

BIDEN'S BLIND ELECTRIC CAR AMBITION DESTROYS TOWNS

Thu, 21 Mar 2024 08:16:48, admin45789, [post_tag: bidens-blind-electric-car-ambition-destroys-towns, category: news]

Between a New Factory and an Old Church: VinFast’s Bumpy Corrupt Road in North Carolina

The arrival of VinFast’s electric vehicle factory brings both economic promise and personal upheaval, challenging the fabric of Chatham County.

Lena Stone

Photography by Greg Kahn

ena Stone made her home in Chatham County, North Carolina, a rural area made up of rolling hills and twisting rivers less than an hour’s drive south of the state capital and bustling Research Triangle. Now 76, Stone still lives in the house she built in the 1970s, where she raised her children, regularly looked after her grandkids, and hosted countless family gatherings over the decades.

But in August 2022, her world turned upside down when North Carolina Department of Transportation (NCDOT) officials informed her and dozens of other Chatham County residents that their homes needed to be demolished to make way for the construction of a new \$4 billion factory by the Vietnamese electric vehicle (EV) startup VinFast, which is receiving a \$1.2 billion incentive package from the state government.

Stone was initially told that she'd have to leave her property in fall 2022 to meet VinFast's breakneck goal of producing cars in North Carolina by 2024, but months trickled by with sparse communication from state officials. Over a year later, Stone has been left in limbo, unable to do any of the home improvements she had planned and still wondering how much of her property she'll be forced to sell to the state.

"You don't want to do anything else because you don't know what they're going to do," Stone said of the waiting game, noting that even a good price from the state wouldn't compensate her for the emotional connection she has to her home. "Money can't replace memories."

Many of Stone's children and grandchildren still live nearby, including her granddaughter Karley Michelle, who described the ordeal as stressful for the whole family.

"It's more like, 'This is how it's going to be,' versus giving us options, so it was kind of a shock," Michelle said. "She's really had a hard time with it because she's 76, and she's been there ever since she was in her 20s."

Stone is just one of 27 Chatham County residents whose homes will be purchased by the state through eminent domain, as well as five local businesses and Merry Oaks Baptist Church, a pillar of the local community since 1888.

- 1. Lena Stone, center, poses with her granddaughter Karley Michelle, left, and daughter Patty, right, in front of Stone's home.
- 2. North Carolina officials announced plans in August 2022 to demolish Lena Stone's home and three rental properties she owns near the site of VinFast's new factory.
- 3. Generations of families have attended Merry Oaks Baptist Church, a century-old chapel that officials say is in the way of infrastructure improvements for VinFast's factory.

vinfast church

Members of that church, many of whom have been in the congregation their entire lives, were also under the impression in August 2022 that they'd have to be out of their century-and-a-half-old chapel within months, but they continued holding services and other gatherings as time ticked by.

"We've received nothing to date from the DOT for an offer. No eminent domain paperwork submitted to us, nothing," said Sharron Bouquin, a 61-year-old lifelong member of Merry Oaks. "I don't know what they're going to do. I don't think *they* do."

VinFast announced in July 2023 that it would donate up to three acres of land to potentially relocate the church, but members of the congregation are still waiting for a formal offer from state officials before deciding the fate of their chapel.

Originally slated to start churning out 150,000 cars a year in 2024, VinFast announced a one-year delay due to "administrative procedures." The NCDOT said that they could not start purchasing property from homeowners until receiving a permit from the US Army Corps of Engineers, which was granted in December 2023. A timeline for the acquisition process is still unclear.

Several states implemented eminent domain reform in the wake of the Supreme Court's 2006 decision in *Kelo v. City of New London*, which holds that economic benefits warrant the seizure of private property.

North Carolina, however, does not have such protections. The state allows for eminent domain to be used for "public use" as well as "public benefit," the latter of which critics say results in broad seizures of property for private development and other abuses.

"Public benefit can mean a lot of things to a lot of different people," said state representative Dennis Riddell, a Republican who has introduced multiple bills over the past decade to reform eminent domain in the state. "The laws of seizure of property by eminent domain need to be very tightly worded, not vague and ambiguous with something as loose as 'public benefit.'"

Open the State Coffers

It doesn't ease the minds of Chatham County residents that their tax dollars are being funneled to the factory, as VinFast is the beneficiary of \$1.2 billion in state and local incentives.

North Carolina is an attractive state for businesses, with the lowest corporate income tax rate in the country, a relaxed regulatory environment, and several prestigious universities, but granting targeted subsidies to preferred companies is more akin to crony capitalism than the free-market system that many state officials claim to support.

"We're paying more than the economic benefit to a specific company," said Michael Munger, economics professor and director of the Philosophy, Politics, and Economics Certificate Program at Duke University. "Basically, we're taxing all of the companies that in good faith came to the state of North Carolina and actually invested and hired people, [and] we're using their tax money to create a differential benefit for a new company that may or may not ever contribute anything to the economy."

These deals are not unusual in North Carolina. In 2021, the state agreed to give Apple an \$836 million incentive package for a new campus in Raleigh, despite the fact that Apple is the largest company in the world with a \$3 trillion market capitalization. That same year, officials announced a \$435 million deal with Toyota for the carmaker to expand production at its battery plant in Randolph County.

Other states similarly dole out massive subsidy packages to their preferred companies, a practice that Munger calls a "pathology of politics."

"The key is markets, not business, not the subsidy of business, but the creation of vibrant markets is what actually creates growth in the long run," said Munger, who along with other North Carolina taxpayers, challenged a \$260 million incentive package that North Carolina gave to Google in 2007.

The VinFast incentive package was announced in July 2022. State officials wrote the first check on behalf of taxpayers to VinFast in May 2023, sending the company \$16.2 million from a \$125 million pot that was set aside to reimburse VinFast for construction costs, according to a copy of the invoice obtained through a public records request.

The state legislature also allocated \$250 million to the NCDOT for roadwork and infrastructure improvements needed for the factory, as well as \$75 million to the nearby city of Sanford for upgrades to its sewer systems.

The final pieces are a \$316 million Job Development Investment Grant from the state, which will be paid out over 32 years as long as VinFast hits job creation targets, and a \$400 million package from Chatham County, which is similarly performance-based.

A spokesperson for the North Carolina Department of Commerce pointed to these job creation requirements when asked about criticisms of the deal, saying that "the bulk of the state's incentive package is contingent on company performance and has not yet been paid." C. Michael Smith, the president of the Chatham Economic Development Corporation, also noted the local incentives are performance-based, saying that they are "grateful for this company choosing a site in Chatham County for this historic project."

Other parts of the deal, such as the combined \$375 million allocated by the state legislature to improve infrastructure and reimburse VinFast for construction costs, will be paid much sooner and may be harder to claw back if VinFast does run into difficulties.

"While some state money has been spent on the project, those expenditures have gone into site preparation and infrastructure," the spokesperson for the state department of commerce said. "Those upgrades benefit the industrial site itself, so even in a worst-case scenario, the site would return to the state for reuse by another company."

But even in a best-case scenario, handcuffing taxpayers to an unproven startup in a fiercely competitive industry over a three-decade period does not sit well with everyone.

"To put it in perspective, think about how fast the economy changes and how different the economy looks today than it did 32 years ago," said Brian Balfour, the senior vice president of research at the Raleigh-based John Locke Foundation. "To try to force North Carolina taxpayers to be tied to this specific company in this specific industry for more than three decades—it's just absurd."

VinFast plans to build the factory on an 1,800-acre wooded area in southeastern Chatham County, while the North Carolina Department of Transportation will revamp roads and make other infrastructure improvements around the site.

At the federal level, the White House has announced myriad tax breaks, grants, and subsidies for electric vehicles in its effort to transform the automotive industry. President Biden praised VinFast’s plans as “the latest example” of his “economic strategy at work,” while Secretary of Energy Jennifer Granholm framed it as proof that companies are “responding to President Biden’s economic plan.”

But even as federal officials took credit for VinFast’s new factory, executives at the company pushed for more government support.

VinFast officials complained privately about new eligibility requirements on the \$7,500 electric vehicle tax credit for consumers, which mandated that a vehicle’s final assembly take place in North America and that battery materials be sourced domestically, meaning that American VinFast customers wouldn’t get access to the tax credit until the North Carolina factory was up and running.

As President Biden prepared to sign the new requirements into law in July 2022, Madame Le Thi Thu Thuy, then CEO of VinFast, wrote a letter to North Carolina senators Richard Burr and Thom Tillis warning that the tightened-up restrictions on EV tax credits posed “an existential threat to VinFast’s plans to build a US manufacturing hub in North Carolina.”

“Eliminating our vehicles from the federal rebate program threatens to torpedo our entry into the US market, and drastically alter our expansion plans,” Thuy wrote to the senators on July 31, 2022, in the previously unreported letter, according to a copy of the document obtained through a public records request.

“We ... are going to take people’s rights, their homes, their memories, in favor of something that is proving to be even higher risk than initially thought.”

After Congress sent the bill to the president’s desk with sourcing and assembly provisions still in place, a top VinFast executive wrote to North Carolina officials on August 9, 2022, that the company is “disappointed that Senate leadership was unwilling to allow for a phase-in on the EV rebate” but that the company remained committed to its plans in the state.

Months later in spring 2023, a VinFast executive again complained to Governor Roy Cooper’s staff about the tax credit’s new eligibility requirements and then tried to enlist state officials to pressure the federal government over a pending \$1.4 billion loan from the federal Advanced Technology Vehicles Manufacturing Loan Program, according to the Raleigh-based *News & Observer*.

“The state of North Carolina has stepped up and provided substantive support for this project,” the VinFast executive reportedly wrote to Cooper’s staff on May 11. “Meanwhile, the (Biden) Administration has taken credit for the efforts of VinFast and North Carolina—while eliminating our vehicles from federal incentive eligibility, raising interest rates and making it harder to access private capital, and dragging out the process for a federal loan.”

VinFast announced in August 2022 that it would still grant the \$7,500 break to US buyers, a necessary gesture in a cuthroat EV market that has seen Tesla and other more established companies slashing prices in recent years.

VinFast’s Bumpy Road

VinFast originally launched in 2017 as a subsidiary of Vietnamese conglomerate VinGroup and started producing gas-powered vehicles 21 months later in Hanoi, then transitioned to EVs in 2021.

The first VF 8 City Edition SUVs were delivered to American customers in March 2023, but VinFast had to issue a recall two months later due to complaints about the VF 8’s heads-up display randomly going blank, which the National Highway Traffic Safety Administration said could “increase the risk of a crash” because “critical safety information” was no longer in view.

Lena Stone’s home has been the setting of family gatherings, birthdays, and holidays for nearly 50 years. Eminent domain laws give North Carolina the power to take her home, even though she doesn’t want to sell it.

VinFast aimed to sell 50,000 vehicles in 2023 but had only delivered 21,342 through September, about 2,000 of which went to US customers. Green and Smart Mobility, a taxi company also owned by VinGroup, purchased at least 7,000 of those vehicles.

Trade publications, meanwhile, have universally criticized the newcomer, with one reviewer writing in the automotive magazine *Road & Track* that the “VinFast VF 8 has the worst body control of any modern car I’ve ever driven.”

“Over a 90-minute drive, the 5600-lb SUV never stopped bobbing, swaying, and bucking, producing near-constant head-tossing motions,” the reviewer wrote. “Riding in the passenger seat, I became car sick for the first time in years.”

With sales slow to take off, VinFast posted a net loss of \$623 million in the third quarter of 2023, bringing its total yearly loss to \$1.7 billion. That comes after losses of \$2.1 billion in 2022 and \$1.3 billion in 2021.

VinFast went public in August 2023, with shares briefly soaring to over \$80 before plummeting back below the listing price of \$22. Shares were hovering around \$6 in December.

A VinFast spokesperson said that the company still expects to start production at its US plant in 2025 and “greatly appreciates the support from the state of North Carolina.”

While Governor Cooper and VinFast executives insist that the project is still on track, other North Carolina officials have urged caution.

“In our eagerness to say, ‘We got another mega site going here in North Carolina. Aren’t we something,’ we, I think, are going to take people’s rights, their homes, their memories, in favor of something that is proving to be even higher risk than initially thought,” said Riddell, the Republican state lawmaker who has attempted to reform eminent domain in the state.

Chatham County residents whose homes are in the way of VinFast’s factory shared a similar sentiment, noting that officials may be able to recover some tax dollars if the project goes belly-up, but they can’t build back a demolished home.

“I know VinFast is having problems. It may even be one of those things where we have a nice road to nowhere,” said Kay Hinsley, who has lived in Chatham County her entire life and may have to give up part of her property for road expansion near the site. “I would imagine if they can’t make it, they will just sell it off to something else. The damage to the community will already be done. It’s a sad thing for the people that have called this area home for so long.”

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform.

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

What Went Wrong With The Electric Car Industry?

Only men seem to start car companies. Most psychologists say that this is because men see cars as dick insecurity emblems. Elon Musk is known to be a wildly insecure narcissist who feels that he must get every woman, that he can find, pregnant in order to prove his manhood to his abusive father, who got his sister pregnant.

Musk embodies the ultimate expression of ‘car-as-dick’ thinking because Musk was not only molded by his purse-swinging, kept-woman, mother, abusive father and crooked brother but also by the Silicon Valley frat boy rape-culture.

Silicon Valley is, of course, the Eden of modern misogyny and tech-bro douche-baggery.

Musk dragged all of the biggest assholes from Silicon Valley, The DNC and Goldman Sachs into his Tech Cartel. Together they created a temporary monopoly in the electric car industry by exchanging stock market payola with Senators and White House staff who, in exchange, locked off the electric car and space industries just for Musk.

But that scheme was not sustainable. It was amazingly crooked and lucrative but, it could not last. It was Big Tech’s Roman Empire and it was doomed to fail spectacularly.

Musk counted on Obama and Biden to stick with his original quid-pro-quo deal to trade government cash for election rigging via his boyfriends at Google and Facebook. Tesla was the money conduit for a bunch of political scammy.

Biden and his cheerleader actress front girl, Jennifer Granholm, bounced into office with a Wizard of Oz promise to give everybody electric cars. They were so wrong about the pitfalls of their plan and they hired so many idiot sex freaks and unicorn fart unaware fools that their scheme blew up...instantly and literally.

— That’s right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISHER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCIERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE “WINNERS” WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED!

— If you are a taxpayer: You suffered damages!

— If you are an American business: You suffered damages!

— If you are Democracy: You were broken!

— If you were a tech mobster: You made out like a bandit!

— This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

— The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

— This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national “economic” or “health” emergency “stimulus” scam.

— There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Erotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

— So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

— The United States Department of Energy runs a political crony payola slush fund. They don’t “support green cars”; they support “greenbacks for crony insiders who financed political campaigns”. The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The “Secretary Of Energy” is a paid actor who owns the companies that the government finances.

— Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

— They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay.

— Top Lawyers from Perkins Coie and Covington & Burling admitted that they “CONTROL” who gets DOE funding, agency appointees and federal cash

THE UNITED STATES DEPARTMENT OF ENERGY

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

The **Advanced Technology Vehicles Manufacturing (ATVM) Loan Program** is a \$25 billion direct loan program funded by **Congress in fall 2008** under the guise of “providing debt capital to the U.S. automotive industry for the purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil.” The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a “success”. In fact, it has been, and remains today, **one of the most criminally corrupt failures in American history**. It was only a “success” as one of the biggest political slush-funds ever created!

THE FACTS:

Victims had global character assassination and propaganda-media defamation reprisal attacks operated against them by White House staff and their political financiers: Elon Musk, Larry Page, Steve Jurvetson, Eric Schmidt, Steve Westly, John Doerr, et al. Jury and FBI-compliant evidence proves this as fact.

Victims were attacked because 1.) they helped law enforcement investigate the attackers, 2.) They competed with the attackers that attacker’s products and the Silicon Valley Cartel attackers chose to “cheat rather than compete”. Jury and FBI-compliant evidence proves this as fact.

The attackers spent over \$30M, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from Google, Gawker, Gizmodo, Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

Victims had been previously funded by the U.S. Government and had a multi-decade relationship with the highest offices of the Government, which provided them with deep knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

The U.S. Department of Energy is used as a political slush fund to pay back campaign finance millionaires while blockading the competitors of those millionaires from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

The only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact.

Through corrupt rare-earth mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the “Mafia-like” structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and “Deep State” coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person’s who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, LinkedIn, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant evidence proves this as fact.

A case study in pay-to-play cronyism

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court [ruled](#) that Cause of Action, where I am executive director, can [proceed with a lawsuit](#) against the Department of Energy. We're suing the federal government for the blatant political favoritism in its \$25 billion "Advanced Technology Vehicle Manufacturing Loan Program."

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car manufacturers: [Tesla](#) and [Fisker](#).

Both companies' political connections run deep, especially Tesla's. The company's founder, Elon Musk, was a [max donor](#) for President Obama. One of its board members, [Steven Westly](#), was appointed to a Department of Energy [advisory board](#). And another Obama bundler, Tesla investor and adviser Steven Spinner, [secured employment](#) in the department's Loan Program Office—the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since [gone bankrupt](#), was [backed](#) by a San Francisco [venture capital firm](#) whose senior partners [donated millions](#) to the 2008 Obama campaign and other Democrat causes. [One partner, John Doerr](#), parlayed his support into a seat on the President's Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

There's no shortage of examples. The department's leaders—including then-Secretary of Energy Steven Chu—repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). [One emails reads](#), "DOE has made a political commitment" to approve a company's loan. Another says the "pressure is on real heavy" from none other than Vice President Joe Biden. And still [another shows](#) an employee asking, "what's another billion anyhow?"

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companies' applications faster. The government [gave them extraordinary access](#) to its staff and facilities—even to the point of having government employees personally walk them through the loan application and approval process. The department ignored its own lending rules in order to approve the companies' loans. And it [renegotiated the terms of some loans](#) after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fisker's cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them both—and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPV's application because [its vehicle was powered by hydrogen](#). It was an electric SUV. It also raised objections that it didn't raise with other companies whose applications were approved. For instance: The bureaucracy [criticized](#) the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, [XPV has gone out of business](#), unable to compete against its politically connected—and subsidized—rivals.

This casts the Department of Energy's loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S. taxpayer.

Sadly, similar examples are widespread in Washington. That's no surprise considering the feds spend [roughly \\$100 billion a year](#) in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, [over two-thirds of likely voters](#) think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. They're right.

This points to a simple conclusion: Politicians and bureaucrats shouldn't use the public's money to pad private companies' bottom lines. As the Department of Energy's green-vehicle loan program shows, the capacity for corruption is immense—and inevitable.

Note: We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions.

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the Silicon Valley financiers of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false.

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic covert operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that Silicon Valley has attempted to control. So, you see, it isn't about "[saving the environment](#)"; it is about greed, bribes and corruption on an epic scale.

The program continues today as a political slush-fund and it is as corrupt as ever. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and revolving door career deals, still control the funds and steer the monies exclusively to their friends.

The program has not funded any company who is not a campaign-finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper blocked and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the [facade group: "The National Venture Capital Association"](#), DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

DOE's [two main manipulation tricks](#) are: 1.) **STONE-WALLING** - Where DOE staff throw outsider Applicant's filings in a box and forget about them for many years in a Lois-Lerner'd review process that takes any commercial bank only 2 weeks to complete. DOE spends years doing hyperbolic nothings in order to delay campaign financiers competitors, and 2.) **INTERPRETIVE LYING** - Where DOE staff make up things that Applicant's never said and twist the Applicant's words into anything BUT what the Applicant's intended, in order to manipulate non-favored Applicant's into negative interpretations. DOE staff never even called outsider Applicant's for clarity discussions of any key data. They did not want to hear the truth, they couldn't handle the truth! They only wanted their crony's to win the funding!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was **DEFAULDED, LIED TO, STONE-WALLED** and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their damages from tort-based interference in their businesses and other fraud-related DOE-operated causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Rahm Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

abuse of their resources. Said one Senator: "If they want bankruptcies, we will give them bankruptcies..."

- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".

- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.

- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.

- As shown by this letter: <https://news.wtwh.com/sites/default/files/Letter%20from%20Bright%20Automotive%20to%20US%20Dept%20of%20Energy.pdf> ...and hundreds of Congressional reports, DOE staff proved themselves to be liars and scumbag political manipulators at every turn.

- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!

- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.

- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.

- A CBS News 60 Minutes segment called: "**The Cleantech Crash**" revealed that many of the assets of the ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.

- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes...although multiple FBI officials have been charged with covering up those crimes.

- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel to investigate this matter.

- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.

- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "greent" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.

- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.

- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a "**first-come, first served**" basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a permanent black-list.

- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.

- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.

- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.

- White House and DOE staff hired Gawker, Gizmodo, Jalopnik defamation bloggers to attack those who exposed the plot. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets.

GOOGLE_ATTACKS

ATTACK PROCESS USED BY GOOGLE AND GIZMODO

(Above, From tens of thousands of internal Google documents leaked)

- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.

- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have **NEVER** gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State" cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

'Treason!' - AG Barr Finds 'Government Power Was Used By Obama Administration To Spy On American Citizens And Run Dirty Tricks Reprisal Operations'

by [Tyler Durden](#)

In his first pair of interviews since being sworn in, Attorney General Barr told [Fox News](#) and [WSJ](#) that he was pursuing the investigation into the origins of the Trump-Russia probe - an investigation [he has tasked](#).

[John Durham](#), the [US Attorney from Connecticut](#), with leading - because Americans need to know whether the government "put a thumb on the scale" to try and undermine President Trump both during the campaign and during the first two years of his term, just like "**we need to ensure that foreign actors don't influence the outcome of our elections.**"

Separately, he told [WSJ](#) that "**government power was used to spy on American citizens**...I can't imagine any world where we wouldn't take a look and make sure that was done properly."

Barr has doubled-down on using the term 'spying', which has angered Democrats, after first using it during Senate committee testimony from April 10, where he uttered the now-infamous phrase "I think spying did occur."

The AG has declined to elaborate on what prompted these concerns, **though he has said he'd be interested to see the underlying intelligence that sparked the FBI decision**, in the summer of 2016, to open a counterintelligence investigation. At this point, **Durham's review isn't a criminal investigation**, and Barr hasn't offered a timetable for when the investigation might be completed. Ultimately, the probe could lead to changing FBI protocols involving investigations into political campaigns.

Appearing to respond to Barr's interviews, President Trump declared that his campaign was "conclusively" spied on.

My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!

— Donald J. Trump (@realDonaldTrump) [May 17, 2019](#)

As far as we know, the FBI first started investigating the campaign after an Australian ambassador told his superiors that George Papadopoulos had appeared to know about Russian plans to release 'dirt' on Hillary Clinton. The FBI later sent an informant, Stefan Halper, and a woman who identified herself as a research assistant, to meet with Papadopoulos and push him to say whether Russia was helping the Trump campaign.

[Politics](#)

The Corrupt Greentech VC Influence Over Washington

Katie Fehrenbacher

[- How Silicon Valley Oligarchs Took Over The Obama Administration](#)

There've been a couple articles in the past few weeks pointing to President Obama as the "[clean tech investor in chief](#)" and the [presidential VC with bets on clean energy](#). The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energy's (DOE) first [ARPA-E conference](#) (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didn't have a dedicated person in Washington — in some circles they call them lobbyists — maneuvering grant and loan programs, you weren't able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between \$50 billion and \$80 billion into clean power and energy efficiency initiatives ([depending on how you slice it](#)). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most effective.

Kleiner Perkins managing partner John Doerr is on President Obama's [Economic Recovery Advisory Board](#), and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleiner's investments have had some successful government bids, most notably the [\\$529 million loan to Kleiner portfolio](#) company Fisker Automotive out of the DOE's highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the \$25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Juvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Venture's LP meeting earlier this year where the firm [announced that former UK Prime Minister Tony Blair](#) would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed [former venture capitalist Jonathan Silver](#) as its loan chief to lead both the DOE's loan guarantee and ATVM loan programs. About a third of the DOE's loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

[I wondered earlier this year](#) if the loan guarantee for Solyndra wasn't a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked "excluding some potential applicants unnecessarily."

There's nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gates' [calls for boosting federal government](#) investing to \$16 billion per year into energy innovation. All I'm saying is that this level of influence should be watched.

Another Tesla car catches fire in Hong Kong parking lot: media - ALL TESLA BATTERIES EXPECTED TO HAVE CHEMISTRY DEGRADE AND EXPLODE AS DOE WAS WARNED IN WRITING BY BERNIE TSE, BRIGHT AND XP

HONG KONG (Reuters) - A Tesla Inc electric car caught fire in a parking lot in a Hong Kong shopping mall, the Apple Daily newspaper said on Tuesday, but no one was injured in the blaze, whose cause was not immediately known.

The electric car burst into flames 30 minutes after being parked in the city's San Po Kong district on Sunday, the newspaper said, with three explosions seen on CCTV footage.

Firemen took 45 minutes to douse the fire.

The vehicle was a Tesla Model S 85 KWH dual power version, added the paper, which gave no explanation of what might have caused the blaze.

Responding to a request from Reuters, Tesla declined to comment. Reuters was not able to contact the vehicle owner or obtain CCTV footage of the incident.

Hong Kong's fire services department told Reuters a vehicle caught fire on Sunday, but gave no details, such as the make of the car. Authorities are investigating the cause.

The incident comes three weeks after Tesla said it had sent a team to investigate a video on Chinese social media that showed a parked Tesla Model S car exploding in the commercial hub of Shanghai.

The automaker has said its EVs are about 10 times less likely to experience a fire than petrol-powered cars.

There have been at least 14 instances of Tesla cars catching fire since 2013, most of them after a crash.

DEADLY EXPLODING LITHIUM ION BATTERIES AND COBALT CORRUPT MINING SCAMS ARE KILLING AND ROBBING THE PUBLIC WITH DIRTY "BLOOD MINERALS" THAT ARE TOXIC, SELF-IGNITING DANGERS

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu, excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to say say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

NiCad Batteries and hundreds of other battery types do not have this many problems... but the ownership of the lithium mining business by Elon Musk, his Silicon Valley cartel and California Senator's families causes other solutions to be hidden, the dangers of lithium ion to be hidden and a monopoly to exist.

Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NICAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their cronies, spend over \$1B a year to still and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a "psychotic narcissist." A cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins".

It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history!

You have probably seen the many issues with Elon Musk And Tesla Motors including:

"His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising"

"His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising"

"His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising"

"This is not faithful to his girlfriends"

"The workers that build his batteries die or sicken from toxic poisoning"

"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"

"He is addicted to drugs and booze"

"He has sociopath mental issues"

"He is a narcissist"

"Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."

"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world!"

"His partner: Steve Jurvetson, has been charged with sex and corruption issues"

"He arranged government kick-backs with the White House"

"He is the world's biggest government mooch"

"He is a member of the Palo Alto Mafia"

"Google (who is a major Tesla investor) hides all negative Musk/Tesla news and hypes TSLA stock in order to profiteer with TSLA stock. This is a violation of federal SEC laws"

"More drivers have been caught driving drunk, in Tesla's, than any other car/Per Capita produced"

"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"

"His so-called 'foundation' is just a payola and tax evasion scam for his family"

"His batteries are the most dangerous use of lithium ion storage ever conceived"

"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"

"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him"

"His SpaceX is nothing more than a domestic spy satellite company"

"Musk's brain chip company tortures small animals in bad science experiments"

"His father screwed his daughter and got her pregnant"

"Dianne Feinstein and her family own Musk interests"

"You can't put out the fires when his batteries explode"

"The fumes from his thermal battery vapors give you cancer, lung and brain damage"

"Elon Musk only takes over other people's ideas. He took over Tesla and ran it into the ground, he destroyed SolarCity with his brothers self-dealing scam, his brain cap company just cuts open the heads of helpless animals and all SpaceX does, now that Musk took it over, is launch satellites that spy on civilians and manipulate media..."

etc.....You may have run across Musk's self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of the coin. We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this letter can be proven in a jury trial, Congressional hearings or live TV debates. Musk will do anything to keep this information from getting out but... it is too late for him! While this may sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conducts campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: "child labor electric car batteries".

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his "trophy wife" Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a "psychotic narcissist." He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance "Butt buddy". They share an apartment. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VC's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk "boyfriend" also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: "Musk", "Tesla" or "Tesla Fire". They send trolls and fake bloggers (many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills. There are no "Tesla Fan Boys". All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a "Tesla Fan Boy" on blogs.

The 'Silicon Valley Mafia': cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills.

If you pull a report of every VIN of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

Why aren't all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners. Let's take a look at the 'lithium' in Musk's horrifically miss-engineered lithium ion batteries:

His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu. Lithium ion batteries excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to say all other forms of energy; and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

Apple products with lithium ion batteries have been exploding and setting people on fire. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and will energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly "filling up with toxic smoke" as some lithium ion battery explodes in someone's overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electronics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency; USAID sent all of the DNC campaign financiers in Silicon Valley a federal 'report' from USAID that said there was "A TRILLION DOLLARS OF LITHIUM IN AFGHANISTAN" and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium ion batteries get a monopoly because of politician insider trading ownerships.

Tesla Motors has caused far more deaths and injuries than the world generally knows about. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their cronies, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Cole, Covington & Burling and a host of "media assassins".

Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws. Musk has exceeded FEC campaign finance limits by billions of dollars via "in-kind" services.

ELON MUSK'S SPACEX DOMESTIC POLITICAL SPY SATELLITES UNDER ATTACK ALREADY: <https://www.japantimes.co.jp/news/2019/02/12/asia-pacific/chinas-space-debris-clean-up-may-cover-story-arms-u-s-satellite-pentagon/>

<https://www.zerohedge.com/news/2019-02-24/tesla-slams-tree-florida-bursting-flames-and-killing-driver>

ELON MUSK'S PAID-FOR FAKE NEWS MEDIA SHILLS. THEY COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPXX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times,

Tesla's out-of-control sudden-acceleration surge defects and exploding batteries are not as bad as Tesla's out-of-control corruption and bribery.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

N-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal - (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC); Buzzfeed - (DNC) Perkins Cole - (DNC); Wilson Sonsini - (DNC) and hundreds of others...These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNN's Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running "Operation Echo Chamber," which reportedly continues, in which he fed information to willing corporate media scribes. "They literally know nothing," Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundation's Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: "Today, we are revealing—for the first time—the Justice Department's rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University."

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trump's team, as evidenced by Peter Strzok and Lisa Page's texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls "SPYGATE".

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Here's the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the "Electronic Surveillance Authorization" () "Foreign intelligence in relation to a US person (Trump or his associates) is information that's necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power. . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S." Such an authorization by Obama required certification by Attorney General Lorett Lynch that must be logged with the FISC court. ("The [AG] shall immediately transmit under seal to the court [FISC] a copy of his certification.")

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch report—or only selectively report—to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.

2) To create "foreign intelligence," John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.

3) Lynch certified Obama's authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into uncharted territory, and could impel any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a "smokescreen" to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.

- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, embezzle or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your target for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cuff your Facebook, LinkedIn, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are "lost". Files in the application process "disappeared". Lois Lerner hard drive "incidents" are operated in order to seek to hide information and run cover-ups.

- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national "black-lists" to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Stry and in published testimony. (Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.

- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these "targets" were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Google's "impressions" are manually controlled by Google's executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for it's ongoing prosecution of Google's political manipulation of public perceptions.

- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.

- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Payroll (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.

- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave weapon. Any one of the technical departments of the attack services listed at top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.

- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

- Covert Cartel financier: Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google's operations as "Racketeering", "Monopolistic Cartel" and "Government Coup-like" behaviors. Thousands of articles and investigations detail the fact that Google, "essentially" ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Google's investors personally told Applicant they would "kill him". Google and the Obama Administration were "the same entity". Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the "target" in order to spy on and misdirect the subject.

- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hit/etel job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you.?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and access to any devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. It WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt, and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws outlawing such attack services. The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the "FISA Memo", Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as "hit-jobs" against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case, has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage.

!!!! **Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign** !!!!!

- Second former employee of controversial data firm to be questioned by special counsel's inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica – which collapsed after the Observer revealed details of its misuse of Facebook data – confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the company's activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave EU found no evidence that the campaign "received donations or paid for services from Cambridge Analytica ... beyond initial scoping work".

Damian Collins, chairman of parliament's inquiry into fake news, said it was "no surprise" that Kaiser was under scrutiny by Mueller because "her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave EU and Arron Banks".

He said it was now vital Britain had its own inquiry into foreign interference: "We should not be leaving this to the Americans."

Tom Watson, the deputy leader of the Labour party, echoed Collins's statement, saying: "This is the first evidence that a significant player in the Leave EU campaign is of interest to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened."

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counsel's inquiry because of work done with Paul Manafort, Trump's campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, The Great Hack, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Mueller's investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clinton's presidential campaign – which indictments from Mueller's team say were obtained by Russian military intelligence – to use in Donald Trump's campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: "She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin."

Her legal representatives later wrote to the paper to say that the allegations, including that she had "channelled" donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 – long before she worked at Cambridge Analytica – and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her "about how he saw the world". He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had "unsettling" parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeria's emails and released damaging information about him to the press weeks before the election.

CBS NEWS 60 MINUTES Lara Logan "I'm Being 'Targeted' For Saying the Media is 'Mostly Liberal'" by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as "mostly liberal."

Logan told Breitbart podcaster Mike Rittland the remarks made on his show — which drew widespread attention online — amounted to "professional suicide."

Defending her remarks on Hannity's show, Logan said that as the result of her speaking out about how the media is "mostly liberal" she has been targeted because she is an independent voice.

"Any journalists who are not beating the same drum and giving the same talking points," she insisted "pay the price" for not going along with the liberal crowd.

She also called out her targeters by name.

"I know they're going to come after me," she told Hannity. "Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter."

She added: "They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They don't get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? I'm not owned by the left or the right."

Logan made headlines recently when, during a scorched earth podcast interview with Rittland, she said that there was a lot of "weight" in most news organizations on "one side of the political spectrum."

"The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So that's just a fact, right?" she told Rittland.

She also trashed reporting based on single, anonymous government sources.

"That's not journalism, that's horseshit," Logan stressed. "Responsibility for fake news begins with us. We bear some responsibility for that, and we're not taking ownership of that and addressing it. We just want to blame it all on somebody else."

=====

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Group's intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name), last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israel's secret services and described themselves as "private Mossads." Psy-Group initially stood out among its rivals because it didn't just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert "influence" operations to benefit the candidate. Psy-Group's founder and C.E.O., Royl Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The company's posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.'s elite — namely Donald Trump.

"Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll," one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

"There are dozens of payments from the media flowing into their (Fusion GPS') account," one federal law enforcement official said. "One company wired funds to Fusion (GPS) more than a dozen times."

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trump's run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories — likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was Buzzfeed — the only company to publish the full bogus dossier — on that list?

And who is on the payroll? We are trying to run that information down.

And why aren't these people behind bars?

=====

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a **'Program'** because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: ***If you cheat rather than compete you will be destroyed.***

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard...but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.

B. Suffer the firings or forced terminations of multiple senior staff.

C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.

D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.

E. Have every investor who has placed over \$50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid...EVERYTHING... and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it.

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

=====

Trump Could Save Taxpayers 'Billions Of Dollars' By Straightening Out One Corrupt Energy Department Program, Report Finds

Michael Bastasch | Energy Editor

The Trump administration could save "billions of dollars" if the Energy Department improved its management of radioactive waste cleanups, according to the Government Accountability Office (GAO).

The GAO [report](#), released Tuesday, also reported Congress could save up to \$4.3 billion by eliminating the loan program that gave \$192 million to a failed luxury electric car company.

"The Department of Energy could potentially avoid spending billions of dollars by developing a program-wide strategy to improve decision-making on cleaning up radioactive and hazardous waste," GAO reported.

The Energy Department is responsible for cleaning up waste from nuclear weapons produced during the Cold War. The department has spent \$170 billion on cleanup since 1989, GAO reported, but lots of radioactive waste remains. [\[RELATED: The NYT Walks Back Bombshell EPA Report, Doesn't Issue A Correction\]](#)

The cost of cleanup is growing. The Energy Department estimates future nuclear waste cleanup could cost \$377 billion at 16 sites across the country. GAO says taxpayers could save billions if they took a programmatic approach rather than each nuclear waste site setting its own priorities.

The 200 Area of the Hanford nuclear site is seen in a 1995 aerial photo. Department of Energy/Handout via REUTERS

For example, Energy Department officials estimated \$18 billion in savings from prioritizing high-risk over low-risk waste at the Hanford site in Washington state. The department has yet to determine what it will do with as much as two-thirds of the low-risk waste at Hanford. The Hanford site cleanup [came under increased scrutiny](#) after a "take cover" order was given in 2017 after a tunnel containing radioactive waste collapsed.

"DOE officials said that they are making progress in implementing a national programmatic approach to the cleanup and will continue to work toward this," GAO reported. "DOE provided technical comments, which were incorporated as appropriate."

GAO also highlighted an open recommendation to Congress that could save taxpayers up to \$4.3 billion.

"Unless the Department of Energy can demonstrate demand for new Advanced Technology Vehicles Manufacturing loans and viable applications, Congress may wish to consider rescinding all or part of the remaining credit subsidy appropriations," GAO reported.

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury automaker Fisker Automotive, which drew down on \$192 million before [having its government credit stripped](#) away.

Fisker's loan was [sold off to a Chinese billionaire](#) for \$25 million in 2013, netting taxpayers a \$139 million loss.

DEMAND THAT THE WHISTLE-BLOWERS RECEIVE PROTECTION AND ARE ALLOWED TO SPEAK BEFORE CONGRESS!

DOE corruption—appointed and elected officials should face prison time

Marita Noon

I

An exhaustive review of [350+ pages of leaked emails](#) regarding the Obama administration's handling of the various green-energy loan and grant programs makes several things very clear: they [led](#), engaged in favoritism, and rushed application approvals to suit the political agenda of the White House. At the same time, worthy projects that went through a complete due diligence process were denied or ultimately withdrawn, as the lengthy approval process "taxed investors' patience"—as was the case with Aptera Motors, which worked closely with the DOE for two years.

Paul Wilbur, President and CEO at Aptera, didn't think they were treated unfairly. He told me, "At the end of the day, we couldn't get through the process." But, he admits, he hasn't read the emails.

Aptera was trying to build a very efficient electric vehicle with an under \$30K price point. Wilbur met with Secretary Chu who could see the value in the technology. But our research shows that value was not the deciding factor in which projects got funded and which ones didn't. Wilbur reports that he didn't donate to any candidate. He wanted to keep the whole process clean and do what was "good for America."

The [report](#) from the House Oversight Committee says Aptera first applied for an ATVM loan in December of 2008 and "shut down on December 2, 2011." The report implies that Aptera was led on: "After numerous negotiations with DOE, in September 2011, Aptera received a conditional loan commitment of \$150 million if the company was able to raise \$80 million privately." And: "The loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company."

Aptera's 100% US technology has since been sold to a Chinese company.

Aptera was applying for an Advanced Technology Vehicle Manufacturing loan (ATVM). Only five loans were given out through the program and all have political ramifications. Christine Lakatos, who has worked with me on the green-energy, crony-corruption reports I've written, has done thorough research on the topic. She has read each and every one of the 350+ pages of emails released on October 31 and has written a [blog post](#) specifically addressing the ATVM program and its hijinks. As she cites, Fisker and Tesla (which Romney referenced in the first debate) got loans in 2010 and then the Vehicle Production Group's loan was the only ATVM loan closed in 2011; all have ties to Obama bundlers. The other two ATVM loans went to Ford and Nissan—both of which, according to the House [report](#), "were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012-2016 at the time the DOE was considering their applications. Both companies eventually expressed publicly their support for the standards, which the Administration described as the 'Historic Agreement.'"

Armed with the sweeping knowledge of the House reports and subsequent hearings, evidence from DOE staffers (many of whom were appointed by Obama), Lakatos' research, and personal experience, a different ATVM applicant has now taken its case to court citing "corruption and negligence."

On November 16, 2012, [XP Technologies](#) filed a lawsuit against the federal government concerning the DOE's denial of XP Technology's loan guarantee application. The [complaint](#) alleges: "criminal activities did take place by DOE staff and affiliates." A November 23 [press release](#) announces that XP Technologies is now represented by [Cause of Action](#), "a nonprofit, nonpartisan organization that uses investigative, legal, and communication tools to educate the public on how government accountability and transparency protects taxpayer interests and economic activity."

According to the document filed on November 16, "Plaintiffs' backgrounds include extensive issued patents on seminal technologies in use world-wide, White House and Congressional commendations and an engineering team of highly experienced auto-makers. Plaintiff brought a vehicle design, which was proposed as the longest range, safest, lowest cost electric vehicle, to be built in America in order to deliver extensive American jobs nationwide. No other applicant, or award 'winner', has succeeded in meeting, or (is) intending to meet, that milestone. XP Technology developed a patented lightweight, low-cost, long-range, electric vehicle using air-expanded foam-skinned material for a portion of the polymer body and received numerous patents, acclaim and superior computer modeling metrics over any competing solution. XP presented a vast set of letters of support to DOE from pending customers. Major auto-industry facilities and engineers had joined forces to bring the vehicle to the defense, commercial and consumer market."

Over the weekend, we had an exclusive interview, on condition of anonymity, with a senior official at XP Technologies about the lawsuit and the experience.

He reported: "Staff from within the DOE have provided evidence which is quite compelling." As Aptera's Wilbur made clear, the individuals within the DOE were very thorough. One of the emails, in the 350+ pages, was from Secretary Chu himself in which he criticized staffers for taking a "principled stand," which held up the approval process of projects the White House wanted advanced. Another indicated that the pressure to rush was coming from "above the agency." Overall, the emails show that projects were rushed so that announcements could coincide with visits, speeches, and photo ops —as well as providing talking points for the president.

Our XP source told us "We experienced, and have been provided evidence of, applicant submissions and reviews being modified in order to benefit some and disadvantage others, and the business connections between the different parties associated with the ones that benefited is quite extraordinary." The leaked emails support this accusation, specifically regarding the "business connections." In her post, Lakatos calls it "green fraternizing." The emails show that certain applicants and decision makers went bike riding together, had coffee meetings, sleepovers, beer summits, parties, dinners, and fundraisers.

While he didn't provide us with a name, the XP official said, "We experienced a senior senator blockading our efforts and then providing favors to a competitor, which then benefited his family financially." The discovery the lawsuit will provide will expose the "senior senator," but our previous research shows that [Senator Harry Reid](#)'s actions seem to fit the XP official's comment.

XP Technologies believes that "DOE officials changed the first-come-first-served published rules and standards of the funding in order to take applicants in order of who they favored and who had purchased the most influence instead of the order in which they applied, as required."

Having extensively studied the DOE's various loan programs, including the ATVM, Lakatos and I agree with our source's startling conclusion: "Based on the evidence provided by investigators, and experienced directly by our team, it is hard to imagine that at least one or more elected, or appointed, officials might not be seeing measures ranging from censure or even federal prison time."

Time, the lawsuit, and subsequent investigation will tell.

While the House Oversight Committee has been digging deeply into the mismanagement and corruption of the green energy loans, the media has paid little attention. Other than [our report](#), the October 31 release of the emails cited here received virtually no news reporting. Even the Fox News Channel ignored the story. The plight of promising companies like Aptera and XP Technologies would have gone unnoticed if not for the lawsuit. The legal complaint attracted attention.

On November 16, the [Heritage Foundation](#) broke the XP story: "A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energy's decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribe."

On November 19, Lakatos, whose work is listed as "evidence" in the legal complaint, received a call from Fox News' Gary Gastelu—who [reported on the story](#) on November 20. The next day, Fox News covered the lawsuit on America's Newsroom. Even the Drudge Report picked up on the story.

XP has a [litigation website](#) on which the company states: "The case has nothing to do with complaining about not getting the loans. It has everything to do with HOW the applicants didn't get the loans!" They are communicating with other applicants about participating in the lawsuit.

The XP story and subsequent media coverage offers a lesson for others—especially industries who have been wronged by the Obama Administration's practices (such as energy). The lawsuit may—or may not—send officials to federal prison, as our XP source suggests, but it could go a long way to winning in the court of public opinion.

THE SILICON VALLEY CARTEL MEMBERS
The Worst Ones - Rev 2.2

You would be shocked to learn how many people are killed, every day, for less than \$50 00. ISIS and the Taliban will saw your head off for just an ideology. If people would commit murder over that small an amount of money, imagine what they would do to control the trillions of dollars of money that is always moving through the stock market. These are the people that will stop at nothing for power, mansions, hookers, private jets and greed!

THE BRIBED INSIDER TRADING POLITICIANS - Tracked via financial records and email leaks to quid pro quo:

- Aneesh Chopra - White House Tech Exec
- Arnold Schwarzenegger - Governor (Accused of political bribery and kickbacks; tax evasion, illicit deal organization with Russians and more...)

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
- Alphabet - Privacy abuse, spy-on-the-public. Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
- Facebook/Meta - Privacy abuse, spy-on-the-public. Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)
- Google, Inc. -- Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and more...) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
- In-Q-Tel, Inc. -- CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran "hit-jobs" on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
- Nampah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
- LinkedIn - Election manipulation networking site
- Solyndra Solar Company -- FBI-raided corrupt Clean Tech company
- SpaceX -- Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits
- Tesla Motors -- Car Company that conduits money to campaigns

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.
