Community Revolts Against Toxic Tesla Factory!

"Said local, Andrew Schwartz: *"this is another one of those politician kick-back schemes where they promise unicorns and then kill the air, water and really, THE PEOPLE, of a whole region and, later, shrug their shoulders and say..uh, uh, well, we didn't know,"* Mr. Schwartz went on to say that he had researched the battery factory disasters in Asia and found that there was *"vast documentation about the extensive deaths and permanent toxic poisonings"* from regions where lithium, and similar, battery factories existed in the past. He claims Tesla is fully aware of the lethal nature of their Task but that Elon Musk just wants to maximize his stock value without any care for the potential loss of life and the potential for toxic "lithium babies". *"Those things will come much later, after Mr. Musk has cashed out his stock"*, said Schwartz.

Said Mr. Schwartz: *"When it nowonly takes \$50,000.00 to buy a Senator, and over 20 Senators have personal insider trading investments in these Tesla batteries, howcan the public even have a chance at fair treatment?"*, he continued, *"we can't have these billionaires raping our communities for profit and then walking away from the dead poisoned towns they leave behind. Tesla has been proven to have lied, over and over again, nobody in their right mind can trust them to build this."*

This battery factory is so toxic that EVEN CHINA WON'T BUILD IT!!!

OVER 40 TOXIC CHEMICALS ARE USED IN ALL 5 OF THE TOXIC BATTERY TYPES TESLA AND PANASONIC ARE TRYING TO PUSH OFF ON SOME HAPLESS RUSTIC AMERICAN TOWNS. ALL 40 OF THESE CHEMICALS CAN GIVE YOU CANCER, LIVER DISEASE, DEFORMED BABIES & BRAIN DAMAGE.

Panasonic has killed vast numbers of workers in Asia, is charged with "cover-ups", has been sued for organized crime price fixing and dumping and you trust them to do this right?

The controversy also involves the [abuse of migrant workers in a part of the immigration/cheap labor scandal](#).
