

Hollywood's Obvious Fake Blatent Pandering To The Woke

Is Diversity-Focused Casting Anti-Racist or Virtue Signaling Because Of The BLM Fraud Scandals?

The Game Of Woke and *The Rings Of Diversity* have the public aghast at how obvious the pandering is

[Culture](#), [Race And Racism](#), [Hollywood](#), [Film Industry](#), [Television](#), [Diversity](#), [Culture War](#)

Viewers most strongly object to RACIAL REPLACEMENT. Instead of creating a new story (ie: *Moana*), lazy studios take a well known story and just replace the actor of one race with an actor of another race (ie: *The Little Mermaid*) in an obvious message of replacement obviousness. Obama has promoted this concept to his Hollywood backers, but the idea does not hold water or viewers. Emotional branding cannot comprehend such a shift. Hollywood should be creative enough to write new stories and not rely on shallow shell game switch outs.

In the all women-made *SHE HULK*, all of the women characters are played as blathering low IQ idiots who are either drunks, narcissists or dating sluts. This does not bode well for representation.

As all of the old white jew boys were replaced by middle easterners and lesbian bosses, in Hollywood, things went from one extreme to the other.

Much discussion has been sparked by the casting of non-white actors in fantasy-genre film and television shows, most notably HBO's "House of the Dragon" and Amazon Prime Video's "The Lord of the Rings: The Rings of Power." Debates are waging regarding backlash to diversity-focused casting, with some accusing critics of racism, and others claiming that present efforts for diversity in media are performative and disingenuous.

In an article for Newsweek, Angie Speaks deemed the casting of black actors in "House of the Dragon" to be **shallow attempts at broadening the show's appeal**, stating that it is not true representation when black actors are "stuck into explicitly white roles with no concern for plot or whether it makes sense."

In a piece for RedState, Brandon Morse stated that criticism towards "woke entertainment" was **not rooted in bigotry, but instead a distaste for message-first storytelling**, labeling it predictable and "effectively just propaganda with a mask."

In The Atlantic, Adam Serwer responded to Morse's criticisms, accusing him of wanting "Jim Crow casting requirements" and claiming backlash from conservative outlets to stem from a desire to "convince the corporations that make television shows and films that their products will **fail commercially if they do not conform to conservative politics.**"

Opinion

HBO's House of the Dragon, the prequel to the hit show Game of Thrones, made headlines for its diversity casting, with Black actors being given major roles in the show. The headlines weren't all positive; the casting somewhat flew in the face of the plot, which revolves around the race-purity obsessed Targaryen family. It was jarring to many, including myself, to suddenly see Black actors portraying characters with Valyrian ancestry married into the Targaryen family fold, like Steve Toussaint, who portrays Lord Coryls Velaryon. But others extolled the decision, casting...

Opinion

The age of woke entertainment built its castle on the sand and with every new attempt to build on it, the castle becomes more and more unstable. Studios reach for excuses as to why, and it typically involves blaming fans and viewers.

The list of social justice-infected movies and shows is a long one. Ghostbusters 2016, Netflix's live-action Cowboy Beebop, Netflix's live-action Resident Evil show, She-Hulk, Obi-Wan Kenobi, and now Amazon's bastardization of Tolkien's Lord of the Rings with its "Rings of Power" show.

Each of these shows abused the...

Opinion

Maybe you've heard that people are mad about Black actors being cast in Lord of the Rings. Or Game of Thrones. Or maybe it was Star Wars. Or perhaps Thor. Wait, maybe it was Titans, or Superman. The Witcher? Or maybe you heard that people are angry that Black Panther got made in the first place, because Wakanda is fictional, unlike one of those fantasy countries authors seem to think will seem more mysterious if you add enough accents or apostrophes, like Warthéréth'rién. (I just made that up.) Maybe you're...

'Kardashian is a prostitute, her mother is a pimp': Candace Owens in vicious takedown of the reality show family for 'plotting' to release Kim's infamous sex tape with Ray J

Candace Owens has dismissed Kim Kardashian as a hooker - and branded her mom Kris Jenner a pimp - after blasting their alleged plot to release Kardashian's infamous sex tape. The conservative commentator lashed the megastar influencer, 41, and her 66 year-old 'momager' on her Daily Wire talk show Tuesday. 'I now hold the opinion that Kim Kardashian is a prostitute,' she said. 'And I'm not going to edit this opinion: Kim Kardashian is a prostitute; her mother is a pimp - worse than a prostitute.' 'Kim Kardashian is a corpse; she's a body without a soul,' the activist said.

The rapper, whose real name is Belcalis Marlenis Almánzar, appeared in court on Thursday and agreed to plead guilty to misdemeanor charges of third-degree assault and reckless endangerment. The deal comes with a sentence of 15 days of community service, rather than the prison time she had faced under the original felony charges.
