open processors?

Posted Jan 13, 2018 13:15 UTC (Sat) by **ianmcc** (subscriber, #88379) [[Link](#)]

I'd imagine that loading something into cache would be a major performance benefit of speculative execution. We'll have to wait and see what they come up with, but I reckon it will be some kind of separate cache for speculative execution.

Is it time for open processors?

And a separate L2 cache, and L3, and eDRAM, and TLBs? and some other magic to deal with reading data that's currently dirty in another core's cache? I don't understand how it could be feasible to read memory without it being observable in some way.

(Even reading from L1 cache might be observable, if it modifies some LRU-replacement state inside the cache.)

Is it time for open processors?

Posted Jan 10, 2018 17:11 UTC (Wed) by **tpo** (subscriber, #25713) [[Link](#)]

I think there **is** something fundamentally wrong with the concept of OoO execution and that is that it makes it hard to reason about computing. The abstraction is not well defined, it's not orthogonal, its boundaries and also its state machine are unclear. As excors said, Spectre is a symptom of this.

If f.ex. you are confronted with the question:

- * how much power does this instruction consume?
- * how much time and how many cycles will it take to execute?
- * can it cause an interrupt or be interrupted?
- * etc.

then every answer will contain a lot of "it depends" and in the end you won't be certain anyway because an execution of a single CPU instruction is an extremely complex undertaking. Or in other words in the equation:

outputs = f_cpu_instruction(inputs)

you have really no idea what exactly the opaque inputs are and what the visible or invisible outputs will be, if you consider the equation to consist of more than just the opcode and its parameters. A modern CPU really is a "strange machine".

So the real question IMHO is again: are we sure that complexity and not well defined behavior really are the price we have to pay for performance?

Is it time for open processors?

Posted Jan 10, 2018 21:17 UTC (Wed) by **farnz** (subscriber, #17727) [[Link](#)]

The challenge is that moving the "it depends" from silicon to software is known to be a difficult undertaking.

We know from [HP's old Dynamo work](#) (a PA-RISC JIT interpreter running on a PA-RISC system) that optimizing code based on runtime information can provide extra performance not available if you optimize based only on information available at compile time, and that the benefit of doing so can outweigh the cost of a JIT interpreter, let alone dedicated silicon that does the job.

We know from the fates of VLIW processors, Transmeta and Intel's Itanium that it's hard to produce a chip design that's simple to reason about (Itanium, at least, exposed most of the complexity to software, and was easy to reason about at the assembly level, because all the hard stuff that makes modern x86/ARM/POWER etc difficult to reason about is in the software instead of the hardware). Further, the lack of a FPGA Mill (or, indeed, anything other than simulation) implies that they're finding it hard to design a predictable CPU that performs well on the workloads people care about.

Given all this history, I'd expect there to be at least one PhD's worth of advances in the state of the art required, if not multiple, before we can get to a point where high performance CPUs are simple enough to be predictable. I suspect this is why the Spectre researchers expect it to keep haunting us - we are currently facing the choice between sacrificing a significant chunk of both performance and energy efficiency but being secure, or trying to patch the known side channels as we spot them. Neither is a particularly nice place to be in; still, if you ever fancy doing a PhD in computer architecture, this would be a great problem to tackle :)

Is it time for open processors?

Posted Jan 11, 2018 21:12 UTC (Thu) by **mtaht** (â – supporter â –, #11087) [[Link](#)]

"Further, the lack of a FPGA Mill (or, indeed, anything other than simulation) implies that they're finding it hard to design a predictable CPU that performs well on the workloads people care about".

Um, no, they've been ready to start towards an FPGA implementation for a while and have stalled out for lack of the funding required (they estimate about 10m). It's kind of hard to explain the Mill feature set and long term payoff to VCs that would rather find the next big thing in web services without the "heavy semi" level of investment required to make a new chip from the ground up.

I am kind of hoping that post-spectre "because, security" might now be a more valid argument to those with a long term viewpoint or money at risk.

Confession: I am an unabashed Mill fan. It's way less baroque than the Itanium was. I'm not going to sit here and write about my favorite top 10 features here but have always encouraged frustrated folk to have a beer, queue up a talk, and inspect the architecture and instruction set, and dream a little. Am I alone in remembering how fun that was in the days Byte Magazine stalked the earth?

<https://millcomputing.com/docs/>

Even though their business model for the chip logic itself does not have open source as part of it presently, certainly most of the tools will become so (example their compiler is LLVM based).

No matter if they succeed or fail, the ideas they've put forth are worth thinking about.

That said, there is no way that the Mill would enter a Xeon-like market in its first 3 generations - but it could displace 100s of millions of virtual-memory-less DSPs and compete with arm on the low end after it first taped out in a reasonable process. I worry a lot about the security and reliability of all the 260+ cpus in a modern car, for example. I worry about the constant decline in real-time functionality we're seeing in mainstream cpus (and the related rise of unsecured co-processors sharing memory space). Does a tesla need KPTI?

I also am a fan of more software engineers getting interested in EE (programmers and EEs need to start going to the same parties again because they barely share a common language nowadays) . I wish efforts like DARPA's CRAFT program to find ways to accelerate chip design and validation was better funded. I'm a strong supporter of the RISC-V effort (not just to have an open source set of chips but as teaching tools for the next generation of EEs, and in particular, develop better hardware design languages). R&D into software methods in support of better hardware design used to be a vibrant and interesting field back in the 80s. R&D into micro-kernels and capabilities has been mostly dead for years...

After being thoroughly exposed the security exposures getting worse by the day while doing the cerowrt project, I almost dropped out of the bufferbloat project and went to work on the Mill.

Is it time for open processors?

Posted Jan 12, 2018 9:54 UTC (Fri) by **farnz** (subscriber, #17727) [[Link](#)]

Honestly, given the cost of doing an FPGA implementation, that sounds like an excuse - I'm not expecting the first FPGA implementation to be particularly high end (it's just a proof of concept, after all). They're spending money on salaries for people to write the simulations already - they can afford to spend that same money on people writing HDLs instead, and a [Stratix 10](#) dev kit is under \$10,000. 2.8 million logic elements won't be enough for a high end CPU design, but should be plenty to show that their lowest end design is workable at a reasonable clock speed (say 800 MHz or so). And I've watched all of Ivan's talks - I'm not convinced that it'll actually be possible to implement all of the Mill in an acceptably performant fashion (for an FPGA implementation, competitive with a soft core in the same FPGA - say a low end ARM Cortex); I suspect that it'll be very hard to design something that matches the functional simulations that we've seen and that manages a decent clock speed under timing closure.

I'm not expecting amazing results from an FPGA design, after all - but I've seen enough of the industry to know that if you can't demo your digital logic in anything other than a simulator you wrote, there's likely to be significant issues actually transposing the design from simulation to hardware. The most common foul-up I've seen is cases where, once you implement in hardware, you can't make timing closure without a hugely long critical path; this won't necessarily show in a functional simulation, because you don't have to simulate gate delays.

It's also worth remembering that this class of attack relies on untrusted code sharing the same device as your code; as long as the critical car electronics is kept separate from infotainment, reporting etc, and only connected via Ethernet/CANbus or similar communications methods, they don't apply. Thus, the autonomous driving functionality of a car doesn't have to care about these attacks - while they may well be possible, if the only code running on the autonomous CPUs and the motor/steering control CPUs is trusted and does not accept arbitrary user input (which rules out a music player being part of the trusted domain - you get a blob of data from the user), then the attack is harmless; same can apply within companies, where it doesn't matter if the payroll process can, by being attacked, reveal payroll information to the pay increase process on the same system.

Is it time for open processors?

I think the Mill long ago passed the "show me the gates" stage also.

Although the costs of devkits like the stratix-10 are now quite reasonable, perhaps the ultrascale (50m gates) would be better.

I also don't think it could be a competitive softcore. An FPGA POC would shed doubts and bootstrap software development, only - both direly needed though!

- * The width of various busses is a problem
- * The stack spiller is complicated
- * dozen other things like cache design are not off the shelf

I wouldn't even hazard a guess as to the achievable clock rate in an FPGA. Something greater than 0 would be nice.

Is it time for open processors?

Posted Jan 12, 2018 16:07 UTC (Fri) by **farnz** (subscriber, #17727) [[Link](#)]

I wouldn't expect it to be a competitive softcore - as far as I'm concerned, the point of building something like the Mill as a softcore filling an entire Stratix 10 is to show that the performance results you get from simulation are achievable in real hardware, too, and that when you say that you can scale up performance in an ASIC, you're not pulling numbers from your fundament.

Also, to bring this full circle, the point of including Mill in the list was to show that it's not easy to do well at high performance predictable processors. Transmeta failed with an existing (well-understood) ISA and JIT to the predictable CPU; Itanium failed despite having two big tech companies (HP and Intel) pushing it hard. Mill is doing the start from scratch and design everything for predictability thing, and despite over a decade of work from serious engineers (none of the Mill team strike me as clueless dreamers), they've still not got product. So, of the efforts to be high performance and predictable, the only one that has shipped product and not yet been canned is Nvidia's Denver series - but even that's now being paired with "traditional" OoO cores, and we don't yet know whether Carmel is a traditional OoO core, or a Denver JIT core.

Basically, this stuff is *hard*, and so far, there's no constructive proof that we can do a predictable core that's as

fast for real workloads as a traditional OoO core with all the tricks.

just for the record, the mill folk published a paper on spectre/meltdown vs mill:

<https://millcomputing.com/blog/wp-content/uploads/2018/01...>

I am long-term curious about novel attacks against the PLB management code, however, I'm too low on sleep to care for a good long time.

Is it time for open processors?

Posted Jan 16, 2018 19:37 UTC (Tue) by **excors** (subscriber, #95769) [[Link](#)]

That paper seems to get decreasingly confident towards the end. The introduction states simply:

> The Mill CPU is not vulnerable to the Spectre and Meltdown attacks. The Mill is an in-order machine and Spectre and Meltdown as described take advantage of speculative execution on out-of-order machines.

but later they say that it was effectively vulnerable to Spectre because of a compiler feature (it could generate code that performed speculative reads).

Given that code always gets transformed through multiple levels of software/firmware/microcode/hardware before finally executing any operations, and modern "in-order" CPUs (Denver, the Mill, etc) seem to still use speculation to improve performance and just implement it slightly higher in the stack of transformers than traditional OoO CPUs, "in-order" vs "out-of-order/speculative" seems a fairly artificial distinction - what matters for security is the combined result of the entire stack. (At least it's easier to disable speculation if it's happening at a higher level than hardware, since you can push a software/firmware/microcode update instead of new silicon, but it might still suffer the same performance impact.)

They also say:

> The Mill has not been vulnerable to Spectre variant 2 because the Mill has a very short pipeline and low mispredict penalty, so loads erroneously issued will be revoked in time before they have any side effects. This was an unanticipated side effect of the Mill design

which seems to indicate that being an in-order machine *doesn't* make the hardware fundamentally immune to Spectre anyway, it was just a lucky result of their current pipeline design.

Is it time for open processors?

Posted Jan 20, 2018 8:24 UTC (Sat) by **igodard** (guest, #105242) [[Link](#)]

The Mill architecture is not vulnerable to Meltdown or Spectre. In the course of verifying that assertion we found a bug in the compiler that would cause it to sometimes schedule loads without the predicates that were supposed to guard them. We fixed that.

The Mill makes no guarantee that system software is bug free; no compiler does. There are bug reports that I filed against gcc that are still open a decade later. If a compiler turns source `"(x+y)*z"` into machine code that computes `"x+(y*z)"` then that is a bug in the compiler, not a flaw in the architecture. Likewise, if a compiler turn source `"if (b) x = y;"` into `"t0 = y; if (b) x = t0;"` then that is a bug in the compiler, not a flaw in the architecture.

That was the bug we found. The correct machine code computes `"b? t0 = y; if (b) x = t0;"`. It's been fixed.

Is it time for open processors?

Posted Jan 20, 2018 10:09 UTC (Sat) by **farnz** (subscriber, #17727) [[Link](#)]

Arguably, this is where the Mill design shows its strength; because almost all the speculation is done in the compilers, you only need to update software as and when a new Spectre-like problem is found. Further, where there's no security boundary between two chunks of code (hence no worry about Spectre - why use a side-channel attack when you can read directly?), Mill can compile in extra speculation, whereas Intel has to leave that speculation out just in case.

Is it time for open processors?

Show me the gates?

There are critical paths in development as in CPUs. There's no point in doing FPGA work until you have proven in sim that a concept is correct and is what you want and fits with the rest. But you have to feed the sim, so you need a tool chain. And even when you have it all in house, if the sim or FPGA exposes nifty ideas then you can't publish either until the patents issue. And there are iterations at each stage as you find things that don't work, or get better ideas. Heavy semi takes a long time, just like cement plants and steel mills. It takes the Intels a long time too.

Showing gates to tire-kickers is at the very end of that.

Is it time for open processors?

I wish we could move salaries from simulator to FPGA, but you apparently missed the memo - the Mill project has always been bootstrap, and there never have been salaries for anyone. Our part-timers are dedicated, but still not full time, and still paid only sweat-equity.

Is it time for open processors?

Posted Jan 20, 2018 10:04 UTC (Sat) by **farnz** (subscriber, #17727) [[Link](#)]

That just emphasizes my core point; doing a high performance CPU design that's also highly predictable is *hard*. You've been working on this for around 10 years now, and still aren't in a position to make money from it. When you combine that experience with Intel's Itanium, and Transmeta's long term fate, it's clear that the reason that commercially successful high performance designs are all either massively multithreaded (Nvidia GPUs, Intel Xeon Phi) or vulnerable to Spectre (high end ARM, Intel Core) is not that there's a silver bullet we're all overlooking, but that even with very clever people working on a new design, it's a really hard problem, and it's really hard to go from "interesting ideas" to "demonstrable ability to build a CPU that could be competitive given money".

I included Mill because you're attempting something interesting in the "CPUs that are completely predictable" space, and you're not getting huge wins quickly - you're evidence that high performance processor design is fundamentally hard, even if you throw away "conventional wisdom". Given your experience, Itanium, and Transmeta, I feel confident in saying that there's no easy way to design fast CPUs that don't do speculative out of order execution; there are hard ways, but then we're looking at engineering tradeoffs.

Is it time for open processors?

Posted Jan 11, 2018 3:50 UTC (Thu) by **areilly** (subscriber, #87829) [[Link](#)]

Many loads? I imagine that there are some that might get to a factor of five, but I'm interested to know what the factor-100 ones look like.

There are plenty of other workloads, of the dense numerical or media-processing variety where out-of-order doesn't buy very much at all, which is why most embedded DSPs are in-order VLIW-shaped, and why the much smaller in-order Cortex A53 is rarely more than a factor of two slower (per cycle) than the much bigger out-of-order cores, on that sort of workload.

I'd be quite interested to know how many of those factor-100 workloads survive latency/throughput tradeoffs against flock-of-chickens style systems, or custom hardware.

Anyway, the world is an interesting place, with many different workloads, so it's hard to generalize. In the absence of much extra cost, of course everyone will buy the fastest single-thread option. But if the cost goes up, as a result of work-arounds, things can change. Or if ways to speculate safely turn out to be less expensive than thought, then it's all back on again.

Is it time for open processors?

Posted Jan 11, 2018 14:59 UTC (Thu) by **excors** (subscriber, #95769) [[Link](#)]

Cortex-A53 (in-order) vs Cortex-A57 (out-of-order) does seem to be about a factor of 2 difference in typical benchmarks at the same frequency. (And a greater-than-2 difference in power and area). I guess the problem is that it's hard to push an in-order design significantly further than the A53. You could add more execution units but you won't be able to use them since you can't extract any more parallelism from typical code. You need a short pipeline (since long ones are expensive to stall, and in-order stalls a lot), but that makes it hard to run at higher frequencies. The memory system needs to prioritise latency over bandwidth and capacity. Etc. Meanwhile OoO designs *can* go significantly further than the A57, as demonstrated by high-end Intel CPUs (or even by newer ARM cores) - the main benefit doesn't come directly from OoO itself but from all the other optimisations that become viable once you have OoO.

Is it time for open processors?

Posted Jan 11, 2018 19:45 UTC (Thu) by **areilly** (subscriber, #87829) [[Link](#)]

Don't get me wrong: I'm a big fan of out-of-order designs. It's incredibly cool that it can be made to work at all, and you can't say no to the straight-line speed, when it's on offer. Certainly takes a lot of the effort off careful processor-specific optimization at the code and compiler level. But if it turned out that we've been chasing an illusion, and not being able to speculate loads that miss in the cache knocks most of the performance benefit off (I've seen credible measurement of 37% performance loss on Haswell from ISBS MSR protections for Spectre, for compilation tasks) then a re-think might be in order.

I don't agree that A53 is as far as in-order can be pushed, although it is a beautifully balanced design for its niche. It's only two-way scalar, and its SIMD units are only 64-bits wide. There's plenty of room to grow. Even within the ARM world, the Denver cores are 7-ish way scalar in-order and clock as fast as any of the other mobile devices. The in-order SPARC cores were never as fast in single-thread benchmarks as out-of-order cores of the day, but they weren't as much slower than the (older) intel Core parts after the Spectre mitigations are enabled.

I remember the discussions when Alpha was going wide but still in-order, and competing against early out-of-order MIPS cores. The compilers were happy enough to compile some speculation into the code, by turning short conditionals into execute-both-branches-and-conditional-move-result style. Probably not possible

to do that over a 200-instruction speculation window like current cores, but you'll get some of the way. And they weren't building wide SIMD vectors back then.

Is it time for open processors?

Posted Jan 11, 2018 23:49 UTC (Thu) by **excors** (subscriber, #95769) [[Link](#)]

I believe Cortex-A53's NEON is actually 128-bit wide (or 2x64), for most float and int operations.

The 7-wide vs 2-wide comparison seems a little misleading - I think Denver doesn't have many more execution units than A53, the main difference is that Denver can theoretically decode and dispatch to all 7 at once (when using its custom VLIW ISA, and apparently only in unlikely cases where all 7 micro-ops can fit into one 32B bundle; and apparently it needs an average of 1.8 micro-ops per ARM instruction, so it can practically do maybe 3 ARM instructions per cycle).

It sounds like Denver's ARM-to-VLIW optimiser actually does something equivalent to speculative execution (statically predicting branches and emitting speculative micro-ops to keep the execution units busy), so could be vulnerable to Spectre. At least the optimiser is just software so they could fix it fairly easily (at some performance cost).

In some ways I think that reinforces my (not-very-well-thought-through) argument :-). Denver's hardware might be technically in-order, but they use lots of the normal out-of-order techniques (with most of the same costs and risks) to achieve just 3 ARM-instructions per cycle. Presumably they wouldn't have bothered with all that complexity if they could have reached the same much-better-than-A53 performance with a pure in-order design.

Is it time for open processors?

Posted Jan 12, 2018 1:22 UTC (Fri) by **excors** (subscriber, #95769) [[Link](#)]

Oh, in addition to the static speculation performed by the optimiser, apparently the Denver hardware continues executing speculatively after a cache miss (in the hope that subsequent instructions with not-quite-correct data will pull useful things into the cache) then rolls back once the data arrives. That sounds like a second vector for Spectre, and one that can't be simply disabled in the optimiser.

(This is based on the information in https://piazza.com/class/profile/get_resource/hzbgxhrhoe3...)

Stuff with a lot of pointer chasing, like linear algebra on large sparse matrices.

Is it time for open processors?

Posted Jan 11, 2018 19:59 UTC (Thu) by **areilly** (subscriber, #87829) [[Link](#)]

True, that is probably the biggest win for designs that can speculate through loads, but that's precisely the sort of code that is going to be hit on the head by the Spectre mitigations anyway. I can imagine an HPC installation (or, indeed, a big-iron database installation) coming to the conclusion that they're going to rely on the fact that they don't run user-provided code on their isolated machines, and their normal malware protection protocols are up to the task: they just won't enable the mitigations. I certainly wouldn't if I was running something on a single-function embedded system.

If your twisty pointer-chasing sparse linear algebra is going to run on someone's cloud infrastructure though, they'll have the mitigations turned on, and it will run badly anyway. So you can re-code to speculate explicitly, in software, (Itanium style), or demand a discount and just turn on some more processors. There have been some nice research papers about running code like that on pairs of cores, (hyper-thread style), with one core of the pair scampering ahead and speculating the memory pattern, so that the speculated lines are in cache, while the other grinds away doing the math, directly out of cache. I doubt that there are many compilers that can construct that sort of code automatically, because the Out-of-order cores did such a great job on their own. Now's the time to dig them up, perhaps.

Is it time for open processors?

I think Intel tried that with Larrabee. And Sony with Cell. If that's the future then these efforts were significantly before their time :)

Is it time for open processors?

Posted Jan 10, 2018 17:48 UTC (Wed) by **excors** (subscriber, #95769) [[Link](#)]

Larrabee failed because it was meant to be a GPU, and it took years to realise their architecture had terrible performance when used as a GPU. But it led to Xeon Phi which has been used in quite a few supercomputers, so it seems the general concept can work for some software.

With Cell, I got the impression the main problem was that the SPEs were complex and unfamiliar - they probably weren't a fundamentally flawed architecture, but game developers didn't have the experience or tools to use them effectively, so they were a huge pain in practice. And they didn't give much better performance than a standard 3-core CPU plus GPU, so they weren't worth the costs. But nowadays game developers are having to deal with 8-core CPUs and GPGPU, and probably expecting future consoles to go even wider, so they're designing engines with task-based parallelism that can easily scale to large numbers of cores and can mix CPU and GPU tasks, so they should be better able to cope with a Cell-like system now.

I think with the help of powerful optimizing compilers, in-order processors can be competitive with OoO ones.

Is it time for open processors?

Posted Jan 11, 2018 10:16 UTC (Thu) by **farnz** (subscriber, #17727) [[Link](#)]

That was what the Intel Itanium was supposed to be - an in-order core that was as powerful as the best OoO cores they could build. It didn't work out that way - the "powerful optimizing compiler" never got good enough to be as fast on the in-order core as OoO cores were when you applied the same compiler power.

Further, the [HP Dynamo work](#) gives us reason to believe that runtime optimization will always be necessary to get peak performance; on an OoO processor of the late 90s, they demonstrated that a JIT recompiling native code to native code was faster than just running the native code directly.

I suspect that there are multiple PhDs worth of work to go from where we are today (complexity in OoO hardware, which "JITs" the native code into fast executing code), to a world where in-order CPUs are as fast as OoO CPUs; we need a good runtime JIT to convert a useful intermediate form to something that can be executed, and we need to know what the intermediate form and the something that can be executed should look like.

And looking around at the market, this isn't something that's not been tried: Itanium failed (no-one even wrote a useful JIT for it); Transmeta failed (maybe it could have done better if the code morphing had been open,

but I doubt it); Mill hasn't yet got as far as an FPGA model, let alone real silicon (so may never get to a high performance implementation - if you can't do hardware, only simulations, then you run the risk of real hardware massively underperforming for reasons your simulation didn't take into account, like thermals).

Is it time for open processors?

Posted Jan 11, 2018 21:39 UTC (Thu) by **areilly** (subscriber, #87829) [[Link](#)]

Nvidia's Denver core is the current poster child for this idea. It gets past the slow startup problem by having a single-issue hardware decode path, so the JIT doesn't have to fire up unless it's busy code. Worked competitively in my old Nexus-9. Would be nice if you could compile your dense linear algebra directly to the VLIW core of you wanted to, imo.

Is it time for open processors?

Posted Jan 12, 2018 10:00 UTC (Fri) by **farnz** (subscriber, #17727) [[Link](#)]

It will be interesting to see what happens with Denver, yes - Nvidia has already gone from "Denver1 is the only CPU core you need" (in the K1) to "Denver2 is paired with ARM's Cortex-A57 so that Denver2 only provides the high-performance cores" (in the X2). If Carmel is effectively Denver3, then that validates the idea (to a degree), but if it's a more "traditional" ARM core, Denver can be added to the list of "couldn't quite make it work out" variants on the "fast in-order core, with complexity in software".

Is it time for open processors?

I've thought about going back to 1970 and give a lecture to a conference on programming languages on modern programming languages. The hardest question would be concurrency. Go's going back to Algol 68 and coroutines, Scala supports threads and actors *<i>and</i>* parallel data structures, and then we've got stuff like Spark and Hadoop on the large scale and direct CPU vector support at the lowest level. That's a huge range of options and remarkably little consensus about which ones are better. We're already pushing people towards more parallelism, given that quad-cores are becoming standard on desktops, but it's really hard.

Is it time for open processors?

Posted Jan 12, 2018 6:44 UTC (Fri) by **paulj** (subscriber, #341) [[Link](#)]

That's exactly the premise behind the UltraSPARC T1 and T2: Simple in-order core. Instead of trying to extract parallelism out of a single execution stream, it instead optimises for the software explicitly being coded for parallelism by creating threads. If a thread of execution stalls on memory, the core switches to another.

The benefit to ditching all the logic and long pipelines to support OoO and speculative execution, and using

simple, in-order execution, is that you can pack a lot more of those cores into the same transistor budget.

So you get a CPU that scales up really to handle loads that scale-out via threads of execution. The downside is that any single thread of execution is (much) slower than on a highly pipelined, speculative, OoO processor.

> Meanwhile, for low-end applications, there is a compressed instruction-stream format intended to reduce both memory and energy needs.

FWIW, to nitpick, this isn't specifically for low-end applications.

In fact, one of the stated reasons why the compressed extension is an extension and not part of the base ISA is that for the lowest of the low end, the extra complexity in the decoder might not be worth it.

<https://github.com/ucb-bar/riscv-boom> is an OOO risc-v core.

Building a risc-v core is almost as simple as typing make, btw, after you install the java/scala/chisel dependencies. You'd need a supported FPGA board (the Zynq series is good) and a few proprietary tools to finalize and write the code, and your cpu will grind for hours or days compiling it all, but that's it.

Ironically, once you do all that, you now have a co-processor living in the much-the-same physical memory space as the main processor, with all the security headaches that entails.

How do you describe hardware using a more or less normal programming language ?

Is it time for open processors?

Posted Jan 9, 2018 21:43 UTC (Tue) by **nybble41** (subscriber, #55106) [[Link](#)]

> How do you describe hardware using a more or less normal programming language ?

By using an "embedded Domain-Specific Language" library (in this case, Chisel[1]) which generates Verilog when the Scala program is run, similar to C^ÎaSH for Haskell[2] or MyHDL for Python[3]. What these all have in common is that they allow you to use your language of choice as a preprocessor or "template engine" to generate low-level HDL from relatively high-level descriptions.

Chisel is one of the few bright spots in hardware construction languages to date, especially as it has been used to build real processors, and comes with an increasingly large library of common chip components. SystemC has grown in popularity too (no open source implementation, however). Underneath it all, verilog and VHDL are better than in the 80s, but still a crufty mess that you are lucky to get something that works 1 time in 10. A

lot of parameterizing is adhoc and driven by scripts. Extensive validation and simulation is needed of the result.

Open sourced verilog designs are like open sourcing the buggy, uncommented, assembly language version of the high level program compiled with -O3.

I am partial to asynchronous circuits (stuff without a central clock is lower power, doesn't need explicit power management, and emits less noise, good for sensitive radios).

The <http://www.async.caltech.edu/Pubs/PDF/chpasync2012.pdf> chp design language and compiler were open sourced a ways back (and is somewhere on github I think but so far can't find it). We've seen a few interesting new chips built around async logic recently in the AI space.

Doesn't an open source CPU on an FPGA just shift the closed source part down? I might be wrong, as I don't know much about FPGAs. And the Zynq series seem to have a (presumably closed-source) ARM inside them - does that replace part of what would other be done in programmable logic?

Is it time for open processors?

Posted Jan 10, 2018 16:47 UTC (Wed) by **somlo** (subscriber, #92421) [[Link](#)]

> Doesn't an open source CPU on an FPGA just shift the closed source part down?

True, but the closed part is just a large grid of mostly identical configurable logic blocks (CLBs) with a programmable interconnect that builds your hardware design more or less like on a nano-scale "breadboard". As such, there should be much less magic in those closed bits than there would be in a whole closed ASIC.

> And the Zynq series seem to have a (presumably closed-source) ARM inside them

That's a hybrid ASIC/FPGA, where they added a pre-optimized-in-silicon "hard IP core" for applications that frequently require an ARM chip to free up generic CLBs for other uses. Not interesting/useful if one's goal is to have an open CPU design running on the FPGA. Ultimately, one can simply choose to ignore the closed hard IP core(s) and just utilize the generic CLBs for everything.

Is it time for open processors?

Posted Jan 10, 2018 23:07 UTC (Wed) by **mtaht** (â – supporter â –, #11087) [[Link](#)]

I mentioned the Zynq series with the arm processor in them because they are an easier way for programmers to get into futzing with an FPGA and their related toolchains, with a lot of fairly cheap boards out there with decent linux support.

It's a lot easier to poke at problems in a FPGA assist when you already have a working processor on-board.

Pure FPGA work requires you reach for the logic analyzer immediately.

> RISC-V is indeed not vulnerable to [Meltdown and Spectre] by virtue of not performing any speculative memory accesses.

Is that true? Surely it depends on the details of any particular implementation of the RISC-V ISA, and they could choose to do speculative memory accesses, or could check access permissions slightly too late in their pipeline, just like implementations of x86 and of ARM.

The post from RISC-V only says that the Rocket processor and all "announced RISC-V silicon" are not vulnerable, which is very different to saying "RISC-V is not vulnerable". BOOM sounds like it might be vulnerable to Spectre.

Is it time for open processors?

Posted Jan 9, 2018 19:05 UTC (Tue) by **joib** (subscriber, #8541) [[Link](#)]

While Meltdown and Spectre are fascinating and on everybodys minds right now (and Spectre-style attacks will likely be with us for a long time), the vast majority of vulnerabilities are still "normal" software ones such as buffer overflows.

Speaking of hardware, if we aren't rewriting everything in Rust or some other memory safe language, one way to make plain C safer would be to use hardware-enforced bounds checking such as the CHERI project (<https://www.cl.cam.ac.uk/research/security/ctsrld/cheri/>), which adds hardware support for fat pointers that can be used as capabilities (for a quick overview, <https://www.cl.cam.ac.uk/research/security/ctsrld/pdfs/201...>).

Of course, such an approach suffers from a chicken-and-egg problem; if mainstream architectures aren't supporting it, people won't port software for it either.. *sigh*

As a bit of a digression, printers (of the inkjet and laser variety, not the 3D variety) also seem like they would benefit from a successful open-source hardware project.

Printers are notorious for taking control away from and acting hostile towards their owners and users (e.g., DRM embedded in consumables, buggy proprietary software packages, invisible tracking dots, remotely

exploitable security flaws, and more). Additionally, although I am not an electronics expert, it seems plausible to me that someone could build an open-source printer from a kit in their home.

Every few years I do a few quick searches on the topic, and although a few incomplete projects have come and gone, I have not yet seen any lasting, comprehensive, and accessible open printer project. The main reason for this seems to be a combination of fears about patents, laws against reverse engineering, lack of demand (which I find hard to believe), and unexpected technical complexity. Hopefully I have simply missed the existence of such a project, but if not, I hope that the current discussions about open-source hardware might inspire some people with the necessary expertise, both technical and legal, to investigate the subject.

> I believe that inkjet printer nozzles can (could?) be destroyed by dried out ink if they are used too infrequently.

That has been my experience. I only have occasional need for hardcopies (a few times a yearâ... tax forms and the like, and one-off projects), and eventually switched to an HP Color LaserJet CM1312nfi at home after observing that I was replacing ink cartridges roughly every other print job due to the ink drying out. The laser was more expensive up frontâ... and replacement toner isn't cheap eitherâ... but since toner doesn't expire nearly as quickly as ink I can actually use the entire cartridge, drastically reducing my cost-per-page. I've had my laser printer for nearly a decade now and only had to replace the black toner once. As a bonus, the quality is higher for text and diagrams, and it even manages passable photos.

Is it time for open processors?

Posted Jan 11, 2018 2:55 UTC (Thu) by **JanC_** (subscriber, #34940) [[Link](#)]

I switched to a monochrome laser for the same reason, as pretty much everything I printed didn't really _need_ any colours (and those aren't really all that more expensive than inkjets nowadays).

Is it time for open processors?

Posted Jan 17, 2018 15:28 UTC (Wed) by **mstone_** (subscriber, #66309) [[Link](#)]

Yup, I had my old laserjet 4L for something close to 20 years with only a few toner cartridge replacements. Finally broke down and replaced with a color laser when it got too hard to find a replacement cartridge & parts. Tried an inkjet for a while, basically needed a new ink cartridge every time I printed, and that gets really expensive really fast. The inkjet had beautiful quality for pictures, and the ability to do full bleed output (hard

on a laser), but I don't generally need display-quality pictures "right now", so outsourcing that rare need is a no-brainer.

Programmable hardware

Posted Jan 10, 2018 3:57 UTC (Wed) by **songmaster** (subscriber, #1748) [[Link](#)]

Given the availability of really big high-speed FPGA chips today it surprises me that we don't hear about them being used as the basis for an open CPU design (and I'm not talking about those chips that already have an ARM or similar core built into them, that isn't the point of this idea). I understand that they aren't going to be as fast as a custom-developed chip, but raw chip speeds have been going up much more slowly in recent years and the ability to reprogram the hardware ought to make for some interesting ideas.

I could see multiple CPUs on different chips and each programmed or optimized for a different workload or part of the problem â€¦ that one is currently running Python bytecode, there's a JVM over here with a couple of cores, and the security processor over there is doing TLS and SSH. Of course the result is going to need an OS that is decidedly not SMP or even big.LITTLE. Any takers?

Programmable hardware

Posted Jan 10, 2018 16:53 UTC (Wed) by **somlo** (subscriber, #92421) [[Link](#)]

IIRC there's a partial port of Fedora to RISC-V, and there's even a way to run it on an FPGA board using a Xilinx Artix7 chip: <https://fedoraproject.org/wiki/Architectures/RISC-V>

What's missing right now is a way to build the FPGA bitstream from Verilog (or Chisel) sources using completely open tool chains, although there's some work in progress to address that (see <https://symbiflow.github.io/> mentioned in an earlier comment).

Programmable hardware

Posted Jan 10, 2018 22:55 UTC (Wed) by **brouhaha** (subscriber, #1698) [[Link](#)]

Soft-core processors in an FPGA are about two orders of magnitude slower than the fastest single-core x86 performance. Soft-core processors are great for some things, but replacing general-purpose processors is for the most part not one of them.

Soft-core processors are mostly useful if you're going to have an FPGA anyhow, for some other reason, and can throw in a low-ish performance processor little or no extra hardware cost.

As a hobby I've developed some 8-bit soft core processors, including one compatible with the RCA CDP1802, which was the first 8-bit CMOS single-chip microprocessor, circa 1976 (famous for use in the COSMAC ELF microcomputer). On recent FPGAs, my 1802 core runs at least 70 times the maximum instruction execution rate of the original, but that's with 40 years of hardware advancement.

Posted Jan 15, 2018 20:38 UTC (Mon) by **metasequoia** (subscriber, #119065) [[Link](#)]

Since a processor would be an international non-profit effort, a standing problem comes up - no mechanisms exist which can protect the rights of people, or FOSS and its 'gift to everybody' in what now amounts to an intentionally amoral supranational legislative space where corporate rights have been elevated above those of nations, and people and their rights and interests are intentionally absent, in order to enforce a lock down that allows only one possible future for the planet, one where everything is owned and nothing shared, a corporate centric world view so instinctively wrong to most people that its been hidden from sight while what amounts to a global oligarchy works feverishly to lock it into place irreversibly in as many ways as possible.

To carve demonstrably bad, undemocratic policy in stone forever, basically. This seems to me like a kind of madness.

There may also be current secret law, involving hardware, which if it is the case, I suspect would be because these agreements likely - in order to give all nation states equal rights - when dealing with multinational corporations, the agreements likely require some back door mechanisms they can all be given equally.

This is I suspect the case.. In these deals, there is no standing for any representatives of the whole worlds people as people are only instantiated through the country they are the market of.

See the problem?

We, the people, no longer have representation in this sphere. Its become "We the corporations". This is not in the abstract, its been done physically. Sure, we have governments, but their primary responsibility increasingly, because people were never made aware of the fact that this was being done, are to act on behalf of their corporations. In particular the newer agreements being promoted clearly are a sort of second enclosure transferring everything of value to corporations. For example, creation of any new public services of all kinds seem to be prohibited "except services supplied in the exercise of governmental authority": "a service supplied in the exercise of governmental authority" means any service which is supplied neither on a commercial basis, nor in competition with one or more service suppliers." So almost no public services end up qualifying for protection.

There is an urgent need for new structures to represent people in this sphere.

THE NEW INTERNET IS HERE AND IT RESIDES ENTIRELY WITHIN A SINGLE BROWSER

By Tom Boals

The new Apex777 Browser reference source code is the new internet. It is a browser that you can set to cut out, or include: Google, Chinese spies, Left-wing news, Right-wing news or cat videos.

Anything generated by servers that the open public users identify to be controlled by Google, Conservatives, Liberals, SJW's or frog lovers can be eliminated from your view.

It will never show you anything that is manipulated by others unless you want to see it.

The reference code is available for anyone to copy and skin their own version of the browser.

A master global open source list of DNS addresses, ASIN and other kinds of digital ID numbers tracks who pushes what agenda globally. Any member of the public can add to, or edit, the list and the list can be cross-checked, like Wikipedia, by everyone using the internet.

The browsers looks like any other browser except for two new windows: 1.) A drop down list of "add" or

"subtract" items, ie: "Add Google-owned servers" or "Subtract Google-owned servers" and 2.) A "type" field window to put the words of the things you do, or don't, want to see.

Over a trillion dollars has been spent by special-interest groups to try to hide, or show you, news and information that only those special interests want you to see. For free, you can decide what you want to see.

The browser is free to the public.

"Copy it", say the open-source developers. We want the whole world to use it.

With this browser, Google's Democrat-controlled liberal agenda will no longer be pushed in your face and/or the KKK's extreme right-wing agenda will not flood you with Nazi propaganda. You can finally decide what the internet shows you.

The browser IS your search engine. You do not need Google or Facebook to decide what you get to see.

Part of the technology works like the old voice recognition technology breakthrough. In the old days you needed to pass all of the voice across the whole bandwidth. It was then discovered that voice recognition only needed the "outside edges" or outline, of a voice cue, which uses massively less data, to work.

You no longer need to wait for Google's servers to cull the data assigned to your political persuasion profile file. You keep your search data on your own device and in shared clusters across the web.

These clusters work something like torrents work for sharing movies.

Massive security and anonymize options are included as plug-ins including a switching mount to every known VPN.

The browser is also designed to interface to all of Tim Berners-Lee's new modules as they are released.

THE NEW RESISTANCE

[New resistance?](#)

[MAG: Hysteria of SOUTHERN POVERTY LAW CENTER: Accuses 'impure' of 'fascism'...](#)

THE NEW WAY TO EXPOSE CORRUPTION IS USING SOMETHING CALLED IPFS

The BitTorrent protocol has a decentralized nature but the ecosystem surrounding it has some weak spots. Torrent sites, for example, use centralized search engines which are prone to outages and takedowns. Torrent-Paradise tackles this problem with IPFS, a searchable torrent indexer that's shared by the people.

[IPFS](#), short for InterPlanetary File System, has been around for a few years now.

While the name sounds alien to most people, it has a growing userbase among the tech-savvy.

In short, IPFS is a decentralized network where users make files available among each other. If a website uses IPFS, it is served by a "swarm" of people, much like BitTorrent users do when a file is shared.

The advantage of this system is that websites can become completely decentralized. If a website or other resource is hosted with IPFS, it remains accessible as long as the computer of one user who "pinned" it remains online.

The advantages of IPFS are clear. It allows archivists, content creators, researchers, and many others to distribute large volumes of data over the Internet. It's censorship resistant and not vulnerable to regular hosting outages.

"IPFS is really good and if everyone started using that instead it would be great. It would be working perfectly with less centralization. The problem is that the big sites like TPB and KAT are not really good at using new technology," Sunde said.

KAT was shut down shortly after Sunde commented and while The Pirate Bay remains online, it now suffers more downtime than ever. Still, none of the major pirate sites have shown an interest in IPFS thus far.

There are others who've taken up this challenge though. A developer going by the handle "Urban Guacamole" recently launched [Torrent-Paradise](#), a torrent index which is powered with IPFS.

"I feel like decentralizing search is the natural next step in the evolution of the torrent ecosystem. File sharing keeps moving in the direction of more and more decentralization, eliminating one single point of failure after another," he informs TF.

To start the site Torrent-Paradise used a copy of The Pirate Bay database. This was transformed into a searchable index with help [from ipfsearch.xyz](#) and the site's operator has a DHT crawler which, at the moment, adds approximately 20,000 new torrents per day.

This all sounds positive but there are also some drawbacks.

One of the main hurdles is that IPFS has to be installed and configured if you want to become a node. This is a relatively easy process, but the average web user may not be familiar with using a command line to set it up, which is a requirement.

However, there are also IPFS gateways available. Cloudflare, for example, introduced one recently. This allows anyone to access sites such as Torrent-Paradise through a [custom URL](#), but these people don't help to share the site.

Another downside is that the static index which the site relies on is only updated once a day. This isn't a technical restriction, but more a practical one. In theory, it could be updated in near real-time.

At the moment there's both a [regular](#) Torrent-Paradise website, accessible to all, as well as an [IPFS version](#) which will remain ad-free. The site itself is fairly basic, but the real point of it is to showcase the power of decentralization.

The decentralization of file-sharing has been ongoing for decades. The BitTorrent protocol is decentralized, for example. And The Pirate Bay moved this further by removing its tracker and torrents, relying on DHT and magnet links instead.

Decentralizing torrent search is next, Urban Guacamole says, who believes that IPFS could become more common among torrent sites in the future.

Torrent-Paradise's operator sees availability as one of the main advantages. In this case, that goes hand in hand with being censorship resistant.

Because each update of Torrent Paradise is an IPFS hash, it is impossible for anyone, including me, to take down the site. As long as there's someone pinning it (the IPFS equivalent of seeding), the site will be available.

Since the site started out as a Pirate Bay copy, rightsholders may eventually come in with complaints. While the site will comply with DMCA notices, it can't control the hashes that are already shared in the network.

For the time being, Urban Guacamole plans to continue his work on the site. With a free domain name and Cloudflare support, it only costs roughly \$4 a month, so the cost is not a factor.

It most definitely would help them keep their site available when their servers are down, Urban Guacamole says.

THE NEW WAY TO EXPOSE CORRUPTION IS USING SOMETHING CALLED IPFS

The advantage of this system is that websites can become completely decentralized. If a website or other

resource is hosted with IPFS, it remains accessible as long as the computer of one user who â... pinnedâ... it remains online.

The advantages of IPFS are clear. It allows archivists, content creators, researchers, and many others to distribute large volumes of data over the Internet. Itâ... s censorship resistant and not vulnerable to regular hosting outages.

â... IPFS is really good and if everyone started using that instead it would be great. It would be working perfectly with less centralization. The problem is that the big sites like TPB and KAT are not really good at using new technology,â... Sunde said.

KAT was shut down shortly after Sunde commented and while The Pirate Bay remains online, it now suffers more downtime than ever. Still, none of the major pirate sites have shown an interest in IPFS thus far.

There are others whoâ... ve taken up this challenge though. A developer going by the handle â... Urban Guacamoleâ... recently launched [Torrent-Paradise](#), a torrent index which is powered with IPFS.

â... I feel like decentralizing search is the natural next step in the evolution of the torrent ecosystem. File sharing keeps moving in the direction of more and more decentralization, eliminating one single point of failure after another,â... he informs TF.

To start the site Torrent-Paradise used a copy of The Pirate Bay database. This was transformed into a searchable index with help [from ipfsearch.xyz](#) and the siteâ... s operator has a DHT crawler which, at the moment, adds approximately 20,000 new torrents per day.

This all sounds positive but there are also some drawbacks.

One of the main hurdles is that IPFS has to be installed and configured if you want to become a node. This is a relatively easy process, but the average web user may not be familiar with using a command line to set it up, which is a requirement.

However, there are also IPFS gateways available. Cloudflare, for example, introduced one recently. This allows anyone to access sites such as Torrent-Paradise through a [custom URL](#), but these people donâ... t help to share the site.

Another downside is that the static index which the site relies on is only updated once a day. This isnâ... t a technical restriction, but more a practical one. In theory, it could be updated in near real-time.

At the moment thereâ... s both a [regular](#) Torrent-Paradise website, accessible to all, as well as an [IPFS version](#) which will remain ad-free. The site itself is fairly basic, but the real point of it is to showcase the power of decentralization.

The decentralization of file-sharing has been ongoing for decades. The BitTorrent protocol is decentralized, for example. And The Pirate Bay moved this further by removing its tracker and torrents, relying on DHT and magnet links instead.

â... Decentralizing torrent search is next,â... Urban Guacamole says, who believes that IPFS could become more common among torrent sites in the future.

Torrent-Paradiseâ... s operator sees â... availabilityâ... as one of the main advantages. In this case, that goes hand in hand with being censorship resistant.

â... Because each update of Torrent Paradise is an IPFS hash, it is impossible for anyone, including me, to take down the site. As long as thereâ... s someone pinning it (the IPFS equivalent of seeding), the site will be available.â...

Since the site started out as a Pirate Bay copy, rightsholders may eventually come in with complaints. While the site will comply with DMCA notices, it canâ... t control the hashes that are already shared in the network.

For the time being, Urban Guacamole plans to continue his work on the site. With a free domain name and Cloudflare support, it only costs roughly \$4 a month, so the cost is not a factor.

â... It most definitely would help them keep their site available when their servers are down,â... Urban Guacamole says.

Tax avoidance

Paradise Papers

0:00 / 2:07

What are the Paradise Papers? â... video

-

Juliette Garside

The worldâ... s biggest businesses, heads of state and global figures in politics, entertainment and sport who have sheltered their wealth in secretive tax havens are being revealed this week in a major new investigation into Britainâ... s offshore empires.

The details come from a leak of 13.4m files that expose the global environments in which tax abuses can thrive â... and the complex and seemingly artificial ways the wealthiest corporations can legally protect their wealth.

The material, which has come from two offshore service providers and the company registries of 19 tax havens, was obtained by the German newspaper [SÃ¼ddeutsche Zeitung](#) and shared by the International Consortium of Investigative Journalists with partners including the Guardian, [the BBC](#) and [the New York Times](#).

The project has been called the Paradise Papers. It reveals:

- [Millions of pounds from the Queenâ... s private estate has been invested in a Cayman Islands fund](#) â... and some of her money went to a retailer accused of exploiting poor families and vulnerable people.
- [Extensive offshore dealings by Donald Trumpâ... s cabinet members, advisers and donors](#), including substantial payments from a [firm co-owned by Vladimir Putinâ... s son-in-law to the shipping group of the US commerce secretary, Wilbur Ross](#).
- How [Twitter and Facebook received hundreds of millions of dollars in investments that can be traced back to Russian state financial institutions](#).
- The tax-avoiding Cayman Islands trust [managed by the Canadian prime minister Justin Trudeauâ... s chief moneyman](#).
- A previously unknown [\\$450m offshore trust that has sheltered the wealth of Lord Ashcroft](#).
- Aggressive tax avoidance by multinational corporations, including Nike and Apple.
- How some of the biggest names in the film and TV industries protect their wealth with an array of offshore schemes.
- The billions in tax refunds by the Isle of Man and Malta to the owners of private jets and luxury yachts.
- The [secret loan and alliance used by the London-listed multinational Glencore](#) in its efforts to secure lucrative mining rights in the Democratic Republic of the Congo.
- The [complex offshore webs used by two Russian billionaires](#) to buy stakes in Arsenal and Everton football clubs.

The disclosures will put pressure on world leaders, including Trump and the British prime minister, Theresa May, who have both pledged to curb aggressive tax avoidance schemes.

The publication of this investigation, for which more than 380 journalists have spent a year combing through data that stretches back 70 years, comes at a time of growing global income inequality.

Meanwhile, multinational companies are shifting a growing share of profits offshore â... â“600bn in the last year alone â... the leading economist Gabriel Zucman will reveal in a study to be published later this week.

The worldâ... s (second) biggest data leak

“... Tax havens are one of the key engines of the rise in global inequality,” he said.
“... As inequality rises, offshore tax evasion is becoming an elite sport.”

At the centre of the leak is Appleby, a law firm with outposts in Bermuda, the Cayman Islands, the British Virgin Islands, the Isle of Man, Jersey and Guernsey. In contrast to [Mossack Fonseca](#), the discredited firm at the centre of last year’s [Panama Papers investigation](#), Appleby prides itself on being a leading member of the “... magic circle” of top-ranking offshore service providers.

It acted for the establishment offshore, providing the structures that helped to legally reduce their tax bills.

[Appleby says](#) it has investigated all the allegations, and found “... there is no evidence of any wrongdoing, either on the part of ourselves or our clients”, adding: “... We are a law firm which advises clients on legitimate and lawful ways to conduct their business. We do not tolerate illegal behaviour.”

THE ULTIMATE CORRUPTION EXTERMINATION MANUAL - Revision 5.6

This is a book about creative *NON*-Violence.

This is an instruction book about how to destroy the most criminally corrupt politicians and dirt-bags in the world. It teaches you how to wipe out any corrupt person, campaign, company or other entity without breaking the law and to do so for very little expense and with no need for expert skills.

Any private citizen taxpayer has the right, the tools and the ability to do these things.

Why should you need to do this?

BECAUSE NONE OF THE PEOPLE YOU ARE PAYING TAXES TO ARE DOING THEIR JOBS!

The local police, The FBI, The Courts, The SEC, The FEC, The Attorney Generals, The Mayors, The City Supervisors, Your Senators, Your Congress-People.. **ALL OF THEM HAVE RECENTLY BEEN ARRESTED, INDICTED, FIRED AND/OR EXPOSED DOING CRIMES TO COVER UP THEIR FRIEND'S CRIMES!**

THEY HAVE ALL RECENTLY BEEN CAUGHT RUNNING FINANCIAL CRIMES AND OPERATING STONE-WALL CAMPAIGNS IN ORDER TO KEEP THE PUBLIC FROM GETTING JUSTICE!

You, the taxpayers, have nobody in the system that is on-your-side any more.

For example; The Silicon Valley Oligarchs pay-off the California Senators and they all put hundreds of millions of dollars in their private bank accounts in the Cayman Islands. They got most of that money from your paycheck and your tax payment every April.

They are not going to help you! They are going to continue to rob you while running their stock market insider trading scams at your expense.

"Officials" in California may say *"oh, my, that certainly sounds like a bad thing...you should report that, immediately to your lawful representatives: Dianne Feinstein and Nancy Pelosi.."* The fact is that Feinstein and Pelosi are running some of the largest graft, payola, revolving door, nepotism and insider trading scams in the whole crime scheme. So how can anyone expect you to go into their offices with a straight face and expect them to help you?

Not only will they not help you, the second you leave their office, their staff will be on the phone to Fusion GPS, Gizmodo and Gawker Media, Black Cube and Podesta Group to order those companies to attack and destroy you. Your life will be ended.

If they get to do that to you, then you get to do it right back to them...except you are going to partner with 300 million other voting taxpayers to utterly and completely wipe these dirty scumbag politicians out forever.

You will destroy their brand, their finances, their power and their family legacy for the rest of time in every history book that will ever be! You will expose them. You will shame them. You will peel their whole filthy

dynastic family empires open like a skinned possum!

CIA, FSB and STAZI psychological warfare operatives are widely documented deploying techniques that can brainwash you into killing your whole family, echo-chambering your whole factory to be either for, or against, unions, believing mass media propaganda about totally fictional issues and other subliminal mind tricks. There are tens of thousands of books and movies about how Madison Avenue ad agencies use these tactics. Modern politicians created operations like In-Q-Tel and New America Foundation to weaponize these tactics. These are the tactics that corrupt politicians and sociopath Silicon Valley social media companies are now using as political weapons against you.

They are ***not*** doing awful things like this to try to get you to believe that their political ideas are better. They are doing awful things with your government and your media in order to rig the stock market so they can buy more hookers, jet planes and mansions. You must shut them down before everything is taken away from you and you have no options left for counter-measuring their crimes.

At the point that all of the public's hope, and all of the taxpayers options, are taken away. That is the day the public starts shooting all of the politicians with actual guns.

This book was created to stop that potential violence and to give the public one last lawful and creative non-violent option.

Average consumers are now wiping out the largest corrupt companies and politicians on Earth; and you can do it too using one potent weapon: The Truth!

For the rest of time, the message must ring out loud and clear:

"DO NOT EVER RUN FOR POLITICAL OFFICE IF YOU OR YOUR COVERT FINANCIERS WANT TO MAKE MONEY OFF OF IT. YOU WILL BE WATCHED AND HUNTED DOWN FROM THE DAY YOU ANNOUNCE YOUR CAMPAIGN."

The Public now has access to all of the same tools that the CIA, NSA, KGB, FBI and Fusion GPS have and they have hundreds of millions more "agents" (voters) than all of those spy agencies combined.

In other books we have exposed all of the dirty tactics they use to operate their crimes. Now we are exposing all of the methods that any members of the public can use to catch them and then use mass media distribution to expose them.

The big anti-corruption check-list looks like this. As you can see, it is well on the way to being completed:

"1.) Build The Internet (Done)

2.) Put Movies And Music On The Internet To Get All Of The Base Demographics And Nose Pickers To Come To A Collaborative Global Network (Done)

3.) Give Everybody On Earth All Of The Secrets About How Abused And Manipulated They Are By A Handful of Evil Billionaires (Done)

4.) Expose The Manipulative Fraud Of Political Party Bosses (Done)

5.) Tell The Entire Planet, 1 Million People At A Time, How The Billionaires Companies Abuse Their

Privacy, Minds, Human Rights and Media Impressions (Done)

6.) Crash All of the Billionaires Main Stream â... Fake Newsâ... Information Outlets by Exposing Them And Giving All News Away For Free And Teaching People How To Make Free Newspapers (Done)

7.) Crash the Evil Billionaires Silicon Valley Companies, and Money, By Contacting 1 Million People at a Time to Remind Them to Boycott Silicon Valley Companies and Their Products (Done)

8.) Contact Every Advertiser of Every Silicon Valley Billionaire and Warn Them To Pull All Ad Budgets For the Companies Who Contribute to Political Campaigns (In Process)

9.) Make It So That Non-Main-Stream Candidates Can Run And Win By Exposing And Breaking Illicit Election Rigging (Done)

10.) Sit Back And Watch The Fireworks (In Process)"

That check-list is very high-level. Let's get down into the weeds and examine the details of the process.

You must become an FBI-Class, CIA-capable forensic investigator with your computer and mass social networking.

You have access to all of the same tools and intellect that every FBI and CIA agent has access to. CIA and FBI agents primarily sit at computers and track down connections. You can do that too using free public software and groups of people that also hate political corruption. It is actually quite easy.

You know when something is wrong or when something "smells fishy". Now you can turn your intuition and your public spirit into productive home-based forensic research that makes your nation great again.

You will create public case files and gather news articles and related information in order to expose each of the corrupt people that ruin this great country.

You will expose the dirty and illicit deeds of elected officials and their corrupt political financiers. All of these actions are 100% legal and will be appreciated by non-corrupt law enforcement agencies and the public:

- Expose their Hookers in widely released news and social media releases
- Expose their Rent Boys in widely released news and social media releases
- Expose all of the bad dates and sex extortion they engaged in, in widely released news and social media releases
- Expose their hidden family trust fund payola accounts, in widely released news and social media releases
- Expose their shell corporations they use to hide from the IRS
- Expose their mistresses
- Expose their addictions
- Expose their under-the-table payments
- Expose their illegal workers

- Expose their expensive cars, jewelry and homes that can't afford on a legal salary
- Expose their Cayman Island, Belize and Swiss hidden bank accounts
- Expose their personal email accounts they illegally used to hide government fraud
- Expose their illicit hidden email servers
- Expose their secret black-lists and start-up valuation rigging like in the Angel Gate Scandal
- Expose their Uber and Lyft GPS docs proving that they lied about where they went
- Expose their campaign financing records
- Expose their social media statements proving they are, or fund, ANTIFA or political disruption programs
- Expose their money laundering
- Expose their connections to Pede groups and activities
- Expose their hotel records and videos of illicit hotel meetings
- Expose their PayPal, Bitcoin and credit card payments for illicit services and products
- Distribute creative Memes exposing their crimes
- File reports with their employers disclosing their crimes and tell the media you told their employers
- File many copies of criminal reports on them with all law enforcement entities
- Expose the members of their family that hide money for them or use their names to launder money
- Photo and video document all of their meetings and actions
- Aggregate all of the video investigations about them on many different web video sites
- Write and distribute books, articles and white-papers about their crimes
- Promote new laws that makes what that criminal uses as a loop-hole, illegal
- Re-release all of the above every six months in order to keep the crimes in people's minds
- Use "The Striesand Effect" to it's maximum technical potential and research how the "Effect" works
- Grow your network of voters and taxpayers who are helping you and make your supporter network bigger every day
- Expose the manner in which Google, Facebook and Twitter fight against exposing their criminal friends
- Use Google, Facebook and Twitter's own illicit tools against them and expose them with "Hypocrisy Exposure" when they censor

- Confront them in every single public presentation they attend and expose them in public
- Create coordinated groups of volunteers to expose the troll farms and click farms of the corrupt manipulators
- Expose and publicly document all of their illicit real estate holdings, mansions and property scams
- Release of the details of their crooked secret partnership contracts
- Place a First Amendment informational exhibit outside of their offices, homes and each door they go through each day
- Write them weekly and tell them that they are exposed. Send them certified letters proving that you told them that you know
- Document and publicly expose all of their trips and expenditures
- Document the identities of the service trucks that come to their homes and offices
- Photo document all of their workers, interns and secretaries
- Contact their staff and ask them to report the illicit deeds of their employer. Provide media and police contact information.
- Help their staff and the public organize class-action abuse law suits against the perpetrators
- File RICO Racketeering lawsuits against the corrupt
- File FEC charges, ie: Google provided over \$1B of search engine rigging for Obama's elections but never reported that to the FEC
- Expose their stock market manipulations and valuation rigging in Wall Street Pump-And-Dump scams
- Expose the insider trading where Senators own the stock that they just provided government perks for
- Expose politicians that make tens of millions more dollars, from mystery funds, than their salary should allow
- Use pictures of expensive toys that politicians acquired from taxpayer funds via crony payola
- When they are hacked (which you legally can't do) expose the hacked material globally as far as possible (which you legally can do)
- Read and analyze all publicly posted hacked emails and point out the crimes it exposes
- Meme any criminal remarks that the target makes
- And thousands of additional fully legal public investigation methods...

Every single crooked politician, and their corrupt billionaire financiers, have been using these tactics against the public for 20 years. Silicon Valley, David Brock's groups, John Podesta's groups, Stratfor, Black Cube, Gawker/Gizmodo and a host of illicit organizations have used all of the above tactics to attack domestic

taxpaying citizens in the USA.

Now YOU get to give them a taste of their own medicine!

Pelosi, Feinstein and their financiers use Gizmodo Media, Gawker Media, Jalopnik, and Univision to run retribution vendetta hatchet job media attacks on members of the public that speak out about their crimes. In exchange here is what the public is "giving back" to Gizmodo Media, Gawker Media, Jalopnik, and Univision:

- 1. Added Gizmodo, Jalopnik, Univision prostitute and rent boy uses to master Google docs files and forwarded to law enforcement...*
- 2. Sent duplicates of reports previously provided to James Comey to Christopher Wray at the FBI and regional FBI offices...*
- 3. Added Gizmodo, Jalopnik, Univision tax evasion records to master Google docs files and reported them to IRS, EU and InterPol...*
- 4. Added Gizmodo, Jalopnik, Univision political party past work records to master Google docs files and copied that to adversarial political parties and reporters...*
- 5. Updated every case file on each Gizmodo, Jalopnik, Univision past and present worker in master Google docs files and forwarded them to investigative organizations...*
- 6. Source backers for Gizmodo lawsuits and contact every party attacked by Gizmodo Media to introduce backers, litigation firms and draft case merits to assist with their cases...*
- 7. Launch Gizmodo expose' national news articles and distribute by hand to all related reports in AP, Reuters, Muck Rack, DNC and GOP mailing lists, with background data sets...*
- 8. Release video of London young men who claim to have been abused by Nick Denton...*
- 9. Release video of Manhattan young men who claim to have been abused by Nick Denton...*
- 10. Add Gizmodo, Jalopnik, Univision political email communications with Obama White House to master Google docs files and distribute to AP, Reuters, Muck Rack, DNC and GOP mailing lists, with background data sets...*
- 11. Privately contact Gizmodo, Jalopnik, Univision current and ex-staff and offer cash awards for whistle-blowing...*
- 12. Submit formal "requests for charges" with SEC, FBI, FTC, IRS, FEC, FCC, GAO, DOJ and other agencies...*
- 13. File Grand Jury requests for hearings into tax evasion, money laundering, stock rigging, collusion, election manipulation...*
- 14. Prepare rapid-response story points for the Gang-of-20 reporters to counter any Gawker/Gizmodo faÅšades of First Amendment rights with proof of why Gizmodo, Jalopnik, Univision gave up their rights by engaging in crimes...*
- 15. Destroy the investors and company trying to revive Gawker Media by exposing the dirty finances, fake ad*

stats, click-farms, hookers, money laundering, FEC fraud and other dirt behind them...

16. Deliver the full dossier on them to the public and the media..."

That is just a tiny example from one small campaign.

The pain must be extreme when a politician, who is hired to protect you, puts a thirty million dollar kill order on you that you could never possibly over-come. Taxpayers should not be destroyed because they "did the right thing" and reported a crime.

A business only has the right to sell a product or service. They do not have the right to manipulate politics.

A politician only has the right to serve YOU. They do not have the right to serve themselves criminal money laundering and insider trading.

If this overview seems to be the sort of thing you would like to undertake on behalf of yourself, or your country, search on torrent sites, file repositories and other web distribution for the full book set: "**KILL THEM ALL: HOW TO WIPE OUT THE CORRUPT FOREVER**"

THE "DRAIN THE THEATERSâ... MOVEMENT PUNISHES HOLLYWOOD FOR THEIR PARTICIPATION IN POLITICAL CORRUPTION

by Yuji Nakamura, Pavel Alpeyev, and Takashi Amano

- Japanese company to sell part of stake in medical site M3
- CEO of Sony Entertainment announced departure two weeks ago

The studio has struggled recently, including with last year's Ghostbusters sequel and a movie based on the Angry Birds video game. Sony warned in June the division was at a risk of posting more losses.

Source: Columbia Pictures/Everett Collection

[Sony Corp.](#) said it will take a 112 billion yen (\$1 billion) writedown in its movie business after reviewing the future profitability of its operations.

The company said it would book the charge in the fiscal third quarter and is examining how that will affect its forecasts. To offset part of the loss, the company also said it would sell shares in the medical web service [M3 Inc.](#) to Goldman Sachs Group Inc.'s Japan unit, in a deal worth about 37 billion yen.

The announcement comes two weeks after Sony said the chief executive officer of Sony Entertainment, Michael Lynton, is stepping down after a 13-year run. The studio has struggled recently, including with last year's Ghostbusters sequel and a movie based on the Angry Birds video game. Sony warned in June the division was at a risk of posting more losses.

There has been a suspicion in the market that Sony doesn't have a firm grip on the movie business, but still the amount is a surprise," said Kazunori Ito, an analyst at Morningstar Investment Services. That said, with Lynton's departure and this

written down, all the bad news is out and the attention can turn on their plan for the coming fiscal year.â€¦

Little Changed

Sony shares closed little changed in Tokyo prior to the announcement. Shares listed in Germany fell 2.6 percent in light-volume trading after the statement was published.

â€¦ The decline in the DVD and Blue-ray market was faster than we anticipated,â€¦ Takashi Iida, a Sony spokesman said by phone.

The Tokyo-based company is increasingly relying on its video games business, which generated twice as much income in the last fiscal year as film. Sonyâ€™s PlayStation 4 console is outselling Xbox One, its closest rival from Microsoft Corp., by about two-to-one, according to industry website VGChartz.

Lyntonâ€™s departure capped a tumultuous two years for the division since a cyberattack blamed on North Korea paralyzed the studio. The hacking led to private messages leaking onto the internet and the departure of film-division head chief Amy Pascal. Sonyâ€™s CEO Kazuo Hirai has temporarily relocated to California for six-months to oversee a review of the division and look for a replacement for Lynton, the company said this month.

â€¦ Financial Responsibilityâ€¦

In an e-mail to employees, Hirai and Lynton said the transition gets underway this week and turn-around efforts will focus on expanding globally, making more use of the studioâ€™s intellectual property and â€¦ realizing a culture of financial responsibility.â€¦ The e-mail also partly blamed the writedown on â€¦ dramaticâ€¦ industrywide shifts in home entertainment.

In June, Sony [lowered its projection](#) for film revenue in fiscal year 2018 by \$500 million to a range of \$9.5 to \$10.5 billion. It also lowered its operating profit margin to a range of 6 to 7 percent, from 7 to 8 percent. Sonyâ€™s Iida said the divisionâ€™s television broadcasting unit, which generates the majority of revenue, is unaffected and continues to do well.

Sony is increasingly leaning on China to offset the downturn. In September, Dalian Wanda Group Co., the worldâ€™s largest movie screen operator [agreed](#) to invest in Sony Pictures productions in an open-ended partnership. But a [slowdown](#) in movie revenue on the Chinese mainland has raised doubts about how much the deal will bolster Sonyâ€™s performance.

M3 slipped 1.2 percent prior to the announcement on Monday and is up 17 percent over the past 12 months. M3 will continue to count Sony as its largest shareholder even after the deal, according to data compiled by Bloomberg. Prior to the deal, Sony held 39.3 percent of M3â€™s outstanding shares.

FACEBOOK CENSORSHIP OF ALTERNATIVE MEDIA JUST THE BEGINNING

â... We are just starting to push back.â...

Max Blumenthal and Jeb Sprague |
GrayZoneProject.com

IMAGE CREDITS: [JAAP ARRIENS/NURPHOTO VIA GETTY IMAGES](#).

At a Berlin security conference, hardline neocon Jamie Fly appeared to claim some credit for the recent coordinated purge of alternative mediaâ...!

This October, Facebook and Twitter deleted the accounts of hundreds of users, including many alternative media outlets maintained by American users. **Among those wiped out in the coordinated purge were popular sites that scrutinized police brutality and U.S. interventionism**, like The Free Thought Project, Anti-Media, and Cop Block, along with the pages of journalists like [Rachel Blevins](#).

Facebook [claimed](#) that these pages had *â... broken our rules against spam and coordinated inauthentic behavior.â...* However, sites like The Free Thought Project were verified by Facebook and widely recognized as legitimate sources of news and opinion. John Vibes, an independent reporter who contributed to Free Thought, [accused](#) Facebook of *â... favoring mainstream sources and silencing alternative voices.â...*

In comments published here for the first time, **a neoconservative Washington insider has apparently claimed a degree of credit for the recent purge â... and promised more takedowns in the near future.**

â... Russia, China, and other foreign states take advantage of our open political system,â... remarked Jamie Fly, a senior fellow and director of the Asia program at the influential think tank the German Marshall Fund, which is [funded by the U.S. government and NATO](#).

â... They can invent stories that get repeated and spread through different sites. So we are just starting to push back. Just this last week Facebook began starting to take down sites. So this is just the beginning.â...

Fly went on to complain that *â... all you need is an emailâ... to set up a Facebook or Twitter account, lamenting the sitesâ... accessibility to members of the general public*. He predicted a long struggle on a global scale to fix the situation, and pointed out that to do so would require constant vigilance.

Fly made these stunning comments to Jeb Sprague, who is a visiting faculty member in sociology at the University of California-Santa Barbara and co-author of this article. The two spoke during a lunch break at a [conference on Asian security](#) organized by the [Stiftung Wissenschaft und Politik](#) in Berlin, Germany.

In the tweet below, Fly is the third person from the left who appears seated at the table.

A rare opportunity to discuss Asian security in Berlin, with an excellent group of experts from the region [@SWPBerlinpic.twitter.com/Ogdc9d5BVK](#)

â... Garima Mohan (@GarimaMo) [October 15, 2018](#)

The remarks by Fly â... â... we are just starting to push backâ... â... seemed to confirm the worst fears of the alternative online media community. If he was to be believed, the latest purge was motivated by politics, not spam prevention, and was driven by powerful interests hostile to dissident views, particularly where American state violence is concerned.

JAMIE FLY, RISE OF A NEOCON CADRE

Jamie Fly is an influential foreign policy hardliner who has spent the last year lobbying for the censorship of â... fringe viewsâ... on social media. **Over the years, he has advocated for a military assault on Iran, a [regime change war](#) on Syria, and hiking military spending to unprecedented levels. He is the embodiment of a neoconservative cadre.**

Like so many second-generation neocons, Fly [entered government](#) by burrowing into mid-level positions in George W. Bushâ... s National Security Council and Department of Defense.

In 2009, he was appointed director of the [Foreign Policy Initiative](#) (FPI), a rebranded version of Bill Kristolâ... s Project for a New American Century, or PNAC. The latter outfit was an umbrella group of neoconservative activists that first made the case for an invasion of Iraq as part of a wider project of regime change in countries that resisted Washingtonâ... s sphere of influence.

By 2011, Fly was advancing the next phase in PNACâ... s blueprint by [clamoring](#) for military strikes on Iran. â... More diplomacy is not an adequate response,â... he argued. A year later, Fly [urged](#) the US to â... expand its list of targets beyond the [Iranian] nuclear program to key command and control elements of the Republican Guard and the intelligence ministry, and facilities associated with other key government officials.â...

Fly soon found his way into the senate office of Marco Rubio, a neoconservative pet project, assuming a role as his top foreign policy advisor. Amongst other interventionist initiatives, Rubio has taken the lead in promoting harsh economic sanctions [targeting Venezuela](#), even advocating for a U.S. [military assault](#) on the country. When Rubioâ... s 2016 presidential campaign floundered amid a mass revolt of the Republican Partyâ... s middle American base against the party establishment, Fly was forced to cast about for new opportunities.

He found them in the paranoid atmosphere of [Russiagate](#) that formed soon after Donald Trumpâ... s shock election victory.

PROPORNOT SPARKS THE ALTERNATIVE MEDIA PANIC

A journalistic insiderâ... s account of the Hillary Clinton presidential campaign, *Shattered*, revealed that â... in the days after the election, Hillary declined to take responsibility for her own loss.â... Her top advisers were summoned the following day, according to the book, â... to engineer the case that the election wasâ... t entirely on the up-and-up â...! Already, Russian hacking was the centerpiece of the argument.â...

Less than three weeks after Clintonâ... s defeat, the Washington Postâ... s Craig Timberg published a [dubiously sourced report](#) headlined, â... Russian propaganda effort helped spread â... fake news.â... â... The article hyped up a McCarthyite effort by a shadowy, anonymously run organization called PropOrNot to blacklist some 200 American media outlets as Russian â... online propaganda.â...

The alternative media outfits on the [PropOrNot blacklist](#) included some of those recently purged by Facebook and Twitter, such as The Free Thought Project and Anti-Media. Among the [criteria](#) PropOrNot identified as signs of Russian propaganda were â... Support for policies like Brexit, and the breakup of the EU and

Eurozoneâ... and â... Opposition to Ukrainian resistance to Russia and Syrian resistance to Assad.â... PropOrNot called for â... formal investigations by the U.S. governmentâ... into the outlets it had blacklisted.

According to Craig Timberg, the Washington Post correspondent who uncritically promoted the media suppression initiative, *Propornot was established by â... a nonpartisan collection of researchers with foreign policy, military and technology backgrounds.â...* Timberg quoted a figure associated with the George Washington University Center for Cyber and Homeland Security, Andrew Weisburd, and cited a report he wrote with his colleague, Clint Watts, on Russian meddling.

Timbergâ... s piece on PropOrNot was promoted widely by [former top Clinton staffers](#) and [celebrated](#) by ex-Obama White House aide Dan Pfeiffer as â... the biggest story in the world.â... But after a wave of stinging criticism, including in the pages of the [New Yorker](#), the article was amended with an editorâ... s note stating, â... The [Washington] Postâ...! does not itself vouch for the validity of PropOrNotâ... s findings regarding any individual media outlet.â...

PropOrNot had been seemingly exposed as a McCarthyite sham, but the concept behind it â... exposing online American media outlets as vehicles for Kremlin â... active measuresâ... â... continued to flourish.

THE BIRTH OF THE RUSSIAN BOT TRACKER â... WITH U.S. GOVERNMENT MONEY

By August, a new, and seemingly related initiative appeared out of the blue, this time with backing from a bipartisan coalition of Democratic foreign policy hands and neocon Never Trumpers in Washington. Called the [Alliance for Securing Democracy](#) (ASD), the outfit aimed to expose how supposed Russian Twitter bots were infecting American political discourse with divisive narratives. It featured a daily â... [Hamilton 68](#)â... online dashboard that highlighted the supposed bot activity with easily digestible charts. Conveniently, the site avoided naming any of the digital Kremlin influence accounts it claimed to be tracking.

The initiative was immediately [endorsed by John Podesta](#), the founder of the Democratic Party think tank the Center for American Progress, and former chief of staff of Hillary Clintonâ... s 2016 presidential campaign. Julia Ioffe, the Atlanticâ... s chief Russiagate correspondent, [promoted](#) the bot tracker as â... a very cool tool.â...

Unlike PropOrNot, the ASD was sponsored by one of the most respected think tanks in Washington, the [German Marshall Fund](#), which had been founded in 1972 to nurture the special relationship between the US and what was then West Germany.

The German Marshall Fund is substantially [funded by Western governments](#), and largely reflects their foreign-policy interests. Its top two financial sponsors, at more than \$1 million per year each, are the U.S. governmentâ... s soft-power arm the U.S. Agency for International Development ([USAID](#)) and the German Foreign Office (known in German as the AuswÄrtiges Amt). The U.S. State Department also provides more than half a million dollars per year, as do the German Ministry of Economic Cooperation and Development and the foreign affairs ministries of Sweden and Norway. It likewise receives at least a quarter of a million dollars per year from NATO.

The US government and NATO are top donors to the German Marshall Fund

Though the German Marshall Fund did not name the donors that specifically sponsored its Alliance for Securing Democracy initiative, it hosts a whoâs who of bipartisan national-security hardliners on the ASDâs [advisory council](#), providing the endeavor with the patina of credibility. They range from neocon movement icon Bill Kristol to former Clinton foreign policy advisor Jake Sullivan and ex-CIA director Michael Morell.

Jamie Fly, a German Marshall Fund fellow and Asia specialist, emerged as one of the most prolific promoters of the new Russian bot tracker in the media. Together with Laura Rosenberger, a former foreign policy aide to Hillary Clintonâs 2016 campaign, Fly appeared in a series of [interviews](#) and co-authored several [op-eds](#) emphasizing the need for a massive social media crackdown.

During a March 2018 [interview on C-Span](#), Fly complained that â... Russian accountsâ... were â... trying to promote certain messages, amplify certain content, raise fringe views, pit Americans against each other, and we need to deal with this ongoing problem and find ways through the government, through tech companies, through broader society to tackle this issue.â...

Yet few of the sites on PropOrNotâ... s blacklist, and none of the alternative sites that were erased in the recent Facebook purge that Fly and his colleagues take apparent credit for, were Russian accounts. Perhaps the only infraction they could have been accused of was publishing views that Fly and his cohorts saw as â... fringe.â...

Whatâ... s more, the ASD has been forced to admit that the mass of Twitter accounts it initially identified as â... Russian botsâ... were not necessarily bots â... and may not have been Russian either.

â... Iâ... M NOT CONVINCED ON THIS BOT THINGâ...

A November 2017 [investigation](#) by Max Blumenthal, a co-author of this article, found that *the ASDâ... s Hamilton 68 dashboard was the creation of â... a collection of cranks, counterterror retreads, online harassers and paranoiacs operating with support from some of the most prominent figures operating within the American national security apparatus.â...*

These figures included the same George Washington University Center for Cyber and Homeland Security fellows â... Andrew Weisburd and Clint Watts â... that were cited as experts in the Washington Postâ... s article promoting PropOrNot.

Weisburd, who has been described as one of the brains behind the Hamilton 68 dashboard, once maintained a one-man, anti-Palestinian web monitoring initiative that specialized in doxxing left-wing activists, Muslims

and anyone he considered â... anti-American.â... More recently, he has taken to Twitter to spout off murderous and homophobic fantasies about Glenn Greenwald, the editor of the Intercept â... a publication the ASD flagged without explanation as a vehicle for Russian influence operations.

Watts, for his part, has testified before Congress on several occasions to [call](#) on the government to â... quell information rebellionsâ... with censorious measures including â... nutritional labelsâ... for online media. He has received fawning publicity from corporate media and been rewarded with a contributor role for NBC on the basis of his supposed expertise in ferreting out Russian disinformation.

Clint Watts has urged Congress to â... quell information rebellionsâ...

However, [under questioning](#) during a public event by Grayzone contributor Ilias Stathatos, **Watts admitted that substantial parts of his testimony were false, and refused to provide evidence to support some of his most colorful claims about malicious Russian bot activity.**

In a separate interview with [Buzzfeed](#), Watts appeared to completely disown the Hamilton 68 bot tracker as a legitimate tool. â... Iâ... m not convinced on this bot thing,â... Watts confessed. He even called the narrative that he helped manufacture â... overdone,â... and admitted that the accounts Hamilton 68 tracked were not necessarily directed by Russian intelligence actors.

â... We donâ... t even think theyâ... re all commanded in Russia â... at all. We think some of them are legitimately passionate people that are just really into promoting Russia,â... Watts conceded.

But these stunning admissions did little to slow the momentum of the coming purge.

ENTER THE ATLANTIC COUNCIL

In his conversation with Sprague, the German Marshall Fundâ... s Fly stated that he was **working with the Atlantic Council in the campaign to purge alternative media from social media platforms like Facebook.**

The Atlantic Council is another Washington-based think tank that serves as a gathering point for neoconservatives and liberal interventionists pushing military aggression around the globe. It is [funded](#) by NATO and [repressive, US-allied governments](#) including Saudi Arabia, Bahrain and Turkey, as well as by

Ukrainian oligarchs like Victor Pynchuk.

This May, Facebook [announced](#) a partnership with the Atlantic Councilâ... s Digital Forensic Research Lab (DFRLab) to â... identify, expose, and explain disinformation during elections around the world.â...

The Atlantic Councilâ... s DFRLab is notorious for its zealous conflation of legitimate online dissent with illicit Russian activity, embracing the same tactics as PropOrNot and the ASD.

Ben Nimmo, a DFRLab fellow who has built his reputation on flushing out online Kremlin influence networks, [embarked](#) on an embarrassing witch hunt this year that saw him misidentify several living, breathing individuals as Russian bots or Kremlin â... influence accounts.â... Nimmoâ... s victims included [Mariam Susli](#), a well-known Syrian-Australian social media personality, the famed Ukrainian concert pianist [Valentina Lisitsa](#), and a British pensioner named Ian Shilling.

In an interview with Sky News, Shilling delivered a [memorable tirade](#) against his accusers.

â... I have no Kremlin contacts whatsoever; I do not know any Russians, I have no contact with the Russian government or anything to do with them,â... he exclaimed.

â... I am an ordinary British citizen who happens to do research on the current neocon wars which are going on in Syria at this very moment.â...

With the latest Facebook and Twitter purges, ordinary citizens like Shilling are being targeted in the open, and without apology. The mass deletions of alternative media accounts illustrate how national security hardliners from the German Marshall Fund and Atlantic Council (and whoever was behind PropOrNot) have instrumentalized the manufactured panic around Russian interference to generate public support for a wider campaign of media censorship.

In his conversation in Berlin with Sprague, **Fly noted with apparent approval that, â... Trump is now pointing to Chinese interference in the 2018 election.â...** As the mantra of foreign interference expands to a new adversarial power, the clampdown on voices of dissent in online media is almost certain to intensify.

As Fly promised, ***â... This is just the beginning.â...***

The Inappropriately Excluded

by Michael W. Ferguson

The probability of entering and remaining in an intellectually elite profession such as Physician, Judge, Professor, Scientist, Corporate Executive, etc. increases with IQ to about 133. It then falls about 1/3 by 140. By 150 IQ the probability has fallen by 97%! In other words, a significant percentage of people with IQs over 140 are being systematically and, most likely inappropriately, excluded from the population that addresses the biggest problems of our time or who are responsible for assuring the efficient operation of social, scientific, political and economic institutions. This benefits neither the excluded group nor society in general. For society, it is a horrendous waste of a very valuable resource. For the high IQ person it is a personal tragedy, commonly resulting in unrealized social, educational and productive potential.

The very limited research that has been done on this phenomenon has focused on possible flaws in high IQ people that might explain the exclusion. In order to be explanatory, the flaw would need to increase with IQ. However, the evidence that exists suggests that it is not the result of a compensatory flow, but rather the result of inappropriate educational and productive environments within which the high IQ person must strive to succeed. Consequently, remediation should focus on creating more appropriate environments.

The Exclusion

In the popular culture, IQ has become a point of contention. Many people credulously accept that the eminent have very high IQs and that people of ordinary accomplishment have ordinary IQs. For example, it was widely reported that Garry Kasparov has an IQ of 190. In truth, his IQ is verified to be 135. Others, often based on Steven J. Gould's book, 'The Mismeasure of Man' subscribe to the assertion that IQ is a useless oversimplification that primarily measures how well a person takes IQ tests.

The science does not support either assertion. A very large body of scientific evidence shows that IQ tests measure a polygenetic trait, g , that exhibits moderate phenotypic variation. It is directly correlated, over most of its range, with positive life outcomes and inversely correlated with negative ones. It has also been shown to accurately measure what people mean when they use the words 'intelligent' or 'smart'.

However, because of the moderate r values of its correlates, IQ is primarily of value in understanding the characteristics and interactions of large populations. Save as a diagnostic tool for very high IQ individuals, it is not sufficiently predictive to be reliably used on an individual case basis. Furthermore, in adulthood, actual life outcomes are generally known and, consequently, a predictive tool is of limited value.

When IQ tests first came out, the various intellectual elites were willing, even eager, to take them. The results, however, while good, were not great, so today they generally are not so willing to have themselves tested. Still, while most of the evidence is old, the results are still very likely to be valid. The only significant recent work is that of Robert Hauser and it suggests that, if anything, the mean IQ of the intellectually elite professions has fallen. That, however, is almost surely an artifact of the methodology.

Over an extensive range of studies and with remarkable consistency, from Physicians to Professors to CEOs, the mean IQ of intellectually elite professions is about 125 and the standard deviation is about 6.5. For example, Gibson and Light found that 148 members of the Cambridge University faculty had a mean IQ of 126 with a standard deviation of 6.3. The highest score was 139. J.D. Matarazzo and S.G. Goldstein found that the mean

IQ of 80 medical students was 125 with a standard deviation of about 6.7. There was one outlier at 149, but the next highest score was 138. This means that 95% of people in intellectually elite professions have IQs between 112 and 138 99.98% have IQs between 99 and 151.

By dividing the distribution function of the elite professions' IQ by that of the general population, we can calculate the relative probability that a person of any given IQ will enter and remain in an intellectually elite profession. We find that the probability increases to about 133 and then begins to fall. By 140 it has fallen by about 1/3 and by 150 it has fallen by about 97%. In other words, for some reason, the 140s are really tough on one's prospects for joining an intellectually elite profession. It seems that people with IQs over 140 are being systematically, and likely inappropriately, excluded.

With the conservative assumption that, absent the exclusionary processes, IQs above 133 neither help nor hinder the achievement of elite profession membership, the excluded population is distributed as shown above. If we assume that the positive correlation seen below 133 IQ continues above 133, the excluded population would be larger and the exclusion more complete.

Grady Towers, in his article, 'The Empty Promise' concludes that IQs over 140 add nothing to the academic or career performance of the individual. However, the result herein described is a stronger statement in that it actually appears to support an inverse correlation. It is not an entirely new revelation. Robert Sternberg and others have mentioned an inverse correlation by observing the absence of very high IQ individuals in intellectual settings. However, the observation has not led to any deep investigation. Typically, it is mentioned with an implication that very high IQ people routinely possess some compensating negative trait that eliminates their intellectual advantage. An example is the assertion that very high IQ people lack 'common sense'. Dressed up, this is Sternberg's hypothesis. Another explanation is that decreasing 'emotional intelligence' nullifies the advantage of higher IQ. Little research has actually been done on the exclusion and what little that has does not support either of these explanations. Linda Gottfredson has argued energetically against the Sternberg model.

While increasing IQ, especially over 140, is inversely correlated with elite membership, 140-150 IQ is also characteristic of eminence (Nobelists, Fields Medalists, etc.). While there are a number of anecdotal and inferential citations, the most definitive study was that of Dr. Anne Roe (1952) in which she gave 64 of America's (U.S. born) most eminent scientists an IQ test that ETS had created for that purpose. As best as can be determined (there were methodological problems) the test rendered a 15 point ratio IQ and the average IQ of the group was 152. This corresponds to a modern deviation IQ of 144 which agrees with the anecdotal and inferential evidence.

	Low.	Median	High
Verbal	121	166	177
Spatial	123	137	164
Math	128	154	194
Averages	124	152	178

What this suggests is that while an IQ over 140 will decrease the probability of entrance into an elite profession, if the impediment can be overcome, performance within the elite is likely to be superior. Of the 64, the highest D15IQ was 158, which is close to the statistically expected highest IQ of any scientist. In other words, by 160 D15IQ, the exclusion is nearly complete and by this study of the most eminent, the statistical prediction is corroborated. However, in total, this higher IQ characteristic of eminence strongly supports the conclusion that the exclusion is inappropriate and if these extremely high IQ individuals were allowed to work on the hardest problems, the result would be eminence.

As will be discussed later, Mathematics and Theoretical Physics contain many problems that are difficult to solve but relatively easy to verify. As such, they may be exceptions to this exclusion. The reason that the Roe study doesn't reflect this is because the Physicists and Mathematicians were not

given the math portion which we can assume lowered their average score.

So, if your IQ is 140 something, the above should serve as a warning that you may be facing related career challenges. If your IQ is over 150, it is a clarion call; without direct intervention, your career prospects are very poor. If you are the parent of a child with a D15IQ over 150, immediate and dramatic action is required. At present, realistic options for individual remediation are severely limited.

To provide perspective for readers, one in 261 people have IQs over 140 and one in 2,331 have IQs over 150. While the high IQ exclusion does not directly affect a large percentage of the population, the people it does affect, it affects profoundly. Because of the large population of western civilization, the absolute number in this group is not small. There are approximately 6.5 million people with an IQ over 140 and 729,000 people with an IQ over 150.

Why is This Happening? Because of the dearth of objective evidence, the cause of the exclusion cannot be determined directly. Garth Zietsman has said, referring to people with D15IQs over 152, 'A common experience with people in this category or higher is that they are not wanted - the masses (including the professional classes) find them an affront of some sort.' While true, it is more likely a symptom than a cause of the exclusion. We need to understand why they are an affront.

From a theoretical standpoint, democratic meritocracies should evolve five IQ defined 'castes', The Leaders, The Advisors, The Followers, The Clueless and The Excluded. These castes are natural in that they are the result of how people of different intellectual abilities relate to one another. This is based on research done by Leta Stetter Hollingworth in the 1930's and the more recent work of D.K. Simonton.

Before we begin, we need to digress for a moment into a discussion of deviation and ratio IQs. Because few people understand the difference, there has been significant confusion over the meaning of various IQ scores. IQ was originally designed for children and was defined as $((\text{mental age})/(\text{chronological age})) \times 100$. In other words, an eight year old with a 150 IQ scored about the same as the average twelve year old.

It was found very quickly that there were far more very high IQ children than what the standard, Gaussian distribution predicts. So, today, IQ tests have their raw scores adjusted to force the results to fit a standard bell curve distribution and are referred to as deviation IQs. While this practice has benefits, it tends to depress the IQs of the very highest scorers and, thereby, understate the intellectual distance between them and more normal IQs. For example, a person with a 170 IQ today would have a 200 IQ in the ratio IQ era.

Leta Stetter Hollingworth studied profoundly gifted children. She reported them as having IQs of 180+, which was a R16 score. As such, on today's tests this equates to 159+. Her conclusion was that when IQ differences are greater than 30 points, leader/follower relationships will break down or will not form.

It establishes an absolute limit to the intellectual gulf between leader and followers. She also concluded that there was an D15IQ 'sweet spot' of best outcomes from 123 to 144.

We have no reason to conclude that this upper limit on IQ differences changes in adulthood and, consequently, an elite with a mean R16IQ of 128 will have no leaders with R16IQs over 158 (149 D15IQ). This is consistent with the conclusion that there are no appropriate roles for >150 D15IQs and approximately corroborates Hollingworth's 'sweet spot'.

Much more recently, D.K. Simonton found that persuasiveness is at its maximum when the IQ

differential between speaker and audience is about 20 points. While he has not studied this effect among those with very high IQs, it is assumed that it follows ratio IQs at the high end. This has been corroborated with empirical studies of manager and leader success, which peaks between a 1.0 and 1.2 standard deviation differential.

We are going to use ratio IQs to perform our calculations, as they are probably a more accurate measure of intellectual distance at the high end. However, for clarity, we will restate our answers to the modern standard of 15 point deviation IQs.

We already know that elites have an average IQ of about 125 (R16 128) which implies that the audience that is to be convinced by the elites has a mean R16IQ of 108 (D15IQ is about the same under 120 IQ).

People with R16IQs below 98, after Hollingworth, are not effective followers and in a modern meritocracy are essentially disenfranchised and in the public discourse, essentially 'The Clueless'. It means that the 'The Followers' in the public discourse have a R16IQ mode of 108 R16IQ and 'The Leaders' have a R16IQ mode of 128 (125 D15IQ). These calculations provide us with a theoretical understanding of why the intellectually elite professions so consistently have mean D15IQs of 125.

In free markets people choose to whom they listen. In other words, in audiences dominated by high school graduates, who average around 105 IQ, the successful leaders will have an average IQ of $105+20=125$. Speakers with R16IQs over $105+30=135$ (D15IQ130) will be cancelled from radio, fired from TV and print or not elected because they confuse rather than enlighten their audience. A college educated audience (115 IQ) will be most convinced by a R16IQ of $115+20=135$ and confused by a $115+30=145$ R16IQ (140 D15IQ).

Effective leaders recognize that they need the counsel of those smarter than themselves. They will be most convinced by advisors with R16IQs of $128+20=148$ (D15IQ 139). We also see that the compressed standard deviation is predicted as a result of persuasive needs of the overall organizational structure. A Leader needs to be persuasive within the community of Leaders which limits the R16IQ to $128+20=148$ which is the same as the mode for Advisors. However, the 148 R16IQ Leader becomes incomprehensible to most Followers, which limits their effectiveness and encourages them to become an Advisor. Because Leaders become ineffective above an R16IQ of 148, Advisors won't find clients if their R16IQ is over $148+20=168=155$ D15IQ.

So we see that these parameters of maximum persuasiveness of 20 R16 points and maximum leader/follower differential of 30 R16 points, create a natural trifurcation of enfranchised people into 'The Advisors' (128-168 R16IQ; 125-155 D15IQ), Leaders (115-141 R16IQ; 112-138 D15IQ) and Followers (98-128 R16IQ; 98-125 D15IQ) 'The Clueless' with D15 IQs below 98 are effectively lost to the process. They cannot really understand the public discourse and will often not follow discussions in productive environments.

People with D15IQs over 150 are effectively 'The Excluded', routinely finding their thoughts to be unconvincing in the public discourse and in productive environments. If placed in a leadership position, they will not succeed.

So, while Sternberg et alia search for personal flaws to explain professional and social failings for people with D15IQs>150, the simple fact is that it is an artifact of a culture that fails to provide them with audience or followers. They are not a natural fit as advisors because the leaders are not persuaded and often won't even understand the advice.

Inappropriate Educational Options

The exclusion really begins in primary school with the failure of the educational process to provide an appropriate learning environment. The grading process, which should be a reliable assessment of

knowledge learned and skills acquired, becomes nothing more than a measure of the child's willingness to bend to the will of the teachers' demand that he or she acquiesce to a profoundly inappropriate curriculum and learning process.

Leta Hollingworth noted that, if mainstreamed, children with R16IQs over 150 (D15IQ 141) check out and do not excel. Miraca Gross has done a long-term longitudinal study of 60, 160+ D15IQ Australian children. 17 of the children were radically accelerated, 10 were accelerated one or two years and the remaining 33 were mainstreamed. The results were astonishing with every radically accelerated student reported as educationally and professionally successful and emotionally and socially satisfied.

The group that was not accelerated she characterizes as follows: 'With few exceptions, they have very jaded views of their education. Two dropped out of high school and a number have dropped out of university. Several more have had ongoing difficulties at university, not because of a lack of ability but because they have found it difficult to commit to undergraduate study that is less than stimulating'. These children have IQs similar to Leonardo da Vinci, Galileo, etc., so the loss from unrealized potential is enormous.

Gross also did a wonderful comparative case study of a 133 D15IQ girl who had great educational success and a 169 D15IQ boy who was completely destroyed by an uncaring school system. It provides some enlightening examples of precisely how the educational system thwarts children in the 140+ D15IQ range.

The problem stems from the misconception among educators that the intellectual gulf between moderately and highly gifted children is not that great. In fact, depending upon the conceptual content, Professor Gross suggests that the exceptionally gifted children and above may learn 4-5 times faster than the midrange students. Therefore, a reasonable, in fact conservative, expectation of educational progress is the ratio of the highly gifted student's ratio IQ and the ratio IQ for which the curriculum is normed.

So, a 150 D15IQ child would be expected to progress through a K-12 public school curriculum geared to the 100 IQ student in $12/1.6=7.5$ years. They would graduate from high school at 13. Some children may be physically and emotionally prepared for full time school a year early and would finish high school at 12. When we hear about a child who finishes high school at 12 or 13, we think of a 'one in a million' prodigy and we suspect that the child was pushed to his or her detriment. Yet, with an enabling educational environment, it is actually a reasonable expectation for about one in 200 children. The true 'one in a million' child is doing college level learning at 7 or 8.

These children can be expected to complete their six years of college, which is geared to a 120 IQ, in about $6/(160/120)=4.5$ years. So, we would expect the 150 D15IQ person to receive their first advanced degree at age 17 or 18 if the educational system didn't actively retard them. This will provide them with another five or six years of education, during which they can acquire another four advanced degrees or equivalent.

It is often stated that gifted children become bored in mainstream classes. However, that is too passive a description. Often they are frustrated and even angered by the slow pace. Garth Zietsman states that people with IQs over 124 'don't require assistance to learn. They can find the information and master the methods themselves'. It is probably the case that for most 140+ D15IQ people, autodidactic or self paced learning is preferred. It is also likely that they prefer the polymathic 'question first' approach to learning, as well.

Because of all the above, many, perhaps most, 150+ D15IQ children reach college age with a bad grade transcript and even worse attitude. Even if they manage to perform near their potential in their educational careers, it will likely not matter since adult society is not structured for them, anyway.

What applies to productive environments also applies to social environments and even personal relationships. Theoretically, after Hollingworth, a person's social relationships should be limited to people with R16IQs within 30 points of their own. For the 100 IQ person, this will include about 94% of the population and consequently it is not an issue. However, for the 150 R16IQ (140 D15IQ), social relationships are limited to 120-180 R16IQ people which represents just a little over 10% of the population. The 165 R16IQ (150D15IQ) person will be limited to people with 135+ R16IQs (130 D15IQ). This comprises just 2% of the population. By 182 R16IQ (160 D15IQ) the problem becomes critical with social relationships limited to those with R16IQs over 152 (142 D15IQ) which comprises just 0.25% of the population.

The +/- 30 R16IQ range of Leta Hollingworth is also a good estimated limit on lasting social relationships. However, they are not equal relationships but rather will necessarily have a strong leader/follower quality to them. Also, the degree of mutual understanding will almost surely be insufficient to reach and sustain emotional intimacy. Relationships based upon approximate intellectual parity probably cannot have more than 0.75 standard deviation (~12 points). For the 140 D15IQ person, the limit for intellectual parity relationships is about 128, or about 2.5% of the population. For the Hollingsworth children, 180 R16IQ (159 D15IQ), the limit for an intellectual parity relationship is a hopeless 168+ R16IQ or 152+ D15IQ. This is only 0.0263% of the population.

Members of high IQ societies, especially those that require D15IQs above 145, often comment that around this IQ, qualitatively different thinking emerges. By this they mean that the 145+ D15IQ person doesn't just do the same things, intellectually, as a lower IQ person, just faster and more accurately, but actually engages in fundamentally different intellectual processes. David Wechsler, D. K. Simonton, et alia, have observed the same thing.

Since intimate social relationships are predicated upon mutual understanding, this draws a kind of 'line in the sand' at 140-150 D15IQ that appears to separate humans into two distinct groups. This may truncate the 30 point limit for those between 150 and 160 D15IQ people. Even when 150+ D15IQ people learn to function in the mainstream society, they will always be considered, and will feel, in some way 'different'. Grady Towers explored this in depth in his article, 'The Outsiders'. This is of mild interest to the group within which the 150+ D15IQ person is embedded but it is moderately to profoundly important to the high IQ individual who will feel an often profound sense of isolation.

It has often been observed that 150+ D15IQ people are loners. Also, Loius Termann found that children at this IQ level were emotionally maladjusted in about 40% of the cases. However from the above one cannot help but wonder if this results from the children being constantly thrust into 'no-win' social situations and never given the opportunity to hone their social skills among their intellectual peers.

Assortative mating, in humans includes a strong tendency to choose a spouse who is in the same IQ range. At a maximum, IQ difference cannot exceed Hollingworth's 30 points and preferentially should be within Simonton's 20 points. For the 100 IQ person 80-120 IQ contains about 80% of the population and not much thought about intelligence is necessary when choosing a mate. However, the 150 D15IQ percent will find that less than 0.4% of prospective mates are in the proper intellectual range. Because of this, IQ becomes a significant limitation on mate selection.

These factors probably explain the positive correlation between higher IQ and emotional maladjustment found by Terman, et alia. It is not an inherent trait of high intelligence but rather a consequence of extreme social isolation.

Conclusion

As D15IQ increases above 140, people become progressively more excluded from educational, productive and social opportunities until by 160 D15IQ the exclusion is nearly complete.

Individuals with D15IQs of more than 160 are rare, comprising just 0.0032% of the population. They possess at least one trait in common with many of the greatest minds in history. Yet only a vanishingly small percentage will find a proper environment within which they may thrive intellectually, socially and productively.

This is harmful for the individuals but it is also an unfortunate circumstance for society as well. What if intellectual giants like Einstein, da Vinci, J.S. Mill, etc. were ten times more common? Almost certainly progress would be much greater. It is because of this that the exclusion should be of significant concern to everyone.

The Polymathic Institute and Polymathica

Many people with D15IQs between 140 and 150 and nearly all people with IQs over 150 face enormous challenges and require new social and productive environments if they are to reach their potential. The Polymathic Institute promotes polymathic research, education, careers and lifestyles

Polymathica is targeted at the upper 5% of the population in intellectual sophistication. This is approximately equivalent to D15IQs above 125. Leaders will, characteristically, have R16IQs over 148 (D15IQ 147) and up to 178 R16IQ (166 D15IQ). Advisors will have D15IQs of 161+.

Clearly, few of the people of working age with D15IQs over 150 have appropriate outlets. The only probable exceptions are Mathematics and Theoretical Physics where the range of comprehensibility is probably closer to 60 R16IQ points than to the 30 R16IQ point Hollingsworth limit. However, the careers are only appropriate, with regard to interest and disposition, for a small percentage of the 150+ D15IQ population. The vast majority have no appropriate career options.

Over time, The Polymathic Institute may attract as much as 25% of those with a 150+ D15IQ. If they comprise about 1% of Polymathica, Polymathica will reach about 12 million in membership. That is about 15% of the top 5% and consistent with current evidence.

In other words, we can, if we succeed, enable a significant portion of those currently inappropriately excluded from participating in the hardest problems and the most intellectually demanding projects. Those who are interested in participating in either Polymathica or The Polymathic Institute should subscribe to the Institute's newsletter, The Polymath. To do so, just provide an e-mail address, name (optional) and referral code. If you were not referred, enter 999999.

Manuel Henriquez will be replaced as CEO and chairman of Hercules Capital in Palo Alto. Henriquez was arrested in New York City and released on \$500,000 bail after a brief appearance in Manhattan federal court Tuesday.

Jack Abramoff: The lobbyist's playbook

Jack Abramoff, the notorious former lobbyist at the center of Washington's biggest corruption scandal in decades, spent more than three years in prison for his crimes. Now a free man, he reveals how he was able to influence politicians and their staffers through generous gifts and job offers. He tells Lesley Stahl the reforms instituted in the wake of his scandal have had little effect.

The following is a script of "The Lobbyist's Playbook" which aired on Nov. 6, 2011. Lesley Stahl is the correspondent. Ira Rosen, producer.

Jack Abramoff may be the most notorious and crooked lobbyist of our time. He was at the center of a massive scandal of brazen corruption and influence peddling.

60 Minutes Overtime

Jack Abramoff: Inside Capitol corruption Â»

As a Republican lobbyist starting in the mid 1990s, he became a master at showering gifts on lawmakers in return for their votes on legislation and tax breaks favorable to his clients. He was so good at it, he took home \$20 million a year.

It all came crashing down five years ago, when Jack Abramoff pled guilty to corrupting public officials, tax

evasion and fraud, and served three and a half years in prison.

Today he's a symbol of how money corrupts Washington. In our interview tonight, he opens up his playbook for the first time.

And explains exactly how he used his clients' money to buy powerful friends and influence legislation.

Jack Abramoff: I was so far into it that I couldn't figure out where right and wrong was. I believed that I was among the top moral people in the business. I was totally blinded by what was going on.

Jack Abramoff was a whiz at influencing legislation and one way he did that was to get his clients, like some Indian tribes, to make substantial campaign contributions to select members of Congress.

Abramoff: As I look back it was effective. It certainly helped the people I was trying to help, both the clients and the Republicans at that time.

Lesley Stahl: But even that, you're now saying, was corrupt?

Abramoff: Yes.

Stahl: Can you quantify how much it costs to corrupt a congressman?

Abramoff: I was actually thinking of writing a book - "The Idiot's Guide to Buying a Congressman" - as a way to put this all down. First, I think most congressmen don't feel they're being bought. Most congressmen, I think, can in their own mind justify the system.

Stahl: Rationalize.

Abramoff: --rationalize it and by the way we wanted as lobbyists for them to feel that way.

Abramoff would provide freebies and gifts - looking for favors for his clients in return. He'd lavish certain congressmen and senators with access to private jets and junkets to the world's great golf destinations like St. Andrews in Scotland. Free meals at his own upscale Washington restaurant and access to the best tickets to all the area's sporting events; including two skyboxes at Washington Redskins games.

Abramoff: I spent over a million dollars a year on tickets to sporting events and concerts and what not at all the venues.

Stahl: A million dollars?

Abramoff: Ya. Ya.

Stahl: For the best seats?

Abramoff: The best seats. I had two people on my staff whose virtual full-time job was booking tickets. We were Ticketmaster for these guys.

Stahl: And the congressman or senator could take his favorite people from his district to the game--

Abramoff: The congressman or senator uh, could take two dozen of his favorite people from their district.

Stahl: Was all that legal?

Abramoff: We would certainly try to make the activity legal, if we could. At times we didn't care.

But the "best way" to get a congressional office to do his bidding - he says - was to offer a staffer a job that could triple his salary.

Abramoff: When we would become friendly with an office and they were important to us, and the chief of staff was a competent person, I would say or my staff would say to him or her at some point, "You know, when you're done working on the Hill, we'd very much like you to consider coming to work for us." Now the moment I said that to them or any of our staff said that to 'em, that was it. We owned them. And what does that mean? Every request from our office, every request of our clients, everything that we want, they're gonna do. And not only that, they're gonna think of things we can't think of to do.

Neil Volz: Jack Abramoff could sweet talk a dog off a meat truck, that's how persuasive he was.

Neil Volz was one of the staffers Abramoff was talking about. He was chief of staff to Congressman Bob Ney, who as chairman of the House Administration Committee had considerable power to dispense favors. Abramoff targeted Volz and offered him a job.

Stahl: You're the chief of staff of a powerful congressman. And Jack owns you and you haven't even left working for the congressman.

Volz: I have the distinct memory of, you know, negotiating with Jack at a hockey game. So we're, you know, just a few rows back. The crowd's goin' crazy. And Jack and I are havin' a business conversation. And, you know, I'm-- I'm wrestlin' with how much I think I should get paid. And then five minutes later we're-- he's askin' me questions about some clients of his.

Stahl: When you look back was that the corrupting moment?

Volz: I think we were guilty of engaging in a corrupt relationship. So there were several corrupting moments. There isn't just one moment. There were many.

Abramoff: At the end of the day most of the people that I encountered who worked on Capitol Hill wanted to come work on K Street, wanted to be lobbyists.

Stahl: You're telling me this, the genius of figuring out you could own the office by offering a job to the chief of staff, say. I'm having two reactions. One is brilliant. And the other is I'm sick to my stomach.

Abramoff: Right. Evil. Yeah. Terrible.

Stahl: 'Cause it's hurting our country.

Abramoff: Shameful. Absolutely. It's the worst thing that could happen. All parts of the system.

Stahl: I'm mad at you.

Abramoff: I was mad at me--

Stahl: I'm not kidding. I'm not kidding.

Abramoff: Look I did things and I was involved in the system I should not have been in. I'm ashamed of the fact I was there, the very reason why now I'm speaking about it. And now I'm trying to do something, in

recompense, is the fact that I thought it was-- it was wrong of me to do it.

One of the offices he keyed on was that of his good friend, the Majority Leader Tom Delay, eventually hiring his deputy chief of staff and his press secretary, and going into business with Delay's chief of staff.

Stahl: Did you own his staff?

Abramoff: I was as close to his staff as to any staff. I had a very strong personal relationship with a lot of his staff.

Stahl: How many congressional offices did you actually own?

Abramoff: We probably had very strong influence in 100 offices at the time.

Stahl: Come on.

Abramoff: No.

Stahl: A hundred offices?

Abramoff: In those days, I would view that as a failure. Because that leaves 335 offices that we didn't have strong influence in.

Stahl: Did he own you?

Bob Ney: Oh, I don't believe Jack Abramoff owned me. But were we involved in the culture of corruption together? Absolutely.

Former Republican Congressman Bob Ney was ambitious and looked at Abramoff as a way to build alliances with the White House and the majority leader.

Ney: I wanted to be speaker of the House and Jack Abramoff was the beautiful light of day for me to get to the person who I had had some conflicts with, Tom Delay.

Abramoff began inviting Ney on golf trips including one to Scotland and to his restaurant Signatures, where Ney was given food and drinks on the house, a violation of the congressional gift limit laws. Ney says he was hardly the only one crossing the line.

Ney: But I will still tell you, at that point in time, in order to get a drink at Signatures you had to shove White House staffers of George Bush the heck away from the bar. And it was packed with people. And there were members. Now that doesn't mean everybody did everything for Jack. But if you wanna talk about strict interpretation of violation of the-- of-- of the laws of drink and food, Katey bar the door, she was wide open, two shotguns blarin'.

After months of taking handouts, Ney was approached by Neil Volz, his former chief of staff, by then a lobbyist for Abramoff.

Volz: I let you down man and I'm sorry...

Volz asked Ney to insert some language into a reform bill that would give a backdoor license to an Indian casino owned by one of Abramoff's clients. You often hear about lobbyists getting special secret deals for their clients like this. It's an insidious technique that Abramoff perfected.

Abramoff: So what we did was we crafted language that was so obscure, so confusing, so uninformative, but so precise to change the U.S. code.

Stahl: Here's what you tried to get tacked on to this reform bill.

Abramoff: Yeah.

Stahl: "Public law 100-89 is amended by striking section 207 (101 stat. 668, 672)."

Abramoff: Right. Now isn't that obvious what that means? It was perfect. It was perfect.

Stahl: So that's what you tried to get inserted?

Abramoff: Yes.

Stahl: And that was gonna provide for a casino?

Abramoff: Yes.

Stahl: And who on earth is gonna know that?

Abramoff: No one except the chairmen of the committees.

Stahl: Who stuck it in there?

Abramoff: Yes.

Stahl: And that's one of the things you used to do?

Abramoff: Yes.

Stahl: And it was deliberately written like that?

Abramoff: Precisely. Yes.

Stahl: And that's done a lot?

Abramoff: Members don't read the bills.

Stahl: You didn't even know what it was for?

Ney: Had no idea. And then when we got the written language--

Stahl: Well-- why didn't you know what it was for?

Ney: I didn't-- I didn't care.

Stahl: Oh!

Ney: It was a great big shell game. And I was in the middle of it, whether, you know, knowing or not. I-- I was dumb enough to not say, "What's this thing do?"

Ney would eventually serve 17 months in federal prison, the only congressman who was ever charged in the scandal. But Abramoff says that there were many other members that did his bidding that could have been charged.

Stahl: Was buying favors from lawmakers easy?

Abramoff: I think people are under the impression that the corruption only involves somebody handing over a check and getting a favor. And that's not the case. The corruption, the bribery, call it, because ultimately that's what it is. That's what the whole system is.

Stahl: The whole system's bribery?

Abramoff: In my view. I'm talking about giving a gift to somebody who makes a decision on behalf of the public. At the end of the day, that's really what bribery is. But it is done everyday and it is still being done. The truth is there were very few members who I could even name or could think of who didn't at some level participate in that.

Abramoff prided himself on being a man who did good. He was devoutly religious and exorbitantly charitable and he says he gave away 80 percent of his earnings. When he fell from grace, his reputation was in tatters because it was not just that he had corrupted Congress - it was found he had cheated his clients, like the Indian tribes.

Abramoff: Most of the money I made I gave away, to either communal or charitable causes. So I thought frankly I was one of the most moral lobbyists out there.

Things began to unravel for Abramoff when the Washington Post published a largely unflattering portrait of him in 2004, reporting that he charged his clients 10 times more than any other lobbyist in town.

Abramoff: My first response was, "What's the big deal? I don't understand what this is about. This is what lobbyists do.

What he didn't understand was the part that said he and a former aide to Tom Delay had overbilled four of his Indian casino clients by \$45 million.

In the end, he was brought up on federal charges of tax evasion and ripping off Indian tribes. On the day he went to court and pled guilty, Abramoff looked grim. The judge sentenced him to four years.

Stahl: I really think what you were doing was-- was subverting the essence of our system.

Abramoff: Yes. Absolutely right. But our system is flawed and has to be fixed. Human beings populate our system. Human beings are weak.

Stahl: And you preyed on that?

Abramoff: I did. I was one of many who did. I did. And I'm ashamed of that fact.

He was sent to a medium security facility in Cumberland, Maryland. When he was released last June, he began working as an accountant at a kosher pizza parlor. Turns out Jack Abramoff was broke, partly because he is paying off nearly \$24 million in restitution to the Indian tribes. Today he lives in his old house in Maryland with his wife, five children and the two doberman pinschers Mrs. Abramoff bought to protect the family while he was away.

After the scandal, Congress instituted a package of reforms, making what Abramoff did - like plying members of Congress with free expensive meals - illegal. But he doesn't see the new reforms as being very effective.

Abramoff: The reform efforts continually are these faux-reform efforts where they'll change, they'll tweak the system. They'll say, "You can have a meal with a congressman if they're standing up, not sitting down."

Stahl: Is that serious? Or are you joking?

Abramoff: Oh no, I'm not joking at all.

Stahl: So, it's okay if you pay for lunch as long as you stand up?

Abramoff: Well, it's actually worse than that. You can't take a congressman to lunch for \$25 and buy him a hamburger or a steak of something like that. But you can take him to a fundraising lunch and not only buy him that steak, but give him \$25,000 extra and call it a fundraiser. And have all the same access and all the same interaction with that congressman. So the people who make the reforms are the people in the system.

Stahl: Could you do the same thing today? I'm asking you whether you think the system's been cleaned up?

Abramoff: Could do the same thing that I? Yeah. No, the system hasn't been cleaned up at all.

Stahl: At all.

Abramoff: There's an arrogance on the part of lobbyists, and certainly there was on the part of me and my team, that no matter what they come up with, we're smarter than they are and we'll overcome it. We'll just find another way through. That's all.

He says the most important thing that needs to be done is to prohibit members of Congress and their staff from ever becoming lobbyists in Washington.

Abramoff: If you make the choice to serve the public, public service, then serve the public, not yourself. When you're done, go home. Washington's a dangerous place. Don't hang around.

Former Congressman Bob Ney now works part-time as a radio host.

His former chief of staff Neil Volz is currently working as a night janitor at a Florida restaurant.

And Jack Abramoff has written a memoir called "Capitol Punishment."

A sub-investigation of The Department of Energy Scandal

Highlights:

- Federal bribes are never clean. They always become complicated because of the "I want some too" factor
- The transactions, and documented quid pro quo, not only qualify for, but exceed, the requirements for Federal Racketeering indictments
- When an adjacent entity finds out there is a bribe going on, they can use the knowledge of the bribe to extort

sub-bribes

- Crook One = Billionaire campaign backers who were investors in Google, Tesla and "CleanTech"
- Crook Two = DNC and Presidential campaign office
- Crook 2.5 = The Obama White House
- Crook Three = Goldman Sachs
- Crook Four+ = Aligned Silicon Valley Venture Capital Groups
- Crook Five+ = Russian investors
- Crook Six+ = General Motors, Ford, Nissan and Chrysler working as a consortium
- Payola item 1 = Free NASA jet fuel, NASA partial agency closure and exclusive private supplier contracts to Space X, NASA Ames airport exclusive hand-over for Google & billionaire jets as payback for campaign resources
- Payola item 2 = Exclusive free federal taxpayer cash from Department of Energy in spite of low credit ratings and failing reviews in actual side-by-side comparisons of ALL applicants
- Payola item 3 = Exclusive tax credits, exclusive carbon credits, exclusive factory fee discounts, exclusive employee tax waivers, and land discounts from state underwritten by feds
- Payola item 4 = First position in federal contract allocations
- Payola item 5 = Real estate discounts and ongoing revenue upsides from contiguous Tesla/Solyndra real estate and pass-along leases which Senator Feinstein's family exploited
- Payola item 6 = Loans by Billionaire campaign backers who were investors in Google, Tesla and "CleanTech" to Senators campaign PACs and funds
- Payola item 7 = Loans by Billionaire campaign backers who were investors in Google, Tesla and "CleanTech" to DNC and Presidential campaign office campaign PACs and funds via conduited means
- Payola item 8 = Payments of campaign bills by Billionaire campaign backers who were investors in Google, Tesla and "CleanTech" via conduit-ed means
- Payola item 9 = Provision of Search Engine manipulation, mood manipulation and competing interest web-search deletion on Silicon Valley global web architecture
- Payola item 10 = Sex workers as deal incentives
- Payola item 11 = Provision of federal funds and filings in a manner intended to be used for, and which were used to alter SEC securities filings, aligned with manipulated news distribution by insiders in order to defraud the stock market and falsify stock values for personal profit relative to Tesla, Solyndra, Abound, Fisker and related entities
- Payola item 12 = The service, provided by the Department of Energy, whereby all competitors to the stock

portfolios of the Billionaire campaign backers who were investors in Google, Tesla and "CleanTech" were terminated, stone-walled and review-manipulated by the actions of the Department of Energy

- Payola item 13 = Revolving door jobs for White House and DOE staff in exchange for favorable federal decisions

- Payola item 14 = Custom authored white-papers by McKinsey Consulting, the content of which was directed by Billionaire campaign backers, who were investors in Google, Tesla and "CleanTech, and Steven Chu, Steven Spinner and Matt Rogers, who then became the heads of the DOE funding. These White Papers were distributed to the White House and Congress by lobbyists working for the Billionaire campaign backers who were investors in Google, Tesla and "CleanTech". The white-papers were constructed in order to give a false impression of Clean-tech and happened to favor only the stock investments of Billionaire campaign backers, who were investors in Google, Tesla and "CleanTech". The manipulated white-papers were used to sell Congress, via contrived data, on plans beneficial only to the Billionaire campaign backers, who were investors in Google, Tesla and "CleanTech

- Payola item 15 = Possible terminations. An inordinately large number of individuals connected to this bribe died during this event. All of the deaths were unexpected, untimely, non-indicated by current medical conditions and game-changing by ironically reducing the risk of exposure in most of the cases

- Payola item 16 = Orders by White House staff, to DOJ, SEC & FBI to "leave this matter alone for now". Ordered failure-to-enforce

- Payola item 17 = Senior position Jobs at DOE and DOJ

- Payola item 18 = Lack of review, "don't observe" process as Solyndra, Abound, Fisker, etc. were immediately failing. Orders to avoid noticing the failures in order to cover up campaign negatives

- Payola item 19 = Down-favoring of non portfolio and competing technologies by the Department of Energy via Steven Chu, thus removing them from support and off the playing field

The Dirty Tech Company Take Down List - JOIN THE FUN!

The following companies don't deserve to be in business any more. They lie to the public about what they really do. They exploit the public by spying on them. They bribe politicians. They abuse their workers with sex extortion and liability avoidance. They manipulate your ideology, politics and free speech.

The public must do everything they can to put these companies out of business, crash their stock market valuations, expose their scandals and prostitutes, cut off their ability to pay bribes with stock market warrants and revolving door jobs, publish expose's with the facts and erase them from society.

They provide nothing ethical to the world that many other companies could not provide in a less illicit manner. No other companies are allowed to provide those services, though, because the companies operate monopolistic, anti-trust law violating attacks on anyone that competes with them.

These are the top dirtiest, most corrupt, companies to be taken down. Put all of your resources into their extinction and your world will dramatically improve:

HOW WE ARE PUTTING THESE DIRTY PLAYERS OUT OF BUSINESS:

How did we fight back against the most powerful corrupt companies on Earth?

These companies decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts.

These bad guys crossed the line when they used your own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who protects these mobsters? Your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an corrupt scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

We opened our own private investigator and crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds
- Every person named in the Epstein Pedo book:

By [Nicholas Confessore](#)

The way Alastair Mactaggart usually tells the story of his awakening â... the way he told it even before he became the most improbable, and perhaps the most important, privacy activist in America â... begins with wine and pizza in the hills above Oakland, Calif. It was a few years ago, on a night Mactaggart and his wife had invited some friends over for dinner. One was a software engineer at Google, whose search and video sites are visited by over a billion people a month. As evening settled in, Mactaggart asked his friend, half-seriously, if he should be worried about everything Google knew about him. â... I expected one of those answers you get from airline pilots about plane crashes,â... Mactaggart recalled recently. â... You know â... â... Oh, thereâ... s nothing to worry about.â... â... â... Instead, his friend told him there was plenty to worry about. If people really knew what we had on them, the Google engineer said, they would flip out.

Mactaggart had spent most of his adult life in the Bay Area, running a family real estate business with his uncle. The rise of the tech industry had filled his condo developments with ambitious engineers and entrepreneurs, making Mactaggart a wealthy man. But he never really thought about how companies like Google or Facebook got so big so fast. The vast pools of data they collected and monetized were abstractions, something he knew existed but, as with plane crashes, rarely dwelt on.

Now he began to think about tech companies a lot. He started reading about online tracking and data mining. He discovered that the United States, unlike some countries, has no single, comprehensive law regulating the collection and use of personal data. The rules that did exist were largely established by the very companies that most relied on your data, in privacy policies and end-user agreements most people never actually read. Mactaggart began to scrutinize these policies closely, the way he read loan contracts and pored over offering plans. He learned that there was no real limit on the information companies could collect or buy about him â... and that just about everything they could collect or buy, they did. They knew things like his shoe size, of course, and where he lived, but also roughly how much money he made, and whether he was in the market for a new car. With the spread of smartphones and health apps, they could also [track his movements](#) or whether he had gotten a good nightâ... s sleep. Once facial-recognition technology was widely adopted, they would be able to track him even if he never turned on a smartphone.

Image CreditPhoto illustration by Delcan & Co. Capitol Building: Travelpix Ltd/Getty

All of this, he learned, was designed to help the real customers â... advertisers â... sell him things. Advertisers and their partners in Silicon Valley were collecting, selling or trading every quantum of Mactaggartâ... s self that could be conveyed through the click of a mouse or the contents of his online shopping carts. They knew if he had driven past *that* Nike billboard before finally buying *those* Air Force 1s. A website might quote him a higher price for a hair dryer [if he lived in a particular neighborhood](#), or less if he lived near a competitorâ... s store. Advertisers could buy thousands of data points on virtually every adult in America. With Silicon Valleyâ... s help, they could make increasingly precise guesses about what you wanted, what you feared and what you might do next: Quit your job, for example, or have an affair, or get a divorce.

ADVERTISEMENT

And no one knew more about what people did or were going to do than Facebook and Google, whose free social and search products provided each company with enormous repositories of intimate personal data. They knew what you â... likedâ... and who your friends were. They knew not just what you typed into the search bar late on a Friday night but also what you started to type and then thought better of. Facebook and Google were following people around the rest of the internet too, using an elaborate and invisible network of browsing bugs â... they had, within little more than a decade, created a private surveillance apparatus of extraordinary reach and sophistication. Mactaggart thought that something ought to be done. He began to wonder whether he should be the one to do it.

Mactaggart, who is 52 but boyish, did not think of himself as a radical. He often describes himself as a capitalist. He is the kind of man who wears chinos with a braided belt; it is easy to picture him on a sailboat. But his research on privacy had stirred something in him. â... Itâ... s like that Buddhist thing, where you walk past a mess and a mop and say, â... Someone ought to clean up that mess,â... â... â... he says. â... And eventually you realize you have to pick up the mop.â...

Over evening walks around his neighborhood, Mactaggart batted around ideas for a new state law with his friend Rick Arney, a finance executive. But Arney, who worked in the California Legislature after business school, suggested a different approach. Instead of going through Sacramento, Arney suggested, they could put the question directly to the people of California, gathering signatures for a statewide ballot initiative. Mactaggart liked the idea. He also had the money to do something with it. Early last year, he hired a small staff, set them up in a two-room office in Oakland and began cold-calling privacy experts to figure out just what his initiative should say.

â... I thought it was a joke at first, to be contacted by someone named â... Alastair Mactaggart,â... â... â... says Chris Jay Hoofnagle, who teaches law at the University of California, Berkeley. Mactaggart was wary of proposing a sweeping law like the European Unionâ... s General Data Protection Regulation, or G.D.P.R., fearing that Californians would find it mystifying and reject it. He wanted a solution that consumers would embrace and Silicon Valley could live with. â... I donâ... t want to kill businesses â... Iâ... m a businessman,â... Hoofnagle recalls Mactaggartâ... s telling him. â... I just think the data use by these companies is out of control.â...

Almost by accident, though, Mactaggart had thrust himself into the greatest resource grab of the 21st century. To Silicon Valley, personal information had become a kind of limitless natural deposit, formed in the digital ether by ordinary people as they browsed, used apps and messaged their friends. Like the oil barons before them, they had collected and refined that resource to build some of the most valuable companies in the world, including Facebook and Google, an emerging duopoly that today controls more than half of the worldwide market in online advertising. But the entire business model â€¦ what the philosopher and business theorist Shoshana Zuboff calls â€¦ surveillance capitalismâ€¦ â€¦ rests on untrammelled access to your personal data. The tech industry didnâ€¦ t want to give up its powers of surveillance. It wanted to entrench them. And as Mactaggart would soon learn, Silicon Valley almost always got what it wanted.

For most of its relatively brief existence, Silicon Valley has been more lightly regulated than almost any other major industry. The technology that drove the business was complex, and few lawmakers wanted to be seen as standing in the way of a new kind of wealth creation, one that seemed to carry no messy downsides like pollution or global economic collapse. Most of the biggest tech companies could simply ignore Washington â€¦ until they grew too big for Washington to ignore. When regulators finally threatened to intervene, the companies did what they were best at: They scaled up, this time not with software and servers but with phalanxes of lobbyists and lawyers.

Microsoft had virtually no Washington presence before the Justice Department filed an antitrust lawsuit against the company in the 1990s. As recently as 2003, Google retained just two outside lobbyists in Washington; over the next decade or so, as it became the worldâ€¦ s dominant search engine, the company became a Beltway heavyweight, hiring lobbyists, wooing regulators and funding the research behind hundreds of [Google-friendly studies](#) on competition, copyright law and other topics. By last year, Googleâ€¦ s parent, Alphabet, was spending more money on lobbyists than any other corporation in America.

Facebook, a decade younger than Google, built its political apparatus twice as fast, as if observing a kind of Mooreâ€¦ s Law of influence-peddling. When it went public in 2012, the company had 900 million users â€¦ less than half its current size â€¦ and earned a relatively modest profit of \$53 million. Over the next several years, Facebook simultaneously became one of the worldâ€¦ s biggest collectors of personal data and a powerful presence in Washington and beyond. It acquired Instagram, a rival social media platform, and the messaging service WhatsApp, bringing Facebook access to billions of photos and other user data, much of it from smartphones; formed partnerships with countryâ€¦ s leading third-party data brokers, such as Acxiom, to ingest huge quantities of commercial data; and began tracking what its users did on other websites. Smart exploitation of all that data allowed Facebook to target advertising better than almost anyone, and by 2015, the company was earning \$4 billion a year from mobile advertising. Starting in 2011, Facebook doubled the amount of money it spent on lobbying in Washington, [then doubled it again](#). The company employed just 10 lobbyists in state capitals around the country in 2012, according to my analysis of data collected by the National Institute on Money in Politics. By the time Mactaggart and Arney began work on their privacy initiative, it had 67. The tech industry was particularly powerful in California, its home base, where it doled out millions in campaign contributions to state candidates and parties.

But until recently, companies like Facebook and Google also had something that Wall Street and Big Oil and the cable companies didnâ€¦ t. To many people in Washington, they were the good guys. Through the Obama years, the tech industry enjoyed extraordinary cachet in Washington, not only among Republicans but also among Democrats. Partnering with Silicon Valley allowed Democrats to position themselves as pro-business and forward-thinking. The tech industry was both an American economic success story and a political ally to Democrats on issues like immigration. Google enjoyed particularly close ties to the Obama administration: Dozens of Google alumni would serve in the White House or elsewhere in the administration, and [by one estimate](#) Google representatives visited the White House an average of about once a week. But the Obama world had relationships with other firms too. Facebookâ€¦ s chief operating officer, Sheryl Sandberg, served on a high-level Obama advisory council on jobs and held a fund-raiser for Obamaâ€¦ s re-election campaign at her home in Atherton, Calif. The founders of Twitter, LinkedIn and the app developer Zynga together

contributed more than \$2 million to a pro-Obama super PAC.

And increasingly, Silicon Valley had come to transform politics itself. As Mactaggart considered how to take on the data industry, he faced an American political establishment that saw the key to its future in companies like Google and Facebook â€¦ not because of whom they supported but because of what they did. The surveillance capitalists didnâ€™t just sell more deodorant; they had built one of the most powerful tools ever invented for winning elections. Roughly the same suite of technologies helped elect Obama, a pragmatic liberal who promised racial progress and a benevolent globalism, and Trump, a strident nationalist who adeptly employs social media to stoke racial panic and has set out to demolish the American-led world order.

In Washington and in state capitals, this combination of wealth, prestige and ignorance had made the tech industry virtually unbeatable. They doled out campaign money to Republicans and Democrats alike. They had allies across the major think tanks and universities. Facebook alone belonged to more than four dozen trade associations and industry coalitions, political shields that could advance Facebookâ€™s interests in battles that were too toxic for direct engagement. It supported the Anti-Defamation League and the American Council of the Blind, the American Conservative Union and the N.A.A.C.P. It disbursed millions of dollars in grants to tech-advocacy groups â€¦ including those that sometimes criticized them. Like the web of personal data it mined for profit, Silicon Valleyâ€™s political network was simultaneously immense, powerful and inscrutable.

Last fall, Hoofnagle introduced Mactaggart to a former graduate student of his named Ashkan Soltani, a highly regarded privacy researcher and consultant. The two men quickly struck up an intense email correspondence. Soltani had devoted most of his adult life to understanding digital surveillance and privacy, and he closely observed how the tech industry exerted its will in Washington. Soltani told Mactaggart that his privacy initiative would need a lot of work if he wanted it to survive. Mactaggart decided to hire him.

Soltani knew exactly how hard Facebook and Google would fight to protect their business model, because he had watched them do it before. In February 2012, senior officials from the Obama administration unveiled what some of them hoped would become a signature initiative of President Obamaâ€™s second term: a â€¦ consumer-privacy bill of rights.â€¦ The proposal called for limits on the data that companies were collecting and more control for consumers over how it was used, and the tech industry had at least some incentive to consider it: The previous year, Facebook and Google each entered into consent decrees with the Federal Trade Commission after regulators found that the companies had deceived users about their privacy policies. Soltani, then serving as an F.T.C. technologist, worked on both investigations, and his efforts helped highlight a more pervasive problem: Most consumers simply didnâ€™t have the time or experience to navigate the personal-data economy on their own. â€¦ Silicon Valleyâ€™s model puts the onus on the user to decide if the bargain is fair,â€¦ Soltani told me recently. â€¦ Itâ€™s like selling you coffee and making it your job to decide if the coffee has lead in it.â€¦ When it comes to privacy, he said, â€¦ we have no baseline law that says you canâ€™t put lead in coffee.â€¦

White House officials believed at first that many tech companies were open to the administration's ideas. But the following year, as a team of experts at Obama's Commerce Department worked on drafting a detailed privacy bill, The Guardian and The Washington Post began publishing an explosive series of articles about United States government surveillance programs. Relying on thousands of documents provided by Edward Snowden, a former contractor for the National Security Agency, the articles revealed how the N.S.A. was collecting rivers of personal data — emails, photos, instant-message conversations — from nine leading internet companies, including Google, Facebook, Yahoo and Microsoft. Soltani by then had left the F.T.C. and joined The Post as a consultant on the series, working on articles that showed how the N.S.A. had collected hundreds of thousands of user address books from email providers and even hacked into the private networks that companies like Google and Yahoo use to transport their data.

The Snowden scandal robbed Obama's consumer proposal of both momentum and moral authority. Stung by the perception that it had colluded with United States spy agencies, Silicon Valley demanded that the government regulate itself instead, allying with civil liberties groups to push for legislation reining in the N.S.A. Over the next several months, scores of tech executives flew to Washington for high-level meetings with Obama, including Sandberg, who also sat with Obama's new commerce secretary, Penny Pritzker, the Chicago billionaire who was the co-chairwoman of his re-election campaign.

ADVERTISEMENT

In early 2014, Pritzker traveled to Silicon Valley for a highly publicized listening tour. She hailed the tech industry as a model for government — a partner, not an antagonist. Data, she proclaimed, was — the fuel of the 21st century. — Pritzker's tour included visits to eBay, Google and the Menlo Park campus of Facebook, where she met again with Sandberg. The women discussed an array of issues, including consumer privacy and how to ensure that American tech businesses remained competitive around the world. Two former Obama administration officials told me that those conversations appeared to have shaped Pritzker's early views on privacy. — Our goal at the Department of Commerce as a service organization is to support you, whether you are a researcher, inventor, entrepreneur, mentor or investor, — Pritzker told her audience at a start-up accelerator in Sunnyvale.

When the Obama administration finally returned to its consumer-privacy bill the following fall, Pritzker and her team voiced concerns about its sweep and scope, according to former Obama officials I spoke with. Pritzker wanted to make sure the bill could win industry support, and with it, Republican support. In January 2015, her office persuaded the White House to delay public release of the draft, which had been planned to coincide with an Obama speech at the F.T.C. Instead, her aides began previewing the bill in dozens of meetings with different business executives and lobbyists. According to the former Obama officials, the industry raised a host of objections. Facebook and Google, in particular, objected to how many kinds of data the rules covered, which included not only conventional personal information like Social Security numbers but also data linked to particular devices, which was critical to compiling the digital dossiers relied on by the advertising industry. (Facebook disputed that account.) Jim Hock, Pritzker's chief of staff at Commerce and now a spokesman for her private investment firm, PSP Partners, says Pritzker weighed all points of view. — No one meeting was more important than another, — he says.

But when consumer advocates were finally shown the new draft, they were furious. The bill now had a welter of exceptions and carve-outs. It drastically scaled back financial penalties and did not specifically protect location data. More broadly, it seemed to retreat from the idea of consumer privacy as an inherent right. Most of the bill's protections applied only if collecting or using a given piece of information posed a serious risk of economic or emotional harm. That March, Washington's leading consumer-privacy groups signed an open letter criticizing the Obama proposal, arguing that it did not do nearly enough. The Internet Association, a trade group representing Google, Facebook, Amazon and other companies, also weighed in, attacking the bill as overbroad and burdensome. — The feeling was that it didn't do much, and no one really liked it, — Soltani told me.

The White House did little to advance the draft. Obama aides were focused on a different legislative battle: That June, with backing from tech companies, Congress passed the USA Freedom Act, a major reform of N.S.A. surveillance that also positioned Silicon Valley as a champion of civil liberties. Less attention was paid when, a few days later, a working group that the administration had convened to address concerns about facial recognition collapsed. Industry representatives had refused to endorse [the principle that companies would need to secure people's consent](#) before scanning their faces on a public street. Any notion that Washington would produce wide-ranging privacy reform was dead. Silicon Valley had won.

Soltani and Mactaggart first met in person last fall, at the offices of Mactaggart's lawyer in Oakland. Soltani had been on a kind of sabbatical, touring the country in a van and visiting national parks: A stint at the Obama White House was cut short when Soltani was denied his security clearance. (In privacy circles, the decision was widely viewed as retribution for his work on the Snowden series.) Soltani, who is 43, wondered whether Mactaggart would turn out to be a dilettante. Yet as the two men worked to revise the proposal, Soltani found himself increasingly impressed. "I've worked with people who have an ax to grind, who have an agenda," he told me. "Alastair's agenda was: First, just do some good. And then it was: Do something about privacy. And then it was: Do something about data privacy."

The language of the resulting ballot initiative, which Mactaggart finalized last November, reflected lessons from the painful failure of Obama privacy's initiative. It wasn't called a "bill of rights." And on its face, it was not a frontal attack on the giants of Silicon Valley. Mactaggart's proposal instead took aim at the so-called third-party market for personal data, in which companies trade and sell your information to one another, mostly without your knowing about it.

Under the proposed law, every California consumer could demand, from most large businesses, an outline of his or her digital dossier, showing what categories of personal information the company had collected. Mactaggart and Soltani included nearly every category of personal information that they could think of: not only whether the companies had collected your name and address but also if they had collected your browsing history, your fingerprints, your face scans or your location data. They would also be required to inform consumers if they were drawing "inferences," the sophisticated guesses companies make about, say, your dating habits or your taste in convertibles. And if consumers didn't like the deal, they could "opt out," demanding that companies no longer sell or share any data in a given category.

ADVERTISEMENT

The ballot initiative had significant implications for the Silicon Valley giants, however. If adopted, Mactaggart and Arney hoped, it would cripple the tech industry's "notice and choice" consent model, where companies dictated all the terms of service up front, forcing consumers to either agree or find a different app. As more people opted out of data sharing, they believed, the rules would slowly dry up the supply of personal information that companies could buy or trade on the open market. "Third-party tracking would essentially end," Mactaggart says. "So when you log in to Spotify, you wouldn't be logging into, like, 100 partners. You wouldn't have 75 percent of the websites in the world looking over your shoulder."

Still, Mactaggart and Soltani imagined their rules to be comparatively light-touch, a way to inhibit only the most invasive and creepy kinds of commercial surveillance while leaving Silicon Valley to thrive. Imposing them in California, the beating heart of the tech industry, offered another advantage. Through California's referendum process, they could end-run the entire tangle of interests that had stymied the Obama bill in Washington. And if they succeeded, the effect would ripple far beyond the state's borders: Any company in the world that wanted to do business with California's 40 million residents would need to follow California's rules. Mactaggart liked to compare it to California's strict auto-emissions standards, which forced the world's automakers to develop cars that guzzle less fossil fuel.

But Soltani also knew how aggressively the tech companies used their connections in state capitals. In 2015, a Facebook user named Carlo Licata filed suit in Illinois, arguing that the company's photo tagging feature, which automatically identified Facebook users in photos uploaded to the site, violated his privacy rights. Illinois is among the few states in the country with a strict law governing biometric data, the 2008 Illinois Biometric Information Privacy Act, which requires companies to obtain explicit consent before collecting fingerprints, voiceprints or a scan of hand or face geometry. (Illinois only has this law because it recognized the need to protect biometrics before Silicon Valley began trying to control state legislation, says Jay Edelson, a plaintiff's lawyer in Chicago who represents Licata.) Other Facebook users in Illinois filed similar suits, which were consolidated and transferred to a federal court in California. Facebook argued that the Illinois law did not specifically apply to its methods for identifying people in photographs. The judge disagreed, ruling in May 2016 that the lawsuit could proceed.

Just weeks later, the original sponsor of the Illinois privacy act, a genial Chicago-area lawmaker named Terry Link, abruptly proposed an amendment to his own law. The amendment clarified that digital photographs did not count as a source of biometric information and that the law only protected facial scans conducted in person. A Facebook official told me that the company had provided Link with suggestions for clarifying the law, not the language itself. But in a recent interview, Link recalled that the amendment language was given to him directly by a lawyer for Facebook. (Link did not specify who, and would not comment on why he had pursued the amendment in the first place.) Indeed, the amendment, introduced with only a few days left in the year's legislative session, seemed tailored to buttress Facebook's arguments in the California lawsuit, leaving Facebook and other companies free to create face scans from digital pictures without consent.

Link had attached his amendment to a bill that was already sailing through the Legislature, an otherwise bland measure dealing with state procedures for unclaimed property. After national privacy groups leapt into action, Link withdrew the amendment. This April, the judge certified Licata's case as a class action, applying to as many as eight million Facebook users in Illinois. If Facebook loses, the company could face a judgment as high as \$40 billion.

Elsewhere, the tech industry has had more success fending off efforts to regulate facial recognition. Last year, at least five other states considered passing [legislation regulating the commercial use of biometrics](#). Only one, Washington, actually passed a law and it includes precisely the loophole that tech interests sought to carve out in Illinois, excluding a physical or digital photograph, video or audio recording or data generated therefrom. The exception covers facial scans and even voiceprints the kind of technology that Amazon, based in Washington, uses to power Alexa, the virtual assistant that has a microphone in millions of American homes.

Almost immediately after Mactaggart and his friend Rick Arney submitted their final ballot language to the state in November, officials at Facebook and Google sent identical requests: Could they meet in person to discuss the proposal? It was the first time Mactaggart and Arney had heard from either company, and the alacrity of the response was a little intimidating. They decided to talk.

ADVERTISEMENT

Arney met with three Google representatives, including Mufaddal Ezzy, a former aide in the State Legislature who runs Google's California lobbying operation. They had lunch in a private room at San Francisco's Wayfare Tavern, a trendy downtown restaurant with taxidermied heads of wild game on the walls. The executives were friendly, Arney recalls, but mostly they were confused, even a little disconcerted. Google's angle was, No. 1. Who are you? he told me recently, with a chuckle. No one in tech had ever heard of Arney and Mactaggart. They didn't understand why a finance guy and a real estate developer cared so much about privacy. One asked whether either of the two men were planning to run for office. Eventually, the idea was floated that they all work together on an alternative to Mactaggart's initiative a piece of legislation in Sacramento, where they could all have input. Their idea was that

we could fix this in the State Legislature,â Arney says.

Facebook seemed to have different worries, Mactaggart told me. Mactaggartâs uncle was friends with a former San Francisco city official who had gone to work for Facebook. The friend reached out to arrange a meeting with Facebookâs vice president for state and local policy: Will Castleberry, a gravel-voiced veteran of the tech and telecom industry. When Castleberry met Mactaggart and Arney at a different San Francisco restaurant in December, Mactaggart found him charming and sincere. â A lot of people who we talked to told us these were evil people,â Mactaggart said later. â But they seemed nice.â

Castleberry praised Mactaggartâs proposal but asked whether he was willing to rewrite it. Facebookâs chief concern, he said, was a feature of the proposal called a â private right of action.â Unlike the Obama bill, which left most enforcement to the F.T.C., Mactaggart proposed letting consumers sue companies that violated the law. (Illinois had included such a right in its biometrics law, allowing Licata to sue Facebook.) Facebook feared that if interpretation of the new rules was left to juries, rather than regulators, it would take years just to determine what the companyâs compliance obligations were. â We support more disclosure in principle,â Castleberry explained to me. â But the stakes are just much higher with the private right of action.â

Mactaggart wanted to make sure his bill had teeth. But as a businessman, he said, he was sympathetic to Facebookâs concerns. He urged Facebook to send him some alternative language. â We thought, Gosh, if Facebook came back with something reasonable, and we could get behind it, that would be a win-win,â he recalls.

But as Mactaggart waited, the tech companies â and other industries dependent on free data â were preparing to crush him. In January, Californiaâs Chamber of Commerce filed paperwork to register a group called the Committee to Protect California Jobs. The committee soon collected six-figure contributions from Facebook, Google and three of the countryâs biggest internet service providers: Comcast, Verizon and AT&T. The money paid for polling, which showed that Californians indeed had ample concerns about privacy, and to retain Gale Kaufman, a respected Democratic referendum specialist with close ties to the stateâs labor unions. The group also hired Steven Maviglio, a prominent Democratic public-relations consultant whose clients included the Democratic speaker of the California State Assembly. Silicon Valley was girding for war.

Mactaggart and his team didnât find out what was happening until March, when the Committee to Protect California Jobs was required to disclose its donors and spending. He and Arney believed the opposition had made a blunder: They had shown their hand before Mactaggartâs initiative had even qualified for the fall ballot. But the battle ahead looked to be ugly. â â â Full employment for trial lawyersâ â and thatâs just the tip of the iceberg of this poorly-written-by-a-multi-millionaireâs measure,â [Maviglio tweeted](#). Within a few weeks, the committee was circulating talking points to California sheriffs and prosecutors, claiming that Mactaggartâs proposal would make it harder for cops to foil kidnappings or quickly track down criminals like the San Bernardino shooter. â It was like, â Welcome to the N.F.L.,â â â Mactaggart recalls. â It was a reminder of how small we were. These were the biggest corporations in the world.â

ADVERTISEMENT

Mactaggart also knew that the tech and cable money, while less than the \$2 million he had so far put into his own campaign, was only just the start. His own consultants warned him that the Committee to Protect California Jobs would most likely raise \$100 million or more by Election Day. Mactaggart was rich. But he wasnât that rich.

In March, as Mactaggartâs canvassers were gathering signatures to qualify for the November ballot,

Facebook made a surprise announcement â... one that would change everything. In a statement posted on its website late one Friday evening, the company said it was suspending a political analytics firm called Cambridge Analytica from its platform after it had â... received reportsâ... that Cambridge had improperly obtained and held data about Facebook users. The source of those reports became clear the following day, when reporters at The Times and The Observer of London [revealed that a contractor for Cambridge had harvested private information](#) from more than 50 million Facebook users, exploiting the social-media activity of a huge swath of the American electorate and potentially violating United States election laws. Within weeks, Facebook acknowledged that as many as 87 million users might have been affected, marking one of the biggest known data leaks in the companyâ... s history.

The Cambridge Analytica scandal engulfed Facebook, sending the companyâ... s stock price plunging and setting in motion the worst crisis in the companyâ... s history. Cambridge executives had long bragged about deploying powerful â... psychographicâ... voter profiles to manipulate voters. Now Facebook was forced to acknowledge that Cambridge had used votersâ... own Facebook data to do it. The damage was not only legal and political â... Facebook faced lawsuits and new inquiries by regulators in Brussels, London and Washington â... but also reputational. Silicon Valleyâ... s public image had survived the Snowden revelations. But tech companies, already implicated in the spread of â... fake newsâ... and Russian interference in the 2016 election, were no longer the good guys. When Arney took one of his sons canvassing on the train, it was suddenly easy to get people to sign their ballot petition. â... After the Cambridge Analytica scandal, all we had to say was â... data privacy,â... â... â... he told me.

The scandal forced Facebook to take complaints about privacy more seriously â... or, at least, to sound as if it did. â... Iâ... m not sure we shouldnâ... t be regulated,â... Mark Zuckerberg, the companyâ... s chief executive, told CNN. Mactaggart pressed the advantage, posting an open letter accusing Zuckerberg of misleading Facebook users, then calling up media outlets to remind them that Zuckerbergâ... s company was, at that moment, financing a campaign to stop new privacy regulations in California. When Zuckerberg appeared before Congress, in April, he again appeared contrite. â... We didnâ... t take a broad-enough view of our responsibility, and that was a big mistake,â... Zuckerberg told lawmakers. The next day, Facebook announced that it would no longer contribute money to the Committee to Protect California Jobs.

Yet even as his canvassers racked up petition signatures from voters in the state, Mactaggart was being spurned by almost every prominent privacy group in the country. Like any other movement, the world of privacy experts has its radicals and moderates, feuds and schisms. In the wake of the Cambridge revelations, some advocates in Washington and California called for regulations, similar to Europeâ... s G.D.P.R., that were much more sweeping than what Mactaggart proposed; some privacy advocates told me that they feared his initiative would crowd out their own, more sweeping proposals. (Whereas Mactaggartâ... s initiative allowed consumers to â... opt outâ... of data sales between companies, G.D.P.R., which went into effect across the continent in May, required companies to obtain consumersâ... permission for collecting the information in the first place.) Once voters approved Mactaggartâ... s initiative, these critics pointed out, California lawmakers would need to muster an almost unobtainable supermajority to amend it.

The Electronic Frontier Foundation, the storied advocacy group based in San Francisco, did not endorse Mactaggartâ... s proposal. Neither did the American Civil Liberties Union or Common Sense Kids Action, an influential group also headquartered in San Francisco, that has pressed for restrictions on the collection of childrenâ... s data. Samantha Corbin, a lobbyist in Sacramento for both Common Sense Kids Action and the E.F.F., [tweeted in late March](#) that she couldnâ... t support Mactaggartâ... s proposal because it did not require that companies get peopleâ... s permission to use their data. â... Informed consent to use personal data is critical to privacy & democracy,â... Corbin tweeted.

Corbin did not mention her firmâ... s new client: the Committee to Protect California Jobs. Still at work for its remaining backers, the committee had hired Corbinâ... s firm in February. According to Corbin, the industry coalition wanted her to provide an overview of existing privacy rules as well as areas of potential compromise

with the other privacy activists, a move that could further isolate Mactaggart. Such an alliance would not have been totally unprecedented. Despite disagreements over consumer rules, tech companies have contributed millions of dollars to groups like the E.F.F. and the Washington-based Center for Democracy and Technology while working closely with some of them in pushing for post-Snowden surveillance reforms. â... Sometimes politics makes for strange bedfellows,â... Corbin told me by email, when I asked about the payment. â... I can tell you there was plenty to concern industry and privacy groups alike about the ballot initiative.â...

ADVERTISEMENT

Facebook, for its part, contacted the C.D.T., asking the centerâ... s top expert on data-privacy protection, Michelle De Mooy, to help develop an alternative to Mactaggartâ... s proposal â... language that could be submitted to lawmakers in Sacramento, either replacing or pre-empting Mactaggartâ... s proposal. De Mooy told me that after some initial discussions, she turned them down, in part because Mactaggart did not seem interested in further compromise, but also because he seemed likely to succeed. â... They were looking for options,â... De Mooy says of Facebook. â... Ultimately, we said that that wasnâ... t something we were going to do.â... But C.D.T. also remained neutral.

Facebook chose that moment to make another direct appeal to Mactaggart. The company had developed a legislative counterproposal, which in April Will Castleberry emailed to Mactaggart, copying De Mooy. Mactaggart read it on a plane, flying back from a memorial service in Canada. He wasnâ... t impressed. It was vague about data collected from mobile phones, and it appeared to exclude Facebookâ... s own network of â... likeâ... and â... shareâ... buttons around the Web, one of the companyâ... s chief means of tracking consumers when they werenâ... t on Facebook. And while it limited the sale of data, it seemed to allow companies to make deals to swap data back and forth, potentially a major loophole.

But Mactaggart didnâ... t want to waste his money on a ballot fight if he could get a deal in Sacramento â... and now that his initiative looked sure to get on the ballot, lawmakers in Sacramento had taken a renewed interest in passing their own privacy bill. Some privacy groups, including Common Sense Kids Action, were already negotiating with them. â... Iâ... m a real estate developer,â... Mactaggart told me later, describing his thinking. â... Iâ... ve never gotten everything I want, ever. If the legislature passed my entire bill, Iâ... m fine. And if it was almost as good â... sure. Who needs to have a fight for the sake of having a fight?â...

A few weeks later, I had lunch with Mactaggart and Arney at a sushi place near the Capitol. We were joined by Robin Swanson, Mactaggartâ... s campaign consultant, herself a former senior aide in the Legislature. Everyone was in a good mood. They had recently submitted more than 629,000 signatures to qualify Mactaggartâ... s initiative for the ballot, nearly twice the required minimum, and a Republican candidate for governor had endorsed his proposal during a public debate, surprising even Mactaggart. â... Zuckerberg testifying helped us,â... he said. â... He has the name, he has the face. He ripped off 87 million people.â...

Nevertheless, Mactaggart was willing to compromise. He had told California lawmakers that he would drop his campaign if they could pass a reasonable privacy bill by June 28, the legal point of no return for formally withdrawing his initiative from the ballot. Mactaggart and his team were scheduled to meet Ed Chau, a mild-mannered lawmaker from outside Los Angeles who leads the Assemblyâ... s committee on privacy and consumer protection. Chau had been designated as the Assemblyâ... s chief negotiator on a potential deal between industry and privacy advocates. After lunch, we all walked over to the Capitol and filed into Chauâ... s fifth-floor office, where staff members had promised Mactaggart an update on the negotiations.

Many privacy advocates in California regarded Chau as their champion. In 2017, he tried to pass a bill that would have required cable companies and other internet service providers to obtain customersâ... consent before selling their browsing history and other sensitive personal data. Known as AB 375, the bill was designed to replicate a popular Obama-era regulation that Trump and Republicans in Congress overturned during Trumpâ... s first months in office. To get it done quickly, Chau employed the very same tactic the tech

industry had used in Illinois, gutting a different bill that had already passed the Assembly and inserting the broadband privacy provisions. â... California is going to restore what Washington stripped away,â... he pledged at a news conference.

But Chauâ... s bill had quickly run into a series of roadblocks. The Senate leader at the time was Kevin de LeÃ³n, a prominent and ambitious Democrat from Los Angeles. Because Chau had replaced his original bill with a totally new one, the rules committee that de LeÃ³n leads initially required the legislation to be â... triple-referred,â... a rare legislative maneuver under which three different committees are entitled to inspect and approve the bill. (Ultimately, it was required to clear only two committees.) When the bill survived referral, Democratic leaders took over the legislation and began revising it, largely freezing Chau and the privacy groups out of the process. In the waning days of last yearâ... s legislative session, a huge coalition of industry groups, data brokers and tech companies signed [a joint letter](#) opposing the privacy legislation.

ADVERTISEMENT

Some privacy advocates believed de LeÃ³n was deliberately setting up Chauâ... s bill to fail. While de LeÃ³n is a progressive Democrat â... he is now seeking to oust his fellow Democrat Dianne Feinstein from her United States Senate seat â... he has also had a long relationship with AT&T, among the most feared and influential companies in Sacramento. As Senate leader, de LeÃ³n was responsible for the health and size of the Democratic majority in the chamber, and the telecom and tech industries were a critical source of campaign cash. (AT&T also employed at least one of de LeÃ³nâ... s former top advisers among its swarm of lobbyists.) Most of the chamberâ... s Democrats declined to go on the record supporting or opposing AB 375, fearful of enraging either the stateâ... s most powerful companies or privacy-minded anti-Trump voters. It never reached the floor, sparing them a painful vote. The reason for its demise remains murky. (Dan Reeves, a de LeÃ³n aide, told me: â... We said, if the author wants a vote, weâ... ll put it up for a vote. We never heard back from them.â... Chau says he did ask for a vote. â... The response from leadership then was, I didnâ... t have the support,â... he says.) Now Chau had a second chance. Democratic leaders had resurrected his legislation, making a modified AB 375 the vehicle for a potential compromise with Mactaggart.

But when we arrived in his office, Chau seemed ill at ease. He had not yet heard from Facebook or Google, he told us, and did not really know what their position was. He spoke in bland generalities. â... Weâ... re in the process of reaching out to all the stakeholders to see whether we can build consensus,â... Chau said. Mactaggart asked if the tech companies were being reasonable. Chau repeated himself, a nervous smile stuck on his face. â... Weâ... re reaching out to all potential stakeholders,â... he said. After 15 minutes, Chauâ... s assistant interrupted to say that he had another meeting. We filed out. No one else appeared to be in Chauâ... s waiting room.

Outside, it was a beautiful California day, so we strolled along a footpath on the Capitol grounds. Mactaggart was struck by Chauâ... s evasiveness â... and worried about the tech companiesâ... seeming silence. â... If you are Facebook and Google, and you are serious about legislation and reform,â... Mactaggart said, â... you would think that it might make sense to go talk to the head of the committee thatâ... s in charge of crafting the legislative response to this initiative.â... It was possible that the companies had abandoned compromise. It was also possible that everybody was playing a more complex game. State lawmakers didnâ... t want to cede policymaking authority to Mactaggart, and tech companies disliked his initiative so much that they might be willing to come to a reasonable compromise with the Legislature instead. If Democratic leaders were careful, they could devise a win-win: A bill that Mactaggart and the industry would accept, that privacy activists would hail and that lawmakers could take credit for. But Mactaggart found the delays and secrecy maddening. His deadline was fast approaching. â... Daylightâ... s burning,â... he said.

We got in his SUV and headed back to Oakland. I asked him whether he thought Chau could deliver a bill that would satisfy him and still pass the Legislature. But Mactaggart took my question both more broadly and

more personally: What would happen if he failed? â... These companies know so much about you,â... Mactaggart said as he drove. â... And as time goes on, it is only going to get worse and worse.â... Approaching Oakland, we drove past the Benicia refinery, a small mountain of pipes and distillation towers looming over an inlet of San Francisco Bay. Mactaggart suggested that the refinery, originally constructed for Exxon in the 1960s, could never be built there today, given Californiaâ... s strict environmental-impact laws. Reform movements of earlier eras had managed to rein in Big Oil, Mactaggart noted. It was time for Big Tech to face a similar reckoning.

For much of May, Chau and his counterpart in the California Senate, a lawmaker named Robert Hertzberg, quietly tried to negotiate a compromise. Industry lobbyists flatly threatened to kill any bill with a private right of action. They also objected to forcing companies to disclose the names and contact information of every third party they shared data with, claiming it would be an impossible burden. (â... The private right of action was something that many stakeholders did not like,â... Chau told me later. â... That is a true statement.â...) In June, the two lawmakers sent their first draft to Mactaggart. He was not pleased. â... They sent me a draft with no enforcement,â... Mactaggart said. â... There was zero creativity about how to solve the problem.â... He told them no.

It began to dawn on at least some people that Mactaggartâ... s vote might be the most important one. Without it, Mactaggartâ... s initiative would move forward. There would be no win-win. Hertzberg, in particular, really wanted a deal. Where Chau is modest, Hertzberg, who represents the San Fernando Valley, is voluble and insistent, with a slicked-back mane of hair and a steady borscht-belt patter. â... I called Alastair â... we had some friends in common,â... Hertzberg told me. Hertzberg proposed that Mactaggart take the pen. Mark it up however you want, he told Mactaggart, and Iâ... ll bring your proposal back to the industry. On a Wednesday in mid-June, Mactaggart went to his lawyerâ... s office and got on the phone with a small group of negotiators, among them Hertzberg, Chau and an adviser to Common Sense Kids Action. Twelve hours later, they had an agreement, which Mactaggart and Common Sense Kids Action agreed to support. Hertzberg and Chau sent it off to the Legislatureâ... s lawyers to be formally drafted into a bill.

Mactaggart had agreed to whittle down his biggest stick: The private right of action would permit consumer lawsuits only in the case of a traditional data breach, as when your credit-card information is stolen. And instead of naming every third party they shared your data with, companies would have to disclose only the kinds of data they were sharing, an obligation the companies already had to European consumers under G.D.P.R. Many privacy activists hated the deal, and some of the same groups that had refused to support Mactaggartâ... s initiative now savaged him for compromising on it. The A.C.L.U. and E.F.F., both of which rely heavily on civil litigation to win advocacy battles, were particularly upset by the narrowed private right of action.

ADVERTISEMENT

But as Mactaggart saw it, the core of his initiative remained intact â... and was in some ways strengthened. Now you could see exactly what information Silicon Valley and the data brokers had collected about you. You could still demand that they stop selling or swapping your data. And if they refused, the California attorney general could investigate and impose fines. Even in this reduced form, Mactaggart and Soltani believed, this would be the most stringent consumer-privacy law in the country â... the most significant step in years toward regulating the surveillance capitalists, and a proof of concept for activists and industry alike. If it passed, the tech industry could no longer claim that no one cared about privacy, or that data rules would kill jobs, or were too technically challenging. Californiaâ... s attorney general could police the entire industry, while other states worked on their own versions of the rules. â... Under this law, the attorney general of California will become the chief privacy officer of the United States of America,â... Mactaggart argued. Eventually, it might drive the tech industry back to the negotiating table in Washington, in hopes of getting a single national standard.

The next morning, Hertzberg summoned tech lobbyists to a meeting. They had a simple choice, he explained. They could agree to the deal, or take their chances with Mactaggart in the fall. Hertzberg told the lobbyists they could probably scare his colleagues into killing this new bill, too. But Mactaggart's initiative was polling extraordinarily well. To beat him in November, the tech industry and its allies—the cable companies, the data brokers and the financial companies and retailers that used their data for advertising—would have to mount a huge negative campaign, at considerable cost to their own image. And if they do, we'll be right back here next year, Hertzberg told me later that day.

Legislative staff members had finished rewriting AB 375, and a deal seemed imminent. That Friday, as he drank his morning coffee, Mactaggart decided to read the new bill—the fine print—one more time. He noticed a seemingly minor alteration in one section, the kind of thing most people would skip over. Mactaggart realized it would completely gut what remained of the private right of action. Furious, he called Hertzberg and Chau and told them the deal was off. Neither lawmaker could explain who made the change, Mactaggart told me, but Hertzberg scrambled to fix it. In most negotiations, you are talking to all these different interest groups, Hertzberg told me recently. This is a situation where we had to go and reach out to everyone and bring that information to Mr. Mactaggart and ask him what he wanted to do. By Monday morning, the deal was back on again.

That Tuesday, Facebook signaled that it would not fight the bill. In a statement emailed to reporters, Will Castleberry said that—while not perfect, we support AB 375 and look forward to working with policymakers on an approach that protects consumers and promotes responsible innovation. At hearings, industry representatives complained that they had been put in the impossible position of either accepting the compromise or fighting a ballot initiative they had no power to change. The internet industry will not obstruct or block AB 375 from moving forward, the Internet Association announced, because it prevents the even-worse ballot initiative from becoming law in California. Soltani wryly pointed out that Mactaggart had offered Silicon Valley a take-it-or-leave-it privacy policy—the same kind that Silicon Valley usually offered everyone else.

That Thursday, California lawmakers began voting on the bill. Mactaggart, who wore a blazer and khakis, watched from the Senate gallery with his wife. As the vote was called, Mactaggart kept his eyes on the electronic billboard where votes were recorded: One by one, almost every light flipped to green. They walked over to the Assembly, where much the same scene unfolded. In the end, not a single lawmaker in either chamber voted against the compromise.

Political power is a malleable thing, Mactaggart had learned, an elaborate calculation of artifice and argument, votes and money. People and institutions—in politics, in Silicon Valley—can seem all-powerful right up to the moment they are not. And sometimes, Mactaggart discovered, a thing that can't possibly happen suddenly becomes a thing that cannot be stopped.

I spoke to Mactaggart shortly after the vote. It felt like a moment—people didn't want to be on the wrong side of this issue, he observed. A part of Mactaggart was already thinking ahead. The legislation would not take effect until 2020, and both the Legislature and the tech industry would have a chance to amend the new law beforehand. In the weeks after the vote, as Silicon Valley's accumulated troubles sent shares in Facebook and other tech companies plummeting anew, their lobbyists were back on the march. The Trump administration was convening meetings to discuss a new national privacy standard, one that would perhaps override California's newly minted statute. There would be plenty of chances for mischief. But as he basked in the victory, Mactaggart was giddy, even emotional. Everyone who could have blocked it didn't, he said. When the system wants to work, it can.

To Save Net Neutrality, We Must Build Our Own Internet

We must end our relianceâ... on big telecom monopolies and build decentralized, affordable, locally owned internet infrastructure.

Image: Lara Heintz/Motherboard

The Federal Communications Commission will announce a full repeal of net neutrality protections Wednesday, according to the [New York Times](#) and several other media outlets. It is possible that a committee of telecom industry plutocrats who have from the outset made it their mission to rollback regulations on the industry will bow to public pressure before Wednesday, but letâ... s not count on it.

It is time to take action, and that doesnâ... t mean signing an online petition, upvoting a Reddit post, or calling your member of Congress.

ADVERTISEMENT

Read More: [Sorry, Ajit Pai: Americans Won't Forget Net Neutrality Over Thanksgiving](#)

Net neutrality as a principle of the federal government will soon be dead, but the protections are wildly popular among the American people and are integral to the internet as we know it. Rather than [putting such a core tenet](#) of the internet in the hands of politicians, whose whims and interests change with their donors, net neutrality must be protected by a populist revolution in the ownership of internet infrastructure and networks.

In short, we must [end our reliance](#) on big telecom monopolies and build decentralized, affordable, locally owned internet infrastructure. The great news is this is currently possible in most parts of the United States.

There has never been a better time to start your own internet service provider, leverage the publicly available fiber backbone, or build political support for new, local-government owned networks. For the last several months, [Motherboard has been chronicling](#) the myriad ways communities passed over by big telecom have built their own internet networks or have partnered with small ISPs who have committed to protecting net neutrality to bring affordable high speed internet to towns and cities across the country.

A future in which ISPs are owned by local governments, small businesses, nonprofit community groups, and the people they serve are the path forward and the only realistic way of ending big telecomâ... s stranglehold on America.

ADVERTISEMENT

In Detroit, the [Equitable Internet Initiative](#) is building community-owned wireless internet infrastructure in towns that big telecom won't touch. Hundreds of towns have built their own internet service providers. Rural communities are [putting wireless internet antennas](#) on top of mountains, grain silos, and tall trees. The [fastest internet connections](#) in the United States are provided by local governments, not big telecom. In Southern California, Tribal Digital Village is [using unused television spectrum](#) to deliver internet. All over the country, big telecom is being rejected and subverted, and you do not need to have a pile of money, an army of lawyers, or a degree in network engineering to take action.

Motherboard has and will continue to celebrate and amplify these projects, but that is not enough. Starting immediately, we will:

- Begin researching and publishing technical articles and videos that explain how new wireless networking hardware and software works, how to use it, and how to use currently available, affordable technology to start your own small internet service provider.
- Speak to activists, entrepreneurs, lawyers, technologists, networking engineers, and politicians who have navigated the technical, legal, and political hoops required to start community-owned internet service providers. We will use those conversations to create clear instructions for how you can empower yourself to do the same.
- Begin creating a comprehensive guide to the various new technologies and methods of creating decentralized internet infrastructure, which will be released next year.

If you want to help or partner with us, [please get in touch](#). We've also created a newsletter to [provide specific updates on this project](#).

Two-Factor Authentication, Explained

Together we can thwart the big-tech data grab. Here is how

[John Harris](#)

A decentralised internet sounds offputtingly complicated. But our lives, online and off, now depend upon it

[@johnharris1969](#)

[Comments](#)

. Illustration: Thomas Pullin.

Our family got a Google [Home Hub](#) for Christmas. As comparative lifestyle Neanderthals, we have so far only used it as a glorified digital picture frame and music player, though this is clearly not what it was built for. Say â... Hey, Googleâ... , tell it what you want, and a whole universe of entertainment, advice and help can be supplied â... up to and including instant control of internet-connected doorbells, thermostats and more.

Contrary to their branding as â... assistantsâ... , the primary purpose of these devices is not to devotedly help the people who use them. At the risk of stating the blindingly obvious, once we have paid for the hardware, we get the services they can deliver largely for free, in return for limitless access to the small details of our lives. Big tech is therefore able to carry on making advertising more and more precisely targeted, and vastly increase the mountains of data that power its development of artificial intelligence. Smartphones, tablets and computers have been helpful, [but evidently not helpful enough](#). Build data-gathering machines into the domestic sphere, and you break open whole streams of personal information.

Facebookâ... s influence is undoubtedly scary, partly because its senior management [seems to have no clue](#) about the responsibilities that should come with such power. But Googleâ... s range of activities and penetration of our lives represents something else entirely. Its systems have soaked up and mastered the planetâ... s topography and most of its languages. In the UK, it has a presence in the NHS. Thanks to the range of offshoots and acquisitions now [grouped with Google under the banner of Alphabet Inc](#), it is centrally involved in biotech, the development of driverless transport â... and, through its artificial intelligence subsidiary, DeepMind, the pursuit of even more incredible technologies that will, sooner or later, transform everything from work to education.

Google expertise is [also driving the idea of surveillance-heavy â... smart citiesâ...](#) , which are beginning to capture the imagination of powerful interests across the world. As all its other activities grind on, it sustains its domination of the most mundane parts of our lives via Gmail, YouTube, the android smartphone system and its monopoly on online search. Its new assistants represent a step into unprecedentedly intimate spaces.

.

[Facebook](#) [Twitter](#) [Pinterest](#) â... We have so far only used it as a glorified digital picture frame and music player.â... The Google Home Hub. Photograph: Samuel Gibbs for the Guardian

So, to use a very 20th-century phrase, what is to be done? The â... techlashâ... of the last couple of years has left Google remarkably untroubled. But even so, [you do not have to look too far for ideas](#). Perhaps both Alphabet and Google might be broken up, and their advertising operations would become standalone companies, with YouTube and Gmail similarly cut adrift. Maybe Google could be belatedly classified as a utility, and forced to allow open access to both its key algorithms and data sets, just as the US telecoms giant

AT&T [once gave up a range of its precious patents](#) in return for its monopoly.

All of these things would be worthwhile. But as solutions they fall short in one fundamental sense: they deal with the manifestations of Google's power rather than the root cause.

One glaring truth about the modern internet should be at the core of any meaningful conversation about it. From pluralistic, egalitarian beginnings, it has been transformed into a top-down system dominated by a few big players whose power is based on their control of data, with [Google](#) as the king. So perhaps something truly radical is required: a reconceptualisation of what the internet is, and what happens to the data that determines who controls it.

As the year unfolds, pay attention to the people who are talking about a new, decentralised internet - AKA Web 3.0 - and the possibility of data being returned to the control of the people who generate it.

In Boston, [the worldwide web's founder, Tim Berners-Lee, is working on a new way of using the internet](#). Called Solid, it is based around personal online data stores, or Pods, that contain the wealth of information people generate, and are their exclusive property. This means they can allow access to particular elements of their data from particular services as they see fit, and move their data from app to app instead of surrendering it (imagine, for example, being able to move between social networks, taking your lists of friends and followers with you). Berners-Lee and his people are also working on a new kind of digital assistant they have named Charlie, the raison d'être of which is the careful use of personal information, to make individual lives easier and better, rather than the idea of using it to sell us things (Charlie works for you; Charlie doesn't work for Google or Amazon).

Then there are the possibilities bound up with the [blockchain](#), the system of verification that sits under so-called cryptocurrencies. For instance, the blockchain offers a means of independently verified personal identity, which respects privacy far better than the Google and Facebook accounts do we are now encouraged to use across the internet. Blockchain technology has also opened the way to new models whereby endless micropayments can be made in return for particular online services or content; and, if people voluntarily allow elements of their data to be used, [rewards can flow the other way](#). Here perhaps lies the key to a system beyond the current, Google-led model, in which services appear to be free but the letting-go of personal data is the actual price.

There is a leftwing way to challenge big tech for our data. Here it is

Evgeny Morozov

[Read more](#)

Just before Christmas I spoke to one of the founders of a Cambridge-based [startup called Fetch](#), which is developing what it calls decentralised artificial intelligence, something that seems to represent a much more egalitarian vision than the one embodied by Google-style assistance. In their system, using the internet to satisfy particular wants would not involve indiscriminately surrendering data but judiciously sending out digitised autonomous economic agents to get help as and when we needed it. If we wanted a ride to work, or minute-by-minute access to the cheapest electricity, this is how we would do it: via a system that repeatedly connected different permutations of buyers and sellers, rather than by privileging huge platforms that render the rest of us digital serfs.

These ideas and models have the disadvantage of sounding offputtingly complicated, which could foster a certain fatalism. Maybe Google's offer to its users is too simple, and the company's dimensions now

far too big to allow any space for alternatives. Besides, if anyone began to make headway by offering us greater privacy and control, we would hear plenty of protests about how severing the connection between huge data sets and the growth of artificial intelligence would be to hand the dominance of AI to China, where the twin forces of surveillance and innovation are stampeding on. I only know this: that tangled up in all this stuff are elemental questions about how we are going to live. And, even if it can play me my favourite song and tell me whoâs at the door, Google does not have the answers.

USE ONLINE CROWD-SOURCE TOOLS TO EXPOSE CORRUPT POLITICIANS AND THEIR FINANCIERS

One of those tools, [Spoke](#), is a peer to peer texting app, originally developed by [MoveOn](#), which offered the Warren Campaign high volume messaging at a fraction of the costs of other vendor options. The team used it to send four million SMS messages on Super Tuesday alone.

[Pollaris](#) is a location lookup tool with an API developed to interface directly with Warrenâs official campaign website and quickly direct supporters to their correct polling stations.

One of Elizabeth Warrenâs presidential campaign app, Caucus, designed for calculating delegates. (Image: supplied)

Warrenâs tech team will also open-source Switchboard ([FE](#) and [BE](#)) â which recruited and connected volunteers in primary states â and Caucus App, a delegate calculating and reporting tool.

The campaignâs [Redhook](#) tool took in web hook data in real time and experienced zero downtime.

â Our intention in open sourcing it is to demonstrate that some problems campaigns face do not require vendor tools and are solvedâefficiently with a tiny bit of code,â said the Tech Team.

Elizabeth Warren ended her 2020 presidential bid on March 4 after failing to win a primary. Among her many policy proposals, the Massachusetts senator had proposed [breaking up big tech](#) companies, such as Google, Facebook and Amazon.

Her campaign will continue to share the tech tools they used on open source channels.

WALKAWAY PARTICIPANT DROPS A TRUTH BOMB ABOUT NANCY PELOSI AND DNC TRUE INTENTIONS REGARDING MINORITIES LIKE HIM

| BY [V. SAXENA](#)

Heâ... s speaking facts.

According to Democrats, every problem in the black community exists because of the so-called â... legacy of Jim Crow.â... But according to #WalkAway participant M. Adrian Norman, this rhetoric is nothing but bullshit designed to help Democrats profit off racial grievance and animosity.

â... **The way I see it, the civil rights movement has turned into the [civil rights industry](#),**â... Norman explained in a YouTube video published last week. â... You have political leaders now who all they want to do is get reelected by capitalizing on white guilt and monetizing white guilt so for every problem we have in the black community.â...

â... All they do is blame white people and they blame the legacy of Jim Crow and slavery for no matter what it is. And itâ... s not really productive, man, because it never really addresses the core issues that are causing these problems, which means we never actually get to the point we can determine solutions.â...

And if you look at certain metrics, Norma continued, it becomes clear that an abundance of the problems faced by blacks exist not because of the â... legacy of Jim Crow,â... but rather because of policies put in place specifically by those who scream the loudest about â... institutional racism,â... Democrats.

â... [U]nder Democrat leadership and electing all these people to office who say they have our best interests at heart, in some areas things have stayed the same. In some areas things have gotten considerably worse,â... he noted.

â... When we look at the disparity in income between blacks and whites, since the 50s and 60s [it] has actually grown. Itâ... s gotten worse. How is that if itâ... s because of the legacy of slavery and Jim Crow, why is it the farther away we get from slavery and Jim Crow, that disparity increases rather than contracts!?â...

Excellent point. As noted by [Vox](#), â... the situation has actually gotten worse for many black people â...! [a]cross measures ranging from criminal justice issues to economic well-being.â...

[M. Adrian Norman@madriannorman](#)

The black exodus from [@TheDemocrats](#) isnâ... t meant to suggest that there was malice from all black and Democrat leaders.

Itâ... s simply a consequence of the impact progressive policies have had in our communities. Blacks are worse off under Democrat leadership.

[10:35 AM - Jun 7, 2018](#)

â... If we look at the unemployment rate, the black unemployment rate has pretty much been double that of whites since that time. Thereâ... s been no improvement almost in that area, but weâ... re supposed to still sit here and just blame slavery, just blame the legacy of Jim Crow. It doesnâ... t make any sense because their policies donâ... t make any sense, yet they keep asking to be reelected and we keep electing them over and over again and nothing changes.â...

As examples of Democratsâ... lousy policies, Norman then pointed to their opposition to school choice.

â... We know through research that black students perform better when parents have school choice, when theyâ... re allowed to send their kids wherever they want to go, when they can pull their kid out of a failing school and send them to a better school,â... he said.

â... Yet Democrats almost unanimously opposed school choice they oppose all of the things that are going to make the black community better. They oppose all of the things that are going to move our community forward, and then they sell us this lie and tell us so itâ... s because of white people, because of white privilege, and because of slavery. Man, itâ... s bull, they know it!â...

[M. Adrian Norman@madriannorman](#)

[Replying to @BiracialBeaut11 and 2 others](#)

The Civil Rights Movement turned into the Civil Rights INDUSTRY.

[12:17 PM - May 3, 2018](#)

- ♦ [54 people are talking about this](#)

[Twitter Ads info and privacy](#)

But why do Democrats peddle this bullshit? Because like Norman noted earlier, â... the civil rights movement has turned into the civil rights industry,â... and a whole lot of people would be out of work were this industry to disappear.

â... Thereâ... d be a whole lot of politicians, thereâ... d be a whole lot of sociology professors and womenâ... s studies professors, thereâ... ll be a whole lot of people [who make money on people being disenfranchised](#) that would be out of work,â... he said. â... The industry is so profitable that ending racism would actually mean people donâ... t have a job. What are they gonna do all day if they canâ... t go out and advocate so to keep these problems going, to keep money in their own pockets, man, so they can get reelected, so they can keep money going into their foundations.â...

Bingo. The truth is that the Democrats don't give a damn about Norman or any other minority. They care about the money in their wallets, and unfortunately for their naive constituents who keep reelecting them into office, actually solving problems just isn't profitable enough to be worth their time.

H/T [*Independent Journal Review*](#), [*LilSubs*](#)

WE ARE COMING FOR YOU!

My co-workers and I witnessed some guys stealing money from both, our company and the US Government Treasury. We reported it to the cops. It turned out to be part of one of the biggest embezzlement crimes ever exposed. Major political figures and tech "bosses" turned out to be running a "PayPal Tech Mafia". The bad guys then began hunting us down and attacking us in reprisal "for the rest of our lives" per their threats and their ongoing retribution vendettas.

It was found that famous senators, their Silicon Valley oligarch financiers and their associates run an organized crime insider trading scam that abuses taxpayers and sabotages competing businesses. The terminations of the heads of the FBI, The Department of Energy and other famous people in politics is because of their operation, and cover-ups, of this case. The cover-ups are still going on. Our ability to get justice in this matter is still blockaded.

We will fight to the death to get justice because they tried to kill us, ruin our business and destroy our names. Every day an increasingly large number of the 300 million potential voters join the effort to expose, shame, dox, bankrupt, boycott and 100% legally exterminate the corrupt entities who did these illicit things by using our Democracy as their billionaire's plaything.

Hundreds of the perpetrators have already been fired, placed under permanent public surveillance, financially tracked through every asset, reported to federal agencies and targeted for investigation. The goal is to interdict every single person, company and political operative group who is engaging in these crimes using crowd-sourced investigation and intelligence tools.

WE WILL NEVER BACK DOWN UNTIL YOU PAY US BACK OUR CASH TO REIMBURSE US FOR OUR DAMAGES FROM YOUR ATTACKS; YOU CRIMINAL SCUMBAG POLITICIANS AND CORRUPT SILICON VALLEY OLIGARCHS

"...After completing a federal contract to build America's next generation energy and transportation technologies, our team were promised a factory contract, and funding, to deliver these low-cost, hyper-efficient, job-building, clean solutions to every American.

We were lied to and defrauded. We found out that crooked politicians had secretly arranged to give our money and contracts to their best friends. That is a felony crime that abuses quite a few State and federal RICO, Anti-Trust laws, Quid-Pro-Quo laws, the public and the roots of Democracy..

We found out, thanks to FBI, OSC, GAO, OMB and private investigators, that each of the jurisdictional Senators and related politicians were engaged in crimes. Investigators have not found a single political entity in this case who was not either: financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to.

We were lied to by government representatives who said we could make "hundreds of millions of dollars in sales profits and carbon credits sales" if we invested millions of dollars of our resources and years of our lives in America. We were induced to invest. We invested but those representatives knew they had already hard-wired the funds to our competitors. Those "representatives" were Senators and government agency bosses who were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to.

Our product and services metrics beat those of every other competitor. We won on every comparison item except we refused to pay the bribes and cooperate with the illegal quid-pro-quo demands.

We found that mega-insider law firms like Covington, MoFo, Wilson Sonsini, Perkins and others operate a cartel of political appointee placements via quid-pro-quo deals, black-lists and manipulation of public policy and policy decisions via covert perks and payola schemes.

We found out how insider stock trading between politicians and tech companies is the largest form of corruption in America.

We found out who the top 200 dirty politicians, corrupt investment bankers and tech oligarchs were that operated the scheme. We found out thanks to some FBI, GAO, Congressional and Media investigators. The evidence and financial tracking software proves it. The quid-pro-quo tracks back to each and every one of their stock market, i-bank and estate accounts.

You, the public, have found out that DOJ & FBI officials manipulated Democracy to put a hit-job on a President of the United States. We found out that the Department of Energy and the State Department did the same thing WITH help from a previous White House. Congress has proven that these things did happen. Our federal court records prove it to an even greater degree.

We have filed reports and charges with every law enforcement and regulatory agency in the nation...but, as anyone can see from today's headlines, cover-ups abound! We found out that, at every agency: one third of the people are crooks, one third of the people are good worker bees and one third of the people are Elliot Ness-class superheros. We found out that it only takes a handful of the superhero-type staffers to offset or shut-down the crooked ones. We have been sticking with the Elliot Ness-ers! Together, we, and the public, can crush the nuts of the corrupt!

We have listed and documented the time-stamped moment, and each official by name, that we reported the corruption to. Those who ran stone-wall delay's and cover-ups have been fired and/or placed under FBI-class investigation, financial monitoring and stock ownership surveillance. There have been millions of news reports about them. They can no longer hide!

Now it is up to the public to run the crooks out of public policy!..."

#WalkAway Movement to Abandon Extremist ANTIFA Liberalism Goes Viral

[6761](#)

The #Walkaway movement that began with a popular Facebook video featuring a gay hairdresser in New York City explaining why he was leaving the Democratic Party has quickly morphed into a major force on social media and beyond.

According to an [article](#) last Thursday in the *Epoch Times*, some five million people on Facebook and YouTube have seen the groundbreaking video showing a â... very handsome gay manâ... who describes his awakening to the inanities of liberalism and the Democratic Party.

â... Once upon a time, I was a liberal. Well, to be honest, less than a year ago, I was still a liberal,â... begins Brandon Straka, the unlikely face of the new â... silent minorityâ... of Americans.

â... I reject a system which allows an ambitious, misinformed and dogmatic mob to suppress free speech, create false narratives, and apathetically steamroll over the truth,â... he says. â... I reject hate.â...

â... These are the reasons why I became a liberal. And these are the same reasons why I am now walking away.â...

Straka published his original #WalkAway video on May 26, and since then his life â... has been overtaken by a tidal wave,â... the *Epoch Times* reports.

The movement has been especially successful because its spokespersons have not been the sort typically associated with conservatism. Young and old, black and white, men and women, gay and straightâ... the campaign seems to elude stereotypes and pigeonholing.

The popular young conservative commentator C.J. Pearson, for instance, has given the movement a significant push by highlighting the Democratic Partyâ... s racist past. â... The Democratic Party is the party of slavery. The party of Jim Crow. The party of segregation. The party of the KKK,â... Pearson tweeted Saturday.

â... Democrats walked away from black folks long ago. Now, itâ... s our time to #WalkAway,â... he added.

.

[C.J Pearson](#)

[@thecjpearson](#)

The Democratic Party is the party of slavery. The party of Jim Crow. The party of segregation. The party of the KKK.

Democrats walked away from black folks long ago. Now, itâ... s our time to [#WalkAway](#).

[1:28 PM - Jun 30, 2018](#)

- ♦ [24.5K](#)
- ♦ [11.8K people are talking about this](#)

[Twitter Ads info and privacy](#)

It is enough to search for the hashtag #WalkAway on Twitter or Facebook to see how the campaign has taken on like wildfire, spawning an entire cottage industry of personal testimonials and â... conversionâ... stories of how people woke up to the false promises of liberalism.

And yet, according to Straka, this is â... so much more than a hashtag on Twitter.â...

â... This is a testimonial campaign, a grassroots movement that is going to change the political landscape of this country.â...

Some Democrats say they are still expecting a â... blue waveâ... come November. If social media is any indication, there seems to have been a sea change.

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a **'Program'** because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: *If you cheat rather than compete you will be destroyed.*

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard..but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

- A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.
- B. Suffer the firings or forced terminations of multiple senior staff.
- C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.
- D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.
- E. Have every investor who has placed over \$50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell

corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

What Makes Lineage OS the Best for Android Phones

If you are using an Android device for quite a while, youâve probably heard of CyanogenMod. It was the biggest, most widely used Android custom ROM. Recently, the developers of CyanogenMod discontinued the project. But, they didnât stop there. They created a new custom ROM, called Lineage OS.

Lineage OS is a successor of the CyanogenMod, and it will keep most what we loved about the CyanogenMod. It is an enhanced version of the Google software with a stock look available for a variety of devices. In this article, i am going to discuss about the hottest features of the LinageOS.

Latest, Stock Look and Feel

Lineage OS offers you a pure, stock Android experience for your device. It is true that this Rom is rich with features and tweaks, but when it comes to the look and feel, it is almost identical to the Google stock interface. Unlike the most manufacturerâs ROMs, on Lineage OS you wonât find any bloatware.

If Lineage OS supports your device, It will provide you with the latest Android experience. It doesnât matter if you own a brand new HTC or 3 years old Motorola. You will always have the most recent version of Android. The another good thing here is that Lineage OS offers you an OTA updates. This is the same system of updates that the OEM manufacturers provide. You can update your device with just one tap on your screen. But before using it, keep in mind that this feature is in the early stage.

Tweaks and Features

So far you maybe didnât find anything that makes Lineage OS to stands out. However, from this section, you will feel the difference that Lineage OS can bring to your Android experience.

PRO TIP: If the issue is with your computer or a laptop/notebook you should try using Reimage Plus which can scan the repositories and replace corrupt and missing files. This works in most cases, where the issue is originated due to a system corruption. You can download Reimage by [Clicking Here](#)

Lineage OS Team is constantly experimenting and implementing unique ideas in the Android software. That improves the default Android experience and make Lineage OS always to stand on the cutting edge of Android innovation. Many of the features and tweaks that these developers created, have made their way into an official version of Android. Here is the list of the most useful tweaks and features that you can find in the Lineage OS.

- Customizable Quick Settings Menu
- Camera app improvements
- Customizable Navbar
- Built-in DSP Manager
- SMS quick reply
- Privacy Guard
- Screen record
- Call blacklists
- PIE Controls

Despite these visual enhancements, under the hood Lineage OS runs SELinux that improve the overall

security of the operating system.

Customization

If we talk about the customization, Lineage OS has its own theme engine. It allows you to choose themes, icon packs, fonts, styles, sounds and boot animations. You can even purchase premium themes for your Lineage OS device. However, customizing your device does not end with the theme engine. This custom ROM provides you tons of visual modifications for every part of the ecosystem.

Speed

One of the major impressions that you will notice, if you try Lineage OS just for few seconds, will be the speed. This ROM does not use any OEM skins on the top of the stock Android. That saves the resources of your device and make it runs blazing fast. Lineage OS is a lightweight ROM that takes up less storage compared to the stock OEM ROMs and does not contain any bloatware. Even if you own the latest generation smartphone, I guarantee that you will feel speed improvements during Lineage OS usage.

Battery Life

We all want to have better battery life for our devices. Because of that, manufacturers pack large batteries in the latest smartphones. However, your battery life does not only depend on the size of the actual battery. These software that you are using also has a huge impact on how long your battery will last.

Unlike the most OEM bloated ROMs, Lineage OS will prevent all the background-running apps and services from draining your battery. That means that your battery juice will be consumed only when itâs required.

Additionally, Lineage OS offers you many Battery Modes. These are predefined settings for the battery and resources consumption of your device. For example, if you choose the Power Saver mode, your device can stay on standby for days.

If you havenât tried Lineage OS on your device, here is a link to the official site: [Lineage OS](#)

What We Do To Write Up The Dossier On Each Person That Has Attacked Us And Each Corrupt Politician Involved Here:

1.
 1. Dig through someoneâs trash
 2. Locate a beneficiary for a probate proceeding
 3. Research current and / or historical property holdings
 4. Identify mortgage information
 5. Identify secured lenders
 6. Identify related party property transactions
 7. Determine current market value of real property
 8. Locate bankruptcy filings
 9. Retrieve and analyze bankruptcy records
 10. Uncover improper relationships

11. Locate federal civil lawsuits
12. Locate federal criminal records
13. Retrieve and analyze federal civil and criminal records
14. Retrieve mug shots from arrest records
15. Provide independent analysis
16. Locate state and local criminal arrest records
17. Retrieve and analyze review criminal records
18. Provide peace of mind
19. Locate home phone numbers
20. Locate cell phone numbers
21. Identify owner of home or cell phone number
22. Determine owners of corporation
23. Retrieve and analyze corporate records
24. Locate current or former executives
25. Interview current or former executives
26. Find and retrieve judgment and lien filings
27. Research familial history
28. Connect the dots
29. Locate witnesses for a civil or criminal lawsuit
30. Interview witnesses for a civil or criminal lawsuit
31. Find assets
32. Find current or historical boat registrations
33. Find current or historical aircraft registrations
34. Search for hidden assets
35. Conduct business intelligence
36. Discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you the big picture
43. Identify a will for an estate
44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistleblowers
54. Vet expert witnesses
55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)

63. Find current vehicle registrations
64. Find historical vehicle registrations
65. Make you look brilliant
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Give you a competitive advantage
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!

What this evidence proves:

- That a mobster-like cartel of men operate a racketeering operation out of Silicon Valley that manipulates elections, news and taxpayer funding policies.
- That this cartel is comprised of sick, megalomaniac, sexually addicted and abusive men who protect each other with billions of dollars of cover-ups involving the bribery of Senators with insider trading stock and covert campaign financing.
- That this cartel receives hundreds of billions of dollars of profits from their crimes and this causes them to stoop to murders, extortion, black-lists, funding blockades and other crimes, in order to gather their ill-gotten

gains.

- That the investors of Google, Facebook, Twitter, Amazon, Ebay, Netflix and a related set of Silicon Valley monopolies conspire in these efforts to manipulate the stock market, lie to advertisers and bias all digital news and information, globally, to push their selfish ideologies.

- That Senators Pelosi, Feinstein, Boxer, Harris, Reid have an active criminal participation in, and benefit from, these efforts and that they, in fact, along with Steven Chu had illicit dealings with Russian and Chinese financiers and they are paid with insider trading stock, revolving door jobs, and other covert payola.

- That Google, Facebook and Twitter have rigged and manipulated U.S. elections since Barack Obama was elected.

- That the U.S. Department of Energy and the U.S. Department of Justice were used as an illicit slush-fund by the Obama Administration to pay campaign financiers and to sabotage their competitors.

- That government officials hired and/or financed and/or directed deadly economic and character assassination hit jobs against those who reported these crimes using attack services from IN-Q-Tel, Gawker Media, Jalopnik, Gizmodo Media, K2 Intelligence, WikiStrat , Podesta Group, Fusion GPS, Google, YouTube, Alphabet, Facebook, Twitter, Think Progress , Media Matters, Black Cube, Mossad, Correct The Record, Stratfor , ShareBlue, Wikileaks, Cambridge Analytica; the owners of whom have been proven to have accepted compensation for such hatchet job services.

- The â... The PayPal Mafiaâ... is an actual Cosa Nostra like operation that exploits sex cults, prostitutes, gay rent boys and market rigging as illicitly as the old Chicago â... Mobâ... .

- That Tesla Motors is a criminal Dark Money front that â... cooks the booksâ... , lies about safety issues and runs sabotage campaigns through Muskâ... s massive use of Russian bots, trolls, stock shills and his covert manipulations with Googleâ... s Larry Page and Eric Schmidt.

When CEOs Play Politics, Shareholders Can Take Them to Court. Buy Their Stock and Hold Them Accountable!

After Target established an “inclusive” restroom policy, its share price plummeted by 40%.

A meeting of the White House Council on Manufacturing on Feb. 23. Photo: Evan Vucci/Associated Press

By

Jon L. Pritchett and Ed Tiryakian

Memo to activist CEOs: Dust off your notes, open your textbooks, and reread the basics of corporate finance taught at every credible university. The fiduciary responsibility of a CEO is to safeguard the company’s assets and acknowledge this overriding principle: It’s not our money but that of the shareholders.

In today’s heated political climate, some executives have rejected the fundamentals in favor of short-term publicity for themselves and their corporations. When several CEOs quickly resigned over the past few days from the now-disbanded White House Council on Manufacturing, they cited personal views or political disagreement as their reason for leaving. Those may be truthful reasons, but are they in the best interests of the companies they represent? Wouldn’t shareholders be better off with their interests represented in this powerful group of government officials who control regulatory policy?

Some might call Merck CEO Kenneth Frazier’s decision to resign from the council brave, but his company would have gained a significant competitive advantage from retaining its seat on the council. Shareholders may have legitimate questions about the risk of Mr. Frazier’s bravery. And if high-profile CEOs have the authority to take such risks, should they bear responsibility for any long-term damage to shareholder value? We say yes.

[Target](#) Corp. shareholders have watched helplessly since last year as another case of political posturing played out in North Carolina, where we work and live. Target’s activist CEO, Brian Cornell, responded to the state’s contentious House Bill 2, also known as the bathroom law, by announcing a new “inclusive” bathroom policy in April 2016. What were the results? Plummeting sales due to a widespread boycott,

an erosion of market share and, most important, a 40% drop in Target's stock price between April 2016 and July 2017. That devastation equated to a \$20 billion [loss of shareholder value](#) while the market rose 15% in that same period.

For the owners of the company... the thousands of small shareholders and the millions of Americans whose pension plans own Target stock... this performance did not affect their annual incomes, but it affected their life savings and retirement. They got sucker-punched. They should punch back.

When shareholders suffer damages at the hands of corporate management, they can pursue one of two legal remedies: class-action suits, in which multiple plaintiffs belonging to a defined "... class..." join a suit seeking compensation, or shareholder derivative lawsuits, in which company managers are sued on behalf of all shareholders. Take your pick, Target shareholders. Willful and controversial CEO activism shouldn't be viewed any differently from malfeasance or bad policies. They all reek of leadership malpractice.

In the landmark 1919 [case](#) *Dodge v. Ford*, the Michigan Supreme Court laid out the ruling that has guided corporate America ever since. [Ford Motor](#) Co. must make decisions in the interests of its shareholders, the court ruled, rather than in a charitable manner. The case is often cited as affirming the principle of "... shareholder primacy..." The ruling affirmed a wide latitude in running a company, but also noted "... a corporation should have as its objective the conduct of business activities with a view to enhancing corporate profit and shareholder gain..."

Did Mr. Cornell really see a rational link between shareholder gain and Target's inclusive bathroom policy? When Howard Schultz of [Starbucks](#) decides to take away Christmas cups or hire refugees as a challenge to President Trump, and the stock fares miserably compared with its competition, do the coffee chain's 24,000 small shareholders have the right to sue? Again, we say yes.

Justin Danhof, general counsel for the National Center for Public Policy Research, travels the country to attend shareholder meetings of public corporations. According to Mr. Danhof, "... activism is driven by the CEOs' belief that progressive ideas are popular among media and that good public relations follows those who espouse those views..." This might explain why 127 companies signed on to oppose Mr. Trump's immigration executive order or why 68 companies opposed

North Carolinaâ s HB2â even before enough information was available to understand either.

Our message to small shareholders of companies like Starbucks, Merck and Target: You can sue when a CEO decides to institute a corporate social-responsibility program that has no benefit to the business. If you want to ensure shareholder primacy is protected, keep your legal options open.

Mr. Pritchett is senior vice president of the John Locke Foundation. Mr. Tiryakian is professor of corporate finance and business economics at Duke University.

APPLE IS A SJW POLITICAL FRONT

By Jamie White

Democrat campaign financier Apple CEO Tim Cook pledged to donate \$2 million to leftist groups in a memo condemning â... racism and bigotryâ... following the violence in Charlottesville, Virginia last weekend. Tim Cook got \$17 Billion Dollars from Obama in government contracts and perks!

The tech company will donate \$1 million to the Southern Poverty Law Center (SPLC), and another \$1 million to the Anti-Defamation League (ADL); both being groups that have targeted conservative figures, publications and groups for years.

â... What occurred in Charlottesville has no place in our country,â... Cook [wrote](#) in the memo. â... Hate is a cancer, and left unchecked it destroys everything in its path. It scars and last generations.â...

Despite clear evidence of violence initiated by the left, such as the bats, pepper spray and black masks, Cook insisted that their violence was justified.

â... I disagree with the president and others who believe that there is a moral equivalence between white supremacists and Nazis, and those who oppose them by standing up for human rights. Equating the two runs counter to our ideals as Americans,â... he wrote.

Both the SPLC and ADL seemingly consider â... hateâ... to be any point of view that disagrees with their leftist ideology, evidenced by past actions of both groups against conservatives and Republicans in the last few years.

Last December, the SPLC [published](#) a â... Terror of the Rightâ... list, which bizarrely included the Black Lives Matter-inspired murders of police officers in Dallas and Baton Rouge as well as the Orlando Pulse Nightclub attack that left 49 dead.

And preceding the election in November, the ADL [added](#) Pepe the Frog â... a popular internet meme â... to their Hate Symbol Database, which includes the swastika, SS lightning bolts, and burning cross, after the Hillary Clinton campaign and the corporate media claimed it was a symbol of white supremacy following the widespread proliferation of pro-Trump Pepe memes during the presidential race.

â... That cartoon frog is more sinister than you might realize,â... [declared](#) HillaryClinton.com. â... In recent months, Pepeâ... s been almost entirely co-opted by the white supremacists who call themselves the â... alt-right.â... â...

Cookâ... s self-professed intolerance for bigotry rings hollow considering his [numerous business deals](#) with Saudi Arabia, a country that viciously punishes homosexuality with floggings and executions.

The tech titan also [opened](#) several Apple stores in the United Arab Emirates, an Islamic Gulf state which also delivers harsh punishments to gays, including jail time, fines, and deportation.

=====

MATCH.COM AND OKCUPID EXPOSED AS DNC LEFTIST HONEY-TRAP SITES!

In a series of tweets, OkCupid (owned by Match.com) said it had kicked Cantwell off the platform after being alerted of his profile.

We were alerted that white supremacist Chris Cantwell was on OkCupid. Within 10 minutes we banned him for life.

â... OkCupid (@okcupid) [August 17, 2017](#)

"We were alerted that white supremacist Chris Cantwell was on OkCupid," OkCupid wrote in a tweet. "Within 10 minutes we banned him for life."

It then followed that tweet up with another one, writing: "There is no room for hate in a place where you're looking for love."

There is no room for hate in a place where you're looking for love.

â... OkCupid (@okcupid) [August 17, 2017](#)

If any OkCupid members come across people involved in hate groups, please report it immediately <https://t.co/K6PT08Rtlr>

â... OkCupid (@okcupid) [August 17, 2017](#)

Cantwell has risen to infamy over the past week after a VICE Media documentary profiled him and his group at last weekend's Charlottesville protests that ended in violent tragedy.

Cantwell, 36, has been banned from several other tech platforms, including Facebook for violating their terms of service, using it for hate speech.

On Wednesday, Cantwell posted a video to Youtube where he is seen crying after finding out there is a warrant out for his arrest.

â... I called the Charlottesville Police Department and I said, â... I have been told that thereâ... s a warrant out for my arrest.â... They said that they wouldnâ... t confirm it but that I could find this out if I wanted to go a local magistrate or something," Cantwell said on the video.

Cantwell further adds: â... Iâ... m terrified. I think youâ... re going to kill me.â...

Separately, Bumble, the self-proclaimed "female-first social network," said it was teaming up with the Anti-Defamation League "to proactively remove and ban all fo

When the Silicon Valley Frat Cartel Tried To Bury Outsiders, They Discovered That They Were Seeds

By Andrew Cosgrove

When you bury a seed, it blooms, and blooms and blooms and millions like it fill the fields...

As American streets are flooded with protests so large that they have changed the course of history, eyes are now turned towards the exclusionary, misogynist, money-laundering, bribery-based, hooker-trafficking frat boys that run Silicon Valley.

In the latter half of the 19th century, before the advent of income tax, there existed a class of millionaires in this country who used many unscrupulous means to gain immense wealth, separating themselves from the working class of the country by previously unheard-of multiples.

The Vanderbilts, the Astors, the Carnegies, the Mellons, the Rockefellers and numerous other â... industrialistsâ... (today, we would call them globalists) were able to amass great fortunes and live like royalty, with much of their power enabled through the workings of the politicians they influenced via graft.

In their day and age, they were known as â... robber barons,â... after the wealthy lords of aristocratic Germany, where landowners charged commoners an illegal tax for passing over their land.

Historian Hal Bridges wrote that the robber barons were â... business leaders in the United States from about 1865 to 1900â... a set of avaricious rascals who habitually cheated and robbed investors and consumers, corrupted government, fought ruthlessly among themselves, and in general carried on predatory activities comparable to those of the robber barons of medieval Europe.â...

Many students of history argue that Americaâ... s robber barons were only tamed by the introduction of antitrust laws such as the Sherman Act and the Clayton Act of 1890 and 1914, respectively, as well as the introduction of income tax in 1913 and the stock market crash of 1929. Until that time, the power of these business titans was left mostly unchecked.

Many politicians â... especially in large cities like New York â... were bought off by their riches and voted for (or even created) laws that would favor and broaden these menâ... s empires. Regulations, agreements, waivers and amendments were passed that allowed many of these wealth-hoarders to assemble legal monopolies that would almost certainly be outlawed today.

In fact, if one took the wealth of some of these men (like the Rockefellers) and adjusted it for inflation into todayâ... s dollars, their riches would surpass those of even Bill Gates or Jeff Bezos.

But itâ... s these latter figures who now belong to todayâ... s equivalent class of men that can be considered the â... robber baronsâ... of our own era â... the billionaires of high-tech Silicon Valley.

When the Internet boom first occurred in the 1990s, Silicon Valley was quick to tell Congress that Internet sales should not be subject to taxes and that the Internet should not be regulated, lest this burgeoning marketplace be trampled to death before it could fully blossom.

But that was then. In the interim, fortunes have been made, and a very small number of players (Amazon, Google, eBay, Facebook, Craigslist, Netflix, Airbnb, Uber) have dominated specific product niches and made certain savvy players such as the aforementioned Bezos and Gates â... along with Mark Zuckerberg, Eduardo Saverin, Larry Page, Sergey Brin, Eric Schmidt, Pierre Omidyar, Craig Newmark, Brian Chesky, Steve

Ballmer and Larry Ellison, among others â... insanely rich.

In fact, these peopleâ... s extreme wealth, along with the relatively unregulated and untaxed industry that gave them that wealth, has convinced many of them that they have the innate right to tinker with markets and monopolies without undue fear of being legislated against or taxed as other industry leaders have been.

In many cases â... Bezos, Zuckerberg and Gates being some of the most notorious examples â... theyâ... ve been falling all over themselves to enter still further niches â... automated cars, robotics and drones, for example â... in order to dominate those markets also by using their tremendous fortunes to either acquire the leading players in these industries or to drive them out of business through ruthless competition.

Along the way, the enormous power their market monopolies have given them in terms of the data theyâ... ve been able to compile and the information theyâ... ve been able to acquire on ordinary American citizens has enriched them even further â... some would say dangerously so.

In many ways, these men (there are virtually zero women among their number) are the proper inheritors of the â... robber baronâ... title today; theyâ... ve become so wealthy, most often through unique, once-in-a-lifetime opportunities of timing and markets, that the rest of us canâ... t ever hope to come anywhere near their gargantuan fortunes.

Their companies have a permanent presence in Washington, D.C. and rank among the very top retainers of lobbying firms. Left unencumbered, these â... masters of the universeâ... could have a very real potential of ruling over the lives of nearly everyone on the planet in some way for the rest of our lifetimes.

Even now, rumors have been floated that tech billionaires Mark Zuckerberg and Mark Cuban might want to run for president in 2020 or 2024. Nearly all of these men are large contributors to the Democratic Party and have met with Democratic politicians, including Barack Obama, Hillary Clinton, Bill Clinton, Nancy Pelosi and Kamala Harris both one-on-one and in groups.

High among their concerns are that immigrants keep flowing across the countryâ... s borders in order to keep their biggest costs â... intelligent labor â... low. Quick to outsource to foreign countries and even quicker to leave profits offshore to evade taxes, these billionaires are extremely adept at using the law and corrupt politicians to their advantage.

For most of them, the concerns of the common man (the users of their properties) rank far beneath whatever it is that will further expand and perpetuate their empires. The gap between their ilk and that of the working class has multiplied in the last two decades, at the expense of Americaâ... s middle class.

Like the robber barons of old, these men are addicted to money, and they can never have enough of it to satisfy their own egos. To them, the laws of the United States are just a tool to access more wealth, and whatever political levers and switches they need to throw in order to get their way are simply a means toward an ultimate end.

After more than 20 years in many cases, itâ... s now long past time to put the regulatory brakes on these peopleâ... s ventures and business power grabs before we turn into a society ruled by technology and a few men behind thin, oversized flat-panel displays. Companies that have too much power and too much wealth concentrated in too few hands may need to be broken up just as the railroad concerns, oil cartels and steel companies of the original robber baron days were by Washington.

Trent Lapinski says: "Silicon Valley is run like a cartel, and they are essentially modern day robber barons...."

"...Iâ... ve actually been working on a similar article myself called â... Is Silicon Valley A Cartel?â... but I havenâ... t had a chance to finish writing it yet. Perhaps I need to revisit it and publish.

Most of the major tech companies are now using technology to segregate the masses, and social engineer the entire planet much like Hitler and the Nazis attempted previous to WW2, except now the technology exists to do this on a massive scale.

To understand Silicon Valley today, you have to look back to the past and understand how we got here. When Silicon Valley was first founded as a tech hub in the late 1940-50â... s it was under the intention of developing computer technology for military industrial purposes. The intention was always to further Americaâ... s technological superiority over the rest of the world.

Many people do not realize that Google and Facebook were both initially funded with both VC and defense contractor money, and many of the tech companies like Amazon have contracts with the CIA and Deep State. Modern day Silicon Valley is the surveillance arm of the Deep State, and has always been an arm of the military industrial complex.

Meanwhile, social media has purposely been engineered to put people in echo chambers, and control the masses. Even Medium is guilty of this, I have nearly 13k followers, yet every time I publish I barely reach 10% of my following. Twitter and Facebook are even worse.

To make matters worse, it gets even more complicated politically. What a lot of people do not know or realize is that after the 2008 market crash Obama was financed by Silicon Valley to get him into office. Once he was in office he struck a deal with the Federal Reserve to bail the economy out and printed a bunch of money which was handed to the Silicon Valley VC firms and tech companies to rebuild the economy.

What those VC firms did with the money was inflate the current tech bubble with printed money by driving up housing costs, pricing out locals and Millennialsâ... s outside the tech industry, and pretty much destroying the local economy in the Bay Area. While the Bay Area was arguably screwed anyway with the market crash, and the tech industry does provide many jobs, they ultimately didnâ... t give those jobs to the locals and brought in indoctrinated college grads to displace much of the local population and pay them just enough to survive but not enough to buy property.

They then invested in companies that either launder money to increase their power, collect everyones data, spy on their users, or distract and divide them with propaganda. They also invested heavily in machine learning and A.I. so that they can automate most jobs in the future, and we are now at a point where A.I. is advanced enough to censor the Internet (which Google/Youtube, and Facebook are already doing). This is enabling these companies to become complete and total monopolies, and push political ideologies on the masses with no basis in logic, reason, or reality.

Meanwhile, the billionaires, investors, and CEOs of these companies are so far disconnected from the struggles of every day Americans they actually believe what theyâ... re doing is for the greater benefit of humanity. Many of them fancy themselves as superior to the rest of the country, and world, and all their political nonsense is mostly hypocritical virtue signaling rooted in identity politics. The very same identity politics the Nazis used so successfully to divide and conquer the masses during WW2 but with a hypocritical modern day left leaning political spin.

With all that said, what Silicon Valley billionaires are doing is wrong, and hypocritical. However, please

donâ... t blame the people, even the tech bros, because even theyâ... re all just brainwashed and trying to survive just like everyone else and most donâ... t even realize theyâ... re slaves to a system that does not have their long-term interests in mind.

Source: Born and raised in the Bay Area..."

[Bill Snyder](#) of globally published InfoWorld Magazine says: " Silicon Valley: Land of the 21st-century robber barons...

Apple, Amazon.com, eBay, Facebook, Google, and the other technorati believe someone else should pay taxes, hire Americans, or support the society they sell to

When it comes to paying taxes, Apple doesn't "think different." Like every other global corporation, it does its best to pay as little as is legally permissible. The difference, though, is that Apple does it better than most and tries to convince the people who are stuck with the bills that this is a perfectly normal state of affairs.

In just three years, Apple's tax avoidance ("evasion" is such a tacky word) efforts shifted at least \$74 billion from the reach of the Internal Revenue Service, according to an [explosive report by a Senate subcommittee](#).

I'm no Apple hater; it makes great products I'm happy to use, and it employs tens of thousands of people directly and in its supply chain. But the more I think about its role in public life, the angrier I get. Apple, in its own way, is un-American. Sadly, it has plenty of company in Silicon Valley.

The new aristocracy lives in Silicon Valley

The princelings of technocracy aren't bad people, but their wealth insulates them from the shared experiences that create community. They are a class apart -- maybe even a nation apart. They're the 21st-century successors to the rail and banking tycoons that ruled in the late 19th and early 20th century: the robber barons.

Consider this anecdote told by George Packer in his thoughtful piece in [the May 27 issue of the New Yorker](#): When state budget cuts threatened the quality of their local school, parents in Woodside, Calif. -- one of the wealthiest enclaves in Silicon Valley -- stepped up their fund-raising efforts. The Woodside School Foundation now brings in about \$2 million a year for a school with fewer than 500 children. In a fund-raising auction, one parent bid \$20,000 for a tour of the Japanese gardens of Oracle CEO Larry Ellison, while others paid twice that much for seats at a Mad Men Supper Club dinner for 16 guests.

I'm sure that many of those people would be appalled and upset by the terrible conditions of the underfunded schools in nearby East Palo Alto, and they might even make donations to help out. But I doubt many of them connect the very obvious dots: When big companies and wealthy individuals fail to pay taxes, legally or not, the community suffers.

What makes this so galling in my mind is the hypocritical and egotistical belief in Silicon Valley itself that it is the most enlightened patch of real estate on the planet.

Silicon Valley won't pay fair share, then decries poor public results

As [Alec MacGillis of the New Republic points out](#), it's a bit rich for Apple to argue -- as Steve Jobs did for years, and Tim Cook does now -- that the company needs more visas and green cards for foreign engineers because there aren't enough qualified Americans to fill tech jobs ([patently false](#), by the way), while Apple does its damndest to keep its contribution toward federal education aid as paltry as possible.

Comments Packer:

This is an example so blatant I couldn't have dreamt it up, of the self-deception that exists alongside the hard work, idealism, and engineering brilliance of Silicon Valley. It's the kind of blind spot to which young, self-confident, super-successful industries are especially prone.

One of the subsidiaries set up by Apple in Ireland has paid no corporate income tax to any nation for the past five years, although it reported \$30 billion in net income from 2009 to 2012. Another subsidiary has paid a tax rate to Ireland of 0.1 percent or less in 2009, 2010, and 2011, far below the normal Irish corporate income tax rate of 12 percent, according to the Senate subcommittee's report.

Valley of the dolts

Silicon Valley's power brokers want you to think they're different. But they're just average robber barons.

[Emmett Rensin](#) says: In February 2012, after Facebook announced what was in time to become the largest IPO in the history of internet firms, *The Economist* put a parody of Mark Zuckerberg's profile page on its cover. Next to an insipid, beaming profile picture of the young CEO, there was a status update: "VENI VIDI VICI!!! Am I richer than Bill yet? lol." They were not the first magazine to draw the comparison. In October 2010, *Vanity Fair* beat them to it, declaring Zuckerberg the No. 1 most influential person in the United States and calling him "our new Caesar."

Zuckerberg, of course, had not conquered Gaul. He had not scattered the German armies nor subjugated Britain, nor crossed the Rubicon and become first consul. He had not visited death and terror upon a continent, nor brought an end to an old republic, setting off a chain of intrigues that would birth the mightiest empire in the history of the world. No. Mark Zuckerberg had made a shit ton of money.

By April of this year, Facebook stock was worth more than \$116 a share, up from its initial offering of \$38. The social network had made its early investors even richer than they had ever anticipated. That same month, *The Economist* put Zuckerberg on its cover for the second time but now without detectable irony. His face appeared on a marble statue of Augustus, seated in cape and laurel crown beside a tiny globe. "IMPERIAL AMBITIONS" roared the headline. Mark's outstretched arm gave the imperial thumbs-up. He liked it.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures. Zuckerberg is Caesar. Elon Musk, [a wizard](#). Peter Thiel, who believes that he lives in the moral universe of Lord of the Rings, is [a vampire](#). I do not know if these men believe that they have the supernatural powers the media claims. Maybe they do. I do know that they do not mind the perception, or at least have done nothing to combat it, even among those critics who believe that they're cartoon villains.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures.

This might not be so bad if the phenomenon were limited to daft profiles by fawning magazine writers. But this Hegelian fan fiction is nowhere more potent than from the mouths of the Disruptors themselves. Mark Zuckerberg [speaks](#) in the voice of God. Shane Smith, by his own account, is the [Stalin](#) of *Vice*. Silicon Valley investor Carl Icahn was called ["evil Captain Kirk"](#) by fellow billionaire Marc Andreessen, before he was himself dubbed [Dr. Evil](#) by Rod Dreher, who has evidently not absorbed a cultural reference since 1999. When Elon Musk worries that Larry Page is hurtling toward AI without a sufficient appreciation of the risks, he calls it ["summoning the demon"](#). Seamless CEO Jonathan Zabusky, a typical case, says his food delivery application for depressed millennials is "disrupting the paradigm" by showing people that "the era of the paper menu is over. AirBnB's mission statement laments the mechanization and

Industrial Revolution of the last century,â... which â... displacedâ... â... feelings of trust and belongingâ... ; their mission is to turn the world back into the â... villageâ... of simpler eras by encouraging longstanding residents of gentrifying areas to [rent out](#) their homes to monied travelers. Some firms are more modest: HubSpot, a marketing and sales platform, is merely on a mission to make the whole world â... more inbound,â... which is to say, more reliant on their blogging tips for small businesses.

Even President Obama speaks of Silicon Valley as if it were an industry for madcap geniuses alone, a land of such earth-changing potential that itâ... s somewhere he [might find himself](#) once heâ... s left the Oval Office. When he chides citizens of the Valley, he chides them like a Dr. Frankenstein warning his monster about hubris: â... Sometime we get, I think, in the scientific community, the tech community, the entrepreneurial community, the sense that we just have to blow up the system or create this parallel society,â... he [told](#) the Frontiers Conference last October. The president believes that sense is wrong, of course, but where did he get the idea that tech CEOs were capable of these feats in the first place?

Let us state the obvious: None of these men are Roman Emperors, and they havenâ... t got the wherewithal to â... blow upâ... anything but a stock market bubble. They are not Lex Luthors or Gandalfs or Stalins. Their products do not bring about revolutions. They are simply robber barons, JP Morgans and Andrew Mellons in mediocre T-shirts. I have no doubt that many are preternaturally intelligent, hardworking people, and it is a shame that they have dedicated these talents to the mundane accumulation of capital. But there is nothing remarkable about these men. The Pirates of Silicon Valley do not have imperial ambitions. They have financial ones.

The vast majority of Silicon Valley startups, the sort that project lofty missions and managed improbably lucrative IPOs despite never having graced the cover of *The Economist* or the frontal cortex of the president, work precisely like any other kind of mundane sales operation in search of a product: Underpaid cold-callers receive low wages and less job security in exchange for a foosball table and the burden of growing a company as quickly as possible so that it can reach a liquidation event. Owners and investors get rich. Managers stay comfortable. The employees get hosed. None of this is particularly original. At least the real robber barons built the railroads.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people. This manifests itself in mundane ways, in their open, [cartoonish class spite](#) (why, they ask, must Innovators in San Francisco be burdened by the existence of homeless riff-raff?); it is revealed in their most contemplative moments too. Peter Thiel has said that when the history of the 21st century is written, Ren  Girard will be remembered as one of its greatest intellectuals. Girard is best known for the contention that all human desire is mimetic, that not only aesthetic taste but even hunger and lust are modeled on the desires of others. Perhaps this is why Thiel does not believe that capitalism and democracy [are compatible](#). We know which side heâ... s chosen. So long as he and his fellows can continue to exploit that same mimetic tendency to persuade people that they are superhuman and essential to their flourishing, his side will continue to win.

The sins of the prestige firms are no less mundane. While each at least can claim a real and viable product, their evil is nothing so spectacular as the demonic. As *The New York Times*, *Guardian*, and others have reported, even the well-compensated white-collar workers of companies like [Amazon](#) and Facebook face notoriously brutal labor conditions. For the warehouse workers and contract laborers required to keep those companies running, matters are [even worse](#). â... When youâ... re in shipping and they double or triple their workforce over the winter holidays, youâ... re working at times in below zero temps INSIDE the warehouse,â... one Amazon warehouse worker [wrote](#) to *Gawker*â... s Hamilton Nolan in 2013. Efforts to unionize employees have been met with duplicity beyond ordinary managerial resistance. *Quartz* reported in February on sinister attempts to [thwart organization](#) at Uber. Not content to resist their own employeesâ... efforts to unionize, Uber has also worked to undermine other labor guilds, including [illegal operations](#) in cities that have led to the destruction of local taxi businesses.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people.

AirBnb, despite its Keatsian mission, has mainly succeeded in [ravaging the housing market](#) for low-income families. Seamless hasn't disrupted the paper menu world half so much as it has [disrupted tipping standards](#) and wage prospects for its delivery workers.

The racist hiring practices of Silicon Valley prestige firms are an open secret, with only [5 percent](#) of technical roles held by black or Latino workers. (We are not where we want to be, their diversity reports intone with all the sincerity of a Soviet bureaucrat adjusting potato projections down again). Their collusion with federal spy agencies, assisting in surveillance efforts and voluntarily turning over FISA-court-approved user data in exchange for cash, was a secret, until [it wasn't](#). Peter Thiel did not use magic to destroy Gawker; [he used money](#).

In 2010, the Department of Justice exposed what it called an [overarching conspiracy](#) to suppress wages among companies like Apple, Google, Intel, Adobe, Intuit, eBay, and Pixar. The Silicon Valley supermen were aware as far back as 2005 that what they were doing was illegal. [Google's Eric] Schmidt instructed his Senior VP for Business Operation Shona Brown to keep the pact secret and only share information verbally, since I don't want to create a paper trail over which we can be sued later? [reported](#) Mark Ames. At times, he said of the Disruptor's behavior, it reads like something lifted straight out of the robber baron era that produced those [anti-trust] laws. Today's inequality crisis is America's worst on record since statistics were first recorded a hundred years ago the only comparison would be to the era of railroad tycoons in the late 19th century. Although Amazon CEO Jeff Bezos takes only \$81,000 in salary every year barely more than the average Facebook intern! he has managed to accrue a net worth in excess of \$65 billion. Perhaps he really is a wizard.

The cultivation of power requires the projection of power in excess of its reality. When Julius Caesar the real one made up his mind to annihilate the German tribes who had once again invaded Gaul, he ordered his engineers to build a bridge over the Rhine as wide as a two-lane highway, big enough for 10 soldiers to march across side by side. He wanted the Germani to experience fear when they realized that the army of the Roman people was both capable of crossing the Rhine and brave enough to venture it. It worked. When the bridge was finished, the Roman army marched across it as if on parade in the streets of Rome. They went slow with their horns blasting and their flags aloft, led by cavalry draped in ceremonial colors. They found no army on the other side. Terrified of the Roman engineering feat, the Germani had fled in terror, and for 18 days they cowered in the forest while Caesar pillaged every defenseless village he could find. When he was done he marched back to Gaul and ordered the bridge torn down.

If your enemies can convince you that they are an unprecedented species of madman, you will convince yourself that you need unprecedented weapons to fight back or that you may be better off just hiding in the forest. But you are not.

The rigged contracts and wage suppression, the racism and surveillance collusion (soon to be playing [voluntary footsie](#) with Donald Trump's NSA, with [further chicanery](#) to follow), all these sins of Silicon Valley have come about and been overcome before in the short history of American capitalism. They require only the same weapons as before. Organization and agitation. Strikes and labor laws. The ordinary practice of radical politics. Some of these efforts have [begun already](#), with militant organizing and unionization drives beginning to organize Silicon Valley laborers against their exploiters. But these movements require national and popular support, support that cannot begin until the pretense and terror of world-conquering wizards is abandoned and the truth is laid bare: These are only rich assholes, the same as they ever were. All that superman bullshit is just the cheap propaganda of the powerful, propaganda so thoroughly saturated in the American mind that its own inventors might believe it.

This fall, Silicon Valley Shakespeare (â... Innovate â...ç Illuminate â...ç Inspireâ...) staged *Julius Caesar* for the first time in the companyâ... s 16-year history. The [press release](#) promised that audiences would have a chance to â... see this classic political thriller set in a modern world, showing the power and problem of the mob mentality, and how far people will go to rule a nation.â...

This summary is instructive. To the entertainers of the Valley, *Julius Caesar* is a play about â... mob mentality,â... the dangers of unruly herds who upset the proper order of the world. This is an assessment that might surprise anyone who has read Shakespeareâ... s history and noticed that with the exception of a soothsayer and a single servant, every character in it is an aristocrat. But more than that, it is remarkable because as any high school student can tell you, *Julius Caesar* is not a play about the dangers of the mob; it is a play about the dangers of ambition and power. It is about hubris. You do not see the crowds that Brutus and Antony address because the crowds do not matter. They only exist to cheer the rivals as they sort out the pretense of the coming war. The fault that was not in their stars but in themselves has been corrected. They are underlings no more.

Julius Caesar is about a man believed to be a God, a man who cultivated divinity so well that he believed it himself. It is about a man who believed it until the mid-March afternoon when he discovered to his great surprise that even Caesar can be overthrown with old and ordinary weapons.

Per The United States Congress, The FBI and the FTC: The High-Tech Antitrust Black-Listing Litigation is a [United States Department of Justice](#) (DOJ) [antitrust](#) action and a civil [class action](#) against several [Silicon Valley](#) companies for secret collusion agreements which targeted high-tech employees. This case was one of the most famous federal lawsuits in Silicon Valley. [Scam fronts for Silicon Valley oligarchs are being exposed daily.](#)

The [tech Cartel is evil](#) because: they steal any technology they desire; they run a [prostitution ring](#) and [sexually extort young women and interns](#) in Silicon Valley; they are 'rape culture' [take-what-they-want misogynists](#), ageists and [racists](#) as their history of abuses has proven; their Palo Alto Cartel operates [AngelGate-type](#) collusion and [stock market insider trading schemes that harm independent business and the public](#); their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files [reveal horrific abuses](#) and [sex trafficking](#); They have an [army of lobbyists](#) that pay cash, stock market and [revolving door bribes](#) to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as '[trophy wives](#)' and '[beards](#)'; they have [lobbyists rig the U.S. Patent Office](#) in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, [kicking and harming women hundreds of times](#); They have bought up all of the Tier-One tech law firms and order them to [black-list](#), and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of **douche-bags** and **yuppie frat boy criminals** in human history. [Theranos](#) is not the exception, it is the standard. [Tesla](#), [Google](#), [Theranos](#), [Wework](#), [Facebook](#) are lies backed by famous political insiders to protect [their insider trading](#) and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are [frat boy scumbags](#), from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your [Senator holds stock market shares](#) in companies that exist to [profit on the backs of consumers](#), via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in

writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many **TRILLIONS** of dollars pass through the stock markets annually and then look at the reported, **AND UNREPORTED**, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "*In Memory Of*" section, below, were disclosing. [These are massive crimes!](#)

The crooks at Google, Facebook, Tesla, Linkedin, Netflix, etc., broke felony laws and the [basic principles of Democracy](#).

[Google faces \\$5 billion lawsuit in U.S. for tracking 'private' internet use. Google WILL pay for their crimes or be killed off as a business because of their corruption!](#)

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

What kinds of people were some of these high tech oligarchs? Read their divorce Court Records about their Jeffrey **Epstein**, [NXIVM](#) sex trafficking; Andy Rubin and Goguen [sex slaves](#); tax evasions; money laundering; intern abuses; misogyny; racism; political insider-trading stock market bribes to U.S. Senators; a '[Silicon Valley Tech Mafia](#)' and other horrors.

What would you do if you found out that Eric Schmidt, Larry Page, Elon Musk, Sergey Brin, John Doerr and other dynastic elitist insider Stanford frat boys were running a mob-like Cartel? Over 60,000 engineers in Silicon Valley took the problem to Federal Court!

Ask Christopher Wray, John F. Bennett, Craig D. Fair and the other senior officials at the FBI, DOJ, SEC, FTC and other major federal investigation agencies: ***Organized crime in Silicon Valley is getting a harder look these days!***

The defendants, in the first case, included [Adobe](#), [Apple Inc.](#), [Google](#), [Intel](#), [Intuit](#), [Pixar](#), [Lucasfilm](#) and [eBay](#), all high-technology companies with a principal place of business in the San Franciscoâ... Silicon Valley area of California where they collude together to harm competitors. ***It is a well documented fact that Facebook, Google, Netflix, Linkedin, etc. use sophisticated psychological testing on each applicant in order to filter out all but the most radical devotees of the founders ideologies. These companies then maintain an echo-chamber resonance, throughout the company, to reinforce their ideological message, much like Scientology does. In these companies one must praise Elon Musk and Mark Zuckerberg and hate those who the founders target. The founders target their competitors, in violation of anti-trust laws.***

The first civil class action was filed by five plaintiffs, *one of whom has died* in a curious incident; it accused the tech companies of collusion between 2005 and 2009. In [Abolish Silicon Valley: How to liberate technology from capitalism we see another of thousands of insiders expose the fact that Silicon Valley is a pile of filth](#).

Additional cases are planned for filing. Formal complaints have been filed with The SEC, The DOJ, The GAO, The FBI, The FTC and The U.S. Congress. Active investigations into '[Angelgate](#)' and [related collusion and anti-trust matters](#) are known to be under-way by federal, news outlet and private investigators as of 2020. U.S. Senators, and other politicians, [who covertly own stock in these Silicon Valley companies](#), have been delaying enforcement against these corrupt companies. Consumer rights groups have pledged to take down each and every politician who owns these corrupt stocks and protects these corrupt companies!

Our alliance of investigators and agency staff have FBI-level investigated: Steven Chu, Larry Page, David Drummond, Lachlan Seward, Andy Rubin, Jeffrey Epstein, Elon Musk, Nicholas Guido Denton, Harvey Weinstein, Eric Schmidt and the rest of the RICO-violating "Club" and had them fired or removed from their positions. They will remain under public surveillance for the rest of their lives and their case files will be added to monthly via submissions to federal agencies and news entities.

What would an insane tech oligarch (Like Schmidt, Musk, Reid, Brin, Westly, Page, Khosla, etc.) do for trillions of dollars of criminal gain?

When you run the following query on the stock market volume for a single day, ie: *"Select sum(Close*volume*0.001), count(*) from myTable where date = '9/27/2017'."*..you get the following result: 7300 stocks were traded, Total Money flow: \$271,072,334,824. This is how much was traded on that day.

The total world derivatives market has been estimated at about \$791 trillion face or nominal value, 11 times the size of the entire world economy.

The World Bank publishes global data on stocks traded by \$ value [here](#). ie:

- 2016 - \$77.5 trillion for the year.

Most exchanges publish this stat. [Here](#) is the data for NASDAQ

- Feb 6, 2018 - \$192 billion for the day.

And the Indian stock market volume data (in Indian Rupees) is [here](#).

- BSE + NSE cash market, Feb 2018 - About Rs 40,000 crore daily. Thatâ... s about \$6 billion per day.

Average estimates put daily stock movement between 5 to ten trillion dollars per day. You can buy lot's of Weinstein/Epstein-like private islands, private jets, sex parties, U.S. Senators and crony government contracts with that kind of money. Once an oligarch starts buying sex with underage girls, they don't stop. [In fact, there is nothing that a corrupt tech oligarch and their owned Senator won't do to keep their little pig trough filled up.](#)

The average murder/robbery in the United States is undertaken for an average amount under \$100.00

Thus, an Eric Schmidt, Elon Musk, Steve Westly, David Drummond, Vinod Khosla, Reid Hoffman, Steve Jurvetson, Andy Rubin, Larry Page or similar oligarch, who is sociologically addicted to money and power, is [most certainly capable of ordering and operating election manipulations](#), Presidential bribes, murders and engaging in other crimes to protect those greed-based assets. They have the full resources to do so, have federal records proving that they hire lobbyists and operatives who do these things for them and have a documented history of engaging in extremist actions.

The Silicon Valley Cartel Hires Gawker, Gizmodo, Jalopnik, Black Cube, Fusion GPS, etc. to run "hit-jobs" on those who report their crimes!

The Hit Job

How much do you have to pay Google, Alphabet, YouTube and Black Cube to dedicate a portion of their servers to push a character assassination set of links, against a competitor, to all five billion people on Earth with internet access? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much do you have to pay to get them to lock those attack links on one of the first 4 lines of EVERY search result, in the same position in the search results, for over a decade (which proves that their search results are not "organic", they are manually manipulated by Google and YouTube)? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to make a Disney-like animated movie about a whistle-blower? How much does the production and software and person-hour billings cost? How much does it cost to distribute that movie world-wide and lock it in the top line of all search results?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to hire a warehouse full of Russian, Nigerian and Chinese click-farm operators who use Palantir and Google software to instantly be alerted of any mention of a person's name on the internet and to then go slam that person in the comment sections with endless troll remarks? Elon Musk uses these same people to hype his narcissistic need for attention. Obama, Clinton, Bloomberg and other politicians hire these same people to attack their political adversaries. How much does it cost to have anonymous trolls in foreign countries kill a person's brand globally?

We know. We have their financial records, invoices and receipts and a huge number of lawsuits, court records, federal investigation and investigative journalism reports have exposed those records and details. The FBI, NSA, SEC, FTC and Congressional investigators can also confirm these numbers!

So it turns out that it costs: **\$35,422,152.00 to have a person and their business killed!**

That is how much they spent on their attack on the Plaintiff! The people at the top of the heap who organized the attacks were David Plouffe, Jay Carney, David Axelrod, Denis McDonough, Steve Rattner, Robert Gibbs, Rahm Emanuel and their associates and they did it from **The West Wing and The Oval Office in The White House.**

Many of the political attacks were edited by [Nick Denton](#) and his seedy tabloid empire Gawker/Gizmodo. Investigations have revealed that the White House and California Senators hired IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters); Black Cube; Correct The Record; Orbis Business Intelligence, Undercover Global Ltd; Stratfor; Jigsaw; ShareBlue/Acronym; Cambridge Analytica; Sid Blumenthal; David Brock; Plouffe Consulting; PR Firm Sunshine Sachs; Covington and Burling; BuzzFeed; Perkins Coie; Advance Democracy Inc.; The Democracy Integrity Project; Popily, Inc; Bean, LLC.; Edward Austin; Istok Associates; [Silicon Valley Community Foundation](#); Yonder and Wilson Sonsini to run hit-jobs, character assassinations, dirty tricks and economic reprisal attacks on any applicants who reported the crimes. Each of those companies are now under federal and civil investigation. These companies sell "kill services" that use CIA and KGB-style tactics to harm witnesses and whistle-blowers.

Media Matters for America founder David Brock is a hired media assassin who reaped illegal profits through the transfer of millions from a nonprofit he founded to a for-profit entity under his control, according to an IRS complaint filed by a watchdog group. The [complaint](#) details how Brock's nonprofit group American Bridge Foundation (AB Foundation) transferred \$2.7 million in tax-exempt assets to True Blue Media, a for-profit company owned by Brock that is the parent company of ShareBlue, a for-profit media company now known as [The American Independent](#). The transfers violated IRS rules that prohibit nonprofit organizations from using their tax-exempt resources to pay personal or private expenses of any key figures connected to the nonprofit, the complaint stated. AB Foundation's transfers to True Blue Media were disclosed in the nonprofit's Form 990s filed to the IRS in [2017](#) and [2018](#). *"Brock is a well-known hit man who took money to target our group in reprisal for whistle-blowing...."* Said Team 7 staff.

The money was conduited and assisted for pass-through by political financiers Eric Schmidt, Larry Page, Sergey Brin, Elon Musk, John Doerr, Vinod Khosla, Steve Westly, Steve Spinner and their [Silicon Valley oligarch Cartel](#) black-listing operation.

It was a felony. It violated RICO, Anti-Trust and Constitutional laws.

So they spent over thirty five million dollars attacking the Plaintiff and shutting down a competitor that was targeted to make over six billion dollars in profits. The attackers then made the six billion dollars in profits for themselves, at the expense of the Plaintiff.

So how much do you think they owe the Plaintiff per previous court awards for such crimes against a member of the public?

"Silicon Valley's No-poaching Case: The Growing Debate over Employee Mobility." Knowledge@Wharton. The Wharton School, University of Pennsylvania, 30 April, 2014.

Steve Jobs was 'central figure' in Silicon Valley's 'no ...

 <https://money.cnn.com/2014/08/11/technology/silicon-valley-poaching-case/index.html>

A **lawsuit** by **Silicon Valley** workers claims Steve Jobs was a ringleader in a conspiracy not to poach employees. If **Silicon Valley's** biggest companies want an embarrassing employee **lawsuit** to go ...

The perpetrators operate a **massive and abusive national sex cult**. [The perverts](#) in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and [Ed Buck](#) sex scandals are well known. These men's [sex cult actions](#) have been widely covered in the news individually in the [Joe Lonsdale rape case](#), [The Kleiner Perkins Ellen Pao sex abuse lawsuit](#), The [Eric Schmidt sex penthouse stories](#), [The Jeffrey Epstein case](#), The [Google Forrest Hayes hooker murder case](#), The [Andy Rubin sex slave case](#), The [Sergy Brin 3-way sex romp](#) scandal, The [British Hydrant investigation](#), The [Elon Musk Steve Juvetson billionaire sex parties](#) scandals, The [NXIVM sexual slave](#) cases, The [Michael Goguen anal sex slave](#) trial, [The Tom Perkins Hooker Parties](#) and thousands of other cases and [federal divorce court filings](#). This [group of people](#) have proven themselves, over and over, to be [sociopath control freaks](#) not fit for participation in public commerce, public policy or media control. [The Four Seasons Hotel](#) and [Rosewood Hotels](#) in [Silicon Valley](#) are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by [Eastern Bloc Mafia operators](#). At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. [Google's Eric Schmidt is under massive investigation](#). You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "*not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...*". Multiple attorney general's controlled by their cartel, ie: [Eric Schneiderman](#) and [Eliot Spitzer](#), are involved in these sex rings. *These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses!*

The AngelGate Conspiracy (<https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html>); The Job Collusion Case (https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation) and hundreds of other cases, prove that the perpetrators regularly [meet](#), [conspire](#), [collude](#) and racketeer, in [full view](#) of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution.

Public officials and Silicon Valley oligarchs exchanged felony bribes and manipulated government actions in order to benefit themselves and harm us. these are the facts including the lists of bribes, attacks and covert financing routes!

Famous members of congress lie, cheat, steal and manipulate public records in order to protect their trillions of dollars of Google, Facebook, Netflix, Tesla and Amazon insider stock market payola.

Now the public is working together, around the globe, to end this corruption forever by exposing every single one of the corrupt and all of their dirty secrets!

[Department of Energy staff \(ie: Chu\), White House staff \(ie: Emanuel\), CIA staff \(ie: Woolsey\) owned the rare earth \(ie: lithium, indium\) mining scam stock \(ie: Goldman Sachs transfers\) market securities from](#)

[foreign countries \(ie: Afghanistan, Congo\) which only benefited themselves, Elon Musk and his Silicon Valley cartel.](#)

Demand the immediate divestiture of all stock market holdings of all politicians and their family members because that is how most bribes are now paid!

Silicon Valley Robber Barons Are Using Government As a Weapon Against Us In the Left's usually skewed view of America's past, they reserve a special place in historical Hell for the late-19th-Century-early-20th-Century entrepreneurial giants who helped revolutionize our economy and nation.

[Caitlin Johnstone](#)

Why Everyone Should Do What WikiLeaks Did

By far the best thing about the WikiLeaks-Don Jr. controversy has been watching the talking heads on CNN and MSNBC who spent a year and a half priming everyone for President Hillary now saying, â... Ha! WikiLeaks claims theyâ... re a legitimate news organization, and yet here they are, advancing an *agenda*!â...

WikiLeaks has an agenda. If it didnâ... t, it wouldnâ... t exist. I have an agenda, too. If I didnâ... t, I wouldnâ... t write. And Iâ... ll tell you right now that if I had the ear of the US presidentâ... s son, I would most certainly use it to advance my agenda.

I canâ... t speak for WikiLeaks, but anyone whoâ... s been paying them any attention at all is aware that it is not, as mainstream pundits have been falsely contending, a completely neutral and agendaless â... radical transparencyâ... outlet. Any casual glance at Julian Assangeâ... s Twitter page makes it abundantly clear that he is a fiercely opinionated man with a very clear idea of where power structures exist in the world, and he spends much of his time openly and unapologetically trying to sabotage the interests of those power structures. I can say exactly the same things about myself.

It is clear that Julian Assange is trying to attack the unelected power establishment which has loosely centralized itself in the United States, and heâ... s throwing every weapon at it that he has available to him. When attacking a structure that is dependent on government opacity this will necessarily include publishing leaks, *and* it will also include directing public attention to the mechanisms of that power structure.

This is exactly what we saw in all of the published Don Jr. interactions. The WikiLeaks Twitter account (likely via Assange though possibly through someone else at times) contacted a presidential candidateâ... s son with:

- Information about a pro-Iraq war PAC which it said was now running an anti-Trump site, with the siteâ... s password and request for comment.
- A request for help circulating a story about Hillary Clintonâ... s alleged suggestion to â... just droneâ... Julian Assange.
- A link and a suggestion that Trump get his followers digging through the Podesta emails for incriminating information.
- A request for Trumpâ... s tax return and any other negative information that was at risk for being leaked by establishment media.
- A suggestion that Trump not concede the election he was expected to lose so as to draw attention to the massive problems in Americaâ... s electoral system, specifically â... media corruption, primary corruption, PAC corruption etc.â...
- A suggestion that Trump move to make Assange ambassador to Australia, knowing they â... wonâ... t do itâ... , but in order to â... send the right signalsâ... to the US allies whoâ... ve been collaborating with US power to keep him a de facto political prisoner.
- A couple more links it wanted more attention on.
- A suggestion that Don Jr. publish the information on his Trump Tower meeting with them.

Thatâ... s all of them, in order. If WikiLeaks were a purely neutral journalism outlet with no agenda other than publishing leaks, these transactions would look weird and suspicious. If, like me, you see WikiLeaks as an organization dedicated to gumming up the gears of Americaâ... s unelected power establishment, then youâ... ll have a hard time understanding why anyoneâ... s making a big deal about any of this.

A converted pro-Iraq war PAC is about the most disgusting thing I can think of. The story about Clintonâ... s alleged suggestion to â... just drone the guyâ... was horrific. The Podesta emails [turned up loads of extremely incriminating information](#). Publishing leaks before establishment outlets could twist and lie about it, [as The](#)

[Atlantic did](#) with its publications of the Don Jr. private messages, sabotages the establishment propaganda machine. America ranks [dead last out of all western democracies](#) in election integrity, media corruption, primary corruption and PAC corruption are all very real things, and highlighting this attacks the interests of the power structure which profits from that lack of election integrity. Wanting to screw with Clinton loyalists is par, and wanting to get out of the Ecuadorian embassy is normal.

WikiLeaks did exactly what I would do, and so should you. We should all be shamelessly attacking the unelected power structure which keeps our planet locked in endless war while promoting ecocidal corporate interests which threaten the very ecosystemic context in which our species evolved. And we should be willing to use any tools at our disposal to do that.

Iâ... ve been quite shameless about the fact that Iâ... m happy to have my ideas advanced by people all across the political spectrum, from far left to far right. I will never have the ear of the US Presidentâ... s eldest son, but if I did I wouldnâ... t hesitate to try and use that advantage if I thought I could get him to put our stuff out there. This wouldnâ... t mean that I support the US president, it would mean that I saw an opening to throw an anti-establishment idea over the censorship fence into mainstream consciousness, and I exploited the partisan self-interest of a mainstream figure to do that.

We should all be willing to do this. We should all get very clear that Americaâ... s unelected power establishment is the enemy, and we should shamelessly attack it with any weapons weâ... ve got. [I took a lot of heat](#) for expressing my willingness to have my ideas shared by high profile individuals on the far right, and I see the same outrage converging upon Assange. Assange isnâ... t going to stop attacking the establishment death machine with every tool at his disposal because of this outrage, though, and neither am I. The more people we have attacking the elites free from any burden of partisan or ideological nonsense, the better.

The plutocrat-centered second government which is killing our species is not partisan, so our attacks canâ... t be limited by partisan loyalties. Don Jr. was a tool for WikiLeaks to advance an attack upon the interests of the death machine, but if you think that makes Assange a Republican loyalist youâ... re simply not looking at things clearly. He used a weapon at his disposal to land a knockout blow and cause the establishment to lose control of the narrative. Thatâ... s what I will do at every opportunity, and you should too.

UPDATE 11/16/17: The sentence â... Information about a pro-Iraq war PAC which it said was now running an anti-Trump site, with the siteâ... s password and request for commentâ... previously read â... Information about a pro-Iraq war PAC which it said was now running an anti-Trump site, and advice on how to sabotage the interests of that PACâ... . It has been edited to more accurately reflect the content of the WikiLeaks-Don Jr correspondence.

Abstract

We investigated whether cellular phone use was associated with increased risk of tumors using a meta-analysis of case-control studies. PubMed and EMBASE were searched from inception to July 2018. The primary outcome was the risk of tumors by cellular phone use, which was measured by pooling each odds ratio (OR) and its 95% confidence interval (CI). In a meta-analysis of 46 case-control studies, compared with never or rarely having used a cellular phone, regular use was not associated with tumor risk in the random-effects meta-analysis. However, in the subgroup meta-analysis by research group, there was a statistically significant positive association (harmful effect) in the Hardell et al. studies (OR, 1.15â€¦ 95% CI, 1.00 to 1.33â€¦ n = 10), a statistically significant negative association (beneficial effect) in the INTERPHONE-related studies (case-control studies from 13 countries coordinated by the International Agency for Research on Cancer (IARC); (OR, 0.81â€¦ 95% CI, 0.75 to 0.89â€¦ n = 9), and no statistically significant association in other research groupsâ€¦ studies. Further, cellular phone use with cumulative call time more than 1000 h statistically significantly increased the risk of tumors. This comprehensive meta-analysis of case-control studies found evidence that linked cellular phone use to increased tumor risk.

1. Introduction

According to estimates from the International Telecommunication Union, the number of worldwide mobile cellular subscriptions increased from 68.0 per 100 inhabitants in 2009 to 108.0 per 100 inhabitants in 2019 [1]. With the increasing use of cellular phones, concerns have arisen over the carcinogenic effects of electromagnetic fields (EMFs) emitted from cellular phones [2]. Since 1999, observational epidemiologic studies, specifically case-control studies have reported inconsistent findings on the association between cellular phone use and tumor risk, and several meta-analyses [3,4,5,6] of case-control studies on this topic have been published before 2011.

Among these studies, Myung et al.â€™s meta-analysis [5] of 23 case-control studies concluded that mobile phone use was associated with an increased tumor risk in high quality studies and studies conducted by a specific research group, and that long-term mobile phone use of 10 or more years increased the risk of tumors regardless of methodological quality or research group. Similarly, Khurana et al. also reported that cellular phone use of 10 or more years doubled the risk of brain tumors in 11 epidemiologic studies [6].

Based on evaluation of the available literature including experimental animal studies and epidemiological studies in humans, in 2011, the World Health Organization (WHO)/International Agency for Research on Cancer (IARC) classified radiofrequency electromagnetic fields (RF-EMFs) associated with cellular phone use as possibly carcinogenic to humans [7]. Recently, an advisory group of 29 scientists recommended that IARC prioritize a new review of the carcinogenicity of RF-EMF by 2024 due to mechanistic evidence of the carcinogenicity of cell phone radiation published since 2011 [8].

Although many case-control studies and several meta-analyses have been published regarding the association between cellular phone use and tumor risk, the findings remain inconsistent.

The purpose of this study was to evaluate the associations between cellular phone use and tumor risk using a systematic review and meta-analysis of case-control studies according to various factors including differences in response rates between cases and controls, use of blinding at interview for ascertainment of exposure, methodological quality, funding sources, type of case-control study, malignancy of tumor, and dose-response relationship.

2. Materials and Methods

2.1. Literature Search

We searched PubMed and EMBASE in July 2018, using common keywords related to cellular phones and tumors as follows: “cellular phone or mobile phone” and “tumor or cancer”. We also located additional articles by reviewing the bibliographies of relevant articles.

2.2. Selection Criteria

We selected articles based upon the following criteria: case-control studies; investigated the associations between cellular phone or mobile phone use (not cordless phones) and the risk of benign or malignant tumors; reported outcome measures with adjusted odds ratios (OR) with 95% confidence intervals (CIs); and peer-reviewed articles written in English. If data were duplicated or shared in more than one article, we selected only the article with the larger sample size.

2.3. Selection of Relevant Studies

Two authors (Y.-J.C and Y.-R.L) independently reviewed the articles from the search and selected articles meeting the predetermined selection criteria. Disagreements between the two authors were resolved by discussion.

2.4. Assessment of Methodological Quality

We evaluated the methodological quality of the case-control studies based on the Newcastle-Ottawa Scale (NOS) [9] and the National Heart, Lung, and Blood Institute (NHLBI) quality assessment tool of case-control studies [10]. A star system of the NOS ranging from 0 to 9 is composed of three subscales: selection of study groups, comparability, and exposure. The NHLBI quality assessment tool consists of 12 questions answered with yes, no, or other (cannot determine, not applicable, or not reported). Two authors (Y.-J.C and Y.-R.L) independently assigned a score for each study, and disagreements were resolved by discussion. We considered a study awarded a number of stars or “yes” more than the mean of all the included studies as a high-quality study because standard criteria have not been established.

2.5. Main and Subgroup Analyses

We investigated the associations between cellular phone use (used vs. never or rarely used) and tumor risk by using adjusted data for the main analysis. When an individual study reported data on both analog and digital phones, the data on digital phones were selected. We also conducted subgroup meta-analyses by research group: Hardell et al. studies (Hardell studies), the INTERPHONE-related studies (INTERPHONE case-control studies in 13 countries coordinated by the International Agency for Research on Cancer [IARC]), and studies by other groups. Additionally, for each research group, we conducted subgroup meta-analyses by various factors as follows: difference in response rates between cases and controls (smaller difference vs. larger difference, by difference in response rates of 14.5%, which was an average difference in response rates between cases and controls in all studies), use of blinding at interview for ascertainment of exposure (used vs. not used or no description), methodological quality by the NOS (high vs. low, by average score), funding sources (cellular phone industry funding vs. not funded), type of case-control study (hospital-based vs. population-based), and malignancy of tumor (malignant vs. benign).

In order to evaluate an exposure-response relationship, we also performed subgroup meta-analyses by time since first use or latency (<5 vs. 5-9 vs. ≥10 years), cumulative or lifetime use (<5 vs. 5-9 vs. ≥10 years), cumulative call time (<300 vs. 300-1000 vs. ≥1000 h), and cumulative number of calls (<1000 vs. 1000-7000 vs. >7000). Latency refers to the length of time between the beginning of regular cellular phone use and the diagnosis of tumor occurrence. When multiple ORs with 95% CI were presented within each category of time or number of calls, a longer time or a higher number of calls was used for the analysis.

2.6. Statistical Analysis

To compute a pooled OR with its 95% CI, we used adjusted data from individual studies. A random-effects model meta-analysis on the basis of the DerSimonian and Laird method [11] was used in the current study because individual trials were carried out in the different populations. We also used a chi-square test to evaluate any differences in response rates between the case and control groups. We tested heterogeneity across the studies using Higgins I^2 , which represents the percentage of total variation within studies meta-analyzed [12]. I^2 was calculated as below:

$$I^2 = 100\% \times (Q - df) / Q,$$

(1) where Q is Cochran's heterogeneity statistics, and df represents the degrees of freedom. Negative values of I^2 are set to zero, and I^2 lies between 0% (no observed heterogeneity) and 100% (maximal heterogeneity). We estimated publication bias using Begg's funnel plot and Egger's test. When there is publication bias, Begg's funnel plot exhibits asymmetry, or the p -value < 0.05 by Egger's test. The Stata SE version 14.0 software package was used for statistical analysis (StataCorp, College Station, TX, USA).

3. Results

3.1. Study Selection

[Figure 1](#) shows a flow diagram for the selection process of relevant studies. We identified a total of 425 articles from three core databases with 219 articles from PubMed, 203 articles from EMBASE, and 3 articles from hand-search. After excluding 118 duplicate articles and 200 articles that did not satisfy the pre-determined selection criteria by reviewing those titles and abstracts, the full texts of the remaining 107 articles were assessed for the final selection. After reviewing the full texts, 61 articles were excluded for the following reasons: not relevant studies ($n = 24$), letters, comments, or correspondence ($n = 18$), shared an identical population ($n = 12$), insufficient data ($n = 5$), and cohort studies ($n = 2$). The remaining 46 case-control studies (13-58) were included in the final analysis.

Figure 1. Study selection.

3.2. General Characteristics of Studies and Participants

General characteristics of the case-control studies included in the meta-analysis are shown in [Table 1](#). The 46 case-control studies involved a total of 66,075 participants with 24,717 cases and 41,358 controls. For studies reporting gender, 53.9% of study participants were women. A total of 37 studies were hospital-based case-control studies, while nine studies were population-based case-control studies. The included studies were conducted in the following countries: Sweden (n = 24), Denmark (n = 9), United Kingdom (n = 8), Finland (n = 7), Norway (n = 6), Germany (n = 5), US (n = 4), Israel (n = 3), Japan (n = 2), Italy (n = 2), New Zealand (n = 2), France (n = 2), Brazil (n = 1), China (n = 1), South Korea (n = 1), and Thailand (n = 1). The most common type of tumor in the included studies was brain tumor (34 out of 46 studies, 74%), and the next most common ones were head and neck cancer such as parotid gland tumor (5/46, 12%), hematologic malignancies such as leukemia and non-Hodgkinâs lymphoma (4/46, 8.7%), melanoma (2/46, 4.3%), and testicular cancer (1/46, 2.2%).

Table 1. General characteristics of studies included in the meta-analysis (n = 46).

The studies were classified by research group, i.e., Hardell studies (n = 11), INTERPHONE studies (n = 19), and studies conducted by other groups (n = 16). As shown in [Table S1](#) and [Table S2](#), the NOS scores ranged between 4 and 8 (average score, 6.4), and the NHLBI quality assessment scores ranged between 6 and 10 (average score, 8.3). We considered studies with an NOS score of â7 stars or an NHLBI quality assessment score of â9 points as having high quality and the remaining studies as having low quality.

The Hardell studies were not funded by the cellular phone industry. Most had high scores of â7 stars in the NOS and high scores of â9 points in the NHLBI quality assessment; most reported high response rates (>70%) with smaller differences in response rates (<14.5%) between the case group and the control group; and all were population-based case-control studies ([Table 2](#), [Table S1](#), and [Table S2](#)). All of the INTERPHONE studies were partly funded by the cellular phone industry (precisely, supported by funding from the International Union against Cancer, which received funds from the Mobile ManufacturersâForum and Global System for Mobile Communications Association) except for the INTERPHONE-Japan studies. Most had low scores of <7 stars and low scores of <9 points, showed low response rates (<70%), and had larger differences in response rates (>14.5%) between the case group and the control group. All were population-based case-control studies ([Table 2](#), [Table S1](#), and [Table S2](#)).

Table 2. Use of cellular phones and risk of tumors in subgroup meta-analysis of case-control studies.

No study conducted by the other groups was funded by the cellular phone industry. Most of these studies had low response rates and mainly larger differences in response rates between the case group and the control group ([Table 2](#)).

3.3. Overall Use of Cellular Phone and Risk of Tumors

As shown in [Figure 2](#), as compared with never or none, the overall use of cellular phones was not associated with tumor risk in a random-effects meta-analysis of all 36 studies (OR, 0.99; 95% CI, 0.91 to 1.07; $I^2 = 47.4$). Of the 46 studies, several [[24,25,26,27,28,29,30,32,33,34,35,36](#)] were excluded from the main analysis but

included in the subgroup meta-analysis because study subjects overlapped with the INTERPHONE study published in 2010 [40] and 2011 [41] (which reported pooled results from all 13 countries).

Figure 2. Cellular phone use and risk of tumors in a random-effects subgroup meta-analysis of case-control studies by research groups (n = 36). OR... odds ratio; CI... confidence interval. *... 2010 and 2011 The INTERPHONE Study Group studies involved 13 countries.

In the subgroup meta-analysis by research group, cellular phone use was associated with marginally increased tumor risk in the Hardell studies (OR, 1.15 (95% CI, 1.00 to 1.33; n = 10; $I^2 = 40.1\%$), whereas it was associated with decreased tumor risk in the INTERPHONE studies (OR, 0.81; 95% CI, 0.75 to 0.88; n = 9; $I^2 = 1.3\%$). In the studies conducted by other groups, there was no statistically significant association between the cellular phone use and tumor risk (OR, 1.02; 95% CI, 0.92 to 1.13; n = 17; $I^2 = 8.1\%$).

Publication bias was not observed overall (Begg's funnel plot was symmetric; Egger's test, p for bias = 0.07). In addition, there was no publication bias in the subgroup meta-analysis by research group (Egger's test, p for bias = 0.36 in the Hardell studies, 0.57 in the INTERPHONE studies, and 0.68 in studies by other groups, respectively).

3.4. Use of Cellular Phones and Risk of Tumors in Subgroup Meta-analysis By Various Factors

Table 2 shows the findings of the subgroup meta-analyses by various factors. Cellular phone use was statistically significantly associated with increased tumor risk in studies that used blinding at interview (OR, 1.16; 95% CI, 1.01 to 1.34; n = 10; $I^2 = 39.4\%$). In addition, cellular phone use had a marginally statistically significant association with increased tumor risk in studies with high methodological quality (OR, 1.11; 95% CI, 1.00 to 1.22; n = 17; $I^2 = 20.1\%$, based on the NOS score; OR, 1.09; 95% CI, 0.99 to 1.20; n = 20; $I^2 = 29.3$, based on the NHLBI quality assessment tool). In contrast, cellular phone use had statistically significant associations with reduced tumor risk in studies that did not use blinding at interview, or were rated as having low methodological quality. Both the NOS score and NHLBI quality assessment tool showed similar findings in methodological quality scores: most Hardell studies were rated high quality, while most INTERPHONE studies were rated low quality.

Similarly, subgroup meta-analyses by funding source revealed a non-significant increased risk of tumors by cellular phone use in studies not funded by the cellular phone industry (OR, 1.07; 95% CI, 0.98 to 1.17; n = 28; $I^2 = 21.9\%$), whereas a statistically significantly decreased risk of tumors was observed in studies partly funded by the cellular phone industry (OR, 0.81; 95% CI, 0.74 to 0.89; n = 8; $I^2 = 0\%$), all of which were INTERPHONE studies.

Cellular phone use was not statistically significantly associated with tumor risk in the subgroup meta-analysis by type of case-control study. In the subgroup meta-analysis by type of tumor, a significantly decreased risk of benign tumors was observed (OR, 0.86; 95% CI, 0.77 to 0.95; n = 14; $I^2 = 21.9$), while no significant association was observed for malignant tumors. This decreased risk of benign tumors was only found in INTERPHONE studies, not in Hardell et al. studies and studies by other groups.

3.5. Exposure-Response Relationship Between Use of Cellular Phones and Risk of Tumors

Table 3 shows an exposure-response relationship between cellular phone use and tumor risk. In the subgroup meta-analysis by time since first use or latency, overall the risk of tumors by cellular phone use non-significantly increased from an OR of 0.97 to 1.29 as latency increased from less than 5 years to 10 or

more years. This finding was observed in each subgroup meta-analysis by research group. Especially, statistically significant increased tumor risk was observed for latency of 10 or more years in the Hardell studies (OR, 1.62; 1.03 to 2.57; $n = 5$; $I^2 = 39.9\%$). Similarly, the use of cellular phones non-significantly increased the risk of tumors as the cumulative or lifetime use in years and the cumulative number of calls increased in all studies and in each study group. Remarkably, in the subgroup meta-analysis of all studies by cumulative call time, cellular phone use greater than 1000 h statistically significantly increased the risk of tumors (OR, 1.60; 1.12 to 2.30; $n = 8$; $I^2 = 74.5\%$). Interestingly, the use of cellular phones overall and in the Hardell studies (OR, 3.65; 1.69 to 7.85; $n = 2$, especially in the Hardell studies) non significantly increased the risk of tumors with cumulative call time of 300â€¦ 1000 h and more than 1000 h, while it decreased the risk of tumors in most subgroup meta-analyses of the INTERPHONE studies.

Table 3. Exposureâ€¦ response relationship between use of cellular phones and risk of tumors.

.

3.6. Use of Cellular Phones and Risk of Tumors in Subgroup Meta-analysis By Type of Tumor

[Table S3](#) shows the findings from the subgroup meta-analyses by type of tumor. There was no statistically significant association between cellular phone use and tumor risk in most subgroup meta-analyses. Increased tumor risk was found for malignant brain tumors only in the Hardell studies (OR, 1.35; 95% CI, 1.06 to 1.73; $n = 5$; $I^2 = 53.9\%$).

4. Discussion

In this comprehensive systematic review and meta-analysis, we found statistically significant differences in the findings for the association between cellular phone use and tumor risk which varied by research group. Namely, there was a statistically significant increased association by 15% in the Hardell studies, a statistically significant decreased association by 19% in the INTERPHONE studies (multi-national case-control studies coordinated by the IARC), and no significant association in the other research groupsâ€¦ studies. Importantly, in the subgroup meta-analysis of all studies reporting cumulative call times greater than 1000 h, cellular phone use with cumulative call time greater than 1000 h (about 17 min per day over a 10 year period) increased the risk of tumors by 60%.

Perhaps due to methodological deficiencies, cellular phone use appeared to reduce tumor risk in the INTERPHONE studies. These studies were partly funded by the mobile industry, had poor methodological quality, showed larger differences in response rates between the case and control groups, and did not use blinding at interview.

A substantial research literature documents potential mechanisms for the effects of cellular phone use on tumor risk. Although heating is the only biological effect of non-ionizing radiation (NIR) (including microwave radiation from cellular phones) recognized by most health agencies, numerous in vitro studies and animal studies demonstrated other possible mechanisms including increasing oxidative DNA damage and altering protein structure and expression [59]. In addition to a human endothelial cell line study, a human volunteer study reported a local exposure of human skin to RF-EMF caused changes in protein expression [60].

Based on the findings from pre-clinical studies, previous observational epidemiological studies, mainly case-control studies have reported inconsistent findings on the associations between cellular phone use and tumor risk. In 2009, we first reported evidence linking mobile phone use to increased tumor risk in a meta-analysis of low-biased case-control studies, especially among mobile phone users of 10 years or longer [5]. Two years later, the WHO/IARC classified RF-EMF due to cellular phone use as Group 2B, or â€¦ possibly carcinogenic to humans.â€¦ [7] Since then, subsequent case-control studies have reported

inconsistent findings regarding the association between cellular phone use (use vs. never or rarely use) and tumor risk, similar to our previous findings. Since we published our meta-analysis in 2009, six meta-analyses [61,62,63,64,65,66] have reported the associations between cellular phone use and risk of brain tumors or head and neck tumors, mainly glioma and salivary gland tumors. Among them, four meta-analyses concluded that there was a statistically significant increased risk of glioma among heavy or long-term (over 10 years) mobile phone users in meta-analyses of 10 to 12 case-control studies [61,64,65,66]. In addition, one [62] of the remaining meta-analyses demonstrated a statistically significantly higher risk of all types of intracranial tumors in long-term mobile phone users (over 10 years) in a meta-analysis of 24 case-control studies, and the other [63] reported a statistically significantly increased risk of parotid gland tumors in a meta-analysis of three case-control studies.

Although the above mentioned four recent meta-analyses of case-control studies reported a significant increased risk of glioma in heavy or long-term (over 10 years) mobile phone users with an odds ratio of 1.35 in Wang et al. [61], 1.44 in Yang et al. [64], 1.33 in Wang et al. [65], and 1.33 in Prasad et al. [66], our study found a non-significantly increased risk with an OR of 1.66. This difference is due to the following reasons: Wang et al.'s meta-analysis in 2016 [61] reported that a significant association was found between mobile phone use of more than 5 years and glioma risk (OR = 1.35; 95% CI, 1.09 to 1.62; $p < 0.05$). However, when we reviewed the main results and Figure 1 in their article, the OR with 95% CI for mobile phone use of more than 5 years was 1.64 with 1.12 to 2.15. More importantly, when we performed a random-effects meta-analysis using the same data used in their analysis, there was no significant association between long-term use (>5 years) of mobile phones (the correct OR with 95% CI was 1.12 with 0.80 to 1.56). Yang et al.'s meta-analysis in 2017 [64] used seven studies comprising a Hardell study, a study by another group, and five INTERPHONE studies for long-term mobile phone use of 10 years or longer. The five INTERPHONE studies [26,27,29,30,34] were four publications [26,27,29,30] from individual countries (Denmark, Sweden, UK, and Germany) and one publication [34] of a collaborative analysis from five countries (Denmark, Finland, Norway, Sweden, and UK) within the same study years (2000â2004). Thus, Yang et al. used identical populations in three countries (Denmark, Sweden, and UK) in duplicates and used a smaller dataset from five countries instead of collaborative data [40] on glioma for the INTERPHONE studies from 13 countries published in 2010. When we performed a meta-analysis using the 2010â2014 collaborative data [40] instead of the five studies used in Yang et al.'s analysis, which were partly duplicated and smaller in sample size and number of countries than the 2010 collaborative analysis of the INTERPHONE group, there was no significant association between long-term mobile use and the risk of glioma (OR, 1.49; 95% CI, 0.80 to 2.78; $n = 3$; $I^2 = 91.5\%$), which is closer to our finding. Wang et al.'s meta-analysis in 2018 [65] included two cohort studies as well as case-control studies. More importantly, they included four ORs of >10â15 years, >15â20 years, >20â25 years, and >25 years from Hardell's 2015 study [67]. If each OR is calculated from independent data (not overlapping), they can be combined. However, each reference used for the calculation of each OR was overlapping. When we conducted a meta-analysis using only an OR of 1.40 for 10â15 years of wireless phone use in Hardell's 2015 study based on the Wang et al. analysis, there was no significant association between long-term use and the risk of glioma (OR, 1.08; 95% CI, 0.90 to 1.30; $n = 6$; $I^2 = 49.2\%$).

Compared to previous meta-analyses, the current meta-analysis has several strengths. First, the current meta-analysis is the most comprehensive study conducted to date, as it included 46 case-control studies with various types of tumors other than brain tumors. Second, we performed critical subgroup meta-analyses by factors that could affect individual results, such as the difference in response rates between cases and controls and funding sources, as well as use of blinding at interview for ascertainment of exposure and methodological quality. From these crucial subgroup meta-analyses, we confirmed that the opposite findings between the Hardell studies (increased tumor risk among cellular phone users) and the INTERPHONE studies (decreased tumor risk among cellular phone users) were closely associated with these factors. The INTERPHONE studies had differential response rates in case and control groups, did not use blinding at interview, had low methodological quality scores, and were partly funded by the cellular phone industry. In contrast, the Hardell studies had comparable response rates in case and control groups, used blinding at interview, had high

methodological quality, and had no industry funding. Although there was no statistical significance, similar findings were observed in the subgroup meta-analysis by the above mentioned factors in the studies by other groups. In the current main analysis of 36 case-control studies, nine out of 10 Hardell studies showed smaller differences in response rates between case and control groups and had high response rates of about 80â90% in both groups. In contrast, all of the INTERPHONE studies showed larger differences in response rates between both groups; most had lower response rates in the control group than in the case group, and most had low response rates of about 40â70%. Over the past decades, participation rates (response rates in this study) have decreased in case-control studies, particularly in controls, which could lead to non-representative selection of controls, reducing the validity of the effect estimates, and casting doubt on the veracity of study findings [68]. Thus, the decreased risks of tumors observed in the INTERPHONE studies might be due to selection bias from participation of cellular phone users in the control group [69]. We also found that studies partly funded by the cellular phone industry showed a statistically significantly decreased risk of tumors by cellular phone use, all of which were INTERPHONE studies. It remains unclear whether cellular phone industry funding affected the study planning and conduct or data analysis and interpretation because the authors reported that the provision of funds to the study investigators via the UICC was governed by agreements that guaranteed INTERPHONE's complete scientific independence. Nonetheless, many of these investigators rely upon industry for future research funding so they may have hidden conflicts of interest despite such agreements [70].

Our meta-analysis is based upon case-control studies which potentially suffer from recall bias and selection bias. Although prospective cohort studies typically enable stronger inferences to be drawn regarding causality, these studies are difficult to conduct when the outcome is a rare chronic disease that requires long-term exposure and subjects are exposed to multiple potential toxins. So far, two prospective cohort studies have been published [71,72]. Both employed inadequate measures of cell phone use, and one misclassified many cell phone users as non-users [71]. A large, international prospective cohort study is ongoing but will not yield results on tumor risk for 20 or more years [73].

There are several limitations in the current study. Although cordless phones often have a much higher power output than cellular phones, and the users of analogue phones have used longer than those of digital phones, we excluded the impact of those phones in this analysis. This might lead to a bias that underestimates the effect of mobile phones on the risk of cancer. In addition, we did not consider ipsilateral and contralateral use of the cellular phones, which is beyond the scope of our study. Lastly, although we reported exposure-response relationships between the cellular phone use and the cancer risk, it would be ideal to investigate those associations based on the actual time spent on cellular phones provided by the mobile telecommunication companies. However, most studies did not use those data. Further studies using the exact data on the time spent on cellular phones are warranted to confirm our findings.

5. Conclusions

In sum, the updated comprehensive meta-analysis of case-control studies found significant evidence linking cellular phone use to increased tumor risk, especially among cell phone users with cumulative cell phone use of 1000 or more hours in their lifetime (which corresponds to about 17 min per day over 10 years), and especially among studies that employed high quality methods. Further quality prospective studies providing higher level of evidence than case-control studies are warranted to confirm our findings.

YOU CAN EXPOSE AND TERMINATE CORRUPT POLITICIANS AND THEIR CRIMINAL FINANCIERS

By Ellen Parger

Not only "can you".. you must!

You must become an FBI-Class, CIA-capable forensic investigator with your computer and mass social networking.

You have access to all of the same tools and intellect that every FBI and CIA agent has access to. CIA and FBI agents primarily sit at computers and track down connections. You can do that too using free public software and groups of people that also hate political corruption. It is actually quite easy.

You know when something is wrong or when something "smells fishy". Now you can turn your intuition and your public spirit into productive home-based forensic research that makes your nation great again.

You will create public case files and gather news articles and related information in order to expose each of the corrupt people that ruin this great country.

You will expose the dirty and illicit deeds of elected officials and their corrupt political financiers. All of these actions are 100% legal and will be appreciated by non-corrupt law enforcement agencies and the public:

- Expose their Hookers in widely released news and social media releases
- Expose their Rent Boys in widely released news and social media releases
- Expose all of the bad dates and sex extortion they engaged in, in widely released news and social media releases
- Expose their hidden family trust fund payola accounts, in widely released news and social media releases
- Expose their shell corporations they use to hide from the IRS
- Expose their mistresses
- Expose their addictions
- Expose their under-the-table payments
- Expose their illegal workers
- Expose their expensive cars, jewelry and homes that can't afford on a legal salary
- Expose their Cayman Island, Belize and Swiss hidden bank accounts
- Expose their personal email accounts they illegally used to hide government fraud
- Expose their illicit hidden email servers
- Expose their secret black-lists and start-up valuation rigging like in the Angel Gate Scandal
- Expose their Uber and Lyft GPS docs proving that they lied about where they went
- Expose their campaign financing records
- Expose their social media statements proving they are, or fund, ANTIFA or political disruption programs
- Expose their money laundering
- Expose their connections to Pede groups and activities
- Expose their hotel records and videos of illicit hotel meetings
- Expose their PayPal, Bitcoin and credit card payments for illicit services and products

- Distribute creative Memes exposing their crimes
- File reports with their employers disclosing their crimes and tell the media you told their employers
- File many copies of criminal reports on them with all law enforcement entities
- Expose the members of their family that hide money for them or use their names to launder money
- Photo and video document all of their meetings and actions
- Aggregate all of the video investigations about them on many different web video sites
- Write and distribute books, articles and white-papers about their crimes
- Promote new laws that makes what that criminal uses as a loop-hole, illegal
- Re-release all of the above every six months in order to keep the crimes in people's minds
- Use "The Stresand Effect" to it's maximum technical potential and research how the "Effect" works
- Grow your network of voters and taxpayers who are helping you and make your supporter network bigger every day
- Expose the manner in which Google, Facebook and Twitter fight against exposing their criminal friends
- Use Google, Facebook and Twitter's own illicit tools against them and expose them with "Hypocrisy Exposure" when they censor
- Confront them in every single public presentation they attend and expose them in public
- Create coordinated groups of volunteers to expose the troll farms and click farms of the corrupt manipulators
- Expose and publicly document all of their illicit real estate holdings, mansions and property scams
- Release of the details of their crooked secret partnership contracts
- Place a First Amendment informational exhibit outside of their offices, homes and each door they go through each day
- Write them weekly and tell them that they are exposed. Send them certified letters proving that you told them that you know
- Document and publicly expose all of their trips and expenditures
- Document the identities of the service trucks that come to their homes and offices
- Photo document all of their workers, interns and secretaries
- Contact their staff and ask them to report the illicit deeds of their employer. Provide media and police contact information.
- Help their staff and the public organize class-action abuse law suits against the perpetrators

- File RICO Racketeering lawsuits against the corrupt
- File FEC charges, ie: Google provided over \$1B of search engine rigging for Obama's elections but never reported that to the FEC
- Expose their stock market manipulations and valuation rigging in Wall Street Pump-And-Dump scams
- Expose the insider trading where Senators own the stock that they just provided government perks for
- Expose politicians that make tens of millions more dollars, from mystery funds, than their salary should allow
- Use pictures of expensive toys that politicians acquired from taxpayer funds via crony payola
- When they are hacked (which you legally can't do) expose the hacked material globally as far as possible (which you legally can do)
- Read and analyze all publicly posted hacked emails and point out the crimes it exposes
- Meme any criminal remarks that the target makes
- And thousands of additional fully legal public investigation methods...

Every single crooked politician, and their corrupt billionaire financiers, have been using these tactics against the public for 20 years. Silicon Valley, David Brock's groups, John Podesta's groups, Stratfor, Black Cube, Gawker/Gizmodo and a host of illicit organizations have used all of the above tactics to attack domestic taxpaying citizens in the USA.

Now YOU get to give them a taste of their own medicine!

Youâ... ll Soon Be Able to Manufacture Anything You Want and The Silicon Valley Cartel Will Be Powerless to Stop It

From DIY guns to designer drugs, classic-car parts, and human livers, 3D printing promises a dynamic and uncontrollable world.

STEPHEN LAM/REUTERS/NewscomIn the very near future, governments will lose the ability to keep guns, drones, and other forbidden goods out of the hands of their subjects. They'll also be rendered impotent to enforce trade and technology embargoes. Power is shifting from the state to individuals and small groups courtesy of additive manufacturingâ... aka 3D printingâ... technology.

Additive manufacturing is poised to revolutionize whole industriesâ... destroying some jobs while creating new opportunities. That's according to a recent report from the prestigious RAND Corporation, and there's plenty of evidence to support the dynamic and "disruptive" view of the future that the report promises.

It's all pretty cool, if you look forward to a future that just won't fit under rulers' thumbs.

"The simplicity and low cost of [3D printing] machines, combined with the scope of their potential creations, could profoundly alter global and local economies and affect international security," write RAND's Trevor Johnston, Troy D. Smith, and J. Luke Irwin in "[Additive Manufacturing in 2040](#)."

To their credit, the authors see additive manufacturing not only as a "disruptive threat," but also as a "powerful enabler." They quote one industry expert who raves about the potential to "print electronics, insulators, conductors, plastic substrates all together without degradation." Likewise, a health expert tells them, "The medical field will be transformed dramatically â...! We will be able to print livers, or we can print pieces of arteries for heart surgery."

The authors also note that 3D printing represents a loss of control by government officials. Five years after the creation of the [first 3D-printed firearm by Cody Wilson](#), the RAND authors see technology continuing to re-balance the power relationship between individuals and the state.

"At the domestic level, point-of-sale consumption will no longer be an opportunity for governmental control of risky goods, such as firearms and drones," they write. "State sovereignty is predicated on a monopoly of force and, at a minimum, the capacity to regulate arms. [Additive manufacturing] will further relax this control, giving private citizens greater access to lethal weapons and other tools of violence."

Not mentioned in the report, but noted in a [related RAND article](#), is "the potential for new street drugs, custom-printed from chemicals."

Yes, this could meanâ... as the report foreseesâ... more risk of crime and terrorism in the future. The authors pose scenarios in which terrorists penetrate targets unarmed and use existing 3D printers *inside* the defensive perimeter to create weapons.

OK. Maybe.

But criminals and terrorists are already pretty well supplied around the world, via black markets, state sponsors, and often their own manufacturing capability. Forget ISISâ... it's the shopkeepers afraid of crime and denied the means of self-defense, or the deliberately disarmed and abused minority suffering under a hostile government, who are most likely to find the acquisition of arms easier courtesy of new technology.

Additive manufacturing also eases the availability of spare partsâ... especially in isolated settings and for old or unusual equipment. That's why the United States Marine Corps has embraced the technology for [fabricating replacements in the field](#), and fanciers of classic cars see [3D printing as a great alternative](#) to hunting for rare parts and paying through the nose for the privilege.

"When a product fails and certain replacement parts are unavailable or scarce, 3D printing offers a means for a quick and efficient repair," noted a [paper](#) presented at the 2015 Product Lifetime and the Environment Conference.

And the innovations that keep weapons functioning in the field and vintage cars cruising the roads will just as easily benefit an airline forbidden to make purchases on the world market. Subject to international sanctions, Iran's domestic airline "had become infamous for its crashes as the aging fleet struggled to fly using only 'smuggled or improvised parts,'" notes the RAND report. But the company is gaining the ability to make what it needs.

This "might reduce the number of accidents," sniffs the RAND report, yet "that benefit comes at the cost of weakening the effectiveness of sanctions, which represent a basic tool for managing geopolitical challenges."

But many observers might think that it's a *positive* development when end users can create critical replacement parts on the fly, even if it deprives squabbling politicians of the ability to hold airline passengers as hostages.

A technology that can fabricate replacement parts at the point of use can create a lot more, too. Johnston, Smith, and Irwin cite estimates that 10 years from now, additive manufacturing will be responsible for between 5 and 50 percent of goods sold, and up to 90 percent two decades out.

That scale of industrial transformation is likely to mean big changes in where and when goods are produced... potentially creating (the authors say) new dangers. They open the paper with a hypothetical attack by terrorists radicalized by high unemployment in their country because "factories that once assembled more-specialized goods have been replaced by local [3D] printers in the markets to which those goods were once exported." But that's only looking at what's lost... considering the horse-drawn carriage makers, to use an old example, without also acknowledging the automobile manufacturing jobs that came to replace them.

Later in the paper, the authors concede that "business opportunities that do not even exist yet, such as the production of human organs, could emerge" as additive manufacturing progresses," and "thus, products and perhaps whole industries could move to different locations in the future even as the frontier itself advances."

â... By the people, for the peopleâ... : Kim Dotcom to launch alternative internet

[Get short URL](#)

Â© Kim Dotcom / Reuters

Kim Dotcom, wanted in the US for alleged widespread illegal file sharing, has vowed to build an alternative internet to combat privacy and freedom problems online.

The knowledge that government agencies have used the internet to spy on citizens, along with high-profile hacking scandals, has brought online privacy to the forefront of peopleâ... s minds.

Megaupload founder Kim Dotcom says he will help facilitate an unobstructed internet, free from prying eyes, through MegaNet, which will operate without IP addresses. The German entrepreneur is currently resisting extradition to the US from New Zealand over alleged copyright infringement.

[.Kim Dotcom](#)

[â @KimDotcom](#)

I have been working on this for a long time. Mobile networks and devices will be ready for this in 4-5 years. When it goes live our dream of true Internet Freedom shall become reality.

The upcoming K.im and Bitcache apps can provide the initial critical mass for this new network. <https://twitter.com/kimdotcom/status/567431874578894849> â...!

The development will ensure internet freedom will become a reality, he added. *â... I have been working on this for a long time. Mobile networks and devices will be ready for this in four-five years.â...*

It comes as the US Federal Communications Commission (FCC) plans to kill net neutrality next month. In 2015, the same [agency](#) adopted an *â... open internet orderâ...* which it said prohibited companies from restricting legal internet use or carrying out paid prioritization for certain services.

The new position has been pitched as a bid to restore internet freedom, but critics argue that any rollback will allow internet service providers much greater control over what people can and cannot see online. FCC chairman Ajit Pai believes repealing net neutrality will facilitate greater investment and innovation.

[READ MORE: How the FCCâ... s reversal of net neutrality may affect you](#)

â... This burdensome regulation has failed consumers and businesses alike,â... Pai said in a Wall Street Journal opinion [article](#). â... In the two years after the FCCâ... s decision, broadband network investment dropped more than 5.6 percent - the first time a decline has happened outside of a recession. If the current rules are left in place, millions of Americans who are on the wrong side of the digital divide would have to wait years to get more broadband.â...

[.Julian Assange.@JulianAssange](#)

Dear [@realDonaldTrump](#): 'net neutrality' of some form is important. Your opponents control most internet companies. Without neutrality they can make your tweets load slowly, CNN load fast and infest everyone's phones with their ads. Careful.

TAKE DOWNS

DO YOUR OWN TAKE-DOWN:

How To Bust Any Corrupt Politician, Billionaire, Party or Secret Club WIDE OPEN!!!

You can **Do It Yourself**, from the comfort of your living room.

- Easy to do without breaking a single law.
- You even get to make law enforcement, the federal Constitution and major news broadcasters help you do it.
- The more corrupt they are, the easier it is to do.
- Over 300 million taxpaying voters will help you do it.
- Have fun being a Crime-Buster while helping your country.
-

Until we get **JUSTICE**, we will work together to shut down every related entity who participated in this crime.

You can do the same for a cause or issue close to your heart, too.

Learn How.

Stay tuned to this page...

[HIRE US TO GIVE YOUR COMMUNITY GROUP A SEMINAR ON TAKE-DOWNS](#)

What are "Mnemonic Reasoning?" triggers:

We have some of the best experts in the world that know how to do this. Only a few of the corrupt politicians have anybody that even remotely has a clue what this is.

Every single word triggers deep emotional, brand and reactive memories buried in your mind. Madison Avenue uses this fact to sell you cologne and fancy watches. We use this to wipe out evil.

We have spent 10 years embedding [Mnemonically Reasoned Calculated Words and Phrases](#), across the internet, in an untraceable manner. Nobody can ever get them out, of where they are, because the collaborative public hive mind put them there, via global social media.

To peel them out, you would to get every single person that was on the internet, on each day, back then, for years, at the exact same time, to go be in the same exact place at the same exact time, again.

That's probably not going to happen, again. Just, sayin...

Want to use them to take down corruption? No problem. We will show you how.

Want to use them to sell pizza. Talk to Madison Avenue. The only ones we know about are specifically for corrupt politicians.

We are also working with the group who has built the largest [Streisand Effect Accelerators](#) in the WORLD!

If you are a bad guy, and you don't know what *Streisand Effects*, *Mnemonic Triggers* and *Re-percussive Social Array's* are, then you are probably already pretty much screwed.

READ ABOUT HOW OTHERS HAVE HELPED:

THE TASKFORCE: The Most Potent Public Service Group on Earth

By Deanna Conners

It is a really, really bad idea to do political corruption.

It is a worse idea to do political corruption, with tax money from these particular members of the public.

It is the worst possible idea, in history, if you do political corruption, with the tax money from these members of the public, and then use their own tax dollars to put their companies out of business, copy their products and make billions of dollars, off of their blood and sweat.

Are politicians, and their campaign financiers, that evil? Yep!

So this has happened to a bunch of different Americans. But, some of these American's can be clever people. That can be darn right creative in their problem solving.

So, it turns out: Crooked politicians, and dirty financiers, are not very smart beyond their spreadsheets. They steal quite a lot of the things that they make money off of, because they do not know how to create.

When, some of them, stole with great audacity; they poked the sleeping bear and kicked the hornet's nest, at exactly the same time.

It is hard, on the public, when you steal their futures, their dreams and their homes. It gets them kind of upset. (IE: Congress's lowest-in-history approval numbers)

So, some people, that had these bad things done to them, got together and, not only, said "enough is enough"; they also built and deployed the tool to put an end to it.

That tool is called: THE TASKFORCE!

Although it is not openly admitted, they took out Solyndra, Eric Holder, Steven Chu, A123, a massive chunk of the senior White House staff, Erick Strickland, Lois Lerner, and quite a number of very famous names that you have heard of. They made these people resign, get fired or get defunded. They made some of them get indicted.

They brought the FBI, The GAO, Attorney Generals from across America, and tens of thousands of journalists into ongoing investigations against Google, Kleiner Perkins, Elon Musk, and gobs of suspects. Think about it! You never saw so many resignations, at about the same time, of some of the most powerful people in politics, who all happened to be financially connected. Hmmmmmm?

The Taskforce showed hundreds of thousands, of members of the public, how to do, almost, the same level of investigations, on dirty politicians, and their cohorts, as the FBI.

Not only do they accomplish their magic without breaking a single law, the law enforcement agencies are

obligated to help them do it.

They have one requirement: The bad guys actually have to be doing crimes. The Taskforce will not go after anybody because of race, appearance, accent or poor social skills. If you have the Taskforce on your tail, it is 99% certain that you did crimes!

They work as a team and retain the services of former FBI, CIA, DIA, DEA, Federal prosecutors, independent media publishers, university researchers, private investigators, and have quite a volunteer squad, comprised of the general public.

The opposition does not even need to spy on them because they openly disclose their plans online, and send regular reports in to law enforcement agencies.

*How do you take down a billion dollar Criminal Corporation, a dirty Senator with vast amounts of cash hidden in Switzerland, or a cartel of insane technology financiers? Simple. **You use the truth!***

Crooks do their work in the dark. The Taskforce brings the brightest lights on the planet to the blackest holes in Washington, DC and Silicon Valley.

Every single manipulation of financial records can now be traced. You can monitor their activities from their UBER app and their social media postings. Every illegal sexual transaction can now be discovered. Every overseas hidden tax hole have can be found out and reported. All of the under the table pay-outs are now open. The payola using stock can be found out. Secret PAC's are no longer secret. In other words, there are no longer any secrets in the world. Every dirty investor, and all of their stock portfolio assets can now be identified, tracked and terminated. All within the full confines of the law.

If, during the course of an investigation, you are missing the final links to a payola scheme review, just wait a minute, 4CHAN, or some whistle-blower, will post it on Facebook in a short amount of time. Snowden didn't create all of this transparency, but he did make a milestone happen. Wikileaks has now converted into a search engine for corruption. Over 1000 organized anti-corruption groups now exist AND THEY ALL WORK TOGETHER. Over 2000 internet companies will sell you a Senators entire, low-level, backgrounder for \$20 bucks. The Washington Post has an investigation database that makes X-Key-Score look like child's play...actually quite a number of digital news offices now do.

Catching the bad guys is a hundred times easier, now, than it was fifteen years ago.

Investigations, by the Taskforce, are FOR LIFE, or until the target is jailed. Some Taskforce targets are, in fact, now in jail. When members of the Taskforce retire, others take up where the last one's left off.

Of course, politicians and their billionaires are famously vindictive. When The Taskforce gets a retribution attack on them, they have a motto they invoke: "Ten For One". Whatever the politician does in retribution to these members of the public, that politician gets back ten times over. Additionally, every corrupt politico hit-job and dirty billionaire attack can now be tracked right back to the source. The more that politician attacks you, the more they draw a line of evidence right straight back to themselves.

The Taskforce has sponsored hundreds of journalists in the creation of their own on-line digital newspapers. This transition from print, to digital, has brought the news industry to its knees. In exchange for getting infrastructure set-ups, The Taskforce trades access with these new digital publishers.

The Taskforce offers rewards for tips and disclosures from past employees of the dirty corporations and past aides from the dirty senators. They pay up to tens of thousands of dollars for such tips.

Targeted criminal politicians and billionaires are very, very aloof and feel like they are made of Teflon...until the manila envelope full of facts or the FBI shows up on their front porch.

Don't you wish you could hire the Taskforce?

Here is the best part, you can do everything that they do, on your own. Modern private investigators have all of the same resources that the FBI and CIA have. For the same price as a marriage counselor, you can hire one of them to be your mini-Taskforce.

Limited on funds? Do-it-yourself. There are now Maker Faire-type groups, and meetings, that get people together and teach them how to do these things. You can find the links to these training groups by contacting the campaign manager of your local political party, the political reporters at your local independent news outlets and by searching the term: "anti-corruption groups" in most search engines.

You will probably be up against a crooked billionaire. Should you be scared?

No, he should be scared. If he is dirty, he got his billions by doing criminal things. You now have the power to take it all away from him, cut off his sources and wipe out his portfolio. That dirty billionaire should be very, very worried about you and the 300+ million other taxpayers who might be put-off by his crimes.

Go woke, go broke? Americans don't care for corporate activism

By

[Carrie Sheffield](#)

9Z\$QDQSET7 Justin Sullivan/Getty Images

A new warning to woke CEOs: Americans don't want corporations meddling in divisive political issues, and they perceive such activism as phony pandering. There's also a huge gap between what *consumers* believe about woke activism compared with out-of-touch *executives*, according to [a study conducted by the Brunswick Group](#), a management firm.

Amazon [yanks a documentary about Supreme Court Justice Clarence Thomas](#), EBay [scraps Dr. Seuss books](#). Disney [fires actress Gina Carano](#). Do consumers agree with these moves?

Brunswick found 63 percent of corporate executives agree unequivocally that companies should speak out on social issues, but a mere 36 percent of voters agree. Corporate brass also has a highly inflated sense of how effective corporate communication has been on social issues compared to voters.

An overwhelming 74 percent of business executives think corporate activism is effective, compared with just 39 percent of voters. Companies spend billions of dollars building brand equity through marketing campaigns. Turns out their virtue-signaling could be counterproductive because voters believe itâ... s inauthentic.

The study found more than 60 percent of voters think â... companies only speak out on social issues to look better to consumers and are not being sincere,â... even as 57 percent of executives said companies â... speak out on social issues because they want to achieve real change.â...

Talk about disconnected narcissism. Will these brands wake up from their woke fantasies?

â... Authenticityâ... is a buzzword that corporate bigwigs throw around in hopes of reaching younger consumers. Instead, they come across as hovering, obnoxious parents in mom jeans and dad fanny packs.

Scott Olson/Getty Images

Brunswickâ... s findings echo an April [Rasmussen Reports survey](#) finding 37 percent of American adults said Coca-Colaâ... s swipe against Georgiaâ... s voter integrity law made them less likely to purchase Coke products. (Incidentally, Coke [twice won worst company for global plastic waste](#).)

Just 25 percent were more likely to buy Coke, the survey found, and 30 percent said it didnâ... t have much effect. People vote with their wallets: 52 percent of Republicans told Rasmussen they were less likely to shop Coke because of the Atlanta-based firmâ... s election-law stance â... as did 24 percent of Democrats and 38 percent of independents. Cokeâ... s stock price is down since January â... even as the S&P 500 Index is up more than 20 percent. Will Coke shareholders ask for corporate executivesâ... pink slips if they keep up this nonsense?

Coca-Cola said Georgiaâs law â makes it harder for people to vote, not easier,â but the statute expands early voting, requires funding to stop precinct voting lines from getting too long and guarantees a minimum number of ballot drop boxes (which didnât exist in the state until 2020).

Georgia critics denounced requiring mail-in voters to provide some form of accepted ID. But uber-liberal states like New Jersey, Virginia and California demand this also. Georgia voters: Remember this hypocrisy now that Stacey Abrams â who still refuses to concede her 2018 loss to Gov. Brian Kemp â just declared Wednesday sheâs running for a rematch.

Despite woke executivesâ wide-ranging corporate bullying and cancellations of American citizens, thereâs one foreign social-justice cause off-limits: China.

Drew Angerer/Getty Images

American business leaders back just about every liberal political cause under the sun, yet they wonât utter a peep about vile, heinous modern-day slavery and human rights abuses committed by the Chinese Communist Party. This includes the imprisonment and torture of an estimated 1 million Muslim Uyghurs.

Rather than showing a backbone, major corporations like Nike, NFL, Tiffany, Marriott and Vans [cave to the CCP](#) at every turn. One example: JPMorgan CEO Jamie Dimon groveling before the CCP [to apologize for joking](#) that his company would outlast the CCP.

A shining counterexample comes from the NBAâs rank and file. Boston Celtics center Enes Kanter is an incredibly bold man yet to receive support from his higher-ups. Heâs excoriated the NBA for its cozy CCP relationship. Immediately after obtaining US citizenship, Kanter legally changed his name to Enes Kanter Freedom. Freedomâs new surname will appear on his jerseys.

Freedom grew up in Turkey, where he angered Turkish President Recep Tayyip Erdogan â a man growing in violent aggression against his own people. Erdoganâs regime last month issued Freedomâs 10th arrest warrant because of his courageous statements against Turkish human rights abuses.

[Multiple polls show](#) most Americans are also wary of the CCP and want their country to vigorously push back. Shots fired, corporate America. Will you support this authentic cause?

HELP STOP THE CORRUPTION

WAYS YOU CAN HELP:

1. [**REPORT CORRUPTION AND READ RELATED TIPS AT THIS LINK**](#)

2. **Write your elected officials and demand that a "Special Prosecutor hold a public investigation" of these crimes and**

individuals.

3. Write your "letters to the editor" sections and demand change.

4. Expose these crimes in every blog and social media outlet you can find.

5. Picket these men in front of their homes and offices.

6. Go to Washington, DC and walk-in to elected officials offices (it is your legal right) and demand that they file charges.

7. File small claims class actions against these men, at your local city hall and demand your losses back from the tax money they stole from your tax payments.

8. Write famous reporters and ask them to give more coverage to stories about these crimes.
