Palantir's Supposed Hack--Do I really have to revisit the Freedom Cage?

Today**Palantir's** own 2025 lawsuit against former employees for stealing source code proved that even the best-defended systems leak when humans are involved. If this breach (or something like it) is real, we're getting a preview of what happens when the surveillance state loses control of its own data.

1 day ago**Palantir** was allegedly **hacked**. An AI agent was used to gain super-user access and here's what the hackers allegedly found: Peter Thiel and Alex Karp commit mass surveillance of world leaders and titans of industry on a massive scale. They have thousands of hours of transcribed and searchable conversations of Donald Trump, JD Vance and Elon Musk.

The Palantir Paradox: When Big Tech's Cybersecurity Failures Put ...

The **Palantir** allegation, if true, represents a catastrophic failure of oversight. It suggests that the "too big to fail" mentality has infected national security procurement, where a vendor's reputation and influence are mistakenly valued over its demonstrable cybersecurity posture.
