The 500 trolls of Tesla Motors!

Elon Musk has a massive amount of **fake meat puppet** social media accounts that he uses to create the **false impression** that there are "no problems at Tesla Motors" and that the [fires, lawsuits, staff departures, investor departures, criminal charges, cartel charges, toxic smoke, cancer causing chemicals, DOE application fraud, factory workers on fire, ex-wife & girlfriend abuse stories, battery factory worker deaths, buyer homicide charges, Lemon Law litigation, Billionaire sex clubs, Tesla patents disclose lethal & conflagration potential, Mexican worker battery factory "death camps" plans, dangerous chemicals, political corruption](#) and **hundreds** of other issues are "keep walking, nothing to see here" issues.

TESLAPOSTER1

Ex-Tesla staff say that, in addition to the hundreds of hired "**meat puppet**" trolls that Musk has hired, in India, to watch the internet 24/7 for any mention of the word Tesla", (so they can instantly bombard the comment section with "A Tesla is Christ in the form of a car" messages), Musk has 4 news scanning services that email him, and the trolls, any mentions of the company so that their **greasy** troll-like knobby fingers can leap into action in their dark little troll caves. Every comment section of every article about Tesla has been IP and sequence-route traced backed to the same Tesla-hired shills and trolls who login, comment after comment, under a massive number of fake accounts and identities. There is **NO** massive Tesla fanboy acclaim by millionaires sitting around blogging about the orgasmic joy of even thinking about a Tesla. There are only four 17 year old bloggers in basements in Idaho and India collecting \$5.00 per post.

But the **biggest, hairiest, most wart-ridden Tesla troll of all**, the one that towers above all trolls, is **Tesla investor: Google**. Google scrapes any negative Tesla press off of the internet and manually moves all positive troll Tesla press to the top of its search and news engine.

This is **cartel-level** falsification of the stock market via coordinated manipulation of false information about a stock. It is an **SEC felony**, but **federal executives, who arranged the scam, won't allow the SEC or FBI** to go after these people because it will be politically embarrassing to "**Senior People**".

It will be **politically embarrassing** because certain Washington, [DC politicians gave a "massively unqualified", "bankrupt" \(Per Elon Musk himself\), "failing", "lethally debt-ratio'd", "no-demand", "technically old-school" Tesla](#) a free gift of Taxpayer money as a pass along kickback to Tesla investors in exchange for billions of dollars of campaign financing.

BBC News - Tesla boss Elon Musk hints at technology giveaway

Ever since 1745, horses considered, and then, actually, began giving away their horse-shit. Nobody was excited about it then. Nobody is excited about it today. Horse-shit is still just horse-shit.

Musk's patents disclose that Tesla knew that their cars energy system could "kill you" and "burn down your home or office". It says it right in the very papers that TESLA MOTORS wrote and filed with the **U.S. Patent office**. They posted on the public U.S. Government servers, where they can never be removed, **the awful truth**: Tesla's **WILL** burn you, your family, your house, your office. Tesla's own engineers wrote this! They should give them away because they are worthless!
